The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. These are now being revised.

The constitution of Niger, adopted on November 8, 1960, provided for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly. In April 1974 Lt.-Col. Seyni Kountché seized power, suspended the Constitution, dissolved the National Assembly, and suppressed all political organizations. He then set up a Supreme Military Council with himself as President. President Kountché died on Nov. 10, 1987 and was succeeded peacefully by his cousin, Col. Ali Saibou.

Since coming to power, Col. Saibou has restored a measure of normal political life. There is a single political party, the Mouvement National de la Société de Développement (MNSD). A draft constitution will be the subject of a referendum in Sept. 1989, and presidential and legislative elections will be held in Dec. 1989.

Finance.—The 1987 General Budget allocation was CFA 198,100 million.

Trade.—The cultivation of ground-nuts and the production of livestock are the main industries and

provide two of the main exports. A company formed by the Government, the French Atomic Energy Authority and private interests is exploiting uranium deposits at Arlit, and this is the main export.

Trade with U.K.

	1987	1988
Imports from U.K.	£7,026,000	£7,562,000
Exports to U.K.	10,556,000	1,359,000

CAPITAL.—Niamey (pop. 399,100).

CURRENCY.—Franc C.F.A. of 100 centimes.

FLAG.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe.

NATIONAL DAY.—December 18.

British Ambassador, (*resident at Abidjan, Côte d'Ivoire*).

NORWAY
(Kongeriket Norge)

King, Olav V, K.G., K.T., G.C.B., G.C.V.O., b. July 2, 1903; succeeded, Sept. 21, 1957, on death of his father King Haakon VII; married March 21, 1929, Princess Märtha of Sweden (*born* March 28, 1901; *died* April 5, 1954); having issue, Prince Harald (*see below*), Princess Ragnhild (b. 1930), and Princess Astrid (b. 1932).

Heir-Apparent, H.R.H. Prince Harald, g.c.v.o., b. Feb. 21, 1937; m. Aug. 29, 1968, Sonja Haraldsen, and has issue Princess Märtha Louise, b. Sept. 22, 1971, and Prince Haakon Magnus, b. July 20, 1973.

CABINET

ROYAL NORWEGIAN EMBASSY
25 Belgrave Square, SW1X 8QD
[01-235 7151]

Ambassador Extraordinary and Plenipotentiary, His Excellency Kjell Eliassen (1989).

Minister-Counsellor, Haakon B. Hjelde.

Counsellors, Paul Moe (*Press and Cultural*); Marius Hauge (*Fisheries*); Eva Bugge (*Economic*); Viggo Smestad (*Commercial*).

First Secretaries, K. Harald Dalen (*Political*); T. S. Kijewski (*Consul*); R. Aasheim (*Economic*).

Second Secretaries, A. Rikter-Svendsen (*Press, Information and Cultural*).

Area and Population.—Norway is a kingdom in the northern and western portion of the Scandinavian

peninsula, and was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,542 km., and the frontier between Norway and the neighbouring countries is 2,542 km. (Sweden 1,619 km., Finland 727 km. and U.S.S.R. 196 km.). It is divided into 19 counties (*fylker*) and comprises an area of 149,282 sq. miles (386,638 sq. km.), of which Svalbard and Jan Mayen have a combined area of 24,101 sq. km., with a population (April 1989) of 4,224,606.

The Norwegian coastline is extensive, deeply indented with numerous fjords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the Midnight Sun; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured Northern Lights or Aurora Borealis, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia.

Language and Literature.—Old Norse literature is among the most ancient and richest in Europe. Norwegian in both its present forms is closely related to other Scandinavian languages. Independence from Denmark (1814) and resurgent nationalism led to the development of 'new Norwegian' based on dialects, which now has equal official standing with 'bokmål', in which Danish influence is more obvious. This was formed in the time of the Reformation, and Ludvig Holberg (1684–1754) is regarded as the father of Norwegian literature, though the modern period begins with the patriotic and romantic writings of Henrik Wergeland (1808–1845). Some of the famous names are Henrik Ibsen (1828–1906), Bjørnstjerne Bjørnson (1832–1910), Nobel Prizewinner in 1903, and the novelists Jonas Lie (1833–1908), Alexander Kielland (1849–1906), Knut Hamsun (1859–1952) and

Sigrid Undset (1882–1949), the latter two both Nobel Prizewinners, and the latter a champion of Norwegian womanhood. In 1989 there were 153 daily newspapers.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

The three-party coalition government fell on May 1, 1986, when it lost a vote of confidence, and was succeeded by a minority Labour government which took office on May 9, 1986.

Production.—The cultivated area is about 8,636 sq. km. (2·3 per cent of total surface area); forests cover nearly 25 per cent; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1987 the total catch amounted to 1,867,720 tonnes.

The chief industries are manufactures, agriculture and forestry, fisheries, mining, production of metals and ferro-alloys and shipping. Also in recent years industries providing both manufactured products and services for the development of North Sea oil and gas resources have assumed growing importance. In 1988, the total workforce was 2,163,000 of which 324,000 persons were employed in Norwegian industry. Manufactures are aided by great resources of hydro-electric power. Actual production in 1988 amounted to 110,063 Gwh.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. The period of compulsory national service is 15 months (without refresher training) in the Navy and Air Force, and 12 months (with refresher training) in the Army. In March 1978 Norway committed an infantry battalion with additional support to the U.N. Interim Force in the Lebanon.

Education.—Education from 7 to 16 is free and compulsory in the 'basic schools' maintained by the municipalities with State grants-in-aid. The majority of the pupils receive post-compulsory schooling at 'upper secondary' schools, colleges of education (19) regional colleges akin to polytechnics (12), universities (4) and other university-level specialist institutions.

Communications.—The total length of railways open at the end of 1988 was 4,070 km., excluding private lines. There are 87,603 km. of public roads in Norway (including urban streets). At the end of 1988, 2,893,639 road motor vehicles were registered.

Scheduled internal air services are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S.

The Merchantile Marine, 1988, consisted of 1,532 vessels of 12,921,932 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel).

FINANCE

	1987	1988
Total Revenue	K321,677,000	K342,900,000
Total Expenditure	282,648,000	309,717,000

TRADE

	1987	1988
	million Kroner	
Total imports	211,794	217,455
Total exports	199,731	213,117

Trade with U.K.

	1987	1988
Imports from U.K.	£1,220,844,000	£1,053,613,000
Exports to U.K.	3,290,339,000	3,074,312,000

The chief imports are raw materials, motor vehicles, chemicals, motor spirit, fuel and other oils; coal, ships and machinery; together with manufactures of silk, cotton and wool. The exports consist chiefly of crude oil and gas, manufactured goods, fish and products of fish (as canned fish, whale oils), pulp, paper, iron ore and pyrites, nitrate of lime, stone, calcium carbide, aluminium, ferro-alloys, zinc, nickel, cyanamide, etc.

CAPITAL.—Ø Oslo (incl. Aker). Pop. (Jan. 1987), 450,808. Other towns are Ø Trondheim, 135,542; Ø Bergen, 209,912; Ø Stavanger, 96,316; Ø Kristiansand, 63,637; Ø Drammen, 51,807; Ø Tromsø, 49,358.

CURRENCY.—Krone of 100 øre.

FLAG.—Red, with white-bordered blue cross.

NATIONAL ANTHEM.—Ja, Vi Elsker Dette Landet (Yes, we love this country).

NATIONAL DAY.—May 17 (Constitution Day).

TERRITORIES

SVALBARD. By Treaty (Feb. 9, 1920) the sovereignty of Norway over the Spitsbergen (Pointed Mountain) Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, Norway assumed sovereignty. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to ■ British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. 288,000 metric tons of coal were extracted from Norwegian mines in Svalbard in 1980.

The Svalbard Archipelago lies between 74°–81° N.

lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seals, foxes and polar bears.

South Cape is 355 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2 to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'–71° 9' N. lat. and 7° 53'–9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 48' S. lat. and 90° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

OMAN

(The Sultanate of Oman)

Sultan, Qaboos Bin-Said, succeeded on deposition of Sultan Said bin Taimur, July 23, 1970. (The Sultan acts ■ his own Prime Minister, Minister of Foreign Affairs, Defence and Finance.)

COUNCIL OF MINISTERS
(as at June 30, 1989)

Agriculture and Fisheries, H.E. Muhammad bin Abdullah bin Zahir al Hinai.

Commerce and Industry, H.E. Col. Salim bin Abdullah al Ghazali.

Communications, H.E. Hamoud bin Abdullah al Harthi.

Deputy P.M., Security and Defence, H.H. Sayyid Fahr bin Taimur Al Said.

Office of the Personal Representative of H.M. The Sultan, H.H. Sayyid Thuwaini bin Shihab Al Said.

Education and Youth Affairs, H.E. Yahya bin Mahfuth al Manthari.

Electricity and Water, H.E. Khalfan bin Nasr al Wahaibi.

Environment, H.H. Sayyid Shabib bin Taimur Al Said.

Deputy P.M., Financial and Economic Affairs, H.E. Qais bin Abdul Munim al Zawawi.

Minister of State for Foreign Affairs, H.E. Yusuf bin Alawi bin Abdullah.

Health, H.E. Dr. Ali bin Muhammad bin Musa.

Housing, H.E. Malik bin Sulaiman al Ma'mari.

Information, H.E. Abdul Aziz bin Muhammad al Rowas.

Interior, H.E. Sayyid Badr bin Saud bin Harib al Bu Saidi.

Justice, Awqaf and Islamic Affairs, H.E. Sayyid Hilal Bin Saud bin Hamad Al Bu Saidi.

Deputy Prime Minister for Legal Affairs, H.H. Sayyid Fahd bin Mahmoud Al Said.

National Heritage and Culture, H.H. Sayyid Faisal bin Ali Al Said.

Petroleum and Minerals, H.E. Said bin Ahmad bin Said al Shanfari.

Posts, Telegraphs and Telephones, H.E. Ahmad bin Suwaidan al Balushi.

Regional Municipalities, H.E. Sheikh Muhammad bin Ali al Qutbi.

Social Affairs and Labour, H.E. Sheikh Mustahail bin Ahmad al Mashani.

President, Consultative Council of the State, H.E. Sheikh Abdullah Bin Ali Bin Muhammad Al Qutbi.

Office of the Minister of State and Wali of Dhofar, H.E. Sayyid Musallim Bin Ali Al Bu Saidi.

President, Diwan of Royal Court Affairs, H.E. Sayyid Saif bin Hamad bin Saud.

First ADC to H.M. The Sultan and President of the Palace Office, H.E. Maj.-Gen. Ali bin Majid al Mamari.

Civil Service, H.E. Ahmad Bin Abdul Nabi Macki.

Secretary to the Council of Ministers, H.E. Sayyid Hamoud bin Faisal Al Bu Saidi.

EMBASSY OF THE SULTANATE OF OMAN
44A/B Montpelier Square, SW7 1JJ
(01-584 6782/3/4)

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

The independent Sultanate of Oman lies at the eastern corner of the Arabian Peninsula. Its seaboard is nearly 1,000 miles long and extends from near Tibat on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast which belongs to Sharjah and Fujairah of the United Arab Emirates. Ras Darbat Ali marks the boundary between the Sultanate and the People's Democratic Republic of Yemen. The Sultanate extends inland to the borders of the Rub al Khali, or Empty Quarter of the Arabian Desert.

The area of Oman has been estimated at 82,030 sq. miles (212,457 sq. km.), and the population at 1,500,000 (1986). The inhabitants of the North are for the most part Arab but along the coast there is a strong infusion of negro blood, while in the Capital Area which stretches from Muscat to Seeb there are large communities of Hindus, Khojas and Baluch, in addition to Zanzibaris of Omani origin. In Dhofar there is also a infusion of negro blood around Salalah, but in the mountains the inhabitants are either of pure Arab descent or belong to tribes of pre-Arab origin, the Qarra and Mahra, who speak their own dialects of semitic origin.

Physically and historically modern Oman can be split into two main parts, the North and the South, divided by a large tract of desert. Northern Oman has three main sections. The *Batinah*, the coastal plain, varies in width from 30 miles in the neighbourhood of Suwaq to almost nothing at Muscat where the mountains descend abruptly to the sea. The plain is fertile, with date gardens extending over its full length of 150 miles. The *Hajar*, a mountain spine running from north west to south east, reaching nearly 10,000 feet in height on *Jabal Akhdar*. For the most part the mountains are barren, but numerous valleys penetrate the central massif of *Jabal Akhdar* and in these there is considerable cultivation irrigated by wells or a system of underground canals called *falajs* which tap the water table. The two plateaus leading from the western slopes of the mountains, the *Dhahirah*, in the north and the *Shargia* in the south east also have centres of

settlements and cultivation. They fall from an average height of 1,000 feet into the sands of the Empty Quarter. The north is separated from the south by nearly 400 miles of inhospitable country crossed by one trunk road, the only land link. *Dhofar*, the southern province, is the only part of the Arabian Peninsula to be touched by the south-west monsoon. Temperatures are more moderate than in the north and sugar cane and coconuts are grown on the coastal plain, while cattle are bred on the mountains.

Government.—A Consultative Council for the State was established by Sultanic decree on October 18, 1981. The Council is a nominated body consisting of 55 members (36 representing the public and 19 representing the government). The Council's jurisdiction is confined to economic affairs and social development.

Commerce and Trade.—Trade is mainly with the United Kingdom, Japan, the Netherlands, U.S., Federal Republic of Germany, France and India. Total imports for the year 1987 were OR 700,730,000. Chief imports were machinery, cars, building materials, refined petroleum and food and telecommunications equipment.

Trade with U.K.

	1987	1988
Imports from U.K.	£249,916,000	£344,875,000
Exports to U.K.	3,951,000	146,751,000

Production.—Petroleum Development (Oman) Ltd. (owned 60 per cent by Oman Government and 34 per cent by Shell) began exporting oil in 1967. Concessions (off and on shore) are held by several major international companies. The current level of oil production is about 650,000 barrels per day.

Development.—For many years the Sultanate was a poor country with a total annual income of less than £1,000,000. The advent of oil revenues since 1967 and the change of regime in 1970 led to the initiation of a wide-ranging development programme, especially concerned with health, education and communications. New hospitals have been completed in the main provincial centres and there are now 40 hospitals with 2,861 beds, and 696 schools, with 272,018 pupils, were in operation in 1987. A gas turbine power station operates at Raisail, where there is also a 200 plot industrial estate. There is a desalination plant near Muscat and flour, animal feed, cement and copper production facilities.

Communications.—Since 1972 ships have been using Port Qaboos at Matrah, where eight deep water berths have been constructed as part of the new harbour facilities.

The telegraph office, an automatic telephone service in Muscat and Matrah and an international telephone service are operated by the General Telecommunications Organization. There are now good tarmac roads linking most main population centres of the country with the coast and with the towns of the U.A.E. There is now over 4,000 km. of asphalted road in the Sultanate.

CAPITAL.—Muscat, population (estimated), 400,000. The commercial centre has grown around Mutrah, 3 miles away and the main port, and Ruwi. The main towns on the northern coast are *Sur*, *Barka* and *Sohar*. The main town of Dhofar is Salalah.

CURRENCY.—Rial Omani (OR) of 1,000 baiza.

FLAG.—Red, green and white with crossed daggers in red sector.

NATIONAL DAY.—November 18.

*Ambassador Extraordinary and Plenipotentiary, His
Excellency Shaharyar M. Khan (1987).*

*Ministers, Karam Elahi (Deputy Head of Mission);
Khurshid Anwar (Political).*

Defence Attaché, Brig. Saeed Ismat.

*Area and Population.—The Islamic Republic of
Pakistan consists of country situated to the north-
west of the Indian sub-continent, bordered by Iran,
Afghanistan, the disputed territory of Kashmir, and
India. It covers a total area of 307,374 sq. miles
(746,045 sq. km.). Running through Pakistan are five
great rivers, the Indus, Jhelum, Chenab, Ravi and
Sutlej. The upper reaches of these rivers are in
Kashmir, and their sources in the Himalayas.*

The Government of Pakistan census in 1981 showed a population figure of 83,780,000 (1985 U.N. estimate, 96,180,000). Of these, about 95 per cent are Muslims, about 1 per cent Hindus, 3·5 per cent Christians, and 0·5 per cent Buddhists.

Government.—Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received Royal Assent on July 18, 1947. In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The States of Bahawalpur and Khairpur (in Punjab and Sind), with a Muslim population of almost 80 per cent and with Muslim rulers, acceded to Pakistan in October, 1947. The following States also acceded to Pakistan: the Baluchistan States of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. (The States of Junagadh and Manavadar which had acceded to Pakistan were occupied by India on November 8, 1947.) Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) were defined by a Boundary Commission. Thus, until 1972 when East Pakistan seceded, Pakistan consisted of two geographical units, West and East Pakistan, which were separated by about 1,100 miles of Indian territory.

Pakistan became a Republic on March 23, 1956, when a Parliamentary Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law.

The first general elections ever held in Pakistan on a basis of 'one man, one vote', were held in Dec. 1970 and Jan. 1971. The Awami League in East Pakistan, led by Sheikh Mujibur Rahman, and the Pakistan People's Party in West Pakistan, led by Zulfikar Ali Bhutto, won large majorities. Following the elections there was total disagreement between the two main parties on the question of a new Constitution for Pakistan, Sheikh Mujibur insisting on complete autonomy for East Pakistan. The proposed opening of the National Assembly at Dacca on March 25, 1971, was postponed and civil war broke out. East Pakistan seceded by unilateral declaration the following day. Fighting continued until Dec. 1971 when a ceasefire was arranged, and 'The Democratic Government of Bangladesh' was formally proclaimed on April 17, 1972.

Following general elections in March 1977 and allegations of vote-rigging the armed forces under Gen. Zia-ul-Haq assumed power on July 5, 1977 and imposed martial law throughout the country. The military government scheduled new general elections for October 1977, but these were postponed. Gen. Zia declared himself President on Sept. 16, 1978. In Dec. 1984 Gen. Zia got a five-year mandate as a civilian President through a national referendum. Martial law was lifted on Dec. 30, 1985. On May 29, 1988, Zia dissolved the National Assembly and the Cabinet and announced fresh elections. A caretaker cabinet was announced on June 9. Zia was killed in a plane crash on Aug. 17, 1988, and the Senate Chairman, Ghulam Ishaq Khan, assumed the office of President. The Pakistan People's Party won the election to the National Assembly and Benazir Bhutto became Prime Minister on Dec. 2, 1988. The legislature then elected President Ghulam Ishaq Khan a constitutional President.

Education.—Formal education in Pakistan is organized into five stages. These are five years of primary education (5-9 years), three years of middle or lower secondary (general or vocational), two years of upper secondary, two years of higher secondary (intermediate) and two to five years of higher education in colleges and universities. Education is free to upper secondary level. It was expected that primary education would become universal for boys by mid-1985 and for girls by mid-1988.

At primary level enrolment had increased to 6·5

million in 1984–85, and the number of schools to 75,000. At the middle level enrolment had increased to 1·7 million in 1984–85, and the number of schools to 6,200. At the upper secondary level enrolment increased to 570,000 in 1984–85.

Provincial Governments are responsible for the total financial support of the government institutions and for grants to non-government institutions. But policy making is authorized by the national Government, which makes annual grants. In 1986, 24 per cent of adults were estimated as being literate.

Production.—Pakistan's economy is chiefly based on agriculture. The principal crops are cotton, rice, wheat, sugar cane, maize and tobacco. There are large deposits of rock salt. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is 33 million acres.

Pakistan also produces hides and skins, leather, wool, fertilizers, paints and varnishes, soda ash, paper, cement, fish, carpets, sports goods, surgical appliances and engineering goods, including switch-gear, transformers, cables and wires.

Trade.—Pakistan imported manufactured goods and raw materials to the value of US\$5,792 million in 1986–87 and exported mainly agricultural products valued at US\$3,498 million. Principal imports are listed as: petroleum products, machinery, fertilizers, transport equipment, edible oils, chemicals and ferrous metals. Principal exports are raw cotton, cotton yarn and cloth, carpets, rice, petroleum products, synthetic textiles, leather, and fish.

Trade with U.K.

	1987	1988
Imports from U.K.	£252,978,000	£263,300,000
Exports to U.K.	167,315,000	175,337,000

Finance.—The 1989–90 Budget anticipated net federal revenues of Rs.127,407·4 million and current expenditure (excluding development expenditure) of some Rs.124,878·5 million.

Communications.—The main seaport is Karachi. The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country as well as abroad.

Post and telegraph facilities are available to every country in the world.

CAPITAL.—Islamabad, pop. 350,000. Karachi (pop. est. 6,500,000) is the largest city and seaport; Lahore has a population of about 3,500,000.

CURRENCY.—Pakistan rupee of 100 paisa.

FLAG.—Dark green ground, with white vertical stripes at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.

NATIONAL ANTHEM.—‘Quami Tarana.’

NATIONAL DAYS.—March 23 (Pakistan Day), August 14 (Independence Day).

EMBASSY OF THE REPUBLIC OF PANAMA 119 Crawford Street, W1H 1AF [01-487 5633]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Lic. Guillermo Vega (1984).
Minister-Counsellor, Prof. Dionisio Johnson.*

CONSULATE 24 Tudor Street, EC4Y 0JD [01-353 4792/3].

There is also a Consular Office of the Republic at Liverpool.

Panama lies on the isthmus of that name which connects N. and S. America. The area of the Republic is 29,762 sq. miles (77,082 sq. km.), the population (1986 estimate) 2,227,254. After a revolt (Nov. 3, 1903) it declared its independence from Colombia and established a separate Government.

After 1968 control of Panama was increasingly taken over by Gen. Omar Torrijos, Commander of the National Guard, following a military coup. In 1972 General Torrijos was designated ‘Leader of the Revolution’ with wide overriding powers. In October 1978 he withdrew from the government, and Dr. Aristides Royo was elected President by the Assembly of Representatives. In a Presidential election in May 1984, Dr. Nicolas Barletta was elected president and took office in Nov. 1984. However, he resigned in Sept. 1985 after disagreements with military leaders and was succeeded by his Vice-President, Eric Arturo Delvalle. An attempt in Feb. 1988 by President Delvalle to remove Gen. Noriega as Commander of the Defence Forces failed. Noriega, using the legislative body dominated by his supporters, ousted Delvalle and replaced him with Manuel Solis Palma. The U.S. Government continues to recognize President Delvalle and has broken off diplomatic relations with Panama. Presidential elections were held on May 7, 1989, but many observers felt them to be fraudulent. Gen. Noriega annulled the results, which had appeared to give victory to the opposition.

The Panama Canal Zone.—With effect from Oct. 1, 1979 the Canal Zone (647 sq. miles) was disestablished, with all areas of land and water within the Zone reverting to Panama. By the 1977 treaty with the U.S.A., the U.S.A. is allowed the use of operating bases for the Panama Canal, together with several military bases, but the Republic of Panama is sovereign in all such areas. Control of the Canal will revert to Panama in the year 2000.

The soil is moderately fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, sugar, coconuts, cacao, coffee and cereals. The shrimping industry plays an important role in

the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years.

Language and Literature.—The official language is Spanish. There are five Spanish language and one English language newspapers published daily in the capital but in 1988 the opposition press was banned.

TRADE

Republic of Panama	1987	1988
Imports	US\$1,211 m	US\$735 m
Exports	338 m	279 m
Colon Free Zone	1987	1988
Imports	US\$2,044 m	US\$1,843 m
Exports	2,285 m	2,119 m

Trade with U.K.†

	1987	1988
Imports from U.K.	£40,020,000	£32,497,000
Exports to U.K.	4,919,000	12,230,000

† Including Colon Free Zone.

The imports are mostly manufactured goods, machinery, lubricants, chemicals and foodstuffs; exports are bananas, petroleum products, shrimps, sugar, meat and fishmeal.

CAPITAL, Panama City. Population (1985 est.), 608,890.

CURRENCY.—Balboa of 100 centésimos. US notes are also in circulation.

FLAG.—Four quarters; white with blue star (top, next staff), red (in fly), blue (below, next staff) and white with red star.

NATIONAL ANTHEM.—"Alcanzamos Por Fin La Victoria" (Victory is ours at last).

NATIONAL DAY.—November 3.

Dependencies of Panama.—Taboga Island (area 4 sq. miles) is a popular tourist resort of some 12 miles from the Pacific entrance to the Panama Canal. Tourist facilities have also been developed in the Las Perlas Archipelago in the Gulf of Panama, particularly on the island of Contadora. There is a penal settlement at Guardia on the island of Coiba (area 19 sq. miles) in the Gulf of Chiriquí.

EMBASSY OF PARAGUAY

Braemar Lodge, Cornwall Gardens, SW7 4AQ
[01-937 1253; Consulate: 01-937 6629]

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

Counsellor and Consul General, Rubén Alvarenga-Cabañas.

Area and Population.—Paraguay is an inland subtropical state of South America, situated between Argentina, Bolivia and Brazil.

The area is estimated at 157,048 sq. miles (406,752 sq. km.), with a population (1988 estimate) of 4,000,000.

Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as Neembucú, an endless, is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is a flat plain, rising uniformly towards its western boundary to a height of 1,140 feet; it suffers much from floods and still more from drought, but the building of dams and reservoirs has converted part of it into good pasture for cattle raising.

Government.—In 1535 Paraguay was settled by Spanish possession. In 1811 it declared its independence of Spain.

The constitution provides for a two-chamber parliament consisting of a 36-member Senate and a 72-member Chamber of Deputies. Two-thirds of the seats in each chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18.

The President is elected for 5 years and may be re-elected for a further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies. The state of siege, in force since 1947, was lifted on April 8, 1987.

Production.—About three-quarters of the population are engaged in agriculture and cattle raising. Cotton, soya beans, tobacco, edible and essential oils, sugar, coffee and timber are the main exports. The forests contain many varieties of timber which find a good market abroad. Paraguay's hydroelectric power station at Itaipú produced in 1985, 1,118 Kwh. of which a surplus is exported to Argentina and Brazil.

At Itaipú the largest hydroelectric dam in the world, a joint project by Paraguay and Brazil, was inaugurated in 1982. It is expected to be completed in 1990 when it will have a capacity of over 12 million kw. Work is also under way on a hydroelectric project with Argentina at Yacyretá which it is hoped will be in operation by the end of the decade.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be

accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). This service is liable to cancellation without warning when the river is low or in flood. There are direct shipping services to Asunción from Britain, Western Europe and the U.S.A. Eight airlines operate services from Asunción.

There are 1,176 km. of asphalted roads in Paraguay, connecting Asunción with São Paulo (26 hrs.) via the Bridge of Friendship and Foz de Yguazú and with Buenos Aires (24 hrs.) via Puerto Pilcomayo, and about 4,050 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. A 1,000 km. road, of which 300 km. ■ paved, links Asunción with the Bolivian border. There are services to Buenos Aires, São Paulo and Paranaguá, a port on the Brazilian coast.

Defence.—There is a permanent military force of about 25,000 all ranks, most of whom are conscripts doing their military service; and about 6,500 armed police (again mostly conscripts). Three gunboats and a number of small armed launches patrol inland waters.

Language and Literature.—Spanish is the official language of the country but outside the larger towns *Guarani*, the language of the largest single unit of original Indian inhabitants, is widely spoken. Four daily, one weekly and one bi-weekly newspapers are published in Asunción. There are 48 AM, 15 FM and three TV stations in the country.

Education.—Education is free and compulsory. In 1984 there were 3,209 government primary schools and 587 private schools with 559,080 pupils and 22,091 teachers. There are 713 secondary schools with 149,019 pupils and 2,448 teachers. The National University in Asunción had in 1984 20,343 students. The Catholic University had 10,971 students.

BUDGET 1989 (in million guaranies)

	Central Government	Decentralized Bodies
Expenditure	376.5	919.8

Trade.—Total value of imports (US\$) in 1988 was \$441,000,000. The chief imports were machinery (\$80,295,000); fuels and lubricants (\$67,792,000); transport and accessories (\$35,340,000); and drinks and tobacco (\$37,147,000). Total value of exports in 1988 was \$720,421,000. The chief exports were soya bean (\$158,714,000); cotton fibres (\$158,816,000); sawn wood (\$12,138,000); and processed meat (\$13,196,000).

Trade with U.K.

	1987	1988
Imports from U.K.	£25,409,000	£22,024,000
Exports to U.K.	1,409,000	1,950,000

CAPITAL, Asunción, about 1,000 miles up the River Paraguay from Buenos Aires. Pop. (census, 1985), 729,307; other centres being Ciudad Presidente Stroessner (98,491); Encarnación (31,445); Concepción (25,607); P. Juan Caballero (41,475).

CURRENCY.—Guarani (Gs) of 100 céntimos.

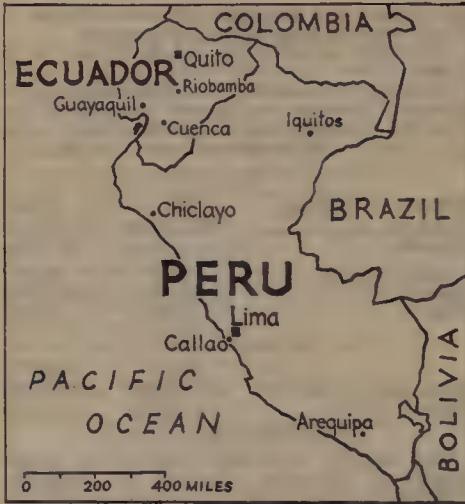

FLAG.—Three horizontal bands, red, white, blue with the National seal on the obverse white band and the Treasury seal on the reverse white band.

NATIONAL ANTHEM.—“Paraguayos, Republica O Muerte” (Paraguayans, republic or death).

NATIONAL DAY.—May 14.

Ambassador Extraordinary and Plenipotentiary, Felipe Valdiveiso-Belaúnde (1989).
Counsellor, Julio Florián.
Minister, Gilbert Chauny.
Air Attaché, Maj. Gen. Juan Morante.

Area and Population.—Peru is a maritime Republic of South America, situated between 0° 00' 48" and 18° 21' 00" S. latitude and between 68° 39' 27" and 81° 20' 13" W. longitude. The area of the Republic is 496,225 sq. miles (1,285,216 sq. km.), with a population estimated (1985) at 19,700,000.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel

to the Pacific coast, the highest points in Peru being *Huascarán* (22,211 ft), *Huandoy* (20,855 ft), *Ausangate* (20,235 feet), *Misti* volcano (18,364 ft), *Hualcan* (20,000 ft), *Chachani* (19,037 ft), *Antajasha* (18,020 ft), *Pichupichu* (17,724 ft), and *Mount Meiggs* (17,583 ft).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montaña*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there.

Language and Literature.—Spanish, the language of the original Spanish stock from which the governing and professional classes are mainly recruited, was formerly the only official language of the country. However, in May 1975, the Quechua language was declared the second official tongue. Quechua and Aymará are widely spoken by more than half the population of the country. Before the arrival of Pizarro, the Incas had attained a high state of culture, traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856, and is that of a democratic Republic. A new constitution was drawn up and approved in July 1979.

Production.—The chief products of the coastal belt are cotton, sugar and petroleum. There are large tracts of land suitable for cultivation and stock raising on the eastern slopes of the Andes, and in the mountain valleys maize, potatoes and wheat are grown. The jungle area is a source of timber and petroleum. Other major crops are fruit, vegetables, rice, barley, grapes and coffee. Mineral exports include lead, zinc, copper, iron ore and silver. Peru is normally the world's largest exporter of fishmeal.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical and little known eastern zones, which lie east of the Andes towards the borders of Brazil. The completion in 1944 of the trunk road of the Andean Highway from the Pacific port of Callao, via Lima to Pucallpa, the river port on the Ucayali, forms a link between the Pacific, the Amazon and the Atlantic. The Panamerican Highway runs along the Peruvian coast connecting it with Ecuador and Chile. The Inter-Ocean Corridor linking the port of Matarami and Buenos Aires will be opened soon.

The first railway was opened in 1850 and the 2,400 miles of track are now administered by the Government. There is also steam navigation on the Ucayali and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and many international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 45,000 of all ranks. Armoured

units are equipped with American, Russian and French vehicles. Engineer units are employed on the construction of roadways in Peru using American equipment. The main Naval base is in Callao and supports all ships of the Fleet. There are training establishments in Callao and La Punta. The Naval Air Arm consists of U.S. and French helicopters; U.S. anti-submarine aircraft and DC3's. The Air Force is equipped with British, U.S. and French aircraft and U.S. and French helicopters. There are military airfields at Talaña, Piura, Chiclayo, Lima, Pisco, Joya, Iquitos and Arequipa plus a seaplane base at Iquitos. The National Police is made up of the Republican Guard, the Civil Guard and the Police of Investigation.

Education.—Education is compulsory and free for both sexes between the ages of 6 and 15.

Trade.—Import trade of Peru in 1987 totalled US\$2,520 million and exports US\$2,605 million.

Trade with U.K.

	1987	1988
Imports from U.K.	£49,324,000	£31,384,000
Exports to U.K.	91,689,000	90,844,000

The principal imports are machinery and chemicals and pharmaceutical products. The chief exports are minerals and metals, fishmeal, sugar, cotton and coffee.

CAPITAL.—Metropolitan Lima (including Callao), population (1983) 5,258,600. Other major cities (with pop. census, 1981) are: Arequipa (561,338) (540,560), Chiclayo (533,266).

CURRENCY.—Inti of 100 céntimos.

FLAG.—Three vertical bands, red, white, red; coat of arms on white band.

NATIONAL ANTHEM.—Somos Libres, Seamos Siempre (We are free, let us remain so forever).

NATIONAL DAY.—July 28 (Anniversary of Independence).

EMBASSY OF THE PHILIPPINES

9A Palace Green, W8 4QE

[01-937 1600/9]

Ambassador Extraordinary and Plenipotentiary, His Excellency Tomas T. Syquia (1989).

Deputy Chief of Mission and Consul General, Edmundo Libid.

Commercial Counsellor, S. Ileto.

Area and Population.—The Philippines are situated between 21° 20'–4° 30' N. Lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. (For MAP, see p. 782).

The total land area of the country is 115,831 sq. miles (300,000 sq. km.). There are eleven larger islands and 7,079 other islands.

The principal islands are:—

	sq. miles		sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,492
Palawan	4,550	Masbate	1,262
Panay	4,446		

Other groups in the Republic are the Sulu islands (capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated (1988) at 58,700,000.

The inhabitants, known as Filipinos, are basically all of Malay stock, with considerable admixture of Spanish and Chinese blood in many localities, and about 90 per cent of them are Christians, predominantly Roman Catholics. Most of the remainder are Muslims, in the south, and Animists and pagans, mainly in the north. There is a Chinese minority estimated at 500,000, and other much smaller foreign communities, notably Spanish, American and Indian.

History.—The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named Filipinas, after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the Spanish-American War of 1898, Manila was captured by American troops with the help of Filipinos and the Islands were ceded to the United States by the Treaty

of Paris of Dec. 10, 1898. Despite a rebellion against the U.S. government between 1899 and 1902, the Americans remained in control of the country until 1946.

The Republic of the Philippines came into existence on July 4, 1946 with a presidential form of government based on the American system.

Martial law was imposed on September 21, 1972. This was lifted, except in two southern provinces, on January 17, 1981.

The assassination on Aug. 21, 1983 of Marcos' main political opponent, Benigno Aquino, and a subsequent financial crisis caused a weakening in Marcos' position. Although Marcos gained a majority of votes in the official count of a Presidential election in Feb. 1986, the election was marred by widespread electoral abuse and his rival, Mrs Corazon Aquino, launched a series of non-violent civil disturbance actions.

On Feb. 22, Defence Minister Enrile and Vice Chief of Staff Ramos broke away from the Marcos government and declared their support for Mrs. Aquino. Thousands of people took to the streets to support their revolt and they were joined by a large section of the Armed Forces. On Feb. 25, Marcos, his family and aides left for Hawaii. Mrs Aquino took over as President. On March 25, she abolished the Batasan (legislature) and promulgated a Freedom (Provisional) Constitution.

An appointed Constitutional Convention drafted a new Constitution with a Congressional system of government, having a senate of 24 members and a House of Representatives with 250 members. This was overwhelmingly approved by a referendum in Feb. 1987. Elections to the Congress were held in May and the new Constitution came into force on July 27, 1987.

There is unrest in many of the islands due to insurgency. Muslim insurgents, the Moro National Liberation Front, operate in western Mindanao and the Sulu archipelago. Most of the current activity is due to the Communist New People's Army, which is strongest in eastern Mindanao, Negros, Samar, Bicol, the mountains of northern Luzon, and Bataan. As of June 1987 the ceasefire agreed between the Government and the Moro National Liberation Front was still holding, unlike the ceasefire with the Communists which ended in Feb. 1987.

Language and Literature.—The official languages are Filipino and English. Filipino, the national language, is based on Tagalog, one of the Malay-Polynesian languages and the language of the part of Luzon surrounding Metro Manila. Filipino is spoken by 29·66 per cent of the total number of households, but local languages and dialects are strong and Cebuano is spoken by 24·20 per cent of total households. English, which is the language of government and of instruction in secondary and university education, is spoken by at least 44 per cent of the population. Spanish, which ceased to be an official language in 1973, is now spoken by a very small minority. 89 per cent of the population are literate.

Education.—Secondary and higher education is extensive and there are 37 private universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611); there are also 296 state-supported colleges and universities, including the University of the Philippines, founded 1908. Students at private and state colleges and universities in 1984-85 numbered 13,814,359.

Roads and Railways.—The highway system covered 161,709 kilometres in 1985 and there was a total of 1,120,172 registered road vehicles. The Philippine National Railway operates 740 km. of track on Luzon Island.

Shipping.—There are 94 ports of entry in the Philippines and 164,404 vessels of various types

totalling 50,467,000 tons, are engaged in inter-island traffic.

Civil Aviation.—There 82 national airports and 137 privately operated airports. Philippine Air Lines have regular flights throughout the Far East, to the U.S.A. and Europe, in addition to inter-island services.

TRADE

	1987	1988
Total imports	\$6,736,969,000	\$8,159,378,000
Total exports	5,720,238,000	6,994,425,000

Trade with U.K.

	1987	1988
Imports from U.K.	£113,784,000	£175,685,000
Exports to U.K.	202,707,000	328,013,000

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

Principal exports are sugar, coconut oil, copper concentrate, lumber and copra.

CAPITAL.—Ψ Manila, in the island of Luzon: population (1980): City area, 1,630,485; Manila with suburbs (incl. Quezon City, Pasay City, Caloocan City, Makati, Parañaque, San Juan Mandaluyong and Navotas), 6,720,050. The next largest cities are ψ Cebu (490,281), ψ Davao (610,375), ψ Ililo (244,027), ψ Zamboanga (343,722), and Bacolod (262,415).

CURRENCY.—Philippine peso (P) of 100 centavos.

FLAG.—Equal horizontal bands of blue (above) and red; gold sun with three stars on ■ white triangle next staff.

NATIONAL ANTHEM.—“Pambansang Awit”.

NATIONAL DAY.—June 12 (Independence Day).

EMBASSY OF THE POLISH PEOPLE'S REPUBLIC

47 Portland Place, W1N 3AG

[01-580 4324]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Zbigniew Gertych (1987).

Area and Population.—Poland adjoins the German Democratic Republic in the west, the boundary being formed by the rivers Oder and Neisse, Czechoslovakia in the south, and the U.S.S.R. in the east. (The present frontiers were established at the end of the Second World War.) To the north is the Baltic Sea. The country has an area of 120,725 sq. miles (312,677 sq. km.), and a population (1985 U.N. estimate) of 37,203,000. Roman Catholicism is the religion of 95 per cent of the inhabitants and was legalized in May 1989.

Government.—The Polish Commonwealth ceased to exist in 1795 after three successive partitions

in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles.

German forces invaded Poland on Sept. 1, 1939; on Sept. 17, Russian forces invaded eastern Poland, and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war ■ Coalition Government was formed in which the Polish Workers' Party played a large part. In December 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952, and was modified in February 1976. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for ■ President of the Republic, whose functions were to be jointly exercised by ■ Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, ■ campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, and dissatisfaction with the regime and conditions of life have led periodically to unrest. The expression of severe popular discontent in December 1970 led to substantial government and Party changes. In July 1980 steep rises in food prices but static wages led to widespread strikes. The strikes continued throughout August, obliging the government to agree to allow independent trade unions, the right to strike, the easing of censorship and other political and economic demands. The independent trade union movement, Solidarity, led by Lech Walesa, became ■ powerful force but many of its leaders, including Walesa, were detained and union activity suspended when martial law was declared on Dec. 13, 1981. Initially there was some passive resistance to martial law, which was suspended on Dec. 31, 1982, and finally lifted in July 1983.

Solidarity continued ■ ■ underground movement until 1988 when a wave of strikes and the call for the legalization of Solidarity resulted in talks between Walesa and the Communist Party early in 1989. By April plans for political and economic reforms had been drawn up. These included the restoration of the legal status of Solidarity (April 17); the introduction of ■ bi-cameral parliamentary system and an Executive Presidency; and democratic elections to be held in the summer of 1989.

The lower house (Sejm) of 460 seats has 299 reserved for approved groups: the P.U.W.P. has 173 seats, the Democratic Party, 27, Catholic organizations, 23, and the United Peasants' Party, 76. In elections to the remaining seats in the new National Assembly, held on June 4 and 18, Solidarity, in its political form as the Solidarity Citizens' Committee, won all 161 seats. In elections to the upper house (Senate) ■ of the 100 seats were won by the Solidarity Citizens' Committee. After the first four-year parliamentary term the reserved seats system will be abolished and elections to both houses will be free.

General Jaruzelski was elected President by Poland's M.P.s on July 20, and on August 20, 1989, Tadeusz Mazowiecki became the first non-communist Prime Minister since 1945. Under the new constitution the Prime Minister can appoint all members of the Council of Ministers but the defence and interior portfolios must remain in the hands of the Communist Party.

Education.—Elementary education (ages 7–15) is compulsory and free. Secondary education is optional and free. There are universities at Kraków, Warsaw, Poznań, Łódź, Wrocław, Lublin and Toruń and ■ considerable number of other towns.

Language and Literature.—Polish is ■ western Slavonic tongue (see U.S.S.R.), the Latin alphabet being used. Polish literature developed rapidly after the foundation of the University of Kraków (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism, whose chief Polish exponent was Adam Mickiewicz, was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846–1916), Nobel Prize-winner for Literature in 1905, Bolesław Prus (1847–1912), and Stanisław Reymont (1868–1925), Nobel Prize-winner in 1924.

Production and Industry.—On January 3, 1946, ■ decree ■ issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent of Polish industry is stated to be 'socialized', but 68 per cent of agricultural land is privately farmed.

Trade with U.K.

	1987	1988
Imports from U.K.	£181,451,000	£175,685,000
Exports to U.K.	303,418,000	328,013,000

CAPITAL.—Warsaw, on the Vistula, pop. (1984) 1,644,626. Other large towns are Łódź (849,000); Kraków (735,000); Wrocław (632,000); Poznań (571,000); Gdańsk (464,000); Szczecin (389,000); Katowice (361,000); Bydgoszcz (358,000).

CURRENCY.—Złoty of 100 groszy.

FLAG.—Equal horizontal stripes of white (above) and red.

NATIONAL ANTHEM.—*Jeszcze Polska Nie Zginela* (Poland has not yet been destroyed).

NATIONAL DAY.—July 22.

PORtUGUESE EMBASSY
 11 Belgrave Square, SW1X 8PP
 [01-235 5331]

Ambassador Extraordinary and Plenipotentiary, His Excellency Antonio Vaz-Pereira (1989).
Minister Counsellor, Sr. Manuel Corte Real, C.B.E.
First Secretary, Sra Ana Barata, O.B.E.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, covering an area of 34,317 sq. miles (88,880 sq. km.). It lies between 36° 58'–42° 12' N. lat. and 6° 11' 48"–9° 29' 45" W. long., being 362 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The population (including the Azores and Madeira) was estimated at 10,229,000 in 1985.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil, and is the *lingua franca* of Angola, Mozambique and Guinea-Bissau. Portuguese language and literature reached the culminating point of their development in the *Lusíadas* (dealing with the voyage of Vasco da Gama) and other works of Camões (Camões) (1524–1580).

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manuel II and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. A period of great political instability ensued until eventually the military stepped in. The Constitution of 1933 gave formal expression to the corporative 'Estado Novo' (New State) which was personified by Dr. Salazar, Prime Minister from 1932–68. Dr. Caetano succeeded Salazar as Prime Minister in 1968 but his failure to liberalize the regime or to conclude the wars in the African colonies resulted in his government's overthrow by a military coup on April 25, 1974. The next two years were characterized by great political turmoil with no fewer than six provisional governments between April 1974 and July 1976 but with the failure of an attempted coup by the extreme left in November 1975 the situation began to become more stable.

Constitutional reforms introduced in Aug. 1982 have reduced the President's scope for day-to-day intervention in government but the decision to dissolve the Assembly is still largely the President's. The revisions also ended the military's capacity for political interference, and created two new organs of state, the Constitutional Tribunal and the Council of State, to advise the President. Further constitutional reforms have been under discussion during 1989.

In the General Election held on July 19, 1987, the Social Democratic Party (P.S.D.) won 148 of the 250 seats; the Socialist Party (P.S.) 60 seats; the Communist Party (P.C.P.) 31 seats, the Democratic Renewal Party (P.R.D.) 7 seats and the Christian Democrats (C.D.S.) 4 seats.

Defence.—Most physically fit males are liable for military service but conscription is becoming increasingly selective — the armed forces were greatly reduced following the end of the colonial wars, and reorganized and re-equipped for a conventional

national defence role. The present strength of the Army is about 43,000. One brigade is earmarked for N.A.T.O. service. The Navy consists of about 14,800 officers and men, including 2,500 marines, manning about 60 craft of various types. The present serving strength of the Air Force is about 12,600, (including 2,200 paratroops) and about 80 combat aircraft plus helicopters and transport and training aircraft.

Education is free and compulsory for nine years from the age of 6. Secondary education is mainly conducted in State lyceums, commercial and industrial schools, but there are also private schools. There are also military, naval, technical, polytechnic and other special schools. There are old established Universities at Coimbra (founded in 1290), Oporto and Lisbon. New Universities have been established at Lisbon, Braga, Aveiro and in the Azores.

Newspapers and Broadcasting.—There are now five morning and three evening daily newspapers in Lisbon and three morning papers in Oporto, and six main weekly newspapers. There are two TV channels (broadcasting in colour) and four radio stations (three state controlled) broadcasting nationwide.

Civil aviation is controlled by the Administração Nacional Aeronáutica. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for scheduled international services. There are direct flights between London and Faro in the Algarve.

Agriculture.—The chief agricultural products are cork, cereals, rice, vegetables, olives, figs, citrus fruits, almonds, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent of the total area of the country.

Minerals.—The principal mineral products are pyrites, wolfram, tin, iron ores, copper and sodium and calcium minerals.

Industry.—The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures are textiles, clothing and footwear, machinery (including electric machinery and transport equipment), foodstuffs (tomato concentrates and canned fish), chemicals, fertilizers, wood, cork, furniture, cement, glassware and pottery. There is a modern steelworks, and two modern and very large shipbuilding and repair yards at Lisbon and Setúbal working mainly for foreign ship-owners. There are several hydro-electric power stations and a new thermal power station.

Finance.—Portugal is a member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International Finance Corporation. The country has substantial gold and foreign exchange reserves.

Trade.—Portugal joined the E.C. on January 1, 1986.

The principal imports are cereals, meat, raw and semi-manufactured iron and steel, industrial machinery, chemicals, crude oil, motor vehicles and raw materials for textiles.

The principal exports are textiles, footwear, timber, cork, electrical and other machinery, and chemicals.

	1987	1988
Total imports	£3,500,000 m	£6,164,627 m
Total exports	2,600,000 m	4,230,727 m

Trade with U.K.

	1987	1988
Imports from U.K.	£699,915,000	£810,537,000
Exports to U.K.	847,980,000	928,015,000

The British share of the Portuguese market was 8·16 per cent in 1988 and the U.K. was the fifth largest market for Portuguese exports.

CAPITAL.—ΨLisbon. Population (estimated, 1984) 807,937. ΨOporto 327,368; ΨSetúbal 77,885.

CURRENCY.—Escudo (Esc) of 100 centavos.

FLAG.—Vertical band of green (next staff) and square of red, bearing arms of the Republic, framed.

NATIONAL ANTHEM.—A Portuguesa.

NATIONAL DAY.—June 10.

BRITISH EMBASSY

35-37 Rua de S. Domingos à Lapa,
1200 Lisbon
[Lisbon 661191]

Ambassador Extraordinary and Plenipotentiary. His Excellency Hugh James Arbuthnott, C.M.G. (1989). There are British Consulates in Oporto, Portimão, Funchal (Madeira) and Ponta Delgada (Azores). **British Council Representative.** J. Mallon, O.B.E., The British Institute, Rua Cecílio de Sousa 65, 1294 Lisbon.

BRITISH PORTUGUESE CHAMBER OF COMMERCE. Rua da Estrela 8, 1200 Lisbon and Rua Sa de Bandeira 784-20E, Frente, 4000 Oporto.

MADEIRA AND THE AZORES

Madeira and The Azores are two administratively autonomous regions of Portugal, having locally elected Assemblies and Governments.

Madeira is a group of islands in the Atlantic Ocean about 520 miles south-west of Lisbon, and consists of Madeira, Porto, Santo and 3 uninhabited islands (Desertas). The total area is 314 sq. miles (813 sq. km.), with a population of 264,800 (1984). ΨFunchal is in Madeira, the largest island (270 square miles), is the capital, with a population of 44,111; Machico (10,905).

The Azores are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Faial, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 sq. miles (2,387 sq. km.), and a population of 250,700 (1984). ΨPonta Delgada, on São Miguel, is the capital of the group; population is 21,347. Other ports are ΨAngra, in Terceira, (16,476) and ΨHorta (2,509).

MACAO

Macao, situated at the mouth of the Pearl River, comprises a peninsula and the islands of Coloane and Taipa, having an area of six sq. miles (15.5 sq. km.), with a population (1987 estimate) of 450,000. Portuguese trade with China began early in the 16th century and Macao became a Portuguese colony in 1557: in a Sino-Portuguese treaty of Dec. 1887 China recognised Portugal's sovereignty over, and government of, Macao. In 1974 Portugal changed Macao's status from that of an Overseas Province to 'a territory under Portuguese administration'. Following the Sino-British Joint Declaration on Hong Kong in 1984, Sino-Portuguese negotiations on the transfer of administration began on June 30, 1986. The agreement on the transfer of the Administration of Macao to the Chinese authorities was signed on April 13, 1987. Macao will become a 'special administrative region' of China when transferred on Dec. 20, 1999.

Macao is subject to Portuguese constitutional law but otherwise enjoys administrative, economic and financial autonomy. The Governor is appointed by the Portuguese President and since 1976 there has been a 17 member legislative assembly, which has a three year term. The assembly comprised 12 elected deputies appointed by the Governor. A new electoral system which came into effect February 28, 1984, gave equal voting rights to all residents, thus enfranchising the Chinese population.

Macao's major industry is textile manufacturing

which accounts for 62 per cent of all exports. Port Macao is served by British, Portuguese and Dutch shipping lines and has regular services to Hong Kong, some 35 miles away.

Governor, (vacant).

Trade with U.K.

Secretary-General of the National Planning Council. Saleh Abu Daoud al-Mohannadi.

EMBASSY OF THE STATE OF QATAR 27 Chesham Place, SW1X 8HG

[01-235 0851/4]

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

The state of Qatar covers the peninsula of Qatar from approximately the northern shore of Khor al Odaid to the eastern shore of Khor al Salwa. The area is about 4,247 sq. miles (11,000 sq. km.), with a population estimated in 1988 at about 380,000. The great majority of the population is concentrated in the urban district of the capital Doha. Only a small minority still pursue the traditional life of the semi-nomadic tribesmen and fisherfolk.

Until 1971, Qatar was one of the nine independent Emirates in the Arabian Gulf in special treaty relations with the U.K. In that year, with the withdrawal of H.M. Forces from the area, these special treaty relations were terminated. On April 2, 1970 a Provisional Constitution for Qatar was proclaimed, providing for the establishment of a Council of Ministers and for the formation of a Consultative Council to assist the Council of Ministers in running the affairs of the State. The first

Cabinet was formed of 10 members on May 29, 1970. Qatar is a member of the Arab League as well as of the United Nations.

Production.—Although Qatar is a desert country, there are gardens and smallholdings near Doha and to the north and encouragement is being given to the development of agriculture.

The Qatar General Petroleum Corporation is the state-owned company controlling Qatar's interests in oil, gas and petrochemicals. The corporation is responsible for Qatar's oil production onshore and offshore. The production level for Qatar agreed in O.P.E.C. is currently 312,000 b.p.d. Explorations continue for further oil. The large reserves of natural gas in the North Field are expected to come into production by 1991. A 50,000 b.p.d. oil refinery was commissioned in 1984 to increase domestic refinery capacity.

Current industries include a steel mill, a fertilizer plant, a cement factory, a petrochemical complex and two natural gas liquids plants. With the exception of the cement works, which is at Umm Bab, all these industries are at Umm Said, about 30 miles south of Doha. There are tentative plans for new industry, including an aluminium smelter, a second ammonia plant and a methanol plant, downstream of the North Field. Qatar is also expanding its infrastructure including electrical generation and water distillation, roads, houses, and Government buildings, although reduced demand for crude oil in international markets has led to a downturn in the economy and a slower rate of development than hitherto.

Communications.—Doha is an expanding town with an airport built to international standards. Regular air services connect Qatar with Bahrain and the United Arab Emirates, Kuwait, Muscat, Saudi Arabia, Jordan, Syria, Lebanon, Egypt, the Indian sub-continent, Africa and Europe. The Qatar Broadcasting Service transmits medium, shortwave, and V.H.F. Regular television transmissions in colour began in 1974 and a second channel opened in 1982.

Trade with U.K.

	1987	1988
Imports from U.K.	£105,087,000	£88,920,000
Exports to U.K.	13,765,000	3,888,000

CAPITAL.—Doha. Population (estimated) 220,000. Other towns include Khor, Dukhan, Wakra and Umm Said.

CURRENCY.—Qatar riyal of 100 dirhams.

FLAG.—White and maroon, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

NATIONAL DAY.—September 3.

EMBASSY OF THE SOCIALIST REPUBLIC
OF ROMANIA
4 Palace Green, W8 4QD
[01-937 9666]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mr. Stan Soare (1986).

Area and Population.—Romania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* under the Treaty of Paris (April 1856). The area of Romania is 91,699 sq. miles (237,500 sq. km.) and the population (1986 estimate) is 22,823,500.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the Treaty of Berlin (July 13, 1878) the Principality was recognized as an independent State, and part of the Dobrudja (which had been occupied by the Romanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914–18 added Besarabia, the Bukovina, Transylvania, The Banat and Crisana-Maramures, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920.

On June 27, 1940, in compliance with ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, and in August, 1940, Romania ceded to Bulgaria the portion of Southern Dobrudja taken from Bulgaria in 1913.

Romania became 'The Romanian People's Republic' in December, 1947, on the abdication of King Michael. A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front, now the Socialist and Democratic Unity Front (S.D.U.F.). A new Constitution was approved by the Grand National Assembly in 1965 when the name of the state was changed to The Socialist Republic of Romania. The Constitution states (Art. 3) that the leading political force of the

whole society is the Romanian Communist Party. The Constitution was modified in March, 1974.

Agriculture.—Wallachia, Moldavia and Transylvania are potentially among the most fertile areas in Europe, and agriculture and sheep and cattle raising are the principal industries of Romania, although the intense winter cold and summer heat, and fierce summer drought sometimes have adverse effects on crops. These are principally cereal crops, legumes and other vegetables, flax and hemp. Vines and fruits are also grown. The forests of the mountainous regions are extensive, and the timber industry is important.

Socialization of agriculture was completed when collectivization was achieved in the spring of 1962.

Natural Resources and Industry.—Before the war petroleum and agriculture were the backbone of the Romanian economy but rapid industrialization since 1948 has meant that they no longer hold the same dominant position. There are plentiful supplies of natural gas, together with various mineral deposits including coal, iron ore, bauxite, lead, zinc, copper and uranium in quantities which allow a substantial part of the requirements of industry to be met from local resources. Production of crude oil was put at about 10,125,000 tonnes in 1986.

The economy has faced increasing problems since the late 1970s, the result of over investment in energy-intensive heavy industry and neglect of agriculture, which has led to food shortages. The effects of these policies were aggravated by the international recession and by high interest rates, and Romania was severely in debt by the early 1980s. The government has sought to alleviate the situation by reducing borrowing and cutting imports. The economy is centrally organized on the basis of Five-Year Plans which cover all branches of national activity including investment and production.

Language and Literature.—Romanian is a Romance language with many archaic forms and admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, transmitted orally through many centuries and collected in the 19th century, form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the Council for Socialist Culture and Education, which has the status of a Ministry. The leading religion is that of the Romanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

Education is free and nominally compulsory. There are Universities at Bucharest, Iasi, Cluj, Timisoara, Craiova and Brasov, polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galati and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

Communications.—In 1979 there were 11,113 km. of railway open for traffic. The mercantile marine had a gross tonnage of 13,220,000 tons in 1979. The principal ports are Constanta (on the Black Sea), Sulina (on the Danube Estuary), Galati, Braila, Giurgiu and Turnu Severin. The Danube and the Black Sea are linked by a canal completed in 1984. Romania is a member of the Danube Commission whose seat is at Budapest.

TRADE

In 1986 combined imports and exports totalled Lei 300·6 billion, compared with Lei 340·7 billion in 1985.

Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; export consists principally of maize, wheat, barley, oats, petroleum, timber, cattle, machines and industrial equipment.

Trade with U.K.

	1987	1988
Imports from U.K.	£55,688,000	£50,111,000
Exports to U.K.	92,526,000	100,906,000

CAPITAL, Bucharest, on the Dimbovita, population 1,961,189. Other large towns are:

Brasov	290,722	Ψ Galati	254,636
Constanța	284,801	Craiova	243,117
Cluj-Napoca	270,820	Ploiești	215,500
Iasi	265,176	Ψ Brăila	214,561

Timișoara 261,950

CURRENCY.—Leu (Lei) of 100 bani.

FLAG.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band.

NATIONAL ANTHEM.—Trei Culori (Three colours).

NATIONAL DAY.—August 23 (Liberation Day, 1944).

24 Strada Jules Michelet, Bucharest
[Bucharest 111634/6]

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

Counsellor, A. R. Clark (Head of Chancery).

Defence, Naval and Military Attaché, Lt.-Col. W. J. Chesshyre.

Cultural Attaché and British Council Representative, A. Pattison.

**RWANDA
(République y'u Rwanda)**

President, Maj. Gen. Juvenal Habyarimana, assumed office, July 5, 1973, elected, Dec. 24, 1978, re-elected, Dec. 19, 1983 and Dec. 17, 1988.

**MINISTERS
(as at Jan. 15, 1989)**

Minister of Defence, The President.

Commerce and Consumption, Juvénal Uwilingiyimana.

Finance, Benoit Ntezilyayo.

Industry and Crafts, Col. Aloys Nsekaliye.

Public Works, Energy and Water, Joseph Nzirorera.

Transport and Communications, André Ntagerura.

Health, Dr. Placide Ngendahayo.

Primary and Secondary Education, Daniel Mbangura.

Higher Education and Scientific Research, Charles Nyandwi.

Youth and Sport, Lt.-Col. Augustin Ndindiliyimana.

Interior and Community Development, Jean-Marie Vianey Mugemana.

Civil Service and Professional Training, François Habiyakare.

Justice, Théoneste Mujyanama.

Institutional Relations, Antoine Ntashamaje.

Planning, Callixte Nzabonimana.

Foreign Affairs and International Co-operation, Dr. Casimir Bizimungu.

Minister at the Presidency, Simeon Nteziryayo.

Rwanda, formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, has ■ area of 10,169 sq. miles (26,338 sq. km.), and ■ population (1985 U.N. estimate) of 6,070,000, mainly of the Bahutu tribe, with Batutsi and Batwa minorities.

A referendum held in September, 1961, showed the majority of the population were opposed to the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Rwanda became an independent Republic on July 1, 1962, with Gregoire Kayibanda ■ Head of State and Head of the Government. He was deposed in 1973, and replaced by a military government under Maj.-Gen. Juvénal Habyarimana.

Coffee (the chief cash crop), tea and sugar are grown. Tin, hides, bark of quinine and extract of pyrethrum flowers are also exported.

The National University of Rwanda is situated at two campuses, Butare and Ruhengeri.

In 1987 total imports were valued at US\$351.7 m.; total exports, US\$112.3 m.

Trade with U.K.

	1987	1988
Imports from U.K.	£2,526,000	£1,636,000
Exports to U.K.	4,291,000	8,434,000

CAPITAL.—Kigali (156,000).

CURRENCY.—Rwanda franc of 100 centimes.

FLAG.—Three vertical bands, red, yellow and green with letter R on yellow band.

NATIONAL DAY.—July 1.

British Ambassador (resident at Kinshasa, Zaire).

**EL SALVADOR
(República de El Salvador)**

President, Alfredo Felix Cristiani Burkard, elected March 19, 1989, assumed office, June 1, 1989.

**CABINET
(as at July 15, 1989)**

Vice-President and Interior Minister, Francisco Merino.

Minister of the Presidency, Col. Jose Antonio Martínez Varela.

Secretary of Information, Mauricio Sandoval.

Planning and Co-ordination of Economic and Social Development, Mirna Lievano de Marquez.

Justice, Dr. Oscar Santamaría.

Finance, Dr. Rafael Alvarado Cano.

Economy, Dr. Arturo Zablah.

Education, Dr. Rene Hernandez Valiente.

Defence and Public Security, Gen. Humberto Larios.

Labour and Social Security, Mauricio Gonzalez Dubon.

Agriculture, Antonio Cabrales.

Public Works, Mauricio Stubig.

Health, Col. Dr. Lisandro Vasquez Sosa.

EMBASSY OF EL SALVADOR

■ Welbeck House, 62 Welbeck Street, W1
[01-486 8182]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Mauricio Rosales-Rivera.

First Secretary and Consul General, Snrta Carolina Calderón.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an area of 8,124 sq. miles (21,041 sq. km.), with ■ population (1985 estimate) of 5,480,000. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. There is ■ wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of Oct. 10, 1986, when considerable damage was done to San Salvador.

The principal river is the Rio Lempa. There is ■ large volcanic lake (Ilopango) ■ few miles to the east of the capital, while farther away and to the west lies the smaller lake of Coatepeque, which appears to

have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—El Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821.

After two years of government by a Junta headed by José Napoleón Duarte, elections for a Constituent Assembly were held in March 1982, ending decades of military rule. Presidential elections, although boycotted by the guerrilla movement, were held in March 1984 and in the run-off between the two largest parties, Sr. Duarte, the Christian Democrat leader, won with a 54 per cent majority over the ARENA candidate, Roberto d'Aubuisson. Alfredo Cristiani (ARENA) won the presidential elections in March 1989 with 54 per cent of the vote. The FMLN guerrillas again boycotted the elections. ARENA also overturned a Christian Democrat majority in the National Assembly and since the March 1988 elections have held 32 of the 60 seats.

Agriculture.—The principal cash crops are coffee, which is grown principally on the slopes of the volcanoes, cotton, which is cultivated on the coastal plains, and sugarcane and shrimps. (However, cotton and sugar production have decreased as a result of the civil war.) Also cultivated are maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and cereal bags. Land reforms, announced in March 1980, have largely been implemented. The Salvadorean Coffee Company, sugar exports and the banking system are nationalized but Pres. Cristiani has announced his intention to privatize these industries and/or introduce competition.

Industry.—Existing factories make textiles, clothing, constructional steel, furniture, cement and household items. El Salvador is a member of the Central American Common Market. The first trade zone was inaugurated in November 1974 and others are planned.

Education.—The illiteracy rate has risen since 1980 when the figure was 30.5 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are five daily newspapers published at the capital, and four in the provinces.

Communications.—The Executive Autonomous Port Commission (CEPA) administers the port of Cutuco, at La Union and the principal port of Acajutla, and the railways through FENADESAL. There is a railway line between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast but it is subject to interruption. The roads are paved and in good condition but some bridges are temporary structures following guerrilla action. There are good roads between Acajutla and the capital (60 miles), and between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The El Salvador international airport can receive jet aircraft with daily flights to other Central American capitals, Mexico, and five U.S. cities.

There are post and telegraph offices throughout the country. There are 100 broadcasting stations and six television stations.

BUDGET

	1988
Revenue	£2,843.8 m
Expenditure	3,042.2 m

Trade with U.K.

	1987	1988
Imports from U.K.	£9,595,000	£8,186,000
Exports to U.K.	1,890,000	2,961,000

There is foreign exchange control. There is also a parallel market in U.S. dollars.

Other exports are sugar, shrimps, sisal (in the form of bags used for exporting coffee, sugar, etc.), balsam, meat, towels, hides and skins. The chief imports are chemicals, fertilizers, pharmaceutical goods, petroleum, manufactured goods, industrial and electronic machinery and equipment, vehicles and consumer goods.

CAPITAL.—San Salvador. Population of metropolitan area, est. 2,000,000. Other towns are Santa Ana (204,570), San Miguel (157,838), y La Union (Cutuco), y La Libertad and y Acajutia.

CURRENCY.—El Salvador colón (C) of 100 centavos. 5 colones = 1 US\$.

FLAG.—Three horizontal bands, light blue, white, light blue; coat of arms on white band.

NATIONAL ANTHEM.—Saludemos La Patria Orgullosos (Let us proudly hail the Fatherland).

NATIONAL DAY.—September 15.

BRITISH EMBASSY
P.O. Box 1591, San Salvador

British Ambassador, (resident at Tegucigalpa, Honduras).

Charge d'affaires a.i., I. R. Murray (First Secretary). Vice Consul, P. D. Evans.

SAN MARINO (Repubblica di San Marino)

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON
166 High Holborn, WC1V 6TT
[01-836 7744]

Consul-General, The Lord Forte.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious stonecutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims, and those of neighbouring dukedoms, during the 15th-18th centuries, and its integrity and sovereignty is recognized and respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Heads of State, who are elected at six-monthly intervals. The Great and General Council, a legislative body of 60 members, is elected by universal suffrage for a term of 5 years. A Council of Twelve forms in certain Supreme Court of Justice. The area is approximately 23 sq. miles (61 sq. km.), the population (April 30, 1985) was 22,361. The city of San Marino, on the slope of Monte Titano, has three towers, a fine church and Government palace, a theatre and museums. The principal products are wine, cereals, and cattle, and the main industries are tourism, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

CURRENCY.—Italian currency is in circulation.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

NATIONAL DAY.—September 3.

BRITISH CONSULATE-GENERAL

Consul-General, Miss M. L. Croll (resides at Florence).

SÃO TOMÉ AND PRÍNCIPE
 (República Democrática de São Tomé e
 Príncipe)

President, Dr. Manuel Pinto da Costa.

COUNCIL OF MINISTERS
 (w.e.f. Jan. 1988)

Prime Minister, Celestino Rocha da Costa.
 Defence and Internal Security, Raul Braganca Neto.
 Foreign Affairs, Carlos da Graca.
 Justice and Public Affairs, Francesco Fortunato Pires.

Planning and Trade, Teotonio d'Alva Torres.
 Agriculture and Fisheries, Oscar Aguiar Sacramento e Sousa.

Co-operation, Guillermo Posser da Costa.
 Education and Culture, Ligia do Espírito Santo Costa.
 Health, Labour and Social Security, Armindo Vaz de Almeida.

Equipment, Environment, Transport and Communications, Carlos Ferreira.

Ministers Delegate, Manuel Quaresma Costa (*Príncipe Islands*); Manuel Vaz Alfonso Fernandes (*Secretary General*).

The islands of São Tomé and Príncipe are situated in the gulf of Guinea, off the west coast of Africa. They have an area of 372 sq. miles (964 sq. km.), and a population (1985 U.N. estimate) of 108,000.

Following Portugal's decision to grant independence, a transitional government was installed on Dec. 21, 1974, and the islands became an independent democratic republic on July 12, 1975.

Cacao is the main product.

Trade with U.K.

	1987	1988
Imports from U.K.	£329,000	£416,000
Exports to U.K.	20,000	20,000

CAPITAL.—\$ São Tomé (25,000).

CURRENCY.—Dobra of 100 centavos.

FLAG.—Horizontal stripes of green, yellow, green, the yellow of double width and bearing two black stars; and a red triangle in the hoist.

NATIONAL DAY.—July 12 (Independence Day).

British Ambassador (resident in Luanda, Angola).

SAUDI ARABIA

(Al Mamlaka al Arabiya as-Sa'udiyya)

Custodian of the Two Holy Mosques and King of Saudi Arabia, H.M. King Fahd bin Abdul Aziz, born, 1921, ascended the throne June 1, 1982.

Crown Prince, H.R.H. Amir Abdullah bin Abdul Aziz.

COUNCIL OF MINISTERS
 (as at July 31, 1989)

Prime Minister, H.M. King Fahd bin Abdul Aziz.

First Deputy Prime Minister and Commander of the National Guard, H.R.H. Prince Abdullah bin Abdul Aziz.

Second Deputy Prime Minister, Defence and Aviation, H.R.H. Prince Sultan bin Abdul Aziz.

Public Works and Housing, H.R.H. Prince Mit'ab bin Abdul Aziz.

Interior, H.R.H. Prince Naif bin Abdul Aziz.

Foreign Affairs, H.R.H. Prince Saud al-Faisal bin Abdul Aziz.

Finance and National Economy, Muhammad Aba al-Khaiil.

Agriculture and Water, Dr. Abdul Rahman bin Abdul Aziz bin Hassan Al-Shaikh.

Municipal and Rural Affairs, Ibrahim bin Abdullah al-Ansari.

Commerce, Dr Sulaiman al-Solaiman.

Communications, Dr. Hussain Mansouri.

Petroleum and Mineral Resources, Hisham Nazer (and acting Minister of Planning).

Labour and Social Affairs, Dr. Mohamed Ali al-Faiz.

Information, Ali Sha'er.

Health, Faisal bin Abdul Aziz al Hejailan.

Pilgrimage and Endowments, Abdul Wahhab Ahmed Abdul Wasi.

Education, Dr. Abdul Aziz Al-Abdullah al-Khuwair (and acting Minister of Higher Education).

Posts, Telegraphs and Telephones, Dr. Alawi Darwish Kayyal.

Industry and Electricity, Abdul Aziz al-Zamil.

Ministers of State, Muhammad Ibrahim Mas'oud; Dr. Muhammad Abdul Latif al-Melhem; Omar Abdul Qader Faqih; Dr. Fayez Ibrahim Badr; Turki bin Khalid Al Sudairi; Mohammed bin Abdulaziz Bin Zar'a; Mohammed bin Ibrahim Bin Jubeir (acting Minister of Justice).

ROYAL EMBASSY OF SAUDI ARABIA
 30 Belgrave Square, SW1X 8QB
 [01-235 0831]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sheikh Nasser Almanqour, G.C.V.O. (1980).

Ministers Plenipotentiary, Ibrahim M. Mosly; Saud Ahmed M. Alyahya, L.V.O.

The Kingdom of Saudi Arabia is a personal union of two countries, the Sultan of Nejd becoming also King of the Hejaz. Great Britain recognized Abdul Aziz Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies, by the Treaty of Jeddah (May 20, 1927). The name was changed to the Kingdom of Saudi Arabia in Sept. 1932.

The total area of the Kingdom is about 830,000 sq. miles (2,149,640 sq. km.), with a population (1985 est.) of 12,400,000, of whom perhaps 3 million are non-Saudis. Islam is the established and only permitted religion.

In the 18th century Nejd was an independent state governed from Diriya (now in ruins, 25 km. from Riyadh) and the stronghold of the Wahhabis, a puritanical Islamic sect. It subsequently fell under the Turkish yoke, but in 1913 Abdul Aziz Ibn Saud threw off Turkish rule and captured the Turkish province of Al Hasa. In 1920 he captured the Asir, and in 1921, by force of arms, he added to his dominions the Jebel Shammar territory of the Rashid family. In 1925 he completed the conquest of the Hejaz.

Saudi Arabia comprises almost the whole of the Arabian peninsula, with the exception of the small states in the extreme south (N. and S. Yemen), south-east (Oman and the U.A.E.) and east (Qatar). In the north-west it borders Jordan and in the north-east Iraq and Kuwait, while to the west lies the Red Sea and to the east the Gulf. The Nejd ('Plateau'), now the Central Province, extends over the centre of the peninsula, including the Nafud and Dahna deserts. The Hejaz ('the Boundary'), now the Western Province, extends along the Red Sea coast to Asir and contains the holy towns of Mecca and Medina. The former, about 60 km. east of Jeddah, is the birthplace of the Prophet Mohammed, and contains the Great Mosque, within which is the Kaaba or sacred shrine of the Muslim religion. This is the focus of the annual Hajj ('Pilgrimage') performed by 3·4 million in 1986. The latter, Medina Al Munawwarah ('The City of Light') some 300 km. north of Mecca, is celebrated as the first city to embrace Islam and ■ the Prophet Mohammed's burial place (he died there on Rabia 12, 11 AH, corresponding to June 7, 632 AD).

Asir ('Inaccessible') is named for its mountainous terrain, and, with the coastal plain of the Tihamah, lies along the southern Red Sea coast from Hejaz to the border with Yemen. It is the only region to enjoy substantial rainfall. Water supplies are, however, supplemented by dams and irrigation. The east and south-east of the country are lower-lying and largely desert. Outside the manufacturing centres which have grown up around some of the towns, most of the population are engaged in agriculture. The productivity of traditional dryland farming is increasingly supplemented by irrigation.

Industry.—Oil was first found in commercial quantities in Dhahran, near Dammam, in 1938. Total production of crude oil peaked at 9·9 m.b.d. in 1980, and in 1986 was 4·8 m.b.d. About 97 per cent of the total is extracted by the Arabian-American Oil Company. Recoverable reserves stood at about 167 billion barrels at the end of 1986, equivalent to about 95 years' production at the 1986 rate. Aramco's 66-year lease will terminate in 1999 but the company was effectively nationalized in 1980. Aramco operates ■ deepwater oil terminal at Ras Tanura.

The Government actively encourages the establishment of manufacturing industries in the country. The policy includes the provision of industrial estates and loans covering 50 per cent of capital investment. By the end of 1984 3,310 private industrial licences had been granted, and 650 were in production. These establishments were concentrated in the fields of construction materials, metal fabrication, simple machinery and electrical equipment, food and beverages, chemicals and plastics. The Government is trying to encourage future investment in industrial gases, intermediate petrochemicals, light engineering, machinery and all kinds of spare parts. A new pharmaceutical plant is scheduled for completion by 1989.

The Government has also established two industrial poles at Jubail and Yanbu, financed by the state agency Saudi Arabian Basic Industries Corp., to be the focus of heavy industrial development. Linked by gas and oil pipelines, both are to have petrochemical complexes producing, initially, ethylene and methanol, six of the seven plants now on-stream are joint ventures with American and Japanese companies. In addition an integrated steel complex and ■ urea fertilizer factory are in production in Jubail with West German and Taiwanese partners. Complete new cities are being built at each pole: Jubail will eventually house 300,000 and Yanbu 190,000. The state agency Petromin operates three domestic refineries and two lubricant plants and the last of three joint-venture export refineries came on-stream

in 1986. Total refining capacity is now approximately 1,950,000 b.p.d.

Communications.—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened in 1951, and ■ direct Dammam-Riyadh line opened in 1985. An extension to Jeddah via Medina and the reopening of the Hejaz railway are planned. Metalled roads connect all the cities and main towns: the network consisted of 28,500 km. in 1985. The principal port of the Gulf is Dammam which has 39 berths and an annual capacity of 9·1 million tons. Jeddah is the centre of commercial traffic on the Red Sea and has 51 piers, giving an annual capacity of 17 million tons. The Government-owned Saudi Arabian Airlines (Saudia) operate scheduled services to 19 domestic airports. There are international class airports at Dhahran, Jeddah and Riyadh. Work has begun on the new King Fahd International Airport in Eastern Province, due to be completed in 1990. Saudia have an extensive overseas operation, and a large number of international airlines operate into the country. Telecommunications are being rapidly expanded. By the end of 1985 60,000 telex and 1,216,000 telephone lines were installed; telephone and telex exchanges will be able to handle 2·25 million lines by 1990. The Government is ■ major participant in the Arab Satellite Communications Organization.

Education.—With the exception of ■ few schools for expatriate children, all schools are government supervised and segregated for boys and girls. By mid-1985 there were a total of 1,692,300 schoolchildren in 5,323 primary and 1,219 intermediate and 418 secondary schools. There are Universities in Jeddah, Mecca, Riyadh (branches in Abha and Qassim), Dammam (branch at Hofuf) and Dhahran, and there are Islamic universities in Medina and Riyadh. In addition there is great emphasis on vocational training, provided at 24 literacy and artisan skill training centres and 21 more advanced industrial, commercial and agricultural education institutes. Education in government-owned institutes is free at all levels.

Finance and Trade.—Oil remains the main source of receipts in the balance of payments. As ■ result, Government revenues have been markedly affected by oil prices and volume of production, and fell away from ■ peak of SR368,000 million in 1981-82 to SR133,600 million in 1985-86. The 1987 budget provided for expenditure of SR170,000 million. There is no public debt. There are no restrictions on foreign exchange transactions. The currency is strong, backed by gold and foreign exchange reserves, and maintained on ■ close parity to the U.S. dollar.

There is ■ total ban on the importation of alcohol, pork products, firearms and items regarded as non-Islamic or pornographic. The Arab boycott list also applies. In addition, certain chemicals now require import licences and fresh food items require radiation-free certificates. The leading suppliers of imports are U.S.A., Japan, West Germany, the U.K., Italy and France and the chief customers for exports are Japan, France, U.S.A. and Singapore.

	1985	1986
Total imports	SR99,645m	SR75,000m
Total exports	85,500m	70,800m

Trade with U.K.

	1987	1988
Imports from U.K.	£1,978,440,000	£1,713,423,000
Exports to U.K.	383,143,000	614,144,000

CAPITAL.—Riyadh, population about 1 million. Other major centres are Jeddah (pop. approx. 1 million), Dammam, Buraydah, Hofuf and Tabuk.

CURRENCY.—Saudi riyal (SR) of 20 qursh or 100 halala.

FLAG.—Green oblong, white Arabic device in

centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

NATIONAL ANTHEM.—"Long live our beloved King".

EMBASSY OF THE REPUBLIC OF SENEGAL
11 Phillimore Gardens, W8 7QG
[01-937 0925/6]

Ambassador Extraordinary and Plenipotentiary, His Excellency Gen. Idrissa Fall, G.C.V.O., M.B.E. (1984).

Senegal lies on the west coast of Africa between Mauritania in the north, Mali in the east, and Guinea-Bissau and Guinea in the south. The Gambia lies entirely within Senegal, except for its sea-coast. (For MAP, see p. 776.) It has an area of 75,750 sq. miles

(196,192 sq. km.), and a population (1985 estimate) of 6,540,000.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. In March, 1963 (after an attempted coup d'état by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. The process of political liberalization continued; there are now 16 political parties officially recognized. Six parties contested the General Election in Feb. 1988. The P.S. took 103 seats and the P.D.S. 17.

In Feb. 1982, after an attempted coup in The Gambia in July 1981 had been put down with the aid of Senegalese troops, the Senegambia Confederation was established, based on certain joint institutions and the integration of defence, security and some other matters. Each country remains sovereign and independent. The President of Senegal is President of the Confederation and the President of The Gambia is Confederal Vice-President.

Senegal's principal exports are groundnuts (raw and processed) and phosphates. Tourism is also of growing importance as a revenue earner.

Trade with U.K.

There are also eight Ministers in the Presidency.

Chairman, People's Assembly, Brig.-Gen. M. I. Ahmed.

EMBASSY OF THE SOMALI DEMOCRATIC REPUBLIC

60 Portland Place, W1N 3DG

[01-580 7148]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Jama Abdulle (1988).

The Somali Democratic Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Cape Guardafui (12° N.); and on the Gulf of Aden to the boundary with Djibouti. Somalia is bounded on the west by Djibouti, Ethiopia and Kenya and covers an area of approximately 246,201 sq. miles (637,657 sq. km.). The population, of which a large proportion is nomadic, is estimated (1987) at 5,800,000.

Government.—The Somali Democratic Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was established on July 1, 1960. British rule in Somaliland lasted from 1887 until 1960 except for a short period in 1940–41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by British forces in 1941. In 1950 it was placed under Italian administration by a resolution of the U.N.; this trusteeship lasted until independence. Following the assassination of President Shermake on October 15, 1969, the armed forces, assisted by the police, took over the Government without resistance and a Revolutionary Council under Siad Barre assumed control of the country. A new constitution was introduced following a referendum in 1979. This provides for an elected People's Assembly of 171 seats. The Assembly met for the first time in January 1980. A multi-party poll is to be held by the end of 1990. Following a dispute with Ethiopia over territory, which lasted many years, a peace agreement between the two countries was signed on April 3, 1988 in Mogadishu.

Civil war broke out in May 1988 between the Government and the opposition Somali National Movement. The situation is still confused but there was great damage to property and a significant number of casualties. There are now 400,000 refugees in Ethiopia. Most of southern Somalia is now under de facto military rule.

Livestock raising is the main occupation in Somalia and there is a modest export trade in livestock on the hoof, skins and hides. Italy, the Gulf States and Saudi Arabia import the bulk of the banana crop, the second biggest export.

Trade with U.K.

1987 1988

Imports from U.K. £11,417,000 £10,379,000

Exports to U.K. 825,000 1,151,000

There is a consulate-general at Golden Cross House, 8 Duncannon Street, W.C.2. [01-839 2211]

Area and Population.—The Republic, comprising the Provinces of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State, occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers (34° 50' 22" South latitude) to the Cape of Good Hope, with the exception of Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of 471,445 sq. miles (1,221,031 sq. km.) and a total population (U.N. estimate, 1985) of 32,392,000 (of which approx. 18 per cent are white).

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain (3,582 ft.), while the Great Swartberg and Langeberg run in parallel lines from west to east of the Cape Province. Between these two ranges and the Roggeveld and Nuweveld ranges to the north is

the Great Karoo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Kompasberg, 7,800 ft.). In the east are ranges which join the *Drakensberg* (11,000 ft.) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The eastern province of Natal has pastoral lowlands and rich agriculture land between the slopes of the Drakensberg and the coast, the interior rising in terraces in the southern provinces. The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between Namibia and the Cape Province. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Mozambique. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 1961. After a referendum held among white voters on October 5, 1960, the Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth.

A new Constitution came into effect on Sept. 30, 1984, which provided for an executive President and a three-chamber Parliament; the House of Assembly (178 members) representing Whites, the House of Representatives (85 members) representing Coloureds, and the House of Delegates (45 members) representing Indians. The black population has no representation. There is joint parliamentary responsibility for 'general' affairs (foreign policy, defence, finance, law and order, justice, transport, manpower, commerce and industry, agriculture), and each chamber has separate responsibility for the 'own' affairs of the population group it represents (housing, social welfare, health, education, local government and some aspects of agriculture). Disputes between the chambers may be referred by the President to the President's Council (60 members—20 White, 10 Coloured, 5 Indian elected by their respective chambers, 15 nominated by the President, 10 nominated by Opposition parties).

The President is chosen by an 88-member electoral college (in the proportion 4 White : 2 Coloured : 1

Indian) of the majority parties of the three chambers. The President appoints the Cabinet from all three communities, and also appoints each community's ministerial council for 'own' affairs.

The promulgation of the new Constitution on Sept. 3, 1984 coincided with rioting in the black townships and the continuing unrest led to the declaration on July 20, 1985 of a State of Emergency in 36 districts.

A nationwide State of Emergency was declared on June 12, 1986; it was renewed in June 1987 and 1988, and extended again for up to a further twelve months in June 1989.

Elections to the House of Assembly took place on Sept. 6, 1989 and the results were: National Party, 93; Conservative Party 39; Democratic Party 33. One seat was undecided and is to be recontested after a tied vote.

Elections to the House of Representatives and House of Delegates took place on Sept. 6, 1989. The Coloured Labour Party (led by the Rev. H. J. Hendrickse) and the Indian National Peoples Party (led by Mr. A. Rajbansi) won the majority of seats respectively.

The Black Homelands.—The homelands are areas set aside for occupation by blacks. Six areas—Gazankulu, Lebowa, KwaNdebele, KaNgwane, QwaQwa and KwaZulu—are designated self-governing national states. A further four areas—Bophuthatswana, Ciskei, Transkei and Venda—are regarded as independent republics by the South African government but they are not recognized as such by the United Nations.

Education.—The Provinces have been relieved of all vocational education (technical and industrial), and the Department of National Education under the Minister is concerned with universities, technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped.

Communications.—The State-owned and controlled South African Transport Services operates the national railway system, the principal harbours, most long-distance passenger and freight road transport services, the South African Airways airline and a network of pipelines for petroleum products.

There are international airports at Johannesburg (Jan Smuts), Durban (Louis Botha) and Cape Town (D. F. Malan), with another under construction at La Mercy, Natal. South African Airways operates international services to Europe, North and South America, Australia, the Far East and the Middle East, as well as to neighbouring countries, and it is the principal operator of domestic flights.

The largest sea-port is Durban, Natal. Other major ports are Cape Town, Port Elizabeth, East London, Saldanha Bay and Mossel Bay in Cape Province and Richards Bay, Natal.

Production.—Mining is of the greatest importance to the South African economy, contributing 14·3 per cent to G.D.P. in 1982 (of which gold mining accounted for 10 per cent). Principal minerals produced are: gold, coal, iron ore, diamonds, copper, manganese, lime and limestone and asbestos.

Agriculture, forestry and fishing account for 6·2 per cent of G.D.P. Over 50 per cent of land is pasture so livestock farming is widespread with meat and wool important products. Principal crops are maize, sugar-cane, fruits and vegetables, wheat, sorghum, sunflower seed and groundnuts. Cotton is widely grown because of its suitability to the climate, and viticulture is also widespread.

Industries, concentrated most heavily around Johannesburg, Pretoria and the major ports, process foodstuffs, metals and non-metallic mineral products, and also produce beverages and tobacco, motor

vehicles, chemicals and chemical products, machinery, textiles and clothing, and paper and paper products.

Trade.—Principal exports are: gold, base metals and metal products, diamonds, food (especially fruit), chemicals, machinery and transport equipment, and wool. Principal imports are: machinery, chemicals, motor vehicles, metals and metal products, food, inedible raw materials and textiles.

Trade with U.K.

	1987	1988
Imports from U.K.	£948,584,000	£1,074,826,000
Exports to U.K.	658,162,000	807,669,000

Finance.—Estimated revenue for 1988–89 was R47,460 million, and estimated expenditure was R56,556 million.

CAPITAL.—The administrative seat of the Government is Pretoria, Transvaal; population (1985 estimate), 822,925; the seat of the Legislature is Cape Town, population (1985) 1,911,521. Other large towns (1985 figures) are Johannesburg, Transvaal (1,609,408); Durban, Natal, the largest seaport (634,301); Port Elizabeth, Cape (651,993); Bloemfontein, capital of Orange Free State (232,984); East London, Cape (167,992); and Pietermaritzburg, capital of Natal (192,417).

CURRENCY.—Rand (R) of 100 cents.

FLAG.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Flag horizontal, away from the pole the old Transvaal Vierkleur, all spread full.

NATIONAL ANTHEM.—Die Stem Van Suid-Afrika (The Call of South Africa).

NATIONAL DAY.—May 31.

NAMIBIA

Administrator General, Louis Pienaar.

Namibia (South West Africa) stretches from the southern border of Angola (lat. 17° 23' S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east. The average rainfall over 70 percent of the Territory is below 400 mm. per annum.

The territory has an area of 318,261 sq. miles (824,292 sq. km.), including the area of Walvis Bay (434 sq. miles) which is claimed by South Africa. The population was estimated at 1,184,000 in 1986 and the main population groups are: Ovambo (587,000), Whites (78,000), Damara (89,000), Kavango (110,000), Herero (89,000), Nama (57,000), Coloured (48,000),

Caprivians (44,000), Bushmen (34,000), Rehoboth Baster (29,000), Tswana (7,000).

Government.—A German protectorate from 1880 to 1915, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory was entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject of dispute.

On June 21, 1971, the International Court of Justice at The Hague delivered an advisory opinion as requested by the U.N. Security Council on the legal consequences for States of the continued presence of South Africa in Namibia (South West Africa). The Court decided by 13 votes to 2, that (*inter alia*) 'the continued presence of South Africa being illegal, South Africa is under obligation to withdraw its administration from Namibia immediately and thus put an end to its occupation of the Territory'. The South African Government rejected this opinion, but accepted the principle that the territory should attain independence. In September 1975 constitutional talks (known as the Turnhalle Conference) were begun in Windhoek between delegates from the 11 ethnic groups of the territory in order to determine the future of South West Africa. But their representative nature was contested by, *inter alia*, SWAPO, a liberation movement with substantial international support and when, in April 1977, it became clear that independence based on the Turnhalle would not solve the problem, the Five Western members of the U.N. Security Council at that time drew up a plan, later incorporated into Security Council Resolution 435, for a peaceful settlement. The plan involves free and fair elections under U.N. supervision leading to independence. The plan has been accepted by all the parties to the Namibia question and attempts to implement the plan are continuing.

Meanwhile, the South African Government appointed an Administrator-General in 1977 to establish a central administration there for those functions previously administered from Pretoria. In December 1978, the South Africans organized an election for a constituent assembly which SWAPO and most of the internal political parties boycotted. The resultant assembly was transformed into a National Assembly with legislative powers in May 1979, and a Council of Ministers was established in 1980 but both were abolished in Jan. 1983 and the territory again came under direct rule. However, in May 1985 legislative powers and executive authority were restored under a Transitional Government of National Unity intended to hold office while South Africa and the U.N. negotiate Namibia's independence.

After a series of talks between Cuba, Angola, South Africa and the U.S.A., agreement was reached in Dec. 1988 for the withdrawal over 27 months of the Cuban troops in Angola in exchange for Namibian independence under U.N. Security Council Resolution 435. Resolution 435 began to be implemented on April 1, 1989: the Administrator General resumed control of the territory, the South West Africa Territory Force was gradually demobilized and the South African Defence Force presence in Namibia was gradually cut to 1,500 personnel, restricted to base. The U.N. Secretary General sent his Special Representative, Martti Ahtisaari, to Namibia to oversee the seven-month run-up to elections and a 4,500 strong United Nations Transition Assistance Group (UNTAG) was deployed to monitor South

African withdrawal and the conduct of the parties. Elections to a Constituent Assembly are due to be held in Nov. 1989. The Assembly will then decide on a constitution, which must be approved by a two thirds majority.

Production.—Mining, agriculture and fisheries are important. Animal husbandry accounts for 99 per cent of the total gross output of commercial agriculture.

Trade with U.K.

	1987	1988
Imports from U.K.	£3,909,000	£3,259,000
Exports to U.K.	7,681,000	10,729,000

CAPITAL.—Windhoek (population, 1987 estimate, 110,000). The only port of any size is Walvis Bay.

CURRENCY.—South African rand (R) of 100 cents.

SPANISH EMBASSY
24 Belgrave Square, SW1X 8QA
[01-235 5555]

Ambassador Extraordinary and Plenipotentiary, His Excellency José Joaquín Puig de la Bellacasa, G.C.V.O. (1983).

Minister-Counsellor, Sr. D. J. I. Carbalaj, c.v.o.

Area and Population.—Situated in the south-west of Europe, between 36°–43° 45' N. lat. and 4° 20' 20" W. long., Spain is bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coastline extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 194,897 sq. miles (504,782 sq. km.), with a population (1986 estimate) of 38,818,355.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, etc. The principal rivers are the Duero, the Tajo, the Guadiana, the Guadalquivir, the Ebro and the Miño.

Government.—Spain was a monarchy until April 1931, when King Alfonso XIII left the country and a Republic was proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil other European countries, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or Falange) while those of Communist views supported the Azaña (Popular Front) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the Nationalists (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (*Leader*) of Spain and Chief of the State. In the Civil War of 1936–39 over 1,000,000 lives were lost.

On July 22, 1969, General Franco nominated Prince Juan Carlos (Alfonso) of Bourbon (grandson of the

late King Alfonso XIII) to succeed him as head of state at his death or retirement. The nomination was approved in the *Cortes* by a large majority. Following the death of General Franco, on November 20, 1975, Juan Carlos acceded to the throne on Nov. 22, 1975.

Under the Constitution drawn up in 1977–78 there is a bi-cameral *Cortes* comprising a 350-member Congress of Deputies elected for 4 years by universal adult suffrage, and a Senate consisting of directly elected representatives of the provinces, islands, autonomous regions and Ceuta and Melilla.

In the regional and municipal elections of May 1983, the P.S.O.E. won the majority of the votes. In elections held in the Basque country in February, and in Cataluña in April 1984, local nationalist parties (P.N.V. and C.I.U.) retained their majorities and formed autonomous governments. At the General Election on June 22, 1986, P.S.O.E. won 184 seats; C.P., 105; C.D.S., 19; and I.U., 7 seats.

Regions.—Since the promulgation of the 1978 Constitution, 17 autonomous regions have been established, with their own parliaments and governments. These are Andalucía, Aragón, Asturias, Balaeric Islands, the Basque country, Canaries, Castilla-La Mancha, Castilla-León, Cantabria, Cataluña, Extremadura, Galicia, Madrid, Murcia, Navarre, La Rioja and Valencia.

Defence.—*Army.*: There are in Spain 1 armoured, 1 mechanized, 1 motorized and 2 mountain divisions; 1 artillery brigade, 2 cavalry brigades, 1 air-transportable brigade, 1 helicopter brigade, 1 coastal artillery brigade. The *Guardia Civil* operates as a gendarmerie in the rural areas under the control of the Ministry of Defence.

The active Spanish *Navy* consists of 1 aircraft carrier, 9 destroyers, 12 frigates and corvettes, 12 minesweepers, a major amphibious vessel, 11 submarines, 12 fast patrol craft, 6 hydrographic vessels, 1 tanker, and many smaller patrol craft and auxiliaries. The Navy also has 50 helicopters and 10 Harrier aircraft.

The *Air Force* is divided geographically into 3 regions covering Spain plus an Air Zone for the Canaries. There are also functional Combat, Tactical and Transport Commands. The Air Force consists of 2 attack squadrons, 9 air defence squadrons, 1 maritime squadron, 7 transport squadrons, 3 search and rescue squadrons, 9 training squadrons and 1 fire-fighting squadron.

Spain became a member of N.A.T.O. in May 1982. Her continued membership (linked to non-military integration) was confirmed in a referendum in March 1986. The present government has also initiated reorganization of the military structure.

Education.—Under the Education Law 1985 free education for all children aged 6 to 16 is guaranteed. Under the new law, private schools (30 per cent of primary and 60 per cent of secondary schools) will have to fulfill certain criteria to receive government maintenance grants.

There are 32 state universities, the oldest of which, Salamanca, was founded in 1230. Other ancient foundations are Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Zaragoza (1474), Santiago (1501), Seville (1502), Granada (1526), and Madrid (1590). New universities in 1989–90 include Universidad Pública de Navarra and Carlos III (Madrid). Private universities are Deusto in Bilbao, and Navarra in Pamplona. Student numbers in the universities have risen to over 960,000.

Language and Literature.—Castilian is the language of more than three-quarters of the population of Spain. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipúzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the north-western provinces, is akin to Portuguese; the govern-

ments of these regions actively encourage use of their local languages.

The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547–1616), Lope Félix de Vega Carpio (1562–1635) and Pedro Calderón de la Barca (1600–1681). The Nobel Prize for Literature has four times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922), Juan Ramón Jiménez (1956) and Vicente Aleixandre (1977).

Production and Industry.—The expansion of the Spanish economy and accession to the E.C. have led to changes in Spanish agriculture. It accounts for over 5 per cent of G.D.P. and employs over 13 per cent of the working population (down from 28 per cent in 1970). Between 1970 and 1985 the net value of agricultural production increased by 56 per cent in real terms.

The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—olives, oranges, lemons, almonds, pomegranates, bananas, apricots, tomatoes, peppers, cucumbers and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the southwest, Jerez, the well-known sherry and tent wines are produced. The fishing industry is important.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Output of coal in 1988 was 15.5 million tonnes; output of steel (1988) 11.9 million tonnes.

The principal goods produced are cars, steel, ships, manufactured goods, textiles, chemical products, footwear and other leather goods. In 1988 an estimated 54,172,000 tourists visited Spain.

	TRADE	
	1987	1988
	million pesetas	
Imports	6,029,838	7,039,516
Exports	4,193,388	4,686,376

The balance of payments in current account showed a deficit of \$3,350m. in 1988 and reserves stood at \$39,784 million, a 32 per cent increase on the previous year.

	Trade with U.K. (inc. Canary Islands)	
	1987	1988
Imports from U.K.	£2,164,221,000	£2,691,662,000
Exports to U.K.	2,099,139,000	2,482,360,000

The principal imports are cotton, tobacco, cellulose, timber, coffee and cocoa, food products, fertilizers, dyes, machinery, motor vehicles and agricultural tractors, wool and petroleum products. The principal exports include cars, petroleum products, iron ore, cork, salt, vegetables, fruits, wines, olive oil, potash, mercury, pyrites, tinned fruit and fish, tomatoes and footwear.

CAPITAL. Madrid. Population (1986) 4,731,224. Other large cities are Barcelona (4,597,429), Valencia (2,078,812), Seville (1,594,250), Zaragoza (824,781), Málaga (1,137,782), Bilbao (1,179,148); Murcia (1,006,788).

CURRENCY.—Peseta of 100 céntimos.

FLAG.—Three horizontal bands, red, yellow and red, with coat of arms on yellow band.

NATIONAL ANTHEM.—"Marcha Real Española".

NATIONAL DAY.—October 12.

Calle Fernando el Santo, 16, Madrid 4
[Madrid 419 0200]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lord Nicholas Gordon Lennox, K.C.M.G., K.C.V.O. (1984).

Minister, I. V. Roberts.

Counsellor, D. R. Christopher (Commercial).

Defence and Military Attaché, Brig. A. D. Morland, M.B.E.

Head of Political Section, G. C. Gillham.

There are Consulates General in *Barcelona, Bilbao; Consulates in Tenerife, Alicante, Seville, Malaga, Palma de Mallorca, Las Palmas, Santander, Tarragona, Vigo and Lanzarote, and Vice Consulates in Algeciras, Ibiza and Menorca.*

British Council Representative, R. T. Joscelyne, Plaza de Santa Barbara 10, Madrid 28004. There is also a regional office in Seville and offices with English language institutes in Bilbao, Granada, Palma de Mallorca, Las Palmas and Vigo.

BRITISH CHAMBER OF COMMERCE, Plaza de Santa Barbara 10, 1st Floor, 28004 Madrid, also Paseo de Gracia 11, Barcelona 7 and Alameda de Mazarredo 5, Bilbao 1.

The BALEARIC ISLES form an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Ibiza and Formentera), and seven smaller (Aire, Aucanada, Botafoc, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 sq. miles (5,011 sq. km.), with a population of 685,088. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. 304,422; Ψ Mahon (Minorca), pop. 22,926.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 mostly uninhabited islets. The total area is 2,807 sq. miles (7,270 sq. km.), with a population of 1,444,626. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote (38,500), Fuerteventura (19,500) and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 366,454) in Gran Canaria, where major oil companies have installations for refueling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma (76,000), Gomera (31,829), and Hierro (10,000)), with seat of administration at Ψ Santa Cruz in Tenerife, pop. 190,784.

ISLA DE FAISANES is an uninhabited Franco-Spanish condominium, at the mouth of the Bidassoa in La Higuera bay.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 sq. miles (13 sq. km.), with a population of 70,864.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. Population 58,449. Ceuta and Melilla are parts of Metropolitan Spain.

OVERSEAS TERRITORIES

Spanish settlements on the Moroccan seaboard are:—

Peñón de Alhucemas, the bay of that name includes six islands; population 366.

Peñón de la Gomera (or *Peñón de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The Chaffarinas (or Zaffarines) are a group of three

islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

The former provinces of Spanish Guinea, Fernando Poo and Rio Muni achieved independence on October 12, 1968, under the title of Equatorial Guinea.

The protectorate of Spanish Morocco was incorporated in Morocco on the latter's independence in 1956. Ifni, the former enclave in Morocco, was incorporated by treaty, on June 30, 1969, and the Spanish Sahara came under joint Moroccan and Mauritanian control in November 1975.

EMBASSY OF THE REPUBLIC OF THE SUDAN
3 Cleveland Row, SW1A 1DD
[01-839 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Ibrahim Mohamed Ali (1985).

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from the Republic of Chad about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Ethiopia in 38° 35' E. (at 18° N.). On the east lie the Red Sea and Ethiopia; on the south lie Kenya, Uganda and Zaire; and on the west the Central African Republic, Chad, and Libya. The greatest length from north to south is approximately 1,300 miles, and east to west 950 miles.

The *White Nile* enters from Uganda at Nimule as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the

Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. Between Khartoum and Wadi Halfa lie five of the six *Cataracts*.

The estimated area is about 967,500 sq. miles (2,505,813 sq. km.), with a population of 21,550,000, partly Arabs, partly negroes, and partly of mixed Arab-Negro blood, with a small foreign element. The Arabs are mostly Muslims. The Nilotics of the Bahr el Ghazal and Upper Nile Valleys are generally Animists, but some have been converted to Christianity and others are Muslims. There are some 1 million refugees in the Sudan.

Government.—The Anglo-Egyptian Condominium over the Sudan which had been established in 1899 ended when the Sudan House of Representatives, on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state. A Republic was proclaimed on Jan. 1, 1956, and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. The Sudan was under military rule from Nov., 1958, until 1964 when a new civilian Cabinet was appointed. Government of the country was taken over on May 25, 1969, by a ten-man revolutionary council headed by Col. Gaafar Mohamed El Nimeri. In February 1972 an agreement was signed at Addis Ababa which brought to an end nearly 17 years of insurrection and civil war in the six southern provinces, and which recognized southern regional autonomy within a unified Sudanese State. Insurrection broke out again in 1983. In April 1985 the Army command assumed power after popular demonstrations, deposed Nimeri and appointed transitional government which undertook to hand over power to a democratically elected government. Elections were held in April 1986 and a new government formed, a coalition of Umma and D.U.P. members. A new broad-based coalition was formed in May 1988 with representatives from the Umma, D.U.P., National Islamic Front and Southern parties.

The government of Sadiq al Manhi was overthrown in a military coup led by Brig.-Gen. Omar Hassan Ahmad al-Bashir on June 30, 1989. The Constitution was suspended and parliament was replaced by a 15-member ruling junta who have de facto control over a cabinet of 21 ministers.

Education.—School education is free for most children, but not compulsory, beginning with six years primary education, followed by three years secondary education at general secondary schools, the more academic higher secondary schools or vocational schools. The medium of instruction is Arabic. English is taught as the principal foreign language in all schools.

Khartoum University has 10 faculties. There is a branch of Cairo University in Khartoum, Islamic University at Omdurman and universities at Wad Medani and Juba.

In addition to the universities there are various technical post-secondary institutes as well as professional and vocational training establishments.

Production.—The principal grain crops are *dura* (great millet) and wheat, the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Traditionally a major producer of long-staple cotton, Sudan has in recent years grown more short and medium-staple cotton. These grades now account for more than half total production. Production in 1987-88 is estimated to have been around 837,000 bales. The Sudan also produces the bulk of the world's supply of gum arabic. Sugar is an increasingly important crop. The Sudan still has to achieve self sufficiency in sugar production. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. Production has, however, been affected by drought, famine and flooding.

Sudan's agriculture production provided employment for over 60 per cent of the labour force and contributed 37 per cent to G.D.P. in 1986-87. It is based on large and medium sized public sector irrigation projects with small scale private irrigation schemes providing mostly fruit and vegetables. Mechanised and traditional agriculture is practised in areas of sufficient rainfall.

The manufacturing sector contributed less than 8 per cent to G.D.P. in 1986-87 and provided employment for 4 per cent of the work force. The main manufacturing enterprises are concentrated in the areas of food processing, textiles, shoes, cigarettes and batteries.

Communications.—The railway system has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Karima, Port Sudan, Wad Medani, Sennar, El Damazin, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Nile river services between Khartoum and Juba have been interrupted by the southern insurrection. Port Sudan is a well-equipped modern seaport. Sudan Airways fly services from Khartoum to many parts of the Sudan and to other African states, Europe and the Middle East.

FINANCE

Suriname is situated on the north coast of South America and is bounded by French Guiana in the east, Brazil in the south and Guyana in the west. It has an area of 63,037 sq. miles (163,265 sq. km.), with a population (1988 estimate) of 410,000.

Formerly known as Dutch Guiana, Suriname remained part of the Netherlands West Indies until November 25, 1975, when it achieved complete independence. Suriname had received autonomy in domestic affairs under the Realm Statute which took effect on December 29, 1954. The civilian government

was ousted by the military in Feb. 1980, who appointed the predominantly civilian Cabinet. A National Assembly of 31 members was appointed on Jan. 1, 1985 to draft a new constitution. A referendum held on Sept. 30, 1987 voted for the new constitution and in elections held on Nov. 25 a coalition of three opposition parties won a landslide victory over Cmdr. Bouterse's N.D.P. party. President Shankar and Vice-President Arron were sworn in on Jan. 25, 1988, and a new Council of Ministers was installed on Jan. 26.

Suriname has large timber resources. Rice and sugar cane are the main crops. Bauxite is mined, and is the principal export.

11 Montagu Place, W1H 2AL
[01-724 2101]

Ambassador Extraordinary and Plenipotentiary, His Excellency Leif Leifland, G.C.V.O. (1982).

Minister Plenipotentiary, P. O. Jödahl.

Counsellors, A. Alsterdal (Press); P. Bruce (Commodities); P. Järborg (Consular and Administration); N. Daag (Political).

Defence and Naval Attaché, Cmdr. J. Bring.

Military and Air Attaché, Col. E. J. Hjelm.

Trade Commissioner, M. Nilsson (73 Welbeck Street, W1M 8AN.).

Area and Population.—Sweden occupies the eastern area of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, 'Län', with a total area of 173,732 sq. miles (449,964 sq. km.), and population Dec. 31, 1985 of 8,358,139. In 1985 the birth rate was 11.79 per 1,000 inhabitants, the death rate 11.26 per 1,000 inhabitants and infant mortality rate was 6.8 per 1,000 live births.

Government.—Under the Act of Succession of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte. (A 1979 amendment vested the succession in the monarch's eldest child, irrespective of sex.) Jean-Baptiste Jules Bernadotte, Prince of Ponte Corvo, Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He succeeded Charles XIII in 1818. There is a unicameral Diet (*Riksdag*) of 349 members elected for 3 years. The Council of Ministers (*Statsråd*) is responsible to the *Riksdag*.

Production and Industry.—The country's industrial prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore, lead, zinc, sulphur, granite, marble, precious and heavy metals (the latter not exploited) and extensive deposits of low grade uranium ore. Industries based on mining, principally iron and steel, aluminium and copper are important but it is the general engineering industry that provides the basis of Sweden's exports. Growth areas are largely in the specialized machinery and systems and chemical industries. The relative importance of agriculture has declined and in 1983 only 5.4 per cent of the population was engaged in farming.

Apart from water power Sweden has no significant indigenous resources of conventional hydrocarbon fuels and relies to a high degree upon imported oil. Much of Sweden's electricity is generated by nuclear power but as a result of a referendum in 1980 the nuclear programme is to be discontinued by 2010. Small supplies of natural gas are imported from Denmark into southern Sweden, with the pipeline being extended to Gothenburg.

Communications.—The total length of Swedish railroads is 11,745 km. The number of passenger cars in use on December 31, 1985 was 3,151,195.

The mercantile marine amounted on December 31, 1985 to 2,619,625 gross tonnage. The Board of Civil Aviation, under the control of the Ministry of Communications handles civil aviation matters. Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airlines System.

Defence.—Based on the policy of non-alignment in peace leading to neutrality in war Sweden maintains a Total Defence intended to make any attack on her costly. Total Defence includes peacetime organizations for civil, economic and psychological defence as

well as compulsory national service for all acceptable males. Some 50,000 national servicemen are called up for 7–15 months training each year and most are recalled every fourth year for refresher training. On mobilization the Army strength totals 4 armoured brigades, 1 mechanized brigade and 23 infantry and winter warfare brigades. The Navy has 12 submarines, 48 fast attack craft, a number of minor craft and auxiliaries and 5 coast artillery units. The Air Force has modern supersonic aircraft of Swedish manufacture forming a standing force of 220 air defence, 150 attack and 55 reconnaissance with support aircraft and a modern air defence radar system. Facilities exist for rapid dispersal from main bases in war.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent of the people officially adhere.

Language and Literature.—Swedish belongs, with Danish and Norwegian, to the North Germanic language group. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish provincial laws in 1350. With his translation of the Bible, Olaus Petri (1493–1552) formed the basis for the modern Swedish language. Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786. Swedish literature is studded with names such as Almqvist (1795–1866), Strindberg (1849–1912) and Lagerlöf (1858–1940), Nobel Prize Winner in 1909. Contemporary authors include Lagerquist (1891–1974), Nobel Laureate in 1951, Martinson (1904–1978) and Johnson (1900–1976), Nobel Laureates jointly in 1974. The Swedish scientist Alfred Nobel (1833–1896) founded the Nobel Prizes for Literature, Science and Peace.

Education.—Tuition within the State system, which is maintained by the State and by local taxation, is free. It provides 9 years' compulsory schooling from the age of 7 to 16 in the comprehensive elementary schools; further education of 2, 3 or 4 years in the upper secondary schools; a unified higher education system administered in 6 regional areas containing one of the universities—Uppsala (founded 1477); Lund (1668); Stockholm (1878); Gothenburg (1887); Umeå (1963) and Linköping (1967). At present there are 33 institutions of higher education including three technical universities in Stockholm, Gothenburg and Luleå, and the Karolinska Institute in Stockholm, which specializes in medicine and dentistry.

President of the Swiss Confederation (1989) and Head of Public Economy, Jean-Pascal Delamuraz.

Vice-President (1989) and Head of Justice and Police, Arnold Koller.

Military, Kaspar Villiger.

Transport, Energy and Communications, Adolf Ogi.

Foreign Affairs, René Felber.

Interior, Flavio Cotti.

Finance, Otto Stich.

EMBASSY OF SWITZERLAND
16–18 Montagu Place, W1H 2BQ
[01-723 0701]

Ambassador Extraordinary and Plenipotentiary, His Excellency Franz E. Muheim (1989).

Ministers, C. M. W. Faessler; Milan J. A. Lusser (Economic and Financial).

Counsellor, H. Hofer (Commodities and Agriculture).

Defence, Military, Naval and Air Attaché, Maj.-Gen. G. de Loës.

Consul General and Head of Administration, A. Mehr.

There is a Swiss Consulate-General in Manchester.

Area and Population.—Switzerland, the Helvetia

of the Romans, is a federal republic of central Europe, situated between $45^{\circ} 50' - 47^{\circ} 48' N.$ lat. and $5^{\circ} 58' - 10^{\circ} 3' E.$ long. It is composed of 23 Cantons, 3 subdivided, making 26 in all, and comprises a total area of 15,943 sq. miles (41,293 sq. km.), with a population (Dec. 31, 1987) of 6,566,800. In 1987 there were 76,505 live births, 59,511 deaths and 43,063 marriages. Of the total population in 1980, 44·3 per cent of the population was Protestant, 47·6 per cent Roman Catholic and 0·3 per cent Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent, and the Jura mountains 12 per cent, of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,782 ft.) is partly in France and Italy; Monte Rosa (15,217 ft.) and Matterhorn (14,780 ft.) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Dufourspitze (15,203 ft.), Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Brienz and the Walensee. There are also many artificial lakes.

Government.—The legislative power is vested in Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 200 members, and a States Council (*Ständerat*) of 46 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of seven members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. Each year the Federal Assembly elects from the Federal Council the President and the Vice-President. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—All Swiss males must undertake military service in the Army or the Air Force, which is part of the Army. Swiss Army equipment includes some British items, such as Centurion tanks, Bloodhound missiles, Vampire and Hunter aircraft, the Medium Girder Bridge and the Rapier guided missile. The Hawk aircraft is being delivered.

Production and Industry.—Agriculture is followed chiefly in the valleys and all over the Mittelland, where cereals, flax, hemp, and tobacco are produced, and nearly all temperate zone fruits and vegetables well grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasture. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

Communications.—There are 5,020 km of railway tracks (Swiss Federal Railways, 2,990 km; Swiss privately owned railways 2,030 km). At the end of

1988 the number of telephones amounted to 5,879,200 and the network was fully automatic throughout the country. At the same time there were 2,590,200 licensed radio receivers and 2,338,300 television receivers.

At the end of 1987 the total length of motorways was 1,451 km. The number of motor vehicles licensed in 1987 was 6,139,268 (2,737,817 cars, 2,462 privately owned buses, 3,398,990 motorcycles).

A merchant marine, established in 1940, consisted at the end of 1987 of 25 vessels with a total gross tonnage of 571,161 tonnes. In 1987, goods handled at Basle Rhine ports amounted to 8,207,900 tonnes. In 1987 163 lake and river vessels (excluding the Rhine) transported 10,608,200 passengers and 500 tonnes of freight. Swiss airlines have a network covering 327,022 km and in 1987 carried 7,393,900 passengers. Swissair, the State airline, which owned 53 aircraft in 1988, flies to and from the Swiss airports at Zürich, Geneva and Basle.

Education.—Control by cantonal and communal authorities. No central organization. Illiteracy practically unknown. (i) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii) *Secondary*: Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii) *Special schools* make a feature of commercial and technical instruction. (iv) *Universities*: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical Universities of Lausanne and Zürich and commercial University of St. Gall.

Language and Literature.—There are four official languages: French, German, Italian and Romansch. German is the dominating language in 19 of the 26 cantons; French in Fribourg, Jura, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons.

Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–1962) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1946.

(Al-Jamhouriya Al-Arabia as-Souriya)

President, Lt.-Gen. Hafez el Assad, b. 1930, assumed office March 14, 1971, re-elected, Feb. 1978, March 13, 1985.

Vice-Presidents, Abdul Halim Khaddam, Rifaat Al Assad, Zuhair Mashariqa.

MINISTERS
(as at July 31, 1989)

Prime Minister, Mahmoud Al Zubi.

Deputy Prime Minister and Minister for Defence, Gen. Mustafa Tlass.

Deputy Prime Minister for Public Services, Mahmoud Qaddur.

Deputy Prime Minister for Economic Affairs, Dr. Salim Yassin.

SYRIAN EMBASSY IN LONDON

The Syrian Embassy has been closed since Oct. 31, 1986, when Syria and the U.K. broke off diplomatic relations. The Lebanese Embassy represents Syrian interests in the U.K.

Area and Population.—Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 71,498 sq. miles (185,180 sq. km.), and a population (at Jan. 1988) of 11,338,000, most of whom are Arabic-speaking and Muslim. The Orontes flows northwards from the Lebanon range across the northern boundary to Antakya (Antioch, Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is said to be the oldest continuously inhabited city in the world (although Aleppo disputes this claim), having an existence as a city for over 4,000 years. It is situated on the river Barada, in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayed Mosque, the Tomb of Saladin,

and the 'Street Called Straight' (Acts ix. 11), while to the north-east is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the well has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12th and 13th centuries has been restored as a museum. One of the oldest alphabets in the world has been discovered at Ugarit (Ras Shamra), a Phoenician village near the port of Latakia.

Hittite cities dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

Government.—Syria, which had been under French mandate since the 1914–18 war, became an independent Republic during the 1939–45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. It seceded from the United Arab Republic on Sept. 28, 1961.

A new Constitution was promulgated in March 1973; this declared that Syria is a 'democratic, popular socialist State', and that the Ba'ath Party, which has been the ruling party since 1963, is 'the leading party in the State and society'. Elections to the 195-seat Peoples' Council in February 1986 resulted in a large majority for the Ba'ath Party, who had 129 seats, Arab Socialist Union 9, Socialist Unionist Movement 8, Arab Socialist Party 5, Syrian Communist Party 9, and Independents 35.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebbleh district of Latakia. Large new areas are coming under irrigation and cultivation in the north-east of the country as a result of the Thawra dam. Skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are produced. There are an increasing number of light assembly plants as Syria's industrialization programme develops. Oil has been found at Karachuk and other parts in the north-eastern corner of the country and production of high quality reserves is proceeding in the region of Deir ez Zor. Syria produces about 350,000 barrels of oil per day at present. A pipeline has been built to the Mediterranean port of Banias, via Homs. Two oil refineries are in production at Homs and Banias. Another pipeline from the Iraq oilfields was closed in April 1982. Syria also has deposits of phosphate and rock salt, and produces asphalt.

Language and Literature.—Arabic is the principal language, but Kurdish, Turkish and Armenian are spoken among significant minorities and a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 3 daily newspapers and several periodicals in Arabic published in Damascus, and also a daily newspaper in English. English has taken over from French as the main foreign language, especially among the young.

Education.—Education in Syria is under State control and, although a few of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has nine faculties and a Higher Teachers' Training College.

The number of students has risen to over 60,000. There are also about 20,000 students at Aleppo University (founded 1961), over 10,000 at Tishrin University, Latakia (founded 1975) and 6,000 at Ba'ath University, Homs. Approximately 10 per cent of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—Although railway lines run from Damascus to both Beirut and Amman, train services go only as far as the border towns. A track has been opened connecting Homs with Damascus. A track links Homs, Hamah, Aleppo and Qamishliye to the Iraq frontier. Branch lines connect the ports of Tartous and Latakia to the system and another line runs from Aleppo down Euphrates valley to Deir ez Zor and thence north to Qamishliye, with a branch going to the Euphrates Dam. All the principal towns in the country are connected by roads which vary from modern dual carriageways to narrow country lanes. An internal air service operates between all major towns. The main International Airport is at Damascus and there are also flights to Eastern Europe, Turkey, Greece and Armenia from Aleppo.

Trade.—The principal imports are foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber. Exports include raw cotton, oil, cereals, fruit, phosphates, livestock and dairy products, other foodstuffs, textiles and raw wool.

Trade with U.K.

	1987	1988
Imports from U.K.	£34,053,000	£24,647,000
Exports to U.K.	24,937,000	36,100,000

CAPITAL.—Damascus (population (estimated) 1,183,000). Other important towns are Aleppo, Homs and Hama, and the principal port is Latakia.

CURRENCY.—Syrian pound (£) of 100 piastres.

FLAG.—Red over white over black horizontal bands, with two green stars in central white band.

NATIONAL DAY.—April 17.

ROYAL THAI EMBASSY IN LONDON
 29–30 Queen's Gate, SW7 5JB
 [01-589 0173]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mr. Sudhee Prasasvinitchai (1986).

Area and Population.—The Kingdom of Thailand, formerly known as Siam, has an area of 198,457 sq. miles (514,000 sq. km.), with a population (estimated 1988) of 54,536,000. The population growth rate averages 2·4 per cent. per year. It has a common boundary with Malaysia in the south, is bounded on the west by Burma and on the north-east and east by Laos and Kampuchea. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is separated from the Thai northern border only by a narrow stretch of Burmese and Laotian territory.

Thailand is divided geographically into four regions, namely: central, north eastern, northern and southern. The capital, Bangkok, is situated in the south of the central plain area. To the north-east there is a plateau area and to the north-west mountains. The south of Thailand consists of a narrow mountainous peninsula. The principal rivers are the Chao Phraya in the central plains, and the Mekong on the northern and north-eastern borders.

Language and Religion.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family, but its vocabulary especially has been strongly influenced by Sanskrit and Pali. It is written in an alphabetic script derived from ancient Indian scripts. The principal religion is Buddhism. In 1985 94·95 per cent of the population were Buddhists, 3·91 per cent Muslims, 0·53 per cent Christians and 0·61 per cent other religions.

Government.—Thailand became a Constitutional Monarchy in 1932. The Constitution promulgated in December 1978 provides for a National Assembly consisting of a Senate appointed by the King and a House of Representatives elected by universal adult suffrage. There are 260 Senate seats and 347 House seats. Each senator is appointed for six years and each M.P. for four years.

A General Election was held on July 24, 1988, following the dissolution of the House after two years. The results were: Chart Thai, 87; Social Action, 54; Democrat, 48; Ruam Thai, 35; Prachakorn Thai, 31; Rassadorn, 21; Prachachon, 19; Puangchon Chao Thai, 17; Palang Dharma, 14; Community Action, 9; Progressive, 8; Muan Chon, 5; United Democratic, 5; Liberal, 3; Others, 1.

Education.—Primary education is compulsory and free and secondary education in Government Schools is free. In 1986 there were 37,616 schools and training colleges, with a total of 10,720,780 pupils and 560,787

teachers. Private universities and colleges are playing an increasing role in higher education. In 1984 the Government agreed to upgrade four private colleges to universities. Out of 43 universities and other similar higher institutes of learning, 21 are private and attended by 53,708 students. In 1986 their total enrolment was 171,438 students.

Agriculture and Industry.—The agricultural sector provides just under half the national income and employs 67·5 per cent of the labour force, which in 1985 was estimated at 26·8 million. Rice remains the most important crop, accounting for 60 per cent of the area planted. After rice the main crops are sugar, maize, rubber, tobacco, kenaf and jute. In recent years the production of livestock and poultry, especially pigs and chickens for export, has gained importance. There is a large fishing industry with more than 20,000 vessels registered. Fish farming is popular in many inland areas. A ban on hardwood export has resulted in the decline of the forestry industry.

The discovery of onshore oil and offshore gas in the late 1970s ushered in a new economic era. Crude production which began in 1983 stood at around 20,000 barrels per day in mid-1985, or about 10 per cent of the country's need. At the same time gas and condensate output stood at over 350 million cubic feet per day. It was estimated that by the end of 1985 indigenous oil and gas supplies should account for about half of Thailand's petroleum demand. The predicted surplus of natural gas has led the Government to designate an area on the east coast as the future centre of the petrochemical industry. Another energy resource becoming more important is lignite which is found mainly in the north and is being used increasingly for electricity production.

Mineral resources are mainly tin, tungsten, lead, antimony and iron. Among these, tin is the most important, with exports totalling 18,455 tons in 1984. In addition, about 60,000 tons of zinc ingots a year are expected to be produced by a zinc refinery which was opened in early 1984.

Industry is divided into two main categories: service and manufacturing. Since 1982 tourism has replaced rice as the country's top foreign exchange earner. There were 3,482,958 overseas visitors in 1987, generating an estimated 45,000 million baht for the country. The banking system is large and contributes much to the economy, especially employment. There are over 1,800 bank branches in the country employing some 72,000 workers.

Since 1960 the Government has actively promoted industrial investments by means of tax relief and other incentives to local and foreign investors; in 1985, 74·6 per cent of this investment was in Thai projects. Most of the industries established under this scheme in early years were import-substituting. However, there has been an increasing shift to export-oriented industries, taking advantages of low-wage labour and available domestic resources. Manufacturing now accounts for about 21·8 per cent of the national income. Crops contribute 12·1 per cent of G.D.P.

Communications.—The importance of rivers and canals as the traditional mode of transportation has been replaced by highways and roads. The existing road and highway network, totalling 34,701 kilometres in 1984, reaches all parts of the country. Most of the smaller towns and bigger villages are now served by paved roads.

Navigable waterways have a length of about 1,100 km. in the dry season and 1,600 km. in the wet season. About 3,825 km of State-owned railways were open to traffic in 1984. Main lines run from Bangkok to Aranya Prathet on the Kampuchean border via Korat to Ubon and to Nong Khai, the ferry terminal on the River Mekong opposite Vientiane, capital of

Laos; to Chiang Mai and to Hat Yai, whence lines go down the eastern and western sides of the Malay peninsula, via Sungei Galok and Penang respectively, to Singapore. A new line to Sattahip on the east coast is being constructed.

Bangkok is an important international air centre and has direct flights to most of the world's major cities. The airports at Chiang Mai, Phuket and Hat Yai also receive international flights. Most major provincial towns have airports. Thai International and Thai Airways merged in April 1988. Now named THAI, the airline is state-owned.

Thailand has an extensive network of telecommunications services, and the telephone service though still poor is being improved. All major cities and towns are linked by direct long-distance calls. Thailand has two mobile telephone networks, AMPS (urban), and NMT (rural) presently covering only the central area but expanding rapidly.

There are two important ports in the country. Bangkok, which is a river port, can serve vessels up to 27 ft. draught. The deep-sea port at Sattahip caters for larger vessels. Phuket and Songkhla deep water ports have already been completed and are the first to be managed privately under a ten-year concession. Construction of Laem Chabang deep water port started in 1988.

TRADE

Thailand's main exports are rice, tapioca and tapioca products, garments, rubber, integrated circuit boards, precious stones, pearls and other ornaments, maize, canned food, fabrics, sugar and tin. Main imports are crude oil, chemicals and pharmaceuticals, electrical and non-electrical machinery and spare parts, industrial machinery, iron and steel, diesel oil and other fuel oil, vehicle and transport equipment.

	1986	1987p

EMBASSY OF TOGO
30 Sloane Street, SW1.
[01-235 0147/9]

Ambassador Extraordinary and Plenipotentiary, His Excellency Assingbon Agbenou (1986). Counsellor and chargé d'affaires a.i., Djibril Akanga.

The Republic is situated in West Africa between 0°–2° W. and 6°–11° N., with a coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Burkina Faso and in the east by Benin. It has an area of 21,925 sq. miles (56,785 sq. km.), and a population (estimate, 1985) of 3,030,000, including people of several African races. The official language is French.

The first President of Togo, Sylvanus Olympio, assassinated on January 13, 1963, was succeeded by Nicolas Grunitzky, who was himself overthrown by an army coup d'état on January 13, 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Eyadéma named himself President.

Production and Trade.—Although the economy of Togo remains largely agricultural, exports of phosphates have superseded agricultural products as the main source of export earnings. Other exports include palm kernels, copra and manioc. The production of phosphates entirely for export was taken over completely by the government in February 1974.

Trade with U.K.

TUNISIAN EMBASSY
29 Prince's Gate, SW7 1QG
[01-584 8117]

Ambassador Extraordinary and Plenipotentiary, His Excellency Abdelwahab Abdallah (1988).

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 63,170 sq. miles (163,610 sq. km.), and an estimated population in 1985 of 7,205,106.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army.

Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session. In March 1975 the National Assembly proclaimed M. Bourguiba President for life. On Nov. 7, 1987 M. Bourguiba was deposed and succeeded by President Zine el-Abidine Ben Ali. Presidential and legislative elections were held in April 1989. The RCD (Rassemblement Constitutionnel Démocratique) won all 141 seats in the National Assembly. Seven political parties contested the election. Pres. Ben Ali was re-elected with 99 per cent of the vote.

The country is divided into 22 regions (*gouvernats*) each administered by a Governor.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated.

The chief exports are crude oil, phosphates, olive oil, finished textiles, and fruit. The chief imports are machinery and equipment, foodstuffs, petroleum products, and textiles. Some oil has been discovered and production reached an annual rate of 5 million

tons in 1987. Gas has also been discovered off the east coast but exploitation is not viable at present. Tourists numbered almost 1.8 million in 1987.

	1986	1987
Total Imports	TD2,294,400	TD2,509,100
Total Exports	1,403,600	1,770,700

France remains the main trading partner, supplying 27.6 per cent of the country's imports and purchasing 22.9 per cent of Tunisia's exports.

Trade with U.K.

	1987	1988
Imports from U.K.	£24,942,830	£30,780,000
Exports to U.K.	14,713,628	36,062,000

Tunisia became an associate member of the E.C. early in 1969, and signed a new agreement with the E.C. in 1976. In 1977 the introduction of import quota measures by the E.C. on some textile goods resulted in a reduction of growth in this important sector of the Tunisian market. The quotas for some textile products was renegotiated and increased in 1982.

CAPITAL.—Ψ Tunis, connected by canal with La Goulette on the coast, had a population (1984) of 1,394,749. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are: Ψ Sfax (577,992); Ψ Sousse (322,491); Ψ Bizerta (394,670); Kairouan; Gabes; Menzel Bourguiba.

CURRENCY.—Tunisian dinar of 1,000 millimes.

FLAG.—Red crescent and star in a white orb, all on a red ground.

NATIONAL ANTHEM.—“Himat Al Hima”.

NATIONAL DAY.—March 20.

TURKISH EMBASSY
43 Belgrave Square, SW1X 8PA
[01-235 5252]

Ambassador Extraordinary and Plenipotentiary, His Excellency Nurver Nures (1989).

Area and Population.—People of Turkic stock are to be found scattered throughout a wide belt extending from China through the Soviet Union, Afghanistan and Iran to the present day Turkish State, and into Bulgaria.

Turkey itself extends from Edirne (Adrianople) to Transcaucasia and Iran, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of 1985 was 51,428,514, of which 6,942,780 were in Europe and 44,485,734 in Asia.

Turkey in Europe consists of Eastern Thrace, including the cities of Istanbul and Edirne, and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia comprises the whole of Asia Minor or Anatolia and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Iran, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq.

Government.—On October 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Ataturk) President. In 1945 a multi-party system was introduced but in 1960 the government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body of military officers. A new constitution was adopted in July 1961 and in October, after a general election, a civilian government took office. Civilian governments remained in power until Sept. 1980 when mounting problems with the economy and terrorism led the military to assume legislative powers. A civilian technocratic government was appointed later that month.

A new Constitution, extending the powers of the President, was approved by a referendum on Nov. 7, 1982. It provided for the separation of powers between the legislature, executive and judiciary, and the holding of free elections to the unicameral Grand National Assembly, which has 400 members elected every five years. Following the General Election on Nov. 6, 1983 the military leadership handed over power to a newly elected civilian government.

Party representation at end May 1989 was: Motherland Party, 289; Social Democratic Populist Party, 99; Correct Way Party, 56; Independent, 1; Vacant, 5.

Turkey is divided for administrative purposes into 67 *il* with subdivisions into *kaza* and *nahiye*. Each *il* has a governor (*vali*) and elective council.

Religion and Education.—On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. However, 98.99 per cent of the population are Muslims. The main religious minorities, which are concentrated in Istanbul and on the Syrian frontier, are: Greek Orthodox, 10,000; Armenians, 42,000; Syriani Christians, 42,000; Others, 6,000. (Total Christians, 100,000); Jewish, 44,000. Education is free, secular and compulsory at primary level. There are elementary, secondary and vocational schools.

There are 27 universities in Turkey, including four in Istanbul, four in Ankara, two in Izmir, and one each in Erzurum and Trabzon.

The expenditure allocated to education in the 5th Five Year Plan (1985-89) was TL326,500,000, compared with TL76,000,000,000 in the 4th Five Year Plan (1979-83).

Language and Literature.—Until 1926, Turkish was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals ■ used throughout Europe. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The leading Turkish newspapers are centred in Istanbul and Ankara, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek, Armenian and English and numerous magazines and weeklies on various subjects, but few trade commercial publications.

Agricultural Production.—In 1985 agricultural production accounted for some 16 per cent of the gross domestic product at constant factor prices. About 50 per cent of the working population are in the rural sector. Estimated production figures for the principal crops in 1988 were ('000 tons):

Wheat	20,500	Olives	1,100
Barley	7,500	Tea (wet leaves)	756
Rice	263	Hazelnuts	362
Tobacco	212	Citrus fruit	1,445
Sugar beet	11,534	Grapes and figs	3,750

With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cotton area is in the Cukurova Plain around Adana. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Industry.—After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, as yet comparatively unexploited. The main export minerals are chromite and boron. Production in 1988 was (tons):

Coal	6,688,000
Lignite	38,425,000
Crude petroleum	2,564,000
Crude iron	4,462,000
Boron minerals	2,032,000

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include vehicle assembly, paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries.

In common with other developing countries, Turkey's economy was adversely affected by the steep rises in oil prices from 1973 onwards. This led to a succession of economic crises and high inflation culminating in Jan. 1980 in the introduction of an economic stability programme. Exports have since risen dramatically, topping \$11,846 million in 1988. Inflation, however, remains high (43 per cent in 1985) and ■ result investment is low. Turkey's current account deficit has been reduced to about \$1,503 million. G.N.P. growth for 1989 was about 3·4 per cent and unemployment remains high.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in

1948. The total length of lines in operation is 8,193 kilometres.

Roads.—At the end of 1985 there were 59,300 km. of national roads (55,296 of which were macadamized). The estimated number of vehicles in 1984 was 2,159,417.

The Bosphorus is spanned by a single bridge, opened in 1973. Work on a second bridge was completed in 1988, and plans are being drawn up for a third fixed link between the two continents.

Shipping.—In August 1980 there were 343 merchant ships over 300 gross tons, 79 passenger ships and 73 tankers, giving a total draft weight of 1,545,062 tons.

Civil Aviation.—The Stateairlines (T.H.Y.) operate all internal services and have services to Europe and the Middle East. Most of the leading European airlines, including British Airways, operate services to Istanbul and some also to Ankara.

FINANCE

	1988
Estimated Expenditure	TL20,881.9m
Estimated Revenue	18,425.5m

TRADE

	1987	1988
Total imports ...	US\$14,157.8m	US\$14,339.7m
Total exports ...	10,190.0m	11,662.1m

Most imports are no longer subject to licence. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, chemicals, fertilizers and electrical appliances. Agricultural commodities (cotton, tobacco, fruits, nuts, livestock) represent 47 per cent of total exports. Other exports are minerals, textiles, glass and cement.

Trade with U.K.

	1987	1988
Imports from U.K.	£513,479,000	£477,539,000
Exports to U.K.	579,366,000	509,636,000

CAPITAL.—Ankara (Angora), an inland town of Asia Minor, about 275 miles E.S.E. of Istanbul, with a population (1980) of 3,196,460. Ankara (or Anycra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. Ψ Istanbul (4,870,747), the former capital, was the Roman city of Byzantium. It was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328 and renamed Constantinople. Istanbul contains the celebrated church of St. Sophia, which, after becoming a mosque, was made a museum in 1934; it also contains Topkapi, former Palace of the Ottoman Sultans, which is also a museum. Other cities are Ψ Izmir (1,968,614); Adana (1,467,346); Bursa (1,161,553); Gaziantep (387,093); and Eskişehir (543,733).

CURRENCY.—Turkish lira (TL) of 100 kurus.

FLAG.—Red, with white crescent and star.

NATIONAL ANTHEM.—“*Istikâl Marşı*” (The Independence March).

NATIONAL DAY.—October 29 (Republic Day).

First Deputy Chairman of Gosplan, V. A. Durasov.

Ministries.—There are three groups of departmental ministries, with a total of 56 ministers—26 All Union Ministries, i.e. federal ministries, 11 Union Republican Ministries (co-ordinating ministries of individual republics) and 19 State Committees whose Chairmen rank as Ministers. The Prime Ministers of the 15 constituent republics belong to the Council ex officio.

EMBASSY OF THE U.S.S.R.
13 Kensington Palace Gardens, W8 4QX
[01-229 3628]

Ambassador Extraordinary and Plenipotentiary, His Excellency Leonid M. Zamyatkin (1986).

AREA AND POPULATION

The total area of the U.S.S.R. is 8,649,461 sq. miles (22,402,000 sq. km.); the total population: (Jan. 1, 1989) 286,700,000. The proportion of women to men is 53 to 47. In 1987 the birth-rate was 19·0 and the mortality rate, 10·2. In 1987 66 per cent of the population lived in urban areas.

Area and population (January, 1987) of the constituent Republics of the U.S.S.R. with their date of incorporation into the Union:

Republic	Sq. miles	Population
Armenia (1936)	11,306	3,412,000
Azerbaijan (1936)	33,436	6,811,000
Belorussia (1922)	80,300	10,078,000
Estonia (1940)	17,413	1,556,000
Georgia (1936)	26,911	5,266,000
Kazakhstan (1936)	1,064,980*	16,244,000
Kirghizia (1936)	76,642	4,143,000
Latvia (1940)	24,695	2,647,000
Lithuania (1940)	26,173	3,641,000
Moldavia (1940)	13,912	4,185,000
R.S.F.S.R. (1922)	6,593,391	145,300,000
Tadzhikistan (1929)	54,019	4,807,000
Turkmenistan (1924)	188,417	3,361,000
Ukraine (1922)	252,046	51,200,000
Uzbekistan (1924)	157,181*	19,026,000

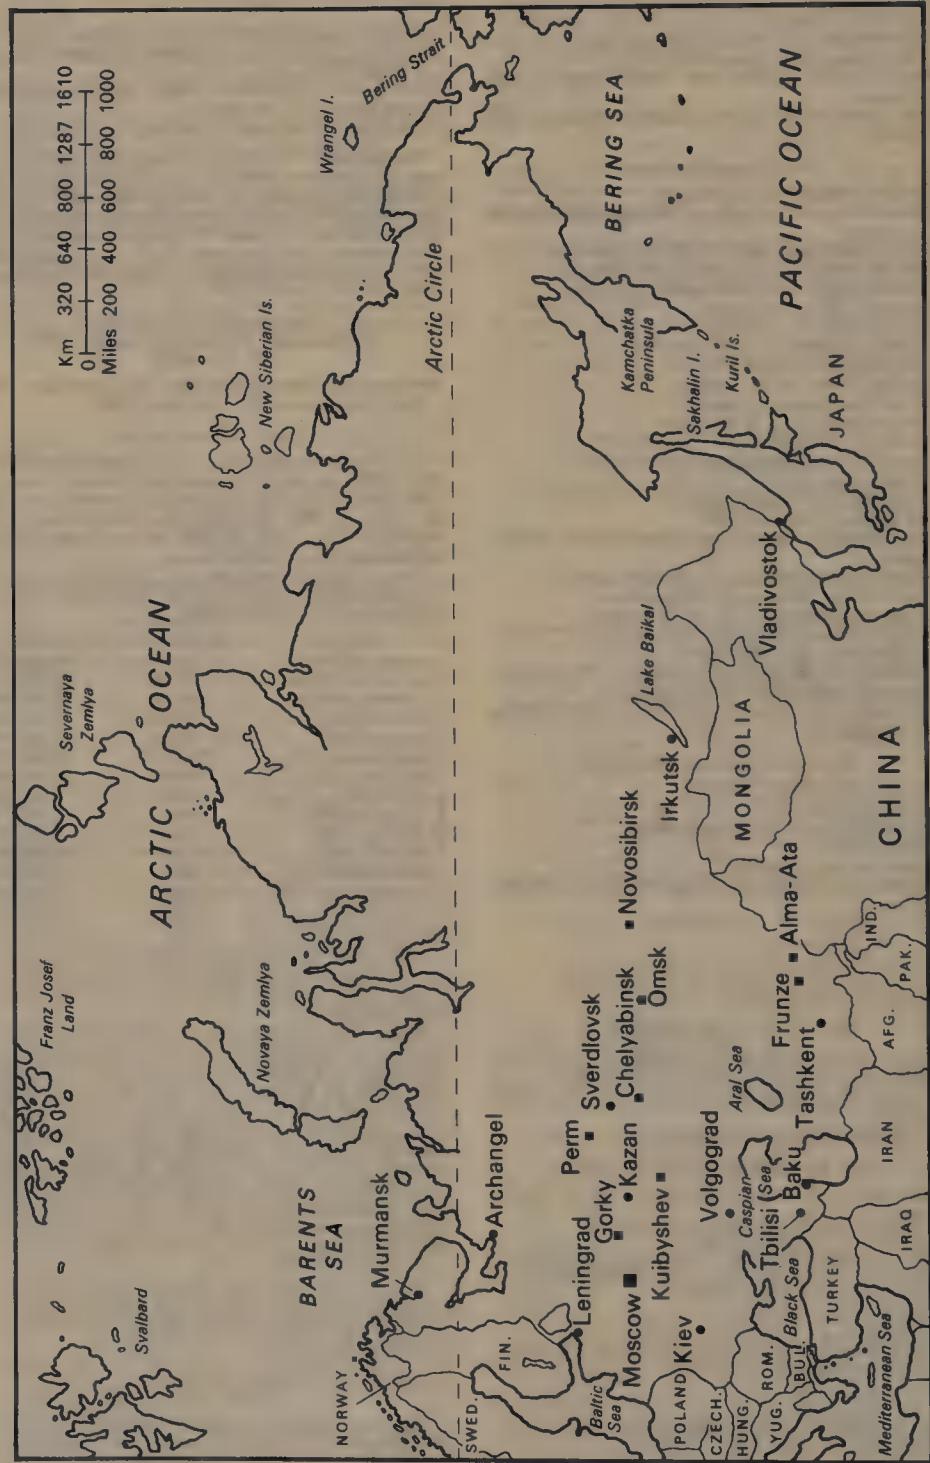

* (Adjusted to include transfer of 3 border regions—888 sq. miles and 162,000 inhabitants—by Uzbek S.S.R., Kazakh S.S.R. and U.S.S.R. decrees of May–June 1971.)

Before the outbreak of the Second World War (1941–45 in U.S.S.R.), the U.S.S.R. consisted of 11 Republics. In August 1940, the major part of *Bessarabia* ceded by Romania in June was joined to the Moldavian A.S.S.R. to form ■ Moldavian S.S.R. The same month, the three independent Baltic States, Estonia, Latvia and Lithuania, were forcibly incorporated into the Soviet Union. In October, 1944, *Tannu-Tuva*, until the Second World War ■ nominally independent state lying to the north-west of Outer Mongolia, became the autonomous province of Tuva and, in 1961, the Autonomous Republic of Tuva, within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic (formed in 1940 from the Karelian A.S.S.R. and land ceded by Finland) reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.

Main Nationalities (1979 Census)

The most numerous national groups of U.S.S.R. are: Russian, 137 m. and Ukrainian, 42 m. There are between 6 and 12 million Kazakhs, Tatars,

Belorussians, and Uzbeks respectively. Azerbaijani, Armenians and Georgians number between 3·5 and 5·5 million each group. There are some 1·9 to 2·9 million Lithuanians, Kirghizians, Turkmens, Germans, Moldavians and Tadjiks. In each of the following nationality groups the population numbers between 1·02 and 1·8 millions: Chuvashes, Latvians, Poles, Mordovians, Bashkirs, Estonians, Dagestanis and Jews.

The 1979 census revealed a marked difference between the growth rates of individual nationalities: while the Slav nations showed an annual increase of under one per cent, certain Central Asian and Caucasian (mostly Muslim) nations recorded an annual net growth of 2·5 to 3·5 per cent.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar. In 1981 Summer Time was introduced between April 1 and October 1, but there are some geographical anomalies in its application. The country is divided into 10 time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE, LITERATURE AND ARTS

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbisch (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682–1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799–1837) and Mikhail Lermontov (1814–1841). The 20th century produced great poets like Alexander Blok (1880–1921), the 1958 Nobel Prize laureate Boris Pasternak (1890–1960), Vladimir Mayakovsky (1893–1930) and Anna Akhmatova (1888–1966). Realistic fiction is associated with the names of Nikolai Gogol (1809–1852), Ivan Turgenev (1818–1883), Fedor Dostoyevsky (1821–1881) and Leo Tolstoy (1828–1910), and later with Anton Chekhov (1860–1904), Maxim Gorky (1868–1936), Ivan Bunin (1870–1953) and Alexander Solzhenitsyn (b. 1918).

Great names in music include Glinka (1804–1857), Borodin (1833–87), Mussorgsky (1839–1881), Rimsky-Korsakov (1844–1908), Rubinstein (1829–1894), Tchaikovsky (1840–1893), Rakhmaninov (1873–1943), Scriabin (1872–1915), Prokofiev (1891–1953), Stravinsky (1882–1971) and Shostakovich (1906–1975). Performers include Igor Oistrakh, M. Rostropovich, S. Richter and the famous conductor G. Rozhdestvensky.

THE CONSTITUTION

On October 7, 1977 a new Constitution was adopted to replace the 1936 Constitution. Amendments to the 1977 Constitution were adopted on Dec. 1, 1988, creating a new parliamentary structure.

The Constitution is divided into a preamble and 9 Sections. The preamble describes the Soviet Union as a 'developed Socialist society', which is said to be a logical stage on the road to communism. The highest aim of the Soviet state is said to be the building of a classless communist society.

Section I covers the bases of the social-political and economic system. The economic system is based on

'socialist ownership of the means of production' (Article 9). The economy is managed on the basis of state plans (Article 15).

This section also contains chapters on social development and culture, foreign policy, and the defence of the socialist Fatherland. The foreign policy of the U.S.S.R. is said to be 'directed to ensuring favourable international conditions for the building of communism in the U.S.S.R.' (Article 28).

Section II is devoted to the state and the individual. This includes a long chapter on the basic rights, freedoms and duties of citizens of the U.S.S.R., all of which are subject to the proviso that 'exercise by citizens of rights and freedoms must not injure the interests of society and state, and the rights of other citizens' (Article 39). The rights are listed in Articles 40–50. Freedom to profess or not profess ■ religion, and Church-State relations are dealt with in Article 52. Section II also includes ■ list of obligations (Articles 59–68).

Section III on the national-state structure of the U.S.S.R. describes it as a 'unitary federal multinational state, formed ■ ■ result of the free self-determination of nations and the voluntary union of equal Soviet Socialist Republics' (Article 69). 'Each Union Republic shall retain the right freely to secede from the U.S.S.R.' (Article 71).

Section IV on the Soviets of people's deputies and the procedure for electing them provides for the U.S.S.R. Congress of People's Deputies, the Congresses of People's Deputies of Union Republics and local Soviets to be elected for ■ term of 5 years. (Articles 89 and 90). The minimum voting age is 18 (Article 96).

Under Section V, the higher organs of State power and administration of the U.S.S.R., the U.S.S.R. Congress of People's Deputies, is the highest organ of State power (Article 108). Regular sessions of the U.S.S.R. Congress of People's Deputies are held twice ■ year. The Congress of People's Deputies elects the U.S.S.R. Supreme Soviet and the Chairman of the U.S.S.R. Supreme Soviet from among its deputies (Article 108).

The U.S.S.R. Supreme Soviet is defined ■ the 'standing legislative, administrative and monitoring body of U.S.S.R. state authority' (Article 117). It consists of two chambers, a Council of the Union and ■ Council of Nationalities, and is convened for two annual sessions, each lasting 3–4 months. (Article 112). The Congress of People's Deputies and the Supreme Soviet are represented between sessions by the Presidium of the Supreme Soviet (Article 118). The Chairman of the Supreme Soviet is head of state.

The highest executive organ of the State is the Council of Ministers of the U.S.S.R. (Article 127). The Council of Ministers is accountable to the U.S.S.R. Congress of People's Deputies and the U.S.S.R. Supreme Soviet (Article 130). A smaller body, the Presidium of the Council of Ministers, acts ■ the permanent organ of the Council of Ministers (Article 131).

Constitutionally, the highest executive organ of the C.P.S.U. is its Central Committee, ■ elected by the Party Congress. The current Central Committee was elected at the XXVIIth Party Congress in March, 1986 but at ■ plenum of the Central Committee in April 1989 ■ number of members retired. It now consists of 251 full members and 133 candidate members with ■ consultative voice. The Central Revision Commission currently has 70 members. The real power in the Party is vested, however, in the Politbureau, the Secretariat and the permanent Departments of the Central Committee.

DEFENCE

Defence expenditure in the U.S.S.R. for 1988 was set officially at 20,244 million roubles (or 4·6 per cent

of total budget). It has been admitted that this covers only manpower costs, not weapon procurement, etc. The overall defence budget was officially stated in May 1989 to be 77,300 million roubles (15·6 per cent of the total Soviet budget). Despite the I.N.F. Treaty with the U.S.A. of December 1987, which will eliminate a whole class of land-based nuclear weapons, and progress towards a START accord, there is a continuing reliance on nuclear weapons while improving the levels and capabilities of conventional arms.

The basic military service is two years in the Army and Air Force and two to three years in the Navy and Border Guards.

The total size of the Soviet regular forces was estimated at the beginning of 1989 to be about 5,130,000, excluding some 1,135,000 Border Guard, internal security, railway and construction troops (mainly uniformed civilians), but including some 1,500,000 command and general support troops not otherwise listed. Late in 1988 it was announced that within the next two years there would be unilateral cuts in Soviet conventional forces of 500,000 men and 10,000 tanks. Withdrawals of Soviet forces from Hungary, Czechoslovakia, the G.D.R. and Mongolia have begun and more may follow. This complicates the individual force levels but in 1988 the position was as follows:

Operational ICBMs, i.e. Inter-Continental Ballistic Missiles, totalled about 1,400. SLBMs numbered 983. The number of MRBMs and IRBMs deployed was 553. The operational personnel of the Strategic Rocket Forces totalled 298,000 (not including 112,000 assigned from Air and Navy).

The total strength of all Soviet air elements (including helicopters) was some 19,000. Of these, 10,000 can be classified as combat aircraft. The total strength of the Air Forces, excluding the Naval Air Force (68,000) and the bomber forces of the Aviation Armies (100,000), was about 450,000 men. The total personnel of the separate Air Defence Command, now merged with the Air Defence Troops of the Ground Forces, was estimated at 630,000 men.

The total size of the Soviet Army was estimated at 1,991,000. It is thought to be organized in 194 divisions, distributed as follows: 30 divisions in Central and Eastern Europe, 63 in European U.S.S.R., 30 in Southern Theatre, 53 in Far Eastern Theatre, and 18 in the Central Strategic Reserve.

The total strength of the Soviet Navy and Naval Air Force was 451,000 men. In total tonnage, it is the second largest navy in the world, and its main strength lies in the submarine fleet. There were in 1988/early 1989 277 cruise missile and attack submarines (118 nuclear-powered, 145 diesel-powered submarines, with a further 14 converting to other roles including SSN), and 84 attack submarines in reserve.

The Soviet Navy has 269 major surface combat vessels, including five aircraft carriers, 36 cruisers and 61 destroyers and some 180 frigates. The landbased Naval Air Force comprises about 915 combat aircraft, 395 of which are bombers, and some 300 helicopters.

The para-military forces number 570,000, including 230,000 border troops and 340,000 internal security troops. There are also DOSAAF members (claimed active membership, 80 million) who participate in such activities as athletics, flight training, shooting, parachuting and pre-military training.

Minister of Defence, Army Gen. D. T. Yazov.
Chief of General Staff, Army Gen. M. A. Moiseev.
Chief, Political Administration, Soviet Army and Navy, Army Gen. A. D. Lizichev.

On May 14, 1955, a Treaty of Friendship, Mutual Assistance and Co-operation was signed in Warsaw between the Soviet Union and its European associates

(Bulgaria, East Germany, Hungary, Poland, Romania, and Czechoslovakia) (and Albania which left the Pact in Sept. 1968) to serve as a counterpoise to NATO. A united military command was set up in Moscow, *C.-in-C.*, Army Gen. P. G. Lushev; *Chief of Staff*, Army Gen. V. N. Lobov. The Treaty (Warsaw Pact), due to have expired in June 1985, was extended by Protocol in its existing form for a further 20 years, with provision for a further 10 year extension thereafter, at a meeting of Pact leaders in Warsaw on April 26, 1985. The Pact came into force on May 31, 1985.

INDUSTRY AND AGRICULTURE

One of the most remarkable aspects of the Soviet economy has been the transformation of an essentially agricultural country into the second-strongest industrial power in the world. The 1988 output amounted to 163 million tonnes of steel, 116 million tonnes of rolled metal, 772 million tonnes of coal, 624 million tonnes of crude oil, 139 million tonnes of cement, 1,705,000 million kW/h of electricity and 1,300,000 cars.

Agricultural development has been slower, mainly owing to lack of incentives among peasants organized in *kolkhozy* (collective farms). Repeated droughts, such as in 1980-81, were a contributing factor to a shortage of grain. The 1988 harvest was 195 million tonnes. Stock breeding has also suffered from the general mismanagement of farming, and from shortages of fodder in recent years. The livestock at Jan. 1, 1989 included 42,000,000 cows, 77,400,000 pigs and 147,300,000 sheep and goats. Besides *kolkhozy* (collective farms) and *sokhohozy* (state farms) a significant contribution to agricultural production is made by the private plots cultivated by individual peasants. The cultivation of these plots is encouraged by the Soviet authorities. The level of productivity remains very low. Forests cover nearly 40 per cent of the whole area of the Union and form a considerable source of wealth.

Trade with U.K.

	1987	1988
Imports from U.K.	£491,615,000	£511,653,000
Exports to U.K.	875,431,000	732,115,000

COMMUNICATIONS

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia via Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a recently completed second Trans-Siberian line (the Baikal-Amur Railway) is partially in use; it follows a more northerly alignment than the earlier Trans-Siberian and terminates in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batumi, Taganrog, Rostov, Kerch, Sevastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, icebound during winter. Several ports have been built along the Arctic Sea route between Murmansk and Vladivostok and are in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although some of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carried about 632,600,000 tons of freight in 1985. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them are the *White Sea-Baltic Canal*, the *Moscow-Volga Canal* and the *Volga-Don Canal* linking the Baltic and the White Seas in the north to the Caspian, the Black Sea and the Sea of Azov in the south.

CURRENCY.—Rouble of 100 kopeks.

FLAG.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY.—November 7 (commemorating the October Bolshevik Revolution of 1917).

NATIONAL ANTHEM.—*Soyuz Nerushimy Respublik Svobodnykh* (Indissoluble union of free republics).

BRITISH EMBASSY

Naberezhnaya Morisa Toreza 14, Moscow
[Moscow 2318511]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Rodric Braithwaite, K.C.M.G. (1988). Minister, N. H. Marshall, C.M.G.

There is a Consular Section attached to the Embassy.

ARMENIA

First Secretary of the Party Central Committee, S. G. Arutyunyan.

Chairman of the Presidium of the Supreme Soviet, G. M. Voskanyan.

Chairman of the Council of Ministers, V. S. Markaryants.

The Armenian S.S.R. occupies the south-western part of Transcaucasia: it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast tablelands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Araks valley has a long, hot and dry summer. Irrigation is essential for agriculture. Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent of the population is Armenian.

CAPITAL.—Erevan. Population, 1,185,000 (Jan. 1, 1987).

AZERBAIJAN

First Secretary of the Party Central Committee, A. Kh. Vazirov.

Chairman of the Presidium of the Supreme Soviet, E. M. Kafarova.

Chairman of the Council of Ministers, A. N. Mutalibov.

The Azerbaijan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Iran. It formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It includes the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the lower reaches of its tributary Araks. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaijan has a continental climate. The land requires artificial irrigation. Industry is dominated by oil and natural gas extraction and related chemical and engineering industries centred on Baku and Sumgait. A large power station on the Araks was completed in 1969, in conjunction with Iran. Azerbaijan is also important in cotton growing area. The Azerbaijani (Turkic) make up more than three-quarters of the population of the Republic, Armenians, about 8 per cent, and Russians, 8 per cent.

CAPITAL.—Baku. Population 1,741,000 (Jan. 1, 1987).

BELORUSSIA

First Secretary of the Party Central Committee, E. E. Sokolov.

Chairman of the Presidium of the Supreme Soviet, G. G. Tarazevich.

Chairman of the Council of Ministers, M. V. Kovalev.

The Belorussian S.S.R., lying in the western part of the European area of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). Belorussians make up four-fifths of the population, with Russians and Poles coming next. It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL.—Minsk. Population 1,566,000 (Jan. 1, 1987).

ESTONIA

First Secretary of the Party Central Committee, V. V. Valyas.

Chairman of the Presidium of the Supreme Soviet, A. F. Ryutiel.

Chairman of the Council of Ministers, I. Kh. Toome.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in

the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians (64.7 per cent) and Russians (27.9 per cent).

CAPITAL.—Tallinn (formerly Reval). Population, 494,000 (Jan. 1, 1987).

GEORGIA

First Secretary of the Party Central Committee, G. G. Gumaridze.

Chairman of the Presidium of the Supreme Soviet, O. E. Cherkeziya.

Chairman of the Council of Ministers, N. A. Chitanava.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjaria) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Lesser Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Surz Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rioni lowland are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatura), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is a leading producer of manganese in the U.S.S.R. There are also many oil refineries. Viniculture, tea and tobacco-growing are the three main agricultural industries. The Black Sea harbours many famous holiday resorts. Georgians make up 68.8 per cent of the population, the remainder being largely composed of Armenians (9 per cent), Russians, Azerbaijanis and Osetians.

CAPITAL.—Tbilisi (Tiflis), population 1,197,000 (Jan. 1, 1987).

KAZAKHSTAN

First Secretary of the Party Central Committee, N. A. Nazarbaev.

Chairman of the Presidium of Supreme Soviet, M. R. Sagdiev.

Chairman of the Council of Ministers, (vacant).

The Kazakh S.S.R., the second-largest Union Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kazakh A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of 17 Provinces: Aktubinsk, Alma-Ata, Chimkent, Dzhambul, Dzhezkazgan, East-Kazakhstan, Gurьев, Karaganda, Kokchetav, Kustanay, Kzylyr-Orda, North-Kazakhstan, Pavlodar, Semipalatinsk, Taldy-Kurgan, Tselinograd and Uralsk.

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and

mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan is very rich in minerals: copper in Kounrad and Dzhezkazgan, lead and zinc in the Altai and Karatau mountains, iron ore in Radryg and Lisakovsk, coal in Ekibastuz and Karaganda and oil and natural gas in the Mangyshlak peninsula. Major centres of metal industry exist in the Altai Mountains, in Chimkent, north of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east.

The Kazakhs (a Turkic people) are in a minority in the Republic named after them; they constitute only 36 per cent of its population. Russian settlers make up 41 per cent and Ukrainians 6 per cent.

CAPITAL.—Alma-Ata (formerly Verny). Population, 1,113,000 (Jan. 1, 1987). Karaganda, a major mining centre, has a population of 633,000 (Jan. 1, 1987).

KIRGHIZIA

First Secretary of the Party Central Committee, A. M. Masaliev.

Chairman of the Presidium of the Supreme Soviet, T. Akmatov.

Chairman of the Council of Ministers, A. Dzhumagulov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains three provinces, Issyk-Kul, Naryn and Osh. The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tien-shan, while mountains of the Pamir-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-Kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Crops include sugar beet and cotton, and sheep are important in the mountains. Industry is being developed and some mining is done. The Kirghiz constitute 47.9 per cent of the population, the Russians 25.9 per cent. The Uzbeks (in Eastern Ferghana) amount to 12.1 per cent.

CAPITAL.—Frunze (formerly Pishpek). Population, 641,000 (Jan. 1, 1987).

LATVIA

First Secretary of the Party Central Committee, Ya. Ya. Vagris.

Chairman of the Presidium of the Supreme Soviet, A. V. Gorbunov.

Chairman of the Council of Ministers, V.-E. G. Bresis.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent of the total territory.

The Latvians make up 53.7 per cent of the Republic's population, Russians 32.8 per cent.

Latvian industry was always highly developed,

with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Liepau, Libau) are important sea-ports.

CAPITAL.—Riga. Population, 900,000 (Jan. 1, 1987).

LITHUANIA

First Secretary of the Party Central Committee, A.-M. K. Brazauskas.

Chairman of the Presidium of the Supreme Soviet, V. S. Astrauskas.

Chairman of the Council of Ministers, V. V. Sakalauskas.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes.

The Lithuanians make up four-fifths of the population, Russians and Poles, 7-9 per cent each.

CAPITAL.—Vilnius (Vilna). Population 566,000 (Jan. 1, 1987).

MOLDAVIA

First Secretary of the Party Central Committee, S. K. Grossu.

Chairman of the Presidium of the Supreme Soviet, A. A. Mokanu.

Chairman of the Council of Ministers, I. P. Kalin.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Romania with the Pruth forming the frontier. In 1918, Romania seized the Russian Province of Bessarabia, but in 1940 the U.S.S.R. forced Romania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. (formed in 1924) to create the Moldavian S.S.R.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 64 per cent of the population, with Ukrainians (14·2 per cent), and Russians (12·8 per cent) next.

CAPITAL.—Kishinev (Chisinau). Population, 672,000 (Jan. 1, 1987).

R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, V. I. Vorotnikov.

Chairman of the Council of Ministers, A. S. Vlasov.

The R.S.F.S.R. has no central Communist Party organization of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern portion of its Asiatic part and makes up 77 per cent of the total territory of the U.S.S.R. with 53 per cent

of the total population. (About 83 per cent of the population are Russians.) It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Inguish, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Oсетian, Tatar, Tuva, Udmurt and Yakut, A.S.S.R.s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kubyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Voronezh and Yaroslavl).

There are three principal geographic areas: a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. extends from Arctic and tundra belts to the sub-tropical in the south. It has a very long coastline, including the longest Arctic coastline in the world (about 17,000 miles). The most important rivers are the Volga, the Northern Dvina and the Pechora, the Neva, the Don and the Kuban in the European part, and in the Asiatic part, the Ob, the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk 'Seas'.

Minerals.—The Republic has some of the richest mineral deposits in the world. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus, in the area between the Volga and the Ural and in Western Siberia, which also has large deposits of natural gas. Coal and gas deposits in Siberia and the Far East (especially Yakutia) are currently being developed, now that some deposits in the western parts of the U.S.S.R. are approaching exhaustion. The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is also mined near Kursk, Tula, Lipetsk, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the far north reindeer breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. An extensive programme of land improvement mainly involving this zone aims to double its total agricultural output by 1990. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the

Urals is another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme south cotton is now cultivated. Vine, tobacco and other southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Moscow and Leningrad are still the two largest industrial centres in the country, but new industrial areas are being developed in the Urals, the Kuznetsk basin, and more recently in Siberia and the Far East. Most of the oil produced in the U.S.S.R. now comes from the R.S.F.S.R., half annual output comes from Tyumen Oblast in Western Siberia. All industries are represented in the R.S.F.S.R., including iron and steel and engineering.

CAPITAL.—Moscow. Population 8,815,000 (Jan. 1, 1987). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Leningrad (before the First World War St. Petersburg and from 1914–1924 Petrograd) has a population of 4,948,000 (Jan. 1, 1987).

Other towns with populations exceeding 1,000,000 are:—

Gorky (Nizhny-Novgorod)	1,425,000
Novosibirsk (Novonikolayevsk)	1,423,000
Sverdlovsk (Yekaterinburg)	1,331,000
Kuibyshev (Samara)	1,280,000
Omsk	1,134,000
Chelyabinsk	1,119,000
Ufa	1,092,000
Perm (Molotov)	1,075,000
Kazan	1,068,000
Rostov-on-Don	1,004,000

TADJIKISTAN

First Secretary of the Party Central Committee, K. Makhkamov.

Chairman of the Presidium of the Supreme Soviet, G. Pallaev.

Chairman of the Council of Ministers, I. Khaeiev.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Kulyab and Leninabad Provinces.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., Pik Kommunizma (24,590 feet), in the centre the high ridges of the Pamir-Altaï system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Of the population 58·8 per cent are Tadjiks (linguistically and culturally akin to the Persians), 23 per cent Uzbeks, the rest Russians and others.

CAPITAL.—Dushanbe (formerly Stalinabad; Dushambe). Population, 591,000 (Jan. 1, 1987).

TURKMENISTAN

First Secretary of the Party Committee, S. A. Niyazov.

Chairman of the Presidium of the Supreme Soviet,

R. A. Bazarova.

Chairman of the Council of Ministers, A. Khodzhamuradov.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya, and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains five Provinces: Ashkhabad, Chardjou, Krasnovodsk, Mary and Tashauz. The country is a low-lying plain, fringed by hills in the south. Ninety per cent of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The cultivation of cotton, stock-raising and mineral extraction are the principal industries. The republic produces about 16 per cent of the Soviet Union's natural gas, as well as astrakhan furs and carpets. Most of the land under plough is artificially irrigated. The oil and silk industries are of old standing. There are also some fisheries in the Caspian.

Turkmens make up 68·4 per cent of the population, Russians 12·6 per cent, and Uzbeks 8·5 per cent.

CAPITAL.—Ashkhabad (formerly Ashkhabad, Poltostansk). Population, 386,000 (Jan. 1, 1987).

UKRAINE

First Secretary of the Party Central Committee, V. V. Shcherbitsky.

Chairman of the Presidium of the Supreme Soviet, V. S. Shevchenko.

Chairman of the Council of Ministers, V. A. Masol.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. Ukrainians make up nearly 75 per cent of the population, with 21 per cent Russians. It consists of 25 provinces—Cherkassy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmel'nytsky, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopil, Transcarpathia, Vinnitsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. In 1980, the Ukraine provided 36 per cent of the total Soviet steel, 51 per cent of iron ore and 27 per cent of coal. The engineering and chemical industries are also of importance. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL.—Kiev, one of the oldest cities in the U.S.S.R., founded in the 6th–7th century A.D., was the capital of the Russian State from 865 to 1240. Population (Jan. 1, 1987), 2,558,000. Other towns are:—

Kharkov	1,587,000
Dnepropetrovsk (Yekaterinoslav)	1,182,000
Odessa	1,141,000
Donetsk (Stalino; Yuzovka, i.e. Hughesovka)	1,090,000

UZBEKISTAN

First Secretary of the Party Central Committee, I. A. Karimov.

Chairman of the Presidium of the Supreme Soviet, M. I. Ibragimov.

Chairman of the Council of Ministers, G. Kh. Kadyrov.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 12 provinces (Andizhan, Bokhara, Dzhizak, Ferghana, Kashkadarya, Khorezm, Namangan, Navoi, Samarkand, Surkhan-darya, Syr-darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include gold, natural gas, oil, copper, lead, zinc and coal.

The Uzbeks, ■ Turkic people, make up 68.7 per cent of the population, the Russians (10.8 per cent), Tatars (4.2 per cent) and Kazakhs (4 per cent) come next.

There are major agricultural and textile machinery plants and several chemical combines. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL.—Tashkent. Population 2,131,000 (Jan. 1, 1987). Samarkand (population (1987), 388,000) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulugbek, Tamerlane's astronomer-grandson, and a 15th-century observatory.

Labour and Social Affairs, Sayyid Khalfan al Roumi.
Health, Sayyid Hamad Abdul Rahman al Madfa.

EMBASSY IN LONDON
30 Prince's Gate, SW7 1PT
[01-581 1281]

Ambassador Extraordinary and Plenipotentiary, Dr. Khaifa Mohamed Sulaiman (1988).
Chargé d'Affaires, Ali Mubarak Ahmed Al Mansoori.

Area and Population.—The approximate area of the U.A.E. is 32,278 sq. miles (83,600 sq. km.), and the population in 1985 was estimated at about 1.6 million.

The United Arab Emirates (formerly the Trucial States) is composed of seven Emirates (Abu Dhabi, Ajman, Dubai, Fujeirah, Ras al Khaimah, Sharjah and Umm al Qaiwain) which came together as ■ independent state on December 2, 1971, when they ended their individual special treaty relationships with the British Government (Ras al Khaimah joined the other six on February 10, 1972).

The British Government, by virtue of ■ treaty made in 1892, had been responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agents in each state, but on independence the Union Government assumed full responsibility for all internal and external affairs apart from some internal matters that remained the prerogative of the individual Emirates. Six of the Emirates lie on the shore of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West while the seventh, Fujeirah, lies on the gulf of Oman.

Security in the area is maintained by the U.A.E. Armed Forces. The Ministry of Defence is located in Dubai with ■ General Headquarters in Abu Dhabi. Most of the separate police forces have also been merged.

Revenue is chiefly derived from oil, re-exports and customs dues on imports. A substantial amount is spent on overseas aid, where commitments in 1980 totalled £154.8 million, doubling those of 1979.

Trade with U.K.

	1987	1988
Imports from U.K.	£478,997,000	£463,344,000
Exports to U.K.	94,989,000	84,217,000

CURRENCY.—U.A.E. dirham of 100 fils.

FLAG.—Horizontal stripes of green over white over black with vertical red stripe in the hoist.

NATIONAL DAY.—December 2.

Abu Dhabi

Abu Dhabi is the largest Emirate of the U.A.E. in area, stretching from Khor al Odaid in the west to the borders with Dubai in the Jebel Ali area. It includes six villages in the Buraimi oasis, the other three being part of the Sultanate of Oman, and a number of settlements in the Liwa Oasis system. Following negotiations with Saudi Arabia, some adjustment of the border has now been made in the Khor al Odaid region, but the agreement has not yet been ratified. The population of the Emirate is now about 670,000.

The Abu Dhabi Government controls oil, gas and petrochemical operations in the Emirate through the Abu Dhabi National Oil Company (ADNOC) which has majority shareholdings in the several oil operating and gas treatment companies. ADNOC also has majority shareholdings in oil industry-related companies covering drilling, refining, distribution, chemical manufacture and investment. Offshore production began in 1962, the most important fields being Umm Shaif and Lower Zakum, near Das Island, site of a large associated gas liquefaction plant. The Upper Zakum field came on stream in late 1982, and

UNITED ARAB EMIRATES
(Al-Imarat Al-Arabiya Al-Muttahida)

President, Shaikh Zaid bin Sultan al Nahayyan (*Abu Dhabi*).

MINISTERS
(as at June 30, 1989)

Vice-President and Prime Minister, Shaikh Rashid bin Said al Maktum.

Deputy Prime Ministers, Shaikh Maktum bin Rashid al Maktum; Shaikh Hamdan bin Muhammad al Nahayyan.

Interior, Shaikh Mubarak bin Muhammad al Nahayyan.

Finance and Industry, Shaikh Hamdan bin Rashid al Maktum.

Defence, Shaikh Muhammad bin Rashid al Maktum.

Minister of State for Foreign Affairs, Sayyid Rashid Abdullah al Nu'aimi.

Petroleum and Mineral Resources, Dr. Mana Said al Otaiba.

Economy and Commerce, Sayyid Saif al Jarwan.

Information and Culture, Shaikh Ahmad bin Hamid bin Butti.

Communications, Sayyid Muhammad Said al Mulla.

Public Works and Housing, Sayyid Muhammad Khalifa al Kindi.

Education, Sayyid Faraj Fadel al Mazroui.

Planning, (vacant).

Justice, Islamic Affairs and Awqaf, Shaikh Mohammad bin Hassan al Khazraji.

Agriculture and Fisheries, Sayyid Said al Raqabani.

Water and Electricity, Sayyid Humaid Nasser al Owais.

four other offshore fields are being developed, one near Abu Dhabi city and three near Delma. Production of oil onshore began in 1963 from the Murban field. A large onshore associated gas liquefaction project based at Ruwais started production in 1981. Other large natural gas finds in recent years will consolidate Abu Dhabi's position as a holder of some of the largest reserves of natural gas in the world. Abu Dhabi's crude oil production in 1987 was approximately 1 million barrels per day.

With its oil wealth the Emirate has seen a decade of growth (which is currently slowing down), not only at Abu Dhabi, now a modern city of about 450,000 people, but also at Al Ain in the Buraimi Oasis and at the new petro-chemical city at Ruwais. An international airport opened in 1982 at Abu Dhabi and another is under construction at Al Ain. There are airfields at Das Island and Jebel Dhanna. The port and harbour on Abu Dhabi island are now completed and there are port facilities at Ruwais.

Ajman and Umm al Qaiwain

Ajman and Umm al Qaiwain are the smallest Emirates, having populations of approx. 64,000 and 29,000 respectively. Both lie on the Gulf coast although Ajman has two inland enclaves at Manama and Masfut. Exploration work continues in both Emirates for oil and gas but so far only Umm Al Qaiwain has experienced any success, with the offshore discovery of natural gas, but the field has yet to be commercially developed. The discovery of onshore gas in nearby Sharjah has increased hopes of similar discoveries in both Ajman and Umm Al Qaiwain.

Dubai

Dubai is the second largest Emirate both in size and in population, which is now about 419,000. The town of Dubai is the main port for the import of goods into the U.A.E. and has a wide re-export trade to the other Gulf States. Dubai's prosperity was established by this trade long before the discovery of oil. Oil was discovered in 1966 and production began in September 1969. The producer in Dubai's offshore oilfields is Dubai Petroleum Company, operated by CONOCO. Production is in excess of 350,000 b.p.d. In 1982 an ARCO-Britoil joint venture discovered an extensive gas and condensate field onshore. A small amount of condensate is produced from the onshore Margam field.

Oil income has been used to finance Dubai's infrastructure and major construction projects include an international airport, a dry dock complex and an international trade and exhibition centre. There is also a 66 berth port at Jebel Ali, forming the heart of an industrial complex which includes an aluminium smelter with an associated de-salination plant and a gas processing plant. The port and its immediate area is a free trade zone which is expected to attract more industry.

Fujeirah

Fujeirah, with a population of 40,000, is the most remote of the seven Emirates lying on the Gulf of Oman coast, and only connected by a metal road to the rest of the country since the end of 1975. Largely agricultural, its population is spread between the slopes of the inland Hajar mountain range and the town of Fujeirah itself, together with a number of smaller settlements on the comparatively fertile plain on the coast. Although exploration work continues, there have been no hydrocarbon discoveries in the Emirate. However, there are some chrome and other mineral deposits. Fujeirah has a new general cargo port.

Ras al Khaimah

Ras al Khaimah has a population of 116,000 of whom more than half live in the town. An ancient sea-port, near to which archaeological remains have been found, Ras al Khaimah is developing as the most agricultural of the Emirates, producing vegetables, dates, fruit and tobacco. In 1982 Ras al Khaimah announced the discovery of oil and gas offshore and this field currently produces approximately 5,000 b.p.d. An industrial area has been developed to the north of the Emirate, which includes 2 cement works. Ras al-Khaimah has an international airport and has also expanded its port. A new international airport is nearing completion. A new trade centre has just been completed and it is hoped that more industry will be attracted to the emirate.

Sharjah

Sharjah, with a present population of approx. 269,000, has declined from its position 50 years ago as principal town in the area. It became the third oil producing Emirate in the summer of 1974, following the discovery of oil offshore. The field declined over the years and by 1982 was yielding less than 6,000 b.p.d. However, new oil and gas discoveries were made in 1982 in the northern emirates and production now stands at about 50,000 b.p.d. Sharjah is well connected by metallised roads to all the other northern Emirates. It experienced a construction boom in the mid-1970's including an ambitious layout of roads and flyovers within the town. A new container port has been constructed on the Gulf of Oman at Khor Fakkan. The international airport was officially opened in 1979.

*Counsellor and Consul General, J. C. Kay.
British Council Representative, A. Swales, P.O. Box 1636, Dubai.*

UNITED STATES OF AMERICA

PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 07'–49° 23' North and longitude 66° 57'–124° 44' West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 23' N., at Point Barrow (2,502 miles from the U.S. geographic centre).

The general coastline of the 50 States has a length of about 20,691 miles on the Atlantic, 7,623 miles on the Pacific, 1,060 miles on the Arctic, and 1,631 miles on the Gulf of Mexico.

The principal river is the mighty Mississippi-Missouri-Red, traversing the whole country from north to south, and having a course of 3,710 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, and Ohio rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, Roanoke and Savannah; of the latter, the Columbia-Snake, Sacramento, and Colorado. The Nueces, Brazos, Trinity, Pearl, Mobile-Tombigbee-Alabama, Apalachicola-Chattahoochee, Suwannee and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have

been estimated as follows:—Rivers flowing to the Pacific, 647,300 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,234,600 are drained by the Mississippi-Missouri-Red. The chain of the Rocky Mountains separates the western portion of the country from the remainder, communications being carried on over certain elevated passes, several of which are now traversed by railroads and major highways; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, pine, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The mineral kingdom produces ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include large quantities of coal, petroleum, stone, phosphate rock, and salt. The highest point is Mount McKinley (Alaska), 20,320 ft. above sea level and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft. below sea-level.

AREA AND POPULATION

	Area, 1980 (sq. miles)		Population

† Died in office. § Assassinated.

(a) Elected as Vice-President.

‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for ■ fourth term Nov. 7, 1944.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of organized Territories. Hawaii formally entered the Union ■ the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternatively.

NATIONAL ANTHEM.—The Star-Spangled Banner.

NATIONAL DAY.—July 4 (Independence Day).

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791 and eleventh to twenty-sixth, Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951, March 29, 1961, Jan. 23, 1964, Feb. 10, 1967 and June 30, 1971), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE executive power is vested in a President, who is elected every four years. The mode of electing the President is ■ follows:—Each State elects (on the

first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for ■ President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received ■ majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects ■ President, the votes being taken by States, the representation from each State having one vote. There is also ■ Vice-President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal

or death of both President and Vice-President, a statute provides for the succession. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms.

Executive duties:—(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein. (2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises ■ general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any state which the authorities thereof are unable to suppress, the aid of the President is invoked. (4) He conducts the foreign policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the senators present concur." The declaration of war rests with Congress. (5) He makes recommendation of ■ general nature to Congress, and when laws are passed by Congress he may return them to Congress with ■ veto. But if a measure so vetoed is again passed by both Houses of Congress by two-thirds majority in each House, it becomes law, notwithstanding the objection of the President. The President must be at least 35 years of age and ■ native citizen of the United States. He receives ■ taxable salary of \$200,000 with ■ taxable expense allowance of \$50,000 and ■ non-taxable travelling allowance not exceeding \$100,000.

President of the United States, GEORGE HERBERT WALKER BUSH, born June 12, 1924, sworn in January 20, 1989. Republican.

Vice-President, DAN QUAYLE, born Feb. 4, 1947, sworn in Jan. 20, 1989.

THE CABINET

Secretary of State, James Baker.

Secretary of the Treasury, Nicholas Brady.

Attorney General, Richard Thornburgh.

Secretary of Defence, Richard Cheney.

Secretary of the Interior, Manuel Lujan.

Secretary of Agriculture, Clayton Yeutter.

Secretary of Commerce, Robert Mosbacher.

Secretary of Labour, Elizabeth Dole.

Secretary of Health and Human Services, Dr. Louis Sullivan.

Secretary of Housing and Urban Development, Jack Kemp.

Secretary of Transportation, Samuel Skinner.

Secretary of Energy, James Watkins.

Secretary of Education, Dr. Lauro Cavazos.

Veteran's Affairs, Edward Derwinski.

Other top positions:

Director of C.I.A., William Webster.

Dir., Office of National Drug Control Policy, William Bennett.

White House Chief of Staff, John Sununu.

National Security Adviser, Brent Scowcroft.

Dir., Office of Management and Budget, Richard Darman.

UNITED STATES EMBASSY

24 Grosvenor Square W1A 1AE

[01-499 9000]

Ambassador Extraordinary and Plenipotentiary, The Honourable Henry E. Catto (1989).

Minister, Hon. Raymond G. H. Seitz.

Minister for Economic Affairs, Richard M. Ogden.

Minister Counsellors, Edward Kreuser (*Consular Affairs*); Lawrence D. Russell (*Administrative Affairs*); David K. Diebold (*Commercial Affairs*); Lester P. Slezak (*Political/Labour Affairs*); Rolland E. Anderson (*Agricultural Affairs*); Miles S. Pendleton (*Political Affairs*); Charles E. Courtney (*Public Affairs*).

Defence Attaché, Col. Keith N. Lacey II.
Army Attaché, Col. James T. Hennessey, Jr.
Naval Attaché, Cpt. Joseph R. McCleary.

CAPITAL OF THE UNITED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for ■ Federal City to be the national capital of the United States. In 1791 it ■ decided to name the capital Washington and in 1793 the foundation-stone of the Capitol building ■ laid. In 1800 the seat of Government was removed to Washington, which ■ chartered as ■ city in 1802. In 1846 the Virginia portion was retroceded and the present area of the District of Columbia (with which the City of Washington is considered co-extensive) is 63 sq. miles, with a resident population (mid-1986 estimate) of 626,000.

The District of Columbia is governed by ■ elected mayor and City Council.

The City of Washington is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia. The population of the metropolitan area in 1986 was estimated at 3,563,000.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having ■ veto power, which may be overcome by ■ two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote. Representatives are chosen in each State, by popular vote, for two years. The average number of persons represented by each Congressman is 1 for 550,000. The Senate consists of 100 members. The salary of a Senator is \$89,500 per annum. The House of Representatives consists of 435 Representatives, ■ resident commissioner from Puerto Rico and ■ delegate from American Samoa, the District of Columbia, Guam and the Virgin Islands. The salary of ■ Representative is \$89,500 per annum. By the XIXth Amendment, sex is no disqualification for the franchise. The Bureau of the Census estimated that there were 182,628,000 persons of voting age, excluding members of the armed forces overseas as of November 1988.

THE HUNDRED AND FIRST CONGRESS

President of the Senate, Dan Quayle (Vice President of the United States).

Speaker of the House of Representatives, Thomas S. Foley, Washington.

Secretary of the Senate, Walter J. Stewart, Dist. of Columbia.

Clerk of the House of Representatives, Donnald K. Anderson, California.

Members of the 101st Congress were elected on Nov. 8, 1988.

The 101st Congress is constituted as follows:

Senate.—Democrats 55; Republicans, 45; Total, 100.

House of Representatives.—Democrats, 257; Republicans, 175; Vacancies, 3. Total, 435 (July 1, 1989).

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, etc., or where a State is ■ party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the judgments of the highest Courts of the States. (2) The United States Courts of Appeals, dealing with appeals from District Courts and from certain federal administrative agencies, and consisting of all the Circuit Judges

within the circuit. (3) The 94 United States District Courts served by 700 District Court Judges.

THE SUPREME COURT
(U.S. Supreme Court Building, Washington, D.C.,
20543)

Chief Justice, William H. Rehnquist, *Ariz.*, born Oct. 1, 1924, appointed 1986.

DEFENCE

Department of Defence

Secretary of Defence (in the Cabinet), Richard B. Cheney.

Secretary of the Army, John O. Marsh, Jr.

Secretary of the Navy, H. L. Garrett.

Secretary of the Air Force, D. B. Rice.

Chairman, Joint Chief of Staff, Gen. Colin Powell.

Vice Chairman, Gen. Robert T. Herres.

The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the joint Chiefs of Staff, although separately organized, function in full co-operation and co-operation. They include the offices of the Director of Defence Research and Engineering, the Assistant Secretaries of Defence, the General Counsel of the Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, as a group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the Joint Chiefs of Staff, other than the Chairman and Vice Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the

direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: (1) to support and defend the Constitution of the United States against all enemies, foreign and domestic; (2) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

Unified Defence Commands

COMMANDERS-IN-CHIEF

U.S. European Command, Brussels.—Gen. Crosbie Saint (*U.S. Army*) (concurrently *N.A.T.O. Supreme Allied Commander*).

U.S. Southern Command, Quarry Heights, Panama Canal Zone.—Lt. Gen. Frederick F. Woerner (*U.S. Army*).

U.S. Atlantic Command, Norfolk, Virginia.—(vacant) (concurrently *N.A.T.O. Supreme Allied Commander, Atlantic*).

U.S. Pacific Command, Hawaii.—Adm. Ronald J. Hays (*U.S. Navy*).

U.S. Space Command, Gen. John L. Piotrowski (*U.S.A.F.*).

**Strategic Air Command, Omaha*.—Gen. John T. Chain (*U.S.A.F.*).

**U.S. Transportation Command, Gen. Duane H. Cassidy* (*U.S.A.F.*).

U.S. Special Operations Command, MacDill A.F.B., Florida.—Gen. James J. Lindsay (*U.S. Army*).

U.S. Central Command, Gen. George B. Crist (*U.S. Marine Corps*).

* A specified command.

Army.—The U.S. Army had a strength on March 31, 1989, of 764,259. Stationed in Germany were four divisions.

Chief of the Staff of the Army, Gen. Carl E. Vuono.

Navy.—The strength of the Navy (including Marine Corps) on March 31, 1989 was 581,050 active duty personnel.

The U.S. Navy had in service at Sept. 30, 1987, 568 active fleet ships (Surface vessels, 429; Submarines, 139).

Chief of Naval Operations, Adm. Carlisle A. H. Trost.

Marine Corps.—Established 1775. Strength on March 31, 1989 was 194,860 active duty personnel. *Commandant*, Gen. Alfred M. Gray.

Air.—The United States Air Force was established as a separate organization on September 18, 1947. On March 31, 1989, there were 575,604 officers and airmen on active duty.

The Air Force has up to 30 per cent of the strategic bomber and tanker forces maintaining constant alert as well as 1,000 inter-continental ballistic missiles in silos. In addition, the Air Force maintains the capability to carry out limited war and special warfare operations, with more than 9,300 strategic, tactical and support aircraft. In March, 1961, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects.

Chief of Staff of the U.S. Air Force, Larry D. Welch.

THE UNITED STATES BUDGET
(fiscal year; in millions of US\$)

<i>Receipts by Source</i>	1987 (actual)	1988 (estimated)
Individual income taxes	392,600	393,400
Corporation income taxes	83,900	105,600
Social insurance taxes and contributions	303,300	331,500
Excise taxes	32,500	35,300
Estate and gift taxes	7,500	7,600
Customs duties	15,100	16,400
Miscellaneous	19,300	19,400
Total	854,100	909,200
<i>Outlays by Function</i>		
National defence	282,000	285,400
International affairs	11,600	9,900
Income security	123,300	129,600

FINANCE**SOCIAL WELFARE EXPENDITURE**

Total expenditure by programme was (\$ millions):

	1985	1986
Social insurance	372,529	390,404
Education	166,418	178,518
Public aid	96,777	103,079
Health and medical	41,060	44,334
Veterans' programmes	27,042	27,445
Other social welfare	13,946	14,705
Housing	12,627	12,036
TOTAL	730,399	770,521

Expenditure per capita was (\$):

Social insurance	1,528	1,587
Education	685	728
Public aid	398	421
Health and medical	169	181
Veterans' programmes	111	111
Other social welfare	57	60
Housing	52	49
TOTAL	3,001	3,137

PUBLIC DEBT

At the end Sept. 1988 the total gross Federal Debt of the United States stood at \$2,614,581 million.

COST OF LIVING IN U.S.A.

The Consumer Price Index for all urban consumers (CPI-U) with prices collected in 91 areas across the

U.S.A. was measured for the year 1988 at 117.0 (1982-84 = 100), versus 112.5 for 1987.

GROSS NATIONAL PRODUCT

Gross National Product by industry in 1987 was (\$ million):—

All industries, total	4,461,200
Agriculture, forestry, fisheries	98,800
Mining	95,300
Construction	208,700
Manufacturing	861,200
Transportation and public utilities	406,900
Trade	740,600
Finance, insurance, real estate	755,100
Services	757,900
Government and government enterprises	541,200
Rest of the world	27,400
G.N.P., national and personal income in 1987 were (\$ million):—	
Gross national product	3,821,000
Net national product	3,362,300
National income	3,045,700
Corporate profits	304,700
Net interest	337,100
Personal income	3,746,500
Personal tax and non-tax payments	564,800
Disposable personal income	3,181,700
Personal outlays	3,062,700
Personal saving	119,000

Personal consumption expenditure in 1987 was \$2,497,200 million, of which durable goods accounted for \$388,200 million, non-durable goods \$878,100 million and services \$1,230,900 million. Gross private domestic investment in 1986 — \$671,000 million.

UNITED STATES STOCK OF CURRENCY AND COIN

The U.S. unit of currency is the Dollar (\$) of 100 cents.

U.S. stock of currency and coin at March 31, 1988 was:

	\$ million
Gold	11,062.5
Dollars	340.1
Subsidiary Coin	93.8
Minor Coin	20.7
Silver Certificates	198.6
U.S. Notes	322.5
Federal Reserve Notes	255,200.3
TOTAL	267,238.5

AGRICULTURE AND LIVESTOCK

The total number of farms in 1988 was 2,158,800, with a total area of land in farms of 998,692,000 acres, and an average acreage per farm of 463 acres. The total number of people employed on farms during the week of April 9–15, 1989, was 2,805,000, of whom 1,777,000 were unpaid workers, 830,000 hired workers and 198,000 agricultural service workers.

Principal crops are corn for grain, soybeans, wheat hay, cotton, tobacco, grain sorghums, potatoes, oranges and barley.

Livestock on farms on Jan. 1, 1987 and 1988 was:

	1987 (000's)	1988 (000's)
All cattle	102,000	98,994
Milk cows	10,502	10,307
Sheep and lambs	10,334	10,774
Hogs and pigs*	50,920	53,795
Chickens*	369,131	377,516

Gross income from farming in 1987 was \$169,765 million, of which cash receipts from marketing were \$138,094 million and Government payments \$16,747 million. Cash income from all crops in 1987 was \$61,876 million and from livestock and livestock products \$76,218 million.

NONFUEL MINERALS

The value of nonfuel raw mineral production in the United States in 1987 totalled an estimated \$26,346 million compared with \$23,480 million in 1986.

Nuclear	4.90	5.67
Other*	0.25	0.27
Total	76.76	79.94

* Includes geothermal power, photovoltaic solar power and electricity produced from wood and waste.

During 1987 oil and gas drilling rigs in operation averaged 936 and the number of well completions in 1987 totalled 33,430. Seismic exploration work in progress involved a total (average) of 176 crews, 24 in offshore areas and 153 on shore. Domestic crude oil production in 1988 averaged 8,129,000 barrels per day and total petroleum imports averaged 7,172,000 barrels per day. Production of dry natural gas in 1988 was 16,642 billion cubic feet (Bcf). Stocks of gas available for withdrawal were estimated at 2,140 Bcf in 1988. Production of coal in 1988 was 958,912,000 short tons. In 1988 U.S. nuclear power generators produced 526,901 million net kilowatt-hours of electricity, accounting for 19.5 per cent of domestic electricity generation. Operable reactors at end Dec. 1988 totalled 108, with a net summer capacity of 95.08 million net kilowatts.

LABOUR

Organized Labour.—16,913,000 persons were members of labour organizations in 1987.

Work Stoppages.—There were 46 stoppages involving 1,000 or more workers in 1987. They resulted in 4,481,000 man-days of idleness, representing 0.02 per cent. of estimated working time of all non-agricultural workers.

Employment and Unemployment.—The civilian labour force (working population) was 120,978,000 in May 1988. This includes self-employed wage and salary-earners, and unpaid family workers, employed and unemployed. Unemployment was estimated at 6,783,000 in May 1988 (5.6 per cent.) (it was 6.3 per cent. in May 1987).

Wages.—In March 1988, gross average weekly earnings in industry ranged from \$711.47 per week in malt beverage industry (42.4 hours and \$16.78 average hourly earnings) to \$113.85 in eating and drinking places (25.3 hours and \$4.50 average hourly earnings). The average for all manufacturing was \$411.86 compared with \$403.27 in March 1987.

On Jan. 1, 1981, the minimum wage set by federal law became \$3.35. The law requires at least time and half of an employee's regular rate of pay for all hours over 40 a week for most covered workers.

The Fair Labour Standards Act covers all employees of certain enterprises having workers engaged in interstate commerce, producing goods for interstate commerce, or handling, selling, or otherwise working

on goods or materials that have been moved in or produced for such commerce by any person.

There are certain exemptions from these requirements in specific occupations and industries.

In addition to cash wages, almost all workers are covered by legally required social security, unemployment insurance and workers' compensation insurance. Also though not required by law, most workers receive some type of 'fringe' benefits—the most common forms being paid vacations, and public holidays, various types of retirement plans, insurance and health benefits financed by the employer or by employer and employees jointly.

Average number of employees	275,817	248,526

ROADS

In 1987 there were 3.87 million miles of public roads and streets in the United States, of which 3.16 million miles were in rural areas and 710,188 miles were in urban areas. Surfaced roads and streets account for 3.50 million miles, or 90.4 per cent, of the total; 371,325 miles, or 9.6 per cent, were unimproved or graded and drained.

An estimated total of \$62,987 million was spent in 1987 for roads and streets in the United States. Capital outlay accounts for 48.7 per cent of the total

expenditure; 29·9 per cent was spent for maintenance, and 7·9 per cent for administration; 9·3 per cent for highway police and safety; and 4·4 per cent for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1987 in the United States was 179,044,449, an increase of 1·9 per cent over the 1986 total of 175,700,214. In 1987 the State governments received \$24,596,000,000 in State Highway-User Tax Receipts, including road and crossing tolls, and \$12,618,000,000 in Federal Highway-User Tax Receipts.

Accidents.—In 1987 there were 46,385 deaths caused by motor vehicle accidents. The death rate per 100,000,000 vehicle-miles of travel ■ 2·41 in 1987 compared with 2·51 in 1986.

SHIPPING

The ocean-going Merchant Marine of the U.S. on April 1, 1989, consisted of 676 vessels of 1,000 gross tons and over, of which 425 were privately owned and 251 were government-owned ships. Of the 425 privately owned vessels, 378 were active including 3 combination passenger and cargo ships, 34 freighters, 16 bulk carriers, 175 tankers, 15 tug-barque units, 10 liquefied natural gas carriers and 125 intermodal

ships. There were 240 ships in the National Defence Reserve Fleet of inactive government-owned vessels.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1984 carried 344,460,600 passengers over 304,987,288,000 revenue passenger miles. Cargo revenue ton-miles totalled 8,200,000,000, an increase of 8·0 per cent over 1983. Air cargo ton-miles were distributed as follows: freight 6,500,000,000 (up 7·7 per cent); express 64,400,000 (up 2·8 per cent); and air mail 1,600,000,000 (up 9·3 per cent).

Total operating revenues of all U.S. scheduled airlines were \$43,800,000,000 in 1984, an increase of 13·5 per cent from 1983.

Total operating expenses rose to \$41,700,000,000 in 1984, ■ 9·0 per cent increase over 1983. Scheduled operations showed ■ net operating profit of \$2,100,000,000 in 1984, compared with ■ net operating profit of \$361,700,000 in 1983.

Three principal classes of commercial air carriers have been established in the United States based on annual operating revenues. They are: Majors, with annual operating revenues of over \$1,000 million; Nationals, with annual operating revenues of \$75-1,000 million; and Regionals, with annual operating revenues of up to \$75,999,000.

U.S. SCHEDULED AIRLINE INDUSTRY STATISTICS, 1984 (Thousands)

	Majors	Nationals	Regionals	System
Revenue Passenger Carried	250,150	80,337	13,974	344,461
Revenue Passengers Miles	252,295,400	43,820,182	8,871,706	304,987,288

Revenue Plane Miles	2,391,806	579,533	159,890	3,131,229

EDUCATION State School Systems

All the 50 States and the District of Columbia have compulsory school attendance laws. In general, children are obliged to attend school from 7 to 16 years of age. Officers of local administrative units, usually known ■ truant or attendance officers, are charged with enforcing the compulsory attendance laws.

In the autumn of 1987, 45,900,000 children were enrolled in regular elementary and secondary day schools in the United States, of whom 5·7 million or 12·4 per cent attended private schools.

The following percentages of the school-age population were estimated to be enrolled in school in the autumn of 1986; of 5- and 6-year-olds, 95 per cent; of 7- to 13-year-olds, 99 per cent; of 14- to 17-year-olds, 95 per cent; and of 18- to 24-year-olds, 32 per cent.

During the 1986-87 school year, the average daily attendance in regular public elementary and secondary day schools was 36,951,000. In the 1986-87 school year 2,428,000 students graduated from regular public high schools, 265,000 graduated from private high school. In addition some 25,000 graduated from evening schools and adult education programmes, and an estimated 400,000 received high school equivalency certificates. Public school teachers numbered 2,423,000, with an average salary of \$26,534.

Most of the revenue for public elementary and secondary school purposes comes from the Federal, State, and local governments. Less than $\frac{1}{4}$ per cent comes from gifts from tuition and transportation fees. Estimated revenue receipts during 1986-87

amounted to \$162,453,000,000; 6·6 per cent from the Federal Government, 49·6 per cent from State governments, and 43·8 per cent from local sources. Estimated current expenditure in the 1986-87 school year was \$149,099 million; for sites, buildings, furniture and equipment expenditures, \$9,210 million; for interest in school debt \$2,956 million.

Institutions of Higher Education

In the autumn of 1987, total enrolment in universities, colleges, professional schools, and two-year schools numbered 12,544,000.

Degrees conferred during the academic years 1985-86 and 1986-87 were:-

Degree	1985-86	1986-87
Bachelor's	987,823	987,000
First-Professional	73,910	73,000
Master's	288,567	291,000
Doctorates	33,653	34,200

During 1985-86 the major fields for bachelor's degrees were business and management (238,160), engineering (95,953) and social sciences (93,703). First-profession degrees in law (35,844) and medicine (15,938) predominated. Master's degrees were heavily concentrated in education (76,353) and business and management (67,137). The most popular fields of study for doctorates were education (7,110) and life sciences (3,358).

During the 1986-87 academic year, the 3,406 colleges and universities employed about 717,000 (full-time equivalent) instructional faculty. Total

expenditures for colleges and universities during the 1986-87 academic year were \$115,900 million.

Particulars of some of the Universities (with opening autumn enrolment figures, 1985) are: *Harvard* (20,711 students, including 7,747 women), founded at Cambridge, Mass. on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and sum of money in 1638; *Yale* (10,809 students, including 4,740 women), founded at New Haven, Connecticut, in 1701; *Bowdoin*, Brunswick, Me. (founded 1794; 1,446 students including 626 women); *Brown*, Providence, R.I. (founded 1764; 7,277 students, including 3,398 women); *Columbia*, New York, N.Y. (founded 1754; 23,556 students, including 12,393 women); *Cornell* (founded at Ithaca, N.Y., 1865; 19,680 students, including 8,626 women); *Dartmouth*, Hanover, N.H. (founded 1769, 4,519 students, including 1,826 women); *Georgetown*, Washington, D.C. (founded 1789; 11,985 students, including 5,484 women); *North Carolina*, Chapel Hill, N.C. (founded in 1789; 22,066 students, including 12,504 women); *Pennsylvania*, Philadelphia, Pa. (founded 1740; 21,870 students, including 9,926 women); *Princeton*, N.J. (founded 1746; 6,293 students and 2,215 women); and *William and Mary*, Williamsburg, Va. (founded 1693; 6,676 students, including 3,448 women).

WEIGHTS AND MEASURES

The weights and measures in common use in the United States are of British origin, and date back to the American Revolution when practically all the standards were intended to be equivalent to those used in England at that period. Divergencies in these

weights and measures were, however, quite common, due no doubt to the fact that the system of weights and measures in England was not itself well established, and hence the copies brought to the United States were often adjusted to different standards. Because of these discrepancies, the system of weights and measures in the United States (U.S. inch-pound system) is not identical with the British system.

The U.S. ton (short) = 2,000 pounds (British Imperial ton = 2,240 pounds, or 1 U.S. long ton). The U.S. gallon = 231 cubic inches (277.42 cubic inches in U.K.) or 128 fluid ounces (160 fluid ounces in U.K.). In the British system the units of dry measure are the same as those of liquid measure. In the United States these two are not the same, the gallon and its subdivisions being used in the measurement of liquids, while the bushel, with its subdivisions, is used in the measurement of certain dry commodities. The U.S. gallon is divided into 4 liquid quarts and the U.S. bushel into 32 dry quarts.

The International System of Units—officially abbreviated SI—is a modernized version of the metric system. It was established by international agreement to provide a logical and interconnected framework for all measurements in science, industry and commerce.

In 1971, a study recommended a concerted, coordinated, but voluntary national effort to make the SI the predominant form of measurement in the United States. In December 1975, legislation was passed which established the United States Metric Board to coordinate voluntary conversion to the metric system. Since 1982 this function has been assumed by the Office of Metric Programmes of the U.S. Department of Commerce.

TERRITORIES, ETC. OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the following territories: Guam; American Samoa; U.S. Virgin Islands; Johnston Atoll; Midway Islands; Wake Islands.

Johnston Atoll (formerly Johnston and Sand Islands) comprises two small islands, less than 1 sq. mile in area, to the south-west of Hawaii which are administered by the U.S. Air Force. The two Midway Islands (area, 2 sq. miles; population (1970), 2,200), at the western end of the Hawaiian chain, are administered by the U.S. Navy. The Wake Islands have an area of about 3 sq. miles and a population (1979) of 300. They lie about 2,300 miles west of Hawaii and are administered by the U.S. Air Force.

Under the terms of a Treaty of Friendship between the United States and Kiribati, signed in 1979 and subsequently ratified by the U.S. Senate, the United States renounced its claim to Canton and Enderbury Islands.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of the Assistant Secretary, Territorial and International Affairs, Dept. of the Interior, Washington, D.C. Puerto Rico was removed from the Department of the Interior's administrative jurisdiction with the acquisition of Commonwealth status in 1952.

THE COMMONWEALTH OF PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater

Antilles group in the West Indies, and lies between 17° 50'-18° 30' N. lat. and 65° 30'-67° 15' W. long., with a total area of 3,421 sq. miles (8,860 sq. km.), and an estimated population (1985) of 3,451,000. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 111 miles from west to east, and 36 miles from north to south. The capital is 1,600 miles distant from New York, and 1,000 miles from Miami.

Puerto Rico was discovered in 1493 by Christopher Columbus and explored by Ponce de Leon in 1508. It continued as a Spanish possession until Oct. 18, 1898, when the United States took formal possession—a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899.

The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The selection of the Secretary of State must be approved also by the House of Representatives.

The Governor is popularly elected for a term of 4 years. A Supreme Court of 7 members is appointed by the Governor, with the advice and consent of the Senate. The Governor appoints all Judges. Residents of Puerto Rico are U.S. citizens. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote, although

he has a right to vote on those committees of which he is a member.

Preliminary 1983 figures for the Commonwealth Government's budget were Receipts, \$4,948 million (of which \$1,180 million were transfers from the Federal Government) and Expenditures, \$4,111 million (including payments of \$135 million to the Federal Government). Manufacturing added \$5,765 million to net Commonwealth income in 1983 (preliminary figures), trade \$1,743 million, finance, insurance and real estate \$1,841 million and agriculture \$435 million. Principal crops are sugar cane, coffee, vegetables, fruits and tobacco. Most valuable areas of manufacturing are chemicals and allied products, metal products and machinery. Public and private schools are established throughout—enrolment in 1985–86 was 686,914. Enrolment in private colleges and universities for 1985–86 ■■■ 98,402.

CAPITAL.—ΨSan Juan, population of the municipality, 1,816,300; Other major towns are: ΨPonce (188,500); Bayamón (205,800); ΨMayagüez (99,800); and ΨArecibo (83,300).

Governor, Rafael Hernández Colón.

Secretary of State, Hector Luis Acevedo.

Resident Commissioner, Jaime Fuster.

Chief Justice, Victor Pons.

TRADE

	1985	1986
Total Imports	\$10,113 m.	\$10,108 m.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 sq. miles (541 sq. km.), with ■■■ estimated population (1987) of 127,675.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by the Japanese in Dec. 1941 but was recaptured and occupied throughout by U.S. forces before the end of July, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A 21-member unicameral legislature is elected biennially. The Governor and Lieutenant Governor are popularly elected. A non-voting Delegate is elected to serve in the U.S. House of Representatives. There is also ■ District Court of Guam, with original jurisdiction in cases under federal law.

CAPITAL.—Agaña. Port of entry, ΨApra.

Governor, Joseph Ada.

Lt. Governor, Frank Blas.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Anu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with ■ total area of 76 sq. miles (197 sq. km.) and an estimated population of 37,450 in 1988.

Tutuila, the largest of the group, has ■■■ area of 52 square miles and contains ■■■ magnificent harbour at

ΨPago Pago. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

American Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces or other naturalization procedure.

The 1960 Constitution grants American Samoa ■ measure of self-government, with certain powers reserved to the U.S. Secretary of the Interior. There is ■ bicameral legislature with popularly elected Representatives and Governors, and a popularly-elected Governor. A non-voting Delegate is elected to serve in the U.S. House of Representatives.

The constitution of American Samoa designates the village of Fagatogo as the seat of government.

Governor, Peter T. Coleman.

Lt. Governor, Galea'i I. Poumeli.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25 million, and proclaimed, January 25, 1917. The total ■■■ of the islands is 132 sq. miles (342 sq. km.), with ■■■ estimated population (1988) of 106,000. There are three main islands, St. Thomas (28 sq. miles), St. Croix (84 sq. miles), St. John (20 sq. miles) and about 50 small islets or cays, mostly uninhabited.

The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States on July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, ■ unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. From the elections of November, 1970, the Governor has been popularly elected. A non-voting Delegate is elected to serve in the U.S. House of Representatives. The Virgin Islands are now ■■■ favourite tourist area in the Caribbean. The climate of the islands is delightful at all times, and particularly so during the winter months.

CAPITAL.—ΨCharlotte Amalie on St. Thomas.

Governor, Alexander Farrelly.

Lt. Governor, Derek M. Hodge.

NORTHERN MARIANA ISLANDS

The land area of the Northern Mariana Islands is 184 sq. miles (476 sq. km.) with an estimated population (1987) of 22,000.

A law enacted by Congress on March 24, 1976 provides ■■■ Covenant to establish ■■■ Commonwealth of the Northern Mariana Islands. The provisions of the Covenant became fully effective upon termination of the Trusteeship Agreement on Nov. 3, 1986. Most of the residents became U.S. citizens. There is ■■■ popularly elected bicameral legislature and ■■■ popularly elected Governor.

Governor, Pedro P. Tenorio.

Lt. Governor, Pedro A. Tenorio.

MARSHALL ISLANDS

The land area of the Marshall Islands is 70 sq. miles (181 sq. km.), with an estimated population of 45,000. The capital is Majuro with 15,000 inhabitants.

In May 1979 Constitutional Government was installed in the Marshall Islands which provides for ■■■ bicameral legislature comprising ■■■ Senate and ■■■ House of Assembly. A Compact of Free Association with the United States was signed on June 25, 1983, becoming law on Jan. 14, 1986. This allows the

Marshall Islands self government and vests in the United States full responsibility for the defence of the Marshall Islands for 15 years.

President, Amata Kabua.

FEDERATED STATES OF MICRONESIA

The Federated States of Micronesia comprise the four states of Kosrae, Ponape, Truk and Yap, which have a combined area of 271 sq. miles (701 sq. km.) and an estimated population of 100,000. The capital is Kolonia, on Ponape, with an estimated population of 6,000.

Constitutional government was installed in the Federated States of Micronesia in May 1979 and provides for a unicameral 14-member National Congress comprising members from the four states. Each state also elects its own Governor and legislature.

A Compact of Free Association with the United States was signed on Oct. 1, 1982, becoming law on Jan. 14, 1986. The Federated States enjoy full self-government and the responsibility for their defence is vested fully in the United States for 15 years.

President of the Federated States of Micronesia, John R. Haglelgam.

Vice President, Hiroshi Ismael.

REPUBLIC OF PALAU

Palau consists of more than 200 Pacific Ocean islands of which eight are permanently inhabited. The Palau archipelago stretches over 400 miles. The land area is 191 sq. miles (494 sq. km.), with an estimated population of 14,000. The major island is Koror with a population of 8,100.

Palau and the U.S.A. signed a Compact of Free Association on Aug. 26, 1982, which, when approved by the U.S. Congress, will recognize the Republic of Palau to be a self-governing state. The U.S.A. is responsible for financial support, and for the defence of Palau for 50 years.

Constitutional government was installed in Palau in Jan. 1981 and provides for a bicameral legislature. The President and Vice President are directly elected.

President, Ngiratkel Etpison.

Vice President, Kuniwo Nakamura.

THE PANAMA CANAL

As a result of the Panama Canal Treaty, 1977, the Canal Zone was disestablished, with all areas of land and water within the former Canal Zone reverting to Panama with effect from October 1, 1979. Under the treaty, the United States is allowed the use of operating areas for the Panama Canal, together with several military bases, although the Republic of Panama is sovereign in all such areas. The Panama Canal Commission, an arm of the U.S. Government, will continue to operate the canal until the year 2000.

TOTAL OCEAN GOING TRAFFIC

Fiscal Year	No. of Transits	Canal, Net Tons	Cargo Tons
1981	13,884	188,656,491	171,221,762
1982	14,009	202,884,207	185,452,332
1983	11,707	169,503,918	145,590,759
1984	11,230	162,335,342	140,470,818
1985	11,515	168,941,997	138,643,243
1986	11,925	182,750,830	139,945,181
1987	12,230	186,406,530	148,690,380
1988	12,234	191,478,087	156,482,641

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 500 to 1,000 feet wide

at the bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea takes on average 10 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake.

BRITISH EMBASSY

3100 Massachusetts Avenue, N.W.

Washington, D.C. 20008

[Washington D.C. 462 1340]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Antony Acland, G.C.M.G., K.C.V.O., (1986).

Ministers, F. Cassell (Economic); A. J. H. Ward (Defence Equipment); C. J. R. Meyer, C.M.G. (Commercial); B. J. P. Fall, C.M.G.; P. Lo.

Head of British Defence Staff and Defence Attaché, Maj.-Gen. E. H. A. Beckett, C.B., M.B.E.

Naval Attaché, Rear Adm. M. C. Cole.

Military Attaché, Brig. R. D. Grist, O.B.E.

Air Attaché, Air Cdre. R. G. Peters, R.A.F.

Counsellors, R. B. Bone (Head of Chancery); A. Pover (Admin. and H.M. Consul-General); R. C. Pratt (Economic); D. J. Hall (Commercial); J. A. L. Faint (Overseas Development); Mrs. S. S. Lee-Birch (Hong Kong Commercial Affairs); A. J. Hunt (Civil Aviation and Shipping); A. W. R. Alcock (Science, Technology and Energy); R. F. Cornish, L.V.O. (Information); R. P. Ralph; M. L. H. Doyle; J. D. Hansen; J. D. N. R. Clibborn; B. J. Limbert (Defence Supply); K. R. Tebbit; Mrs. C. J. Valentine.

Cultural Attaché and British Council Representative, J. W. Daniel.

There are British Consulates General in Atlanta, Boston, Chicago, Houston, Los Angeles, New York and San Francisco.

There are British Consulates in Anchorage, Cleveland, Dallas, Kansas City, Miami, New Orleans, Norfolk, Philadelphia, Portland, St. Louis, Seattle and Puerto Rico.

EMBASSY OF THE ORIENTAL REPUBLIC OF URUGUAY

48 Lennox Gardens, SW1X 0DL

[01-589 8835; *Consulate* 01-589 8735]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Luis Alberto Solé-Romeo (1987).

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata situated in lat. 30°–35° S. and long. 53° 15'–57° 42' W., with an area of 68,037 sq. miles (176,215 sq. km.), and an estimated population (1985) of 3,012,000, almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the *Rio Negro* (with its tributary the *Yí*), flowing from north-east to southwest into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the *Negro* is also navigable for a considerable distance. Smaller rivers are the *Cuaréim*, *Yaguarón*, *Santa Lucia*, *Quequén* and the *Cebollatí*.

The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts. Floods also occur.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the *Uruguay River* was then called—resisted all attempted invasions of the Portuguese and Spanish until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spanish. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

According to the Constitution the President appoints a council of 11 ministers and a Secretary (Planning and Budget Office), and the Vice-President presides over Congress. The legislature consists of a Chamber of 99 deputies and a Senate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18. General elections held in Nov. 1984 marked the return to democracy after 11 years of presidential rule with military support. The new government took office on March 1, 1985 and the provisions of the 1967 Constitution now prevail.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. There are just over 9 million cattle and just under 24 million sheep. In addition to meat packing, other foodstuffs (citrus, wine, beer), fishing and textile industries are of importance.

The development of local industry continues and, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement,

leather-curing, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products.

Mineral Deposits.—There are some ferrous minerals, not extracted at present. Non-ferrous exploited minerals include clinker, dolomite, marble and granite.

Communications.—There are about 9,899 km. of national highways, and about 12,083 km. of telegraph and 48,375 miles of telephone communications.

There are about 2,987 km. of standard gauge railway in use in Uruguay. Passenger rail services were cancelled in Jan. 1988. Services are now limited to cargo transport. A State Autonomous Entity was formed to administer the railway systems purchased by the Government from four British companies in 1948.

An airline, PLUNA, which is owned by the State, runs daily services to southern Brazil, Paraguay and Argentina, and two flights a week to Madrid. The principal capitals of the interior and a limited freight service are connected to Montevideo by TAMU, another State owned airline, using principally military aircraft and personnel. International passenger and freight services are maintained by American, South American and European airlines. The international airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, and technical and trade schools and evening courses for adult education are state controlled. There are about 322,053 pupils in the 2,362 state schools. The University at Montevideo (founded in 1849) has about 18,000 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Five daily newspapers are published in Montevideo with an estimated total circulation of 150,000. Most of them are distributed throughout the country.

	FINANCE	1987	1988
Revenue	N\$270,939·2 m	N\$456,675·2 m	
Expenditure	292,987·7 m	510,651·4 m	

The external debt at Sept. 1988 was U.S.\$6,117·3 million. Central Bank reserves (March 1989) were US\$1,027 million.

	TRADE	1987	1988
Total exports .	US\$1,189,100,000	US\$1,404,527,000	
Total imports .	1,141,900,000	1,176,945,000	

The major exports are meat and by-products, wool and by-products, hides and bristle and agricultural products. The principal imports are raw materials, construction materials, oils and lubricants, automotive vehicles, kits and machinery.

	Trade with U.K.	1987	1988
Imports from U.K.	£26,484,000	£34,999,000	
Exports to U.K.	40,474,000	35,410,000	

The principal export items to the U.K. are wool and beef, the main imports are chemicals, machinery, raw materials, metals and beverages.

CAPITAL.—Montevideo. Population (1984) 1,355,312. Other centres (with 1987 estimates) are Salto (60,000), Paysandú (60,000), Mercedes

(34,000), Minas (34,000), Melo (30,000), and Rivera (40,000).

CURRENCY.—New Uruguayan peso of 100 centésimos.

FLAG.—Four blue and five white horizontal stripes surcharged with sun on ■ white ground in the top corner, next flagstaff.

NATIONAL ANTHEM.—Orientales, La Patria O La Tumba (Uruguayan, the fatherland or death).

NATIONAL DAY.—August 25 (Declaration of Independence, 1825).

BRITISH EMBASSY
Calle Marco Bruto 1073 Montevideo
[Montevideo 723533]

Ambassador Extraordinary and Plenipotentiary, His Excellency Colum John Sharkey, C.M.G., M.B.E. (1989)

First Secretary, P. Hunt (Head of Chancery and Consul).

Second Secretaries, B. McIntyre (Commercial); W. A.

Allan; R. Graham; R. S. Dillow.

Defence Attaché, Capt. J. W. Porter.

BRITISH CONSULAR OFFICES

There is a British Consular Office at Montevideo.

VATICAN CITY STATE (Stato della Città del Vaticano)

Sovereign Pontiff, His Holiness Pope John Paul II (Karol Wojtyla), born at Wadowice (Krakow, Poland), May 18, 1920, elected Pope (in succession to Pope John Paul I), Oct. 16, 1978.

Secretary of State, Cardinal Agostino Casaroli, appointed April, 1979.

APOSTOLIC NUNCIATURE
54 Parkside, SW19 5NF
[01-946 1410]

Apostolic Pro Nuncio, His Excellency Archbishop Luigi Barbarito (1986). Counsellor, Mons. Abraham Kattumana.

The office of the ecclesiastical head of the Roman Catholic Church (Holy See) is vested in the Pope, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, but by 1870 the Papal States had become part of unified Italy. The temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. The area of the Vatican City is 108 acres and its population in 1985 was 1,000.

Trade with U.K.

	1987	1988
Imports from U.K.	£813,000	£447,000
Exports to U.K.	31,000	111,000

CURRENCY.—Italian currency is legal tender.

FLAG.—Square flag; equal vertical bands of yellow (next staff), and white; crossed keys and triple crown device on white band.

NATIONAL DAY.—October 22 (Inauguration of present Pontiff).

Co-ordination and Planning, Miguel Rodriguez.
Guyana Development, Leopoldo Sucre Figarella.*

VENEZUELAN EMBASSY
1 Cromwell Road, SW7 2HW
[01-584 4206/7]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Francisco Kerdel-Vegas, C.B.E. (1988).

Minister Counsellor, E. González-Urrutia.

There is also ■ Consulate-General at Liverpool.

Area and Population.—A South American Republic, situated approximately between 0° 45' S. lat. and 12° 12' N. lat. and 59° 45'-73° 09' W. long. It consists of one Federal District, 20 states and 2 territories. Venezuela has a total area of 352,144 sq. miles (912,050 sq. km.) and a population (1985) of 17,323,000.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by Guyana, and south by Brazil. Included in the area of the Republic are 72 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Mérida, and contains the highest peaks in the country in Pico Bolívar (16,411 feet) and Picacho de la Sierra (15,420 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river is the Orinoco, with innumerable affluents, the main river exceeding 1,600 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations have opened the Orinoco to ocean-going ships, of up to 40 ft. draft, as far as Ciudad Guayana (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the Casiquiare.

The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area of 8,296 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles) about 1,400 ft. above sea-level in the Maritime Andes.

The climate is tropical and, except where modified by altitude or tempered by breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler from November to March.

Language and Literature.—Spanish is the language of the country. There are 61 daily newspapers in Venezuela, of which ten are published in Caracas, and about 60 to 70 weekly news magazines. There are also a large number of fortnightly, monthly and quarterly publications.

Education is free and compulsory between the ages of 7 and 13. There are ten universities in Venezuela, five in Caracas and the others in Maracaibo, Mérida, Valencia, Cumaná and Barquisimeto.

Production and Industry.—Products of the tropical forest region include: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans; of agricultural areas, cocoa beans, coffee, cotton, rice,

maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. There is an extensive beef and dairy farming industry. Despite substantial improvements in agriculture, Venezuela is heavily reliant upon food imports, which constitute about 60 per cent of total consumption.

The principal industry is that of petroleum, which in 1986 contributed 83 per cent of Venezuela's foreign exchange income. Daily production in the oilfields (nationalized 1976) has steadily declined since 1973 in line with Venezuela's conservation policies, reaching 1.7 mbd in 1986 (1973—3,366 mbd). There are refineries at Punta Cardón, Amuay, Caripito, San Lorenzo, Puerto La Cruz, Tucupeido, El Chaire and El Palito. Development of the Orinoco heavy oil belt is now moving ahead with the inauguration of the Lagovén continuous steam injection pilot plant at El Jobo in southern Monagas. It has been estimated conservatively that there might exist recoverable resources of 70,000 million barrels in the Orinoco region, but the initial aim of the Lagovén project is the production of 125,000 and 500,000 bpd of upgraded crude by 1988 and 2000 respectively.

Aluminium is the second highest source of foreign exchange after petroleum. The Venezuelan state now holds the majority stake in both the principal producing companies, Venalum and Alcasa, and is moving towards a consolidation of the aluminium industry, with both companies sharing their resources and adopting general policies of marketing and procurement of supplies. Output in 1980 was 222,100 tons, with 151,250 tons exported.

Rich iron ore deposits in Eastern Venezuela have been developed. Secondary processes for pelletizing and briquetting ore for export have been installed. The government-owned steel mill at Matanzas in the Guayana has local iron ore and obtains its electric power from hydro-electric installations on the Caroni River. It produces seamless steel tubes, billets, wire and profiles. The production of more steel products is planned over the next few years. A mill at Ciudad Guayana for the production of centrifugally-cast iron pipe came into operation at the end of 1970, with an annual capacity of 30,000 tons.

Other industries include petrochemicals, gold, diamonds and asbestos; textiles, clothing and footwear; plastics; manufacture or preparation of food-stuffs, alcoholic and non-alcoholic beverages; manufacture of paper, cement, glass, tyres, cigarettes, soap, animal feeding concentrates, simple steel products, tins, jewellery, rope, furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods; pearl fishing, sanitary ware, electric home appliances, pumps, toys, agricultural machinery, bicycles, electronic components, cosmetics and many others.

Communications.—There are about 62,449 km. of roads, 22,975 km. of them paved. The State has now acquired all but a very few of the railway lines, whose total length is only some 372 kilometres. Road and river communications have made railways of negligible importance in Venezuela except for carrying iron ore in the south-east. However, the government is restoring the Puerto Cabello-Barquisimeto line and expanding it to Turén in the agricultural heartland of Venezuela. A new line connecting Caracas with La Guaira and the Litoral is planned, and in 1983 the Caracas Metro came into operation. British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with the United States, Central and South America, the Caribbean and Europe. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are

state-owned. There are two government-controlled, 150 commercial and one cultural, FM, broadcasting stations. There are four television stations in Venezuela, all in Caracas. Two are government controlled.

TRADE

	1985	1986
Total imports	US\$7,388 m	US\$7,600 ■

Politburo of the Central Committee, Nguyen Van Linh (General Secretary); Vo Chi Cong; Do Muoi; Vo Van Kiet; Le Duc Anh; Nguyen Duc Tam; Nguyen Co Thach; Dong Sy Nguyen; Tran Xuan Bach; Nguyen Thanh Binh; Doan Khue; Mai Chi Tho; Dao Duy Tung (full members).

EMBASSY OF THE SOCIALIST REPUBLIC OF VIETNAM

12-14 Victoria Road, W8 5RD

[01-937 1912]

Ambassador Extraordinary and Plenipotentiary, His Excellency Tran Van Hung (1986). Second Secretaries, Bui Xuan Khoa; Nguyen Thi Yen.

Vietnam, with an area of 127,242 sq. miles (329,556 sq. km.), and an estimated population (1989) of 64,500,000, is bordered on the north by China and the west by Laos and Kampuchea.

Government.—Following the end of the war in Vietnam in 1975, and the establishment of a Provisional Revolutionary Government to administer South Vietnam, a National Assembly representing the whole of Vietnam ■ elected on April 25, 1976. The Assembly met in Hanoi on June 24, and on July 2 approved the reunification of North and South Vietnam under the name of the Socialist Republic of Vietnam. The national flag, anthem and capital of North Vietnam were unanimously adopted for the Socialist Republic, and Saigon was renamed Ho Chi Minh City.

Effective power lies with the ruling Party, the Vietnamese Communist Party (V.C.P.), its highest executive body being the Central Committee, elected by a Party Congress on ■ national basis.

The Sixth Party Congress of the V.C.P. in December 1986 elected a new Central Committee. It is the Politburo and the Secretariat of the Central Committee which exercises real power and rules Vietnam.

Economy.—During the last nine years, Vietnam's economy has faced considerable problems. These include serious agricultural losses because of adverse weather, major reductions in Western aid (as a result of Vietnam's invasion and occupation of neighbouring Kampuchea), border hostilities with China, and the continued allocation of resources to military expenditure. Efforts to integrate the economies of the North and South have not been very successful.

Although food production has substantially increased (over 19 million tonnes of grain in 1988) ■ has G.D.P. in general, Vietnam's overall economic position at the end of 1988 ■ not good. Food production has not kept pace with the increase in population. There was little foreign exchange because of minimal exports to hard currency areas. Vietnam ■ in default of repayments to the international banking world from the I.M.F. to major commercial and merchant banks and therefore received very few long term credits. Some attempted reforms of the economic system in 1986, including devaluation and ■ currency change, were implemented disastrously and inflation increased rapidly in late 1985 and early 1986. Despite massive assistance from the Soviet Union (estimated at US\$2.3 billion p.a. in 1987) and other member countries of C.M.E.A. (of which Vietnam is ■ member), Vietnam's economy continued to decline. Economic reforms were instituted in the wake of the sixth Party Congress (Dec. 1986), and have begun to take effect. Inflation is down to single figures per month; the exchange rate has been rationalized, subsidies removed and much greater economic activity allowed in both the countryside and the cities. Foreign investment is being actively encouraged.

Trade with U.K.

	1987	1988
Imports from U.K.	£2,598,000	£2,213,000
Exports to U.K.	357,000	492,000

EMBASSY OF THE YEMEN ARAB REPUBLIC
41 South Street, W1Y 5PD
[01-629 9905/8]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Daifellah Alazeib (1981).

Yemen, the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between the kingdom of Saudi Arabia and the People's Democratic Republic of Yemen, with an estimated area of 75,290 sq. miles (195,000 sq. km.). The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant but irregular rainfall. The ruins of Marib, the ancient Sabaean capital, and its dam are in the Yemen.

The population is (1987 Census) 9,250,000.

Government.—A General Popular Conference was established in Aug. 1982, consisting of 700 elected members and 300 appointed members. It agreed ■ new National Charter and elected a Permanent

Council of 75 members (50 elected, 25 appointed), with a General Council and four sub-committees (economic; political; administrative and public works; cultural and reform).

The General Popular Conference meets every two years and is re-elected every four. The Permanent Council meets regularly for two months, followed by ■ two-month break. The General Council and sub-committees meet regularly. In 1986 the total membership of the General Popular Conference was expanded to 22,250, comprising elected and appointed members.

Economy.—The main exports are cotton, coffee, hides and skins. Oil has been produced at Marib since Dec. 1987. Production averages 175,000 b.p.d.

Trade with U.K.

	1987	1988
Imports from U.K.	£55,334,000	£42,564,000
Exports to U.K.	2,306,000	1,532,000

CAPITAL.—Sana'a (pop. 427,185). Other main cities are Taiz (178,043), Hodeida (155,110), Ibb (48,806) and Dhamar (47,733).

CURRENCY.—Yemeni riyal of 100 fils.

FLAG.—Horizontal bands of red, white and black, with 5-point green star in centre of white band.

NATIONAL DAY.—September 26.

PEOPLE'S DEMOCRATIC REPUBLIC OF YEMEN

(South Yemen)
(Al-Jumhuriyah Al-Yemen Al-Dimugratiyah
Al-Sha'abiyah)

President, Haider Abubaker Al-Attas, assumed power January 1986, elected Nov. 6, 1986 for ■ 5-year term.

Prime Minister, Dr. Yassin Saeed No'man.

EMBASSY OF THE PEOPLE'S DEMOCRATIC REPUBLIC OF
YEMEN

57 Cromwell Road, SW7 2ED
[01-584 6607/9]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Abdo Rageh (1987).

Area and Population.—The Democratic Republic of Yemen lies at the southern end of the Arabian peninsula, having a frontier with the Yemen Arab Republic, Saudi Arabia and the Sultanate of Oman, and a coastline extending 700 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for ■ livelihood.

Included in the State are the offshore islands of Perim (in the Bab al-Mandeb Straits) and Socotra. Sovereignty over the island of Kamaran (area 70 sq. miles) in the Red Sea is under dispute following its occupation by forces of the Yemen Arab Republic during border conflicts in October, 1972. The area of the People's Democratic Republic is 128,560 sq. miles (332,968 sq. km.), with ■ population (1985 estimate) of 2,500,000.

Government.—The People's Republic of South Yemen was set up on Nov. 30, 1967 when the British government ceded power to the National Liberation Front, thus bringing to an end 129 years of British rule in Aden and some years of protectorate status in the hinterland. Its name was changed to People's Democratic Republic of Yemen on Nov. 30, 1970. Territory of the Republic is that of the former Federation of South Arabia and the Aden Protectorates, consisting of the State of Aden and some 17 sultanates and emirates. It is now divided into six Governorates. Under a constitution promulgated on Nov. 30, 1970, there is a Supreme People's Council of 101 members and an 11-member Presidium. The Chairman of the Presidium is head of state.

In Jan. 1986, severe rivalries within the regime led to a fierce outbreak of fighting in Aden and the temporary evacuation of the foreign community. The President, Ali Nasser Mohammed, escaped abroad and a new government was set up continuing the existing Marxist regime.

The Government receives substantial development from the World Bank, Kuwait and Abu Dhabi (Arab Development Funds). Other aid is provided by China, the E.C., U.S.S.R. (including military aid) and other Socialist Bloc countries.

Production.—Agriculture is the main occupation of the inhabitants outside Aden. This is largely of a subsistence nature, sorghum, sesame and millets being the chief crops, with wheat and barley widely grown at the higher elevations. Disastrous floods in 1983 caused major damage to the principal agricultural areas.

Yemen is not an oil producing country but significant traces of hydrocarbons were found during exploration activities offshore in 1982. The Aden Refinery Company has a refining capacity of 8 m. tons per annum but for a number of years output has not exceeded a rate equivalent to 5 m. tons annually. Several Western companies are now involved in oil exploration and production is expected to begin in late 1988. The exact reserves and estimated production levels are unknown.

Under the Five Year Development Plan 1974–79 much importance was attached to the development of agricultural and fisheries projects. Under the second Five Year Plan (1981–85) emphasis shifted to industrial development, which was allocated 29 per cent of the total investment budget (YD508m); agricultural development was allocated 12 per cent. Light industries are being established which will replace imports and use locally produced raw materials.

Expenditure in 1986 was severely affected by the January fighting and had to be diverted to repair the considerable material damage.

Communications.—Following the closure of the Suez Canal in 1967 the once prosperous trading economy of Aden fell into a steady decline, which has not been reversed by the re-opening of the Canal. In the main harbour, cargo handling for larger vessels is by lighter, but wharves at Maalla can accommodate alongside vessels up to 300 feet in length and 18 feet in draught.

There are no railways in the Republic. Yemen has 760 miles of good roads and construction of a further 300 miles is in hand. A system of undeveloped but motorable roads links the towns and villages outside Aden. There is an international airport at Aden (Khormaksar) into which a limited number of international airlines operate.

FINANCE

	1986	1987

Minister Counsellors, Branko Brankovic; Dr. Milisav Stanković (Economic).

Counsellor, Nikola Mišljenović (Press and Culture). Defence Attaché, Col. Dragoljub Milovanovic.

Area and Population.—Yugoslavia is ■ Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the Socialist Autonomous Provinces of Vojvodina and Kosovo. The area of Yugoslavia is estimated at 98,766 sq. miles (255,804 sq. km.). The population was estimated (1985) at 23,123,000; the latest Census (April 1981) broke down the population into 8,140,000 Serbs, 4,430,000 Croats, 1,750,000 Slovenes, 1,730,000 Albanians, 1,341,000 Macedonians and 1,220,000 'Yugoslavs', as well as a variety of other minorities.

Government.—On Nov. 29, 1945, the Constituent Assembly of Yugoslavia at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic.

The official name of the country, 'The Socialist Federal Republic of Yugoslavia', was adopted by the 1963 Constitution.

Several amendments to the Constitution were made in 1971. The most important formed ■ new ruling body called the Presidency, which has 8 members, one from each Republic and Autonomous Province. Since the death of President Tito in May 1980, its members take it in turns according to a fixed order of succession to become President of the Presidency of the Republic for a period of 12 months each. A new Constitution was proclaimed in 1974 followed by the reconstitution of the Federal Assembly into two chambers consisting of the Federal Chamber (220 delegates) and the Republican/Provincial Chamber (88 delegates). A new Federal Executive Council (i.e. government) was also formed. The current Council was elected in May 1986 with ■ 2 year renewable mandate. The first election of the S.F.R.Y. Presidency since Pres. Tito's death occurred in May 1984; each new member has a five-year mandate.

The political party in Yugoslavia, the 'League of Communists of Yugoslavia' has within each Republic and Province its own separate L.C.Y. organization. There is a formal separation of State and Party; no-one may hold ■ post in the Federal or Republican/Provincial governments and ■ paid L.C.Y. post simultaneously. Political and economic decisions on many issues are devolved from Federal to Republican/Provincial level. Yugoslavia has a 'self-management' form of industrial organization under which the workforce have the constitutional right to own and control their own enterprises.

Defence.—The Army, Navy and Air Force on a peace footing consist of 250,000 officers and men.

Religion and Education.—The three main religions are the Orthodox, Catholic and Islamic, and freedom to practice is constitutionally guaranteed. Religion is separated from the State and no religious instruction is allowed in state schools.

Education.—Eight years' elementary education is compulsory and all education is free. There are 18 universities.

Language and Literature.—The language mainly used throughout Yugoslavia and in the Federal Government is Serbo-Croat but Slovenian and Macedonian (also South-Slav tongues) and Albanian, Bulgarian, Romanian, Italian, Slovak, Ruthenian, Hungarian and Turkish are also spoken in certain

areas. There is, however, no official language since all are constitutionally equal, except in the Armed Forces where Serbo Croat is obligatory. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana, 2 Croat dailies in Zagreb, and many other dailies published in other towns. There are also many local newspapers and radio programmes in the different 'minority' languages.

Production and Industry.—The share of industry in Gross Domestic Product (average annual rate in real terms of 6·5 per cent in 1981) is now 40 per cent, while agriculture is 14 per cent. In industry the high level of investment of recent years is being cut back and present efforts are directed towards development of high priority areas such as mining, energy resources and transport and communications. Agricultural policy is directed towards substantially increased production, to make the country self-sufficient and to provide significant exports of foodstuffs. Some 80 per cent of land is still privately owned.

The main crops are wheat, maize, sugar beet, sunflower and soya. Yields in 1985 were (tons): wheat, 6·3 m; maize, 7·7 m; sugar beet, 9·5 m. According to Yugoslav official estimates, the livestock population in 1988 was approximately ■ follows: cattle, 9,881,000; sheep, 7,824,000; pigs, 8,323,000; poultry, 78,589,000.

Minerals are ■ important source of wealth particularly in the central and south-eastern regions. Production in 1987 included the following (tons):—

Coal	71,873,000
Coke	2,960,000
Iron ore	5,983,000
Pig iron	3,297,000
Steel	4,367,000
Crude oil	3,867,000

Smaller quantities of copper, zinc and mercury are produced.

Communications.—In 1984 there were 9,279 kms of standard and narrow gauge railway and approximately 116,600 kms of classified roads. In 1987 there were 3,909,000 telephones in use in the country. The principal ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Bakar, Šibenik, Split, Zadar, Kardeljeva (formerly Ploče), Dubrovnik, Bar, Kotor (Cattaro) and Koper. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

	FINANCE	1983	1984
	million Dinars	million Dinars	
Revenue	1,140,000	374,000	
Expenditure	1,140,000	374,000	

The rate of exchange is variable. On June 6, 1980 the dinar was devalued against all convertible currencies and there have been several devaluations since then.

	Trade with U.K.	1987	1988
Imports from U.K.	£206,932,000	£203,066,000	
Exports to U.K.	175,301,000	197,254,000	

CAPITAL.—Belgrade, population (1981) 1,455,000. Other towns are Zagreb (763,000); Skopje (503,000); Ljubljana (253,000); Sarajevo (447,000); Novi Sad (169,000); Priština (1971) (153,000); Župlji (152,000); Župlji (133,000); Titograd (95,000).

CURRENCY.—Yugoslav dinar of 100 paras.

FLAG.—Five-point red star outlined by narrow yellow stripe, on ■ ground of three horizontal bars, blue, white and red.

NATIONAL ANTHEM.—Hej, Slaveni, Jošte Živi Reč Naših Dedova (Oh! Slavs, our ancestors' words still live).

NATIONAL DAY.—November 29.

EMBASSY OF THE REPUBLIC OF ZAIRE
26 Chesham Place, SW1X 8HG
[01-235 6137]

Ambassador Extraordinary and Plenipotentiary, His Excellency Citoyen Kitshodi Nzekele (1987).

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and ■■■ administered by Belgium until 1960, when it became the Democratic Republic of the Congo. In October 1971 the name changed to the Republic of Zaire. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the Republic of Zaire comprises an area of 905,567 sq. miles (2,345,409 sq. km.), with a population (1985 Census) of 34,671,607.

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 27°C., but in the South the winter temperature can fall nearly to freezing point. Extensive forest covers the central districts.

Government.—On June 30, 1960, the Belgian Congo became ■■■ independent unitary state under the Presidency of M. Kasavubu with a provisional constitution drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga although he failed to obtain international recognition. Katanga did not come under the Government at Leopoldville until January 14, 1963.

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965, the Congolese Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo. Gen. Joseph-Désiré Mobutu, Commander-in-Chief of the Congolese National Army, announced on November 25, 1965 that he had assumed the Presidency.

A Presidential regime was instituted by the 1967 Constitution, subsequently amended in 1974 and totally revised in Feb. 1978. The Mouvement Populaire de la Révolution is the sole political party. The President changed his name to Mobutu Sésé Séko Kuku Ngbendu Wa Za Banga in 1972, but is usually known by the first three of these ■■■ only.

Provinces.—There are 11 regions, each under ■ Governor and provincial administration (names of capitals in brackets) Bas-Zaire (Matadi); Bandundu (Bandundu); Equateur (Mbandaka); Haut-Zaire (Kisangani); Kinshasa (Kinshasa); Maniema (Kindu); Nord-Kivu (Goma); Sud-Kivu (Bukavu); Shaba, formerly Katanga (Lubumbashi); East Kasai (Mbuji-Mayi); West Kasai (Kananga).

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking ■■■ Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to ■■■ common language in the East and South, while Lingala is the language of a large ■■■ along the river and in the north, and Kikongo of the region between Kinshasa and the sea. French is the language of administration. The National University of Zaire has campuses in Kinshasa, Kisangani and Lubumbashi, with approximately 28,000 students (1978-79).

Production.—The cultivation of oil palms is widespread, palm oil being the most important agricultural cash product though it is no longer exported. Coffee,

rubber, cocoa and timber are the most important agricultural exports. The production of cotton, pyrethrum and copal fell sharply on independence but is now increasing. The country is rich in minerals, particularly Shaba (ex-Katanga) province. Copper is widely exploited, and industrial diamonds and cobalt are also produced. Oil deposits — exploited off the Zaire estuary and reef-gold is mined in the north-east of the country.

There is a wide variety of small secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint, sugar, furniture, metal goods and tyres, and local assembly of motor vehicles. There are very large reserves of hydro-electric power and the huge Inga dam on the river Zaire supplies electricity to Matadi, Kinshasa and Shaba.

The chief exports are copper, crude oil, coffee, diamonds, rubber, cobalt, gold, cassiterite, zinc and other metals.

Communications. There are approximately 20,500 km of roads (earth-surfaced) of national importance, and 6,000 km of railways. The country has two international and 40 principal airports.

	Trade with U.K.	
	1987	1988
Imports from U.K.	£26,142,000	£26,132,000
Exports to U.K.	8,544,000	7,542,000

CAPITAL.—Kinshasa (formerly Leopoldville), population (Census, 1985) 2,778,281. Principal towns, Lubumbashi (formerly Elisabethville) (403,623); Kisangani (formerly Stanleyville) (310,705); Likasi (146,394); Kananga (601,239); Matadi (143,598); and Mbandaka (134,495).

CURRENCY.—Zaire of 100 makuta.

FLAG.—Dark brown hand and torch with red flame in yellow roundel on green background.

NATIONAL DAY.—November 24.

INTERNATIONAL ORGANIZATIONS

THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations ■ structure was built at the meetings at Dumbarton Oaks, Washington, D.C., from Aug. 21 to Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated "United Nations Day".

The following 159 states are members of the United Nations:—

Afghanistan	*Guatemala
Albania	Guinea
Algeria	Guinea-Bissau
Angola	Guyana
Antigua and Barbuda	*Haiti
*Argentina	*Honduras
*Australia	Hungary
Austria	Iceland
Bahamas	*India
Bahrain	Indonesia
Bangladesh	*Iran

*Original member (i.e. from 1945). (From October 25, 1971, 'China' was taken to mean the People's Republic of China.)

The principal organs of the United Nations are:—
(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session beginning on the third Tuesday in September. A new President is elected by the General Assembly at the start of every annual session. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:—(1) Disarmament and related security questions; (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Decolonization (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such ad hoc committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such ■ the Board of

Auditors, the Committee on Conferences, the International Law Commission, etc. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization was set up on Jan. 1, 1967, to promote industrialization and co-ordinate United Nations activities in this field.

*President of the United Nations General Assembly,
Peter Florin (G.D.R.) (1987).*

2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five permanent Members and ten non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of nine Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the permanent Members, and it is this clause which makes the Veto possible.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

The Security Council also establishes ad hoc committees and commissions which may be required from time to time for special purposes.

The five permanent Members are China, France, U.K., U.S.A., and U.S.S.R. The ten non-permanent Members in 1989 are: Algeria, Brazil, Nepal, Senegal and Yugoslavia (*term expires Dec. 31, 1989*); Canada, Colombia, Ethiopia, Finland and Malaysia (*term expires Dec. 31, 1990*).

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

The Council has 54 members who are elected for three-year terms by the General Assembly.

It has established the following Commissions: Statistical, Human Rights, Social Development, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Pacific, Western Asia, Latin America and Africa. The Council also makes recommendations for the co-ordination of the policies and activities of 15 specialized agencies and other organizations in the U.N. system.

4. Trusteeship Council

The Trusteeship Council now consists of five members: the U.S.A. (administering authority of Micronesia, the only remaining trust territory of the original 11), and the other four permanent members of the Security Council, China, France, U.K. and U.S.S.R. China does not participate in the Trusteeship Council's work.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, elected by both the General Assembly and the Security Council. Judges hold nine-year terms, which end on Feb. 5 of the year indicated below. The Court is based at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

President, Jose Maria Ruda (Argentina) (1991).

Vice-President, K. Mbaye (Senegal) (1991).

Judges, M. Lachs (Poland) (1994); T. O. Elias (Nigeria) (1994); S. Oda (Japan) (1994); R. Ago (Italy) (1997); M. Shahabuddin (Guyana) (1997); S. Schwebel (U.S.A.) (1997); Sir Robert Jennings (U.K.) (1991); M. Bedjaoui (Algeria) (1997); Ni Zhengyu (China) (1994); J. Evensen (Norway) (1994); N. K. Tarassov (U.S.S.R.) (1997); G. Guillaume (France) (1991); R. S. Pathak (India) (1991).

(The judges are listed in order of precedence.)

THE SECRETARIAT

Secretary General, Javier Pérez de Cuellar (Peru).

Director General, Development and International Economic Co-operation, Antoine Bianca (France).

U.N. Office and Information Centre, Ship House, 20 Buckingham Gate, SW1 (Tel: 01-630 1981).

OTHER ORGANS

The U.N. Centre for Human Settlements (Habitat), Nairobi; U.N. Children's Fund (UNICEF), New York; U.N. Conference on Trade and Development (UNCTAD), Geneva; U.N. Development Programme (UNDP), New York; U.N. Disaster Relief Office (UNDRO), Geneva; U.N. Environment Programme (UNEP), Nairobi; U.N. Fund for Population Activities (UNFPA), New York; U.N. High Commissioner for Refugees (UNHCR), Geneva; U.N. Institute for Training and Research (UNITAR), New York; International Research and Training Institute for the Advancement of Women (INSTRAW); U.N. Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), Vienna; U.N. University (UNU), Tokyo; World Food Council (WFC), Rome; World Food Programme (WFP), Rome.

These programmes are supported by voluntary contributions from governments, non-governmental organizations and individuals. The U.N. programmes receiving the largest total contributions in 1983 were: the U.N. Development Programme (UNDP,—\$714m); the U.N. Children's Fund (UNICEF,—\$297m), and the U.N. Fund for Population Activities (UNFPA,—\$310m). The World Food Programme (WFP), jointly administered by the U.N. and FAO, provided aid worth \$900m in 1983.

BUDGET OF THE UNITED NATIONS

The budget adopted at the 43rd session for the biennium 1988-89 was slightly over U.S.\$1,769,000,000. The scale of assessment contributions of 78 U.N. members is set at 0·01 per cent., that is further 11 at 0·02 per cent., and a further five at 0·03 per cent. The ten largest assessments are as follows: U.S.A., 25 per cent.; U.S.S.R., 11·82 per cent.; Japan, 10·84 per cent.; West Germany, 8·26 per cent.; France, 6·37 per cent.; U.K., 4·67 per cent.; Italy, 3·79 per cent.; Canada, 3·06 per cent.; Spain, 2·03 per cent. and Netherlands, 1·74 per cent.

GENEVA**

37-39 rue de Vermont, 1211 Geneva 20

Ambassador, Permanent U.K. Representative, John Anthony Sankey, C.M.G. (1985).

Deputy Permanent Representatives, G. W. Hewitt (Head of Chancery); P. W. M. Vereker (Economic Affairs).

SPECIALIZED AGENCIES

Sixteen other independent international organizations, each with its own membership, budget and headquarters, carry out their responsibilities in co-ordination with the U.N. under agreements made with the Economic and Social Council. These agencies set standards and provide technical assistance in economic, social and cultural and technical fields.

Food and Agriculture Organization of the United Nations (FAO), Via delle Terme di Caracalla, 00100 Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy and ensuring man's freedom from hunger. Among its many activities the Organization promotes the global exchange of information in the fields of agriculture, forestry and fisheries, facilitates international agreement in these fields and provides technical assistance in such subjects as nutrition and food management, soil erosion control, re-afforestation, the establishment of paper industries, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing.

FAO's regular programme is financed by its 158 member nations according to a scale of contributions set by the biennial FAO Conference, the Organization's governing body. At the 1987 Conference, funding for the 1988-1989 biennium was set at US\$492 million.

During 1988, FAO carried out 1,539 field projects involving an expenditure of US\$314.6 million funded by the UN Development Programme (UNDP) and other aid programmes, including various trust fund arrangements with both donor and recipient countries. In addition, 523 field projects were carried out under the Technical Co-operation Programme (TCP), financed from FAO's own budget.

The policy of the Organization is directed by a two-yearly Conference of the 158 member countries. A council of 49 member nations acts for the Conference between its sessions.

Director General, Edouard Saouma (Lebanon).

Permanent U.K. Representative, J. Goldsack.

International Bank for Reconstruction and Development (IBRD), Washington, D.C. 20433; *European office, 66 Ave. d'Iéna, 75116 Paris, France;*

Tokyo office, Kokusai Building 1-1, Marunouchi 3-Chome, Chiyoda-ku, Tokyo 100.—(Together with IDA known as the World Bank). Established on Dec. 27, 1945, to help raise standards of living in developing countries by the provision of financial resources through loans made for productive purposes by government, or guaranteed by the government concerned. Loans are directed towards developing countries at more advanced stages of economic and social growth.

The Bank, which is owned by the governments of 151 countries and whose capital is subscribed by its member countries, finances its lending operations primarily from its own borrowing in the world capital markets, and derives a substantial contribution to its resources from its retained earnings and the repayment of loans. The interest rate on its loans is calculated in relation to its cost of borrowing; loans generally have a grace period of five years and are repayable over 20 years or less. The loans made by the Bank since its inception to June 30, 1988, totalled \$155,048.8 million to 110 countries. Subscribed capital, \$91,435.6 million.

The Board of Governors consists of one Governor and one alternate appointed by each of the member countries. Twenty-two Executive Directors exercise all powers of the Bank except those reserved to the Board of Governors. The President, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

President, B. B. Canable (U.S.A.).

U.K. Executive Director, F. Cassell.

International Civil Aviation Organization (ICAO), 1,000 Sherbrooke Street, W., Montreal, Quebec H3A 2R2.—ICAO was established on April 4, 1947, to study problems of international civil aviation, to establish international standards and recommended practices for civil aviation in areas such as airworthiness, personnel licensing, aeronautical charts, rules of the air, etc. ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, telecommunications, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 160 states are now members of ICAO.

An Assembly of delegates from member states meets at least once every three years. A Council of 33 members is elected by the Assembly, taking into account the countries of chief importance in air transport: countries which make the largest contribution to the provision of facilities for international civil air transport and those ensuring representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

President of Council, Dr. Assad Kotaite (Lebanon).

Secretary General, Dr. Shivinder Singh Sidhu (India).

International Development Association (IDA), Washington, D.C. 20433; European office, 66 Ave. d'Iéna, 75116 Paris, France; Tokyo office, Kokusai Building 1-1, Marunouchi 3-Chome, Chiyoda-ku, Tokyo 100.—The IDA is an affiliate of the IBRD (the two together comprising the World Bank) and was established in September 1960 to provide assistance for the same purposes as the IBRD but primarily in the poorer developing countries and on terms that bear less heavily on their balance of payments than IBRD loans. Assistance is concentrated on the very

poor countries, i.e. those with an annual per capita GNP of less than \$940 (in 1987 dollars); more than 50 countries are eligible.

Membership is open to all members of IBRD and 137 have joined to date. Funds, called credits to distinguish them from IBRD loans, come mostly in the form of subscriptions and contributions by IDA's richer members, and transfers from the net earnings of the IBRD. The term of IDA credits, which are made to governments only, are ten-year grace periods, 35 or 40 year maturities, and no interest. By June 30, 1988, IDA had extended development credits totalling \$47,766.7 million in 95 countries.

Although legally and financially distinct from the IBRD, IDA is administered by the same staff, and the Board of Governors and Executive Directors are the same — those holding equivalent positions in the IBRD.

International Finance Corporation (IFC), 1818 H Street, Washington, D.C. 20433; European Representative, New Zealand House, Haymarket, SW1.—The IFC was established in 1956 as an affiliate of the World Bank to assist developing member countries by promoting the growth of the private sector of their economies and helping to mobilize domestic and foreign capital for this purpose. Membership of the IBRD is a prerequisite for membership in the IFC, which has 133 members. Legally and financially the IFC and IBRD are separate entities; the Corporation has its own operating and legal staff, but draws upon the Bank for administrative and other services. IFC's subscribed share capital was \$1,300 million at June 30, 1988, and it is also empowered to borrow up to four times the amount of its unimpaired subscribed capital and accumulated earnings for use in its lending programme. At the end of June 1988, IFC had made approved investments totalling more than \$10,500 million in over 90 countries.

President, B. B. Conable (U.S.A.).

International Fund for Agricultural Development (IFAD), 107 Via del Serafico, 00142 Rome, Italy.—The establishment of the Fund was proposed by the 1974 World Food Conference and it began operations in December 1977. The Fund's purpose is to mobilize additional funds for agricultural and rural development in developing countries through projects and programmes directly benefiting the poorest rural populations.

The Fund's operations are directed by the Governing Council, consisting of the entire membership. It has an 18-member Executive Board. Its governing structure provides for equal voting rights among the three groups of member countries, namely, the developed countries, the oil-exporting developing countries and other developing countries.

President, Idriss Jazairy (Algeria).

International Labour Organization (ILO)
Geneva (*London Branch Office*, Vincent House, Vincent Square, SW1P 2NB).—Established with the League of Nations in 1919 under the Treaty of Versailles, the ILO became in 1946 the first specialized agency associated with the United Nations. In May, 1988 the Organization had 150 member States. The aim of the ILO is to promote lasting peace through social justice, and to this end it works for better economic and social conditions everywhere. It was awarded the Nobel Peace Prize in 1969.

The ILO establishes international labour standards, which set guidelines for improving working conditions and protecting basic human rights; runs a world-wide programme of technical assistance to developing countries; conducts research and disseminates information on the human aspects of economic activity, with a view to improving social and

economic well-being. Through its World Employment Programme, the ILO is attacking unemployment and its associated ills by aiding national and international efforts to provide productive work for the world's fast-growing population. It is also developing an international programme for the improvement of working conditions and the working environment.

The ILO is financed by contributions from its member states. A proportion of its budget is devoted to its technical assistance programme, but this is financed mainly by funds from UNDP and other sources. The I.L.O. budget for 1986–87 amounted to U.S.\$324,860,000.

The International Labour Conference, composed of national delegations of two government delegates, one worker delegate and one employer delegate, meets annually. It formulates international labour standards and broad policies of the Organization, provides a forum for discussion of world labour and social problems, and approves the ILO's work programme and budget, which is financed by member States.

A 56-member Governing Body, composed of 28 government members, 14 worker members and 14 employer members, acts as the Organization's executive council. Ten governments hold seats on the Governing Body because of their industrial importance.

The International Labour Office, the secretariat of the Organization, collects and distributes information, assists governments on request in drafting legislation on the basis of international labour standards, directs technical co-operation activities, and issues publications.

Director General, Michel Hansenne (Belgium).

International Maritime Organization (IMO), Albert Embankment, SE1 7SR.—A United Nations Specialized Agency established on March 17, 1958, to provide means for co-operation and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea and preventing marine pollution caused by ships. IMO is responsible for calling maritime conferences and drafting maritime agreements. It has produced numerous technical codes relating to the carriage of various types of cargo such as chemicals, ores, and dangerous goods and to the construction and equipment of ships, e.g., gas and chemical carriers. In June, 1989, 133 nations were in membership. Budget, 1988–89, \$21,627,200. (The Organization changed its name from the Inter-Governmental Maritime Consultative Organization (IMCO) on May 22, 1982.)

Secretary General, C. P. Srivastava (India).

International Monetary Fund (IMF), 700 19th Street N.W., Washington, D.C. 20431.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. 151 countries were in membership of the Fund in June, 1988.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund an amount of its own money equivalent to the amount of foreign currency it wishes to purchase. The member is expected to 'repurchase' its own currency from the Fund, usually within three to five years, with payment of SDRs (Special Drawing Rights) or dollars or usable currency acceptable to

the Fund. These arrangements are subject to certain charges.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty, and usually the member is expected to undertake policy changes, where needed, to correct the payment imbalance.

Each member of the Fund is assigned a quota which determines its voting power and the amount of resources that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable in the member's own currency and SDRs.

Managing Director, Michel Camdessus (France).

U.K. Executive Director, F. Cassell.

International Telecommunication Union (ITU), Place des Nations, Geneva.—Founded at Paris in 1865 as the International Telegraph Union. ITU became a U.N. Specialized Agency in 1947. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The Budget for 1990 is S. Fr. 127,106,000.

Secretary General, P. Tarjanne (Finland).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 7 Place de Fontenoy, Paris 75700.—Under its constitution, the Organization makes its contribution to peace and security by promoting collaboration among its Member States in the fields of education, science, culture and communication. It aims at furthering a universal respect for justice, for the rule of law and for human rights, without distinction of race, sex, language or religion, in accordance with the Charter of the United Nations.

The Organization is composed of three organs: (i) the *General Conference*, consisting of representatives of Member States, which meets biennially to decide the programme and budget; (ii) the *Executive Board*, composed of 51 members elected by the General Conference to supervise the execution of the approved programme and (iii) the *Secretariat*, which is responsible for Unesco's day-to-day functioning and the execution of the programme. In most Member States National Commissions serve as a link with Unesco and help to carry out the programme. Member States in June 1986, 158 and three Associate Members (British Eastern Caribbean group, Netherlands Antilles and the British Virgin Islands).

The U.K. withdrew from Unesco on Dec. 31, 1985. At its 124th session the Executive Board of Unesco decided to grant to the U.K. the observer facilities requested.

Director General, Federico Mayor Zaragoza (Spain).

United Nations Industrial Development Organization (UNIDO), Wagramerstrasse 5, P.O. Box 300, 1400 Vienna, Austria.—Established as an organ of the U.N. General Assembly in Nov. 1966, as an action-oriented body, replacing the Centre for Industrial Development, which had been operating since July 1961. It became a U.N. specialized agency on Jan. 1, 1986, with the aim of promoting the industrialization of developing countries, with special emphasis upon the mobilization of the manufacturing sector. UNIDO provides help on formulation of planning policies, and technical advice and assistance to Third

World countries. UNIDO's principal policy-making body is the Industrial Development Board, with 53 members each serving a four year term.

Director General, Domingo Siazon (Philippines).

Universal Postal Union (UPU), Weltpoststrasse 4, 3000 Berne 15.—Established on October 9, 1874, by the postal Convention of Berne and in operation from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1990, S.Fr. 24,389,550. A Universal Postal Congress meets at five-yearly intervals. The last was held in Hamburg in June-July 1984, and the next is scheduled to take place in Washington in the autumn of 1989.

Director General, A.C. Botto de Barros (Brazil).

World Bank (see International Bank for Reconstruction and Development and International Development Association).

World Health Organization (WHO), 1211 Geneva 27.—Established on April 7, 1948, the aim of the World Health Organization is the attainment by all peoples of the highest possible level of health. It co-operates with its member governments in their efforts to develop health manpower, streamline health services, control communicable diseases, promote family health—including mother and child care, family planning, nutrition and health education—and strengthen environmental health. It promotes biomedical and health services research through some 850 collaborating research centres in different parts of the world. Its other services include the International Pharmacopoeia, drug evaluation and monitoring, biological standardization, epidemiological surveillance and scientific publications. Approved budget for 1990 and 1991, \$654,000,000. Membership (May 1989), 166.

Organs are: World Health Assembly meeting annually to frame policy, an Executive Board (31 members), meeting at least twice a year, and a Secretariat.

Director General, Dr. H. Nakajima (Japan).

World Intellectual Property Organization (WIPO), 34 chemin des Colombettes, 1211 Geneva 20, Switzerland.—Established by a 1967 convention to succeed the United International Bureau for the Protection of Intellectual Property. Became a specialized agency of the United Nations in 1974, and has 123 members. The World Intellectual Property Organization is the United Nations specialized agency for intergovernmental co-operation in "industrial property" (patents and other rights in technological inventions, rights in trademarks, industrial designs, appellations of origin, etc.) and "copyright and neighbouring rights" (in literary, musical and artistic works, in films, performances of performing artists, phonograms, etc.). WIPO carries out a substantial programme of activities to promote creative intellectual activity and to facilitate the transfer of technology, especially to and among developing countries.

The Conference and the General Assembly control the International Bureau (or secretariat). The Bureau provides the necessary documentation and other services for meetings and carries out projects for the promotion of increased international co-operation among member states.

Director General, Arpad Bogsch (U.S.A.).

World Meteorological Organization (WMO), Geneva.—Came into existence in 1951. The present membership is 155 States and 5 Territories. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology and hydrology, and to promote the establishment and maintenance of centres providing meteorological and related services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, water problems, agriculture, and other human activities; to promote activities in operational hydrology and to further close co-operation between meteorological and hydrological services; to encourage research and training in meteorology and to co-ordinate their international aspects. Budget (1988-91), S. Fr. 170,000,000. A World Meteorological Congress meets at least once every four years. An Executive Council (36 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six Regional Meteorological Associations (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat.

Secretary General, G. O. P. Obasi (Nigeria).

RELATED ORGANIZATIONS

International Atomic Energy Agency, Vienna International Centre, P.O. Box 100, A-1400, Vienna.—Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United

Nations and some of the specialized agencies. In June, 1988, 113 states were members.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (35 members) carries out the functions of the Agency and meets usually four times a year. The Regular Budget for 1989 amounted to \$157,540,000.

Director General, Hans Blix (Sweden).

Permanent U.K. Representative, G. E. Clark.

General Agreement on Tariffs and Trade (GATT), Centre William Rappard, Rue de Lausanne 154, CH-1211 Geneva 21.—A multilateral treaty, in operation since 1948, to which 96 countries are party, and one acceded provisionally; ■ further 28 countries apply GATT de facto. Its rules thus govern nearly 90 per cent of world trade. Objectives of GATT are to expand international trade and promote economic development. GATT provides a permanent forum for discussion and solution of particular international trade problems, and for multilateral negotiations to reduce tariffs and other obstacles to the expansion of international trade. Special attention is given to trade problems of developing countries. In November 1979, participating countries concluded the Tokyo Round of multilateral trade negotiations with agreements covering tariff reductions, non-tariff measures, an improved legal framework for the conduct of international trade, bovine meat, dairy products, tropical products, civil aircraft, and a revised GATT anti-dumping code. The Uruguay Round of multilateral trade negotiations was launched in October 1986 and is expected to last four years. The 105 participating countries in the eighth GATT Round are conducting negotiations on tariffs, non-tariff measures, tropical products, textiles, agriculture, subsidies, safeguards, etc. An International Trade Centre, set up by GATT in 1964 to aid developing countries in export promotion, is now operated jointly by GATT and UNCTAD.

Director General, A. Dunkel (Switzerland).

EUROPEAN COMMUNITY

The twelve member states: Belgium, Denmark, France, Federal Republic of Germany, Greece, Republic of Ireland, Italy, Luxembourg, The Netherlands, Portugal, Spain, the United Kingdom.

The beginnings of the European Community date from May 9, 1950, when Robert Schuman, France's Foreign Minister, proposed that France and Germany should pool their coal and steel industries under an independent ("supranational") High Authority, in ■ Community open to the membership of any other European country wishing to join. Not only West Germany, but also Italy, Belgium, the Netherlands, and Luxembourg accepted this invitation.

The Coal and Steel Community (E.C.S.C.), European Economic Community and Euratom share ■ single institutional framework: a Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policymaking process is the "dialogue" between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter in all matters arising from the Community Treaties.

Since the start of the European Economic Community and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its own executive body (the E.E.C. and Euratom Commiss-

sions, and the E.C.S.C. High Authority) and its own Council of Ministers.

In April, 1965, the Six signed ■ treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in ■ single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July 1, 1967; the single Commission and single Council then took office. They enjoy the same powers under the three Community Treaties ■ did their predecessors.

On December 1 and 2, 1969, the Heads of State or Government of the Six met at the Hague and decided on the completion, strengthening, and, provided that other European countries wished to accept the Treaties of Rome, enlargement of the Community. They instructed the Commission to draw up a plan for economic and monetary union, and the Foreign Ministers to report by the end of July on possible moves towards political unification. They also resolved to intensify the co-ordination of research and development programmes.

In accordance with the Hague decisions the Council of Ministers agreed in April, 1970, that as from 1975 the Community would have its own revenue, independent of national contributions. The

Foreign Ministers agreed (May, 1970) to hold formal political consultations twice a year.

In June, 1970, the Six invited Britain, the Irish Republic, Denmark and Norway to open negotiations on June 30 at Luxembourg on their applications to join the Community. Negotiations continued in 1971 and were concluded with the United Kingdom Government for all major questions by the end of June; on July 8, H.M. Government issued a White Paper on the results. On Jan. 22, 1972, the four applicant countries signed the Treaty of Accession in Brussels. Norway conducted a referendum on its Common Market entry and as a result withdrew its application. The enlarged Community of the Nine came into existence on Jan. 1, 1973.

With the advent of a Labour Government in the U.K. in 1974, there followed a period of renegotiation of the terms of Britain's entry into the Community, culminating in a referendum on June 5, 1975, as to whether or not the country should remain a member of the E.C. The result of the referendum showed two to one in favour of staying in. British Labour Party representatives who had hitherto boycotted the European Parliament then took up their 18 allotted seats.

In January 1976 the European Parliament approved a Report urging direct elections to the Parliament in 1978. On July 12-13, 1976, the Heads of Government or State, meeting in European Council, decided to approve a 410 member Parliament with Britain, France, West Germany and Italy allocated 81 seats each; the Netherlands 25, Belgium 24, Denmark 16, Ireland 15 and Luxembourg 6. Because some countries (including Britain) had not passed the relevant legislation in time, the date of European Elections was postponed until June 1979. When Greece joined the E.C. in January 1981, she was allocated 24 seats in the Parliament, bringing the total number to 434. When Spain and Portugal became members in 1986, they took an additional 84 seats; Spain taking 60 and Portugal 24 making the total 518.

The European Council, in addition to the institutionalized meetings provided under the Treaties, evolved from the summit conference of December 1974, when the Heads of Government decided to meet at least three times a year in order to discuss Community problems and matters requiring political co-operation.

OFFICE OF THE UNITED KINGDOM PERMANENT REPRESENTATIVE TO THE EUROPEAN COMMUNITIES
Rond-point Robert Schuman 6, 1040 Brussels

Ambassador and U.K. Permanent Representative, Sir David Hannay, K.C.M.G. (1985).

The Commission

On July 1, 1970, the Commission was reduced from 14 members to nine, two each from Germany, France and Italy, and one each from Belgium, the Netherlands and Luxembourg. Following the 1973 enlargement, the number rose to 13, with two seats each from Britain, France, Germany, and Italy and one each for the other members. The admission of Greece in 1981, with 1 seat, brought the total to 14 Commissioners. When the Community was again enlarged in 1986, the total number of Commissioners grew to 17, two being appointed from Spain and one from Portugal.

The members of the Commission are appointed by agreement among the twelve member governments for a four-year renewable term; the president and vice-presidents are appointed from among the members for a two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

Commission of the European Communities 200 Rue de la Loi, 1049 Brussels

President

Jacques Delors (France) (*Secretariat General; Legal Services; Monetary Affairs; Spokesman's Service; Joint Interpreting and Conference Service; Think Tank; Security Office.*)

Vice-Presidents

Frans Andriessen (Netherlands) (*External Relations and Trade Policy; Co-operation with other European Countries.*)

Henning Christophersen (Denmark) (*Economic and Financial Affairs; Co-ordination of Structural Instruments; Statistical Office.*)

Manuel Marin (Spain) (*Co-operation and Development; Fisheries.*)

Filippo Maria Pandolfi (Italy) (*Research and Science; Telecommunications; Information Technology and Innovation; Joint Research Centre.*)

Martin Bangemann (Fed. Rep. of Germany) (*Internal Market and Industrial Affairs; Relations with the European Parliament.*)

Sir Leon Brittan (U.K.) (*Competition Policy; Financial Institutions.*)

Members

Carlo Ripa Di Meana (Italy) (*Environment; Nuclear Safety; Civil Protection.*)

Antonio Cardoso E. Cunha (Portugal) (*Personnel and Administration; Energy; Euratom Supply Agency; Policy on Small and Medium Sized Enterprises; Tourism; Social Economy.*)

Karel Van Miert (Belgium) (*Transport; Credit, Investments and Financial Instruments; Consumer Protection.*)

Vasso Papandreou (Greece) (*Social Affairs and Employment; Education and Training; Human Resources.*)

Secretary General, D. Williamson (U.K.).

The Commission maintains information offices in London (8 Storey's Gate, SW1P 3AT. Tel: 01-222 8122), Edinburgh (7 Alva Street EH2 4PH), Cardiff (4 Cathedral Road), Belfast (Windsor House, 9/15 Bedford Street), Dublin (39 Molesworth Street), Washington (2100 M Street, N.W. (Suite 707), Washington, D.C. 20037), New York (1 Dag Hammarskjöld Plaza, 245 East 47th Street, New York, N.Y. 10017), Ottawa (Inn of the Provinces, Office Tower (Suite 1110), 350 Sparks Street, Ontario, K1R 7S8), and other cities.

The Council of the European Communities 170 Rue de la Loi, 1048 Brussels

This consists of ministers from the governments of each of the twelve member states, the ministers

concerned depending on the subject under discussion. A single Council exists for the three European Communities. It is the main decision-taking body within the Community legislative process. The Council acts, in almost all cases, on the basis of proposals submitted by the Commission, which is present at Council sessions to participate in the shaping of the measures taken. Before examining Commission proposals the Council normally obtains the opinions of the European Parliament and the Economic and Social Committee on them.

As prescribed by the E.C. treaty, under which the great majority of the Council's business falls, decisions are taken by majority vote, qualified majority vote (a system in which the members' votes are weighted) or by unanimity. The Council acts under the E.C. treaty by issuing (a) regulations, which are binding in their entirety and directly applicable in all member states; (b) directives, which are binding as to the result to be achieved but leave open to national governments the method of attaining this result; (c) decisions, which bind those addressed; (d) recommendations; and (e) opinions, which have no binding force. The Euratom treaty has the same system of voting and taking action; the E.C.S.C. system differs in certain respects.

The Presidency of the Council is held in rotation for periods of six months. The sessions of the Council are prepared by a Committee of Permanent Representatives of the member states. The Council and its committees are serviced by a general secretariat.

European Parliament

Secretariat: Centre Européen, Kirchberg, Luxembourg.

U.K. Information Office, 2 Queen Anne's Gate, SW1H 9AA (Tel: 01-222 0411).

The first direct elections to the European Parliament were held in mid-1979, the second in 1984 and the latest in June 1989. Of 518 seats, the United Kingdom, France, Germany and Italy have 81 each, Spain 60, the Netherlands 25, Belgium, Greece, and Portugal 24, Denmark 16, Ireland 15 and Luxembourg 6. The Parliament meets in Strasbourg and its Committees in Brussels.

Set up in 1952 under the European Coal and Steel Community Treaty of 1951, the Parliament's authority was extended by the 1957 Convention on Common Institutions to cover the European Economic Community and Euratom. It must be consulted on all major issues and has the right to dismiss the Commission by a vote of censure.

On the bulk of legislation concerning the European Single Market due to be completed by the end of 1992, the Parliament enjoys additional powers under the 'co-operation procedure' introduced by the Single European Act in July 1987. Apart from general powers of supervision and consultation, it questions the Commission and the Council of Ministers and has a measure of control over the Community's annual budget including its final adoption. It can reject the budget as a whole and can amend items of non-obligatory expenditure (i.e. expenditure not specified in the original treaties or derived legislation—amounting to some 27 per cent. of the total budget).

The Members of the Parliament serve on specialized committees and sit in political groupings as follows: Socialists, 180; European People's Party, 121; Liberal Democratic Reformist, 49; European Democratic Group, 34; Green, 30; European United Left, 28; European Democratic Alliance, 20; European Right, 17; Coalition Left, 14; Rainbow Group, 13; Independent, 12.

President, Enrique Baron Crespo (Spain).

European Court of Justice L-2925 Luxembourg

The European Court superseded the Court of Justice of E.C.S.C. and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases may be brought to it by the member States, the Community institutions, firms or individuals. Its decisions are directly binding in the member countries. The thirteen judges and six advocates-general of the Court are appointed for renewable six-year terms by the member Governments in concert. During 1988, 373 new cases were lodged at the court and 238 judgments were delivered.

(w.e.f. October 7, 1988)

Judges, O. Due (President); R. Joliet (President of 1st and 5th Chambers); T. F. O'Higgins (President of the 2nd Chamber); F. Grevisse (President of the 3rd Chamber); T. Koopmans (President of the 4th and 6th Chambers); Sir Gordon Slynn; G. F. Mancini; C. N. Kakouris; F. A. Schockweiler; J. C. Moitinho de Almeida; G. C. Rodriguez Iglesias; M. Diez de Velasco; M. Zuleeg.

Advocates-General, J. Mischo (1st Advocate-General); C. O. Lenz; M. Darmon; W. Van Gerven; F. Jacobs; G. Tesauro.

The European Investment Bank 100 Boulevard Konrad Adenauer, L-2950 Luxembourg

The European Investment Bank (E.I.B.) was set up in 1958 under the terms of the Treaty of Rome to finance capital investment projects promoting the balanced development of the European Community.

It grants long-term loans to private enterprises, public authorities and financial institutions, to finance projects which further: the economic development of less advanced regions (Assisted Areas); improve communication systems between Member States; environmental protection; attainment of the Communities energy policy objectives; modernization of enterprises; and co-operation between undertakings in the different Member States.

E.I.B. activities have also been extended outside member countries under the terms of different association or cooperation agreements with twelve countries in the Mediterranean region and, under the Lomé Conventions, 66 in Africa, the Caribbean and the Pacific.

The Bank's total financing operations in 1988 amounted to 10,175 million E.C.U.,* of which 9,475 million were for investments in the European Community and 700 million for outside the Community. Between 1973 and 1988 the E.I.B. had made available a total of £6,624 million E.C.U. for investment in the U.K.

The members of the European Investment Bank are the twelve member states of the Community, who have all subscribed to the Bank's capital, of 28,000 million E.C.U. (of which 2,596 E.C.U. is the paid in or due to be paid in portion). The bulk of the funds required by the Bank to carry out its tasks are borrowed on the capital markets of the Community and non-member countries, and on the international market.

As it operates on a non-profit-making basis, the interest rates charged by the E.I.B. reflect the cost of

* The financial statements of the European Investment Bank are drawn up in European currency unit (E.C.U.) which at June 30, 1989 equalled ±£0.68, U.S.\$1.06.

the Bank's borrowings and closely follow conditions on world capital markets.

The Board of Governors of the European Investment Bank consists of one Minister nominated by each of the member countries, usually the Finance Minister, who lay down general directives on the policy of the Bank and appoint members to the Board of Directors (21 nominated by the member states, 1 by the Commission of the European Communities), which takes decisions on the granting and raising of loans and the fixing of interest rates. A Management Committee, also appointed by the Board of Governors, is responsible for the day-to-day operations of the Bank.

President, Ernst-Günther Bröder.

Vice-Presidents, Lucio Izzo; Alain Prate; Miguel A. Arnedo Orbañanos; Erling Jergensen; Ludovicus Meulemans; Roger Lavelle.

(The President and Vice-Presidents also preside as Chairman and Vice-Chairmen at meetings of the Board of Directors.)

U.K. Office: 68 Pall Mall, SW1Y 5ES.

EUROPEAN COAL AND STEEL COMMUNITY

This, the first of the European Communities, was established in 1952. Since then, for coal, iron ore and scrap, it has abolished customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel differed from those charged to home consumers, currency restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonized external tariff for the whole Community.

THE TREATY OF ROME

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of E.C.S.C. (Belgium, France, Federal Republic of Germany, Italy, Luxembourg and The Netherlands) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of a common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of a system ensuring that competition shall not be distorted in the Common Market; the co-ordination of economic policies; the harmonization of social and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of an Economic and Social Committee which must be consulted on major proposals, consisting of representatives of employers, workers, consumers and other groups; the establishment of a European Investment Bank intended to aid

investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort towards economic and social development.

ENLARGEMENT OF THE COMMUNITY

The question of possible enlargement of the Community played an important part in its development from the autumn of 1961 when Britain, the Irish Republic, Denmark and Norway first sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association with the Community. The negotiations were vetoed by France in January, 1963. In May, 1967, Britain, the Irish Republic and Denmark formally submitted applications for Community membership. In July Norway followed suit and Sweden announced that it would seek to participate in the enlargement of the Community on terms compatible with its neutrality. These applications made very slow progress and appeared to come to a standstill when in December, 1967, France declared that Britain's economy would have to be strengthened before negotiations could begin. But shortly after taking office as President of France, Georges Pompidou stated in July, 1969, that there was no objection in principle to the admission of Britain to the Community. At the Hague "summit" meeting in December, 1969, the Six decided that provided that the completion of the Community was not prejudiced, and provided that the Community was strengthened to provide for enlargement, then the entry of other European countries would be desirable. After deciding on a common negotiating position, the Six invited Britain and the other applicants to begin negotiations for membership.

A single overall transitional period of five years, during which the Three were to adopt Community rules and regulations, started on January 1, 1973, giving time for the gradual integration of the economies of the Three with the Six by the end of 1977.

The first 40 per cent alignment on the Community's Common External Tariff (C.E.T.)—i.e. 40 per cent of the difference between the new members' tariffs and the C.E.T.—was made at the beginning of 1974, and three further alignments of 20 per cent each followed.

Negotiations with Greece were concluded and the Treaty of Accession signed on May 28, 1979. Greece became the tenth member of the Community on January 1, 1981. Portugal and Spain applied to join the Community and became the eleventh and twelfth members on January 1, 1986.

Following a plebiscite, Greenland negotiated its withdrawal from the E.C. (but without discontinuing relations with Denmark) and formally left on February 1, 1986.

EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

A second treaty, arising from the Messina discussions between the E.C.S.C. powers on additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of Euratom, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. The United Kingdom, Denmark and Ireland joined Euratom on Jan. 1, 1973, Greece on Jan. 1, 1981, and Spain and Portugal on Jan. 1, 1986.

OTHER INTERNATIONAL ORGANIZATIONS

ASIAN DEVELOPMENT BANK

2330 Roxas Boulevard, 1300 Metropolitan Manila
Philippines

The Asian Development Bank began operations in December 1966. It has 47 member countries, 32 countries from the Asia-Pacific region and 15 from Europe and North America.

The aim of the Bank is to promote the economic and social progress of its developing member countries. It makes loans and equity investments; provides technical assistance for development programmes and advisory services; promotes public and private investment in development schemes; and coordinates development plans and policies.

The Bank's highest policy-making body is the board of Governors, which meets annually. Each member country appoints one governor and one alternate governor. The President, who is elected by the Board of Governors for a term of five years, acts as the Chairman of the Board of Directors. The twelve-man Board of Directors is responsible for the direction of the Bank's operations.

President, Masao Fujioka (Japan).

ASSOCIATION OF SOUTH EAST ASIAN NATIONS

Jakarta, Indonesia

Formed in 1967, the main aims of the Association of South East Asian Nations (A.S.E.A.N.) are the acceleration of economic growth, social progress and cultural development, the promotion of collaboration and mutual assistance in matters of common interest, and the continuing stability of the South East Asian region.

The Heads of Government of the member countries are the highest authority and give directions to A.S.E.A.N. and when necessary. The main policy-making body is the annual meeting of foreign ministers of the member countries. The members of the Association are Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Sec. Gen., Roderick Yong (Brunei).

BANK FOR INTERNATIONAL SETTLEMENTS

Centralbahnhofstrasse 2, 4051 Basle, Switzerland

The objectives of the Bank for International Settlements (founded in 1930) are to promote the co-operation of central banks; to provide facilities for international financial operations; and to act as trustee or agent in international financial settlements entrusted to it. The London agent is the Bank of England, and the Governor of the Bank of England is a member of the Board of Directors, in which administrative control is vested.

Chairman of the Board of Directors and President of the Bank for International Settlement, Dr. W. S. Duisberg (Netherlands) (1988).

C.A.B. INTERNATIONAL

Wallingford, Oxon. OX10 8DE

[0491-32111]

C.A.B. International (formerly the Commonwealth Agricultural Bureaux) was founded in 1929. It consists of four Institutes and eleven Bureaux under the control of an Executive Council comprising representatives of the countries which contribute to its funds. The functions of C.A.B.I. are to provide a scientific information service, identification of pests, biological control services and mutual assistance.

Each Institute and Bureau acts as an effective clearing house for the collection, collation and dissemination of information in its particular branch of agricultural science.

Director General, D. Mentz.

CARIBBEAN COMMUNITY AND COMMON MARKET

P.O. Box 10827, Georgetown, Guyana

The Caribbean Community and Common Market (CARICOM) was established on 1973 with three objectives: economic co-operation through the Caribbean Common Market; the co-ordination of foreign policy among the independent member states; the provision of common services and co-operation in functional matters such as health, education and culture, communications and industrial relations. The principal organs are the Conference of Heads of Government, which determines policy, and the Common Market Council of Ministers, consisting of Ministers of Government (usually Ministers of Trade) designated by each member state, which is responsible for the development and smooth running of the Common Market and for the settlement of any problems arising out of its functioning. The principal administrative arm is the Secretariat, based in Guyana.

The 13 member states are Antigua and Barbuda, The Bahamas (which is not a member of the Common Market), Barbados, Belize, Dominica, Grenada, Guyana, Jamaica, Montserrat, St. Christopher and Nevis, St. Lucia, St. Vincent and the Grenadines and Trinidad and Tobago. The Dominican Republic, Suriname and Haiti have observer status.

Sec. Gen., Roderick Rainford (Jamaica).

CONFERENCE ON DISARMAMENT

Palais des Nations, CH-1211, Geneva 10, Switzerland

The Conference on Disarmament (C.D.) was constituted in its original form as the 18-nation Committee on Disarmament in 1962. The present title of the organization was adopted in 1984. The membership stood at 40 nations in June 1989.

The Conference holds two regular sessions per year, Feb.-April and June-August. The work of the Conference is conducted both in plenary meetings and in ad hoc committees set up with the consent of all members to deal with specific items of the agenda. Currently on the agenda are, *inter alia*, negotiations towards a global ban on chemical weapons.

The Conference on Disarmament is regarded by the U.N. as the single multilateral disarmament negotiating forum.

Secretary General, His Excellency Miljan Komatina. U.K. Delegation to the Conference on Disarmament, 37-39 rue de Vermont, 1211 Geneva 20, Switzerland.—Leader of U.K. Delegation, Miss T. A. H. Solesby, C.M.G.

COUNCIL FOR MUTUAL ECONOMIC ASSISTANCE

56 Kalinin Avenue, Moscow G-205, U.S.S.R.

Established in 1949, the aim of the Council for Mutual Economic Assistance (C.M.E.A. or COMECON) is to promote the development of the national economies of the member states and the development of socialist economic integration, through the co-operation of members in the most rational use of resources and the acceleration of economic and technical progress, industrialisation and productiv-

ity. The highest body is the Session of the Council, which consists of delegations from all member states, usually led by the heads of government. The Executive Committee consists of representatives of member states at the level of deputy heads of government, and is responsible for the implementation of the tasks set by the Session of the Council and for directing the work of the Committees, Standing Commissions, Secretariat and other bodies. In 1988 the C.M.E.A. established official relations with the E.C.

The member countries are Bulgaria, Cuba, Czechoslovakia, German Democratic Republic, Hungary, Mongolia, Poland, Romania, U.S.S.R. and Vietnam. Yugoslavia participates in the work of some C.M.E.A. bodies. There are also co-operation agreements with Afghanistan, Angola, Ethiopia, Finland, Iraq, Mexico, Mozambique, Nicaragua, the People's Democratic Republic of Yemen, and Yugoslavia.

Secretary, V. Sytchev (U.S.S.R.).

THE COUNCIL OF EUROPE 67006 Strasbourg, France

The Council of Europe was founded in 1949. Its aim is to achieve greater unity between its members to safeguard their European heritage and to facilitate their economic and social progress through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and furtherance of human rights and fundamental freedoms.

The 23 members are Austria, Belgium, Cyprus, Denmark, Finland, France, the Federal Republic of Germany, Greece, Iceland, the Republic of Ireland, Italy, Liechtenstein, Luxembourg, Malta, Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey and the U.K.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries, who meet twice yearly, and the Parliamentary Assembly of 177 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties. There is also a Joint Committee of Ministers and Representatives of the Parliamentary Assembly.

The Committee of Ministers is the executive organ of the Council. The majority of its conclusions take the form of international agreements (known as European Conventions) or recommendations to governments. Decisions of the Ministers may also be embodied in partial agreements to which a limited number of member governments are party. Member governments accredit Permanent Representatives to the Council in Strasbourg, who are also the Ministers' Deputies. The Committee of Deputies meets every month to transact business and to take decisions on behalf of Ministers.

The Parliamentary Assembly holds three week-long sessions a year. It debates reports on, *inter alia*, political, economic, agricultural, social, educational, legal and regional planning affairs, and also reports received annually from the O.E.C.D., other European organizations and certain specialized agencies of the United Nations. Its 13 permanent committees meet, normally in private, once or twice between each public plenary session of the Assembly. The Standing Conference of Local and Regional Authorities of Europe each year brings together mayors and municipal councillors in the same numbers as the members of the Parliamentary Assembly.

One of the principal achievements of the Council of Europe is the European Convention of Human Rights (1950) under which was established the European Commission and the European Court of Human Rights. 131 other conventions and agreements have now been concluded. They include the European Social Charter, the European Social Secu-

rity Code, and conventions on extradition, the legal status of migrant workers, conservation, and the transfer of sentenced prisoners.

Non-member states take part in certain Council of Europe activities on a regular or ad hoc basis; thus the Holy See and Yugoslavia participate in all the educational, cultural and sports activities. The European Youth Foundation funds events in both Eastern and Western European countries and in some outside Europe, while nationals of these countries attend courses and seminars at the European Youth Centre.

Secretary General, Catherine Lalumière (France). Permanent U.K. Representative, His Excellency Colin McLean, C.M.G., M.B.E.

EUROPEAN FREE TRADE ASSOCIATION 9-11 rue de Varembé, 1211 Geneva 20, Switzerland

The members of the European Free Trade Association (E.F.T.A.), which was established on May 3, 1960, are Austria, Finland (an associate from 1960 to 1985 and member since Jan. 1, 1986), Iceland (since March 1, 1970), Norway, Sweden and Switzerland.

In 1973 all the E.F.T.A. Member States entered into a new relationship with the E.C. Two—Denmark and the United Kingdom—withdrew from E.F.T.A. at the end of December 1972 to become members of the E.C. on January 1, 1973. Agreements establishing industrial free trade between most of the other E.F.T.A. Member States and the enlarged E.C. came into force on that same date. Similar agreements with Norway and Finland came into force on July 1, 1973, and Jan. 1, 1974, respectively. On Jan. 1, 1986 Portugal became a member of the E.C. The free trade agreements therefore now apply to trade between the six countries remaining in E.F.T.A. and Portugal.

E.F.T.A.'s first objective was free trade between its original members and this was realized at the end of 1966. Its second objective was the creation of a single market to include all Western European countries, achieved through the free trade agreements.

The final abolition of tariffs on E.F.T.A.-E.C. trade was marked by a meeting in Luxembourg in April 1984 when ministers from all E.F.T.A. and E.C. countries met. They agreed on general guidelines for greatly increased co-operation between their countries. The emphasis was on the removal of technical barriers to trade and the simplification of the origin rules which determine which products may be traded free of duty. A start was made towards multilateral co-operation in research and development as a means of strengthening the industrial potential of Western Europe, and multilateral efforts to protect the environment are under discussion.

All E.F.T.A. and E.C. countries have co-operated in a successful attempt to simplify border formalities for trade in goods in Western Europe: multilateral conventions now provide for the use of a single administrative document for customs purposes and for the introduction of a common transit procedure.

The Council of E.F.T.A. meets every two weeks at the level of the heads of the permanent national delegations to E.F.T.A. and usually twice a year at the level of ministers. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

Secretary General, Georg Reisch (Austria).

EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH (C.E.R.N.) 1211 Geneva 23, Switzerland

The Convention establishing the European Organization for Research (C.E.R.N.) came into force in 1954. The Organization promotes European collabora-

ration in nuclear research of a purely scientific nature. It is not concerned with research of a military nature.

The member countries are Austria, Belgium, Denmark, France, Federal Republic of Germany, Greece, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the U.K. The following have observer status: Poland, Turkey, Yugoslavia, the E.C. Commission and UNESCO.

The Council is the highest policy-making body and is made up of two delegates from each member state. There is also a Committee of the Council comprising a single delegate from each member state (who is also a Council member) and the chairmen of the scientific policy and finance advisory committees. The Council is chaired by a President who is elected by the Council in Session. The Council also elects the Director General, the person responsible for the internal organization of C.E.R.N. The Director General heads a workforce of approximately 3,500, including physicists, craftsmen, technicians and administrative staff. At present over 5,000 physicists use C.E.R.N.'s facilities.

The member countries contribute to the budget directly in proportion to their net national revenue. The 1989 budget was S.Fr. 809.5 million.

President of the Council, J. Rembser (Federal Republic of Germany).

Director General, C. Rubbia (1989–1993).

EUROPEAN SPACE AGENCY

8-10 rue Mario Nikis, 75738 Paris, France

The European Space Agency (E.S.A.) was set up on May 31, 1975. It was formed from two earlier space organizations—the European Space Research Organization (E.S.R.O.) and the European Launcher Development Organization (E.L.D.O.). Its aims include the advancement of space research and technology, the implementation of a long-term European space policy and the co-ordination of national space programmes.

The member countries are Austria, Belgium, Denmark, France, Federal Republic of Germany, Republic of Ireland, Italy, Netherlands, Norway, Spain, Sweden, Switzerland and the United Kingdom. Finland is an associate member and Canada a co-operating state.

The agency is directed by a Council composed of the representatives of the member states, and its chief officer is the Director General.

Director General, Prof. Dr. Reimar Lüst.

INTERNATIONAL CONFEDERATION OF FREE TRADE UNIONS

37-41 rue Montagne aux Herbes Potageres, 1000 Brussels, Belgium

Formed in 1949 the International Confederation of Free Trade Unions (I.C.F.T.U.) was created to promote free trade unionism worldwide. It aims to establish, maintain and develop free trade unions, particularly in economically under-developed countries.

Affiliated to the I.C.F.T.U. are 142 individual unions and representative bodies in 97 countries and territories: on May 17, 1989 there were over 88 million members.

The supreme authority of the organization is the Congress which convenes at least every four years. It is composed of delegates from the affiliated trade organizations. The Congress elects an Executive Board of 35 members which meets at least twice a year. The Board establishes the budget and receives suggestions and proposals from affiliates as well as acting on behalf of the Confederation. The Congress also elects the General Secretary.

General Secretary, John Vanderveken.

U.K. Affiliate, T.U.C., Congress House, 23–28 Great Russell Street, WC1B 3LS.

INTERNATIONAL CRIMINAL POLICE ORGANIZATION

26 rue Armentaud, 92210 Saint-Cloud, France

The International Criminal Police Commission (INTERPOL) was set up in 1923 to establish an international criminal records office and to harmonize extradition procedures. In 1956 a revised Constitution was adopted and the organization adopted its present name. On Jan. 1, 1988 the organization comprised 146 member states.

INTERPOL's aims are to ensure and promote mutual assistance between all criminal police authorities, and to support government agencies concerned with combatting crime, whilst respecting the national sovereignty of members. INTERPOL is financed by annual contributions from the governments of member states.

INTERPOL's policy is decided by the General Assembly which meets annually: it is composed of delegates appointed by the member states. The 13-member Executive Committee is elected by the General Assembly from among the member states' delegates, and is chaired by the President, who has a four-year term of office. The permanent administrative organ is the General Secretariat, headed by the Secretary General, who is appointed by the General Assembly. *President, John Simpson.*

U.K. Office, Criminal Investigation Department, New Scotland Yard, SW1H 0BG.—U.K. Representative, J. A. Smith, Q.P.M.

INTERNATIONAL ENERGY AGENCY

Chateau de la Muette, 2 rue Andre-Pascal, 75775 Paris, France

The International Energy Agency (I.E.A.), founded in November 1974, is an autonomous agency within the framework of the Organization for Economic Co-operation and Development (O.E.C.D.). The I.E.A. had 21 member countries at May 1989.

The I.E.A.'s objectives include improvement of energy supply and demand worldwide, increased efficiency, development of alternative energy sources and the promotion of relations between oil producing and oil consuming countries. The I.E.A. also maintains an emergency system to alleviate the effects of severe oil supply disruptions.

The main decision-making body is the Governing Board composed of senior energy officials from member countries. Various standing groups and special committees exist to facilitate the work of the Board. The I.E.A. Secretariat, with a staff of energy experts, carries out the work of the Governing Board and its subordinate bodies. The Executive Director is appointed by the Board.

Executive Director, Mrs. Helga Steeg (Federal Rep. of Germany).

INTERNATIONAL MARITIME SATELLITE ORGANIZATION

40 Melton Street, London NW1 2EQ

The International Maritime Satellite Organization (INMARSAT) was founded in July 1978 and began operations on Feb. 1, 1982. INMARSAT operates a system of satellites to provide telephone, telex, data and facsimile transmission, as well as distress and safety communication services to the world's shipping, aviation and offshore industries.

INMARSAT comprises three bodies: The Assembly is composed of representatives of all member countries, each with one vote. It meets every two years to

review activities and objectives, to make recommendations to the Council. The Council is the main decision-making body and consists of representatives of the 18 members with the largest investment shares. Four others who represent the interests of developing countries are elected to the Council on the basis of geographical representation. The Council meets at least three times a year and oversees the activities of the Directorate, the permanent staff of INMARSAT.

As at May 1989 there were 56 member countries.
Director General, Oluf Lundberg.

INTERNATIONAL RED CROSS AND RED CRESCENT MOVEMENT

17 avenue de la Paix, 1202 Geneva, Switzerland

The International Red Cross and Red Crescent Movement is composed of three elements. The International Committee of the Red Cross (I.C.R.C.) is the founding body of the Red Cross and was formed in 1863. It is a neutral intermediary negotiating between warring parties. It also ensures the application of the Geneva Conventions with regard to prisoners of war and internees.

The League of Red Cross and Red Crescent Societies, founded in 1919, is the international federation which exists to contribute to humanitarian activities such as co-ordinating relief work, caring for refugees, training personnel and furthering medical research. There are also national Red Cross and Red Crescent Societies in 146 countries with ■ global membership of 250 million.

The International Red Cross meets every four years at the International Red Cross Conference, which is also attended by nations bound by the Geneva Conventions.

President of the I.C.R.C., Cornelio Sommaruga.
British Red Cross Society, 9 Grosvenor Crescent,
SW1X 7EJ.—*Director*, J. C. Burke-Gaffney.

INTERNATIONAL TELECOMMUNICATIONS SATELLITE ORGANIZATION

3400 International Drive, N.W., Washington D.C.
20008-3098, U.S.A.

Formed in 1964, the International Telecommunications Satellite Organization (INTELSAT) owns and operates the world-wide commercial communications satellite system. The system is composed of a network of thirteen satellites and more than 800 antennas which link together over 700 member and non-member users.

INTELSAT provides an international telephony service; an international television service; the Intelsat Business Service (I.B.S.); Intelnet (a digital service designed for data collection and distribution); domestic telecommunications services and the Vista service providing telecommunications to remote communities.

Each of the 117 national signatories contributed to the capital costs of the organization in proportion to its investment share. The investment share is based on the relative usage of the system by member countries.

There is a four-tier hierarchy: the Assembly of Parties to the agreement meets every two years to consider long-term objectives. It is composed of representatives of the member governments: the Meeting of Signatories consider annually the financial, technical and operational aspects of the system: the Board of Governors, which has 28 members: the Executive Organ is the permanent staff of Intelsat and is headed by ■ Director General who reports to the Board of Governors.

LEAGUE OF ARAB STATES

37 Av. Khereddine Pacha, Tunis, Tunisia

The purpose of the League of Arab States (founded 1945) is to ensure co-operation among member states and protect their independence and sovereignty, to supervise the affairs and interests of Arab countries and to control the execution of agreements concluded among the member states. The League considers itself a regional organization and is an observer at the United Nations.

Member states are Algeria, Bahrain, Djibouti, Iraq, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Palestine, Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, United Arab Emirates, Arab Republic of Yemen and Democratic Republic of Yemen. (The re-admission of Egypt, ■ founder state, was announced in May 1989.)

Secretary General, Chedli Klibi (*Tunisia*).
U.K. Office—Arab Information Centre, 52 Green Street, WIY 3RH.

NORTH ATLANTIC TREATY ORGANIZATION

Brussels 1110, Belgium

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952, the Federal Republic of Germany in 1955, and Spain in 1982. The North Atlantic Council, chaired by the Secretary General, is the highest authority of the Alliance and is composed of permanent representatives of the sixteen member countries. It meets at ministerial level (Foreign Ministers) at least twice per year. The permanent representatives (Ambassadors) head national delegations of advisers and experts.

Defence matters are dealt with in the Defence Planning Committee (D.P.C.), composed of representatives of all member countries, except France. Within the specialized field of defence, the D.P.C. has the same functions and authority as the Council. Like the Council it meets regularly at ambassador level and twice a year in ministerial sessions, when the nations are represented by their Defence Ministers.

The Council/D.P.C., as a unique forum for confidential and constant inter-governmental consultation and as the main decision-making body within the North Atlantic Alliance, is assisted by an International Staff, divided into five divisions: Political Affairs; Defence Planning and Policy; Defence Support; Infrastructure, Logistics and Civil Emergency Planning; Scientific Affairs.

U.K. Permanent Representative, His Excellency Vice Adm. Sir Richard Thomas, K.C.B., O.B.E.

The senior military authority in N.A.T.O., under the Council and D.P.C., is the Military Committee composed of the Chief of Defence of each member country except France and Iceland. The Military Committee, which is assisted by an international military staff, functions in permanent session with permanent military representatives and is responsible for making recommendations to the Council and Defence Planning Committee on measures considered necessary for the common defence of the N.A.T.O. area and for supplying guidance on military matters to the major N.A.T.O. Commanders.

Chairman of the Military Committee, Gen. Vikgleik Eide (*Norway*).

The strategic area covered by the North Atlantic Treaty is divided among three Commands (European, Atlantic and Channel) and a Regional Planning Group (Canada and the United States).

The Major N.A.T.O Commanders are responsible for the development of defence plans for their respective areas, for the determination of force requirements and for the deployment and exercise of the forces under their command. The Major N.A.T.O. Commanders report to the Military Committee.

The three Major N.A.T.O Commanders are:

Supreme Allied Commander, Europe, Gen. John R. Galvin (U.S.).

Supreme Allied Commander, Atlantic, Adm. Frank B. Kelso II (U.S.).

Commander-in-Chief, Channel, Adm. Sir Benjamin Bathurst, K.C.B. (U.K.).

Secretary General, Manfred Wörner (*Federal Rep. of Germany*).

The main administrative body is the Secretariat, based in Addis Ababa.

Sec. Gen., Salim Ahmed Salim (*Tanzania*).

ORGANIZATION OF AMERICAN STATES

17th Street and Constitution Ave. N.W.,
Washington D.C. 20006, U.S.A.

Originally founded in 1890 for largely commercial purposes, the Organization of American States (O.A.S.) adopted its present name and charter in 1948. Its aims are to strengthen the peace and security of the continent; to prevent possible causes of difficulties and to ensure the pacific settlement of disputes that may arise among the member states; to provide for common action on the part of those states in the event of aggression; to seek the solution of political, judicial and economic problems that may arise among them; and to promote, by co-operative action, their economic, social and cultural development. The O.A.S. is a regional organization within the United Nations.

Policy is determined by the annual General Assembly. Meetings of Ministers of Foreign Affairs consider urgent problems, and advise in cases of armed attack and threats to peace.

The 32 member states are Antigua and Barbuda, Argentina, Bahamas, Barbados, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Grenada, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, St. Christopher and Nevis, St. Lucia, St. Vincent and the Grenadines, El Salvador, Suriname, Trinidad and Tobago, U.S.A., Uruguay and Venezuela.

Secretary General, João Clemente Baena Soares (*Brazil*).

ORGANIZATION OF ARAB PETROLEUM EXPORTING COUNTRIES

P.O. Box 20501 Safat, 13066 Kuwait

The Organization of Arab Petroleum and Exporting Countries (O.A.P.E.C.) was founded in Jan. 1968. The objectives of the organization are to promote co-operation in economic activities; to safeguard members' interests; to unite efforts to ensure the flow of oil to consumer markets; and to create a favourable climate for the investment of capital and expertise.

The Ministerial Council is composed of oil ministers from the member countries and meets twice a year to determine policy, to direct activities and to approve the budgets and accounts of the General Secretariat and the Judicial Tribunal. The Judicial Tribunal is composed of nine part-time judges who rule on disputes between member nations and disputes between nations and oil companies. The executive organ of O.A.P.E.C. is the General Secretariat.

The member countries of O.A.P.E.C. are Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Qatar, Saudi Arabia, Syria and the United Arab Emirates. (The suspension of Egypt's membership was lifted in May 1989. Tunisia's membership has been inactive since 1987).

Acting Secretary General, Abdelaziz Alwattari.

ORGANIZATION OF AFRICAN UNITY

P.O. Box 3243, Addis Ababa, Ethiopia

The Organization of African Unity (O.A.U.) was established in 1963 and has 50 members. It aims to further African unity and solidarity, to co-ordinate political, economic, social and defence policies, and to eliminate colonialism in Africa.

The chief organs are the Assembly of heads of state or government and the Council of Foreign Ministers.

ORGANIZATION OF THE PETROLEUM EXPORTING COUNTRIES

Obere Donaustrasse 93, A-1020 Vienna, Austria

The Organization of the Petroleum Exporting Countries (O.P.E.C.) was created in 1960 as a permanent intergovernmental organization with the aims of unifying and co-ordinating the petroleum policies

of members and determining the best means of protecting their interests, individually and collectively.

The supreme authority is the Conference of Ministers of Oil, Mines and Energy of member countries which meets at least twice a year and formulates policy. The Board of Governors, nominated by member countries, directs the management of O.P.E.C. and implements Conference resolutions. The Secretariat, based in Vienna, carries out executive functions under the direction of the Board of Governors.

The 13 member countries are Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, U.A.E. and Venezuela.

Secretary General, Dr. Subrota (*Indonesia*).

SOUTH PACIFIC COMMISSION Anse Vata, Noumea, New Caledonia

The South Pacific Commission is a technical assistance agency with an advisory and consultative role in such fields as marine resources, rural management and technology, and community and education services. The management committee is involved with the day-to-day running of the organization and is headed by the Secretary General. The other members are the Director and the Deputy Director of Programmes.

The South Pacific Commission was established in February 1947 following the signing of the Canberra Agreement by the governments of Australia, France, the Netherlands, New Zealand, the U.K. and the U.S.A. The aim was to promote the economic and social stability of the islands in the region.

In 1983, the South Pacific Conference adopted a resolution that the Conference's 27 governments and administrations should have full and equal membership. Since 1967 the Conference has met annually to discuss the future policy of the Commission, to adopt the budget and to nominate the officers of the Commission.

Secretary General, Atanraoi Baiteke (*Kiribati*).
Director of Programmes, Jon Jonasson (*Cook Is.*).
Deputy Director of Programmes, Hélène Courte (*New Caledonia*).

THE WORLD COUNCIL OF CHURCHES

150 route de Ferney, CH-1211 Geneva 20,
Switzerland

The World Council of Churches (W.C.C.) was constituted in Amsterdam in 1948 to promote unity among the many different Christian churches. The 307 member churches of the W.C.C. have adherents in more than 100 countries. With the exception of Roman Catholicism, virtually all Christian traditions are included in the W.C.C. membership.

The policies of the Council are determined by delegates of the member churches meeting in Assembly, about every 8 years, the next Assembly being in Canberra, Australia, in 1991. More detailed decisions are taken by a 150-member Central Committee which is elected by the Assembly and meets, with the seven W.C.C. Presidents, annually. The Central Committee in turn appoints a smaller Executive Committee and also nominates commissions and working groups, to guide the various programmes. The implementation of the policies laid down by the churches and the co-ordination of the 14 programmes are the responsibility of the General Secretariat.

General Secretary, Dr. Emilio Castro (*Uruguay*).
British Council of Churches, 35-41 Lower Marsh,
SE1 7RL.

WORLD FEDERATION OF TRADE UNIONS Vinohradská 10, 12147 Prague 2, Czechoslovakia

The World Federation of Trade Unions (W.F.T.U.) was founded in October 1945. In Jan. 1949 a number of members withdrew and founded the International Confederation of Free Trade Unions. The W.F.T.U. now has 94 affiliated federations with 214 million members, mainly in Eastern Europe and the developing nations.

The Congress, which is comprised of delegates from member nations, meets every four years to review W.F.T.U.'s work and to elect the General Council and Bureau. The General Council is elected from members of national federations and meets once a year. Each affiliated organization has one member and one deputy. The Bureau of 40 members is elected by the General Council and carries out the executive work of the W.F.T.U.

General Secretary, Ibrahim Zakaria (*Sudan*).

BROADCASTING

BRITISH BROADCASTING CORPORATION (see also entry on page 301)

Radio

BBC Radio broadcasts four national services to the United Kingdom, Isle of Man and the Channel Islands plus a fifth tier consisting of national regional services in Wales, Scotland and Northern Ireland and local radio services in England and the Channel Islands. In Wales there are two regional services based on the Welsh and English languages respectively.

The four national services are:

Radio 1: ("Pop" and "rock" network)—5 a.m.-2 a.m. daily. Frequencies: VHF-FM 98-99 MHz, coverage 86%; MW 1053 kHz/285m and 1089 kHz/275m, plus two local fillers giving population coverage 96% (day) and 57% (night).

Radio 2: (Light music, entertainment and sport)—24 hours a day. Frequencies: VHF-FM 88-90.2 MHz, coverage 97%; MW 693 kHz/433m and 909 kHz/330m, plus three local fillers giving population coverage 98% (day) and 65% (night).

Radio 3: (Serious music, drama and documentaries, poetry, and cricket in season)—6.55 a.m.-12 midnight daily. Frequencies: VHF-FM 90.2-92.4 MHz, population coverage 97%. MW (main centres of population only), 1215 kHz/247m, plus four local fillers on 1197 kHz/251m, coverage 87% (day) and 38% (night).

Radio 4: (News, documentaries, drama and entertainment)—5.50 a.m. to 12.45 a.m. daily. Frequencies: VHF-FM England, C.I. and I.o.M. plus part of Wales, Scotland and N. Ireland 92.4-95.8 MHz, coverage 92%; LW 198kHz/1515m, plus eight local fillers on MW giving population coverage 98% (day) and 91% (night).

The national regional services are:

Radio Scotland: Frequencies: MW 810 kHz/370m plus two local fillers, coverage 95% (day) and 87% (night); VHF-FM 92-95 MHz, coverage 94%.

Local programmes on VHF-FM 92-95 MHz: *Radio Aberdeen* (also MW 990 kHz/303m); *Radio Highland*; *Radio nan Eilean*; *Radio nan Gaidheal*; *Radio Orkney*; *Radio Shetland*; *Radio Solway* (also MW 585 kHz/513m); *Radio Tweed*.

Radio Ulster: Frequencies: MW 1341 kHz/224m, plus one local filler, coverage 96% (day) and 80% (night); VHF-FM 92-95 MHz, coverage 97%.

Radio Foyles: Frequencies: MW 792 kHz/379m; VHF-FM 92-95 MHz.

Radio Wales: Frequency: MW 882 kHz/340m and 1125 kHz plus two local fillers giving coverage 96% (day) and 63% (night).

Radio Clwyd: Frequency: MW 657 kHz/457m.

Radio Cymru (Welsh-language): Frequencies: VHF-FM 92-95 MHz, coverage 91%.

Local Radio: There are 35 local stations serving England and the Channel Islands (see below).

Television

The BBC's experiments in television broadcasting started in 1929 and in 1936 the BBC began the world's first public service of high-definition television from Alexandra Palace.

The BBC broadcasts two national television services, BBC 1 (BBC Wales in Wales, BBC Scotland in Scotland, BBC Northern Ireland in Northern Ireland) and BBC 2. These are broadcast in colour on 625-lines and UHF from a network of transmitting

stations planned and built jointly with the Independent Broadcasting Authority. All stations (with a few exceptions) carry four channels including the two IBA channels.

Transmissions from 50 main stations and more than 800 relays are available to more than 99 per cent of the population.

World Service

The World Service broadcasts over 770 hours of programmes a week in 37 languages including the English Service. One hundred and one transmitters are used, 49 of them in the U.K. and 52 at relay stations overseas. In addition the World Service supplies many recorded programmes to other radio stations.

World Service in English, 24 hours a day, directed to all parts of the world, and with additional streams of programmes specially designated for audiences in Africa and South Asia at appropriate peak listening times.

African Service, which broadcasts in Swahili, Somali and Hausa.

Arabic Service, on the air for 9 hours a day to Middle East and North Africa.

Eastern Service, which broadcasts in Bengali, Burmese, Hindi, Nepali, Pashto, Persian, Tamil and Urdu.

Far Eastern Service, in Chinese (Cantonese and Mandarin), Indonesian, Japanese, Malay, Thai and Vietnamese.

Latin American Service, in Spanish and Portuguese.

French and Portuguese Service, directed to Europe and Africa.

German Service, directed to West and East Germany, Austria, and German-speaking Switzerland.

Central European Service, in Czech and Slovak, Hungarian, Polish and Finnish.

Russian Service, on the air for 6½ hours a day in Russia to the U.S.S.R.

South-East European Service, in Bulgarian, Romanian, Serbo-Croat, Slovene, Greek and Turkish.

Topical Tapes provides a variety of programmes on tape for overseas radio stations and produces the twice-weekly 'Calling the Falklands' programme.

BBC English by Radio and Television teaches English to learners outside Britain through radio, television and a wide range of published courses.

Transcription Service produces and sells to overseas radio stations recorded programmes drawn from the whole range of BBC Radio.

Monitoring Service provides regional summaries and teleprinted news service from the output of overseas radio stations.

SERVICES SOUND AND VISION CORPORATION (Incorporating B.F.B.S.)

Chalfont Grove, Gerrards Cross, Bucks. SL9 8TN
[02407-4461]

The Services Sound and Vision Corporation (S.S.V.C.) is the official organization providing the Ministry of Defence, H.M. Forces and their families with radio and television broadcasting, audio-visual and electronic training and educational support, training film production, and entertainment. The S.S.V.C. is a private limited company and registered charity with 1,100 employees and an annual turnover approaching £40 million; financial surpluses are donated to Services' welfare.

The Corporation's radio arm (British Forces Broadcasting Service) operates stations in London, Germany, Gibraltar, Cyprus, the Falklands, Hong Kong, Brunei and Belize. B.F.B.S. provides programmes from London for inclusion with local input by its overseas staff, and broadcasts to overseas stations by satellite throughout the year. Cassettes are provided for H.M. Ships at sea.

S.S.V.C. television broadcasts its own, B.B.C. and I.T.V. programmes in Germany, Cyprus and the Falkland Islands. Up to 50 isolated detachments of H.M. Forces (including ships at sea and the Service Children's Education Authority schools overseas), receive daily T.V. programmes on cassette.

In-flight films on R.A.F. long-haul passenger services are organized by S.S.V.C., and Combined Services Entertainment provides stage shows to such isolated garrisons and units as the Falklands and Ascension Islands. S.S.V.C. also operates cinemas around the world.

Audio-visual rentals and sales are provided through S.S.V.C.'s Sound and Vision Centre shops in Germany and at home.

Training films for the three Armed Services are produced, distributed to units and sold to other governments by S.S.V.C., which has its own crews and studios. Audio-visual and electronic training and educational equipment is assessed, issued to British Forces' units, and maintained by S.S.V.C. staff.

All S.S.V.C. services are available to other organizations and are provided to overseas governments and many U.K. companies.

Managing Director, S.S.V.C., A. Protheroe, M.B.E., T.D.

THE BROADCASTING COMPLAINTS COMMISSION

Grosvenor Gardens House, 35-37 Grosvenor Gardens, SW1W 0BS
[01-630 1966]

The Broadcasting Complaints Commission's function and authority derive from the Broadcasting Act 1981 and the Cable and Broadcasting Act 1984. Their task is to consider and adjudicate upon complaints of unjust or unfair treatment in sound or television programmes broadcast by the B.B.C. or the I.B.A. on or after June 1, 1981; or upon complaints of unjust or unfair treatment in programmes included in a licensed cable programme service on or after January 1, 1985 otherwise than by the reception and immediate re-transmission of broadcasts made by a broadcasting body; or upon complaints of unwarranted infringement of privacy in, or in connection with the

obtaining of material included in such programmes. This function extends to all sound, television and cable programmes, including advertisements and teletext transmissions and programmes broadcast by the B.B.C.'s World Services.

The Members of the Commission are appointed by the Home Secretary.

Chairman, Lady Anglesey, D.B.E.
Members, T. Christopher, C.B.E.; D. Holmes; H. M. Johnston, C.B.; Mrs. B. Wells.
Legal Adviser, Sir Basil Hall, K.C.B., M.C., T.D.
Secretary, R. D. Hewlett.

PRINCIPAL BOOK PUBLISHERS AND THEIR ADDRESSES

More than 10,000 firms, individuals and societies have published one or more books in recent years. The list which follows is a selective one comprising, in the main, those firms whose names are most familiar to the general public. An interleaved list, *Publishers in the United Kingdom and Their Addresses*, containing some 2,000 names and addresses is issued annually in April by the publishers of *Whitaker's Almanack*.

- Abelard-Schumann, 7 Leicester Place, WC2H 7BP.

SYMBOLS FOR CORRECTING PROOFS

Supplied by WILLIAM CLOWES LTD, Beccles, Suffolk, printers of "WHITAKER'S ALMANACK"

Letter(s) or word(s) requiring alteration should be struck through IN INK in the text and the substitution should be written in the nearest margin followed by / (the symbol used to denote that the marginal mark is concluded). Insertions should be indicated by / or ^ at the conclusion of the marginal mark and at the desired place in the text.

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Delete (take out)	9 or 9	/ or Vertical stroke to delete one or two letters; horizontal line to delete more	Take letter(s) or word(s) from beginning of one line to end of preceding line	(back) or (take back)	██████████
Delete and close up	9 or 9	▀ Strike out letter(s) not required and add "close up" mark above and below	Begin a new paragraph	n.p. run on	█ before first word of new paragraph between paras. or other matter
Close up: delete space between letters	○	○ linking letters or words	No new para. here or run on previous matter with later matter	spell out	encircle, words, etc., or figures concerned
Use ligature (fi, fl, ffi, etc.) or diphthong (æ, œ)	○ enclosing ligature or diphthong required	○ enclosing letters to be altered	Spell out in full the abbreviation, contraction, or figure	out - see copy	↙ Attach the relevant copy to the proof, indicating omitted portion
Insert space between letters or words	#	▀	Insert omitted portion of copy	out - see copy	↙
Leave as printed (i.e. ■ cancellation of previous marking)	stet under letter(s) or word(s) crossed out but to be retained	Inserted or substituted letter(s), figure(s), or sign(s) under which this is placed to be superscript (i.e. high alignment) ¹	7 (see footnote)	for insertions For substitutions encircle letter(s), figure(s), or sign(s) to be altered
Invert type (of letter(s) upside down)	○	Encircle letter(s) to be altered	Inserted or substituted letter(s), figure(s), or sign(s) over which this is placed to be subscript (low alignment) ²	7 (see footnote)	↖ for insertions For substitutions encircle letter(s), figure(s), etc., to be altered
"Battered" letter(s) to be replaced by similar but undamaged characters	X	Encircle letter(s) or word(s) to be replaced and write the correct letter(s) in the margin	Change to lower case	l.c.	Encircle letter(s) to be altered
Push down space or "high" letter(s) or word(s)	—	Encircle space, letter(s), or word(s) affected	Replace "wrong fount" by letter(s) of correct fount	w.f.	Encircle letter(s) or word(s) to be altered
Transpose	tr. or trs.	▀ between letters or words, numbered when necessary	Change to capital letters	caps.	= under letter(s) or word(s) to be altered
Take letter(s) or word(s) from end of one line to beginning of next line	(take over) or (over)	██████████	Change to small capitals	s.c.	= under letter(s) or word(s) to be altered

Y indicates ■ superior (superscript) figure one

7 indicates an inferior (subscript) figure two

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Use capital letters for initial letter(s) (as desired) and small capitals for rest of word(s)	<i>caps</i> <i>S.C.</i>	under initial letter(s) and under the remainder of the word(s)	Move lines to the left	[]	at right side of group of lines to be moved (indicating approx. position)
Change to bold type	<i>bold</i>	wavy line under letter(s) or word(s) to be altered	Move portion of matter so that it is positioned as indicated	[]	at limits of required position
Change to roman type	<i>rom.</i>	Encircle letter(s) or word(s) to be altered	Raise lines	<i>raise</i>	over lines to be raised
Change to italic type	<i>italic</i>	Draw this straight line under letter(s) or word(s) to be altered	Lower lines	<i>lower</i>	under lines to be lowered
Letter(s) or word(s) to be underlined	<i>underline</i>	under letter(s), word(s), etc., to be underlined	Correct the vertical alignment		
Equalize space between words	<i>eq. #</i>	between words	Straighten lines	==	through lines to be straightened
Reduce space	<i>less #</i>	between words	Insert parentheses (round-shaped brackets)	(/) or (/) / ^	^ ^
Space to be inserted between lines or paragraphs	# >	Amount of space should be indicated	Insert [square] brackets	[/] or [/] / ^	^ ^
To be placed in centre of line, etc.	<i>centre</i>	Position to be indicated by	Insert hyphen	- /	^
Indent one em (approx. space occupied by n of type in use)	em	indicating approximate position	Insert en (= half-em) rule (see above)	en /	^
Indent one em (approx. space occupied by M of type in use)	em	Ditto	Insert one-em rule (see above)	em /	^
Indent two ems (approx. space occupied by MM of type in use)	em em	Ditto	Insert two-em rule (see above)	2em /	^
Move to the left	↘ ↗	Ditto	Insert apostrophe	' /	^
Move to the right	↗ ↘	Ditto	Insert single quotation marks	' ' /	^ ^
Move lines to the right	↗ ↗	at left side of group of lines to be moved (indicating approx. position)	Insert double quotation marks	" " /	^ ^
Punctuation	,	/	Insert ellipsis	... /	^
	;	:	Insert leader (visual guide to alignment in contents pages, etc.)	...	(three, two, or one dot)
	?	?	Insert oblique stroke	/	^
	!	!

THE CIVIC TRUST

17 Carlton House Terrace, SW1Y 5AW
[01-930 0914]

The Civic Trust, founded in 1957, is a registered charity whose object is to stimulate interest in, and action for, the improvement of the environment throughout the U.K. The Trust is supported by voluntary contributions. It works in close co-operation with over a 1,000 local amenity societies. It acts as a spokesman on issues of national concern.

The Trust is regularly consulted by Government about new legislation concerning the environment. (It inspired the Civic Amenities Act, 1967 which created Conservation Areas.)

On behalf of the Department of the Environment, the Trust runs the Civic Trust Education Group which aims to stimulate environmental education at all levels, particularly in schools. The Trust is also a founder member of the Government's UK2000 initiative. It organizes National Environment Week each year.

There are Associate Trusts in the North East and North West of England, in Scotland and in Wales. *Director*, M. C. Bradshaw.

NATIONAL TRUST

36 Queen Anne's Gate, SW1H 9AS
[01-222 9251]

The National Trust was founded in 1895 by Miss Octavia Hill, Sir Robert Hunter and Canon Rawnsley, their object being to preserve as much as possible the history and beauty of their country for its people. It became an organization incorporated by Act of Parliament (1907) to ensure the preservation of lands and buildings of historic interest or natural beauty for public access and benefit. It is independent of the state and relies on the voluntary support of private individuals for working funds. The Trust has now some 1,660,151 members paying an annual subscription. Rents, admission fees, legacies and gifts are other important sources of support and income.

The Trust owns 554,000 acres and holds protection covenants over a further 77,000 acres, some in the National Parks. The Trust also owns and opens to

the public some 297 country houses, other buildings and gardens and preserves villages, nature reserves, archaeological sites and many farms. Through Enterprise Neptune, launched 1965, the Trust now protects 500 miles of coastline.

The policy of the Trust is determined by the governing body, the Council. Half of its members are appointed by national institutions, such as the British Museum, the National Gallery, the Ramblers' Association and the Royal Horticultural Society; the other half are elected by Trust members at the annual general meeting. The Council appoints the Executive Committee, which in turn has established Regional Committees responsible for the management of the Trust's properties.

Chairman, Dame Jennifer Jenkins.
Director General, A. Stirling.

NATIONAL TRUST FOR SCOTLAND

5 Charlotte Square, Edinburgh EH2 4DU

The National Trust for Scotland was founded in 1931, and its objects are similar to those of the National Trust. Like that organization, it is incorporated by Act of Parliament and is dependent for finance upon legacies, donations and the subscriptions of its members.

The Trust administers over 100 properties covering some 100,000 acres. These include several noteworthy gardens, some associated with the great houses.

Among the mountainous country owned by the Trust is the Pass of Glen Coe and the mountain group "The Five Sisters of Kintail" and the estate of Torridon in Wester Ross, and Ben Lomond.

Islands in the Trust's care include the St. Kilda group, Staffa, Fair Isle, Iona and Canna (St. Kilda was designated by UNESCO in 1987 as Scotland's first World Heritage site). At Bannockburn, Killiecrankie, Glenfinnan and Culloden, the Trust owns sites associated with Scottish history.

The Trust also administers the Little Houses Improvement Scheme, under which properties are bought, restored and re-sold. Since its inception over 200 houses reflecting the vernacular architecture of Scotland have been restored throughout the country.

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The alphabetical list below represents some of the principal charitable bequests from Wills published since the last edition. The exact amounts available for charities are not known, ■ prior bequests, testamentary expenses and tax are all deductible from the net figures given, and, in some cases, there are prior life interests in the income from estates.

This year no less than 45 estates have ■ net value of over £1 million. The largest estate to be proved in England and Wales was that of Dorothy de Rothschild, head of the Rothschild charities in Israel, who left over £92 million. This estate does not appear on the list, as her Will did not contain any charitable legacies ■ such. However she left £20 million to follow a trust made in 1984, and it is understood that the bulk of her estate, which she left to her four executors, will go to charity.

Three other very large estates are included on the list. Eva Borthwick-Norton, of Purbrook Heath, Hants., left over £23 million, with the residue left equally between the Little Sisters of the Poor at Leeds and the Pasteur Institute in Paris. Another Hampshire woman, Esme Edgar of Newton Valence Place, near Alton, left over £14 million, with the sale proceeds of her home and its estate left between eight charities, while Londoner Leopold Muller left the residue of his £19 million estate for such charitable purposes in England as his executors selected.

The largest estate to be left entirely to charity was that of Doris Field of Headington, Oxford, who left all her £2,688,511 estate for such charities as her executors thought fit. Dorothy Collins of Beaconsfield, Bucks., who had been secretary to G. K. Chesterton, left a portrait of the author as ■ child to the National Portrait Gallery, and the residue, including copyrights and literary material to which she was entitled under the author's Will, for such charitable purposes as her executors decided.

Trinity Hall, Cambridge, received the residue of the £1 million estate of Walter Christie of Canewdon, Essex, while three Oxford colleges appear on the list—Oriel College, sharing the residue of the £1 million estate of Alan Judd of London with the Woodland Trust; Green College, receiving half the residue of the £656,702 estate of Professor Cochrane, the epidemiologist and Professor at the Welsh National School of Medicine; and Somerville College, receiving the residue of the £509,200 estate of Marjorie Ball of London Colney, Herts. Fritz Strauss left £200,000 to Oxford University.

Many estates in the list included bequests for the elderly. Frank Mustchin of Arundel, directed that the residue of his £708,281 estate be used to provide "good housing for the elderly, preferably needy inhabitants residing within ■ three-mile radius of Arundel Town Square". Edith Tracy of Farnham Common, Bucks., left most of her £736,525 estate to form the Tracy Trust, to benefit senior citizens and pensioners in nearby Hedgerley. The Quaker Housing Trust received nearly all the £632,764 estate of Meta Bendix of Warlingham, Surrey, for a housing project for the elderly and needy in and around Croydon.

Three prominent sportsmen appear on the list. Capt. James Norris, the former National Hunt trainer, left over £4 million, including bequests of £200,000 each to the Institute of Cancer Research and to Stoke Mandeville Hospital. Gerald Micklem, the golfer and former Walker Cup captain, left 10 per cent of the residue of his £3 million estate to the Gerald Micklem Charitable Trust, and Major-General Eric Harrison, the former Olympic hurdler and rugby wing-three-quarter, left the residue of his £68,476 estate to the Royal Artillery Charitable Fund. The Rev. Dr. Bertrand Brasnett, a former

Principal of Edinburgh Theological College, left the bulk of his £788,563 estate to the N.S.P.C.C., and Camilla Hole, formerly the widow of the conductor and composer Constant Lambert, left two thirds of the residue of her £701,752 estate for an annual prize for the most promising student at the Royal College of Music.

Other interesting bequests not appearing on the list include the £309,596 estate of Princess Pauline Melikoff, which she left mostly to Greenpeace. Irene Handl, the well known comic actress, left most of her £369,846 estate to a number of charities, including the Cinema and Television Benevolent Fund and the Actors Benevolent Fund. Former Conservative M.P. Sir Brandon Rhys Williams, who had also been M.E.P. for London South East, left £20,000 to the British Section of the European League for Economic Cooperation, to promote European integration and the eventual adoption of a single currency for Europe. Lord Chelwood, former Conservative M.P. for Lewes, left a sufficient sum to his executors for the total cost of an hour-long concert at St. Margaret's, Westminster, by the Academy of St. Martin-in-the-Fields.

Arthur James Henry Ashby, of Loughton, Essex	£1,895,430
(The residue for charity as directed by memorandum, otherwise ■ his executor thinks fit)	
Irene Dora Atkins, of Adderbury, Banbury, Oxon.	£1,482,314
(Four twentythirds of the residue to St. Joseph's Hospice, London E8, two twentythirds of the residue each to the P.D.S.A., Cat Protection League and National Advertising Benevolent Society, and one twentythird of the residue each to St. Mary's Church, Adderbury, and the R.S.P.C.A.)	
Marjorie Ball, of London Colney, Herts.	£509,200
(The residue to Somerville College, Oxford)	
Harold Langley Bedforth, of Kings Langley, Herts.	£746,635
(The residue to form the Fountain Trust, for the benefit of people suffering from mental or physical illness)	
Meta Bendix, of Warlingham, Surrey	£632,764
(The residue to the Quaker Housing Trust, for any project for the elderly and needy in and around Croydon)	
Alfred Douglas Dalziel Benson, of Mount Street, London W1	£1,563,892
(The residue equally between the Imperial Cancer Research Fund, N.S.P.C.C., R.S.P.C.A., Distressed Gentlefolk's Aid Association, R.N.I.B. and Marie Curie Memorial Foundation)	
Alfred Woodroffe Benton, of High Street, London E11	£2,583,805
(The residue for any charitable trust made in his lifetime, or as his executors appoint)	
Reginald Clement Biddle, of Worthing, West Sussex	£725,033
(The residue to the R.S.P.C.A.)	
Mrs. Margaret Florence Scott Blair, of Ifley, Oxon.	£539,529
(The residue equally between Quaker Peace and Service, the Community of St. Mary the Virgin, Wantage, and the Parochial Church Council on whose electoral roll she be at her death)	
Mrs. Christine Florence Boning, of Sevenoaks, Kent	£504,191
(The residue equally between the R.N.L.I. and the British Diabetic Association Research Fund)	
Mrs. Eva Sardinia Borthwick-Norton, of Purbrook Heath, Hants.	£23,652,039
(The residue equally between the Little Sisters	

of the Poor, Leeds, and the Pasteur Institute, Paris)	
Mrs. Louisa Bow, of Sherborne, Dorset	£895,032
(Nine tenths of the residue to the British Red Cross Society and one tenth of the residue to the Irish Red Cross Society)	
Rev. Dr. Bertrand Rippington Brasnett, of Marston, Oxon.	£788,563
(The residue to the N.S.P.C.C.)	
Marjorie Broadbent, of Grange-over-Sands, Cumbria	£509,801
(Two thirds of the residue to the Countryside Commission, and one third of the residue to the National Trust)	
Frederick Gordon Browning, of Draycott Road, London E11	£897,864
(£4,000 and one quarter of the residue to the Parish of St. Mary with Christchurch, Wanstead, E11, and one quarter of the residue each to Chigwell School, the Additional Curates Society and U.S.P.G.)	
Mrs. Joan Mary Bull, of Harwell, Oxon.	£573,360
(One third of the residue to the Leukaemia Research Fund and one sixth of the residue each to Barnardo's, Christian Aid, Help the Aged Housing Association, Oxford, and St. Luke's Home, Oxford)	
Sidney Lewis Callaway, of Rainham, Kent	£1,451,585
(One ninth of the residue each to the Kent Association for the Blind, R.N.L.I., Arthritis and Rheumatism Council, British Heart Foundation, Salvation Army, Police Dependents Trust, and the Royal Star and Garter Home, Richmond, Surrey)	
Walter Garnet Christie, of Canewdon, Essex	£1,016,496
(The residue to Trinity Hall, Cambridge)	
Charles Hartley Clark, of Fordingbridge, Hants	£484,389
(The residue to the British Field Sports Society)	
James Basil William Whitmore Clark, of Horley, Surrey	£984,500
(The residue equally between the R.S.P.C.A., Cancer Research Campaign and Barnardo's)	
Miss Lily Annie Clark, of Watford, Herts.	£2,292,312
(£50,000 and 10 per cent of the residue each to British Israel Bible Truth, Felixstowe, and Covenant People's Fellowship, Woodford Green, 10 per cent of the residue to the Salvation Army and 5 per cent of the residue to the Samaritans)	
Miss Cora Augusta Evelyn Fritzweide Coates, of Elvington, North Yorks.	£715,161
(One fourteenth of the residue each to Barnardo's, National Children's Home, R.N.I.B., R.S.P.C.A., R.N.L.I., Salvation Army, P.D.S.A., Donkey Sanctuary, Sidmouth, and the Children's Society)	
Prof. Archibald Leman Cochrane, C.B.E., of Rhoose, South Glamorgan	£656,702
(Half the residue to Oxford University, for Green College)	
Miss Dorothy Edith Collins, of Beaconsfield, Bucks.	£962,682
(The residue, including certain property under the Will of G. K. Chesterton, for charitable purposes as her executors decide)	
Mrs. Lily Irene Collins, of Stratford-upon-Avon, Warwickshire	£734,672
(Three quarters of the residue to the Imperial Cancer Research Fund)	
Harold Francis Graham Dalston, of Emmer Green, Reading, Berks.	£816,237
(£300,000 for a charitable educational trust, and the residue to St. Dunstan's)	
Dr. Walter Dysart Dick, of Cheadle Hulme, Greater Manchester	£656,520
	(£4,000 and one fifth of the residue to the National Library for the Blind, and one fifth of the residue each to the R.N.L.I., National Society for Mentally Handicapped Children, Barnardo's and the British Heart Foundation)
Lady (Sheila) Douglas-Pennant, of Winchester, Hants	£1,050,682
(£200,000 to the National Trust, for Enterprise Neptune)	
Mrs. Esma Sophie Edgar, of Newton Valence Place, Hants	£14,604,545
(The sale proceeds of Newton Valence Place and its estate to be distributed as her executors determine between Help the Aged, P.D.S.A., St. John Ambulance, National Trust, Royal Free Hospital, Guide Dogs for the Blind Association, Barnardo's, and the Cheshire Foundation, for the Le Court Home, Greatham)	
Frank Farey, of Girton, Cambs.	£1,665,341

(The residue equally between Age Concern England, National Society for Cancer Relief, British Kidney Patient Association, British Heart Foundation, R.S.P.C.A., and Arthritis and Rheumatism Council)	

THE PRESS COUNCIL

1 Salisbury Square, EC4Y 8AE
[01-353 1248]

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. This constitution was materially amended in 1963 by the introduction of an independent chairman and up to 20 per cent lay membership. In 1973, the Council was increased to 30 (excluding the Chairman) of whom one-third were lay members. Following a recommendation of the third Royal Commission on the Press made in 1977, the size of the Council was increased in 1978 to 36 (excluding the Chairman) of which half are press members and half non-press members. The objects of the Council are (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to consider complaints about the conduct of the Press or the conduct of persons and organizations towards the Press; to deal with these complaints in whatever manner might seem practical and appropriate and record resultant action; (4) to keep under review developments likely to restrict the supply of information of public interest

and importance; (5) to report publicly on developments that may tend towards greater concentration or monopoly in the Press (including changes in ownership, control and growth of Press undertakings) and to publish statistical information relating thereto; (6) to make representations on appropriate occasions to the Government, organs of the United Nations and Press organizations abroad; and (7) to publish periodical reports recording the Council's work and to review, from time to time, developments in the Press and the factors affecting them.

The constitution of the Council provides for 18 Press members who are editorial and managerial nominees of The Newspaper Publishers Association Ltd. (3), The Newspaper Society (3), The Periodical Publishers Association Ltd. (2), The Scottish Daily Newspaper Society (1), Scottish Newspaper Proprietors' Association (1), The Guild of British Newspaper Editors (2), The National Union of Journalists (4), The Institute of Journalists (2) plus 18 public members appointed by the Press Council Appointments Commission. In addition each constituent body nominates one official as a non-voting member. In 1989 the Press Council embarked on a general review of its role and function.

*Chairman, L. Blom-Cooper, Q.C.
Director, K. Morgan, O.B.E.*

CONFEDERATION OF BRITISH INDUSTRY

Centre Point, 103 New Oxford Street, WC1A 1DU
[01-379 7400]

The Confederation of British Industry was founded in August 1965 and is an independent non-party political body financed by industry and commerce. It exists primarily to ensure that the Government understands the intentions, needs and problems of British business. It is the recognized spokesman for the business viewpoint and is consulted as such by the Government.

The C.B.I. represents, directly and indirectly, some 250,000 companies. All the major nationalized industries are in membership and thereby able to work with the C.B.I. on problems that are the concern of all management.

The governing body of the C.B.I. is the 400-strong Council, which meets monthly in London under the chairmanship of the President. It is assisted by some 27 expert standing committees which advise on the main aspects of policy. There are 13 Regional Councils and offices covering the administrative regions of England, Wales, Scotland and Northern Ireland.

*President, Sir Trevor Holdsworth.
Director-General, J. Banham.
Secretary, M. W. Hunt.*

NATIONAL ASSOCIATION OF INDUSTRIES FOR THE BLIND AND DISABLED INC.

Triton House, 43A High Street South,
Dunstable, Beds. LU6 3RZ
[0582-606796]

The National Association of Industries for the Blind and Disabled Inc. was established in 1929 and incorporated in 1936; it is registered as charity.

The Association acts in the nature of a trade association providing facilities for consultation and co-operation between its members who operate workshops employing blind and disabled people. It represents their interests in discussions with, and

representations to, other organizations (e.g. government departments and local authorities) concerned with sheltered employment. It does not own or operate any of the workshops, which are run by local authorities or voluntary organizations acting as their agents.

*Chairman (1989-90), A. L. Soper.
Hon. Secretary, G. J. Entwistle.*

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23-28 Great Russell Street, WC1B 3LS
[01-636-4030]

The Trades Union Congress, founded in 1868, is a voluntary association of trade unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1988-89) totalled 78 with an aggregate membership of 8,652,318 (women's membership, 2,799,263).

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization.

The standing committees of the General Council are serviced by a full time staff appointed by the General Secretary, who is himself elected by Congress and who remains in office until the age of 65, subject to decision of Congress or the General Council.

Through the General Council and its committees the trade union movement maintains systematic relations with the Government and government departments, with the Confederation of British Industry and with a large number of other bodies. It is represented on the National Economic Development Council, the Health and Safety Commission, the council of the Advisory Conciliation and Arbitration Service and a number of other bodies.

Among powers vested in the General Council by consent of the unions in Congress is the responsibility of intervening in disputes and differences between

affiliated organizations; if possible this is done through informal conciliation meetings under T.U.C. auspices but where necessary a Disputes Committee is formed consisting of one member of the General Council and two senior officials of unions not involved in the dispute. This investigates the matter concerned and issues its findings.

Unions retain full control of their own affairs and the only sanctions which Congress can apply are suspension or exclusion from membership.

Chairman (1989-90), Miss A. Maddocks, O.B.E. (National and Local Government Officers' Association.) General Secretary, N. D. Willis.

SCOTTISH TRADES UNION CONGRESS
16 Woodlands Terrace, Glasgow G3 6DF

[041-332 4946]

The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1989 it consisted of 58 unions with a membership of 885,317 and 49 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland.

The Annual Congress in April elects a 26-member General Council on the basis of 13 industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.

*Chairperson G. Bolton.
General Secretary, C. Christie.*

TRADES UNIONS AFFILIATED TO T.U.C.

A list of the Trades Unions affiliated to the Trades Union Congress at Sept. 1, 1989. The number of members of each Union is shown in parenthesis.

CONFEDERATION OF HEALTH SERVICE EMPLOYEES (C.O.H.S.E.) (220,000), Glen House, High Street, Banstead, Surrey SM7 2LH.—*Gen. Sec.*, H. MacKenzie.

EDUCATIONAL INSTITUTE OF SCOTLAND, THE (45,000), 46 Moray Place, Edinburgh EH3 6BH.—*Gen. Sec.*, J. B. Martin.

ENGINEERING AND FASTENERS TRADE UNION (400), 434 Bearwood Road, Smethwick, Warley, W. Midlands.—*Gen. Sec.*, W. J. Redmond.

ENGINEERS' AND MANAGERS' ASSOCIATION (42,000), Station House, Fox Lane North, Chertsey, Surrey KT16 9HW.—*Gen. Sec.*, J. Lyons, C.B.E.

FILM ARTISTES' ASSOCIATION (2,094), 61 Marloes Road, W8 6LE.—*Sec.*, M. Reynel.

FIRE BRIGADES UNION, THE (45,683), Bradley House, 68 Coombe Road, Kingston upon Thames, Surrey KT2 7AE.—*Gen. Sec.*, K. Cameron.

FURNITURE, TIMBER AND ALLIED TRADES UNION (46,096), Fairfields, Roe Green, Kingsbury, NW9 0PT.—*Gen. Sec.*, C. A. Christopher.

GENERAL UNION OF ASSOCIATIONS OF LOOM OVERLOOKERS, THE (1,101), Overlookers Institute, Jude Street, Nelson, Lancs. BB9 7NP.—*Pres.*, E. Macro.

G.M.B. (formerly GENERAL, MUNICIPAL, BOILERMAKERS AND ALLIED TRADES UNION) (800,000), Thorne House, Claygate, Esher, Surrey KT10 0TL.—*Gen. Sec.*, J. Edmonds.

HEALTH VISITORS' ASSOCIATION (17,000), 50 Southwark Street, SE1 1UN.—*Gen. Sec.*, Ms. S. Goodwin.

HOSPITAL CONSULTANTS AND SPECIALISTS ASSOCIATION, THE (2,400), The Old Court House, London Road, Ascot, Berks. SL5 7EN.—*Chief Exec.*, S. J. Charkham.

INLAND REVENUE STAFF FEDERATION (52,972), Douglas Houghton House, 231 Vauxhall Bridge Road, SW1V 1EH.—*Gen. Sec.*, C. Brooke.

INSTITUTION OF PROFESSIONALS, MANAGERS AND SPECIALISTS (90,341), 75–79 York Road, SE1 7AQ.—*Gen. Sec.*, B. Brett.

IRON AND STEEL TRADES CONFEDERATION, THE (41,679), Swinton House, 324 Gray's Inn Road, WC1X 8DD.—*Gen. Sec.*, R. L. Evans.

MANUFACTURING, SCIENCE AND FINANCE UNION (653,000), 79 Camden Road, NW1 9ES.—*Gen. Sec.*, K. Gill.

MILITARY AND ORCHESTRAL MUSICAL INSTRUMENT MAKERS' TRADE SOCIETY (35), 2 Whitehouse Avenue, Boreham Wood, Herts. WD6 1HD.—*Gen. Sec.*, F. McKenzie.

MUSICIANS' UNION (41,150), 60–62 Clapham Road, SW9 0JJ.—*Gen. Sec.*, J. Morton.

NATIONAL AND LOCAL GOVERNMENT OFFICERS' ASSOCIATION (N.A.L.G.O.) (754,701), 1 Mabledon Place, WC1H 9AJ.—*Gen. Sec.*, J. D. Daly.

NATIONAL ASSOCIATION OF COLLIERY OVERMEN, DEPUTIES AND SHOTFIRERS (8,635), Simpson House, 48 Nether Hall Road, Doncaster DN1 2PZ.—*Sec.*, P. McNestry.

NATIONAL ASSOCIATION OF CO-OPERATIVE OFFICIALS (4,479), Coronation House, Arndale Centre, Manchester M4 2HW.—*Gen. Sec.*, L. W. Ewing.

NATIONAL ASSOCIATION OF LICENSED HOUSE MANAGERS (11,851), 9 Coombe Lane, Raynes Park, SW20 8NE.—*Gen. Sec.*, J. Madden.

NATIONAL ASSOCIATION OF PROBATION OFFICERS (6,447), 3–4 Chivalry Road, SW11 1HT.—*Sec.*, W. L. Beaumont.

NATIONAL ASSOCIATION OF SCHOOLMASTERS/UNION OF WOMEN TEACHERS (N.A.S./U.W.T.) (166,000), Hills-court Education Centre, Rose Hill, Rednal, Birmingham B45 8RS.—*Gen. Sec.*, F. A. Smithies.

NATIONAL ASSOCIATION OF TEACHERS IN FURTHER AND HIGHER EDUCATION (82,000), 27 Britannia Street, WC1X 9JP.—*Gen. Sec.*, G. Woolf.

NATIONAL COMMUNICATIONS UNION (152,000), Greystoke House, 150 Brunswick Road, W5 1AW.—*Gen. Sec.*, A. I. Young.

NATIONAL GRAPHICAL ASSOCIATION 1982 (N.G.A.'82) (125,000), Graphic House, 63–67 Bromham Road, Bedford MK40 2AG.—*Sec.*, A. D. Dubbins.

NATIONAL LEAGUE OF THE BLIND AND DISABLED, THE (2,784), 2 Tenterden Road, N17 8BE.—*Sec.*, M. A. Barrett.

NATIONAL UNION OF CIVIL AND PUBLIC SERVANTS (N.U.C.P.S.) (125,000), 124–130 Southwark Street, SE1 0TU.—*Gen. Sec.*, L. Christie.

NATIONAL UNION OF DOMESTIC APPLIANCES AND GENERAL OPERATIVES, THE (3,100), 6–8 Imperial Buildings, Corporation Street, Rotherham, S. Yorks. S60 1PB.—*Gen. Sec.*, A. McCarthy.

NATIONAL UNION OF HOSEYER AND KNITWEAR WORKERS, THE (43,526), 55 New Walk, Leicester LE1 7EB.—*Gen. Sec.*, Mrs. H. F. McGrath.

NATIONAL UNION OF INSURANCE WORKERS (17,517), 27 Old Gloucester Street, WC1N 3AF.—*Gen. Sec.*, K. Perry.

NATIONAL UNION OF JOURNALISTS (N.U.J.) (32,206), Acorn House, 314–320 Gray's Inn Road, WC1X 8DP.—*Gen. Sec.*, H. Conroy.

NATIONAL UNION OF LOCK AND METAL WORKERS (5,295), Bellamy House, Wilkes Street, Willenhall, West Midlands WV13 2BS.—*Gen. Sec.*, M. Bradley.

NATIONAL UNION OF MARINE, AVIATION AND SHIPPING TRANSPORT OFFICERS, THE (19,345), Oceanair House, 750–760 High Road, E11 3BB.—*Gen. Sec.*, J. Newman.

NATIONAL UNION OF MINEWORKERS (N.U.M.) (70,000), St. James' House, Vicar Lane, Sheffield S1 2EX.—*Sec.*, P. E. Heathfield.

NATIONAL UNION OF PUBLIC EMPLOYEES (N.U.P.E.) (635,000), Civic House, 20 Grand Depot Road, SE18 6SF.—*Sec.*, R. K. Bickerstaffe.

NATIONAL UNION OF RAILWAYMEN (N.U.R.) (110,000), Unity House, Euston Road, NW1 2BL.—*Gen. Sec.*, J. Knapp.

NATIONAL UNION OF SCALEMAKERS (882), Queensway House, 57 Livery Street, Birmingham B3 1HA.—*Gen. Sec.*, A. F. Smith.

NATIONAL UNION OF SEAMEN (N.U.S.) (20,000), Maritime House, Old Town, SW4 0JP.—*Gen. Sec.*, S. J. McCluskie.

NATIONAL UNION OF TAILORS AND GARMENT WORKERS (76,000), 16 Charles Square, N1 6HP.—*Gen. Sec.*, A. Smith.

NATIONAL UNION OF TEACHERS (N.U.T.) (216,614), Hamilton House, Mabledon Place, WC1H 9BD.—*Gen. Sec.*, D. McAvoy.

NATIONAL UNION OF THE FOOTWEAR, LEATHER AND ALLIED TRADES (31,176), The Grange, 108 Northampton Road, Earls Barton, Northampton NN6 0JH.—*Gen. Sec.*, G. F. Browett.

NORTHERN CARPET TRADES' UNION (862), 22 Clare Road, Halifax HX1 2HX.—*Gen. Sec.*, K. Edmondson.

POWER LOOM CARPET WEAVERS' AND TEXTILE WORKERS' UNION, THE (3,200), Carpet Weavers Hall, Callows Lane, Kidderminster, Worcs. DY10 2JG.—*Gen. Sec.*, B. C. Moule.

PRISON OFFICERS' ASSOCIATION, THE (23,669), Cronin House, 245 Church Street, N9 9HW.—*Gen. Sec.*, D. Evans.

RosSENDALe UNION OF BOOT, SHOE AND SLIPPER OPERATIVES, THE (2,591), Taylor House, 7 Tenterfield Street, Waterfoot, Rossendale, Lancs. BB4 7BA.—*Gen. Sec.*, M. Murray.

SCOTTISH PRISON OFFICERS' ASSOCIATION (3,804), 21 Calder Road, Edinburgh EH11 3PF.—*Gen. Sec.*, W. Goodall.

SCOTTISH UNION OF POWER-LOOM OVERLOOKERS (65), 3 Napier Terrace, Dundee, Tayside DD2 2SL.—*Sec.*, J. Reilly.

SCREW, NUT, BOLT AND RIVET TRADE UNION (now called Engineering and Fasteners Trade Union).

SHEFFIELD WOOL SHEAR WORKERS' UNION (17), 50 Bankfield Road, Malin Bridge, Sheffield S6 4RD.—*Sec.*, J. H. R. Cutler.

SOCIETY OF GRAPHICAL AND ALLIED TRADES 1982 (SOGAT '82) (179,941), Sogat House, 274-288 London Road, Hadleigh, Benfleet, Essex SS7 2DE.—*Gen. Sec.*, Ms. B. Dean.

SOCIETY OF SHUTTLEMAKERS (31), 211 Burnley Road, Colne, Lancs. BB8 8JD.—*Gen. Sec.*, L. Illingworth.

SOCIETY OF TELECOM EXECUTIVES (29,040), 1 Park Road, Teddington, Middx. TW11 0AR.—*Gen. Sec.*, S. Petch.

TECHNICAL, ADMINISTRATIVE AND SUPERVISORY SECTION (T.A.S.S.) (amalgamated with A.S.T.M.S. to form Manufacturing, Science and Finance Union).

TRANSPORT AND GENERAL WORKERS' UNION (T.G.W.U.) (1,312,853), Transport House, Smith Square, SW1P 3JB.—*Gen. Sec.*, R. Todd.

TRANSPORT SALARIED STAFFS' ASSOCIATION (40,000), Walkden House, 10 Melton Street, NW1 2EJ.—*Gen. Sec.*, R. A. Rosser.

UNION OF COMMUNICATION WORKERS, THE (204,834), U.C.W. House, Crescent Lane, SW4 9RN.—*Gen. Sec.*, A. D. Tuffin.

UNION OF CONSTRUCTION, ALLIED TRADES AND TECHNICIANS (U.C.A.T.T.) (250,000), UCATT House, 177 Abbeville Road, SW4 9RL.—*Sec.*, A. Williams.

UNION OF SHOP, DISTRIBUTIVE AND ALLIED WORKERS (U.S.D.A.W.) (400,000), Oakley, 188 Wilmslow Road, Fallowfield, Manchester M14 6LJ.—*Sec.*, D. G. Davies.

UNITED ROAD TRANSPORT UNION (21,000), 76 High Lane, Chorlton, Manchester M21 1FD.—*Gen. Sec.*, F. Griffin.

WIRE WORKERS' UNION (5,139), Prospect House, Alma Street, Sheffield S3 8SA.—*Gen. Sec.*, A. M. Ardon.

WRITERS' GUILD OF GREAT BRITAIN, THE (1,678), 430 Edgware Road, W2 1EH.—*Gen. Sec.*, W. J. Jeffrey.

YORKSHIRE ASSOCIATION OF POWER LOOM OVERLOOKERS (537), 20 Hallfield Road, Bradford BD1 3RQ.—*Gen. Sec.*, A. D. Barrow.

Expelled from the T.U.C. Sept. 1988:

ELECTRICAL, ELECTRONIC, TELECOMMUNICATION AND PLUMBING UNION (E.E.T.P.U.) (330,000), Hayes Court, West Common Road, Bromley BR2 7AU.—*Gen. Sec.*, E. A. B. Hammond, O.B.E.

INDUSTRIAL RESEARCH ASSOCIATIONS

The following are members of the Association of Independent Research and Technology Organizations (A.I.R.T.O.), P.O. Box 330, Cambridge CB5 8DQ.

AIRCRAFT RESEARCH ASSOCIATION LTD., Manton Lane, Bedford MK41 7PF.

ADVANCED MANUFACTURING TECHNOLOGY RESEARCH INSTITUTE, Hulley Road, Macclesfield, Cheshire SK10 2NE.

BCIRA INTERNATIONAL CENTRE FOR CAST METALS TECHNOLOGY, Alvechurch, Birmingham B48 7QB.

BHRA, THE FLUID ENGINEERING CENTRE, Wharley End, Cranfield, Bedford MK43 0AJ.

BICERI—THE BRITISH INTERNAL COMBUSTION ENGINE RESEARCH INSTITUTE LTD., 111-112 Birmingham Avenue, Slough SL1 4PH.

BNF METALS TECHNOLOGY CENTRE, Wantage Business Park, Denchworth Road, Wantage, Oxon. OX12 9BJ.

BRITISH CERAMIC RESEARCH LTD., Queen's Road, Penkhull, Stoke-on-Trent ST4 7LQ.

BRITISH GLASS, Northumberland Road, Sheffield S10 2UA.

BRITISH LEATHER CONFEDERATION, Leather Trade House, Kings Park Road, Moulton Park, Northants. NN3 1JD.

BRITISH MARITIME TECHNOLOGY LTD., Orlando House, 1 Waldegrave Road, Teddington, Middx. TW11 8LZ.

BRITISH TEXTILE TECHNOLOGY GROUP, Shirley Towers, Didsbury, Manchester M20 8RX; Wira House, West Park Ring Road, Leeds LS16 6QL.

BUILDING SERVICES RESEARCH AND INFORMATION ASSOCIATION, Old Bracknell Lane West, Bracknell, Berks. RG12 4AH.

CAMBRIDGE CONSULTANTS LTD. (*Product and process development of technology applications in business*), Science Park, Milton Road, Cambridge CB4 4DW.

CAMPDEN FOOD AND DRINK RESEARCH ASSOCIATION, Chipping Campden, Glos. GL55 6LD.

CIRIA (THE CONSTRUCTION INDUSTRY RESEARCH AND INFORMATION ASSOCIATION), 6 Storey's Gate, SW1P 3AU.

CUTLERY AND ALLIED TRADES RESEARCH ASSOCIATION, Henry Street, Sheffield S3 7EQ.

ERA TECHNOLOGY LTD. (*Electronic and electrical engineering*), Cleeve Road, Leatherhead, Surrey KT22 7SA.

FABRIC CARE RESEARCH ASSOCIATION, Forest House Laboratories, Knaresborough Road, Harrogate, N. Yorks. HG2 7LZ.

FULMER LTD. (*Technological product design and process development*), Hollybush Hill, Stoke Poges, Slough SL2 4QD.

FURNITURE INDUSTRY RESEARCH ASSOCIATION, Maxwell Road, Stevenage, Herts. SG1 2EW.

HATRA (HOSEIERY AND ALLIED TRADES RESEARCH ASSOCIATION), 7 Gregory Boulevard, Nottingham NG7 6LD.

HAZLETON UK (*Agro-chemical, chemical and pharmaceutical product development and safety evaluation*), Otley Road, Harrogate, N. Yorks. HG3 1PY.

HYDRAULICS RESEARCH LTD., Wallingford, Oxon. OX10 8BA.

INVERESK RESEARCH INTERNATIONAL LTD. (*Pharmaceutical, veterinary, agricultural and chemical product evaluation*), Musselburgh, Midlothian EH21 7UB.

LAMBEG INDUSTRIAL RESEARCH ASSOCIATION (*Textiles*), Lambeg, Lisburn, Co. Antrim, N. Ireland BT27 4RJ.

LEATHERHEAD FOOD RESEARCH ASSOCIATION, Randles Road, Leatherhead, Surrey KT22 7RY.

LIFE SCIENCE RESEARCH LTD., Eye, Suffolk IP23 7PX.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Watling Street, Nuneaton, Warks. CV10 0TU.

THE NATIONAL COMPUTING CENTRE LTD., Oxford Road, Manchester M1 7ED.

NEI INTERNATIONAL RESEARCH AND DEVELOPMENT COMPANY LTD. (*Electronics and mechanical and electrical engineering*), Fossway, Newcastle upon Tyne NE6 2YD.

PAINT RESEARCH ASSOCIATION, 8 Waldegrave Road, Teddington, Middx. TW11 8LD.

PERA (*Multi-disciplinary research, design, development and consultancy*), Melton Mowbray, Leics. LE13 0PB.

PIRA (*Paper and board, printing, publishing and packaging*), Randalls Road, Leatherhead, Surrey KT22 7RU.

RAPRA TECHNOLOGY LTD. (*Polymer materials*), Shawbury, Shrewsbury SY4 4NR.

RICARDO GROUP (*Consulting engineers*), Bridge Works, Shoreham-by-Sea, W. Sussex BN43 5FG.

SATRA FOOTWEAR TECHNOLOGY CENTRE, Satra House, Rockingham Road, Kettering, Northants. NN16 9JH.

SHIPOWNERS REFRIGERATED CARGO RESEARCH ASSOCIATION, 140 Newmarket Road, Cambridge CB5 8HE.

SIRA LTD. (*Instrumentation and systems technology*), South Hill, Chislehurst, Kent BR7 5EH.

SMITH ASSOCIATES LTD. (*System engineering consultancy*), Surrey Research Park, Guildford, Surrey GU2 5YP.

SPRING RESEARCH AND MANUFACTURERS' ASSOCIATION, Henry Street, Sheffield S3 7EQ.

STEEL CASTINGS RESEARCH AND TRADE ASSOCIATION, 5 East Bank Road, Sheffield S2 3PT.

TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, Stocking Lane, Hughenden Valley, High Wycombe, Bucks. HP14 4ND.

TOXICOL LABORATORIES LTD. (*Toxicology*), Bromyard Road, Ledbury, Herts. HR8 1LG.

WATER RESEARCH CENTRE, P.L.C., Henley Road, Medmenham, P.O. Box 16, Marlow, Bucks. SL7 2HD.

THE WELDING INSTITUTE, Abington Hall, Abington, Cambridge CB1 6AL.

AGRICULTURAL AND FOOD RESEARCH INSTITUTES AND UNITS

A.F.R.C. Institute for Animal Health

Director of Research: Prof. F. J. Bourne, Ph.D.,
Compton, Newbury, Berks. RG16 0NN.

Compton Laboratory, Compton, Nr. Newbury, Berks.
RG16 0NN.—*Head of Lab. (acting)*, B. Freeman,
D.Sc.

Houghton Laboratory, Houghton, Huntingdon,
Cambs. PE17 2DA.—*Head of Lab. (acting)*, L. N.
Payne, Ph.D., D.Sc.

Pirbright Laboratory, Ash Road, Woking, Surrey
GU24 0NF.—*Head of Lab. (acting)*, C. J. Bostock,
Ph.D.

AFRC and MRC Neuropathogenesis Unit, Ogston
Building, West Mains Road, Edinburgh EH9 3JF.—
Dir. (acting), J. Hope, Ph.D.

A.F.R.C. Institute of Animal Physiology and Genetics Research

Dir. of Research, R. B. Heap, Ph.D., Sc.D., F.R.S.,
Babraham Hall, Babraham, Cambridge CB2 4AT.

Cambridge Research Station, Babraham, Cambridge
CB2 4AT.—*Head of Station*, vacant.

Edinburgh Research Station, Roslin, Midlothian
EH25 9PS.—*Head of Station*, G. Bulfield, Ph.D.

Edinburgh Research Station, King's Buildings, West
Mains Road, Edinburgh EH9 3JQ.

Dryden Laboratory, Roslin, Midlothian EH25 9PS.

A.F.R.C. Institute of Arable Crops Research

Dir. of Research, Prof. K. J. Treherne, Ph.D.
Rothamsted Experimental Station, Harpenden,
Herts. AL5 2JQ.

Long Ashton Research Station, Long Ashton, Bristol
BS18 9AF.—*Dir.*, vacant.

Rothamsted Experimental Station, Harpenden, Herts.
AL5 2JQ.—*Head of Station*, Prof. T. Lewis, Ph.D.,
D.Sc.

Broom's Barn Experimental Station, Higham, Bury
St. Edmunds, Suffolk IP28 6NP.—*Head of Station*,
T. H. Thomas, Ph.D., D.Sc.

Unit of Insect Neurophysiology and Pharmacology,
Department of Zoology, University of Cambridge,
Downing Street, Cambridge CB2 3EJ.—*Hon. Dir.*,
J. E. Treherne, Ph.D., Sc.D.

A.F.R.C. Institute of Engineering Research
Director of Research, Prof. J. Matthews, Wrest Park,
Silsoe, Bedford MK45 4HS.

A.F.R.C. Institute of Food Research

Director of Research, D. L. Georgala, C.B.E., Ph.D.,
Shinfield, Reading RG2 9AT.

Bristol Laboratory, Langford, Bristol BS18 7DY.—
Head of Lab. Prof. A. J. Bailey, sc.D.

Norwich Laboratory, Colney Lane, Norwich NR4
7UA.—*Head of Lab.*, Prof. P. Richmond, D.Sc.

Reading Laboratory, Shinfield, Reading RG2 9AT.—
Head of Lab., Prof. B. E. B. Moseley, Ph.D.

A.F.R.C. Institute for Grassland and Animal Production

Director of Research, Prof. J. L. Stoddart, Ph.D., D.Sc.,
Hurley, Maidenhead, Berks. SL6 5LR.

Plant Science and Plant Breeding Division:
Welsh Plant Breeding Station, Plas Gogerddan,
Aberystwyth, Dyfed SY23 3EB.—*Dir. and Head of
Division*, D. Wilson, Ph.D.

Grassland and Ruminant Division

Hurley Research Station, Maidenhead, Berks. SL6
5LR.—*Head of Division*, R. J. Wilkins, Ph.D.

North Wyke Research Station, Okehampton, Devon
EX20 2SB.—*Officer in Charge*, R. D. Sheldrick,
O.B.E.

Pig and Poultry Division

Shinfield Research Station (Pig Dept.), Church Lane,
Shinfield, Reading RG2 9AQ.—*Deputy Head of
Division*, D. Lister, Ph.D.

Roslin Research Station (Poultry Dept.), Roslin,
Midlothian EH25 9PS.—*Head of Division*, C.
Fisher, Ph.D.

A.F.R.C. Institute of Horticultural Research

Director of Research, Prof. T. R. Swinburne, D.Sc.,
Ph.D., Bradbourne House, East Malling, Maidstone,
Kent ME19 6BJ.

I.H.R. East Malling, East Malling, Maidstone, Kent
ME19 6BJ.—*Head of Station*, C. C. Payne, Ph.D.

I.H.R. Littlehampton, Worthing Road, Littlehampton,
W. Sussex BN17 6LP.—*Head of Station*,
R. S. Fraser, Ph.D., D.Sc.

I.H.R. Wellesbourne, Wellesbourne, Warwick CV35
9EF.—*Head of Station*, H. G. Jones, Ph.D.

I.H.R. Department of Hop Research, Wye College,
Wye, Ashford, Kent TN25 5AH.—*Head of Station*,
R. E. Gunn.

A.F.R.C. Institute of Plant Science Research

Dir. of Research, Prof. H. W. Woolhouse, John Innes
Institute, Colney Lane, Norwich NR4 7UH.

John Innes Institute, Colney Lane, Norwich NR4
7UH.—*Dir.*, Prof. R. B. Flavell.

I.P.S.R. Cambridge Laboratory, Maris Lane, Trum-
pington, Cambridge CB2 2LQ.—*Head*, C. N. Law,
Ph.D.

I.P.S.R. Nitrogen Fixation Laboratory, University of
Sussex, Brighton BN1 9RQ.—*Head*, Prof. B. E.
Smith, Ph.D.

A.F.R.C. Computing Division, West Common, Har-
penden, Herts. AL5 2JE.—*Head of Division*, A.
Windram.

SCOTTISH AGRICULTURAL RESEARCH INSTITUTES

Hannah Research Institute, Ayr KA6 5HL.—*Dir.*,
Prof. M. Peaker.

Macaulay Land Use Research Institute, Craigie-
buckler, Aberdeen AB9 2QJ; Bush Estate, Pen-
cuik, Midlothian EH26 0PY.—*Dir.*, Prof. T. J.
Maxwell, Ph.D.

Moredun Research Institute, 408 Gilmerston Road,
Edinburgh EH17 7JH.—*Dir.*, I. D. Aitken, Ph.D.

Rowett Research Institute, Greenburn Road,
Bucksburn, Aberdeen AB2 9SB.—*Dir.*, Prof. W. P.
T. James.

Scottish Crop Research Institute, Invergowrie,
Dundee DD2 5DA; Pentlandfield, Roslin, Midlothian
EH25 9RF.—*Dir.*, Prof. J. Hillman, Ph.D., F.L.S.,
F.R.S.E.

Scottish Agricultural Statistics Service, University of
Edinburgh, James Clerk Maxwell Building, The
King's Buildings, Mayfield Road, Edinburgh EH9
3JZ.—*Dir.*, R. A. Kempton.

C.A.B. INTERNATIONAL

C.A.B. International (Commonwealth Agricultural Bureaux International) is an intergovernmental organization that provides information, scientific and development services to agriculture throughout the world. These services provide both developed and developing countries with ready access to scientific information and research back-up and assistance in pest identification and control.

C.A.B. International Bureaux
Wallingford, Oxon. OX10 8DE.

Institutes

C.A.B.I. Institute of Entomology, 56 Queen's Gate, SW7. Director, K. M. Harris, Ph.D.

C.A.B.I. Mycological Institute, Ferry Lane, Kew, Richmond, Surrey. Director, D. L. Hawksworth, Ph.D.

C.A.B.I. Institute of Biological Control, Silwood Park, Buckhurst Road, Ascot, Berks. SL5 7TA. Director, D. J. Greathead, Ph.D.

C.A.B.I. Institute of Parasitology, 395A Hatfield Road, St. Albans, Herts. Director, R. L. J. Muller, Ph.D.

THE QUEEN'S AWARDS FOR EXPORT AND TECHNOLOGY

The Queen's Award for Export Achievement and The Queen's Award for Technological Achievement were instituted by Royal Warrant in 1976. The two separate Awards took the place of The Queen's Award to Industry which had been instituted in 1965.

The Awards are designed to recognize and encourage outstanding achievements in exporting goods or services from the United Kingdom and in advancing process or product technology. They differ from personal Royal honour in that they are given to a unit ■ a whole—management and employees working as a team.

They may be applied for by any organization within the United Kingdom, the Channel Islands or the Isle of Man producing goods or services which meet the criteria for the Awards. Eligibility is not influenced in any way by the particular activities of the unit applying, its location, or size. Units or agencies of central and local government with industrial functions, ■ well as research associations, educational institutions and bodies of a similar character, are also eligible, provided that they can show they have contributed to industrial efficiency.

The criteria on which recommendations for the Awards are based are:

1. Export Achievement

A substantial and sustained increase in export earnings to a level which is outstanding for the products or services concerned and for the size of the applicant unit's operations. Account will be taken of any special market factors described in the application. Applicants for the Award will be expected to explain the basis of the achievement (e.g. improved marketing organization or new initiative to cater for export markets) and this will be taken into consideration. Export earnings considered will include receipts by the applicant unit in this country from the export of goods produced in this country, and the provision of services to non-residents. Account will be taken of the overseas expenses incurred other than marketing expenses. Income from profits (after overseas tax) remitted to this country from the applicant unit's direct investments in its overseas branches, subsidiaries or associates in the same general line of business will be taken into account, but not receipts from profits on other overseas investments or by interest on overseas loans or credits.

2. Technological Achievement

A significant advance, leading to increased efficiency, in the application of technology to a production or development process in British industry or the production for sale of goods which incorporate new and advanced technological qualities.

Each award is formally conferred by a Grant of Appointment and is symbolized by ■ representation of its emblem cast in stainless steel and encapsulated in a transparent acrylic block.

Awards are held for five years and holders are entitled to fly the appropriate Award flag and to display the emblem on the packaging of goods produced in this country, on the goods themselves, on the unit's stationery, in advertising and on certain articles used by employees: units may also display the emblem of any previous current Awards during the 5 years.

Awards are announced on April 21 (the actual birthday of Her Majesty the Queen) and published formally in a special supplement to the London Gazette. All enquiries about the scheme and requests for application forms—completed forms must be returned by October 31—should be made to: The

Secretary, The Queen's Awards Office, Dean Bradley House, 52 Horseferry Road, London SW1P 2AG. Telephone: 01-222 2277.

Awards for Export Achievement

In 1989, the Queen's Award for Export Achievement was conferred on the following concerns:

AEI Compounds Group of AEI Cables Ltd., Gravesend, Kent.

Airedale International Air Conditioning Ltd., Leeds. The Process Systems Division of Air Products PLC, Walton-on-Thames, Surrey.

Allen & Caswell Ltd., Kettering, Northants.

Allied Colloids Group PLC, Bradford.

The Freezer Division of A. P. V. Baker Ltd., Grimsby, S. Humberside.

Ardtaraig Salmon Ltd., Dunoon, Argyll.

Artix Ltd., Peterlee, Co. Durham.

Atlas Converting Equipment PLC Group of Companies, Kempston, Bedford.

Austin Reed International Ltd., Crewe.

Austin Rover Group Ltd., Coventry.

Basys International Ltd., London W1

Ken Bell (International) Ltd., Newcastle upon Tyne.

BHS PLC, London NW1.

BICC Data Networks Ltd., Hemel Hempstead, Herts.

BIS Banking Systems International Ltd., London SW19.

Black & Decker Power Tools Division of Black & Decker (UK), Spennymoor, Co. Durham.

Bowers Internal Gauge Co. Ltd., Bradford.

British Aerospace PLC, London WC2

British United Shoe Machinery Ltd., Leicester.

The Piano Felt Division of Bury Cooper Whitehead Ltd., Oldham.

E.A.R. Division of Cabot Safety Ltd., Stockport.

Callard & Bowser Group, t/a Smith Kendon Ltd., Bridgend, Mid Glamorgan.

Cameron Balloons Ltd., Bristol.

Carri-Med Ltd., Dorking, Surrey.

Central Independent Television PLC, Birmingham.

Chromacol Ltd., London N12.

Ciba-Geigy Pigments Division of Ciba-Geigy PLC, Paisley.

CI Caravans Ltd., Newmarket, Suffolk.

The Cobb Breeding Company Ltd., East Hanningfield, Chelmsford.

Colour Marketing Services Ltd., Ipswich.

Computer Patent Annuities, St. Helier, Jersey.

Cookson Graphics PLC, Morley, Leeds.

C. Davidson & Sons, Bucksburn, Aberdeen.

The Davy Roll Company Ltd., Sheffield.

De La Rue Systems Ltd., Havant, Hampshire.

DELTA (Distribution of English Language Teaching Aids) Ltd., Weybridge, Surrey.

Delywn Enterprises Ltd., t/a Yardmaster International, Draperstown, N. Ireland.

Dynamic Cassette International Ltd., Boston, Lincs.

ECC International (Sales) Ltd., St. Austell, Cornwall.

EEV Ltd. (Electronics Division), Essex.

Encomech Engineering Services Ltd., Epsom, Surrey.

Environmental Control Systems Ltd., Cleckheaton, W. Yorkshire.

Environmental Resources Ltd., London W1.

Financial Times Group Ltd., London SE1.
 Firbank Kempster Group, Old Isleworth, Middx.
 FormFlo Ltd., Cheltenham.
 Elizabeth Gage Ltd., London W1.
 GEC Avionics Ltd., Rochester, Kent.
 Grafton (Database Consultants) Ltd., Kingston upon Thames, Surrey.
 William Grant & Sons Ltd., Glasgow.
 Holyhead Fish Processors Ltd., Holyhead, Gwynedd.
 Huntingdon Research Centre Ltd., Alconbury, Huntingdon, Cambs.
 Hyster Europe Ltd., Basingstoke.
 IAD (UK) Ltd., Worthing, W. Sussex.
 ICI Pharmaceuticals, Macclesfield.
 Ilmor Engineering Ltd., Brixworth, Northants.
 The Compressor Division of Ingersoll-Rand Co. Ltd., Hindley Green, Lancs.
 Interopa Holidays Ltd., London W2.
 Irlandus Circuits Ltd., Craigavon, Co. Armagh, N. Ireland.
 IT Power Ltd., Eversley, Hants.
 Justerini & Brooks Ltd., London NW1.
 KBC Advanced Technologies Ltd., Weybridge, Surrey.
 Kelvin Hughes Ltd., Ilford, Essex.
 KTS Wire Industries Ltd., Morley, Leeds.
 Laughton & Sons Ltd., Birmingham.
 Life Science Research Ltd., Eye, Suffolk.
 Lofthouse of Fleetwood Ltd., Fleetwood, Lancs.
 MacAlister, Elliott and Partners Ltd., Lymington, Hants.
 Machin Designs Ltd., London SW11.
 Marathon Belting Ltd., Rochdale, Lancs.
 Marlec Engineering Co. Ltd., Corby, Northants.
 Matsushita Electric UK Ltd., Cardiff.
 Metair Aircraft Ltd., West Malling, Kent.
 Microblade Ltd., Sheffield.
 Mineral Industries Computing Ltd., London W1.
 Mulberry Company (Design) Ltd., Chilcompton, Bath.
 NRC (Manufacturing) Ltd., Dundee.
 NMC-Kenmore (UK) Ltd., Crook, Co. Durham.
 The Civil Engineering Division of Netlon Ltd., Blackburn, Lancs.
 RT Newey (Chemicals) Ltd., Crosby, Liverpool.
 Ari D. Norman, London NW10.
 Osprey Metals Ltd., Neath, W. Glamorgan.
 Philips, Radiotherapy Systems Division of Philips Medical Systems (UK) Ltd., Crawley, W. Sussex.
 Portex Ltd., Hythe, Kent.
 Precision Metal Ltd., Stratford-upon-Avon, Warks.
 Process Scientific Innovations Ltd., Bowburn, Durham.
 Prout Catamarans Ltd., Canvey Island, Essex.
 Purification Products Ltd., Otley, W. Yorkshire.
 Razamataz, Colne, Lancs.
 RHP Precision, Newark, Notts.
 John Ross (Chemicals) Ltd., Bude, Cornwall.
 Rowntree PLC, York.
 Saga Group PLC, Folkestone, Kent.
 Sandmaster Ltd., Hixon, Staffs.
 The Meat Netting Division of Scobie & Junor Ltd., East Kilbride, Glasgow.
 Sloane Optical Ltd., t/a Cutler & Cross, London SW1.
 Sovereign International Freight Ltd., Feltham, Middx.

The Cryogenics Group of Sulzer (UK) Ltd., Aldershot, Hants.
 Sunseeker International (Boats) Ltd., Poole, Dorset.
 SWADA (London) Ltd., London E15.
 Targus Group PLC, Richmond, Surrey.
 Technophone Ltd., Camberley, Surrey.
 Thermaflex Ltd., Glenrothes, Fife.
 Thermopol Ltd., Crawley, W. Sussex.
 TI Apollo Ltd., Oldbury, W. Midlands.
 Tract Ltd., Thame, Oxon.
 Trans Euro Worldwide Movers Ltd., London NW10.
 The University of Reading, Reading, Berks.
 VG Elemental Ltd., Winsford, Cheshire.
 Vic-Tree (Birmingham) Ltd., Birmingham, W. Midlands.
 The Wellcome Foundation Ltd., London NW1.
 Willett International Ltd., High Wycombe, Bucks.
 F. G. Wilson (Engineering) Ltd., Newtownabbey, Belfast.
 Prime Mover Maintenance (a unit of Wood Group Gas Turbines Ltd.), Aberdeen.
 Woods of Windsor Ltd., Windsor, Berks.

Awards for Technological Achievement 1989

In 1989 the Queen's Award for Technological Achievement was conferred on the following concerns:

The Edwards High Vacuum International Division of the BOC Group PLC, Crawley, W. Sussex (*Air drying equipment*).
 British Ceramic Research Ltd., Stoke-on-Trent, Staffs. (*Set of ceramic colour standards*).
 British United Shoe Machinery Ltd., Belgrave, Leicester (*Computer-controlled machinery for manufacturing shoes*).
 The Continuous Casting Plant of the Teesside works of British Steel PLC, Redcar, Cleveland (*Immersed rotary valve for quality steel making (jointly with Thor Ceramics Ltd.)*).
 Cambridge Research Biochemicals Ltd., Harston, Cambridge (*Improved process for producing peptides for pharmaceutical applications (jointly with the Laboratory of Molecular Biology of the Medical Research Council)*).
 Castlet (Electronic Engineers) Ltd., Lincoln, Lincs. (*Microprocessor controls for electrostatic precipitators*).
 The Steriseal Division of Coats Viyella Medical Ltd., Redditch, Worcs. (*Advanced surgical dressings for chronic wound treatment (jointly with the Courtaulds Research Division of Courtaulds PLC)*).
 The Coultaulds Research Division of Courtaulds PLC, Coventry (*Advanced surgical dressings for chronic wound treatment (jointly with the Steriseal Division of Coats Viyella Medical Ltd.)*).
 Crosfield Electronics Ltd., Hemel Hempstead, Herts. (*System for quickly and securely transmitting data simultaneously to several remote locations*).
 The Colvern Division of Crystalate Electronics Ltd., Romford, Essex (*Position sensors for automotive electronic servicing*).
 The Optical and Display Science Division of the Royal Signals and Radar Establishment (M.O.D.), Great Malvern, Worcs. (*Electronic techniques for*

improving radar performance over the sea (jointly with Racal-MESL Ltd.)).

The VLSI Design and Architectures Division of the Royal Signals and Radar Establishment (M.O.D.), Great Malvern, Worcs. (Computer-aided design system (jointly with Praxis Systems PLC.))

Domnick Hunter Filters Ltd., Birtley, Co. Durham (Air drying equipment).

Dowty Rotol Ltd., Gloucester (Landing gear for the A320 airliner).

The Aviation Division of Dunlop Ltd., Coventry (Improved materials for aircraft braking systems).

Encomech Engineering Services Ltd., Epsom, Surrey (System for conserving energy during hot rolling of steel strip).

Formula Systems Ltd., Eynsham, Oxford (Electronic units for elevator door protection).

GEC Traction Ltd., Manchester (Electronic railway propulsion equipment).

Holset Engineering Co. Ltd., Turnbridge, Huddersfield (Flexible manufacturing system to produce turbocharger shaft and wheel).

Hydra-Lok Ltd., Barrow-in-Furness, Cumbria (System for attaching offshore structures to their under-sea anchorages).

Keeler Ltd., Windsor, Berks. (Non-contact tonometer for glaucoma screening (jointly with the Technology Division of PA Consulting Group)).

Marconi Instruments Ltd., St. Albans, Herts. (A computer controlled test set (2955 series) for testing radio transmitters and receivers)).

Miles 33 PLC, Bracknell, Berks. (Electronic composing and publishing system. (Used to print Hansard and other Parliamentary papers)).

The Laboratory of Molecular Biology of the Medical Research Council, Cambridge (Improved process for producing peptides for pharmaceutical applications (jointly with Cambridge Research Biochemicals Ltd.)).

Norprint International Ltd., Boston, Lincs. (Magnetic striped and encoded tickets and payment tokens).

Oxford Instruments Ltd., Oxford (Superconducting

magnets for nuclear magnetic resonance spectroscopy).

Oxford Lasers Ltd., Oxford (High-performance air-cooled metal vapour lasers).

The Technology Division of PA Consulting Group, Melbourn, Herts. (Non-contact tonometer for glaucoma screening (jointly with Keeler Ltd.)).

The Cambridge International Supply Centre (IPSC) of Philips Radio Communications Systems Ltd., Cambridge (High-performance wide-area radio pagers).

Philips Radiotherapy Systems Division of Philips Medical Systems (UK) Ltd., Crawley, W. Sussex (Radiotherapy linear accelerator).

Plessey Defence Systems Ltd., Christchurch, Dorset (Mobile military telecommunication system).

Praxis Systems PLC, Bath (Computer-aided electronic design system (jointly with the VLSI Design and Architectures Division of the Royal Signals and Radar Establishment)).

Racal-MESL Ltd., Newbridge, Midlothian (Electronic techniques for improving radar performance over the sea (jointly with the Optical and Display Science Division of the Royal Signals and Radar Establishment)).

River Don Castings Ltd., Sheffield (Steel castings for offshore use where they replace welded structures).

The Automated Compressor Blade Project Team of Rolls Royce PLC, Bristol (Process for automated blade manufacture).

The Telecommunications Systems Division of STC PLC, London N11 (Flexible access telecommunication system).

Thor Ceramics Ltd., Clydewark, Dunbartonshire (Immersed rotary valve for quality steel sheet-making (jointly with the Continuous Casting Plant of the Teeside works of British Steel PLC)).

Unipath Ltd., Bedford (Home pregnancy test system).

Westland Helicopters Ltd., Yeovil, Somerset (Composite main rotor blade for the Sea King helicopter).

Wycombe Marsh Paper Mills Ltd., High Wycombe, Bucks. (High strength sterilised paper used for medical drapes and wraps).

PERIODS OF GESTATION OR INCUBATION

The table shows approximate periods of gestation or incubation for some common animals and birds. In some cases the periods may vary and where doubt arises professional advice should be sought.

Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days	Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days
Human	240	273	313	Duck	28	28	32
Horse	305	336	340	Chicken	20	21	22
Cow	273	280	294	Pigeon	17	18	19

Penny	1p

†Britannia gold bullion coins, introduced in October 1987.

‡Gifts of special money distributed by the Sovereign annually on Maundy Thursday to the number of aged poor men and women corresponding to the Sovereign's own age.

Gold Coin.—Gold ceased to circulate during the First World War. An Order of April 27, 1966, made it illegal for U.K. residents to continue holding more than four gold coins minted after 1837, or to acquire such coins unless they had been licensed as genuine collectors by the Bank of England. This Order was revoked on April 1, 1971, by the Exchange Control (Gold Coins Exemption) Order, 1971, whereby residents of the United Kingdom, Channel Islands and the Isle of Man may freely buy and sell and hold gold coins.

The 1971 Order was revoked on April 15, 1975, by the Exchange Control (Gold Coins Exemption) Order, 1975. Under this Order Section 1 of the Exchange Control Act 1947 (which prohibits dealings in gold or foreign currency except with Treasury permission) was exempted for gold coins minted in or before 1837. The import of gold coins minted after 1837 was prohibited except by authorized dealers in gold with individual import licences from the Department of Trade and Industry, and dealing between other U.K. residents was restricted to coins already held in the U.K.

Under an amendment, dated December 16, 1977, the exemptions contained in the 1975 Order were extended to cover gold coins minted in or before 1937.

The 1975 controls over the import of and dealing in gold coins were abolished on June 13, 1979 under the Exchange Control (Gold Coins Exemption) Order 1979, and gold coins, with certain exceptions,* may now be imported and exported without restriction.

Nickel-Brass Coins

Two Pounds	£2
One Pound	£1

Cupro-Nickel Coins

50 Pence	50p
Crown	25p
20 Pence	20p
10 Pence	10p
5 Pence	5p

Bronze Coins

2 Pence	2p
1 Penny	1p

On April 1, 1982 the Government introduced VAT (currently 15 per cent) on sales of all gold coin.

Silver Coin.—Prior to 1920 our silver coins were struck from sterling silver—an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January 1, 1947 all "silver" coins, except Maundy money, have been struck from cupro-nickel—an alloy of copper 75 parts and nickel 25 parts, except for the 20p, composed of copper 84 parts, nickel 16 parts. Maundy coins since 1947 have been struck from sterling silver.

Bronze Coin.—Bronze, introduced in 1860 to replace copper, is currently an alloy of copper 97 parts, zinc $\frac{1}{2}$ parts and tin $\frac{1}{2}$ part. These proportions have been subject to slight variations in the past.

The "Remedy" is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

Legal tender of coin.—Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. £2 and £1 coins are legal tender to any amount. 50p and 20p coins are legal tender up to £10; 10p and 5p coins are legal tender up to £5 and bronze coins are legal tender for amounts up to 20p. Farthings ceased to be legal tender on December 31, 1960, the halfpenny on August 1, 1969, the halfcrown on January 1, 1970, the threepence and penny on August 31, 1971, the sixpence on June 30, 1980 and the decimal halfpenny on December 31, 1984.

The decimal system was introduced on Feb. 15, 1971. Since 1982 the word "new" in "new pence" displayed on decimal coins has been dropped.

*Gold coins which are more than fifty years old and valued at a sum in excess of £8,000 cannot be exported without specific authorization from the Department of Trade and Industry.

BANK NOTES

Bank of England notes are currently issued in denominations of £5, £10, £20 and £50 for the amount of the Fiduciary Note Issue, and are legal tender in England and Wales.

The old white notes for £10, £20, £50, £100, £500 and £1,000, which were issued until April 22, 1943, ceased to be legal tender in May 1945.

The old white £5 issued between October 1945 and September 1956, the £5 notes issued between 1957 and 1963, bearing a portrait of Britannia and the first series to bear a portrait of the Queen, issued between 1963 and 1971, ceased to be legal tender on March 14,

Denomination	Metal	Standard Weight (grams)	Standard Diameter (centimetres)
Penny	bronze	3.56400	2.0320
2 pence	bronze	7.12800	2.5910
5 pence	cupro-nickel	5.65518	2.3595
10 pence	cupro-nickel	11.31036	2.8500
20 pence	cupro-nickel	5.0	2.14
25p Crown	cupro-nickel	28.27590	3.8608
50 pence	cupro-nickel	13.5	3.0
£1	copper/nickel/zinc	9.5	2.25
£2	copper/nickel/zinc	15.98	2.84

1961, June 27, 1967 and September 1, 1973 respectively. The series of £1 notes issued during the years 1928 to 1960 and the 10s. notes of the same type issued from 1928 to 1961—those without the royal portrait—ceased to be legal tender on May 29 and October 30, 1962 respectively. The £1 note first issued in March 1960 (bearing on the back ■ representation of Britannia) and the £10 note first issued in February 1964 (bearing ■ lion on the back) both bearing a portrait of the Queen on the front ceased to be legal tender on June 1, 1979. The 10s. note was replaced by the 50p coin in October 1969, and ceased to be legal tender on November 21, 1970. Bank notes which are no longer legal tender are payable when presented at the Head Office of the Bank of England in London.

The first of the current series of Bank notes was a £20 note issued on July 9, 1970. This was followed by the £5 note on November 11, 1971, £10 note on February 20, 1975, £1 note on February 9, 1978 and £50 note on March 20, 1981. The £1 coin was introduced on April 21, 1983 and the £1 denomination note ceased to be legal tender on March 11, 1988. The predominant identifying feature of each note is the portrayal on the back of a prominent figure from Britain's history namely: £5, The Duke of Wellington; £10, Florence Nightingale; £20, William Shakespeare; and £50, Sir Christopher Wren.

Note Circulation.—Note circulation is highest at the two peak spending periods of the year—around Christmas and during the summer holiday period. A peak of £16,554 million was reached immediately prior to Christmas 1989, a 8·4 per cent increase on the previous year.

The proportion of the total value of notes in circulation of £1 and £5 notes at end-February 1989 compared with the previous year, fell from 0·8 per cent and 14·3 per cent to 0·7 per cent and 11·7 per cent respectively. £10 notes fell from 43·7 per cent to 41·1 per cent. However, £20 notes increased from 20·0 per cent to 25·9 per cent, as did £50 notes, from 13·3 per cent to 14·6 per cent.

On February 28, 1989 the values of notes in circulation were: £1: £101,843,242; £5:

£1,646,382,315;	£10:	£5,805,838,450;	£20:
£3,653,872,060;	£50:	£2,053,692,050.	

OTHER BANK NOTES

Scotland.—Bank notes are issued by three Scottish banks. The Royal Bank of Scotland and the Bank of Scotland issue notes for £1, £5, £10, £20 and £100. The Clydesdale Bank issues notes for £1, £5, £10, £20, £50, £100. Scottish notes are not legal tender, but in Scotland they enjoy a status equal to that of the Bank of England note.

Northern Ireland.—Bank notes are issued by four banks in Northern Ireland. The Northern Bank and the Ulster Bank issue notes for £5, £10, £20, £50 and £100. The Allied Irish Bank and the Bank of Ireland issue notes for £5, £10, £20 and £100. Northern Irish notes are not legal tender but in Northern Ireland they circulate widely and enjoy a status comparable to that of Bank of England notes.

Channel Islands.—The States of Jersey issues its own currency notes and coinage. The note denominations are for £1, £5, £10, £20 and £50. Seven denominations of coins are issued: 1p, 2p, 5p, 10p, 20p, 50p and £1. The States of Guernsey issues its own currency notes and coinage. The notes are for £1, £5, £10 and £20. The denomination of coins are 1p, 2p, 5p, 10p, 20p, 50p and £1.

The Isle of Man.—The Isle of Man Government issues notes for 50p, £1, £5, £10, £20 and £50. Although these notes are only legal tender in the Isle of Man they are accepted at face value in branches of the clearing banks in the United Kingdom. The Isle of Man issues coins for 1p, 2p, 5p, 10p, 20p, 50p, £1, £2 and £5.

Although none of the series of notes specified above is legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time the banks made a commission charge for handling Scottish and Irish notes but this was abolished some years ago.

THE INTERNATIONAL STOCK EXCHANGE

The International Stock Exchange of the United Kingdom and Republic of Ireland Ltd. serves the needs of government, industry and investors by providing facilities for raising capital and a central market place for securities trading. There are over 7,000 securities listed on the International Stock Exchange, which have a value of approximately £1,862,000 million. Last year, securities worth some £1,522,806,000 million changed hands. This central market place covers not only government stocks (called gilts) and U.K. and overseas company shares (called equities and fixed interest stocks) but other investment instruments such as traded options on equities, currencies and indices.

"Big Bang"

During 1986 the International Stock Exchange went through the greatest period of change in its two hundred year history. In March 1986 it opened its doors for the first time to overseas and corporate membership of the Exchange, allowing banks, insurance companies and overseas securities houses to become Members of The Exchange and to buy existing Member Firms. On October 27, 1986, three major reforms took place, changes which became known as "Big Bang".

- (i) abolition of scales of minimum commissions, allowing clients to negotiate freely with their brokers about the charge for their services
- (ii) abolition of the separation of member firms into brokers and jobbers. Under the new system, Firms are broker/dealers, able to act as agents on behalf of clients; to act as principals buying and selling shares for their own account; and to become registered market makers, making continuous buying and selling prices in specific securities
- (iii) the introduction of the Stock Exchange Automated Quotations (S.E.A.Q.) system. Market makers input their buying and selling prices into S.E.A.Q., which displays the competing quotations on a composite page on-screen. For the largest and most frequently traded company shares ("Alpha"), e.g. Marks and Spencer or BP, the volume of shares traded is also updated continuously throughout the day.

Of all these changes, the implementation of S.E.A.Q. has had perhaps the most visible effect. Dealing in stocks and shares now takes place via the telephone in the Firms' own dealing rooms, rather than face to face on the floor of the Exchange. The new systems also provide increased investor protection. All deals taking place via the Exchange's S.E.A.Q. system are recorded on a database which can be used to resolve disputes or to carry out investigations.

Members of the International Stock Exchange buy and sell shares on behalf of the public, as well as

institutions such as pension funds or insurance companies. In return for transacting the deal, the broker will charge a commission, which is usually based upon the value of the transaction. The market makers, or wholesalers, in each security do not charge a commission for their services, but will quote the broker two prices, a price at which they will buy and a price at which they will sell. It is the middle of these two prices which is published in lists of Stock Exchange prices in newspapers.

Regulatory Bodies

On November 12, 1986 Members of the Exchange agreed to merge with members of the international broking community in London, based outside the Exchange, in order to form two new bodies—the International Stock Exchange of the United Kingdom and Republic of Ireland Ltd. and the Securities Association Ltd. These two regulatory bodies have been formed under the provisions of the Financial Services Act, which requires investment businesses to be authorised and regulated by a Self Regulating Organisation (S.R.O.) of which the Securities Association is one. The Act also requires business to be conducted through a Registered Investment Exchange (R.I.E.). The International Stock Exchange is an R.I.E., regulating four main markets: U.K. equities, international equities, gilts and options.

Markets

As well as advising and dealing on behalf of investors, stockbrokers provide a range of services to industry from the raising of initial capital and future, additional, funds to advice on mergers and acquisitions. For a company entering the market for the first time there are three possible Stock Exchange markets, depending upon the size, history and requirements of the company. The first is the listed market, on which the shares of over 2,500 companies are traded. For entry to this market, the company must have an audited trading history of at least five years, and place 25 per cent of its shares in public hands. The second type of market is for smaller, less established companies and is called the Unlisted Securities Market (U.S.M.). In January, 1986, the International Stock Exchange established a third tier called simply the Third Market. This is for very new and small companies incorporated in the U.K. or Ireland. Once admitted to the Exchange, all companies are obliged to keep their shareholders informed of their progress, making announcements of a price-sensitive nature through the Exchange's company announcements department.

The International Stock Exchange has its headquarters in London, and administrative centres around the U.K. and the Republic of Ireland. At present there are some 5,100 individual Members and about 390 Member Firms.

Chairman, Andrew Hugh Smith.

LIFE AND GENERAL INSURANCE

Authorization of Insurance Companies

Section 3 of the Insurance Companies Act 1982 empowers the Department of Trade and Industry (Insurance Division, 1 Victoria Street, SW1H 0ET) to authorize corporate bodies to transact insurance in the United Kingdom provided they comply with the financial and other regulations detailed in the Act.

At the end of 1988 there were 838 insurance companies with authorization to transact one or more classes of insurance business in the U.K.

Regulation of Insurance Companies

Under the Financial Services Act 1986, the Securities and Investments Board (S.I.B.) is empowered to make, monitor and enforce rules about the conduct of investment business.

The S.I.B. has, in turn, set up a number of Self-Regulating Organizations dealing with different sectors of the investment market. Insurance com-

panies offering long-term contracts like life insurance, pensions, unit trusts and annuities can either obtain authorization directly from S.I.B. or from the main S.R.O. dealing with the marketing of life insurance and pensions, the Life And Unit Trust Regulatory Organization (LAUTRO), Centre Point, 103 New Oxford Street, WC1A 1QH. It is possible that insurers may also need authorization from other S.R.O.s, for example, the Investment Management Regulatory Organization (IMRO), Centre Point, 103 New Oxford Street, WC1A 1QH.

Association of British Insurers

Ninety per cent of the world-wide business of insurance companies is transacted by the 440 members of the Association of British Insurers. This trade association has represented both life and general insurers since 1985 when it replaced the British Insurance Association, the Life Offices Association and other such organizations.

BRITISH INSURANCE COMPANIES IN 1988

The following insurance company figures refer to members of the Association of British Insurers, and also to certain non-members.

Weather Damage

Figures for weather damage claims are not published on an annual basis but estimates for damage caused by the storm on October 16–17, 1987 now stand at £1,050 million.

LLOYD'S OF LONDON

Lloyd's of London is an incorporated society of private underwriters who provide an international market for almost any type of insurance. Ships, aircraft, oil rigs, cargo of all descriptions, motor cars, civil engineering projects, fire, personal accident and third party liability are a few random examples of the everyday risks placed at Lloyd's which currently earn a premium income of around £6,000 million for underwriters each year. Three-quarters of this business comes from outside Great Britain and makes a valuable contribution to the country's balance of payments.

Today, as it was three centuries ago, a policy is subscribed at Lloyd's by private individuals with unlimited liability. Now that Lloyd's members are numbered in their thousands, however, the method of underwriting is the same only in principle. The merchant of the past, signing policies in a coffee house as a sideline to his main business, has long since given way to the specialist underwriter who accepts risks at Lloyd's on behalf of members (often referred to as "names") grouped in a syndicate. There are currently over 31,000 members in some 401 syndicates of varying sizes, some with over two thousand names and each managed by an underwriting agent approved by the Council of Lloyd's.

Lloyd's membership today is drawn from many sources. Industry, commerce and the professions are strongly represented while many members work at

Lloyd's either for brokerage firms or for underwriting agencies.

Underwriting membership of Lloyd's is open to men and women of any nationality provided that they meet the stringent financial requirements of the Society, or Corporation, of Lloyd's. Assets of up to £250,000 have to be shown and a deposit lodged with the Corporation as security for underwriting liabilities. This deposit, which must be in the form of approved securities, is determined at 30 per cent of the member's annual premium income.

Lloyd's is incorporated by Act of Parliament (Lloyd's Acts 1871–1982) and governed by a Council of 28 members, twelve of whom are elected from and by underwriting members working at Lloyd's and eight from and by the external membership. Eight Council members are nominated by the Council subject to confirmation by the Governor of the Bank of England.

The Council is a legislative body responsible for deciding on major policy matters, for regulating the Lloyd's market, for the election of new underwriting members, and for establishing the requirements of membership and the rules governing the financial security to be provided by those doing business at Lloyd's.

The Council's "working" members form the Committee of Lloyd's, an executive body which is responsible for putting the Council's directives into

effect, managing the Society's affairs, and administering the Lloyd's market on a day-to-day basis.

The Corporation is a non-profit-making body chiefly financed by its members' subscriptions. It provides the premises, administrative staff and services enabling Lloyd's underwriting syndicates to conduct their business. It does not, however, assume corporate liability for the risks accepted by its members, who remain responsible to the full extent of their personal means for their underwriting affairs.

Lloyd's syndicates have no direct contact with the public. All business is transacted through some 260 firms of insurance brokers accredited by the Corporation of Lloyd's. In addition, non-Lloyd's brokers in the United Kingdom when guaranteed by Lloyd's brokers, are able to deal directly with Lloyd's motor syndicates, a facility which has made the Lloyd's

market more accessible to the insuring public.

Lloyd's also provides the most comprehensive shipping intelligence service available in the world. The enormous volume of shipping and other information received from Lloyd's agents, shipowners, news agencies and other sources throughout the world, is collated and distributed to newspapers, radio and television services, as well as to maritime and commercial interests in general.

This information is compiled, edited and published by a subsidiary company, Lloyd's of London Press Ltd., and distributed worldwide. *Lloyd's List* is London's oldest daily newspaper and contains news of general commercial interest as well as shipping information. *Lloyd's Shipping Index*, also published daily, lists some 25,000 ocean-going vessels in alphabetical order and gives the latest known report of each.

INSURANCE BROKERS

The Insurance Brokers Registration Act 1977 empowers the Insurance Brokers Registration Council (15 St. Helens Place, EC3A 6DS) as the statutory body responsible for the registration of insurance brokers. The Council is responsible for the registration and training of insurance brokers, conduct of business, and discipline, and it lays down rules relating to such matters as accounting practice, staff qualifications, advertising, etc.

It is possible to act as an insurance intermediary without being registered with the I.B.R.C. but unregistered intermediaries are forbidden to use the words 'Insurance Broker' as a title.

I.B.R.C. Registered Brokers

	1989
Registered individuals	15,843
Limited Companies registered	3,160
Sole traders and partnerships	1,533
(containing 2,314 partners and directors)	

THE EUROPEAN COMMUNITY

In 1986 the European Community's Heads of Government signed the Single European Act. This set out a programme of over 300 E.C. Directives which are intended to achieve the removal of barriers to a free market within the community. To date, progress on the Directives has been slow.

In insurance, the U.K. and the Netherlands are the closest of the E.C. countries to operating a free market system. U.K. nationals already being able to arrange cover with an insurer based outside the U.K. if they wish. Similarly, overseas insurers are free to market their products and operate in the U.K.

This is not the case in most other E.C. member countries; in France for example, it is an offence for a person to arrange insurance cover with a company outside the country. In Belgium and West Germany individuals are able to arrange cover outside their borders but not through an intermediary or broker. In addition, insurers from outside these countries cannot advertise or operate any form of marketing to attract business.

E.C. Directives are gradually being incorporated into U.K. law; for example, The Motor Vehicles (Compulsory Insurance) Regulations 1987 required all U.K. motor insurance policies to cover legal liabilities for damage to third party property as well as bodily injury. This change, which came into force on December 31, 1988, is designed to harmonize the cover under motor insurance policies throughout the community, a requirement of the third E.C. Directive on Motor Insurance.

Invisible Earnings of Insurance

	1986	1987
Insurance	£4,913 m	£4,834 m

LIFE INSURANCE AND PENSIONS

Personal Pensions

July 1, 1988 saw the introduction of personal pensions, one of the main advantages of which is that they remain unaffected by a change of employment. Before July 1, 1988, only self-employed persons were able to take out a personal pension. From that date the restriction was lifted and now anyone in employment can take a personal pension and use it to contract out of the State Earnings Related Pension Scheme or their employer's company scheme. It is also no longer possible for employers to make

membership of their company pension scheme a condition of employment.

Contracting out of the State Earnings Related Pension Scheme at any time up to 1993 entitles the employee to a rebate of National Insurance contributions made since 1987. These are paid into their personal pension fund by the Department of Social Security (D.S.S.). To encourage new contracted-out schemes a 2 per cent incentive bonus was paid into the personal pension fund of anyone taking out a personal pension before April 6, 1989.

Individual Pension New Business in 1988

FRIENDLY SOCIETIES—GREAT BRITAIN

Acts 1974–1984

Friendly societies are voluntary mutual organizations the main purposes of which are the provision of relief or maintenance during sickness, unemployment or retirement, and the provision of life assurance. Many of the older traditional societies complement their business activities by social activity and general care for individual members in ways normally outside the scope of a purely commercial organization. There are three main categories of friendly societies—societies with separately registered branches, commonly called orders, centralized societies, which conduct business directly with members (having no separately registered branches), and collecting societies. Collecting societies conduct industrial assurance business and are subject to the requirements of the Industrial Assurance Acts in addition to the Friendly Societies Acts. Industrial assurance is life assurance, the premiums in respect of which are payable at intervals of less than two months and are received by means of collectors who make house-to-house visits for the purpose.

Long before the term 'friendly society' came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade Guilds. As is evident from the many extant parchments returning detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and a payment to the widow in the event of death.

The present register of friendly societies includes several societies which have been in existence for upwards of 200 years, the oldest, operating in Scotland, being the Incorporation of Carters in Leith, established long ago as 1555.

The first Act for the encouragement and protection of 'friendly societies' in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered friendly societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The Friendly Societies Act 1974, which came into force in April, 1975, consolidated the nine Acts which comprised the Friendly Societies Acts 1896 to 1971 and a few other minor enactments relating to societies to which those Acts applied. The Act allows various specific classes other than 'friendly societies' to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered 'friendly societies'. The £750 sum assured limit for tax exempt business was replaced in 1987 by a more flexible limit applied to premiums—up to £100 per annum.

The Friendly Societies (Long Term Insurance Business) Regulations 1987, implementing the European Community Life Directive for friendly societies, came into force on January 1, 1988 bringing with them a more stringent regulatory regime for the largest societies. The Life Directive affects both insurance companies and friendly societies with an annual contribution income in excess of 500,000 E.C.U.s, the sterling equivalent of which was £345,308 in 1988. Thirty-seven friendly societies have been formally authorized under the Regulations. These societies are required to meet solvency requirements similar to those applied to insurance companies.

In addition to friendly societies there are three other main classes of society which may be registered under the Friendly Societies Act 1974: benevolent societies, working men's clubs and specially authorized societies. Benevolent societies are established for any charitable or benevolent purpose, to provide the same type of benefits as would be permissible for a friendly society, but in contrast the benefits must be for persons who are not members instead of, or in addition to, members. Working men's clubs provide social and recreational facilities for members. Specially authorized societies are registered for any purpose authorized by the Treasury as a purpose to which some or all of the provisions of the 1974 Act ought to be extended. Examples are societies for the promotion of science, literature and the fine arts, or to enable members to pursue an interest in sports and games.

The principal statistics at the end of 1987 are given in the table below.

	Orders and Branches	Collecting Societies	Other Centralized Societies	Benevolent Societies	Working Men's Clubs	Specially Authorized Societies		Other

INDUSTRIAL AND PROVIDENT SOCIETIES—GREAT BRITAIN

Acts 1965-1979

The familiar 'Co-op' societies are amongst the wide variety which are registered under the Industrial and Provident Societies Act 1965. This consolidating Act which, like the Friendly and the Building Societies Acts is administered by the Chief Registrar of Friendly Societies provides for the registration of societies and lays down the broad framework within which they must operate. Internal relations of societies are governed by their registered rules.

Registration under the Act confers upon a society corporate status by its registered name with perpetual succession and a common seal, and limited liability. A society qualifies for registration if it is carrying on an industry, business or trade, and it satisfies the Registrar that either (a) it is a bona fide co-operative society or (b) in view of the fact that its business is being, or is intended to be, conducted for the benefit of the community there are special reasons why it

should be registered under the Act rather than ■ a company under the Companies Act.

The Credit Unions Act 1979 added a new class of society registerable under the 1965 Act. The Act also lays down provision for supervision of these savings and loan bodies. A similar framework of law for credit unions has existed in Northern Ireland since 1969.

During 1987 the number of registered societies increased by 279 to 10,486. The largest single group was the 3,903 housing societies. The largest group in terms of turnover ■ that consisting of the retail societies which includes those trading under the familiar 'Co-op' sign, with sales (in 1987) of £4,409 million. Sales of wholesale and productive societies amounted to £3,162 million in 1987. The principal statistics at the end of 1987 are given in the table below.

	Retail	Wholesale and Productive	Agricultural	Fishing	Social and Recreational Clubs	General Service	Housing	Credit Unions	Total
Number of Societies	203	243	1,084	106	3,754	1,085	3,903	108	10,486

BUILDING SOCIETIES—UNITED KINGDOM

Act 1986

The most significant event for the building societies in recent times was the passage of the Building Societies Act 1986, which received the Royal Assent on July 25, 1986. Most of the provisions of the Act came into effect on January 1, 1987. The Act gave building societies ■ completely new legal framework, the first since the initial comprehensive building society legislation in 1874. The new Act replaced both the 1962 Act and the 1967 Act covering Northern Ireland, and therefore applies to societies based throughout the United Kingdom.

The 1986 Act made provision for a Building Societies Commission to promote the protection of shareholders and depositors, the financial stability of societies, and to administer the system of regulation of building societies provided under the Act. Much of the Act is concerned with the powers of control of the Commission and provision in relation to the management of societies, accounts, audit and so on. But the greatest impact and the most visible changes so far as the general public is concerned flowed from the new powers which societies could adopt, leading

to an increased range of services which they might provide. There were also some interesting changes in relation to members' rights.

Under the 1962 Act raising funds to make loans was the only purpose for which a building society could exist. Under the 1986 Act that has only to be its principal purpose. The constitutional provisions include the right of members to have access to the register of members, entitlement to have notices of meetings and to vote, and the right of members to have a resolution circulated.

In addition to traditional mortgage business, the power of societies to lend in respect of shared ownership, index-linked and equity-linked schemes is given. Societies may also lend the deposit, lend on registered land before the borrower is registered as the owner and on other equitable interests. Provision is also made for societies to make advances secured on land outside the United Kingdom. Larger societies were able, for the first time, to make unsecured loans, and make loans on mobile homes.

Under the 1962 Act building societies could only

hold land for the purposes of running their business. Section 17 of the 1986 Act gave building societies power to hold and develop land ■■■ commercial asset. However, the land has to be primarily for residential purposes, or adjoining land, or for purposes incidental to the holding of residential land.

Detailed provisions were contained in the Act for an Investor Protection Scheme similar to those in the Banking Act of 1979. The level of protection given is 90 per cent of accounts up to £10,000.

Societies were also empowered to offer for the first time the following services:

- (a) Money transmission services
- (b) Foreign exchange services
- (c) Making or receiving of payments ■■■ agents
- (d) Management, as agents, of mortgage investments
- (e) Management, ■■■ agents, of land (larger societies only)
- (f) Arranging for the provision of services relating to the acquisition or disposal of investments for individuals.
- (g) Establishment and management of personal equity plans.
- (h) Arranging for the provision of credit to individuals.
- (i) Establishment and management of unit trust schemes for the provision of pensions (through a subsidiary).

- (j) Establishment and administration of pension schemes.
- (k) Arranging for the provision of insurance of any description.
- (l) Giving advice on insurance of any description.
- (m) Estate agency service (through ■■■ subsidiary).
- (n) Surveys and valuations of land.
- (o) Conveyancing services.

There emerged ■■■ number of technical problems in relation to these services and in June 1988 Parliament made Orders which allowed societies to have the power to own up to 100 per cent of ■■■ life assurance company, 15 per cent of a general insurance company, 100 per cent of ■■■ stockbroking company and to offer an additional range of financial services including executorship and trusteeship, hire purchase and leasing and safe deposit facilities. The Orders also included an increase in the limit on unsecured personal loans from £5,000 to £10,000.

Societies must belong to an Ombudsman scheme for the investigation of complaints. Matters to be covered by the scheme include operation of share and deposit accounts, loans (but not the making of new loans), money transmission services, foreign exchange services, agency payments and receipts, and the provision of credit. Grounds for complaint include breach of the Act or contract, unfair treatment or maladministration, and where the complainant has suffered pecuniary loss or expense or

inconvenience. A society must agree to be bound by decisions of the adjudicator unless it agrees to give notice to its members and the public of its reasons for not doing so. For address of the Building Societies Ombudsman Scheme, see Index.

On mergers, the main difference is that borrowers have a vote. For a merger to be approved at least 50 per cent of borrowers who exercise their right to vote must vote in favour, as well as 75 per cent of

qualifying share investors who vote. Provision is also made for a society to convert to company status. During 1989 the Abbey National became the first building society to complete the process of conversion to a company. It can no longer use the term 'Building Society' and now falls to be supervised as a bank under the Banking Act 1987. Details of all societies with assets exceeding £1m. at the end of 1988 are given in the following list.

SOCIETIES WITH TOTAL ASSETS EXCEEDING £1 MILLION AT END OF FINANCIAL YEAR 1988

Year Established	* Name of Society (abbreviated)	Head Office	Share Investors	Assets Total £'000
1849	Abbey National, Abbey House, 27 Baker St., London NW1 6XL		8,213,195	31,536,856

*Authorization to take money from public revoked May 1989.

THE COST OF LIVING

The first cost-of-living index to be calculated in Great Britain was the one which took July 1914 as 100 and was based on the pattern of expenditure of working class families in 1904. Since 1947 the Index of Retail Prices has superseded the cost-of-living index, although the older term is still often popularly applied to it. This index is designed to reflect the month-by-month changes in the average level of retail prices of goods and services purchased by the "majority" of households in the United Kingdom, including practically all wage-earners and most small and medium salary-earners. For spending coming within the scope of the index, a representative list of items is selected and the prices actually charged for these items are collected at regular intervals. In working out the index figure, the price changes are "weighted"—that is, given different degrees of importance—in accordance with the pattern of consumption of the average family.

A more widely used guide when considering changes in the average level of prices of all consumer goods and services, particularly over a number of years, is the consumer price index, now renamed the consumers' expenditure deflator. This index, which has been calculated back to 1938, covers the expenditure of all consumers as defined for national income purposes, and compares the price of goods and services actually purchased in a given year with the prices of the same goods and services in a base year.

During 1973 the Central Statistical Office constructed an annual index of prices of consumer goods and services over the period 1914 to 1972. This index has been constructed by linking together the pre-war cost of living index for the period 1914–1938, the consumers' expenditure deflator for the period 1938 and 1946–62* and the General Index of Retail Prices for the period 1962–1972.

In August 1979, the tax and price index (TPI) was introduced in order to provide a statistic which incorporates the effects of direct and indirect taxation, as well as prices, on taxpayers. The TPI is not directly concerned with the purchasing power of money, however, but with the purchasing power of pre-tax income. The General Index of Retail Prices thus retains its function of measuring the changes in the prices of goods and services purchased by households (from their post-tax income), and therefore as an indicator of the purchasing power of money.

* There are no official figures for 1939–45.

	Long Term Index of Consumer Goods and Services Jan. 1974 = 100	Comparable Purchasing Power of £1 in 1988
1914.....	11·1	37·98
1915.....	13·7	30·77
1920.....	27·7	15·22
1925.....	19·6	21·50
1930.....	17·6	23·95
1935.....	15·9	26·51
1938.....	17·4	24·22
1946.....	29·4	14·34
1950.....	35·6	11·84
1955.....	44·1	9·56
1960.....	49·6	8·50
1965.....	58·4	7·21
1970.....	73·1	5·76
1971.....	80·0	5·27
1972.....	85·7	4·91
1973.....	93·5	4·50
1974.....	108·5	3·88
1975.....	134·8	3·12
1976.....	157·1	2·68

1980.....	263·7	1·59
1981.....	295·0	1·42
1982.....	320·4	1·31
1983.....	335·1	1·25
1984.....	351·8	1·19
1985.....	373·2	1·12
1986.....	385·9	1·09
1987.....	401·9	1·04
1988.....	421·6	1·00

By employing this table an annual purchasing power of the pound index may be derived by taking the inverse of the price index. So, for example, if the purchasing power of the pound is taken to be 100p in 1972, then its comparable purchasing power in 1988 would be:

$$100 \times \frac{85.7}{421.6} = 20.3p$$

It should be noted that these figures can only be approximate.

INTEREST RATES – MORTGAGE AND SHARE

The interest rates prevailing on mortgage lending and share investment vary to a degree from society to society and in relation to the type or amount of loan or investment. The system whereby the Building Societies Association advised specific rates ceased in November 1984 and in April 1986 collective discussion, leading to a statement that a reduction or increase of a certain order was appropriate, was discontinued. General rate changes, however, continue in response to market conditions and the predominant rates in recent years, with the dates of change, are given below.

	March 1986	June 1986	Nov. 1986	May 1987	Jan. 1988	May 1988	Aug. 1988	Oct. 1988	Jan. 1989
Mortgages	12·00	11·00	12·25–12·375	11·25	10·00–10·30	9·50–9·80	11·50	12·75	13·50
Ordinary Shares	6·00	5·25	6·00	5·00	4·00	3·50	4·75	5·65	6·15

BANKING IN BRITAIN

The main institutions within the British banking system are the Bank of England (the central bank, *see p. 303*), the clearing banks (the major retail banks), the merchant banks, the overseas banks and the discount houses.

The clearing banks are Bank of Scotland, Barclays, Clydesdale, Co-operative, Coutts, Girobank, Lloyds, Midland, National Westminster, The Royal Bank of Scotland Group, the T.S.B. and the Yorkshire Bank.

Deposit-taking institutions may be broadly divided

into the monetary sector which is predominantly banks and is supervised by the Bank of England, and those institutions outside the monetary sector of which the most important are the building societies and the National Savings Bank. The Banking Act 1987 established a single category of authorized institutions eligible to carry out banking business. There follows a list of authorized institutions as at August 25, 1989.

GIROBANK

Girobank provides a broad range of corporate and personal banking facilities. Girobank is expected to be privatized at the end of 1989.

OPERATING STATISTICS

	1987-88	1988-89
Number of accounts at year end, thousands	2,134	21,148
Pre-tax profit, £m	23.5	21.6

BANKING SERVICES**Association for Payment Clearing Services
(APACS)**

Mercury House, Triton Court, 14 Finsbury Square,
EC2A 1BR.

APACS was set up by the banks in 1985 to manage the payment clearing systems and oversee money transmission in the U.K.

Three operational clearing companies operate under the aegis of APACS. They are:

B.A.C.S. LTD., De Havilland Road, Edgware, Middx.
HA8 5QA.—Provides an automated service for inter-bank clearing of payment and collection transactions in the U.K. (e.g. standing orders, direct debits). *Chief Exec.*, G. R. Simpson.

CHEQUE AND CREDIT CLEARING CO. LTD., Mercury House, Triton Court, 14 Finsbury Square, EC2A 1BR.—Operates bulk clearing systems for interbank cheques and paper credit items. *Chief Inspector*, E. W. Stubbs.

C.H.A.P.S. AND TOWN CLEARING CO. LTD., Mercury House, Triton Court, 14 Finsbury Square, EC2A 1BR.—Provides same-day clearing for high value cheques and electronic funds transfer. *Chief Inspector*, E. W. Stubbs.

In addition, EftPos U.K. Ltd. is a company within the APACS structure set up to develop a national scheme for electronic funds transfer at the point of sale. APACS also oversees the London Dollar Clearing, the London Currency Settlement Scheme and the Cheque Card and eurocheque schemes in the U.K.

Membership of APACS and the operational clearing companies is open to any appropriately regulated institution providing payment services and meeting the relevant membership criteria.

Chief Executive, R. I. L. Allen.

Committee of London and Scottish Bankers
10 Lombard Street, EC3V 9AP
[01-283 8866]

The Committee is the successor to the Committee of London Clearing Bankers. It consists of the Chairmen of Barclays, Lloyds, Midland, National Westminster, Standard Chartered, Bank of Scotland, Royal Bank of Scotland and the T.S.B. Group, and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury.

Secretary-General, The Hon. R. C. R. Hoyer Millar.

FINANCIAL OMBUDSMEN

The following Ombudsmen schemes are non-statutory.

The Office of the Banking Ombudsman
Citadel House, 5-11 Fetter Lane, EC4A 1BR
[01-583 1395]

The purpose of the Banking Ombudsman Scheme is to investigate complaints from bank customers dissatisfied with the banking services of member banks. The Scheme was set up in 1985, becoming operational on Jan. 1, 1986, by 19 banks and it is funded by contributions from the member banks (19 banks and 21 designated associates). There is a seven-member Council who appoint the Ombudsman, give guidance in the performance of his duties, monitor his terms of reference, prepare the budget and approve the annual report. The Ombudsman and his staff are responsible to the Council.

The Banking Ombudsman, L. Shurman.

The Office of the Building Societies Ombudsman
Grosvenor Gardens House, 35-37 Grosvenor
Gardens, SW1X 7AW
[01-931 0044]

The purpose of the Building Societies Ombudsman Scheme, which came into operation on July 1, 1987, is to investigate complaints from building society customers about the services of building societies belonging to the Scheme and it is funded by contributions from the members. The Ombudsman is appointed by and responsible to an independent Ombudsman Council.

The Building Society Ombudsman, S. Edell.

The Insurance Ombudsman Bureau
31 Southampton Row, WC1B 5HJ
[01-242 8613]

The purpose of the Insurance Ombudsman Scheme is to settle disputes between insurance policyholders and member insurance companies. The Scheme came into operation in March 1981 and is funded by contributions from the member companies. Over 300 companies are members of the Scheme. An independent Council appoints and supervises the work of the Ombudsman.

The Insurance Ombudsman Bureau also runs the Unit Trust Ombudsman Scheme, the purpose of which is to settle disputes between personal unit trust holders and member unit trust management companies. The Unit Trusts Ombudsman scheme came into operation in October 1988.

The Insurance Ombudsman, Dr. J. Farrand.
The Unit Trust Ombudsman, C. A. H. Parsons.

THE NATIONAL DEBT

Net central government borrowing each year represents an addition to the National Debt. At the end of March 1988 the National Debt amounted to some £197,500 million of which about £4,500 million was in currencies other than sterling. Of the £193,000 million sterling debt, £144,000 million consisted of gilt-edged stock; of this, 29 per cent had a maturity of up to five years, 43 per cent a maturity of over five years and up to 15 years and 28 per cent a maturity of over 15 years or undated. The remaining sterling debt was made up mainly of national savings (£29,000 million), certificates of tax deposits, Treasury bills, and Ways and Means advances (very short-term internal government borrowing).

The sizable Trust Funds have been established over the past fifty years for the purpose of reducing the National Debt. The National Fund was established in 1927 with an original gift of £499,878. At March 31, 1987 it was valued at £55,628,556; it is administered by Baring Brothers & Co. Ltd. The Elsie Mackay Fund was established in 1929 with an original gift of £527,809 to run for 45-50 years. It was wound up on January 19, 1979, when it was valued at £4,902,864. The John Buchanan Fund was established in 1932 with gifts totalling £36,702 to run for 50 years. It was wound up on February 28, 1982, when it was valued at £204,138.

NATIONAL SAVINGS

PREMIUM BONDS

Premium Bonds are a Government security which were first introduced on November 1, 1956. Premium Bonds enable savers to enter a regular draw for tax-free prizes, whilst retaining the right to get their money back. A sum equivalent to interest on each bond is put into a prize fund and distributed by weekly and monthly prize draws. (The rate of interest is 6·5 per cent. a year from July 1, 1988). The prizes are drawn by ERNIE (electronic random number indicator equipment) and are free of all U.K. income tax and capital gains tax.

Bonds are in units of £1, with a minimum purchase of £100; above this, purchases must be in multiples of £10, up to a maximum holding limit of £10,000 per person. The exception to this is that the minimum purchase by parents, guardians and grandparents for children under 16 is £10. Bonds can only be held in the name of an individual and not by organizations.

Bonds become eligible for prizes once they have been held for three clear calendar months following the month of purchase. Each £1 unit can win only one prize per draw, but it will be awarded the highest for which it is drawn. Bonds remain eligible for prizes until they are repaid. When a holder dies, bonds remain eligible for prizes up to and including the twelfth monthly draw after the month in which the holder dies.

By April 1989 bonds to the value of £4,520 million had been sold. Of these £2,238 million had been cashed, leaving £2,282 million still invested. By the April 1989 prize draw, 32·4 million prizes totalling £1,888 million had been distributed since the first prize draw in June 1957.

INCOME BONDS

National Savings Income Bonds were introduced in 1982. They are particularly suitable for those who want to receive regular monthly payments of interest while preserving the full cash value of their capital. The Bonds are sold in multiples of £1,000. The minimum holding is £2,000 and the maximum £100,000.

Interest is calculated on a day-to-day basis and paid monthly. Interest is taxable, but is paid without deduction of tax at source. The Bonds have a guaranteed life of ten years, but may be repaid at par before maturity on giving three months' notice. If repayment of a bond is made within the first year of purchase, interest from the date of purchase to the date of repayment is earned at half rate. If the sole or sole surviving holder dies, however, no formal period of notice is required and there is no loss of interest for repayment made within the first year.

Net investment in National Savings Income Bonds was £7,814,538,000 at the end of April 1989.

INDEXED INCOME BONDS

Indexed Income Bonds were withdrawn from sale on August 28, 1987. Existing holders will continue to receive monthly income in accordance with the prospectus.

ORDINARY AND INVESTMENT ACCOUNTS

National Savings Bank.—On May 31, 1989, there were about 15,754,000 active accounts with the sum of approximately £1,632 million due to depositors in Ordinary accounts and about 4,423,000 active accounts with the sum of approximately £7,724 million due to depositors in Investment accounts.

Interest is earned at 5 per cent per year on each

Ordinary account for every complete calendar month in which the balance is £500 or more, provided the account is kept open for the whole of 1989 (December 31, 1988—January 1, 1990); and at 2·5 per cent per year for other months or for accounts opened or closed during 1989. The minimum deposit is £5; maximum balance £10,000 plus interest credited. On May 31, 1989 the average amount held in Ordinary accounts was approximately £104.

The Investment account pays a higher rate of interest (the current rate can be ascertained at any Savings Bank Post Office). The minimum deposit is £5; maximum balance £100,000 plus interest credited. On May 31, 1989 the average amount held in Investment accounts was approximately £1,746.

CAPITAL BONDS

National Savings Capital Bonds were introduced on January 4, 1989. For personal savers Capital Bonds offer capital growth over five years with guaranteed returns at fixed rates. Each year the interest rate rises. To get the best return the Bond should be held for the full five years. The interest is taxable each year (for those who pay income tax) but is not deducted at source. The minimum purchase is £100, with larger purchases in multiples of £100. There is no maximum holding limit.

Capital Bonds will be repaid in full with all interest gained at the end of five years. Early repayment may be obtained at three months notice. No interest is earned on Bonds repaid in the first year.

DEPOSIT BONDS

National Savings Deposit Bonds were withdrawn from sale on November 19, 1988. All Deposit Bonds purchased on or before that date may continue to be held until the tenth anniversary of purchase. They will continue to earn interest until then.

YEARLY PLAN

The National Savings "Yearly Plan" was introduced on July 2, 1984. It offers a guaranteed tax-free return. Applicants agree to make 12 monthly payments, leading to the issue of a Yearly Plan Certificate. The maximum guaranteed rate of interest is earned if the Certificate is held for a full four years. Applications may be made by any individuals aged 7 or over; in the name of children under 7; and by not more than two trustees for a sole beneficiary.

Payments must be made on the same date every month by standing order from a bank or other acceptable account. Only one payment may be made in any one month and must be in multiples of £5. Minimum monthly contribution is £20, maximum £200. Net investment in National Savings Yearly Plan was £556,792,705 at May 31, 1989.

On receipt of an application the applicant is sent an Offer Letter telling him the interest rates he will receive on his agreement if he accepts. The Certificate is sent at the end of the first year. It shows the total value of the payments made and the value of the Certificate if held for four years. The Certificate earns interest compounded annually on the anniversaries of the Certificate Date. Maximum interest is earned if the Certificate is held for the full four years. At the end of each year, providing at least seven payments have been made during that year, the applicant is given the option to take up a subsequent agreement, leading to the issue of a further Certificate.

GILTS ON THE NATIONAL SAVINGS STOCK REGISTER

Government Stock or "Gilts" are stock Exchange Securities issued by the Government. They usually have a life of between 5 and 20 years and most pay a guaranteed fixed rate of interest twice a year throughout this period. When they reach the end of this period they are "redeemed" (which means repaid) at their face value. There are also a few "undated" Gilts with no set date for redemption and some Index-Linked Gilts, which have both the interest and the value of the capital on redemption increased in line with inflation.

The National Savings Stock Register offers investors an alternative to the main Bank of England Register and is run by National Savings from their Blackpool office. It enables customers to buy and sell Gilts by post. It is now possible to have most new issues of Gilts registered on the National Savings Stock Register. Customers have also been given the option of participating in the recent Bank of England reverse auctions. Interest on Gilts held on the National Savings Stock Register, although taxable, is paid in full without deduction of tax at source.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, index-linked increase or bonus remaining to the credit of investors in National Savings Certificates on March 31, 1989 was approximately £15,456·6 million. In 1988-89, approx. £2,165·7 million was subscribed and £2,523·1 million (excluding interest, index-linked increase or bonus) was repaid. Interest, index-linked increase, bonus or other sum payable is free of United Kingdom income tax (including investment income surcharge) and capital gains tax. The 1st-14th and 16th issues continue to attract interest.

Issue and Maximum Holding (in units)	Unit Cost £	Value after		Interest Per Unit
		Years	£ p	
Index-Linked Retirement Issue (June 2, 1975-Nov. 15, 1980) (120)	10			Unlike conventional issues where interest is accrued periodically the repayment value of Index-Linked Certificates, subject to their being held a year, is related to the movement of the U.K. General Index of Retail Prices.** N.B. Certificates of the Retirement Issue were on sale only to men aged 65 years and over and women aged 60 years and over, but may now be transferred to anyone.
Eighteenth (Jan. 29, 1979-Feb. 2, 1980) (150)	10	5	15·00	After 1 year, 50p is added, during 2nd year, 25p per completed 4 months, during 3rd year, 33p per completed 4 months, during 4th year, 42p per completed 4 months, during 5th year, 50p per completed 4 months.†
Nineteenth (Feb. 4, 1980-May 9, 1981) (500)	10	5	16·35	After 1 year 50p is added, during 2nd year 30p per completed 4 months, during 3rd year 35p per completed 4 months, during 4th year 55p per completed 4 months and during 5th year 75p per completed 4 months.†
2nd Index-Linked Issue (Nov. 17, 1980-June 29, 1985) (1,000)	10			Like Retirement Issue, the repayment value of 2nd Index-Linked Issue Certificates, subject to their being held a year, is related to the movement of the U.K. General Index of Retail Prices.** N.B. Certificates of the 2nd Index-Linked Issue were made available to anyone, regardless of age, from September 7, 1981.
Twenty-first Issue (May 11, 1981-Nov. 7, 1981) (500)	10	5	15·40	After 1 year, 75p is added, during 2nd year, 28p per completed 4 months, during 3rd year, 33p per completed 4 months, during 4th year, 40p per completed 4 months and during 5th year 54p per completed 4 months.†
Twenty-third (Nov. 9, 1981-March 10, 1982) (200)	25	5	41·20	After 1 year, £2·25 is added, during 2nd year, 87p per completed 4 months, during 3rd year, £1·02 per completed 4 months, during 4th year, £1·23 per completed 4 months and during 5th year £1·53 per completed 4 months.†
Twenty-fourth (April 19, 1982-Nov. 4, 1982) (200)	25	5	38·32	After 1 year, £1·80 is added, during 2nd year, 53p per completed 3 months, during 3rd year, 63p per completed 3 months, during 4th year, 77p per completed 3 months and during 5th year 95p per completed 3 months.†
Twenty-fifth (Nov. 17, 1982-Aug. 13, 1983) (200)	25	5	35·90	After 1 year, £1·50 is added, during 2nd year, 43p per completed 3 months, during 3rd year, 51p per completed 3 months, during 4th year, 62p per completed 3 months and during 5th year 79p per completed 3 months.†

3rd Index-Linked Issue (July 1, 1985– July 31, 1986) (200)	25			Like 2nd Issue Index-Linked Certificates, the repayment value of 3rd Issue Index-Linked Certificates, subject to their being held for one year, is related to the movement of the U.K. General Index of Retail Prices.** In addition, there is guaranteed extra interest of 2·5 per cent for the 1st year, 2·75 per cent for the 2nd year, 3·25 per cent for the 3rd year, 4·0 per cent for the 4th year and 5·25 per cent for the 5th year. This interest is worth 3·54 per cent compound over a full five years.
Thirty-first (Sept. 26, 1985–Nov. 11, 1986) (200)	25	5	36·48	After 1 year, £1·44 is added, during 2nd year, 44p per completed 3 months, during 3rd year, 55p per completed 3 months, during 4th year, 68p per completed 3 months and during 5th year, 84p per completed 3 months.*
4th Index-Linked Issue (Aug. 1, 1986–) (200)	25			Like 3rd Issue Index-Linked Certificates, the repayment value of 4th Issue Index-Linked Certificates, subject to their being held for one year, is related to the movement of the U.K. General Index of Retail Prices.** In addition, there is guaranteed extra interest of 3·0 per cent for the 1st year, 3·25 per cent for the 2nd year, 3·5 per cent for the 3rd year, 4·5 per cent for the 4th year, and 6·0 per cent for the 5th year. This interest is worth 4·04 per cent compound over a full five years.
Thirty-second (Nov. 12, 1986– March 10, 1987) (200)	25	5	38·03	After 1 year, £1·63 is added, during 2nd year, 50p per completed 3 months, during 3rd year, 62p per completed 3 months, during 4th year, 77p per completed 3 months and during 5th year, 96p per completed 3 months.*
Thirty-third (May 1, 1987–July 21, 1988) (40, plus special fa- cilities to hold up to ■ further 200)	25	5	35·06	After 1 year, the repayment value increases by 5·5 per cent for ordinarily held 33rd Issue. However, 33rd Reinvestment Certificates earn interest during the 1st year at the rate of 5·5 per cent per annum for each 3 month period. Thereafter all 33rd Issue earn 5·75 per cent after 2 years, 6·0 per cent after 3 years, 6·5 per cent after 4 years and 7·0 per cent after 5 years.*
Thirty-fourth (July 22, 1988–) (40, plus special fa- cilities to hold up to ■ further 200. Spe- cial facility ex- tended to 400 units with effect from Oct. 15, 1988)	25	5	35·89	After 1 year, the repayment value increases by 6·0 per cent for ordinarily held 34th Issue. However, 34th Reinvestment certificates earn interest during the 1st year at the rate of 6·0 per cent per annum for each 3 month period. Thereafter, all 34th Issue earn 6·25 per cent after two years, 6·5 per cent after 3 years, 7·0 per cent after 4 years, and 7·5 per cent after 5 years.*

* As announced by the Treasury. † From June 1982, 7th–14th, 16th, 18th, 19th, 21st, 23rd to 27th Issues will be extended on General Extension Rates determined by the Treasury. ** Index-linked certificates are eligible for an annual supplement of 1·5 per cent for the year to August 1, 1989.

TAXATION

INCOME TAX

Income tax is charged on the total income of individuals for a year of assessment commencing on April 6 and ending on the following April 5. The rates of tax and the calculation of liability will frequently differ, sometimes substantially, as between one year of assessment and another. The following information is confined to the year of assessment 1989-90, ending on April 5, 1990. A note appears on page 1009 outlining the new system of independent taxation of husband and wife which commences on April 6, 1990.

Liability is determined by establishing the taxable income for a year of assessment. The income will be reduced by an individual's personal allowances and other reliefs. The first £20,700 of taxable income remaining is assessable to income tax at the basic rate of 25 per cent, with any excess over this amount taxable at the higher rate of 40 per cent.

The two rates apply to the assessment of both earned and investment income. Indeed there is little distinction between the two classes, although the receipt of earned income may produce an entitlement to some allowances not available against investment income.

The tables on the following two pages show the income tax payable for 1989-90 by an individual on the amount of income specified, after deducting the personal allowance and age allowance. Elderly persons over the age of 74 years may suffer less tax. The taxpayer may also be entitled to further reliefs and allowances which reduce the tax payable below the amount shown in the tables.

Trustees administering settled property are chargeable to income tax at the basic rate of 25 per cent. Where the trustees retain discretionary powers, or income is accumulated, there will also be liability to the additional rate of 10 per cent. Companies residing in the United Kingdom are not liable to income tax but suffer corporation tax on income, profits and gains.

The charge to income tax broadly arises on all taxable income accruing from sources in the United Kingdom. Individuals who are resident in this territory may also become liable on income arising overseas. An individual is resident in the United Kingdom if he or she normally resides here. Persons not normally residing in the United Kingdom may become resident if they visit this territory for periods which average three months or more throughout a period of years, or are present for at least 183 days in a particular year. The existence of a place of abode in the United Kingdom may be sufficient to indicate residence if visits of any duration are made during the year of assessment.

Income arising overseas will often incur liability to foreign taxation. If that income is also chargeable to United Kingdom income tax, excessive liability may well arise. The United Kingdom has concluded Double Taxation Agreements with many overseas territories which ensure that the same slice of income is not doubly assessed. In the absence of such an agreement, foreign tax suffered can usually be relieved when calculating liability to United Kingdom income tax.

INCOME TAXABLE

Income tax is assessed and collected under several Schedules. Each Schedule determines the extent of liability and establishes the amount to be included in

taxable income. In some instances the actual income arising in a year of assessment will be charged to income tax for that year. A different basis of assessment may arise for income taxable under Cases I to V of Schedule D. Frequently, income assessable under these Cases will be that arising in a previous year or period but there are special rules where a new source is acquired or an existing source discontinued.

Following the withdrawal of income tax liability for most commercial woodlands in the United Kingdom, Schedule B ceased to apply from April 6, 1988. The contents of the remaining schedules are shown below.

Schedule A.—Tax is charged on annual profits from the ownership or occupation of land in the United Kingdom. This will include rents, ground rents and other income arising from land. Expenditure incurred by the landlord on maintenance, repairs, insurance and management can be subtracted from the annual profits. This Schedule does not include profits from farming, market gardening or woodlands, nor does it extend to mineral rents and royalties. Premiums arising on the grant of a lease for a period not exceeding fifty years are assessed to income tax. However, the amount of the taxable premium may be reduced by 2 per cent for each complete year, after the first year, of the leasing period. Income from furnished lettings is assessable under Case VI of Schedule D, unless an option is exercised for such income to be assessed under Schedule A. Where income arises from furnished holiday lettings additional expenditure may be included in calculating income chargeable to tax. Income from holiday lettings is treated as earned income.

Schedule C.—This Schedule is confined to interest or dividends on Government or public authority funds and certain payments made out of the public revenues of overseas countries.

Schedule D.—This Schedule is divided into six Cases as follows:

Cases I and II.—Profits arising from trades, professions and vocations, including farming and market gardening. Capital expenditure incurred on assets used for business purposes will often produce an entitlement to capital allowances which reduce the profits chargeable. These profits may also be reduced following the submission of claims for loss relief and other matters.

Case III.—Interest on Government Stocks not taxed at source (e.g. War Loan and British Savings Bonds), interest on National Savings Bank deposits and discounts. Interest up to £70 on ordinary National Savings Bank deposits is exempt from income tax. The exemption applies to both husband and wife separately. Interest on National Savings Bank Special Investment Accounts is not exempt.

Cases IV and V.—Interest from overseas securities, rents, dividends and all other income accruing outside the United Kingdom. Assessment is based on the full amount of income arising, whether remitted to the United Kingdom or retained overseas, but individuals who are either not domiciled in the United Kingdom or who are ordinarily resident overseas may apply the remittance basis. Overseas pensions are taxable but the amount arising may be reduced by 10 per cent for assessment purposes.

(1) SINGLE PERSONS

Income	Persons under 65		Persons 65 or over*	
	Income Tax	Average Rate	Income Tax	Average Rate

50,000	15,781	31.6	15,781	31.6
100,000	35,781	35.8	35,781	35.8

* Persons aged 75 or over suffer rather less tax on income falling below £14,000 on this table.

Case VI.—Sundry profits and annual receipts not assessed under any other Case or Schedule. These may include insurance commissions, post-cessation receipts and numerous other receipts specifically charged under Case VI.

Schedule E.—All emoluments from an office or employment are assessable under this Schedule. There are three Cases as follows:

Case I.—This applies to all emoluments of an individual resident and ordinarily resident in the United Kingdom.

Case II.—Of application where the individual is not resident or not ordinarily resident and extends to emoluments for duties undertaken in the United Kingdom.

Case III.—Applies in rare situations to other emoluments remitted to the United Kingdom.

Although earnings for overseas duties may be assessable under Case I where the employee is resident and ordinarily resident in the United Kingdom, a deduction of 100 per cent may be available, which reduces the overseas assessable earnings to nil. This deduction can be obtained where duties are performed overseas for a continuous period reaching or exceeding 365 days and is confined to earnings from the overseas activity.

For years up to and including that ending on April 5, 1989, alternative methods could be used to calculate the emoluments for a year of assessment. However, these methods ceased to apply from April 6, 1989 and were replaced by a new 'receipts' basis. Future liability is now governed by the date of receipt.

Where emoluments are assessable under Case I or Case II the date of receipt will comprise the earlier of:

- (a) the date of payment; and
- (b) the date entitlement arises.

In the case of company directors it is the earliest of the two dates given above with the addition of the following three which establish the time of receipt:

- (c) the date emoluments are credited in the employer's books;

(d) where emoluments for a period are determined after the end of that period—the date of determination; and

(e) where emoluments for a period are determined in that period—the last day of that period.

In those cases where emoluments for an earlier year are received after April 5, 1989, it is possible to avoid liability arising in the earlier year, with liability being confined to the year of receipt only.

The emoluments assessable under Schedule E include all salaries, wages, director's fees and other money sums. In addition, there are a wide range of benefits which must also be added to taxable emoluments. These include the provision of living accommodation on advantageous terms and advantages arising from the use of vouchers.

Further taxable benefits accrue to directors and employees receiving emoluments of £8,500 or more in the year of assessment. These benefits include the reimbursement of expenses, the availability of motor cars for private motoring, the provision of petrol or other fuel for private motoring, the provision of interest free loans, and other benefits provided at the employer's expense.

In arriving at the amount to be assessed under Schedule E all expenses incurred wholly, exclusively and necessarily in the performance of the duties may be deducted. This includes fees and subscriptions paid to certain professional bodies and learned societies.

Compensation for loss of office and other sums received on the termination of an office or employment are assessable to tax. However, the first £30,000 may be excluded and only the balance remains chargeable.

A part, not exceeding one half, of earnings received from an approved profit-related pay scheme is exempt from income tax.

Schedule F.—This Schedule is concerned with company dividends and distributions. A United Kingdom resident company paying a dividend or distribution must account to the Inland Revenue for advance corporation tax at the rate of one-third

(2) MARRIED COUPLES

Income	Couples under 65		Couples 65 or over*	
	Income Tax	Average Rate	Income Tax	Average Rate
£	£	per cent	£	per cent
5,000	156	3·1	—	—

100,000	35,145	35·1	35,145	35·1

* Persons aged 75 or over suffer rather less tax on income falling below £14,000 on this table.

calculated on the amount paid in 1989–90. A shareholder residing in the United Kingdom receives the dividend or distribution, together with a tax credit equal to the amount of advance corporation tax. The dividend or distribution is regarded as having suffered income tax, equal to the tax credit, at the basic rate, and where the shareholder is not liable, or not fully liable, at this rate a repayment can be obtained. Individuals liable at the higher rate of 40 per cent will incur further liability. Some payments made by an unquoted trading company to redeem or purchase its own shares will not be treated as distributions.

Building society interest and bank interest.—A special composite rate tax scheme applies to payments of building society interest and most payments of bank interest made to individuals. Interest of this nature incurs no liability to basic rate income tax in the hands of the depositor, nor can tax be recovered by a depositor not liable to income tax. The actual interest received must be "grossed up" at the rate of one third to establish the amount of total income received by a depositor liable at the higher rate of 40 per cent.

INCOME NOT TAXABLE

This includes interest on National Savings Certificates, most scholarship income, bounty payments to members of the armed services and annuities payable to the holders of certain awards. Dividend income arising from investments in personal equity plans may be exempt from tax. Income received under most maintenance agreements and court orders made after June 30, 1988 will not be liable to tax. Nor will payments made under many deeds of covenant executed after March 14, 1988 be recognized for tax purposes, unless the recipient is a charity.

SOCIAL SECURITY BENEFITS

Many Social Security benefits are not liable to income tax. These include family income supplement, long term sickness benefit, child benefit, war widow's pension, mobility allowance and numerous others. Among the limited range of benefits which are taxable is the retirement pension, widow's allowance, widowed mother's allowance, and unemployment benefits. Short-term sickness benefit and maternity pay payable by an employer is also chargeable to tax.

PAY AS YOU EARN

The Pay As You Earn system is not an independent form of taxation but has been designed to collect income tax by deduction from most emoluments. When paying emoluments to employees an employer is usually required to deduct income tax and account for that tax to the Inland Revenue. In many cases this deduction procedure will fully exhaust the individual's liability to income tax, unless there is other income. From the end of July 1989 the date of 'receipt' for assessment purposes (see above) will also identify the date of 'payment' when establishing liability for PAYE.

PERSONAL ALLOWANCES

The following personal allowances are available to individuals and may be subtracted when calculating income chargeable to income tax.

Personal Allowance.—A single person is entitled to a personal allowance of £2,785. This is increased to £4,375 for a married man whose wife is living with or maintained by him. For the year of marriage the increased allowance will only be available if marriage occurs before May 6. The increased allowance is then reduced by one-twelfth of £1,590 (£4,375 less £2,785) for each complete month preceding the marriage date.

The increased married man's allowance may be withdrawn where a wife's earning election is made (see 'Husband and Wife' on page 1009).

Age Allowance.—A single person who has attained the age of 65 years and is in receipt of income not exceeding £11,400 receives an age allowance of £3,400. This is increased to £5,385 where a married man, or his wife living with him, has reached 65. If the income exceeds £11,400 the allowance is reduced by one-half of the amount of the excess. This reduction continues until the age allowance is reduced to the amount of the normal personal allowance. The age allowance is increased to £3,540, or £5,565 for a married couple, where the taxpayer or his wife has reached the age of 75 years. These increased amounts are also subject to restriction where income exceeds £11,400. Age allowance is in substitution for, and not in addition to, the personal allowance.

Wife's Earned Income Allowance.—An allowance equal to the wife's earned income, but limited to a maximum of £2,785, may be obtained. This allowance is not granted in the year of marriage or where a wife's earnings election is in operation (see 'Husband and Wife' on page 1009).

Additional Personal Allowance.—An allowance of £1,590 is available to a single person who has a qualifying child resident with him or her in the year of assessment. The allowance can also be obtained by a married man whose wife is totally incapacitated by physical or mental infirmity throughout the year and child is similarly resident.

A 'qualifying child' for 1989–90 must be born during the year, be under the age of 16 years at the commencement of the year, or over the age of 16 years at the commencement of the year and either receiving full-time instruction at a university, college, school or other educational establishment or undergoing training for trade, profession or vocation throughout a minimum period of two years. It is also necessary that the child is the claimant's own or, if not such child, was either born during 1989–90 or under the age of 18 years at the commencement of the year and maintained by the claimant at his or her own expense during the whole of the succeeding twelve month period.

Only one allowance of £1,590 is available notwithstanding the number of children involved. This limit applies not only to a married couple but extends also to an unmarried couple living together.

Blind Person's Allowance.—An allowance of £540 is available to a single person if at any time during the year ending on April 5, 1990, that person was registered as blind on a register maintained by a local authority. The allowance will also be available to a married man if either he or his wife living with him is similarly registered. An increased allowance of £1,080 will be available if both husband and wife are registered blind persons.

Widow's Bereavement Allowance.—For the year of assessment in which a husband dies his surviving widow may obtain a widow's bereavement allowance, which is £1,590 for 1989–90. It is a necessary requirement that the parties were living together immediately before death. A similar allowance will be available in the year following death, unless the widow remarried in the year of death. The special widow's bereavement allowance is available only for the year of death and the following year. It cannot be obtained in subsequent years.

Life Assurance Relief.—Life assurance deduction relief is limited to premiums paid on policies made before March 14, 1984. No relief is available for policies issued after this date. Where the terms of a policy made before March 14, 1984 are subsequently varied or extended to produce increased benefits, future premiums paid may no longer qualify for relief.

When paying premiums under a qualifying policy made before March 14, 1984 the payer will deduct and retain income tax at the rate of 12·5 per cent (15 per cent before April 6, 1989). The ability to retain deductions made in this manner is not affected by the payer's liability to income tax on taxable income. No restriction to the deduction procedure arises if aggregate premiums paid during a year of assessment do not exceed £1,500 (calculated before deducting tax). Should premiums exceed this amount, relief will be confined to £1,500 or one-sixth of total income, whichever is the greater. Where sums deducted exceed the maximum limit, the excess must be accounted for to the Inland Revenue.

OTHER DEDUCTIONS

In addition to personal allowances, which reduce taxable income, other eligible deductions may be available to an individual. These include payments of interest.

In some instances interest paid by a business proprietor may be relieved when calculating profits chargeable to income tax under Case I or Case II of Schedule D. Many private individuals cannot obtain relief in this manner and must satisfy stringent requirements before relief will be forthcoming. In general terms, before interest can qualify for relief it must be annual, opposed to short, interest or paid to a bank, stockbroker or discount house. Relief will not be available to the extent that interest exceeds a reasonable commercial rate and no relief will be forthcoming for interest on an overdraft.

For 1989–90 relief will be available on the following payments:

- (a) Interest on a loan to purchase, develop or improve an interest in land owned by the individual and used as the only or main residence or similarly used by a dependent relative or former or separated spouse. 'Land' includes large houseboats and also caravans used for similar purpose. No relief is available for interest on loans applied after April 5, 1988 for the development or improvement of land, unless the work involves the construction of a new building. Nor can relief be obtained for interest on loans applied after this date for the purchase of property occupied by a dependent relative, spouse or former spouse. Relief may, however, be forthcoming for interest on a loan used to acquire some other property, perhaps to be used as the only or main residence on retirement, by an individual who is compelled to occupy property by reason of his or her work. If the loan, or aggregate of several loans, exceeds £30,000 relief is restricted to that amount. Where two or more persons apply loans after July 31, 1988 to acquire interests in a single building, those persons cannot, collectively, obtain relief for interest on more than £30,000 in relation to that building.
- (b) Interest on a loan to purchase or improve an interest in land which is let or available for letting at commercial rent. This interest is only capable of being deducted from rental income.
- (c) Interest on a loan made to acquire an interest in a close company or in a partnership.
- (d) Interest on a loan to a member of a partnership to acquire machinery or plant for use in the partnership business.
- (e) Interest on a loan to an employed person to acquire machinery or plant for the purposes of his employment.
- (f) Interest on a loan made for the purpose of contributing capital to an industrial co-operative.
- (g) Interest on a loan applied for investment in an employee-controlled company.
- (h) Interest on a loan made to elderly persons for the purchase of an annuity where the loan is secured on land. If the loan exceeds £30,000 relief is limited to interest on this amount.
- (i) Interest on a loan to personal representatives for the payment of capital transfer tax or inheritance tax.

Relief for many payments of mortgage interest is obtained through a special scheme known as MIRAS (mortgage interest relief at source). This applies to interest paid to a building society, bank, insurance company and certain other persons. When making payments of this nature the payer will deduct and retain income tax at the basic rate. This will provide the payer with full relief at the basic rate and no other relief will be necessary, unless the payer is liable at the higher rate of 40 per cent. Qualifying payments of interest outside the MIRAS scheme continue to produce relief by deduction from income chargeable to income tax.

Many employees pay contributions to an approved occupational pension scheme. The amount of their contributions may be deducted when establishing emoluments assessable under Schedule E. Relief should also be available for any additional voluntary contributions paid.

Self-employed individuals and those receiving earnings not covered by an occupational pension scheme may contribute under personal pension scheme arrangements. These schemes were introduced on July 1, 1988 to replace the previous retirement annuity schemes. Contributions paid may obtain income tax relief, subject to maximum limits.

Subject to a maximum of £40,000 in any one year the cost of subscribing for shares in an unquoted company may qualify as a deduction from taxable income under the Business Expansion Scheme. Many requirements must be satisfied before this relief can be obtained.

HUSBAND AND WIFE

It is a general rule for 1989–90 and earlier years that the income of a married woman living with her husband must be aggregated with his income for the purpose of charging income tax. Aggregation does not, however, apply for the year of assessment in which the parties marry. For that year only the husband will receive the personal allowance appropriate to a married man, although the amount of this allowance may require some restriction if marriage takes place after May 5. The wife will be taxed for

the year of marriage ■ if she were a single person and no wife's earned income allowance can be obtained by the husband.

For other years of assessment the income of husband and wife will be aggregated and if the husband does not satisfy the total tax liability the Inland Revenue may require the wife to pay the tax appropriate to her income.

Husband and wife may, however, claim to be separately assessed. This claim does not affect the total amount of income tax payable but allocates the liability between the parties. A quite different election may be made for separate assessment of wife's earnings. The effect of such an election is that the husband will be assessed on his income and on the wife's investment income and will receive the personal allowance appropriate to a single man. The wife will be separately assessed on her earned income and receive allowances ■ ■ single person. The wife's earnings election may be of advantage where the saving in higher rate tax on the wife's income is greater than the increased tax resulting from the loss of the married personal allowance.

INDEPENDENT TAXATION

A new system for the independent taxation of husband and wife will apply from April 6, 1990. It is a feature of this system that the income of a married couple will no longer be merged and assessed on the husband. Each spouse will be responsible for discharging his or her tax liability.

Under the new system both husband and wife will obtain a personal allowance, which may be replaced by the age allowance for older taxpayers. In addition, the husband will receive a married couple's allowance. If he cannot use, or fully use, this allowance the surplus may be transferred to the wife. Most other allowances will be granted to the spouse entitled to those allowances, but it is usually possible to allocate mortgage interest in whatever manner may be required.

Each spouse will be assessed on his or her income, with income from jointly held assets usually being apportioned equally between the two.

CAPITAL GAINS TAX

A person is chargeable to capital gains tax on chargeable gains which accrue to him or her during ■ year of assessment ending on April 5. The application of the tax has been amended substantially in recent years and the following information is confined to the year of assessment 1989–90, ending on April 5 1990.

Liability extends to persons who are either resident or ordinarily resident for the year but special rules apply where a person permanently leaves the United Kingdom or comes to this territory for the purpose of acquiring residence. Non-residents are not liable to capital gains tax unless, exceptionally, they carry on ■ business in the United Kingdom through ■ branch or agency.

Chargeable gains accruing to companies are assessable to corporation tax and not to capital gains tax.

Capital gains tax is chargeable on the total of chargeable gains which accrue to a person in ■ year of assessment, after subtracting allowable losses arising in the same year. Unused allowable losses brought forward from some earlier year may be offset against current chargeable gains but in the case of individuals this must not reduce the net chargeable gains for 1989–90 below £5,000.

RATE OF TAX

Where the net chargeable gains accruing to an individual during 1989–90 do not exceed £5,000 there will be no liability to capital gains tax. If the net gains exceed £5,000 the excess is chargeable at the taxpayers marginal rate of income tax. This is achieved by adding to the amount of revenue chargeable to income tax the net chargeable gains. The rate attributable to this top slice will disclose the rate of capital gains tax payable, which may be at 25 per cent, 40 per cent or ■ combination of the two. Although income tax rates are used, capital gains tax remains a separate tax.

Capital gains tax for 1989–90 normally falls due for payment on or before December 1, 1990. If the return or other information recording chargeable gains is delayed, interest may become chargeable.

HUSBAND AND WIFE

In the year of marriage chargeable gains accruing to husband and wife are separately assessed. Each party may independently obtain the £5,000 exemption for 1989–90 and there is no aggregation. For years other than the year of marriage chargeable gains

arising to a married woman living with her husband are assessed and charged on the husband, unless an election for separate assessment is made. This election will not reduce the aggregate tax payable but merely apportions liability between the spouses on an equitable basis.

This treatment of a married woman's gains will be discontinued after April 5, 1990. Following that date each spouse will be separately assessed on his or her gains, with each obtaining the appropriate annual exemption.

DISPOSAL OF ASSETS

Before liability to capital gains tax can arise a disposal, or deemed disposal, of an asset must take place. This occurs not only where assets are sold or exchanged but applies on the making of a gift. There is also a disposal of assets where any capital sum is derived from assets, for example, where compensation is received for loss or damage to an asset.

The date on which a disposal must be treated as having taken place will determine the year of assessment in which the chargeable gain or allowable loss falls. In those cases where a disposal is made under an unconditional contract, the time of disposal will be that when the contract was entered into and not the subsequent date of conveyance or transfer. A disposal under a conditional contract or option is treated as taking place when the contract becomes unconditional or the option is exercised. Disposals by way of gift are undertaken when the gift becomes effective.

VALUATION OF ASSETS

The amount actually received as consideration for the disposal of an asset will be the sum from which very limited outgoings must be deducted for the purpose of establishing the gain or loss. In some cases, however, the consideration passing will not accurately reflect the value of the asset and a different basis must be used. This applies, in particular, where an asset is transferred by way of gift or otherwise than by a bargain made at arm's length. Such transactions are deemed to take place for a consideration representing market value, which will determine both the disposal proceeds accruing to the transferor and the cost of acquisition to the transferee.

Market value represents the price which an asset might reasonably be expected to fetch on a sale in the open market. In the case of unquoted shares or securities it is to be assumed that the hypothetical purchaser in the open market would have available all the information which a prudent prospective purchaser of shares or securities might reasonably require if he were proposing to purchase them from a willing vendor by private treaty and at arm's length. This is an important consideration as the amount of information deemed to be available to a hypothetical purchaser may materially affect the price 'reasonably' offered in an open market situation. The market value of unquoted shares or securities will usually be established following negotiations with the Shares Valuation Division of the Capital Taxes Office.

Special rules apply to determine the market value of shares quoted on the Stock Exchange.

DEDUCTION FOR OUTGOINGS

Once the actual or notional disposal proceeds have been determined it only remains to subtract eligible outgoings for the purpose of computing the gain or loss. There is the general rule that any outgoings

deducted, or which are available to be deducted, when calculating income tax liability must be ignored. Subject to this, deductions will usually be limited to:

- (a) the cost of acquiring the asset, together with incidental costs wholly and exclusively incurred in connection with the acquisition;
- (b) expenditure incurred wholly and exclusively on the asset in enhancing its value, being expenditure reflected in the state or nature of the asset at the time of the disposal, and any other expenditure wholly and exclusively incurred in establishing, preserving or defending title to, or a right over, the asset; and
- (c) the incidental costs of making the disposal.

Where the disposal concerns a leasehold interest having less than 50 years to run, any expenditure falling under (a) and (b) must be written off throughout the duration of the lease. This recognises that a lease is a wasting asset which, at the termination of the leasing period, will retain no value.

INDEXATION ALLOWANCE

An indexation allowance will be available when calculating the chargeable gain or allowable loss. This allowance is based on percentage increases in the retail prices index between the month of March 1982, or if later the month in which expenditure is incurred, and the month of disposal. The increase is applied to the items of expenditure in (a) and (b) above to determine the amount of the indexation allowance. However, if the asset was acquired before March 31, 1982 and the disposal occurs after April 5, 1988, the allowance will be based on market value on that date.

The amount of the indexation allowance will be subtracted from the gain, or added to the loss, to calculate the chargeable gain or allowable loss arising on disposal.

ASSETS HELD ON MARCH 31, 1982

Where the disposal of assets held on March 31, 1982, takes place after April 5, 1988, the actual cost of acquisition will not usually enter into the calculation of gain. It is to be assumed that such assets were acquired on March 31, 1982, for a consideration representing market value on that date. The increase in value, if any, occurring before March 31, 1982, will not be assessable to capital gains tax.

EXEMPTIONS

There is a general exemption from liability to capital gains tax where the net gains of an individual for 1989-90 do not exceed £5,000. In the case of husband and wife living together there can be only one combined exemption of £5,000. However, following the introduction of independent taxation on April 6, 1990, each spouse will be separately assessed with each obtaining his or her own annual exemption.

The disposal of many assets will not give rise to chargeable gains or allowable losses and these include:

- (a) private motor cars;
- (b) Government securities;
- (c) Loan stock and other securities (but not shares) quoted on a United Kingdom stock exchange or dealt in on the Unlisted Securities Market;
- (d) Options and contracts relating to securities within (b) and (c);

- (e) National Savings Certificates, Premium Bonds, Defence Bonds and National Development Bonds;
- (f) currency of any description acquired for personal expenditure outside the United Kingdom;
- (g) decorations awarded for valour;
- (h) betting wins and pools, lottery or games prizes;
- (i) compensation or damages for any wrong or injury suffered by an individual in his person or in his profession or vocation;
- (j) life assurance and deferred annuity contracts where the person making the disposal is the original beneficial owner;
- (k) dwelling-houses and land enjoyed with the residence which is an individual's only or main residence;
- (l) tangible movable property, the consideration for the disposal of which does not exceed £6,000;
- (m) certain tangible movable property which is a wasting asset having a life not exceeding 50 years;
- (n) assets transferred to charities and other bodies;
- (o) works of art, historic buildings and similar assets;
- (p) assets used to provide maintenance funds for historic buildings;
- (q) assets transferred to trustees for the benefit of employees.

DWELLING-HOUSES

Exemption from capital gains tax will usually be available for any gain which accrues to an individual from the disposal of, or of an interest in, a dwelling-house or part of a dwelling-house which has been his only or main residence. The exemption extends to land which has been occupied and enjoyed with the residence and its garden or grounds. Some restriction may be necessary where the land exceeds one acre.

The gain will not be chargeable to capital gains tax if the dwelling-house, or part, has been the individual's only or main residence throughout the period of ownership, or throughout the entire period except for all or any part of the last two years. A proportionate part of the gain will be exempt if the dwelling-house has been the individual's only or main residence for part only of the period of ownership.

Where part of the dwelling-house has been used exclusively for business purposes, part of the gain arising on disposal will not be exempt. It will be comparatively unusual for any part to be used exclusively for such a purpose, except perhaps in the case of doctors' or dentists' surgeries.

In those cases where part of a qualifying dwelling-house has been used to provide rented residential accommodation this non-personal use may frequently be ignored when calculating exemption from capital gains tax, unless relatively substantial sums are involved.

Dwellings occupied by dependent relatives or separated or divorced former spouses, may also qualify for the exemption, but only where occupation commenced before April 6, 1988.

ROLL-OVER RELIEF

Persons carrying on business will often undertake the disposal of an asset and use the proceeds to finance the acquisition of a replacement asset. Where this situation arises a claim for roll-over relief may be made. The broad effect of such a claim is that all or part of the gain arising on the disposal of the old asset may be disregarded. The gain or part is then subtracted from the cost of acquiring the replacement asset. As this cost is reduced, any gain arising from the future disposal of the replacement asset will be correspondingly increased, unless of course a further roll-over situation then develops.

It remains a requirement that both the old and the replacement asset must be used for the purpose of the taxpayer's business. Relief will only be available if the acquisition of the replacement asset takes place within a period commencing twelve months before, and ending three years after, the disposal of the old asset, although the Board of Inland Revenue retain a discretion to extend this period where the circumstances were such that it was impossible for the taxpayer to acquire the replacement asset before the expiration of the normal time limit.

Whilst many business assets qualify for roll-over relief there are exceptions.

GIFTS

The gift of an asset is treated as a disposal made for a consideration equal to market value, with a corresponding acquisition by the transferee at an identical value. For gifts made by individuals and trustees before March 14, 1989, a wide-ranging claim for hold-over relief was available where the transferee was resident in the United Kingdom.

In the case of gifts made on or after this date, hold-over relief is limited to the transfer of certain assets only. The more important of these comprise:

- (a) assets used for the purposes of a trade or similar activity carried on by the transferor or his family company;
- (b) shares or securities of a trading company which is neither quoted on a stock exchange nor listed on the Unlisted Securities Market;
- (c) shares or securities of a trading company which is quoted or listed but which is the transferor's family company;
- (d) many interests in agricultural property qualifying for 50 per cent inheritance tax relief;
- (e) transactions which are lifetime transfers for inheritance tax purposes.

The effect of the claim is similar to that following a claim for roll-over relief, but adjustments will be necessary where some consideration is given for the transfer, the asset has not been used for business purposes throughout the period of ownership, or not all assets of a company are used for business purposes.

RETIREMENT RELIEF

Retirement relief is available to an individual who disposes by way of sale or gift of the whole or part of a business. It does not necessarily follow that the isolated disposal of assets will represent the disposal of the whole or part of a business. The main condition for granting this relief is that throughout a period of at least one year the business has been owned either by the individual or by a trading company in which the individual retained a sufficient shareholding interest. The relief extends also to cases where an individual disposes by way of sale or gift of shares or securities of a company. It must be demonstrated that the company was a trading company, the

individual retained a sufficient shareholding interest, and he was engaged as a full-time working director.

An individual who has attained the age of 60 years at the time of a disposal may obtain maximum retirement relief exceeding £300,000 for disposals taking place after April 5, 1988. The amount of this relief must be reduced if the conditions have not been satisfied throughout a ten year period. With a single exception no retirement relief can be obtained if the disposal occurs before the individual's 60th birthday. This exception arises where an individual is compelled to retire early on the grounds of ill-health. The normal retirement relief may then be obtained. Any retirement relief must be subtracted from the net gains arising on disposal, leaving the balance

remaining, if any, chargeable to capital gains tax in the normal manner.

DEATH

No capital gains tax is chargeable on the value of assets retained at the time of death. However, the personal representatives administering the deceased's estate are deemed to acquire those assets for a consideration representing market value on death. This ensures that any increase in value occurring before the date of death will not be chargeable to capital gains tax. If a legatee or other person acquires an asset under a will or intestacy no chargeable gain will accrue to the personal representatives, and the person taking the asset will also be treated as having acquired it at the time of death for its then market value.

INHERITANCE TAX

Throughout a period of some 90 years estate duty was payable on the value of an individual's estate at the time of death. Liability did not extend to lifetime gifts other than those made shortly before death and a limited range of further gifts where the donor continued to retain some benefit from the assets gifted. Estate duty ceased to apply for deaths occurring after March 12, 1975 following the introduction of capital transfer tax. This tax was not limited to the value of an estate at the time of death but applied to many gifts made during lifetime. Although the broad framework of capital transfer tax remains, very substantial changes were introduced for events occurring after March 17, 1986. In recognition of these changes the tax was renamed inheritance tax and now bears many characteristics of the former estate duty.

The nature and scope of inheritance tax is outlined below, but the comments made have little application to events occurring before 18 March 1986 when capital transfer tax applied.

Liability to inheritance tax may arise on a limited range of lifetime gifts and other dispositions and also on the value of assets retained, or deemed to be retained, at the time of death. An individual's domicile at the time of any gift or on death is an important matter. Domicile will generally be determined by applying normal rules, but special considerations may be necessary where an individual was previously domiciled in the United Kingdom but subsequently acquired a domicile of choice overseas. Where a person was domiciled in the United Kingdom at the time of a disposition or on death the location of assets is immaterial and full liability to inheritance tax arises. Individuals domiciled outside the United Kingdom are, however, chargeable to inheritance tax only on transactions affecting assets located in the United Kingdom.

The assets of husband and wife are not merged for inheritance tax purposes. Each spouse is treated as a separate individual entitled to receive the benefit of his or her exemptions, reliefs and rates of tax. Where husband and wife retain similar assets, special 'related property' provisions may require the merger of those assets for valuation purposes only.

LIFETIME GIFTS AND DISPOSITIONS

Gifts and dispositions made during lifetime fall under four broad headings, namely:

- (a) dispositions which are not transfers of value;
- (b) exempt transfers;
- (c) potentially exempt transfers; and
- (d) chargeable transfers.

Dispositions which are not transfers of value.—Several lifetime transactions are not treated as transfers of value and may be entirely disregarded for inheritance tax purposes. These include transactions not undertaken to confer gratuitous benefit, the provision of family maintenance, the waiver of the right to receive remuneration or dividends, and the grant of agricultural tenancies for full consideration.

Exempt transfers.—Certain other transfers are treated as exempt transfers and incur no liability to inheritance tax. The main exempt transfers are listed below:

Transfers Between Spouses.—Transfers between husband and wife are usually exempt. However, if the transferor is, but the transferee spouse is not, domiciled in the United Kingdom transfers will be exempt only to the extent that the total does not exceed £55,000. Unlike the requirement used for income tax and capital gains tax purposes, it is immaterial whether husband and wife are living together.

Annual exemption.—The first £3,000 of gifts and other dispositions made in a year ending on April 5 is exempt. If the exemption is not used, or not wholly used, in any year the balance may be carried forward to the following year only. The annual exemption will only be available for a potentially exempt transfer (see below) if that transfer subsequently becomes chargeable by reason of the donor's death.

Small Gifts.—Outright gifts of £250 or less to any person in one year ending April 5 are exempt.

Normal Expenditure.—A transfer made during lifetime and comprising normal expenditure is exempt. To obtain this exemption it must be shown that:

- (a) the transfer was made as part of the normal expenditure of the transferor;
- (b) taking one year with another, the transfer was made out of income; and
- (c) after allowing for all transfers of value forming part of normal expenditure the transferor was left with sufficient income to maintain his or her usual standard of living.

Gifts in Consideration of Marriage.—These are exempt if they satisfy certain requirements. The amount allowed will be governed by the relationship between the donor and a party to the marriage. The allowable amounts comprise:

- (a) gifts by a parent—£5,000
- (b) gifts by ■ grandparent—£2,500
- (c) gifts by ■ party to the marriage—£2,500
- (d) gifts by other persons—£1,000

Gifts to Charities.—Gifts to charities are exempt from liability.

Gifts to Political Parties.—Gifts to political parties which satisfy certain requirements are generally exempt.

Gifts for National Purposes.—Gifts made to an extensive list of bodies are exempt from liability. These include, among others:

- (a) The National Gallery;
- (b) The British Museum;
- (c) The National Trust for Places of Historic Interest or Natural Beauty;
- (d) The National Art Collections Fund;
- (e) The Nature Conservancy Council;
- (f) The Historic Buildings and Monuments Commission for England;
- (g) Any local authority;
- (h) Any university or university college in the United Kingdom.

A number of other gifts made for the public benefit are also exempt.

Potentially Exempt Transfers.—Lifetime gifts and dispositions which are neither to be ignored nor comprise exempt transfers incur possible liability to inheritance tax. However, relief is available for ■ range of potentially exempt transfers. These comprise gifts made by an individual to:

- (a) a second individual;
- (b) trustees administering an accumulation and maintenance trust; or
- (c) trustees administering ■ disabled person's trust.

The accumulation and maintenance trust mentioned in (b) must provide that on reaching a specified age, not exceeding twenty-five years, a beneficiary will become absolutely entitled to trust assets or obtain an interest in possession in those assets.

Further additions were made to the list of potentially exempt transfers for transactions taking place after March 16, 1987. These affect settled property administered by trustees where an individual, or individuals, retain an interest in possession. The transfer of assets to, the removal of assets from, or the rearrangement of interests in such property comprise potentially exempt transfers if the person transferring an interest and the person benefitting from the transfer are both individuals.

No immediate liability to inheritance tax will arise on the making of a potentially exempt transfer. Should the donor survive for ■ period of seven years, immunity from liability will be confirmed. However, the donor's death within the seven-year *inter vivos* period produces liability, as explained later, if the amounts involved are sufficiently substantial.

Chargeable Transfers.—Any remaining lifetime gifts or dispositions which are neither to be ignored, represent exempt transfers or potentially exempt transfers incur liability to inheritance tax. The range of such chargeable transfers is severely limited and is broadly confined to transfers made to or affecting certain trusts, transfers to non-individuals and transfers involving companies.

GIFTS WITH RESERVATION

A lifetime gift of assets made at any time after March 17, 1986, may incur additional liability to

inheritance tax if the donor retains some interest in the subject matter of the gift. This may arise, for example, where a parent transfers ■ dwelling-house to a son or daughter and continues to occupy the property or to enjoy some benefit from that property. The retention of ■ benefit may be ignored where it is enjoyed in return for full consideration, perhaps a commercial rent, or the benefit arises from changed circumstances which could not have been foreseen at the time of the original gift. The gift with reservation provisions will not usually apply to most exempt transfers.

There are three possibilities which may arise where the donor reserves or enjoys some benefit from the subject matter of a previous gift and subsequently dies, namely:

- (a) If no benefit is enjoyed within a period of seven years before death there can be no further liability.
- (b) If the benefit ceased to be enjoyed within ■ period of seven years before the date of death the original donor is deemed to have made a potentially exempt transfer representing the value of the asset at the time of cessation.
- (c) If the benefit is enjoyed at the time of death the value of the asset must be included in the value of the deceased's estate on death.

It must be emphasised that the existence of ■ benefit enjoyed at any time within ■ period of seven years before death will establish liability on gifts with reservation, notwithstanding that the gift may have been made many years earlier, providing it was undertaken after March 17, 1986.

DEATH

Immediately before the time of death an individual is deemed to make a transfer of value. This transfer will comprise the value of assets forming part of the deceased's estate after subtracting most liabilities. Any exempt transfers may, however, be excluded. These include transfers for the benefit of a surviving spouse, ■ charity and ■ qualifying political party together with bequests to approved bodies and for national purposes.

Death may also trigger three additional liabilities, namely:

- (a) A potentially exempt transfer made within the period of seven years ending on death loses its potential status and becomes chargeable to inheritance tax.
- (b) The value of gifts made with reservation may incur liability if any benefit was enjoyed within ■ period of seven years preceding death.
- (c) Additional tax may become payable for chargeable lifetime transfers made within seven years before death.

VALUATIONS

The valuation of assets is an important matter as this will establish the value transferred for lifetime dispositions and also the value of ■ person's estate at the time of death. The value of property will represent the price which might reasonably be expected from ■ sale in the open market. This price cannot be reduced on the grounds that the whole property is placed on the market simultaneously and may therefore depress values.

In some cases it may be necessary to incorporate the value of 'related property'. This will include property comprised in the estate of the transferor's spouse and certain property previously transferred to charities. The purpose of the related property valuation rules is not to add the value of the property to the estate of the transferor. Related property must

be merged to establish the aggregate value of the respective interests and this value is then apportioned, usually on a *pro rata* basis, to the separate interests.

The value of shares and securities quoted on the Stock Exchange will be determined by extracting figures from the daily list of official prices.

Where quoted shares and securities are sold within a period of twelve months following the date of death a claim may be made to substitute the proceeds for the value on death. This claim will only be beneficial if the gross proceeds realized are lower than market value on death. A similar claim may be available for interests in land sold within a period of three years following death.

RELIEF FOR ASSETS

Special relief is made available for certain assets, notably woodlands, agricultural property and business property. The effect of this relief is summarized below:

Woodlands.—Where woodlands pass on death the value will usually be included in the deceased's estate. However, an election may be made in respect of land in the United Kingdom on which trees or underwood is growing to delete the value of those assets. Relief is confined to the value of trees or underwood and does not extend to the land on which they are growing. Liability to inheritance tax will arise if and when the trees or underwood are sold on a future occasion.

Agricultural Property.—Relief is available for the agricultural value of agricultural property. Such property must be occupied and used for agricultural purposes and relief is confined to the agricultural value.

The value transferred, either on a lifetime gift or on death, must be determined. This value may then be reduced by a percentage. A higher 50 per cent deduction will be available if the transferor retained vacant possession or could have obtained that possession within a period of twelve months following the transfer. The increased deduction of 50 per cent may also be available for certain agricultural property held on March 9, 1981. In other cases, notably including land let to tenants, a lower deduction of 30 per cent is available.

It remains a requirement that the agricultural property was either occupied by the transferor for the purposes of agriculture throughout a two-year period ending on the date of the transfer, or was owned by him throughout a period of seven years ending on that date and occupied for agricultural purposes.

Business Property.—Where value transferred is attributable to relevant business property, that value may be reduced by a percentage. The reduction in value applies to:

- (a) property consisting of a business or an interest in a business;
- (b) shares or securities of a company, whether quoted or unquoted, which provided the transferor with control of the company immediately before the transfer. Control for this purpose may include that created by related property;
- (c) unquoted shares or securities not falling within (b) which provided the transferor with more than 25 per cent of voting rights;
- (d) other unquoted shares or securities not falling within (c);
- (e) any land, building, machinery or plant which, immediately before the transfer, was used wholly or mainly for the purposes of a business carried on by a company of which the transferor had control;

- (f) any land, building, machinery or plant which, immediately before the transfer, was used wholly or mainly for the purposes of a business carried on by a partnership of which the transferor was a partner; and
- (g) any land, building, machinery or plant which, immediately before the transfer, was used wholly or mainly for the purposes of a business carried on by the transferor and was then settled property in which he retained an interest in possession.

For property falling within (a) or (b) the deduction is 50 per cent. A similar deduction is available for property in (c), if the event occurs after March 16, 1987. A reduced deduction of 30 per cent applies to property in (d) to (g).

It is a general requirement that the property must have been retained for a period of two years before the transfer or death and restrictions may be necessary if the property has not been used wholly for business purposes. The same slice of property cannot obtain both business property relief and the relief available for agricultural property.

CALCULATION OF TAX PAYABLE

The calculation of inheritance tax payable adopts the use of a cumulative total. Each chargeable lifetime transfer is added to the total with a final addition made on death. The top slice added to the total for the current event determines the rate at which inheritance tax must be paid. However, the cumulative total will only include transfers made within a period of seven years before the current event and those undertaken outside this period must be excluded. Although inheritance tax was only introduced on March 18, 1986, the seven-year cumulative total will include chargeable lifetime gifts made before that date, subject to the seven-year limitation.

Lifetime transfers.—The limited range of lifetime transfers must be added to the seven-year cumulative total to calculate the amount of inheritance tax due. The tax is imposed at one-half of the rate shown below. However, if the donor dies within a period of seven years from the date of the chargeable lifetime transfer, additional tax may be due. This is calculated by applying tax at the full rate (in substitution for the one-half rate previously used). The amount of tax is then reduced to a percentage by applying tapering relief. This percentage is governed by the number of years from the date of the lifetime gift to the date of death and is as follows:

Period of years before death	Percentage
Not more than 3	100
More than 3 but not more than 4	80
More than 4 but not more than 5	60
More than 5 but not more than 6	40
More than 6 but not more than 7	20

Should this exercise produce liability greater than that previously paid at the one-half rate on the lifetime transfer, additional tax, representing the difference, must be paid. Where the calculation shows an amount falling below tax paid on the lifetime transfer, no additional liability can arise nor will the deficiency become repayable.

Potentially exempt transfers.—Where a potentially exempt transfer loses immunity from liability, due to the donor's death within the seven-year *inter vivos* period, the value transferred becomes liable to inheritance tax. Liability is calculated by applying the full rate shown below, reduced to the percentage governed by tapering relief if the original transfer occurred more than three years before death.

Death.—The final addition to the seven-year cumulative total will comprise the value of an estate on death. Inheritance tax will be calculated by applying the full rate shown below. No tapering relief can be obtained.

RATES OF TAX

In earlier times there were several rates of inheritance tax which progressively increased as the value transferred grew in size. However, for events taking place after March 14, 1988, ■ nil rate applies to the first £110,000 of value (or £118,000 for events after April 5, 1989). Any excess is charged at the single positive rate of 40 per cent.

Only one-half of the 40 per cent rate (namely 20 per cent) will be applicable for chargeable lifetime transfers.

It must be anticipated that the above rate and rateband will be amended on future occasions.

PAYMENT OF TAX

Inheritance tax usually falls due for payment six months after the end of the month in which the chargeable transaction takes place. Where a transfer, other than that made on death, occurs after April 5 and before the following October 1, tax falls due on the following April 30, although there are some exceptions to this general rule.

Inheritance tax attributable to the transfer of certain land, controlling shareholding interests, unquoted shares, businesses and interests in businesses, together with agricultural property, may usually be satisfied by instalments spread over ten years. No liability to interest arises where tax is paid

on the due date. In other cases, delay in the payment of tax may incur liability to interest.

SETTLED PROPERTY

Complex rules apply to establish inheritance tax liability on settled property. Where ■ person is beneficially entitled to an interest in possession, that person is effectively deemed to own the property in which the interest subsists. It follows that where the interest comes to an end during the beneficiary's lifetime and some other person becomes entitled to the property or interest, the beneficiary is treated ■ having made a transfer of value. However, for events taking place after March 16, 1987 this will usually comprise ■ potentially exempt transfer. No liability will arise, however, where the property vests in the absolute ownership of the previous beneficiary. The death of a person entitled to an interest in possession will require the value of the underlying property to be added to the value of the deceased's estate.

In the case of other settled property where there is no interest in possession (e.g. discretionary trusts), liability to tax will arise on each ten-year anniversary of the trust. There will also be liability if property ceases to be held on discretionary trusts before the first ten-year anniversary date is reached or between anniversaries. The rate of tax suffered will be governed by several considerations, including previous dispositions made by the settlor, transactions concluded by the trustees, and the period throughout which property has been held in trust.

Accumulation and maintenance settlements which require assets to be distributed not later than a beneficiary's twenty-fifth birthday may be exempt from any liability to inheritance tax.

CORPORATION TAX

Profits, gains and income accruing to companies resident in the United Kingdom incur liability to corporation tax. Non-resident companies are immune from this tax unless they carry on a trade in the United Kingdom through a permanent establishment, branch or office. Companies residing outside the United Kingdom may be liable to income tax at the basic rate on other income arising in the United Kingdom, perhaps from letting property. The following comments are confined to companies resident in the United Kingdom and have little application to those residing overseas.

Liability to corporation tax is governed by the profits, gains or income for an accounting period. This is the period for which financial accounts are made up, and in the case of companies preparing accounts to the same accounting date annually will comprise successive periods of twelve months.

RATE OF TAX

The amount of profits or income for an accounting period must be determined on normal taxation principles. The special rules which apply to individuals where a source of income is acquired or discontinued are ignored and consideration is confined to the actual profits or income for an accounting period.

The rate of corporation tax is fixed for a financial year ending on March 31. Where the accounting period of a company overlaps this date and there is a change in the rate of corporation tax, profits and income must be apportioned.

For earlier years the full rate of corporation tax was 52 per cent but this rate was progressively reduced ■ follows:

	Financial year	Per cent
12 months ending March 31, 1984	50	
March 31, 1985	45	
March 31, 1986	40	
March 31, 1987, 1988, 1989 and 1990	35	

The progressive reduction in the rate of corporation tax was made to compensate companies for the loss of stock relief and the withdrawal of certain allowances for capital expenditure which increased the amount of profits and income chargeable to that tax.

SMALL COMPANIES RATE

Where the profits of a company do not exceed stated limits, corporation tax becomes payable at the small companies rate. It is the amount of profits and not the size of the company which governs the application of this rate.

The level of profits which ■ company may derive without losing the benefit of the small companies rate has been frequently changed. In recent years the following small companies rate applies where profits do not exceed £100,000 (or £150,000 for the year ending March 31, 1990):

	Financial year	Per cent
12 months ending March 31, 1984	38	
March 31, 1985 and 1986	30	
March 31, 1987	29	
March 31, 1988	27	
March 31, 1989 and 1990	25	

If profits do exceed £100,000 (or £150,000) but fall below £500,000 (or £750,000), marginal small companies rate relief applies. The broad effect of marginal

relief is that the first £100,000 (or £150,000) of profits is taxed at the appropriate small companies rate. Profits falling in the margin exceeding £100,000 (or £150,000) then incur liability at the following marginal rates:

Financial year	Per cent
12 months ending March 31, 1984	55
March 31, 1985	48·75
March 31, 1986	42·5
March 31, 1987	36·5
March 31, 1988	37
March 31, 1989	37·5
March 31, 1990	37·5

If the accounting period of a company overlaps March 31, profits must be apportioned to establish the appropriate rate for each part of those profits.

The lower limit of £100,000 (or £150,000) and the upper limit of £500,000 (or £750,000) applies for a period of twelve months in duration and must be proportionately reduced for shorter periods. Some restriction in the small companies rate and the marginal rate may be necessary if there are two or more associated companies, namely companies under common control.

For accounting periods commencing after March 31, 1989, the small companies rate is not available for close investment-holding companies. These are mainly investment companies, other than those receiving most of their income from letting land and property.

CAPITAL GAINS

Chargeable gains arising to a company are calculated in a manner similar to that used for individuals. However, companies cannot obtain the annual exemption of £5,000, nor are they assessed to capital gains tax. In place of this tax companies suffer liability to corporation tax on chargeable gains.

For disposals taking place before March 17, 1987 only a fraction of the chargeable gain was assessable to corporation tax at the full rate. The fraction selected ensured that companies effectively suffered corporation tax at the rate of 30 per cent on the full chargeable gain. A different approach is adopted for disposals taking place after this date. The full chargeable gain, and not a fraction, is assessable to corporation tax. However, unlike the previous system, the chargeable gain is treated as ordinary profit, thereby obtaining the benefit of the small companies rate where figures are sufficiently low.

DISTRIBUTIONS

Dividends and other qualifying distributions made by a United Kingdom resident company are not satisfied after deduction of income tax. However, when making a distribution a company is required to account to the Inland Revenue for an amount of advance corporation tax. For distributions made in

the year ending April 5, 1990, the amount of advance corporation tax will represent one-third of the distribution. Thus a cash dividend of £75 paid to a shareholder will also require satisfaction of advance corporation tax amounting to £25.

Advance corporation tax accounted for in this manner for distributions made in an accounting period may usually be set against a company's corporation tax liability for the same period. Some restrictions are imposed on the amount which can be offset but any surplus can be carried forward, or carried backwards, and set against corporation tax due for other accounting periods.

A United Kingdom resident shareholder receiving a qualifying distribution also obtains a tax credit, which for the year ending April 5, 1990, is equal to one-third of the distribution made. Therefore the total income of the individual comprises the aggregate of the distribution and the tax credit. If the individual is not liable, or not fully liable, to income tax at the basic rate, all or part of the tax credit can be refunded by the Inland Revenue. Individuals with substantial income incur liability to income tax at the higher rate of 40 per cent on the aggregate of the distribution and the tax credit.

PAYMENT OF TAX

Corporation tax, less any relief for advance corporation tax, usually falls due for payment nine months following the end of the accounting period to which the tax relates. Companies which were carrying on business before 1966 may have a later due and payable date, but this is gradually being amended to achieve a common nine month period for all companies.

INTEREST

On making many payments of interest a company is required to deduct income tax at the basic rate and account for the tax deducted to the Inland Revenue. The gross amount of interest paid will usually comprise a charge on income to be offset against profits on which corporation tax becomes payable.

GROUPS OF COMPANIES

Each company within a group is separately charged to corporation tax on profits, gains and income. However, where one group member realizes a loss, other than a capital loss, a claim may be made to offset the deficiency against profits of some other member of the same group.

Claims are also available to avoid the payment of advance corporation tax on distributions, or the deduction of income tax on the payment of interest, for transactions between members of a group of companies. The transfer of capital assets from one member of a group to a fellow member will incur no liability to tax on chargeable gains.

VALUE ADDED TAX

REGISTRATION

Unlike income tax, capital gains tax, inheritance tax and corporation tax, which are collected and administered by the Inland Revenue, value added tax is the responsibility of Customs and Excise. Value added tax is charged on the value of supplies made in the United Kingdom by a registered trader and extends both to the supply of goods and to the supply of services. Liability also arises on the value of goods imported into the United Kingdom.

All traders, including professional men and women, together with companies, making taxable supplies of a value exceeding stated limits are required to register for value added tax purposes. Taxable supplies represent the supply of goods and services potentially chargeable with value added tax. The limits which govern mandatory registration are

amended annually but from March 15, 1989, an unregistered trader must register:

- (a) at any time, if there are reasonable grounds for believing that the value of taxable supplies in the year then beginning will exceed £23,600, or
- (b) at the end of any quarter, namely March 31, June 30, September 30 or December 31, if the total amount of taxable supplies has exceeded either £8,000 in the last quarter or £23,600 in the last four quarters. Registration will not be mandatory if it can be shown that the value of taxable supplies in the last quarter and the next three quarters is not expected to exceed £23,600.

Where the limits governing mandatory registration have been exceeded it is necessary for the trader to notify Customs and Excise. Failure to provide prompt notification may have unfortunate results as the person concerned will be required to account for value added tax from the proper registration date. In some situations a trader whose taxable supplies do not reach the mandatory registration limits may apply for voluntary registration.

A registered trader may submit an application for de-registration if the value of taxable supplies subsequently falls. From June 1, 1989, an application for de-registration can be made if the value of taxable supplies for the year beginning on the application date is not expected to exceed £22,600. De-registration can also be achieved if the value of taxable supplies in each of the two previous years did not exceed £23,600 and is unlikely to exceed this threshold in the following twelve-month period.

INPUT TAX

A registered trader will both suffer tax (input tax) when obtaining goods or services for the purposes of his business and also become liable to account for tax (output tax) on the value of goods and services which he supplies. Relief can usually be obtained for input tax suffered, either by setting that tax against output tax due or by repayment. Most items of input tax can be relieved in this manner but there are exceptions including the prohibition of relief for the cost of business entertaining. Where a registered trader makes both exempt supplies and also taxable supplies to his customers or clients there may be some restriction in the amount of input tax which can be recovered.

OUTPUT TAX

When making a taxable supply of goods or services a registered trader must account for output tax, if any, on the value of the supply. Usually the price charged by the registered trader will be increased by adding value added tax but failure to make the required addition will not remove liability to account for output tax.

EXEMPT SUPPLIES

No value added tax is chargeable on the supply of goods or services which are treated as exempt supplies. These include the provision of burial and cremation facilities, insurance, finance and education. The granting of a lease to occupy land or the sale of land will usually comprise an exempt supply, but there are numerous exceptions. In particular, the sale of new non-domestic buildings or certain buildings used by charities, constructed after April 1, 1989, can no longer be treated as exempt supplies.

From August 1, 1989 a taxable person may elect to tax rents and other supplies of buildings and agricultural land not used for residential or charitable purposes.

Exempt supplies do not enter into the value of taxable supplies which governs liability to mandatory registration. Such supplies made by a registered trader may however limit the amount of input tax which can be relieved. It is for this reason that the election available from August 1, 1989 may be useful.

RATES OF TAX

Two rates of value added tax have applied since June 18, 1979, namely:

- (a) a zero, or nil, rate; and
- (b) a standard rate of 15 per cent.

Although no tax is due on a zero-rated supply, this does comprise a taxable supply which must be included in the calculation governing liability to register.

ZERO-RATING

A large number of supplies are zero-rated, including, among others:

- (a) the supply of many items of food and drink for human consumption. This does not include ice creams, chocolates, sweets, potato crisps and alcoholic drinks. Nor does it extend to supplies made in the course of catering, for example, at a wedding reception or other social function, or to items supplied for consumption in a restaurant or cafe. Whilst the supply of cold items, for example sandwiches, for consumption away from the suppliers premises, is zero rated, the supply of hot food, for example fish and chips, is not;
- (b) animal feeding stuffs;
- (c) sewerage and water, unless supplied for industrial purposes after June 30, 1990;
- (d) books, brochures, pamphlets, leaflets, newspapers, maps and charts;
- (e) talking books for the blind and handicapped and wireless sets for the blind;
- (f) electricity, gas and coal, but supplies will be limited to domestic use after June 30, 1990;
- (g) supplies of services, other than professional services, when constructing a new building. The supply of materials for a new building is also zero-rated, together with the sale or the grant of a long lease for such a building. Before April 1, 1989 this applied to most new buildings but subsequently it is limited to domestic buildings and buildings used by charities. Alterations to some protected buildings are also zero-rated;
- (h) the transportation of persons in a vehicle, ship or aircraft designed to carry not less than twelve persons;
- (i) supplies of drugs, medicines and other aids for the handicapped;
- (j) supplies of clothing and footwear for young persons;
- (k) exports.

This list is not exhaustive but indicates the wide range of supplies which may be zero-rated.

COLLECTION OF TAX

Registered traders submit value added tax returns for accounting periods. Each accounting period is for three months in duration but arrangements can be made to submit returns on a monthly basis. The

return will show both the output tax due for supplies made by the trader in the accounting period and also the input tax for which relief is claimed. If the output tax exceeds input tax the balance must be remitted with the value added tax return. Where input tax suffered exceeds the output tax due the registered trader may claim recovery of the excess from Customs and Excise.

This basis for collecting tax explains the structure of value added tax. Where supplies are made between registered traders the supplier will account for an amount of tax which will usually be identical to the tax recovered by the person to whom the supply is made. However, where the supply is made to a person who is not a registered trader there can be no recovery of input tax and it is on this person that the final burden of value added tax eventually falls.

Tax on imports into the United Kingdom must be satisfied at the time of importation or perhaps later where special arrangements have been agreed.

An optional scheme will be made available for registered traders having an annual turnover of taxable supplies not exceeding £250,000. Such traders may, if they wish, render returns annually. Nine equal payments of value added tax will be paid on account, with a final balancing payment accompanying submission of the return.

BAD DEBTS

Many retailers operate special retail schemes for calculating the amount of value added tax due. These

schemes are, broadly, based on the volume of consideration received in an accounting period. Should a customer fail to pay for goods or services supplied, there will be no consideration on which value added tax falls to be calculated. In other cases, where the special retailers' schemes do not apply, output tax falls due on the value of the supply and liability is not affected by failure to receive consideration. This implies that there will be no relief for the value added tax element in bad debts. However, relief for this element may be obtained where the debtor becomes insolvent.

To avoid the problem of bad debts incurred by traders not operating a special retail scheme, an optional system of cash accounting is available. This scheme, confined to traders with annual taxable supplies not exceeding £250,000, enables returns to be made on a cash basis, in substitution for the normal supply basis. Traders using such a scheme will not, of course, include bad debts in the calculation of cash receipts.

OTHER SPECIAL SCHEMES

In addition to the schemes for retailers, there are several special schemes applied to calculate the amount of value added tax due and which also limit the ability to recover input tax. These schemes apply to the supply of second-hand motor cars, motor cycles, caravans, boats, electronic organs, aircraft and firearms, together with works of art, antiques and collectors' pieces.

OTHER TAXES AND STAMP DUTIES

The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed abroad, the period begins to run from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING IN ADDITION TO DUTY:—

Instruments presented after the proper time (subject to special provisions in some cases and subject to the commissioner's power to mitigate) a penalty equal to the duty £10

AGREEMENT for Lease, *see* LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad valorem* duty as if an actual conveyance on sale, with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see s. 59 (1), Stamp Act 1891*). If *ad valorem* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad valorem* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad valorem* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad valorem* duty paid.

AGREEMENT under seal subject to exemptions. 50p

ASSIGNMENT:

By way of sale—*see* Conveyance.

By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

BEARER INSTRUMENT:

Inland bearer instrument, i.e. share warrant, stock certificate to bearer or any other

instrument to bearer by which stock can be transferred, issued by a company or body formed or established in U.K. 1·5%.

Overseas bearer instrument, i.e., such an instrument issued in Great Britain by a company formed out of the U.K. 1·5%.

BILL OF SALE, ABSOLUTE, *see* CONVEYANCE ON SALE.

CAPITAL DUTY.—This was charged at 1 per cent on every £100 or fraction of £100 of the actual value of assets contributed by the members of a company provided the place of effective management of the company was in Great Britain or its registered office was in Great Britain but the place of its effective management was outside the E.C. (Finance Act 1973).

The tax was abolished by the Finance Act 1988 in respect of transactions entered into on or after March 16, 1988.

CONTRACT, *see* AGREEMENT.

CONTRACT OR GRANT FOR PAYMENT OF A SUPERANNUATION ANNUITY: for every £10 or fractional part of £10 5p

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, *see* below) of any property (except stock or marketable securities), where the Conveyance or Transfer contains a certificate of value certifying that the transaction does not form part of a larger transaction or a series of transactions in respect of which the aggregate amount or value of the consideration exceeds £30,000. Exceeds £30,000 (for every £100 or fraction of £100)

If the Conveyance or Transfer on Sale does not contain the appropriate statement, duty at the full rate of £1 for every £100 or fraction of £100 will be payable whatever the amount of the consideration.

nil

£1

However, if the consideration does not exceed £500, and the instrument does not contain a certificate of value, there are graduated duties ranging from 50p to £5. Conveyances to charities are exempt from duty under this head provided the instrument is stamped with a denoting stamp.

CONVEYANCE OR TRANSFER of any other kind: fixed duty 50p

However, under the Stamp Duty (Exempt Instruments) Regulations 1987, instruments which would otherwise fall under this head are exempt from stamp duty provided that the document is duly certified. The certificate must contain a sufficient description of the category into which the instrument falls, and must be signed by the transferor, his solicitor or agent. "I/We hereby certify that this instrument falls within category ... in the Schedule to the Stamp Duty (Exempt Instruments) Regulations 1987."

Covenant—For original creation and sale of any annuity, see CONVEYANCE.

DECLARATION OF TRUST, not being a Will or Settlement 50p

DEMISE, see LEASE

DUPLICATE OR COUNTERPART: Same duty as original, but not to exceed 50p

GIFT (see VOLUNTARY DISPOSITION).

GUARANTEE: If under seal 50p

INHERITANCE TAX

Inheritance Tax was introduced by the Finance Act 1986, to replace Capital Transfer Tax. The most radical change is to take outside the charge to tax many (but not all) lifetime gifts made more than seven years before the death of the donor.

Lifetime transfers made before March 18, 1986 may be subject to capital transfer tax and are broadly unaffected by the new regime. Thus, subject to exemptions and rate bands, capital transfer tax is payable on such transfers, at the lifetime rate with an additional charge to tax at the death rate if the donor dies within three years of the transfer, but no additional charge if the donor survives three years but dies within seven years of the gift.

If the gift is made on or after March 18, 1986 and comes within the definition of what is known as a potentially exempt transfer (for details, see page 1013), tax is not payable at the time of the gift and will not be payable if the donor survives the gift for seven years. If the donor does not survive for three years, the rate of tax payable on death for the year 1989-90 (based on the value of the property at the date of the gift) is shown in the following table:

Value transferred		Rate of tax
Lower limit £	Upper limit £	Per cent
0	118,000	Nil
over 118,000	—	40

If the donor survives the gift by more than three but less than seven years, tapering relief is given as follows.

Years between gift and death	Percentage of full charge
0-3	100
3-4	80
4-5	60
5-6	40
6-7	20

If the gift does not come within the definition of a potentially exempt transfer, e.g., the creation of a discretionary trust, it is taxed at the time of transfer at half the full rate, with an additional charge to tax if the donor dies within seven years.

Among the exemptions and reliefs given are the following:

- (a) Transfers between spouses.
- (b) The first £3,000 of gifts made in each tax year. There is provision for carry forward of this relief for one year only, in so far as it has not been used in the previous year.
- (c) Gifts which are normal expenditure out of income.
- (d) Gifts in consideration of marriage are exempt up to £5,000 if made by a parent; £2,500 if made by a grandparent or some other lineal ancestor, or by one party to another; and £1,000 in any other case.
- (e) Gifts to charities and certain other bodies.
- (f) Certain relief is given for agricultural and business property where a charge to inheritance tax arises on the donor's death within seven years, to the extent that the recipient still owns the property transferred or it has been replaced by similar property qualifying for relief.

INSURANCE POLICIES:

Life:

Exceeding £50 and not exceeding £1,000, for every £100 or part of £100	5p
Exceeding £1,000, for every £1,000 or any fractional part of £1,000	50p
Made after 1 August 1986 for period not exceeding 2 years	5p

The Finance Act 1989 abolished this charge for policies made after December 31, 1989.

LEASES—Lease or tack for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £500, £1; of any lands, tenements, etc., in consideration of any rent, according to the following table:

Annual rent not exceeding	*Term not exceeding			Term exceeding 100 years
	7 years	35 years	100 years	
£	£ p	£ p	£ p	£ p
5	Nil	0-10	0-60	1-20
10	Nil	0-20	1-20	2-40
15	Nil	0-30	1-80	3-60
20	Nil	0-40	2-40	4-80
25	Nil	0-50	3-00	6-00
50	Nil	1-00	6-00	12-00
75	Nil	1-50	9-00	18-00
100	Nil	2-00	12-00	24-00
150	Nil	3-00	18-00	36-00
200	Nil	4-00	24-00	48-00
250	Nil	5-00	30-00	60-00
300	Nil	6-00	36-00	72-00
350	Nil	7-00	42-00	84-00
400	Nil	8-00	48-00	96-00
450	Nil	9-00	54-00	108-00
500	Nil	10-00	60-00	120-00
Exceeding £500 for every £50 or fraction of £50				
	0-50	1-00	6-00	12-00

*If the term is indefinite the same duty is payable as if the term did not exceed 7 years.

AGREEMENT FOR LEASE: same as actual lease.

Where a consideration other than rent is payable, the same rule applies where the consideration does not exceed £30,000 under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £300 a year and a certificate of value is included in the Conveyance or Transfer.

Leases to charities are exempt from duty under this head provided the instrument is stamped with a denoting stamp.

MORTGAGES are exempt.

RECEIPTS FOR SALARIES, Wages and Superannuation, and other like allowances are exempt.

TRANSFER OF STOCK AND SHARES by way of gift or sale 0·5%

UNIT TRUST INSTRUMENT—Any trust instrument of a unit trust scheme: for every £100, and also for any fractional part of £100, of the amount or value of the property subject to the trusts created or recorded by the instrument 25p

By the Finance Act 1989, the transfer of units in certain authorized unit trusts are no longer subject to duty.

LEGAL NOTES

IMPORTANT

The purpose of these notes is to outline some of the more common parts of the law as they may affect the average person, and they are, of course, believed to be correct at the time of going to press. The law is constantly developing and changing, however, and it is dangerous for the layman to seek to be his own lawyer—he may not have access to completely up to date books and his case may, because of its special facts, come within an exception to the general rules set out herein.

It is always best to take expert advice, and if you have a solicitor who has acted for you in the past you should take any legal problems you have to him or her. If you do not have a solicitor ■ friend may be able to recommend one. Failing this your local Citizens' Advice Bureau (whose address can be obtained from the telephone directory or from any Post Office or Town Hall) has a list of solicitors in your area who deal with that particular type of problem which you have. If you are not able to find ■ solicitor in any of these ways you should ask for help in doing so from The Law Society, 113 Chancery Lane, London, WC2A 1PL or The Law Society of Scotland at 26 Drumsheugh Gardens, Edinburgh, EH3 7YR.

The Legal Aid and Legal Advice and Assistance schemes exist to make the help of the trained lawyer available to everyone whatever their means ■ of right. The best policy is to go to ■ solicitor without delay—timely advice will set your mind at rest but sitting on your rights can mean that you lose them.

Remember also that it is not necessary for ■ dispute to have arisen before you go to ■ solicitor—the Legal Advice and Assistance Scheme enables a solicitor to advise you on your rights, for instance under a tenancy agreement, the estate of a deceased person or in connection with matrimonial and consumer matters, and to write letters or take other steps on your behalf. A solicitor can also act for you where there is no question of ■ dispute at all, e.g. in the making of a will.

Your entitlement to take advantage of the scheme depends on your means (see below) but a solicitor or Citizens' Advice Bureau will be able to tell you whether you are covered by it.

BRITISH CITIZENSHIP

Types of citizenship.—There are three types of citizenship: British Citizenship; Citizenship of the British Dependent Territories; and British Overseas Citizenship.

Acquisition of citizenship on change of law.—The British Nationality Act 1981 which came into force on January 1, 1983 made substantial changes to the law of citizenship (which before that date did not distinguish between the three types of citizenship referred to above). Almost all persons who were then both citizens of the U.K. and Colonies and who had a right of abode in the U.K. became British Citizens when the Act came into force. Most U.K. and Colonies Citizens who did not have a right of abode in the U.K. became Citizens of the British Dependent Territories. This type of citizenship was, broadly speaking, conferred on citizens of the U.K. and Colonies by birth, naturalization or registration in dependent territories. Dependent territories include Hong Kong, Gibraltar, the Falkland Islands, and St. Helena and its dependencies. Any U.K. and Colonies Citizen who, on Jan. 1, 1983, did not acquire either British or British Dependent Territories' Citizenship became a British Overseas Citizen.

Later acquisition of British Citizenship.—British Citizenship is acquired automatically by those born in the U.K. (including, for this purpose, the Channel Islands and the Isle of Man) who have a parent who is a British Citizen or a parent who is settled in the U.K. Certain other categories of children born in the U.K. also acquire this type of citizenship, i.e. foundlings, those whose parents subsequently settle in the U.K., those who live in the U.K. for 10 years from birth and those adopted in the U.K.

A person born outside the U.K. may acquire British Citizenship in the following ways:—

- (i) if one of his parents is a British Citizen otherwise than by descent (e.g. parent was born in the U.K.).
- (ii) if one of his parents is a British Citizen serving the Crown overseas.
- (iii) if the Secretary of State consents to his registration while he is ■ minor.
- (iv) if he is ■ Citizen of the British Dependent Territories, ■ British Overseas Citizen, ■ British Subject or a British Protected Person (these last two are residual categories of people who have not acquired one of the three new types of citizenship) and has been lawfully resident in the U.K. for five years without any time restriction.
- (v) if he is ■ British Dependent Territories Citizen who is ■ national of the U.K. for the purposes of the E.C. (i.e. a Gibraltarian).
- (vi) if he is naturalized. Naturalization may be applied for only by adults and the Secretary of State has ■ discretion whether to permit it. The basic requirements are five years' residence, good character, sufficient knowledge of the English or Welsh language, and an intention to reside in the U.K. permanently. The requirements are somewhat less restrictive in the case of an applicant who is married to a British Citizen.

Acquisition of British Dependent Territories and British Overseas Citizenship after the Act.—These citizenships are intended for persons connected with certain Commonwealth countries other than the U.K. In the case of Dependent Territories the rules are very similar to those for acquiring British Citizenship except that the connection is with the Dependent Territory rather than with the U.K. British Overseas Citizenship may be acquired by the minor children and wives of British Overseas Citizens in certain circumstances.

Retention of nationality by persons born in or who are citizens of the Republic of Ireland.—By the Ireland Act 1949, a person who was born before December 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before January 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on December 6, 1922 or (ii) was on or after April 10, 1935, and before January 1, 1949, permanently resident there, or (iii) had before January 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition, by the British Nationality Act 1948, any citizen of Eire who immediately before January 1, 1949, was also ■ British subject can retain that status by submitting at any time ■ claim to the Home Secretary on any of the following grounds:

- (a) he has been in the service of the United Kingdom Government;

- (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory;
- (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the 'dominions'.

The British Nationality Act 1981 provides that persons who have made a claim may continue to be British subjects. Any citizen of Eire who was a British subject before January 1, 1949, who has not yet made a claim may do so provided that:

- (a) he is or has been in Crown Service under the government of the United Kingdom; or
- (b) he has associations by way of descent, residence or otherwise with the United Kingdom or any dependent territory.

Renunciation and Resumption.—A person may cease to be a British Citizen by renouncing his citizenship (with the consent of the Secretary of State in wartime). The renunciation is required to be registered with the Secretary of State and will be revoked if no new citizenship or nationality is acquired within six months. Once renounced, citizenship may be reacquired if the renunciation was necessary to retain or acquire some other citizenship or nationality. Similar rules as to renunciation and reacquisition apply in the case of British Dependent Territories Citizenships and of renunciation (but not reacquisition) in the case of British Overseas Citizenship.

Status of Aliens.—Property may be held by an alien in the same manner as by natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act 1949 declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CONSUMER LAW

1. THE SUPPLY OF GOODS AND SERVICES

(a) The Sale of Goods Act 1979 provides protection to the purchaser of goods, by implying certain terms into every contract for the Sale of Goods. These implied terms are:

- (i) A condition that the seller will pass good title to the buyer (unless the seller agrees to transfer only such title as he or his principal has) and warranties that the goods will be free from undisclosed encumbrances, and that the buyer will enjoy quiet possession of the goods.
- (ii) Where there is a sale of goods by description, a condition that the goods will correspond with that description, and where the sale is by sample and description, a condition that the bulk of the goods shall correspond with both sample and description.
- (iii) Where the seller sells goods in the course of a business, a condition that the goods will be of merchantable quality, unless before the contract is made, the buyer has examined the goods and ought to have noticed the defect, bearing in mind the purchaser's knowledge of the goods and the extent of the examination, or the seller has specifically drawn the attention of the buyer to the defect. Merchantable quality means fit for the purpose for which goods of the kind are commonly bought, taking into account any

description applied to them, the price and other relevant circumstances.

- (iv) A condition that where the seller sells goods in the course of a business, the goods are reasonably fit for any purpose made known to the seller by the buyer, unless the buyer does not rely on the seller's skill and judgment, or it would be unreasonable for him to do so.
- (v) Where there is a sale of goods by sample, conditions that the bulk of the goods shall correspond with the sample in quality, that the buyer will have a reasonable opportunity of comparing the bulk with the sample, and that the goods are free from any defect rendering them unmerchantable, which would not be apparent from the sample.

For these purposes, the broad difference between a condition and a warranty is that the remedy for a breach of an implied condition may enable the buyer to reject the goods and recover damages if he has suffered loss whereas the remedy for a breach of warranty will only enable the buyer to recover damages.

It is possible for a seller to exclude some of the above terms from a contract, subject to restrictions imposed by the Unfair Contract Terms Act 1977 given below. These restrictions give more protection ... where the buyer 'deals as consumer'. In a contract of sale of goods, a buyer 'deals as consumer' where there is ... a sale by a seller in the course of a business, the goods are of a type ordinarily bought for private use or consumption, and are sold to a person who does not buy or hold himself out as buying them in the course of a business. A buyer in a sale by auction or competitive tender never 'deals as consumer'.

The 1977 Act prohibits the exclusion of the implied terms given in (ii) to (v) above, where the buyer 'deals as consumer'. In sales where the buyer does not 'deal as consumer', terms purporting to exclude these implied terms, may be relied upon only to the extent that it would be reasonable to allow reliance. The Act provides guidelines for determining whether it would be reasonable to allow reliance. The implied terms in (i) above cannot be excluded whether the buyer 'deals as consumer' or not.

- (b) Similar terms to those implied in contracts of sale of goods are implied into contracts of hire-purchase by the Supply of Goods (Implied Terms) Act 1973, and the 1977 Act limits the exclusion of these implied terms in a similar manner.
- (c) Under the Supply of Goods and Services Act 1982, terms similar to those in the Sale of Goods Act relating to quiet possession, compliance with description, merchantable quality, fitness for purpose and correspondence with sample are implied into other types of contract under which ownership of goods passes (e.g. a contract for 'work and materials' such as a supply of new parts during the servicing of a motor car) and also into contracts for the hire of goods. In the case of contracts under which ownership of goods is to pass, there is also an implied condition as to title.

The 1977 Act limits the exclusion of these implied terms in a similar manner to the implied terms in the Sale of Goods Act.

- (d) The Supply of Goods and Services Act 1982 also implies into a contract for the supply of services, terms that the supplier will use reasonable care and skill, carry out the service within a reasonable

- ble time (unless the time is agreed) and charge ■ reasonable charge (unless the charge is agreed).
- (e) The Trade Descriptions Act 1968 provides that it is a criminal offence for a trader or businessman to apply a false trade description to any goods, or to supply or offer to supply any goods to which a false trade description has been applied. A trade description includes a description as to quantity, size, method, place and date of manufacture, other history, composition, other physical characteristics, fitness for purpose, behaviour or accuracy, testing or approval. It is also an offence to give a false indication as to the price of goods. Prosecutions are brought by trading standards inspectors.
- (f) The Fair Trading Act 1973 is also designed to protect the consumer. It provides for the appointment of ■ Director General of Fair Trading, whose duties include keeping under review commercial activities in the U.K. relating to the supply of goods or services to consumers, and to collect information to discover practices that may adversely affect the economic interests of the consumer. He may refer certain consumer trade practices to the Consumer Protection Advisory Committee, or of his own initiative take proceedings against firms that are trading unfairly. He may also publish information and advice to consumers. Examples of practices which have been prohibited by virtue of references made under this Act, include the use of certain void exclusion clauses in contracts for the sale of goods and hire-purchase, and advertisements by traders appearing to sell as private persons.
- (g) The Consumer Protection Act 1987 makes the producer of a product liable for any damage caused by a defect in that product, subject to certain defences.
- (h) The Consumer Protection (Cancellation of Contracts Concluded away from Business Premises) Regulations 1987 allow consumers a seven day period in which to cancel most contracts for supply of goods or services exceeding £35 in cost, where these contracts have been made following an unsolicited visit to the consumer's home or workplace.

Scotland

The Sale of Goods Act 1979, ■ consolidating Act, applies with some modification to Scotland. For example, it is not necessary in Scotland to distinguish between the words condition and warranty. The remedies of the buyer in both cases are the same, i.e. he can either within ■ reasonable time reject the goods and treat the contract as repudiated, or retain the goods and treat the failure to perform such material part ■ a breach which may give rise to a claim for compensation or damages.

2. CONSUMER CREDIT

England and Wales

The Consumer Credit Act 1974 provides a system for the protection of the consumer, of licensing and control of all matters relating to the provision of credit, or the supply of goods on hire or hire-purchase, administered by the Director-General of Fair Trading. A licence is required to carry on a consumer credit or consumer hire business, or to deal in credit brokerage, debt adjusting, counselling or collecting, for which group licences are available. Any 'fit' person may apply to the Director of Fair Trading for a licence which is normally renewable after ten years. A licence is not necessary if such types of business

are only transacted 'occasionally' or if exempt agreements only are involved.

For the Act's provisions to apply the agreement must be 'regulated', i.e. to be to individuals or partnerships only; must not be exempt, e.g. certain loans by local authorities or building societies; and the total credit must not exceed £15,000. The terms of ■ regulated agreement can be varied by the creditor, but only if the agreement gives him the right to do so, and the debtor receives notice in the prescribed form.

To be enforceable the agreement must be properly executed, and the specified information must be given during the antecedent negotiations for the contract. These are conducted by the creditor, credit broker or supplier (these being the creditor's agents) and begin when the parties first begin discussions.

The agreement must state certain information such as the amount of credit, the annual percentage rate of interest and the amount and timing of repayments.

An agreement is cancellable under the Act if oral representations were made in the debtor's presence during antecedent negotiations and the debtor signed the agreement other than at the creditor's (or credit broker's or negotiator's) place of business. Time for cancellation expires five clear days after the debtor receives ■ second copy of the agreement. The agreement must inform the debtor of his right to cancel and how to cancel.

Where there are arrangements or connections between the creditor and supplier the former is generally liable for any misrepresentation or breach of contract by the latter, and will thus be liable to indemnify the debtor.

If the debtor is in arrears or is otherwise in breach of the agreement, the creditor may not enforce the agreement, e.g. by repossessing goods, without serving a default notice on the debtor. This notice will give the debtor ■ chance to remedy the default. Even if the default is not remedied by the debtor, if the agreement is a hire-purchase or conditional sale agreement, the creditor cannot repossess the goods without an order of the court, if the debtor has paid one-third of the total price of the goods.

Where the agreement requires the debtor to make grossly exorbitant payments or is contrary to the ordinary principles of fair dealing the Court can reopen it either at the debtor's request or during enforcement proceedings and (*inter alia*) alter the terms of the contract or set aside any obligations it imposes so as to do justice between the parties. Whether an agreement is such an extortionate credit bargain is decided by reference (*inter alia*) to interest rates prevailing at the date of agreement, the pressure for finance the debtor was under, etc.

If ■ credit reference agency was used to check the debtor's financial standing the creditor must give the agency's name to the debtor who is entitled to see the agency's file on him on payment of ■ fee of £1.

Scotland

The Consumer Credit Act (see above) also extends to Scotland and goes far in assimilating the Scots Law on this topic with English Law. The Supply of Goods (Implied Terms) Act 1973 also applies to Scotland. Parts II and III only of the Unfair Contract Terms Act 1977 apply to Scotland. The Sale of Goods Act, 1979, applies with some modification to Scotland.

3. RECEIPTS

The law on receipts in Scotland is governed by the Prescription and Limitations (Scotland) Act 1973, which for this purpose came into force on July 25, 1976. Now, receipts need only be kept for ■ period of five years and if ■ creditor does not make ■ relevant claim within that period no action can be raised.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage. However, by the Crown Proceedings Act 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain, for example, the enforcement of judgments against the Crown.

Scotland.—The Act ■ amended extends to Scotland and has the effect of bringing the practice of the two countries as closely together ■ the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of National Savings Bank deposits. Section 2 (1) of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1966 removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from arrestment in execution.

DEATHS

REGISTRATION, BURIAL AND CREMATION

REGISTRATION

(For Certificates, *see* under FAMILY LAW—CERTIFICATES)

In England and Wales.—When a death takes place, information of it must be given in person to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons: (1) a relative of the deceased present at the death, or in attendance during the last illness. (2) Some other relative of the deceased. In default of any relatives (3) ■ person present at the death, or the occupier of the house in which the death happened. (4) An inmate of the house. A person (other than ■ relative) registering the death must be causing the disposal of the body. The registration must be made within five days of the death, or within the same time written notice of the death must be sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the Registrar. The doctor must give to the informant of the death ■ written notice of the signing of the certificate, which must be delivered to the Registrar. It is essential that a certificate for disposal should be obtained from the Registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves ■ penalty of ten pounds. The registration of ■ death is free of charge. After twelve months no death can be registered without the Registrar General's consent.

Whenever the death of a child is registered, particulars of the name and occupation of the mother are to be entered in the register.

A body must not be disposed of until (1) either the

Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made ■ disposal order (Births and Deaths Registration Act 1926, s. 1).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification ■ to the date, place, and means of the disposal of the body (*ib.*, S. 3).

Still born child (*see* under Births (Registration) below).

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, *see* the Registration of Births, etc. Act 1957.

Deaths (Registration) in Scotland.—The Registration of Births, Deaths and Marriages (Scotland) Act 1965 supersedes provisions in former Acts.

Personal notification within eight days must be given to the Registrar of (1) the registration district in which the death took place or (2) any registration district in which the deceased was ordinarily resident immediately before his death, and (3) when a body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When a person dies (in or out of Scotland) in ■ ship, aircraft or land vehicle during ■ journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the Registrar by one of the following: (1) any relative of the deceased; (2) any person present at the death; (3) the deceased's executor or other legal representative; (4) the occupier, at the time of the death, of the premises where the death took place; (5) if these fail, any other person having knowledge of the particulars to be registered. Failure to comply involves a penalty not exceeding £50.

The medical practitioner who attended the deceased during the last illness must sign ■ certificate of the cause of death within seven days. If there is no such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the Registrar shall, without charge, give the informant a certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to cremation. A body may, however, be interred before the death is registered, in which case the undertaker must deliver a certificate of burial to the Registrar within three days.

The mandatory death grant was abolished in April 1987 but assistance may be obtained from the Department of Social Security by those who are unable to meet funeral expenses.

BURIAL

The duty of burial is incumbent on the deceased person's executors (if any appointed); it is also ■ recognized obligation of the husband of a woman, and the parent of a child, also of ■ householder where

the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the parish, but nowadays this will apply only in villages and smaller towns. In populous districts cemeteries and crematoria have been established either by the local council or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a Registrar's certificate or authority from the Coroner for disposal, see above.

CREMATION

Under the Cremation Acts 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If cremation is desired it is advisable for instructions to be left in writing to that effect. However, in Scotland, even if the deceased wished his body to be cremated or anatomically dissected, relatives can still veto his or her wishes.

To arrange for cremation, the executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016), amended by the Cremation Regulations 1965 (No. 1146) and the Cremation (Amendment) Regulations 1985 (No. 153).

INTESTACY

ENGLAND AND WALES

As regards deaths on or after March 15, 1977, the position is governed by the Administration of Estates Act 1925, as amended by the Intestates' Estates Act 1952, the Family Provision Act 1966 and Orders made thereunder. If the intestate leaves a spouse and issue, the spouse takes (i) the 'personal chattels'; (ii) £75,000 with interest at six per cent from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. 'Personal chattels' are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the 'personal chattels'; (ii) £125,000 with interest at six per cent from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood or issue of such brothers and sisters. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If

resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £75,000 or £125,000, as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) children; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half-blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half-blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain eighteen or marry under that age, their shares going to the persons (if any) within the same group who do attain eighteen or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate, who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

In respect of deaths occurring on or after April 4, 1988, Section 18 of the Family Law Reform Act 1987 provides that references to any relationship between two persons shall, unless the contrary intention appears, be construed without regard to whether or not the father and mother of either of them, or the father and mother of any person through whom the relationship is deduced, have or had been married to each other at any time.

In respect of deaths after March 1976 the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 may allow other persons to claim provision out of the estate. See below under 'WILLS'.

For personal application for Letters of Administration, see below.

SCOTLAND

The Succession (Scotland) Act, 1964, provides that the whole estate of any person dying intestate shall devolve without distinction between heritable and moveable property. By that Act the surviving spouse of an intestate may, as a prior right (in addition to legal rights, see below), claim the matrimonial home to a maximum of £65,000, or a choice of one matrimonial home if more than one (or in certain circumstances the value thereof), with its furniture and plenishings not exceeding £12,000 in value, plus the sum of £21,000 if the deceased left issue or, if no issue, the sum of £35,000. These figures apply from

May 1, 1988 and may be increased from time to time by order of the Secretary of State.

The fact that a person born illegitimate no longer has any effect in their rights of succession as against a legitimate child, by virtue of the Law Reform (Parent and Child) (Scotland) Act 1986.

Legal rights, referred to above, are:-

Jus relictum(ae) : the right of a surviving spouse to one half of the deceased's net moveable estate after satisfaction of prior rights if there are no surviving children, or to one third if there are any surviving children.

Legitim: the right of surviving children to one-half of the net moveable estate of deceased parents if no surviving spouse, or one-third of the net moveable estate of deceased parents after satisfaction of prior rights where there is a surviving spouse.

There are no legal rights in heritage.

In general, the lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals, and so on in the ascending scale. The Crown is *ultimus haeres*. The right of representation, i.e., the right of the issue of a person who would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood. Where, however, succession opens to collaterals (which expression can include the brothers and sisters of an ancestor of the intestate) of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

WILLS

The following notes and those on Intestacy must be read subject to the provisions of the Inheritance (Provision for Family and Dependants) Act 1975 which can affect the estate of anyone dying domiciled in England and Wales after March 1976. Very broadly, a spouse, former spouse who has not remarried, a child of the deceased himself or one treated by him as a child of his family, or any person maintained by him at his death may apply to the Court under the Act. If the Court thinks that the will or the law of intestacy or both do not make reasonable provision for the applicant it may order payment out of the net estate of maintenance or a lump sum. It may also order the transfer of property, or vary certain trusts and the powers can affect property disposed of by the deceased in his lifetime intending to defeat the Act. It is up to the applicant to take the initiative, and the application must generally be made within six months of the grant of Probate or Letters of Administration.

Making a Will.—Every person over the age of 18 should make a will. However small the estate, the rules of Intestacy (see above) may not reflect a person's wishes to his property; in any case a will can do more than just deal with property. It can in particular appoint executors, give directions as to the disposal of the body and appoint guardians to take care of children in the event of the parents'

death. For the wealthier person an appropriately drawn will can operate to reduce the burden of Inheritance Tax.

It is considered desirable for a will to be properly drawn up by a solicitor. Although normally the making of a will is not one of the services which can be provided under the Legal Advice and Assistance Scheme, it can be provided for certain special categories of person such as the aged and infirm (see below).

In no circumstances should one person prepare a will for another person where the former is to take any benefit under it—this can easily lead to a suggestion of undue influence which may cause the will to be held bad.

Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of legal terms, such as heirs and issue, when the thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of codicils should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks.] which I make this [thirteenth] day of [February, 1990] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of
Testator;

William Jones (signed) of Green Gables, South Street,
Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading,
butcher.

Should it be desired to give legacies and/or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:-

2. I give to — of — the sum of £ — and to —

— of — the sum of £ — and to — of — all my books [or as the case may require].

3. All the residue of my property real and personal I give to — of —.

Terms.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words 'my money', apart from the context, will normally only include actual real money. The expression 'goods and chattels' should not be used. In giving particular property, ordinary language is sufficient, e.g., 'my house, Vine Cottage, Silver Street, Reading, Berks.' Such specific gifts fail if not owned by the testator at his death.

Residuary Legatees.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons 'the residue of my property', although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property owned at the time of death.

Execution of a Will, and Witnesses.—The testator should sign his name at the foot or end of the will, in the presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: 'Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same.'

Where there is any suspicion that the testator is not, by reason of age or infirmity, fully in command of his faculties it is desirable to ask his doctor to act as a witness (*see* Testamentary capacity below).

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—'The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence,' etc. Any omission in the observance of these details may invalidate the will. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

Executors.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

Lapsed Legacies.—If a legatee dies in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee predeceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

An important exception to the general rule of lapse stated above is contained in the Administration of Justice Act 1982, where there is a gift to a child or remoter issue of the testator who dies before the testator leaving issue who survive the testator. In such a case the gift will pass to the issue of the deceased child.

Testamentary Capacity.—A person under the age of 18 cannot make a will (except for soldiers, sailors and airmen and then only in exceptional circumstances).

So far as mental capacity is concerned the testator must be able to understand and appreciate the nature and effect of making a will, the property of which he can dispose and the claims to which he ought to give effect. If a person is not mentally able to make a will, provision exists (under the Mental Health Act 1983) for the Court to do this for him.

Revocation.—A later will revokes an earlier will if it expressly says so, or is completely inconsistent with it. Otherwise the earlier one is only revoked insofar as it is inconsistent with the later one. A will may also be revoked by burning, tearing or otherwise destroying the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, except that under the Administration of Justice Act 1982, there is a provision to the effect that if it appears from a will that at the time it was made the testator was expecting to be married to a particular person and that he intended that the will (or a disposition in the will) should not be revoked by the marriage to that person, the will will not be revoked by marriage to that person. The Act also provides that where after a testator has made a will the testator's marriage is terminated by a decree of divorce or nullity, any gift to a spouse shall lapse and any appointment of the spouse as executor shall be omitted from the will unless the will shows a contrary intention.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made in person at the Personal Application Department of the Principal Registry of the Family Division, a district probate registry or sub-registry, or a probate office by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of all property and assets left by the deceased; and (4) a list of debts and funeral expenses.

Intending applicants, before attending at a registry

or probate office, should write or telephone to the nearest probate registry or sub-registry for the necessary forms. Postal or telephone applications cannot be dealt with at the local probate offices, which are part-time only.

Certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed £5,000. See the Administration of Estates (Small Payments) Act 1965.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is preserved at St. Catherine's House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date. The indices to these volumes may be examined at St. Catherine's House and a copy of any will read. In the latter case, the original will proved in the District Registry, is kept there, and may be seen or a copy obtained, but a copy is sent to and filed at St. Catherine's House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

Recent Deaths.—A system introduced in 1975 enables a person to discover when a grant of Probate or Letters of Administration is made which may be invaluable to a creditor of the deceased or applicant under the Inheritance (Provision for Family and Dependants) Act 1975 (see above). A 'standing search' may be made by sending a request in the form set out below to the Record Keeper at the Principal Registry of the Family Division with a small fee. The searcher will receive particulars of any grant made in the previous twelve months or the following six months, including names and addresses of the executors or administrators and the Registry in which the grant was made.

Form of Search

In the High Court of Justice

Family Division

The Principal Registry (Probate)

I/We apply for the entry of a standing search so that there shall be sent to me/us an office copy of every grant of representation in England and Wales in the estate of:—

Full name of deceased:

Alternative or alias name

Full address

Exact date of death

Which either has issued not more than twelve months before the entry of this application or issues within six months hereafter

Sgd.—(full address).

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose effectively of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (*her jus relictæ*), and the children are entitled to another one-third share equally between them (*their legitim*). If he leave a widow but no children, or children but

no widow, the *jus relictæ* or *legitim* is increased to a one-half share of the net moveable estate. The remaining portion is known as the *dead's part*. A surviving husband and children have comparable rights (*jus relicti* and *legitim*) in the wife's estate. The dead's part is the only portion of which the testator can freely dispose. Legacies and bequests are payable only out of the dead's part. All debts are payable out of the whole estate before any division. Pupils, i.e. a girl up to the age of twelve or a boy up to the age of fourteen, cannot make wills. Formerly a minor could dispose only of movables but since the passing of the Succession (Scotland) Act 1964, a minor has a like capacity to test on heritable property. A will must be in writing and may be typewritten or even in pencil. A will may be either (1) holograph, i.e. written, dated and subscribed by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator or a typewritten document is not necessarily a holograph but may become so if the testator writes, in hand, at the foot of the form or document the words 'adopted as holograph' followed by his signature and the date. Words written on erasure or marginal additions or interlineations in holograph writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) attested, i.e. signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. The Conveyancing and Feudal Reform (Scotland) Act 1970, whilst altering generally the rules for the subscription of deeds, specifically (s. 44 (2)) makes no change in the rules applying to wills which must still be signed by the testator on every page. If the testator cannot write, or is blind, his will may be authenticated by a law agent, notary public or justice of the peace and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills may be registered in the Books of the Sheriffdom in which the deceased died domiciled, or in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child for whom no testamentary provision has been made may revoke a will. A will may be revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect. If a subsequent will is revoked, the earlier will is revived.

'Confirmation', the Scottish equivalent of Probate, is obtained in the Sheriff Court of the Sheriffdom in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either 'nominate' or 'dative'. An executor nominate is one nominated by the deceased in his will or, where such person has predeceased the testator, by the residuary beneficiary. An executor dative is one appointed by the Court in the case of intestacy or where the deceased had failed to name an executor in his will and there is no residuary beneficiary. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £13,000 gross, confirmation is obtained under a simplified procedure at reduced fees.

Presumption of Survivorship.—The Succession (Scotland) Act 1964 provides, by s. 31, that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the elder unless the elder person left testamentary provision in favour of the younger, whom failing in favour of a third person, the younger person having died intestate (partially or wholly); but if the persons dying were husband and wife, neither shall be presumed to have survived the other.

EMPLOYMENT

WAGES AND SICK PAY

Under the Wages Act 1986, subject to certain exceptions, employers may not make deductions from an employee's wages unless authorized by statute or contract or with the employee's prior written consent. There is an upper limit of one-tenth of gross pay for deductions from retail workers' wages on account of cash or stock shortages.

Under the Social Security and Housing Benefits Act 1982 as amended, an employee absent from work due to illness or injury is entitled to receive Statutory Sick Pay from the employer for a maximum period of 28 weeks in any year. No payment is made for the first three days of any period of illness. The employer can recoup the payments from his National Insurance contributions.

The Equal Pay Act 1970, which extends to Scotland, prevents discrimination, in regard to terms and conditions of employment, between men and women employed on like work in the same employment.

PARTICULARS OF TERMS OF EMPLOYMENT

Under the Employment Protection (Consolidation) Act 1978, an employer must give each full-time employee within 13 weeks of the beginning of the employment a written statement containing the following particulars of the contract between them:

- (1) the date when the employment began (when continuous employment began if previous work counts in continuous with this job);
- (2) The rate of remuneration (or how it is calculated);
- (3) the intervals at which wages are paid;
- (4) the hours of work;
- (5) the employee's entitlement to holidays (including public holidays) and holiday pay;
- (6) the title of the employee's job;
- (7) terms relating to sickness, injury and sick pay;
- (8) details of any pension scheme;
- (9) the length of notice which the employee should give and receive in order to terminate the contract.

In addition, the written particulars must specify any disciplinary rules; and also must identify the person to whom the employee can apply if he is dissatisfied with any disciplinary decision or to seek redress of any grievance and what further steps may ensue.

TERMINATION OF EMPLOYMENT

An employee may be dismissed without notice if he is guilty of gross breach of contract, such as disobedience to a lawful order or dishonesty. He is then only entitled to wages accrued due at the date of dismissal.

In other cases, the employee is entitled to reasonable notice which, under the Employment Protection (Consolidation) Act 1978, must not be less than one week if he has been continuously employed for four weeks, but less than two years; after two years it is

two weeks' notice increasing by one week's notice for each further full year worked up to a maximum of twelve weeks' notice after twelve years' service.

An employer who wrongfully dismisses an employee (i.e. with less than the length of notice to which he is entitled) is generally liable to pay wages for the period of proper notice.

An employee who has a fixed term contract has no claim against his employer for wrongful dismissal if his contract is not renewed when it expires. He may, however, have a claim for redundancy payment or compensation for unfair dismissal. If he is wrongfully dismissed before his contract expires, he is generally entitled to remuneration payable over the full period of the contract.

An employee may be entitled to redundancy payment or to compensation for unfair dismissal if the employment has been terminated by the employer (with or without proper notice) or he has a fixed term contract which expires without being renewed or the employment has been terminated by the employee by reason of the employer's breach of contract.

Under the Employment Protection (Consolidation) Act 1978, an employee who satisfies the foregoing conditions and has been continuously employed for two years and who is dismissed by reason of redundancy may be entitled to redundancy payment calculated by reference to his age, pay and length of service.

The Employment Protection (Consolidation) Act 1978 also enables an employee who is unfairly dismissed to complain to an Industrial Tribunal (generally within three months of dismissal). The onus will then be on the employer to prove that the dismissal was due to capability, conduct, redundancy, illegality or some other substantial reason justifying dismissal. The tribunal must then decide whether the employer acted reasonably in dismissing the employee. If the employer fails to prove that the dismissal was due to one or more of the above five reasons, or the tribunal decides that the employer did not act reasonably in dismissing the employee, the dismissal will be unfair, in which case the tribunal can:

- (a) order re-engagement or reinstatement;
- (b) award compensation consisting of a basic and a compensatory award.

For an employee to bring himself within the unfair dismissal provisions, he must have been continuously employed for a period of two years.

All complaints of unfair dismissal are referred to a conciliation officer or the Department of Employment and a very high proportion of complaints are disposed of in this way.

FAMILY LAW

ADOPTION OF CHILDREN

In England and Wales this is now mainly governed by the Children Act 1975 and the Adoption Act 1976. A court order is necessary to legalize the adoption, which, when completed, has the effect of making the adopted child the child of the adopter as if he or she had been born to the adopter in lawful wedlock, and the original rights and duties of the natural parents are thereby cut. The adopter has full rights as to custody, education etc. and the child is treated as his for the purpose of any devolution of property on an intestacy occurring or under any disposition made after the adoption order. The application may be

made to the High Court (Family Division) or to ■ County Court or Magistrates' Court.

Orders may be made in favour of married couples, single, widowed or divorced persons, but not of one party to a marriage alone unless the other spouse cannot be found, is physically or mentally incapable of making an application, or they are separated in circumstances likely to be permanent. A person aged under 21 cannot adopt.

The child's parents or guardians must consent unconditionally to the making of the order unless the court dispenses with the consent, which it may do if the parent cannot be found or is incapable of giving his consent, is withholding his consent unreasonably, or has neglected or ill-treated the child.

Restrictions are placed on societies which may arrange adoptions.

An adopted person aged over 18 may apply to the Registrar General for information to enable him to obtain ■ full certificate of his birth, but before being supplied with the information he will be informed that counselling services are available to him.

An adopter and the adopted child are within the prohibited degrees for the purposes of marriage to one another.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates, (see below.)

SCOTLAND

The Law is consolidated in the Adoption (Scotland) Act 1978 which is now fully in force. The law relating to fostering is consolidated in the Foster Children(s) Act 1984. A petition for adoption is presented either to the Sheriff Court or the Court of Session. As in England the petitioner(s) must be 21 or over and may be a married couple or one person who, if married, is living apart permanently from his or her spouse. The consent of the child's natural parents/guardians is required unless dispensed with, or the child is already free for adoption.

The Succession (Scotland) Act 1964 gives the adopted child the same rights of succession as ■ child born to the adopter in wedlock but deprives him of any such rights in the estates of his natural parents.

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

(1) The father or mother of the child. If they fail; (2) the occupier of the house in which the birth happened; (3) a person present at the birth; or (4) the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of £20. The registration of a birth is free. In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any Registrar.

Under the National Health Service Act 1977, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A still birth must be registered and a certificate signed by the doctor or midwife who was present at the birth or who has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy. A stillbirth may only be registered within three months of the birth.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act 1953, ■ amended by the Family Law Reform Act 1987. Special provisions apply to the registration and re-registration of births of abandoned children, and the re-registration of births of illegitimate children showing the father's name; the mother must normally be party to the latter application.

Birth at Sea.—The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad.—Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act 1957, applicable also to Scotland.

SCOTLAND

The Registration of Births, Deaths and Marriages (Scotland) Act 1965 supersedes former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (1) the registration district in which the birth took place, or (2) any registration district in which the mother of the child was ordinarily resident at the time of the birth and (3) in the case of a foundling child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body, was found, within two months from the date on which the child was found. When ■ child is born (in or out of Scotland) in ■ ship, aircraft or land vehicle during ■ journey and the child is conveyed therein to any place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (1) any relative of either parent who has knowledge of the birth; (2) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (3) any person present at the birth; (4) any person having charge of the child. Failure without reasonable cause involves a penalty not exceeding £50.

The name of the father of ■ child born out of wedlock may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at ■ later date on declaration by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of ■ person made legitimate by the subsequent

marriage of the parents or whose birth entry is affected by any matter respecting status or paternity, or has been so made as to imply that he is a foundling.

A still birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

CERTIFICATES OF BIRTHS, MARRIAGES, OR DEATHS

ENGLAND AND WALES

Certificates of Births, Deaths, or Marriages can be obtained at the Office of Population Censuses and Surveys, St. Catherine's House, 10 Kingsway, WC2B 6JP or from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriage can also be obtained from the incumbent of the church in which the marriage took place; or from the Nonconformist minister (or other authorized person) where the marriage takes place in a registered building (see, Marriage).

It is considered desirable when a certificate is required to consult the nearest Register Office who, if told the exact or approximate date and place of registration, will be able to advise on the best way of obtaining it, and any fees payable, which vary according to the type of certificate required and other factors.

Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the Office of Population Censuses and Surveys, St. Catherine's House, 10 Kingsway, WC2B 6JP. The Society of Genealogists, 14 Charterhouse Buildings, Goswell Road, EC1M 7BA, possess many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part of about 4,000 Parish Registers.

SCOTLAND

Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland, can be obtained personally at the General Register Office, New Register House, Edinburgh EH1 3YT, or from the appropriate local Registrar, on payment of the fee of £6.00 for a full extract entry of birth, death, or marriage (£8.00 by post), and £5.00 for an abbreviated certificate of birth (£7.00 by post). An abbreviated certificate of registration of deaths is issued free of charge for National Insurance purposes in certain cases. A Register of Divorces (which includes decrees of declaration of nullity of marriage) is kept by the Registrar General at the General Register Office. The fee for an extract decree is £6.00 (£8.00 by post).

There are also available at the General Register Office old parish registers of the date prior to 1855, which were formerly kept under the administration of the established Church of Scotland. An extract of an entry in these registers may be obtained on payment of the appropriate fee. A fee of £11.00 per day is payable for a general search of all the Scottish registers.

Registration of Presumed Deaths. (Prescription of Particulars) (Scotland) Regulations 1978 as read with Presumption of Death (Scotland) Act 1977 prescribe the particulars to be notified by the Clerk of Court to the Registrar General after a decree or variation order has been granted in an action of declarator of death of a missing person.

DIVORCE, SEPARATION AND ANCILLARY MATTERS

Matrimonial suits may be conveniently divided into two classes: (1) those in which it is sought to annul the marriage because of some defect; and (2) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it. By virtue of the Matrimonial and Family Proceedings Act 1984, all matrimonial causes are commenced in one of the divorce county courts designated by the Lord Chancellor or in the Divorce Registry in London. If the suit becomes defended, it may be transferred to the High Court.

(1) *Nullity of Marriage.*—This is now mainly governed as to England and Wales by the Matrimonial Causes Act 1973. A marriage is void *ab initio* if the parties were within the prohibited degrees of affinity, or were not male and female, or if it was bigamous or if one of the parties was under the age of consent, i.e. 16, or in the case of a polygamous marriage entered into outside England and Wales, that either party was at the time of the marriage domiciled in England and Wales. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage.

A marriage is voidable (i.e. a decree of nullity may be obtained but until such time the marriage remains valid) on the following grounds—(a) incapacity of either party to consummate; (b) respondent's wilful refusal to consummate; (c) that either party did not validly consent to the marriage, whether in consequence of duress, mistake, unsoundness of mind or otherwise; (d) that either party at the time of marriage was a mentally disordered person; (e) that at the time of marriage the respondent was suffering from communicable venereal disease; (f) that at the time of the marriage the respondent was pregnant by another man. In cases (e) and (f) the petitioner must have been ignorant of the grounds at the date of the marriage and in (c), (d), (e) and (f) proceedings must be instituted within three years of the marriage, although leave may be obtained to petition outside this period in the case of certain persons suffering from mental illness. In all cases the court shall not grant a decree where the petitioner has led the respondent to believe that he would not seek a decree and it would be unjust for it to be granted.

The 1973 Act provides that a decree of nullity in a voidable marriage only annuls the marriage from the date of the decree. The marriage remains valid until the decree, and any children of the marriage are legitimate. Children of a void marriage are illegitimate unless the father was domiciled in England and Wales at the child's birth (or father's death, if earlier) and at the time of conception (or marriage if later) both or either of the parents reasonably believed the marriage was valid.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (b) above, even though there has been no normal intercourse, but it may in certain circumstances constitute unreasonable behaviour for the purpose of divorce (see below). Further, it has been allowed as a defence to a charge of desertion against the aggrieved party.

(2) *Judicial Separation and Divorce.*—The second class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry

again). Either spouse may petition for judicial separation. It is not necessary to prove that the marriage has broken down irretrievably and the five facts listed (a) to (e) under divorce below are grounds for judicial separation.

Divorce.—The sole ground on which ■ divorce is obtained by either husband or wife is the irretrievable breakdown of the marriage. However, the court is precluded from holding that ■ marriage has irretrievably broken down unless it is satisfied of one or more of the following facts: (a) that the respondent has committed adultery since the marriage and the petitioner finds it intolerable to live with the respondent; (b) that the respondent has behaved in such ■ way that the petitioner cannot reasonably be expected to continue cohabitation; (c) desertion by the respondent for two years immediately before the petition; (d) five years separation immediately before the petition (but only two years where the respondent consents to the decree). Matrimonial Causes Act 1973.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of one year from the date of the marriage.

Desertion may be defined ■ a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

Provisions designed to encourage reconciliation.—The 1973 Act requires the solicitor for the petitioner to certify whether he has or has not discussed the possibility of a reconciliation and whether or not he has given the petitioner the names and addresses of persons qualified to help effect a reconciliation.

A total period of less than six months during which the parties have resumed living together is to be disregarded in determining whether the prescribed period of desertion or separation has been continuous. Similar provision for effecting a reconciliation exists in relation to the other proofs of breakdown, but a petitioner cannot rely on an act of adultery by the other party if they have lived together for more than six months after discovery of that act of adultery.

Obtaining the Decree Nisi.—Where the suit is defended, i.e. the respondent opposes the dissolution or the fact/ground on which the petitioner seeks it, the petition will be heard by a Judge in open court, the parties giving oral evidence. Where the suit is undefended, the evidence will normally take the form of ■ sworn written statement made by the petitioner which will be sent to the Court and read over by the Registrar. If he is satisfied that he or she has proved the contents of the petition, he will simply fix ■ date for ■ Judge to pronounce the decree nisi, it being unnecessary for either party to attend. Only if the Registrar is not satisfied ■ above will he order that the petition be heard formally by the Judge.

Children.—Subject to exceptions, the decree nisi cannot be made absolute unless a Judge by order declares that he is satisfied with the proposed arrangements for the welfare of any child of the family who is under 16, or under 18 and receiving education or vocational training. If there is no dispute as to the children between the parties and the proposed arrangements for residence, education etc. are specific, an appointment will be made for the Judge to interview one or both parents informally and if satisfied he will make an order to that effect. (This will usually be on the same day as the decree nisi is pronounced.) If not, the Registrar may inform

the parties that it is up to them to seek a hearing before the Judge to resolve the matters in dispute.

Decree Absolute.—Every decree of divorce or nullity is in the first instance ■ decree nisi, and the marriage subsists until the decree is made absolute, usually six weeks after decree nisi on the petitioner's application. After the decree absolute either party ■ free to remarry.

Maintenance, etc.—The court has wide powers to order either party to the marriage to make financial provision (e.g. periodical payments, a lump sum, the transfer of property) for the other party or any child of the family, having regard to the party's means, the recipient's needs and all the important aspects of the case. These so-called 'ancillary matters' often present more difficulty than the divorce itself, especially affecting the home, and may go on long after the marriage is dissolved. There is, however, nothing to stop financial matters being negotiated by the parties through their solicitors before the divorce goes through.

The court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN, ETC.

The Court may make orders in respect of access to and the custody, maintenance and education of children in connection with a suit for divorce, nullity or judicial separation (above), or with an application to the Magistrates (below) whether the suit succeeds or not. In addition, if there is no other matrimonial suit involved a parent may apply for custody under the Guardianship of Minors Acts 1971, and any person interested may apply to the High Court for the child to be made a ward of court.

In all cases the welfare of the child is the first and paramount consideration. The categories of child who may be covered by any particular type of proceedings differ according to the nature of those proceedings and to the nature of the particular relief sought, but it should be borne in mind that in connection with divorce, nullity and judicial separation ■ child which has been treated by the spouses as ■ child of the family may be included as a 'child of the family' ■ well ■ the children of the spouses themselves. This also applies to most maintenance cases in the magistrate's court (see below).

Under the Children Act 1975 ■ new procedure called 'Custodianship' has been introduced, allowing, for instance, long term foster parents to apply for custody of the foster child.

Any dispute relating to the above matters should be placed in the hands of ■ solicitor without delay (see Legal Aid, etc. below) and in particular it should be borne in mind that where there is financial need (because of continuing education or disability, for instance) maintenance may be ordered for children even beyond the age of majority.

SEPARATION BY AGREEMENT

Husband and wife may enter into an agreement to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case, who will often advise obtaining a court order by consent.

MAGISTRATES' CUSTODY AND MAINTENANCE ORDERS

For many years the law relating to domestic proceedings in magistrates' courts was out of line with the divorce law which was reformed in 1969. The Domestic Proceedings and Magistrates' Courts Act 1978 took effect in early 1981 and now contains the relevant law.

A husband or wife can apply to a magistrates' court for a matrimonial order on the grounds that the other spouse: (a) has failed to pay reasonable maintenance for the applicant; (b) has failed to make a proper contribution towards the reasonable maintenance of a child of the family; (c) has deserted the applicant; or (d) has behaved in such a way that the applicant cannot reasonably be expected to live with the respondent. If the case is proved the court can order: (a) periodical payments for the applicant; (b) periodical payments for a child of the family; or (c) a lump sum (not exceeding £1,000) for the benefit of the applicant and for any child of the family. In deciding what orders (if any) to make the magistrates must consider a number of guidelines which are similar to those governing financial orders on divorce. There are also special provisions relating to consent orders and separation by agreement. The court also has powers to make orders relating to the legal custody of a child of the family and these orders together with orders for child maintenance can be made even though the court makes no order for spouse maintenance. Legal custody can only be granted to one person but the court may order that the other party shall retain certain parental rights and exercise them jointly with the person who is awarded legal custody. Other provisions of the Act relate to access by grandparents, interim orders, and variation, discharge and revival of orders. An order may be enforceable even though the parties are living together, but in some cases it will cease to have effect if they continue to do so for six months. The hearing of matrimonial disputes is separate from ordinary court business, and the public are not admitted.

DOMESTIC VIOLENCE

The Domestic Violence and Matrimonial Proceedings Act 1976, the Domestic Proceedings and Magistrates' Courts Act 1978 (the former not being applicable to Scotland and the latter only to a limited extent; see below) and the Matrimonial Homes Act 1983 have made it easier for one spouse who has been subjected to violence by the other to obtain an order to restrain further violence and if need be to have the other excluded from the home. Such orders can be obtained very quickly, and a person disobeying them is liable to be imprisoned for contempt of court. There are some differences of detail between the three Acts; in particular the 1976 Act also applies to unmarried couples. Such orders may also be obtained in the course of suits for divorce and judicial separation.

SCOTLAND Divorce

Actions of divorce could formerly only be raised in the Court of Session, having jurisdiction to entertain such actions only if either of the parties to the marriage in question: (a) is domiciled in Scotland on the date when the action is begun; or (b) was habitually resident in Scotland throughout the period of one year ending with that date. As from May 1, 1984, however, when the Divorce Jurisdiction, Court Fees and Legal Aid (Scotland) Act 1983 came into force, actions of divorce may also be raised in the Sheriff Courts provided the above conditions (a) and (b) are complied with, and provided either party

to the marriage was resident in the Sheriffdom for a period of forty days ending with the date the action was begun, or was resident in the Sheriffdom for a period of not less than forty days ending not more than forty days before the date the action was begun.

The Scots Law of Divorce is now governed by the Divorce (Scotland) Act 1976, which for the purposes of divorce came into force on January 1, 1977. The sole ground of divorce is now irretrievable breakdown of the marriage. This can only be established in one of the following ways:

(a) The defending spouse has committed adultery since the date of the marriage. Here it is not necessary for the pursuing spouse to prove that the fact of adultery made it intolerable to live with the defending spouse.

(b) The defending spouse has behaved in such a way that the pursuing spouse cannot reasonably be expected to cohabit with him or her. It is immaterial whether or not the conduct founded upon is active or passive.

(c) The defending spouse has deserted the pursuing spouse for a continuous period of two years. There must be no question of the pursuing spouse having refused a genuine and reasonable offer to adhere. Nor is irretrievable breakdown established if cohabitation is resumed for a period of more than three months, after the two year period has expired.

(d) There has been no cohabitation at any time during a continuous period of two years immediately preceding the action between the parties to the action, and the defending spouse consents to the divorce being granted.

(e) There has been no cohabitation at any time during a continuous period of five years, as in (d), except that on the expiry of the five year period, the consent of the defending spouse is not required.

The facts of desertion and separation are not interrupted by the parties cohabiting for a period or periods not exceeding six months. However such a period or periods of cohabitation would not be included in the calculation of the two-year or five-year periods.

Encouragement of Reconciliation.—The burden of promoting a reconciliation between spouses in a divorce action in Scotland falls upon the Court by virtue of the 1976 Act. Where an action of divorce has been raised, it may be postponed by the Court to enable the parties to seek to effect a reconciliation, if the Court feels that there may be a reasonable prospect of such reconciliation. If the parties do cohabit during such postponement, no account shall be taken of such cohabitation if the action later proceeds.

Maintenance, etc.—The 1976 Act also provides that either party to a marriage can apply to the Court at any time prior to decree being granted for: (a) an order for interim custody of all or some of the children of the marriage under 16 years of age; (b) an order for access to all or some of the children of the marriage under 16 years of age in the custody of the other party.

The financial provisions on divorce in the 1976 Act have been superseded by the Family Law (Scotland) Act 1985 which allows either party to the marriage to apply to the court for an order for payment of a capital sum or for a periodical allowance or for an incidental order. The Act sets out principles to be applied by the Court, one of these being that the financial provisions awarded to a party who has been dependent for financial support on the other party

should be given over a period of not more than three years.

The Act also defines the rights and obligations of alimony between parents and children thereby excluding alimony between grandparents and grandchildren and of children to parents, and provides that a child is entitled to alimony up to the age of eighteen or to twenty five if in full time further education, and for the claiming of alimony whether in connection with an action of divorce etc. or independently.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent. The financial provisions on divorce contained in the Family Law (Scotland) Act 1985 also apply to an action for declaration of nullity of marriage.

Procedure.—Appearance in Court at a Proof in an undefended divorce action has been rendered unnecessary since April 1978. A full Proof is still necessary if the action is defended in any respect. In place of court appearance, affidavits (statements sworn before a Notary Public) by the pursuer and any witness are lodged in the Court together with a Minute by the solicitor craving decree.

A new simplified procedure for 'do-it-yourself' divorce was introduced in January 1983 for certain divorces. Thus, if the action is based on (d) or (e) above and will not be opposed, there are no children under 16 and no financial claims, then the applicant can write directly to the Court of Session, Divorce Section (SP), Parliament House, Edinburgh or the local Sheriff Court for the appropriate forms to enable him or her to proceed. The fee is £40 unless the applicant receives Income Support, Family Credit or legal advice and assistance in which case there is no fee.

Separation

Under the Divorce (Scotland) Act 1976, a decree of Judicial Separation can be obtained by proof of the same facts necessary to obtain decree of divorce, except that for the principle of irretrievable breakdown there is substituted that of grounds justifying separation. This type of action is competent in both the Court of Session and the Sheriff Court.

Custody of Children

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse, by reason of his or her behaviour, brought about the breakdown of the marriage does not of itself preclude him or her from being awarded custody. The Children Act 1975, as amended, also applies to Scotland.

Domestic Violence

The Matrimonial Homes (Family Protection) (Scotland) Act 1981, as amended, provides that one spouse, whether or not he or she has title to the matrimonial home, can obtain an exclusion order suspending the other spouse's occupancy rights in the matrimonial home. The Court (either Court of Session or Sheriff Court) is empowered to make such an order if satisfied that it is necessary to protect the applicant or any child of the family from any conduct, actual or threatened or reasonably apprehended of the other spouse which would be injurious to the physical or mental health of the applicant or child. In making the order the Court may include a warrant for the summary ejection of the non-applicant spouse from

the matrimonial home and for an interdict prohibiting him/her from entering it.

ILLEGITIMACY AND LEGITIMATION ENGLAND AND WALES

The former provisions of the Affiliation Proceedings Act 1957, under which a man could be summoned to petty sessions on the application of the mother of an illegitimate child, or by the Supplementary Benefits Commission where benefit has been paid for the requirements of the child, and the Justices, on his being proved to be the father of the child, could make an order requiring him to pay for its maintenance and education a sum in their discretion, have been replaced by extensive provisions relating to parental rights and duties in Part II of the Family Law Reform Act 1987. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong evidence. However, under the Family Law Reform Act 1969, any presumption of law as to the legitimacy (or illegitimacy) of any person may in civil proceedings be rebutted by evidence showing that it is more probable than not that the person is illegitimate (or legitimate) and in any proceedings where paternity is in question, blood tests may be ordered. If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

Legitimation.—The Legitimacy Act 1976 consolidates earlier legislation dating back to January 1, 1927. Where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimate child.

Declarations of Legitimacy.—A person claiming that he, his parents, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimization, or under any disposition (e.g., a will) coming into operation after such date, if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Property Rights of Illegitimate Children.—By the Family Law Reform Act 1969 the rights of an illegitimate child on an intestacy were broadly equated with those of a legitimate child, and in any disposition made after December 31, 1969, any reference to 'children' or other relatives was, unless the contrary intention appears, to be construed as including any person who is illegitimate or who is related through another person who is illegitimate. However, these provisions of the 1969 Act have been

replaced by the general provision of the Family Law Reform Act 1987 (see p. 1025).

SCOTLAND

The Law Reform (Parent & Child) Scotland Act 1986 implements the Scottish Law Commission's Report on Illegitimacy. The Act contains a general provision granting equality status to all persons whatever the marital status of their parents. The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen.

By Scots Law an illegitimate child is legitimated by and on the date of the subsequent marriage of its parents and there is no objection to there having been an impediment to the marriage of the parents at the time of the child's conception—see the Legitimation (Scotland) Act 1968, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimated. By the Registration of Births, Deaths and Marriages (Scotland) Act 1965, a child so legitimated, who has already been registered ■ illegitimate, may be re-registered ■ legitimate. The consent of the father of an illegitimate child to its adoption is not required unless he has been awarded parental rights by the court.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act 1949 prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) A Common Licence, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, SW1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 The Sanctuary, SW1), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishop's Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of a fee (see page 1037). Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

(ii) A Special Licence granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with the Archbishop's approval. Application must be made to the Faculty Office. (For fee, see page 1037).

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although ■ stranger-clergyman may be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.

- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be without licence).
- (f) A marriage of a person who is housebound or is detained at the place where he or she normally resides (see Section D).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (without licence)—if both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) Marriage by certificate (with licence)—one notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications mentioned above have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without licence*.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence*.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building*.—The marriage must generally take place at a building within the

district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act 1949. This section provides for the appointment of an 'authorized person' (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: 'I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband],' or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: 'I, A. B., do take thee, C. D., to be my wedded wife [or husband].'

(ii) *In a Register Office*.—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar or a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: 'I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.' and each party must say to the other: 'I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]' No religious ceremony may take place in the Register Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

(iii) *Other Cases*.—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue which has a certified marriage secretary, or in a private

dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

C.—MARRIAGE UNDER REGISTRAR GENERAL'S LICENCE

The main purpose of the Marriage (Registrar General's Licence) Act 1970, which came into force on January 1, 1971, is to enable non-Anglicans to be married in unregistered premises where one of the persons to be married is seriously ill, is not expected to recover and cannot be moved to registered premises.

D.—DETAINED AND HOUSE-BOUND PERSONS

The Marriage Act 1983 (which does not extend to Scotland) enables marriages of detained persons and house-bound persons to be solemnized at their place of residence. The Act came into operation on May 1, 1984.

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

The Marriage (Prohibited Degrees of Relationship) Act 1986 makes further provision with regard to the marriage of persons related by affinity e.g. after section 1 of the Act comes into force a marriage between a man and the daughter or grand-daughter of his former wife will not be void by reason only of that relationship if both parties have attained 21 at the time of the marriage and the younger party has not at any time before attaining 18 been a child of the family in relation to the other party.

Minors.—Persons under 18 years of age are generally required to obtain the consent of certain persons (see Marriage Act 1949, section 3 and 2nd Schedule as amended by the Family Law Reform Act 1969). Where both parents are living, both must consent, where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. (For the position where the parents of the child were not married to each other at the time of the birth, see section 9 of the Family Law Reform Act 1987.) No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

E.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there should give notice of intention to marry to the Registrar. As regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

FEES

Common Licence	£26-00
Special Licence	£50-00
Superintendent Registrar's Certificate:	
If both parties reside in same district	£24-50
If parties reside in different districts	£33-50
Superintendent Registrar's Licence:	
If marriage in a register office	£57-50
If marriage in a religious building	£66-50

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties. The Marriage (Scotland) Act 1977, which came into force on January 1, 1978, states or restates the law in convenient form. References in this section are to that Act.

Impediments to Marriage. These are: (a) nonage, i.e., where either party is under the age of 16; (b) forbidden degrees of relationship (Section 2) as amended by the Marriage Prohibited Degrees of Relationship Act 1986; (c) subsisting previous marriage; (d) incapacity to understand the nature of the contract; (e) both parties of the same sex; (f) non-residence, i.e., if the requirements of prior residence of one or other of the parties in Scotland have not been complied with. The Act also states the grounds on which certain marriages may be declared void but this is amended by the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980 which prevents a marriage being rendered void solely due to the failure to comply with certain formalities, provided the particulars of that marriage are entered in a register of marriages by or at the behest of an appropriate registrar.

Marriages may be regular or irregular, thus:—

REGULAR MARRIAGES

A regular marriage is one which is celebrated by a Minister of Religion or authorized Registrar or other celebrant specified in the Act. The parties must submit to the District Registrar a statutory notice of intention to marry the fee for which is £5-75 each. The Registrar will then enter the parties' names and particulars in the Marriage Notice Book which must also show the intended date of the marriage. He must then display the notice of intention to marry in a prominent public place until the intended date, and any person claiming an interest may lodge written objections thereto with the Registrar (Section 5). The Registrar, after fourteen days of receipt of the Marriage Notice and on being satisfied that there are no legal impediments to the marriage, will issue to either or both parties a Marriage Schedule. The

fourteen day period may be shortened under exceptional circumstances. The Marriage Schedule must be produced to the celebrant of the marriage. The fee for the solemnization ceremony in a Registry Office is £13. After the ceremony the marriage must be registered with the Registrar General for inclusion in the Register of Births, Deaths and Marriages, within three days. Within one month of the ceremony, the fee for an extract marriage certificate is £3.50; thereafter it is £6.00.

IRREGULAR MARRIAGES

Since the Marriage (Scotland) Act 1939 the only form of irregular marriage to be recognised by law, marriage by habit and repute, remains competent under the 1977 Act. If the parties live together constantly as husband and wife and are held to be such by the general repute of the neighbourhood and among their friends and relations, then there may arise a presumption from which marriage can be inferred. Before such a marriage can be registered, however, a decree of declarator of marriage must be obtained from the Deputy Principal Clerk of the Court of Session. It is the duty of the Deputy Principal Clerk to register the decree as soon as it is granted.

JURY SERVICE

Every local or parliamentary elector between the ages of eighteen and sixty-five who has resided in the United Kingdom, Channel Islands or Isle of Man for at least five years since he attained the age of thirteen will be qualified to serve on a jury unless he is ineligible or disqualified.

Ineligible persons include those who have at any time been judges, magistrates and certain senior court officials, those who within the previous ten years have been concerned with the law (such as barristers and solicitors and their clerks, court officers, coroners, police, prison and probation officers); priests of any religion and vowed members of religious communities; and certain sufferers from mental illness.

Disqualified persons are those who have at any time been sentenced by a Court in the United Kingdom, Channel Islands or Isle of Man, to a term of imprisonment of five years or more, or a person who in the last ten years has (a) served any part of a sentence of imprisonment, youth custody or detention; (b) been detained in a Borstal institution; (c) had passed on him or made in respect of him a suspended sentence of imprisonment or order for detention; or (d) had made in respect of him a community service order. A person who at any time in the last five years has been placed on probation is also disqualified.

Some others are excusable as of right. These include members and officers of the Houses of Parliament, full-time serving members of the forces, registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions, and any person who has served on a jury in the two years before he is summoned. In other cases the court may excuse a juror at its discretion (e.g., where the service would be a hardship to the juror).

If a person serves on a jury knowing himself to be disqualified or ineligible he is liable to be fined up to £2,000 or £400 respectively.

A juror is entitled to subsistence and travelling expenses, compensation for other expenses incurred in consequence of attendance for jury service, loss of earnings and loss of national insurance benefits, but

certain maximum figures (which are revised from time to time) are laid down.

A verdict of a jury must normally be unanimous but after two hours consideration (or such longer period as the Court thinks reasonable), a majority verdict is acceptable if ten jurors agree to it (or nine if the size of the jury has been reduced to ten, e.g., by illness during the trial).

Jury trial is now very unusual in civil cases but a person charged with any but the least serious crimes is entitled to be tried by a jury. The defendant may object to any juror if he can show that that juror ought not to be on the jury (e.g., because he is ineligible or is biased against him).

The Coroners' Juries Act 1983 (which does not extend to Scotland) makes new provision in relation to qualification to serve on coroners' juries.

JURY SERVICE IN SCOTLAND

It is the duty of the sheriff principal of each sheriffdom, in respect of each sheriff court district in his sheriffdom, to maintain a book, known as the 'general jury book', containing the names and designations of persons within the district who are qualified and liable to serve as jurors. The book, which is compiled from information which every householder is required to provide, is kept open for the inspection by any person, upon payment of a nominal fee, at the sheriff clerk's office for the district. Part II of the Juries Act 1949 (amended by regulations following thereon and by the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980) applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors and for loss of earnings.

The number of a jury in a civil cause in the Court of Session is twelve and in the Sheriff Court seven. In a criminal trial the number is fifteen.

QUALIFICATIONS

Under S.1 of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980, every man or woman between the ages of 18 and 65 who is for the time being registered as a parliamentary or local government elector and who has been ordinarily resident in the United Kingdom, the Channel Islands or the Isle of Man for any period of at least five years since attaining the age of 13 years, is qualified to serve on a jury.

Ineligible persons include those who at any time within the past ten years have been judges of the supreme courts, sheriffs and certain other senior court officials, those who at any time within the past five years have been concerned with the administration of justice (such as advocates and their clerks, solicitors, court staff, police officers, prison officers, sheriff officers, procurator fiscals, and members of parole boards and children's panels), and certain sufferers from mental illness.

The same rules for disqualified persons operate in Scotland as in England. Those excusable as of right are members and officers of the Houses of Parliament, full time serving members of the forces, registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions, ministers of religion and other persons in holy orders, and any person who has attended for jury service in the past five years.

If a person serves on a jury knowing himself to be disqualified or ineligible, he is liable to be fined up to £2,000 or £400 respectively. Jurors failing to attend

without good cause are liable to a maximum fine of £400.

LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to a lease is governed by the lease itself, the position is complicated by numerous statutory provisions. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:—

(1) As to agricultural holdings—the Agricultural Holdings Act 1986. Among other things, the Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts 1927 and 1954, and the Law of Property Act 1969, Pt. I. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to dwelling houses—the complicated mass of legislation is embodied in the Rent Act 1977 and the Housing Act 1988.

If a tenancy of a house is within the Rent Act, the tenant has a personal right to reside there, and he may only be ousted on certain grounds. Tenancies with full Rent Act protection are known as regulated tenancies. The maximum rent recoverable under such a tenancy is the rent agreed between the landlord and tenant, unless a fair rent has been registered, in which case that is the maximum. Application for the registration of a fair rent may be made by either the landlord or tenant, to the Local Rent Officer, and appeal against his decision lies to the Rent Assessment Committee.

Since the Housing Act 1988 came into force on January 15, 1989, it has not generally been possible to create a new regulated tenancy, although the above protection remains for existing regulated tenancies. Tenancies granted on or after January 15, 1989 are known as assured tenancies provided they satisfy certain conditions, which are broadly the same as those for regulated tenancies under the 1977 Act. However, the rent payable by an assured tenant is either that agreed with the landlord or the open market rent fixed by the Rent Assessment Committee.

(4) As to dwelling houses with resident landlords—the Rent Act 1974 gave tenants of dwellings let furnished the same security of tenure as those of unfurnished dwellings unless the landlord lived in part of the house. In the latter case, and in the case of a tenancy of a dwelling granted by a resident landlord after August 13, 1974, the tenancy will usually be outside full Rent Act protection, but may fall within the restricted contract provisions of the Rent Act 1977. In this event, the landlord or the tenant may apply to the Rent Tribunal for a reasonable rent to be registered and once registered, this is the maximum rent recoverable. No new restricted contracts can be created on or after January 15, 1989.

(5) The Protection from Eviction Act 1977, as amended by the Housing Act 1988, provides that if

any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household, he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against a tenant (who is not protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural employees.

(6) A notice to quit any dwellinghouse must be given at least four weeks before it is to take effect, and must be in writing and in the prescribed statutory form.

(7) Part I of the Landlord and Tenant Act 1954 applies to most tenancies of houses for over twenty-one years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act 1967, tenants of houses under leases for over twenty-one years at a rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last three years or for periods amounting to three years in the last ten years.

(8) Full Rent Act or Housing Act protection is available only if a house is let on a tenancy, so that if the occupier of a house has a mere licence to occupy, he does not have protection. Further, even if he has a tenancy, he will not be protected if the rent payable is less than two-thirds of the rateable value of the house. For these reasons, many occupants of houses owned by farmers and occupied by farm workers did not enjoy full security of tenure. The Rent (Agriculture) Act 1976 contains detailed provisions conferring security of tenure on certain agricultural workers housed by their employers and on their successors on death.

(9) Under the Landlord and Tenant Act 1985 (which does not extend to Scotland), in a lease of a dwelling-house granted after October 24, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

(10) The Housing Act 1985 gives security of tenure to many tenants of local authorities and certain other bodies. Further, and subject to certain conditions, such tenants may have the right to purchase their houses or to take a long lease of their flats.

(11) Tenants of flats and other dwellings are given a number of special rights by the Landlord and Tenant Act 1987, as amended by the Housing Act 1988.

SCOTLAND

A Lease is a contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see above) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of the Leases Act 1449, a contract binding the landlord's

successors, as purchasers or creditors, provided the following four conditions are observed: (1) the lease, if for more than one year, must be in writing; (2) there must be a rent; (3) there must be a term of expiry; and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act 1949 (amended by the Agriculture Act 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act 1911 provided for the setting up of the Land Court, which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act 1949 gives a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act extends to premises held by the Crown or Government Departments, either as landlord or tenant.

The Housing (Scotland) Act 1988 creates, with certain exceptions, two new forms of tenancy for tenancies created after January 2, 1989: assured tenancies and short assured tenancies. The assured tenancy significantly reduces the concept of security of tenure and abolishes any method of regulating rent other than market forces. The short assured tenancy lasts for no more than six months and if properly constituted will allow the landlord to recover possession on its expiry. Provision is made for a tenant to apply to the Rent Assessment Committee to fix a rent based on the rent a landlord might reasonably expect for a short assured tenancy of the property.

For most tenancies created before January 2, 1989, the Rent (Scotland) Act 1984 will continue to apply. It defines regulated tenancies which may be either furnished or unfurnished and lays down the system by which a landlord or tenant may obtain from the Rent Office registration of a fair rent. The Act gives to tenants of either furnished or unfurnished lets a substantial degree of security of tenure. There are, however, certain exceptions thus: they do not apply to tenancies where the interest belongs to the Crown or to a government department or to a local authority, a development corporation of a new town or a housing corporation. There must be a true tenancy for the Act to apply. It does not apply to licencees such as lodgers or persons allowed to occupy houses on a grace and favour basis or to services occupiers. The Act regulates the short tenancy, a category of let under which on compliance with certain conditions the landlord can be assured of recovering possession on the expiry of the stipulated period of let. The Act defines the circumstances under which generally a landlord may apply for increased rent as a consequence of having carried improvements to his property and also lays down the system of phasing such

rent increases. On the death of a statutory successor to a tenancy, the tenancy may pass for a second time to a member of the family or a relative who has been in residence of the house for a period of at least six months. The Act further lays down the duties and functions of Rent Officers and Rent Assessment Committees with regard to unfurnished accommodation and of rent tribunals for furnished accommodation. The Secretary of State for Scotland is given power in the 1988 Act to repeal or amend those sections of the 1984 Act relating to the phasing of rent increases.

The Housing (Scotland) Act 1987 consolidates previous legislation in regard to the extensive powers and duties to local authorities in relation to housing. Included therein is the general provision regarding the rights of public sector tenants to purchase the houses which they occupy and the restrictions regarding this right in certain circumstances where the house has been designed or adapted for occupation by the elderly. This Act also makes provision for secure tenancies for public sector tenants. The other major features of the 1988 Act are to establish Scottish Homes, and to permit public sector properties to be transferred to Scottish Homes or a landlord approved by Scottish Homes.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid Act 1988 (as amended) is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the service is contained in the Act itself and the Regulations made thereunder, administered by the Legal Aid Board.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, Lands Tribunal, Restrictive Practices Court, before the Commons Commissioners, and civil proceedings in Magistrates' Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation are excepted from the scheme, as are relator actions and election petitions. It is generally not available for obtaining the decree in undefended divorce and judicial separation, although the Legal Advice and Assistance Scheme (see below) will be, and Legal Aid is still available to deal with property, custody disputes etc., arising in the suit.

Where a person is concerned in proceedings only in a representative, fiduciary or official capacity, his personal resources are not to be taken into account in considering eligibility for legal aid. Apart from this, eligibility in civil proceedings depends upon an applicant's disposable income and disposable capital. The figures change frequently; particulars can be obtained from a solicitor, the Law Society or a Citizens' Advice Bureau. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital part of the value of the house in which the applicant resides, of furniture and household possessions; allowances are made in respect of dependants. Except in cases where the spouses are living apart, or have a contrary interest, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Department of Social Security, and will be referred to The Legal Aid Board, who will

determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid should apply for a certificate to the appropriate Area Director for the area in which he or she resides; if resident elsewhere application should be made to an Area Director in London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel from a panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. When, however, damages or property are recovered or preserved by the assisted person the legal aid fund has a charge over them in respect of these costs less any contribution towards costs recovered from the unsuccessful party. In matrimonial cases, maintenance is exempt, as is the first £2,500 of any property settlement. The court may order that the costs of a successful unassisted party shall be paid out of the legal aid fund.

In an urgent case, say of domestic violence, or to restrain the kidnapping abroad of a child, legal aid may be granted without the applicant's means being fully investigated beforehand. If on a full examination later he is found financially ineligible he is liable to pay all the costs incurred on his behalf, if he does not attend for an examination.

LEGAL ADVICE AND ASSISTANCE

The Scheme is governed by the Legal Aid Act 1988.

Under this legal advice and assistance scheme a client may obtain such advice or assistance as is normally provided by a solicitor and if necessary the advice of a barrister may be obtained, but, with the exception of domestic proceedings in a magistrates' court and certain other proceedings (see below), the scheme does not extend to taking any step in any proceedings before any court or tribunal. Where legal aid is available for civil proceedings (see above) or in criminal cases (see below) the scheme covers work done in making application for such legal aid.

A person (other than one receiving advice and assistance at a police station or from a duty solicitor) is eligible for advice or assistance under the scheme provided his disposable capital and his disposable income do not exceed limits in force from time to time or if he is eligible for Income Support or Family Credit. For a married man or person with children or other dependants' deductions will be made from gross income and capital and allowances are made in respect of income tax, National Insurance contributions, etc. It is intended that the financial limits shall approximate to those applying for legal aid in civil proceedings (see above). Except when they are separated or have conflicting interests the means of husband and wife or cohabiting couple will be aggregated for the purpose of determining financial eligibility. As in the case of legal aid, depending on his means, a person may be called upon to pay a contribution towards the costs of work done for him. Particulars may again be obtained from a solicitor, the Law Society or a Citizens' Advice Bureau.

A solicitor cannot do more than two hours' work, or three hours' in the case of divorce, etc. without leave of the Area Legal Aid Committee. His costs are paid out of the client's contribution and any monies recovered in respect of costs or damages from another party (although this may be waived by leave of the Area Committee in cases of hardship) and the balance will be paid by the legal aid fund.

The Act also extends the scheme to cover the costs of a solicitor who is present within the precincts of a magistrates' court or county court and is requested

by the court to advise or represent a person who is in need of help.

In April 1980 the Scheme was enlarged to cover the cost of representation in domestic proceedings in a magistrates' court. It has since been extended to cover the representation of patients before Mental Health Review Tribunals. Subject to financial eligibility limits, application is made to the area or local committee for 'approval of assistance by way of representation' which will replace legal aid for such proceedings. However the two hour limit referred to above will not apply. An applicant who is outside the financial limits but eligible for legal aid will still have to apply for a legal aid certificate — before. Free advice and assistance, and assistance by way of representation from a duty solicitor is also available in limited circumstances to persons appearing before a magistrates' court charged with a criminal offence.

In January, 1986 the scheme was further extended to provide free advice and assistance to all suspects detained at a police station whether arrested or merely helping police with their enquiries, and free representation for all arrested persons who are the subject of an application for a warrant of further detention under the Police and Criminal Evidence Act 1984. Such persons may instruct a solicitor of their choice or take advantage of the duty solicitor scheme which has now been extended to cover police stations.

LEGAL AID IN CRIMINAL CASES

The Legal Aid Act 1988 provides for legal aid in criminal proceedings, and for children and parents in care proceedings and related applications under the Children and Young Persons Act 1969. A criminal court (e.g. magistrates' court, Crown Court) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make an order in certain cases, e.g., where a person is committed for trial on a charge of murder. However, the court may not make an order unless it appears to the court that the person's disposable income and capital are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant shall be required to make a contribution towards the costs of his case if his disposable income and capital exceed certain prescribed limits. Persons in receipt of Income Support are automatically exempt. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Investigation of means will be carried out by the court. Any person who falls into arrears with the payment of contribution is liable to have the order revoked.

Any practising barrister or solicitor may act for a legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts, representation will be by solicitor alone unless it is a serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act 1968.

SCOTLAND

CIVIL PROCEEDINGS

Legal Aid in Scotland is now governed by the Legal Aid (Scotland) Act 1986 and the Regulations made thereunder. This Act established the Scottish Legal Board which has the general function of securing that legal aid and legal advice and assistance are available in accordance with the Act, and of administering the Scottish Legal Aid Fund. The Board comprises not less than eleven and not more than fifteen members with one member appointed Chairman. The members are appointed by the Secretary of State for Scotland. Civil legal aid is available in relation to civil proceedings in the House of Lords in Appeals from the Court of Session, in the Court of Session, the Lands Valuation Appeal Court, the Scottish Land Court, the Sheriff Court, the Lands Tribunal for Scotland, the Employment Appeals Tribunal and to the European Court of Human Rights. Civil legal aid is granted if on application to the Board, the Board is satisfied that there is *probabilis causa litigandi* and it is reasonable in the particular circumstances of the case that legal aid should be awarded. As in England eligibility and any contribution required from an applicant is dependent on their disposable income and disposable capital. Information on current financial limits can be obtained from the Scottish Legal Aid Board, a solicitor, or a Citizens' Advice Bureau. A person believing himself to be eligible may instruct any solicitor of his own choice. If a court action is not immediately contemplated application will be made for legal advice and assistance which operates in a similar manner to the legal advice assistance scheme in England. If proceedings are contemplated then a formal application for civil legal aid will be made and there are special provisions for emergency applications in appropriate circumstances.

If proceedings are decided against a person in receipt of legal aid the court shall determine a reasonable sum in the circumstances as an appropriate award of expenses to be made against the applicant. The court may only make an award out of the fund if proceedings were instituted by the legally assisted person and the court is satisfied that the resisting party would suffer severe financial hardship unless the order is made and the court is satisfied that in all the circumstances it is just and equitable that an award be made. If monies are recovered by a legally assisted person these fall to be paid to the Scottish Legal Aid Board who will then determine the appropriate level of contribution from the sums received which should be made to the expenses of their litigation.

CRIMINAL PROCEEDINGS

Legal aid in criminal causes is also administered under the Legal Aid (Scotland) Act 1986. The procedure for application for criminal legal aid is dependent on the circumstances of each case. In serious cases heard before a jury under solemn procedure it is for the court to decide whether to grant legal aid. Applications for legal aid must normally be made on the prescribed forms to the clerk of court in question and an applicant is required to provide therein particulars of the merits of his case and his financial circumstances. In summary criminal causes, however, the procedure is dependent on whether the applicant is in custody: if so then he is entitled to automatic free legal aid from the duty solicitor. If the applicant is not in custody and wishes to plead guilty he is ineligible for full legal aid but may be entitled to criminal legal advice and assistance and in some circumstances may qualify for assistance by way of representation which will enable his solicitor to appear and make a plea in mitigation on

his behalf. If he is not in custody and wishes to plead not guilty he can apply to the Scottish Legal Aid Board for criminal legal aid on the prescribed form not later than fourteen days after the first court appearance at which he made the plea and legal aid shall only be granted if the Board is satisfied that the accused cannot meet the expenses of the case without undue hardship and that it is in the interest of justice as defined by the 1986 Act.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act 1971 (consolidating earlier Acts) contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission from the Local Planning Authority before carrying out any development on his land.

What is development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not deemed development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior, with the exception that since December 5, 1968, any expansion, or works begun for the expansion, of a building below ground level constitutes development.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the local planning authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Secretary of State may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1988 specifies a number of types of development for which no permission is usually required, e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 70 cubic metres or 15 per cent, whichever is greater, subject to a maximum of 115 cubic metres. However, in the case of a terraced house, the limitation is 50 cubic metres or 10 per cent, whichever is the greater, subject to the maximum of 115 cubic metres.

Appeal against refusal of permission lies to the Secretary of State and from his decision, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the local authority to purchase the land.

SCOTLAND

The Town and Country Planning (Scotland) Act 1972 consolidates the statute law relating to town and country planning in Scotland.

The uses of buildings are classified by the Town and Country Planning (Use Classes) (Scotland)

Order 1988. Changes in use prior to December 31, 1984 are immune from enforcement proceedings.

Development normally requires to be commenced within five years from the date of granting permission.

The 1972 Act contains provisions for an appeal to the Secretary of State against the refusal of planning permission. The decision of the Secretary of State is final.

Sections 87 and 92 of the Local Government, Planning and Land Act 1980 contain important provisions on planning applications and, unlike certain parts of this Act, extend to Scotland.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts 1983 and 1985. Those entitled to vote as electors at a parliamentary election in any constituency are all persons resident there on the qualifying date who, at that date and on the date of the poll are Commonwealth citizens or citizens of the Republic of Ireland and not subject to any legal incapacity to vote and who on the date of the poll are at least 18 years of age. However, a person is not entitled to vote at a parliamentary election in any constituency in Northern Ireland unless he was resident in Northern Ireland during the whole of the period of three months ending on the qualifying date for that election. Also, no person can use his vote unless he is on the register of electors kept for the constituency. A person who is of voting age on the date of the poll at a parliamentary or local government election is entitled to vote, whether or not he was of voting age on the qualifying date. Accordingly, a qualified person will be entitled to be registered in a register of parliamentary electors or a register of local government electors if he will attain voting age

within twelve months from the date on which the register is required to be published. Subject to certain conditions, the 1985 Act extends the franchise to British citizens overseas.

The register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections.

Voters at a parliamentary or local government election must generally vote in person at the allotted polling station, except for those entitled to vote by post or at any polling station, and those for whom proxies have been appointed. Certain people can apply to be treated as absent voters at a parliamentary election and thus able to vote by post—among these are registered service voters, those unable by reason of blindness or other physical incapacity to go in person to the polling station, and those unable to go in person from their qualifying address to the polling station without making a journey by air or sea.

Unless entitled to vote by post, a person registered as a service voter may vote by proxy at a parliamentary or local government election. A proxy may also be appointed by a registered elector, where the registration officer is satisfied that the applicant's circumstances on the date of the poll are likely to be such that he cannot reasonably be expected to vote in person at the polling station allotted to him. The appointment of a person to vote as proxy at parliamentary elections has effect also for the purposes of local government elections.

THE PROBATION SERVICE

The Probation Service is employed in each county by an independent committee of justices and it provides a professional social work agency in the courts, with responsibility for a wide range of duties which include: (a) a social enquiry service for the criminal courts; (b) provision of a range of non-custodial measures involving the supervision of offenders in the community; (c) supervisory aftercare for offenders released from custody, together with social work in penal establishments and help for the families of those serving sentences; (d) an enquiry, conciliation and supervision service in the divorce and domestic courts; (e) support for and promotion of preventive and containment measures in the

community designed to reduce the level of crime and domestic breakdown. It is a direct grant service funded 80 per cent from the Home Office and 20 per cent from the relevant local authority.

Its national representative bodies are:

- (i) The Central Council of Probation Committees, 38 Belgrave Square, London SW1X 8NT—Tel: 01-245 9364 (*Secretary*, I. Miles);
- (ii) The Association of Chief Officers of Probation, 20-30 Lawefield Lane, Wakefield WF2 8SP—Tel: 0924-361156 (*Secretary*, W. R. Weston);
- (iii) The National Association of Probation Officers, 3-4 Chivalry Road, Battersea, London SW11 1HT—Tel: 01-223 4887 (*Gen. Secretary*, W. Beaumont).

NATIONAL INSURANCE AND RELATED CASH BENEFITS

The State insurance and assistance schemes, comprising schemes of national insurance and industrial injuries insurance, national assistance, and non-contributory old age pensions came into force from July 5, 1948. The Ministry of Social Security Act, 1966, replaced national assistance and non-contributory old age pensions with a scheme of non-contributory benefits, termed supplementary allowances and pensions. These, and subsequent measures relating to social security provision in Great Britain, were consolidated by the Social Security Act, 1975; the Social Security (Consequential Provisions) Act, 1975; and the Industrial Injuries and Diseases (Old Cases) Act, 1975: corresponding measures were passed for Northern Ireland. The Social Security Pensions Act, 1975, introduced a new State pensions scheme, which came into force on April 6, 1978, and the graduated pension scheme 1961-1975 has been wound up, existing rights being preserved. The Pensioners' Payments and Social Security Act, 1979, provided for a £10 bonus for pensioners in 1979 and also for the payment of a bonus in succeeding years at levels then to be determined. The Child Benefit Act, 1975, replaced family allowances (introduced 1946) with child benefit and one parent benefit.

Some of the above legislation has been superseded by the provisions of the Social Security Act, 1986, passed in July 1986 and introduced at various dates since.

NATIONAL INSURANCE SCHEME

The National Insurance scheme operates under the Social Security Acts, 1975 to 1988, and orders and regulations made thereunder. The scheme is financed by contributions payable by earners, employers and others (such as non-employed persons, paying voluntary contributions), together with the Treasury supplement. It provides the funds required for paying benefits payable under the Social Security Acts out of the National Insurance Fund and not out of other public money; for the making of payments towards the cost of the National Health Service and into the Redundancy and Maternity Pay Funds; and for paying benefit under the Industrial Injuries and Diseases (Old Cases) Act, 1975. The yearly Treasury supplement to the National Insurance Fund was abolished in April 1989.

CONTRIBUTIONS

Contributions are of four classes:

Class 1 contributions are earnings-related, based on a percentage of the employee's earnings.

(a) **primary Class 1** contributions are payable by employed earners and office-holders over age 16 with gross earnings at or above the lower earnings limit of £43.00 per week. For those with gross earnings at or above this level, contributions are payable on all earnings up to an upper limit of £325 per week. "Gross earnings" include overtime pay, commission, bonus, etc., without deduction of any superannuation contributions.

Women who marry for the first time no longer have a right to elect not to pay the full contribution rate. Married women and widows who before May 12, 1977, elected not to pay contributions at the full rate retain the right to pay a reduced rate over the same earnings range, which covers industrial injuries benefits and a contribution to the National Health Service. They lose this right if, after April 5, 1978, there are two consecutive tax years in which they have no earnings on which primary Class 1 contri-

butions are payable and in which they have not been at any time self-employed earners. No primary contributions are due on earnings paid for a period on or after the employee's pension age, even when retirement is deferred.

(b) **secondary Class 1** contributions are payable by employers of employed earners, and by the appropriate authorities in the case of office-holders. On Oct. 6, 1985, the upper earnings limit for employers' contributions was abolished and secondary contributions are payable on all the employee's earnings if they reach or exceed £43.00 per week.

Primary contributions are deducted from earnings by the employer, and are paid, together with the employer's contributions, to the Inland Revenue along with income tax collected under the PAYE system, so dispensing with contribution cards for employed earners. On Oct. 6, 1985 several lower percentage rates of contribution for lower paid employees and their employers were introduced.

Class 2 contributions are flat-rate, paid weekly by self-employed earners over age 16. Those with earnings below £2,350 a year for the tax year 1989-90 can apply for exception from liability to pay **Class 2** contributions. People who while self-employed are excepted from liability to pay contributions on the grounds of small earnings may pay either **Class 2** or **Class 3** contributions voluntarily. Self-employed earners (whether or not they pay **Class 2** contributions) may also be liable to pay **Class 4** contributions based on profits or gains within certain limits. There are special rules for those who are concurrently employed and self-employed. Married women and widows can no longer choose not to pay **Class 2** contributions. Those who elected not to pay **Class 2** contributions before May 12, 1977, retain the right until there is a period of two consecutive tax years after April 5, 1978 in which they were not at any time either self-employed earners or had earnings on which primary **Class 1** contributions were payable.

Class 2 contributions may be paid by direct debit through a bank or National Giro account or by stamping a contribution card.

Class 3 contributions are voluntary flat-rate contributions payable by persons over school-leaving age who would otherwise be unable to qualify for retirement pension and certain other benefits because they have an insufficient record of **Class 1** or **Class 2** contributions. Married women and widows who on or before May 11, 1977, elected not to pay **Class 1** (full rate) or **Class 2** contributions cannot pay **Class 3** contributions while they retain this right.

Payment may be made by stamping a contribution card or by direct debit through a bank Giro account.

Class 4 contributions are payable by self-employed earners, whether or not they pay **Class 2** contributions, on annual profits or gains from a trade, profession or vocation chargeable to income tax under Schedule D, where these fall between £5,050 and £16,900 a year. The maximum **Class 4** contribution, payable on profits or gains of £16,900 or more, is £746.55.

Class 4 contributions are generally assessed and collected by the Inland Revenue along with Schedule D income tax. Self-employed persons under 16, or who at the beginning of a tax year are over pension age even where retirement is deferred, are not liable to pay **Class 4** contributions. There are special rules for people who have more than one job, or who pay **Class 1** contributions on earnings which are chargeable to income tax under Schedule D.

Regulations state the cases in which earners may be excepted from liability to pay contributions, and the conditions upon which contributions are credited

to persons who are excepted. Leaflet NI 208 is obtainable from local social security offices.

The Secretary of State for Social Services is empowered by the Social Security Acts to alter certain rates of contributions by order approved by both Houses of Parliament, and is required by the same enactments to make annual reviews of the general level of earnings in order to determine whether such an order should be made.

For the period April 6, 1989 to Oct. 4, 1990 the earnings brackets determining Class 1 contributions are:

	Weekly earnings £
a	0 — 43-00
b	43-00—74-99
c	75-00—114-99
d	115-00—164-99
e	165-00—325-00
f	over 325-00

Contribution rates for the period April 6, 1989 to Oct. 4, 1990 are:

Class 1 contributions—not contracted out

Earnings bracket	Percentage of reckonable income		
	<i>Employee's rate</i>	<i>Employer's rate</i>	
	standard	reduced	
a	0	0	0
b	5	3-85	5
c	7	3-85	7
d	9	3-85	9
e	9	3-85	10-45
f	9*	3-85*	10-45

* to a maximum of £325 per week.

Class 1 contributions—contracted out (see also p. 1046)

Employee's rates

Earnings bracket	On earnings from £43-00—£325-00			
	On first £43-00	standard	reduced	standard
a	0	0	0	0
b	5	3-85	3-00	3-85
c	7	3-85	5-00	3-85
d, e, f.	9	3-85	7-00	3-85

Employer's rates

Earnings bracket	On first £43-00		On any earnings over £325-00
a	0	0	0
b	5	1-2	0
c	7	3-2	0
d	9	5-2	0
e	10-45	6-65	0
f	10-45	6-65	10-45

Class 2 contributions	Weekly flat rate £4-25
Class 3 contributions	£4-15

Class 4 contributions	Percentage of profits or gains 6-3

From Oct. 5, 1989 there was a change in the assessment of National Insurance contributions for employees. Earnings brackets for employees' contributions were abolished and replaced by a new lower contribution rate on earnings up to and including the lower earnings limit and at a main percentage rate on earnings between the lower earnings limit up to and including the employees' upper earnings limit.

Where earnings were paid or were due to be paid before Oct 5, 1989, employees' contributions continued to be paid at 5, 7, and 9 per cent (plus the corresponding lower contracted out rates if appropriate) depending on the earnings bracket.

Where earnings were paid or were due to be paid on or after Oct. 5, 1989 employees' contributions were paid at 2 per cent on earnings up to and including the lower earnings limit (£43-00 a week or equivalent); 9 per cent (not contracted out) or 7 per cent (contracted out) on earnings between the lower earnings up to and including the employees' upper earnings limit (£325-00 a week or equivalent). Employees contributing to the reduced rate continue to pay contributions at 3-85 per cent on all earnings up to and including the employees' upper earnings limit.

Employees earning less than the lower earnings limit continue not to pay any contributions.

There was no change in the assessment of employers' contributions.

THE STATE EARNINGS RELATED PENSION SCHEME (S.E.R.P.S.)

The Social Security Pensions Act, 1975, which came into force in April, 1978, aims to reduce reliance upon means-tested benefit in old age, in widowhood and in chronic ill-health by providing better pensions; to ensure that occupational pension schemes which are contracted out of part of the State scheme fulfil the conditions of a good scheme; that pensions are adequately protected against inflation; and that in both the State and occupational schemes men and women are treated equally. Retirement, widow's and invalidity pensions under the new scheme started to be paid in April 1979. Since April 6, 1979, flat-rate retirement and other State pensions have been augmented for employed earners by additional pensions related to earnings, but it will be twenty years before these additional pensions become payable at the full rate.

Under the scheme retirement, invalidity and widow's pensions for employees are related to the earnings on which national insurance contributions have been paid. For employees of either sex with a complete insurance record, the scheme provides a category A retirement pension in two parts, a basic and an additional pension. The basic pension corresponds to the old personal flat-rate national insurance pension. The additional pension is 1-25 per cent of average earnings between the lower weekly earnings limit for Class 1 contribution liability and the upper earnings limit for each year of such earnings under the scheme, and will thus build up to 25 per cent in twenty years.

The additional pension will be calculated in a different way for individuals who reach pension age after April 6, 1999. The changes are to be phased in over 10 years. From 2010 a lifetime's earnings will be included in the calculation and for years from 1988-89 onwards the accrual rate on these surplus earnings will be 20 per cent. The accrual rate on surplus earnings for the years from 1978-79 to 1987-88 will remain at 25 per cent.

Actual earnings are to be revalued in terms of the earnings level current in the last complete tax year before pension age (or death or incapacity). Both components of pensions in payment will be uprated annually in line with the movement of prices. Graduated retirement pensions in payment, and rights to such pensions earned by people who are still working, will be brought into the annual review of benefits.

Self-employed persons pay contributions towards the basic pension. The non-employed and employees

with earnings below the lower limit may contribute voluntarily for basic pension. Although no primary Class 1 contributions or Class 2 or Class 4 contributions are payable by persons who work beyond pension age (65 for men, 60 for women), the employer's liability for secondary Class 1 contributions continues if earnings are at or above the lower earnings limit. Class 4 contributions are still payable up to the end of the tax year during which pension age is reached.

Widows will get the whole of any additional pensions earned by their husbands with their widowed mother's allowances or widow's pensions; and can add to the retirement pensions earned by their own contributions any additional pensions earned by their husbands up to the maximum payable on one person's contributions. Men whose wives die when they are both over pension age can add together their own and their wives' pension rights in the same way. Widows. Among the steps taken to give women equal treatment in benefit provision the State scheme permits years of home responsibilities to count towards satisfying the contribution conditions for retirement pension, widowed mother's allowance and widow's pension (and the "half-test" by which a married woman who married before age 55 could not qualify for Category A retirement pension unless she had contributed on earnings at the basic level in at least half the years between marriage and pension age has been abolished with effect from Dec. 22, 1984). The range of short-term social security benefits and industrial injury benefits under the Social Security Act, 1975, continues with only minor changes.

Contracted-Out and Personal Pension Schemes

Members of occupational pension schemes which meet the standards laid down in the Social Security Pensions Act, 1975, can be contracted-out of the earnings related part of the state scheme relating to retirement and widows' benefits. Regulations made under the Act require employers to consult employees and their organizations and inform them of their intention to contract out. (Leaflets relating to pensions and guidance for employers about contracting-out are available from local social security offices.) The Act also contains provisions ensuring equal access to membership of schemes for men and women.

Until April 6, 1988, occupational pension schemes could only contract out if they promised a pension that was related to earnings. These are known as contracted-out salary related schemes. They must provide a pension that is not less than the guaranteed minimum pension (G.M.P.), which is broadly equivalent to the state earnings related pension. However, new options have been introduced by the Social Security Act, 1986. Since April 6, 1988, occupational pension schemes which promise a minimum level of contributions have also been able to contract out. These are known as contracted-out money purchase schemes. They provide a pension based on the value of the fund built up in the scheme.

In addition, since July 1988 employees whose employers do not provide a pension scheme have been able to start their own personal pension instead of staying in the state earnings related pension scheme. Since April 6, 1988, this choice has been open to all employees even if their employer does have a pension scheme. A personal pension, like a contracted-out money purchase scheme, provides a pension based on the value of the fund built up in the scheme.

The decision on whether or not an occupational pension scheme may become contracted-out lies with the Occupational Pension Board, an independent statutory body who have a general responsibility for supervising contracting-out. They also consider and approve personal pension schemes which can be used instead of state additional pension.

The State earnings related pension payable to a member of a contracted-out salary related scheme, or his widow, will be reduced by the amount of G.M.P. payable (which in the case of a widow must be at least half of the late husband's G.M.P. entitlement). Members of contracted-out money purchase schemes and personal pension schemes, or their widows, have no G.M.P. entitlement as such. But the state earnings related pension payable will be reduced by an amount equivalent to a G.M.P. (or widow's G.M.P.).

Since April 6, 1988 contracted-out salary related schemes must also provide a widower's G.M.P. which must be at least half of the late wife's G.M.P. entitlement built up from April 6, 1988. (A scheme need not provide entitlement to a G.M.P. for widowers of earners dying before April 1989.) Contracted-out money purchase schemes and personal pension schemes must provide half-rate widower's benefit.

In contracted-out schemes, both the employee and the employer pay the full ordinary rate of contribution on the first £43.00 (1989-90 figure) of earnings but earnings above that amount attract a lower rate of contribution from the employee, and from the employer where the employee's earnings are under £325.00 (1989-90 figure): where the employee's earnings exceed this amount, the full ordinary rate of contribution is payable only by the employer, the employee has no liability for contributions on these earnings (see also p. 1045).

An employee who chooses a personal pension in place of S.E.R.P.S. or their employer's pension scheme must pay National Insurance contributions at the full ordinary rate (the employer's share must also be paid at the same rate). The D.S.S. pays the difference between the lower contracted-out rate and the full ordinary rate to the personal pension scheme.

BENEFITS

The benefits payable under the Social Security Acts are as follows:

- (1) Contributory Benefits:
 - Unemployment benefit.
 - Sickness benefit.
 - Invalidity pension and allowance.
 - Maternity allowance.
 - Widow's benefit, comprising widow's payment, widowed mother's allowance and widow's pension.
 - Retirement pensions, categories A and B.

- (2) Non-contributory Benefits:
 - Child benefit.
 - One parent benefit.
 - Guardian's allowance.
 - Invalid care allowance.
 - Attendance allowance.
 - Severe disablement allowance.
 - Mobility allowance.
 - Retirement pensions, categories C and D.
 - Income Support.
 - Family Credit.
 - Social Fund.

- (3) Benefits for Industrial Injuries, Disablement and Death.

Leaflets relating to the various benefits are obtainable from local social security offices.

The Social Security Acts empower the Secretary of State to increase certain rates of benefit by order approved by both Houses of Parliament, and require him to increase certain rates by such an order if an annual review shows that they have not retained their value in relation to the general level of prices obtaining in Great Britain.

The latest order providing for increases in benefit rates took effect from the week commencing April 13, 1989.

CONTRIBUTORY BENEFITS

Entitlement to contributory benefits depends on contribution conditions being satisfied either by the claimant or by some other person (depending on the kind of benefit). The class or classes of contribution which for this purpose are relevant to each benefit are as follows:

Short-term benefits

Unemployment benefit	Class 1
Sickness benefit	Class 1 or 2
Maternity allowance	Class 1 or 2
Widow's payment	Class 1, 2 or 3

Other benefits

Widowed mother's allowance	Class 1, 2 or 3
Widow's pension	
Category A retirement pension	
Category B retirement pension	
Invalidity benefit	Class 1 or 2

The system of contribution conditions relates to yearly levels of earnings on which contributions have been paid. The contribution conditions for different benefits are set out in summary form in leaflets available at local social security offices.

Unemployment Benefit

Benefit is payable in a period of interruption of employment for up to 312 days (a year, excluding Sundays). Spells of unemployment and sickness not separated by more than 8 weeks count as one period of interruption of employment. A person who has exhausted benefit requalifies when he has again worked as an employed earner for at least 16 hours a week for 13 weeks. These weeks need not be consecutive but must generally fall within 26 weeks prior to the date of the claim (effective from Oct. 1989).

Disqualifications.—There are disqualifications from receiving benefit, e.g. for a period not exceeding 26 weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment or training.

Sickness Benefit

Sickness benefit is payable for up to 28 weeks of sickness in a period of interruption of employment and is then replaced by invalidity benefit (see below).

Disqualifications.—There are disqualifications from receiving sickness or invalidity benefit for a period not exceeding six weeks if a person has become incapable of work through his own misconduct or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or observe prescribed rules of behaviour.

Since April 6, 1986, employers are responsible for paying Statutory Sick Pay (S.S.P.) to their employees for up to 28 weeks of sickness in any period of incapacity for work. S.S.P. replaces the employee's entitlement to State Sickness Benefit which is not payable as long as any S.S.P. liability remains. S.S.P. is subject to P.A.Y.E. and to N.I. deductions. Employers can recover the S.S.P. they have paid out and can also withhold an extra amount to compensate themselves for the N.I. contributions they have paid on S.S.P. from the payments of N.I. they make each month to the Collector of Taxes. Employees who cannot get S.S.P. can claim State Sickness Benefit instead.

Invalidity Benefit

Normally, after 28 weeks of sickness, sickness benefit, or S.S.P. where the underlying conditions for sickness benefit are satisfied, is replaced by an invalidity pension. In addition an invalidity allowance is payable if incapacity for work begins more than five years before pension age. The allowance varies according to the age on falling sick, and if still in payment at pension age will continue as an addition to retirement pension. From Sept. 16, 1985 invalidity allowance has been reduced or withdrawn completely if there is entitlement to an additional earnings-related pension and/or a guaranteed minimum pension.

Maternity Benefit

Statutory maternity pay (S.M.P.) is administered by employers but there is still a state maternity allowance scheme for women who are self-employed or otherwise do not qualify for S.M.P.

In general, employers pay S.M.P. to pregnant women who have been employed by them for at least six months and earned at least the lower earnings limit for the payment of N.I. contributions. For those who have been employed for at least two years, payment of S.M.P. for the first six weeks is related to earnings, followed by up to twelve weeks at a standard rate of £36.25. Those who have been employed for at least six months but less than two years receive payment at standard rate only for the 18 weeks. Part-time working women also qualify for the earnings-related element if employed for at least five years. Women have some choice in deciding when to begin maternity leave but S.M.P. is not payable for any week in which work is done.

A woman may qualify for maternity allowance (M.A.) if she has been working and paying contributions at the full rate for at least 26 weeks in the 52-week period which ends 15 weeks before the baby is due. She also has an element of choice in deciding when to stop work and receive M.A., which is not payable for any period she works.

Widow's Benefits

Only the late husband's contributions of any class count for widow's benefit in any of its three forms.

Widow's Payment.—May be received by a woman who at her husband's death is under 60, or whose husband was not entitled to a Category A retirement pension when he died.

Widowed Mother's Allowance.—Payable to a widow if she is receiving child benefit for one of her children; if her husband was receiving child benefit; or if she is expecting her husband's baby.

Widow's Pension.—A widow may receive this pension if aged 45 or over at the time of her husband's death or when her widowed mother's allowance ends. If aged 55 or over she will receive the full widow's pension rate.

Widow's benefit of any form ceases upon remarriage.

Retirement Pension Categories A and B

A Category A pension is payable for life to men or women on their own contributions if (a) they are over pension age (65 for a man and 60 for a woman), and (b) they have retired from regular employment. From Oct. 1, 1989, the retirement condition is to be abolished.

Where a person defers making a claim at 65 (60 for a woman) or later opts to be treated as if he/she had not made a claim, and does not draw a Category A pension, the weekly rate of pension is increased, when he or she finally makes a claim or reaches the age of 70 (65 for a woman), in respect of weeks when

pension is foregone during the five years after reaching minimum pension age. Details of the increase in the rate of pension due to deferred retirement are given in leaflet NP46, available at social security offices. If a married man defers his own Category A pension then his wife has to defer receiving her Category B pension based on his contribution record. During this time she earns increments to the Category B pension, which is payable to her (and not her husband) when they both claim their pensions.

A *Category B pension* is normally payable for life to a woman on her husband's contributions when he has claimed, or is over 70, and has qualified for his own Category A pension, and she has reached 60 and retired from regular work or has reached 65. It is also payable on widowhood after 60 whether or not the late husband had retired and qualified for his own pension. The weekly pension is payable at the rate of the increase for a wife while the husband is alive, and at the single person's rate on widowhood after 60. Where a woman is widowed before she reaches 60, a Category B pension is paid to her on reaching 60 at the same weekly rate as her widow's pension if she claims. If a woman qualifies for a pension of each category she receives whichever pension is the larger. Details of the increase in the rate of pension due to deferred retirement are given in leaflet NP46, available at social security offices.

The earnings rule which stated that a man aged 65 to 70, or a woman aged 60 to 65, who has qualified for pension would have it reduced if he or she earned more than a certain amount was abolished on Oct. 1, 1989. Where an adult dependant is living with the claimant, an Adult Dependants Allowance will only be payable if the dependant's earnings do not exceed the standard rate of unemployment benefit for a single person under pensionable age (*see below*). For the purpose of the dependency rule only, earnings will include payments by way of occupational pension. The earnings of a separated spouse affect the increase of retirement pension if they exceed £26.20 a week.

Unemployment, sickness or invalidity benefit is payable to men between 65 and 70 and women between 60 and 65 who have not claimed their retirement pension and who would have been entitled to a retirement pension if they had claimed at pension age. This applies in the case of sickness and invalidity benefit if incapacity for work is the result of an industrial accident or prescribed disease. These rates of benefit for people over pension age are shown in leaflet N.I. 196. A retirement pension will be increased by the amount of any invalidity allowance the pensioner was getting within the period of 8 weeks and one day before reaching minimum pension age but this will be offset against any Additional Pension or Guaranteed Minimum Pension. An age addition of 25p per week is payable if a retirement pensioner is aged 80 or over. (For attendance allowance and invalidity care allowance, *see Non-contributory Benefits*).

Graduated Pension

The graduated pension scheme under which national insurance contributions and retirement pensions were graduated within specified limits, according to earnings, was discontinued in April, 1975, under the Social Security Act, 1975. Any graduated pension which an employed person over 18 and under 70 (65 for a woman) had earned by paying graduated contributions between April 6, 1961, when the scheme started and April 5, 1975, will be paid when the contributor claims their retirement pension, or at 70 (65 for a woman), in addition to any retirement pension for which he or she qualifies.

Graduated pension is at the rate of £5.71 a week

for each "unit" of graduated contributions paid by the employee (half a unit or more counts as a whole unit). A unit of contributions is £7.50 for men, and £9.00 for women, of graduated contributions paid.

A wife can get a graduated pension in return for her own graduated contributions, but not for her husband's. A widow gets a graduated addition to her retirement pension equal to half of any graduated additions earned by her late husband, plus any additions earned by her own graduated contributions. If a person defers making a claim beyond 65 (60 for a woman), entitlement may be increased by one seventh of a penny per £1 of its weekly rate for each complete week of deferred retirement, long as the retirement is deferred for a minimum of seven weeks.

Rates of Benefits

(from week commencing April 10, 1989)

Benefit	Weekly rate £
Unemployment Benefit—standard rate	
Person under pension age	34.70
Increase for wife/other adult	
dependant	21.40
Person over pension age*	43.60
Increase for wife/other adult

Earnings limit for retirement pensioners (abolished from Oct. 1, 1989).	

* These benefits attract an increase for each dependent child (in addition to child benefit) of £8.95.

NON-CONTRIBUTORY BENEFITS

Child Benefit

Child benefit is payable for all children in a family within the age limits, including the first or only child. There is an additional payment for the first or only child in certain one-parent families.

Guardian's Allowance

Where the parents of a child are dead, the person who has the child in his family may claim a guardian's allowance in addition to child benefit. The allowance in exceptional circumstances, is payable on the death of only one parent.

Invalid Care Allowance

Invalid care allowance is payable to persons of working age, who are not gainfully employed because they are regularly and substantially engaged in caring for a severely disabled person who is receiving attendance allowance or constant attendance allowance with either a war or services pension, industrial disablement workman's compensation, or an allowance under the Pneumoconiosis, Byssinosis and Miscellaneous Diseases Benefit Scheme.

Mobility Allowance

The allowance is, subject to certain conditions, payable to persons who are suffering from such physical disablement that they are likely to remain unable, or virtually unable, to walk for at least ■ year. It can be claimed by persons between the ages of 5 and 65 (for this purpose a claim may be made up to 12 months from that birthday) and may be retained to age 75.

Severe Disablement Allowance

Persons of working age who have been continuously incapable of work for ■ period of at least 28 weeks but who do not qualify for a contributory invalidity pension may be entitled to severe disablement allowance. People who first become incapable of work after their 20th birthday must be at least 80 per cent disabled.

Attendance Allowance

Attendance allowance is payable to the severely disabled. Entitlement is determined by the Attendance Allowance Board or by a doctor acting on the Board's behalf. The full rate is paid to those in need of a great deal of attention or supervision both by day and by night. The allowance is paid at the lower rate to those whose need for attention or supervision arises either by day or by night. There is a six-month qualifying period.

Non-contributory Retirement Pension Categories C and D

A Category C pension is provided, subject to ■ residence test, for persons who were over pensionable age on July 5, 1948, and for women whose husbands are so entitled if they are over pension age and have retired from regular work, with increases for adult and child dependants. A Category D pension is provided for others when they reach 80 if they are not already getting a retirement pension of any category or if they are getting that pension at less than these rates. An age addition of 25p per week is payable if persons entitled to retirement pension or their dependants are aged 80 or over.

Rates of Benefits

(from week commencing April 10, 1989)

Benefit	Weekly rate £

Increase for wife/other adult dependant	15.65
(not payable with Category D pension)	

*These benefits attract an increase for each dependent child (in addition to child benefit) of £8.95.

INCOME SUPPORT

Income Support is a benefit for those whose income is inadequate and who are unemployed; over 60; bringing up children alone; unable to work or working only part-time through sickness or disability; or staying at home to care for a disabled relative. Except in special cases Income Support is not available to those who work for more than 24 hours per week or who have a partner who works for more than 24 hours per week. Income Support is not payable if the claimant, or claimant and partner, have capital or savings in excess of £6,000. The rate of benefits is affected by possession of capital or savings in excess of £3,000 and may be affected by ■ claimant's earnings. Sums payable depend on fixed allowances laid down by law for people in different circumstances. Special rates apply for people living in board and lodging, hostels, residential care or nursing homes. Details are available from local social security offices. Income Support is payable via post offices, either by order book or, for the unemployed, by girocheque. Applications for Income Support are made on form SB1, available from post offices; Income Support claim forms, available from social security offices; or on form B1 (for the unemployed), available from unemployment benefit offices. If both partners are entitled to Income Support, either may claim it. People receiving Income Support will be able to receive Housing Benefit, help with mortgage or home loan interest and help with health care. They may also be eligible for help with exceptional expenses, from the Social Fund. Leaflet SB20 gives a detailed explanation of Income Support.

INCOME SUPPORT PREMIUMS

Income Support Premiums are additional weekly payments for those with special needs. People qualifying for more than one premium will normally only receive the highest single premium for which they qualify. However Family Premium, Disabled Child's Premium and Severe Disability Premium are payable in addition to other premiums.

People with children qualify for a Family Premium if they have at least one child; a Disabled Child's Premium if they have ■ child who receives Attendance Allowance or Mobility Allowance or is registered blind; or a Lone Parent Premium if they are bringing up one or more children alone.

Long-term sick or disabled people qualify for a Disability Premium if they or their partner are receiving certain benefits because they are disabled or cannot work; are registered blind; or have been sending in doctor's statements for at least 28 weeks stating inability to work through sickness. If they are in receipt of Attendance Allowance, without anyone receiving Invalid Care Allowance for looking after them, they qualify for a Severe Disability Premium in addition to a Disability Premium.

People qualify for a Pensioner Premium if they or their partner are aged between 60 and 79, and for a Higher Pensioner Premium if they or their partner are aged 80 or over. A Higher Pensioner Premium is

also payable to people aged between 60 and 79 who receive Attendance Allowance, Mobility Allowance, Invalidity Benefit or Severe Disablement Allowance, or who are registered blind. A Higher Pensioner Premium may be paid as well as a Severe Disability Premium.

Rates of Benefit (from week commencing April 10, 1989)

	Weekly rate	£

Single	2.50	
Couple	3.50	
(payable to pensioners aged between 75 and 79 in addition to Pensioner Premium).		

FAMILY CREDIT

Family Credit is a tax-free benefit for working families with children. It is not a loan and need not be repaid. To qualify, a family must include at least one child under 16 (under 19 if in full-time education up to A level or equivalent standard), and the claimant, or partner, must be working for at least 24 hours per week. It does not matter which partner is working and they may be employed or self-employed. The right to Family Credit does not depend on N.I. contributions and the same rates of benefit are paid to one and two parent families. Family Credit is not payable if the claimant, or claimant and partner, have capital or savings in excess of £6,000 and the rate of benefit is affected if capital or savings in excess of £3,000 are held. The sums payable depend upon the claimant's (and partner's) income, number of children, and children's ages. Family Credit is paid for 26 weeks and the amount payable will usually remain constant throughout this period, regardless of change of circumstances. Payment is made via post offices or directly into a bank or building society account.

Applications for Family Credit are made on form FC1, obtainable at a post office or social security office. In two parent families the woman should claim.

Rates of Benefit (from week commencing April 10, 1989)

Weekly rate	£
-------------	---

The maximum amount will be payable where net income is no more than £54.80 per week. Where net income exceeds that amount, the maximum credit is reduced by 70 per cent of the excess and the result is the Family Credit payable. The maximum rate consists of:	
Adult credit (for one or two parents)	33.60
plus for each child aged:	
under 11	7.30
11-15	12.90
16-17	16.35
18	23.80

THE SOCIAL FUND

The Social Fund helps people with expenses which are difficult to meet from regular income. Regulated Maternity, Funeral and Cold Weather payments are decided by Adjudication Officers and are not cash-limited. Discretionary Community Care Grants, and Budgeting and Crisis Loans are decided by Social Fund Officers and come out of a yearly budget which, except for a contingency reserve, is allocated to local offices (1989-90, grants £60 million; loans £141m; reserve £2m).

Regulated payments

Maternity Payments.—A flat rate payment of £85 for each baby expected, born or adopted. It is payable to people on Income Support and Family Credit and is non-repayable.

Funeral Payments.—Payable for reasonable funeral expenses incurred by people receiving Income Support, Family Credit or Housing Benefit (Community Charge Rebate in Scotland). It is recoverable from the estate of the deceased.

Cold Weather payments.—£5 for each seven-day period of cold weather. Paid to people on Income Support who are pensioners, disabled or parents with a child under 5. It is non-repayable.

Discretionary payments

Community Care Grants.—They are intended to help people on Income Support: move into the community or avoid institutional care; ease exceptional pressures on families; and/or meet certain essential travelling expenses. They are non-repayable.

Budgeting Loans.—These are interest-free loans to people who have been receiving Income Support for at least six months, for intermittent expenses that may be difficult to budget for.

Crisis Loans.—These are interest-free loans to anyone, whether receiving benefit or not, who are without resources in an emergency, where there is no other means of preventing serious risk or damage to health or safety.

Loans are normally repaid over a period of up to 78 weeks at between 5 and 15 per cent of Income Support (less housing costs), depending on other commitments. Savings over £500 are taken into account for Cold Weather, Maternity and Funeral Payments, Community Care Grants and Budgeting Loans. All

savings are taken into account for crisis loans. For regulated payment there is a right of appeal to an independent Social Security Appeal and thereafter to a Social Security Commissioner. For discretionary payments there is a review system where persons can ask for a review at the local office with a further right of review to an independent Social Fund Inspector.

DETERMINATION OF CLAIMS AND QUESTIONS

With a few exceptions, claims and questions relating to Social Security benefits are decided by statutory authorities who act independently of the Department of Social Security and Department of Employment. The first of the statutory authorities, the Adjudication Officer, determines entitlement to benefit. A claimant who is dissatisfied with that decision has the right of appeal to a Social Security Appeal Tribunal. There is a further right of appeal to a Social Security Commissioner against the Tribunal's decision but leave to appeal must first be obtained. Appeals to the Commissioner must be on a point of law. Provision is also made for the determination of certain questions by the Secretary of State for Social Services.

Disability questions are decided by adjudicating medical authorities or Medical Appeal Tribunals. Appeal to the Commissioner against a tribunal's decision is with leave and on a point of law only.

Leaflet NI 246 which is available from social security offices, explains how to appeal and leaflet NI260 is a guide to reviews and appeals.

INDUSTRIAL INJURIES, DISABILITY AND DEATH BENEFITS

The Industrial Injuries scheme, administered under the Social Security Act 1975 and subsequent Acts and Regulations, provides a range of benefits designed to compensate for disablement resulting from an industrial accident (i.e. an accident arising out of and in the course of an employed earner's employment) or from a prescribed disease due to the nature of a person's employment. Rates of benefit are increased periodically.

Determination of Claims and Questions.—Provision is made for the determination of certain questions by the Secretary of State for Social Security, and of "disability questions" by a medical board (or a single doctor) or, on appeal, by a medical appeal tribunal. An appeal on a point of law against a medical appeal tribunal decision is determined by the Social Security Commissioner. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g. whether the accident arose out of and in the course of the employment) are determined by an adjudication officer appointed by the Secretary of State, or a Social Security Appeal Tribunal, or in certain circumstances, on further appeal, by the Commissioners.

Special schemes under the Industrial Injuries and Diseases (Old Cases) Act 1975 provide supplementary allowances to those entitled to receive weekly payments of workmen's compensation for loss of earnings due to injury at work, or disease contracted during employment before July 5, 1948 when the Industrial Injuries scheme was introduced. Other schemes under the Act provide allowances to those who contracted slowly developing diseases during employment before July 1948 where neither workmen's compensation nor Industrial Injuries Benefits are payable. A lump sum death benefit of up to £300 may also be payable to a dependant of such a person.

Benefits

Disability Benefit is normally payable 15 weeks (90 days) after the date of accident or onset of disease if the employed earner suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than 14 per cent. The amount of disablement benefit payable varies according to the degree of disablement (in the form of a percentage) assessed by an adjudicating medical authority or medical appeal tribunal.

Disablement assessed at less than 14 per cent does not normally attract basic benefit except for certain progressive chest diseases. A weekly pension is payable where the assessment of disablement is between 14 and 100 per cent (assessments of 14 to 19 per cent are payable at the 20 per cent rate). Payment can be made for a limited period or for life.

The basic rates are applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. If disablement is assessed at one per cent or more, loss of earnings may be compensated by a reduced earnings allowance. This may be paid even if basic disablement pension is not paid because disablement is assessed at less than 14 per cent, providing there is a current disablement assessment of at least 1 per cent. There is provision also for increases of pension if the pensioner requires constant attendance or if his disablement is exceptionally severe. A pensioner may draw S.S.P., sickness or invalidity benefit if appropriate, in addition to disablement pension, during spells of incapacity for work.

Death Benefit, in the form of a pension, is available for women widowed before April 11, 1988. The amount of pension depends on the widow's circumstances at the date of death and not upon the deceased's earnings.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of claimants for disablement benefit, that of submitting to medical examination.

Rates of Benefits (from April 10, 1989)

* These benefits attract an increase for each dependent child (in addition to child benefit) of £8.95.

FINANCE

The National Insurance Fund receives all social security contributions (less only the National Health Service and Redundancy Fund and Maternity Pay Fund allocations and the National Insurance Surcharge for taxation purposes) together with the Consolidated Fund supplement; and it bears the cost of all contributory benefits provided by the Social Security Acts and the cost of administration.

NOTE.—There have been changes to the National Insurance Fund. Payments will no longer be paid into surcharges or the Maternity Pay Fund. However, residual payments are still being paid in respect of late paid contributions for premium years.

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1988, were as follows:

Receipts	£'000
Balance, April 1, 1987.....	5,706,966

WAR PENSIONS

War pensions are awarded under The Naval, Military and Air Forces, Etc. (Disablement and Death) Service Pensions Order 1983, which was a consolidation of the previous Royal Warrants, Orders in Council and Orders by Her Majesty.

The D.S.S. award war pensions to members of H.M. Armed Forces in respect of the periods Aug. 4, 1914 to Sept. 30, 1921 and subsequent to Sept. 3, 1939 (including present members of the armed forces). The D.S.S. also have special schemes for the Merchant Navy, Naval Auxiliary personnel, civil defence, civilians, Home Guard, Polish armed forces under British command and Polish resettlement forces.

War pensions for the period Oct. 1, 1921 to Sept. 2, 1939 are dealt with by the Ministry of Defence who are also responsible for the Armed Forces Pension Scheme.

ELIGIBILITY AND GENERAL PROVISIONS

War disablement pension is awarded for the disabling effects of any injury, wound or disease which is attributable to, or aggravated by, conditions of service in the armed forces. It cannot be paid until the serviceman has left the armed forces.

Disablement is assessed by comparison of the disabled person's condition with that of a normal, healthy person of the same age and sex, without taking into account the disabled person's earnings or occupation, and is expressed on a percentage scale up to 100 per cent. Disablement above 20 per cent, for which a pension is awarded, is assessed in steps of 10 per cent. For assessment of less than 20 per cent a lump sum is payable. Maximum assessment does not necessarily imply total incapacity.

Dependency allowance. A 100 per cent disabled pensioner may receive an allowance of 60p a week for his wife or dependent child. Where disablement is less than 100 per cent the allowance is proportionate to the degree of disablement.

War widow's pension is awarded where death occurs as a result of service. Where a war disablement

pensioner was receiving constant attendance allowance at the time of his death, or would have been receiving it if he were not in hospital, his widow has automatic entitlement to a war widow's pension, regardless of the cause of death.

Additional allowances are payable for dependent children, in addition to child benefit.

A reduced weekly rate is payable to war widows below the rank of Lieutenant-Colonel who are under the age of 40, without children and capable of maintaining themselves. This is increased to the standard rate at age 40.

Rank additions to disablement and widows pensions. Rank additions may be paid with war pensions where the rank held was above that of private (or equivalent).

Claims.—Where a claim is made no later than 7 years after the termination of service, the claimant does not have to prove that the disablement or death on which the claim is based is related to service and receives the benefit of any reasonable doubt. Where a claim is made more than 7 years after the termination of service the claimant has to show that disablement or death is related to service. However, the claim succeeds if reliable evidence is produced which raises a reasonable doubt whether disablement or death is related to service. There is no time limit for making a claim for war pension.

SUPPLEMENTARY ALLOWANCES

A number of supplementary allowances may be awarded to a war pensioner which are intended to meet the various needs which may result from disablement or death and take account of its particular effect on the pensioner. Decisions on supplementary allowances are made on a discretionary basis on behalf of the Secretary of State and there is no provision for a statutory right of appeal against them. However, war pensioners may discuss any aspect of their pension position with their local War Pensions Committees, which may be able to arrange help or

make representations to the war pensions branch of the D.S.S.

Unemployability supplement, with additional allowances for dependants, may be paid to a war pensioner who is so seriously disabled as to be unemployable. In addition, an invalidity allowance may be payable if the incapacity for work began more than 5 years before normal retirement age.

Allowance for lowered standard of occupation may be awarded to a partially disabled pensioner whose pensioned disablement permanently prevents him from following his pre-service occupation and from doing another job of equivalent financial standard. The allowance, together with the basic war disablement pension, must not exceed pension at the 100 per cent rate.

Constant attendance allowance may be awarded to a war pensioner who is so severely handicapped by the nature of his pensioned disablement, assessed at not less than 80 per cent, that he must depend to a greater or lesser extent upon the attendance of some other person. There are four rates of the allowance and these vary according to the amount of time attendance is needed.

Exceptionally severe disablement allowance is paid to pensioners who are receiving constant attendance allowance on a permanent basis at either of the two highest rates.

Severe disablement occupational allowance is paid to those pensioners who qualify for constant attendance allowance at either of the two highest rates and who, despite their handicap, are normally in employment. This allowance is not payable if the pensioner is in receipt of unemployability supplement.

Comforts allowance is payable at one of two rates. The higher rate is paid to those pensioners who are receiving both constant attendance allowance and unemployability supplement. When only one of these allowances is in payment the lower rate of comforts allowance is normally paid, but the higher rate can be paid under certain conditions where only constant attendance allowance is in payment.

Clothing allowance may be awarded where the pensioned disablement causes exceptional wear and tear of clothing. It is payable at two rates, depending on the degree of wear and tear caused.

Mobility supplement is intended to help those war pensioners who because of their pensioned disablement are unable, or virtually unable, to walk.

Treatment allowance may be paid to a pensioner receiving medical treatment in hospital or at home if the treatment is for the pensioned disablement, is necessary because of the continuing effects of service, and is of a kind which prevents the pensioner from working for more than seven days, or would do so if he was not unemployed or had retired from work. The allowance replaces the disablement pension and is paid at the 100 per cent rate.

Age allowance may be awarded to those war pensioners aged 65 or over whose war disablement is assessed at 40 per cent or more. It is payable at four rates, depending on the degree of disablement.

Widows age allowance is paid at three different rates according to age (65-69, 70-79 and over 80).

Widows child's allowance may be paid in addition to child benefit.

Rent allowance may be paid to a widow who receives a war widows pension and maintains a home for a child eligible for an allowance.

Education allowance may be payable to a war disablement pensioner or war widow in respect of a dependent child if the D.S.S. is satisfied that the education is suitable for the child and that the family circumstances are such as to require an allowance.

Temporary allowance for widows may be payable in the form of a special allowance for the first 26

weeks of widowhood for widows of war pensioners who received constant attendance allowance or unemployability supplement. After 26 weeks the widow will get any war widows pension or national insurance widows benefit to which she is entitled.

Funeral grant may be payable where the pensioner dies as a result of his pensioned disablement, or he died in hospital while having treatment for that disability, or was getting constant attendance allowance at the time of his death. Claims should be made within three months of the funeral.

WAR PENSIONERS ABROAD

The D.S.S. is responsible for the payment of war pensions, and provision of necessary treatment for accepted disablement, to pensioners who reside overseas. They receive the same pension rates as war pensioners in this country and benefit from the same annual upratings.

WAR PENSIONERS AND SOCIAL SECURITY BENEFITS

When a war disablement pensioner is sick, unemployed or retired, the appropriate social security benefits are paid in addition to the war pension, unless he is entitled to unemployability supplement or severe disablement occupational allowance instead.

Any sickness, invalidity, unemployment benefit or retirement pension for which a war widow qualifies on her own contributions, and any graduated retirement benefit, or additional earnings related pension inherited from her husband, can be paid in addition to her war pension or temporary allowance. A war pensioner or war widow who claims Income Support has the first £5 of pension disregarded. A similar provision operates for housing benefit and community charge benefit; but the local authority may, at its discretion, disregard any or all of the balance. A special tax free Christmas bonus of £10.00 is payable to war disablement pensioners who are in receipt of unemployability supplement, constant attendance allowance, have retired, or are aged over 70 (65 for women); and to all war widows who do not otherwise receive this payment.

PENSIONS APPEAL TRIBUNALS

There are independent Pensions Appeal Tribunals which hear appeals against the decisions of the D.S.S. on entitlement, and assessment of disablement, in respect of 1939 War and subsequent service cases. There are now no rights of appeal in the 1914 War disablement cases, the great majority of which were given final assessment in the 1920s with a 12 months right of appeal at the time. An appeal by a 1914 war widow must be made within twelve months of the date on which the rejection of the claim is notified.

WAR PENSIONERS WELFARE SERVICE

The D.S.S. operates a war pensioners welfare service to advise and assist war pensioners and their widows on any matters affecting their welfare. Welfare officers are attached to War Pensioners' Welfare Offices located in the major towns, and work closely with central and local Government agencies as well as the various ex-service organizations. The service is available on call to any war pensioner or widow who needs it. In addition the service takes the initiative in arranging regular visits in certain cases.

NATIONAL HEALTH SERVICE (and Local Authority Personal Social Services)

The National Health Service came into being on July 5, 1948, as a result of the National Health Service Act 1946. The Act placed a duty on the Secretary of State for Social Services to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people and the prevention, diagnosis and treatment of illness. The Secretary of State for Wales administers the National Health Service in Wales. There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines and the respective Secretaries of State are responsible to Parliament.

The National Health Service covers a comprehensive range of hospital, specialist, family practitioner (medical, dental, ophthalmic and pharmaceutical), artificial limb and appliance, ambulance, and community health services. Everyone normally resident in this country is entitled to use any of these services, there are no contribution conditions and the charges made (except those for amenity beds) are reduced or waived in cases of hardship. In addition the Secretary of State for Social Services is responsible under the Local Authority Social Services Act 1970 for the provision by local authorities of social services for the elderly, the disabled, those with mental disorders and for families and children.

The 1980 Health Services Act led to major changes in the structure of the Health Service. Since April 1982, District Health Authorities (DHAs) are responsible for the operational management of health services and for planning within regional and national strategic guidelines. There are 190 DHAs in England and nine in Wales. Each DHA is required to arrange its services into units of management at hospital and community services level, and as many decisions as possible are delegated to unit level. Four of the London postgraduate teaching hospitals are now managed by DHAs (and eight are managed by special health authorities). Arrangements for the Family Practitioner Service are administered by Family Practitioner Committees (FPCs)—90 in England and eight in Wales. FPCs also contribute to the planning of health services.

The 14 Regional Health Authorities (RHAs) in England are responsible for regional planning, the allocation of resources to District Authorities, and the promotion of national policies and priorities. Performance review meetings are held annually between each hospital unit and its DHA, each DHA and its RHA, and between each RHA and Department of Health Ministers, thereby strengthening Authorities' accountability to Parliament, whilst respecting the essentially locally-based nature of decision making. Professional advisory machinery incorporated within the structure ensures that Health Authorities and their staffs make decisions in the full knowledge of expert opinion.

The NHS is financed mainly from taxation and the cost met from moneys voted by Parliament. In the United Kingdom this will amount to £26.1 billion in 1989-90. The Department of Health makes capital and revenue allocations to the RHAs and from these the RHAs meet the cost of their own services and make allocations to DHAs as well as funding Community Health Councils.

The Government published a White Paper in January 1989 (see pp. 1091-4) setting out proposals to improve the quality and efficiency of health services; extend patient choice; and to enhance the Service's responsiveness to its consumers. The reforms will be

introduced on a phased basis depending on Parliamentary approval of the necessary legislation.

THE HEALTH SERVICES

Family Doctor Service

In England and Wales the Family Doctor Service (or General Medical Services) is organized by 98 Family Practitioner Committees which also organize the general dental, pharmaceutical and ophthalmic services for their areas. There is a Family Practitioner Committee for one or more District Health Authorities. Under the Health and Social Security Act 1984, FPCs became employing authorities in their own right on April 1, 1985, and all the members and the chairmen (31 in all) are appointed by the Secretary of State. Fifteen of the appointments are made from nominations received from committees, representing local doctors (8), dentists (3), pharmacists (2), ophthalmic opticians (1) and from among all four professions (1). Of the fifteen lay members, four each are appointed from nominations received from District Health Authorities and Local Authorities. The remainder (7) are appointed after such consultations as the Secretary of State considers appropriate. One member must be a qualified district nurse, midwife or health visitor with recent community nursing experience.

Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 25,000 general practitioners in England and Wales do so. They may at the same time have private fee-paying patients. Family doctors are paid for their Health Service work in accordance with a scheme of remuneration which includes *inter alia* a basic practice allowance, capitation fees, reimbursement of certain practice expenses and payments for "out of hours" work.

Everyone aged 16 or over can choose their doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he or she chooses. A person may change their doctor if they wish, either at once if they have changed address or obtained permission from the doctor on whose list they are, or by informing the Family Practitioner Committee (in which case 14 days must elapse before the other doctor can accept them). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents", and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the Doctor's surgery or, when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 14,500 of the dentists available for general practice in England provide NHS general dental services. They are responsible to the Family Practitioner Committees in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them. Dentists receive payment for items of treatment for individual

patients, instead of the capitation fee received by doctors.

Patients are asked to pay three-quarters of the cost of NHS dental treatment. The maximum charge for a course of treatment is £150. There is no charge for arrest of bleeding, repairs to dentures, home visits by the dentist or re-opening a surgery in an emergency (in these two cases you will have to pay for treatment given in the normal way). The following are exempt from dental charges:

- young people under 18;
- full time students under 19;
- expectant mothers who were pregnant when accepted for treatment;
- women who have had a child in the previous 12 months.

People receiving Income Support or Family Credit, and members of the same family as someone receiving Income Support or Family Credit, are automatically entitled to full remission of charges.

Leaflet AB11 available from post offices and leaflet D11 available from local social security offices explain how other people on a low income can, depending on their financial circumstances, get free treatment or help with charges.

Pharmaceutical Service

Patients may obtain medicines, appliances and oral contraceptives prescribed under the NHS from any pharmacy whose owner has entered into arrangements with the Family Practitioner Committee to provide this service. Almost all pharmacy owners have done so and display notices that they dispense under the NHS: the number of these pharmacies in England and Wales at the end of 1988 was about 10,400. There are also some appliance suppliers who only provide special appliances. In country areas where access to a pharmacy may be difficult, patients may be able to obtain medicines etc. from their doctor.

Except for contraceptives (for which there is no charge), a charge of £2.80 is payable for each item supplied unless the patient is exempt and the declaration on the back of the prescription form is completed. Exemptions cover children under 16, young people under 19 and still in full-time education, men aged 65 and over, women aged 60 and over, pregnant women, mothers who have had a baby within the last 12 months, people suffering from certain medical conditions, people who receive Income Support or Family Credit, people on low income and war pensioners (for their accepted disabilities). In addition, prepayment certificates may be purchased by those patients not entitled to exemption who require frequent prescriptions. Further information about the exemption and prepayment arrangements is given in leaflet P.11.

General Ophthalmic Services

General Ophthalmic Services, which are administered by Family Practitioner Committees, form part of the ophthalmic services available under the National Health Service. The free NHS sight test is available to children under 16, full-time students under the age of 19, those people and their partners in receipt of Income Support and Family Credit, people exempt on low income grounds, people entitled to complex lenses under the NHS vouchers scheme, the registered blind and partially sighted, diagnosed diabetic and glaucoma patients, and close relatives aged 40 or over of diagnosed glaucoma patients. Those on a low income may qualify for help with the cost.

Certain groups are automatically entitled to help with the purchase of glasses under an NHS voucher scheme: children under 16; full-time students under 19; people who are themselves or whose partners are

in receipt of Income Support or Family Credit, and people wearing certain complex lenses. The value of the voucher depends on the lenses required. Vouchers may be used to help pay for the glasses or contact lenses of the patient's choice. People with a low income may claim help on form AG1. Glasses or contact lenses should not be purchased until the result of a claim is known as no refunds can be given. Leaflet G11 gives further details.

Diagnosis and specialist treatment of eye conditions is available through the Hospital Eye Service as well as the provision of glasses of a special type. Testing of sight may be carried out by any ophthalmic medical practitioner or ophthalmic optician and can cost up to £10. The optician must hand the prescription, and a voucher if eligible, to the patient who can take this to any supplier of glasses of his choice to have dispensed. However, only registered opticians can supply glasses to children, and people registered as blind or partially sighted.

Primary Health Care Services

Primary health care services include the general medical, dental, ophthalmic and pharmaceutical services and the family practitioner service. They also include community services run by district health authorities, health centres and clinics, family planning outside the hospital service, and preventive activities in the community including vaccination, immunization and fluoridation. The district nursing and health visiting services include community psychiatric nursing for mentally ill people living outside hospital, and school nursing for the health surveillance of school children of all ages; much ante- and post-natal care and chiropody are also an integral part of the primary health care service.

Community Child Health Services

Pre-school services, usually at child health clinics, provide regular surveillance of children's physical, mental and emotional health and development, and advice to parents on their children's health and welfare. The School Health Service provides for the medical and dental examination of schoolchildren, and advises the local education authority, the school, the parents and the pupil of any health factors which may require special consideration during the pupil's school life.

Hospitals and Other Services

The Secretary of State for Health has a duty to provide, to such extent as he/she considers necessary to meet all reasonable requirements, hospital and other accommodation; medical, dental, nursing and ambulance services; other facilities for the care of expectant and nursing mothers and young children, facilities for the prevention of illness, and the care and after-care of persons suffering from illness and such other services as are required for the diagnosis and treatment of illness. Rehabilitation services (occupational therapy, physiotherapy and speech therapy) may also be provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

Specialists and consultants who take part in the Service can engage in private practice, including the treatment of their private patients in NHS hospitals.

In a number of hospitals accommodation is available for the treatment of private in-patients who undertake to pay the full costs of hospital accommodation and services and (usually) separate medical fees to a specialist as well. The amount of the medical fees is a matter for agreement between doctor and patient. Hospital charges for private resident patients are determined by District Health Authorities either on a local basis or in line with a central "model" list.

Certain hospitals have accommodation in single rooms or small wards which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. In such cases the patients are treated in every other respect as National Health patients.

There is no charge for drugs supplied to National Health hospital in-patients but out-patients pay £2.80 per item unless they are exempt.

With certain exceptions, hospital out-patients have to pay fixed charges for dentures, contact lenses and certain appliances. Glasses may be obtained either

from the hospital or an optician and the charge will be related to the type of lens prescribed and the choice of frame.

Local Authority Personal Social Services

Local authorities are responsible for the organization, management and administration of the personal social services and each authority has a Director of Social Services and a Social Services Committee responsible for the social services functions placed upon them by the Local Authority Social Services Act 1970.

POSTAL SERVICES

On October 1, 1969 the Post Office ceased to be a government department. The responsibility for running postal services was transferred to a public authority called the Post Office, which also administered telecommunications in the United Kingdom. The British Telecommunications Act 1981 (which also separated the postal and telecommunications functions) gave the Secretary of State for Trade and Industry powers to suspend the monopoly of the Post Office in certain areas and to issue licences to other bodies to provide an alternative service. Non-Post Office bodies are now permitted to transfer mail between document exchanges and to deliver letters, provided that a minimum fee of £1 per letter is charged. Charitable organizations are allowed to carry and deliver Christmas and New Year cards.

Each extra 250 g or part thereof	50p	

Postcards travel at the same rates.

Stamps

There is a two-tiered postal delivery system in the U.K. with 1st class letters normally being delivered the following day and 2nd class postage within two days.

Postage stamps are sold in values of 1p, 2p, 3p, 4p, 5p, 10p, 15p, 20p, 24p, 29p, 30p, 32p, 34p, 37p, 50p, 75p, £1, £1.50, and £2.00.

Books of stamps costing 50p or £1 are available from electronic vending machines at some main post offices. At other vending machines books to the value of 50p are available. At post office counters books are sold containing 10 first class stamps (£2.00) and 10 second class stamps (£1.50). Rolls of 15p and 20p stamps are also sold. Mixed value rolls are only available on special order from post offices. The sale of postage stamps has been extended to outlets other than post offices, including stationers and newsagents.

Prepaid Stationery

Aerogrammes to all destinations, 30p.

Forces Aerogrammes, 15p.

Registered Letter Envelopes, printed with a £1.75 stamp (£1.55 for registration and 20p for postage), come in three sizes.

G, 156 x 95mm = £1.85

H, 203 x 120mm = £1.90

K, 292 x 152mm = £2.00

Printed postage stamps cut from envelopes, postcards, newspaper wrappers etc. may be used as stamps in payment of postage, provided that they are not imperfect or defaced.

Postal Orders

Postal Orders (British pattern) are issued and paid at nearly all post offices in the U.K. They are also paid in the Irish Republic, and issued and/or paid in many other countries overseas. These countries are listed in the Post Office Guide.

Postal orders are printed with a counterfoil for denominations of 25p, 30p, 40p, 50p, 60p, 70p, 80p, 90p, and £1, followed by £1 steps to £10, and £20. Postage stamps not exceeding two in number may be affixed in the space provided to increase the value of the postal order by up to 9p.

Charges (in addition to the value of the postal order): Up to £1 = 25p; £2-£10 = 38p; £20 = 58p.

The name of the payee must be inserted on the postal order. If not presented within six months of the last day of the month of issue, orders must be sent to the local head postmaster (in London, the district postmaster) to ascertain whether the order may still be paid.

Other Services

Cash on Delivery Service.—(Inland, excluding Irish Republic and H.M. ships). A trade charge (amount to be collected) up to £350 can, under certain conditions, be collected from addresses and remitted to the sender of a parcel containing an invoice. Invoice values of over £50 are only collectable at Post Office premises.

Charge per parcel (exclusive of postage and registration): Customers under contract = 85p; other customers = £1.15; C.O.D. enquiry = 85p.

Certificate of Posting.—Issued free on request at time of posting.

Compensation.—(Inland only). Compensation up to a maximum of £22 may be paid where it can be shown that a letter or parcel was damaged or lost in the post. The onus of making up properly any parcel sent by post lies with the sender. The Post Office does not accept any responsibility for loss arising from faulty packing. No compensation may be claimed for injury or damage to a parcel unless the item is registered and covered by consequential loss insurance.

Newspaper Post.—Copies of newspapers registered at the Post Office may be posted by the publisher or their agents in wrappers open at both ends, in unsealed envelopes approved by the Post Office, or without covers and tied by string which can be removed without cutting. Wrappers and envelopes must be prominently marked 'newspaper post' in the top left-hand corner. No writing or additional printing is permitted, other than the words 'with compliments', name and address of sender, request for return if undeliverable and a reference to a page. Items receive 1st class letter service.

Newspapers posted by the public, or supplements to registered newspapers despatched apart from their ordinary publications, are transmitted under the conditions governing the 1st or 2nd class letter services.

Prohibited Articles.—Prohibitions include offensive or dangerous articles, packets likely to impede Post Office sorters, and certain kinds of advertisement.

Recorded Delivery.—The recorded delivery service provides a record of posting and delivery of inland letters. No compensation is available for money or jewellery sent by this service. Charge: 25p; advice of delivery: ■ further 26p.

Redirection.—(i) By agent of addressee.—Packets other than parcels, business reply and freepost items may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and if original addressee's name is unobscured. Parcels may be redirected free of charge within the same time limits only if the original and substituted address are in the same local parcel delivery area (or within the London postal area). Registered packets, which must be taken to a post office, are re-registered free only up to the day after delivery.

(ii) By the Post Office.—Requests for redirection of mail should be made on printed forms obtainable from the post office and must be signed by the person to whom the letters are to be addressed. A fee is payable for each different surname on the application form.

Charges: Up to 1 calendar month = £3.00; Up to 3 calendar months = £6.75; Up to 12 calendar months = £16.00; Up to 12 calendar months where redirection has already been in operation for 12 months or more = £54.00.

Registration.—(Inland 1st class letters only). All packets intended for registration must be handed to the post office and a certificate of posting obtained.

Compensation in respect of money is given only if money is sent by registered letter post in one of the special envelopes sold officially (see Prepaid Stationery). Compensation cannot be paid in the case of any packet containing anything not legally transmissible by post. Compensation is paid for fragile articles only if they have been adequately packed. No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles. Information about charges and compensation rates is available from the local head postmaster (in London, the district postmaster). Advice of delivery: ■ further 26p at time of posting or 65p after time of posting.

Undelivered Mail.—Undelivered mail is returned to the sender provided the return address is indicated either on the outside of the envelope or inside. If the sender's address is not available, items not containing property are destroyed. If the packet contains something of value it is retained for up to three months. Exceptionally, items in the minimum weight step on which a rebate of postage has been allowed are destroyed unopened unless there is a return address shown on the outside of the cover. In addition, undeliverable 2nd class mail which contains newspapers, magazines or commercial advertising is destroyed.

Unpaid Mail.—All unpaid or underpaid letters are treated as 2nd class mail. The recipient is charged the amount of underpayment plus 11p per item. The same rates apply to parcels.

SPECIAL DELIVERY SERVICES

Datapost.—A guaranteed service for the delivery of documents and packages: (i) Datapost Sameday offers same day collection and delivery in many areas; (ii) Datapost Overnight offers next day delivery nationwide. Items may be collected or handed in at post offices. There are also Datapost links with ■ number of overseas countries.

Express Delivery.—This service is by special messenger from the office of delivery and is available to or from the Isle of Man or the Channel Islands. Charge (in addition to postage): £1.75.

Royal Mail Special Delivery.—This service offers special messenger treatment, where necessary, to ensure next day delivery of 1st class letters and packets. The fee of £1.75 is refunded if next working day delivery is not achieved, provided that items are posted before latest recommended posting times.

Swiftair.—Express delivery of air mail letters and packets anywhere in the world. Items normally arrive at least one day in advance of normal air mail. Charge (in addition to postage): £1.75.

Other Services

Cash on Delivery.—(Applicable to parcels only, but not to all countries, nor to British naval, military and R.A.F. forces serving overseas.) A charge starting at £2.70 per parcel must be prepaid in addition to the postage for outward parcels. For inward parcels the delivery fee is 80p. The trade charge (amount to be collected) may not exceed £1,500 but to most non-European countries the limit is lower. The addressee has also to pay on delivery, besides Customs charges if any, ■ further charge which is not payable. If the trade charge cannot be collected, special rules apply for undeliverable C.O.D. parcels.

Compensation.—If a certificate of posting is produced, compensation may be given for loss or damage in the U.K. to uninsured parcels to or from most overseas countries. No compensation will be paid for any loss or damage due to the action of the Queen's Enemies.

Export Restrictions.—Under Department of Trade and Industry regulations the exportation of some goods by post is prohibited except under Department of Trade licence. Enquiries should be addressed to the Export Data Branch, Overseas Trade Divisions, Department of Trade and Industry, 1 Victoria Street, London, SW1H 0ET (Tel. 01-215 5000).

Insurance.—Packets containing valuable papers, documents or articles such as jewellery can be insured ■ letters, or as parcels if the country of destination does not accept dutiable goods in the letter post. For H.M. ships abroad and also members of the Army and R.A.F. overseas using B.F.P.O. numbers, parcels only are insurable up to £140 at a fee of £1.20.

Charges: Cover up to £150 = £1.55; then 25p for each additional £100, up to £3.55 for £1,400 coverage.

International Reply Coupons.—Coupons are used to prepay replies to letters. They are exchangeable abroad for stamps representing the minimum surface mail letter rate from the country concerned to the U.K. Charge: 60p each.

Poste Restante.—(Solely for the convenience of travellers and for three months only in any one town). A packet may be addressed to any post office, except town sub-offices, and should have the words 'Poste Restante' or 'to be called for' in the address. Redirection from a Poste Restante is undertaken for up to three months. Letters at ■ seaports for an expected ship are kept for two months: otherwise letters are kept for two weeks, or for one month if

originating from abroad. At the end of this period mail is treated as undeliverable, unless bearing ■ request for return.

Registration.—(Except for parcels and printed paper items posted in bulk). Registration is available to all countries except the British Indian Ocean Territory and the Republic of the Maldives. No compensation is payable for loss or damage to valuable articles sent in an unregistered letter. Charge: £1.55.

Small Packets Post.—This service permits the transmission of goods up to 1 kg to all countries, in the same mails as printed papers. (N.B. To Australia, Bhutan, Bolivia, Burma, Colombia, Cuba and Papua New Guinea there is a limit of 500 g). Packets must be packed to enable examination by the Post Office. Registration is allowed but not insurance. A customs declaration is required.

Instructions for the disposal of undelivered packets must be given at the time of posting. A parcel which cannot be delivered will be returned to the sender at his expense.

PUBLIC TELECOMMUNICATIONS SERVICES

Under the British Telecommunications Act 1981 the functions of the Post Office were divided between two separate organizations. The Post Office retained control of postal services and British Telecom was created to provide a telecommunications service. The Act also provided for a limited relaxation of the telecommunications monopoly. This was further advanced by the Telecommunications Act 1984, which removed British Telecom's monopoly on running the public telecommunications system. British Telecom was privatized as ■ public limited company in 1984.

The Telecommunications Act 1984 also established the Office of Telecommunications (Oftel) ■ the independent regulatory body for the telecommunications industry. (See also Government and Public Offices.)

Public Telecommunications Operators

There are three licensed fixed link Public Telecommunications Operators (P.T.O.s) in the U.K.: British Telecom (B.T.), Mercury Communications Ltd. and the Kingston-upon-Hull City Council exchange. (In 1988 the Government announced its intention to license up to six other operators to provide one-way satellite communications systems).

British Telecom's obligations under its operating licence include the provision of (i) a universal telecommunications service; (ii) ■ service in rural areas, (iii) essential services, such as public call boxes and emergency services.

Mercury Communications is licensed to provide national and international telephone services for residential and business customers. These services utilize the digital network created by Mercury. Mercury can also provide the following services: (i) public payphone services; (ii) national and international telex; (iii) international packet data services; (iv) electronic messaging (electronic mail and access

to telex via a personal computer); (v) data network services; (vi) nationwide radiopaging.

Private Telephone Services

There are an increasing number of private telephone services which offer information on a variety of subjects such as the weather, stock market analysis, horoscopes, etc. There are currently about 100 companies providing such services on the British Telecom network.

The lines and equipment are provided by British Telecom under condition that services adhere to the code of practice of the Independent Committee for the Supervision of Standards of Telephone Information Practice. Nearly all services attract British Telecom's peak rate prices.

Mobile Telephone Systems

Cellular telephone network systems, in existence since 1985, allow calls to be made to and from mobile telephones. The two companies licensed by the Department of Trade and Industry to provide competing cellular telephone systems are Cellnet, jointly owned by B.T. and Securicor, and Racal Vodafone Ltd., owned by the Racal Electronics Group. Cellular phones can be identified by the number prefixes 0860 or 0836 and calls to them are charged at the 'm' rate.

INLAND TELEPHONES

Since December 1986 an individual customer can install an extension telephone socket or apparatus in their own home without the need to buy the items from any of the licensed Public Telecommunications Operators. However, it is necessary to possess ■ special style of master-socket which must be supplied by the public network operator. Although an individual need not buy or rent an apparatus from ■ P.T.O.,

a telephone bought from a retail outlet must be of an approved standard compatible with the public network (indicated by a green disc on the label).

British Telecom Charges

Exchange line rentals	Per quarter (excl. V.A.T.)	
Residential, exclusive	£15.35	
Residential, shared	£14.04	
Business, exclusive	£24.83	
Business, shared	£23.52	
Telephone apparatus rental		
Residential	from £3.50	
Business	from £4.40	
Private payphone	from £28.50	
Exchange line connection and take-over charges (including V.A.T.)	Residential	Business
New Customer	£133.00	£145.75
Removing Customer	£114.00	£126.75
Take-over of existing lines	£20.25	£20.25

Local and dialled national calls are charged in 4.4p units when made from ordinary lines, in 10p units when made from payphones; and from press button payphones there is a 10p minimum charge with 2p incremental units. All charges are subject to V.A.T. except those from payphones which are V.A.T. inclusive. V.A.T. charges on ordinary lines are calculated as a percentage of the total quarterly bill.

The length of time per unit depends on the distance of the call and the time of day.

Local rate

'a' rate = up to 35 miles (56 km).

'b1' rate = frequently used routes over 35 miles (56 km).

'b' rate = over 35 miles (56 km).

'm' rate = dialled calls to mobile phones.

Peak rate: Monday to Friday, 9am–1pm

Standard rate: Monday to Friday, 8am–9am and 1pm–6pm

Cheap rate: Monday to Friday, 6pm–8am. All day Saturday and Sunday and, in general, on national public holidays also.

0345 = charged at the local rate.

0055 = charged at 'a' rate.

0066 = charged at 'b' rate.

0860, 0077 and 0898 = charged at 'm' rate (and some 0836 calls also).

Operator-Connected Calls

Operator-connected calls from ordinary lines are subject to a three-minute minimum charge (and thereafter by the minute) which varies with distance and time of day. Operator-connected calls from payphones are charged in three-minute periods at the payphone tariff. For calls that have to be placed through the operator because a dialled call has failed, the charge is equivalent to the dialled rate, subject normally to the three-minute minimum.

Higher charges apply to other operator-connected calls including special services calls and those to mobile phones, the Irish Republic and the Channel Islands. Personal calls (to a specified person) are £1.75 (excl. V.A.T.) extra from ordinary lines and £2.10 (incl. V.A.T.) from payphones: if the person cannot be found, nothing further is charged.

Phonecards

Phonecards to the value of £1, £2, £4, £10, and £20 are available from post offices and other outlets for use in specially designated public telephone boxes. Each phonecard unit is equivalent to a 10p coin in a payphone.

Special public payphones at major railway stations and airports also accept commercial credit cards.

INTERNATIONAL TELEPHONES

All U.K. customers have access to International Direct Dialling (I.D.D.) and can dial direct to numbers on most exchanges in over 190 countries worldwide. Details about how to make calls are given in dialling code information and in the International Telephone Guide.

For countries without I.D.D., calls have to be made through the International Operator. All operator-connected calls are subject to a three-minute minimum charge. Thereafter the call is charged by the minute.

Countries which can be called on I.D.D. fall into one of eight International Charge Bands depending on location. Charges in each band also vary according to the time of day, except for those in Charge Band G where the standard rate applies at all times. There is no reduced rate for operator-connected calls. Details of current international telephone charges can be obtained from the International Operator.

(For International Dialling Codes, see pp. 1063–65.)

BRITISH TELECOM SERVICES

Operator Services—100

(i) For difficulties

(ii) For the following call services: alarm calls (charge £1.21); advice of duration and charge (charge 75p); charge card calls (charge 29p); fixed time calls (charge £2.01); frefone calls; personal calls (charge £2.01); international personal calls (charge £2.47–£4.95); transferred charge calls (charge 35p); subscriber controlled transfer. (All calls include V.A.T.)

International Operator—155

Directory Enquiries:

For numbers in the London postal area, 142.

For numbers outside the London postal area including the Irish Republic, 192.

International Directory Enquiries—153

Emergency Services—999

Services include: fire service; police service; ambulance service; coastguard; cave rescue; mountain rescue.

Faults—151

Telemassage—190

International Telemassage—100 (for 01 London numbers, 193). The service is only available to the U.S.A.

International Telegrams—100 (for 01 London numbers, 190).

Maritime Services—100. Includes Ship's Telegram Service and Ship's Telephone Service.

B.T. Inmarsat Satellite Service—155

All other call enquiries—191

OTHER TELECOMMUNICATIONS SERVICES

Telex Service.—There are now 208 countries that can be reached by the British Telecom telex service from the U.K., over 200 of them by direct dialling.

For most customers, direct dialled calls to international destinations are charged in six-second units. Units cost between 2.3p and 13.2p depending upon the country called. Calls via the British Telecom

operator are charged in one-minute steps with a three-minute minimum, plus a surcharge of £1.30 a call. Operator-connected calls are charged at between 39p and £1.60 a minute depending upon the country called.

Calls made via British Telecom's Telex Plus store and forward facility attract normal telex charges and a handling charge of 13p for inland delivered messages and 30p for international delivered messages.

Telemassage.—Telemessages can be sent by telephone or telex within the U.K. for 'hard copy' delivery the next working day, including Saturdays. To achieve this, a telemassage must be telephoned/telexed before 10pm Monday to Saturday (7pm Sundays and Bank Holidays). Dial 100 (in London, 190) and ask for the Telemassage Service or see the telex directory for codes.

A Telemassage costs £5 for the first 50 words and £2.75 for each subsequent group of 50 words—the name and address are free. A sender's copy costs 85p. A selection of cards is available for special occasions at 80p per card. All prices are subject to V.A.T.

International Telemassage.—Telemassage is also available to the U.S.A. For next working day delivery a telemassage must be filed by 10pm U.K. time Monday to Saturday (7pm Sundays and Bank Holidays). U.S. addresses must include the ZIP code. Charges are £7.25 for the first 50 words and £3.60 for each subsequent group of 50 words. The name and address are free but all charges are subject to V.A.T.

WEATHERCALL SERVICE

To obtain local weather forecasts, dial the prefix code 0898 500 followed by the appropriate regional code.

INTERNATIONAL POST AND TELEPHONE CODES

The table below includes airmail letter zones for countries outside Europe (A, B or C). Destinations to which European airmail letter rates apply are indicated by *e*, or by *ec* for European Community destinations.

International dialling codes are composed of four elements which are dialled in sequence: (i) the international code (from the U.K. this is always 010); (ii) the country code (*see* list below); (iii) the area code; (iv) the customer's number. Calls to some countries (indicated by † below) must be made via the international operator.

SUMMARY OF SPORT 1988-89

RECORDS

ATHLETICS
WORLD RECORDS
 (as at Aug. 31, 1989)

(All the world records given below have been accepted by the International Amateur Athletic Federation except those marked with an asterisk* which are awaiting homologation.)

Fully automatic timing to 1/100th second is mandatory up to and including 400 metres. For distances up to and including 10,000 metres records will be accepted to 1/100th second if timed automatically, and to 1/10th if hand timing is used.

CRICKET, 1988-89

TEST MATCHES

Pakistan v. Australia, 1988

First Test.—(Karachi, Sept. 17-20). Pakistan won by ■■ innings and 188 runs. Pakistan 469 for 9 dec.; Australia 165 and 116.

Second Test.—(Faisalabad, Sept. 23-28). Drawn. Pakistan 316 and 378 for 9 dec.; Australia 321 and 67 for 3.

Third Test.—(Lahore, Oct. 8-11). Drawn. Australia 340 and 161 for 3 dec.; Pakistan 233 and 153 for 8.

India v. New Zealand, 1988

First Test.—(Bangalore, Nov. 12-17). India won by 172 runs. India 384 for 9 dec. and 141 for 1 dec.; New Zealand 189 and 164.

Second Test.—(Bombay, Nov. 24-29). New Zealand won by 136 runs. New Zealand 236 and 279; India 234 and 145.

Third Test.—(Hyderabad, Dec. 2-6). India won by ten wickets. New Zealand 254 and 124; India 358 and 20 for 0.

Australia v. West Indies, 1988-89

First Test.—(Brisbane, Nov. 18-21). West Indies won by nine wickets. Australia 167 and 289; West Indies 394 and 63 for 1.

Second Test.—(Perth, Dec. 2-6). West Indies won by 169 runs. West Indies 449 and 349 for 9 dec.; Australia 395 for 8 dec. and 234 for 9.

Third Test.—(Melbourne, Dec. 24-29). West Indies won by 285 runs. West Indies 280 and 361 for 9 dec.; Australia 242 and 114.

Fourth Test.—(Sydney, Jan. 26-30). Australia won by seven wickets. West Indies 224 and 256; Australia 401 and 82 for 3.

Fifth Test.—(Adelaide, Feb. 3-7). Drawn. Australia 515 and 224 for 4 dec.; West Indies 369 and 233 for 4.

New Zealand v. Pakistan, 1989

First Test.—(Dunedin, Feb. 3-7), (*Match abandoned*).

Second Test.—(Wellington, Feb. 10-4). Drawn. New Zealand 447 and 186 for 8; Pakistan 438 for 7 dec.

Third Test.—(Auckland, Feb. 24-28). Drawn. Pakistan 616 for 5 dec.; New Zealand 403 and ■■■ for 3.

West Indies v. India, 1989

First Test.—(Georgetown, March 25-30). Drawn. West Indies 437; India ■■■ for 1 (*Match abandoned*).

Second Test.—(Bridgeport, April 7-12). West Indies won by eight wickets. India 321 and 193 for 6; West Indies 377 and 196 for 2.

Third Test.—(Port of Spain, April 15-20). West Indies won by 217 runs. West Indies 314 and 266; India 150 and 213.

Fourth Test.—(Kingston, April 28-May 3). West Indies won by seven wickets. India 289 and 152; West Indies 384 and 60 for 3.

England v. Australia, 1989

First Test.—(Headingley, June 8-13). Australia won by 210 runs. Australia 601 for 7 dec. and 230 for 3 dec.; England 430 and 191.

Second Test.—(Lord's, June 22-27). Australia won by six wickets. England 286 and 359; Australia 528 and 119 for 4.

Third Test.—(Edgbaston, July 6-11). Drawn. Australia 424 and 158 for 2; England 242.

Fourth Test.—(Old Trafford, July 27-Aug. 1). Australia won by nine wickets. England 260 and 264; Australia 447 and 81 for 1.

Fifth Test.—(Trent Bridge, Aug. 10-15). Australia won by an innings and 180 runs. Australia 602 for 6 dec.; England 255 and 167.

Sixth Test.—(The Oval, Aug. 24-29). Drawn. Australia 468 and 219 for 4 dec.; England 285 and 143 for 5.

ONE-DAY INTERNATIONALS

England v. Australia, 1989

Texaco Trophy Series

Old Trafford, May 25.—England beat Australia by 95 runs. England 231 for 9; Australia 136 all out.

Trent Bridge, May 27.—Match tied. England 226 for 5. Australia 226 for 8.

Lord's, May 29.—Australia beat England by six wickets. England 278 for 7; Australia 279 for 4.

England won the Texaco Trophy having lost fewer wickets in the tied match.

World Series Cup

Final.—1st Match (Melbourne, Jan. 14). Australia beat West Indies by 2 runs. Australia 204 for 9; West Indies 202 for 9.

2nd Match (Sydney, Jan. 16). West Indies beat Australia by 92 runs. West Indies 277 for 9; Australia 185.

3rd Match (Sydney, Jan. 18). West Indies won on a faster scoring rate. Australia 226 for 4; West Indies 111 for 2.

England v. Australia, 1989 (Averages)

THE DERBY, 1986-89

For particulars of the Derby from 1780-1985 see 1921-89 editions.

The distance of the Derby course at Epsom is $1\frac{1}{2}$ miles. First winner was Sir Charles Bunbury's Diomed in 1780. Lord Egremont won the Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, 1851, 58, 59, 68; the 1st Duke of Westminster, 1880, 82, 86, 99; Sir Victor Sassoon, 1953, 57, 58, 60. By winning his 5th Derby, in 1952, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

The Derby was run at Newmarket from 1915-18 and again from 1940-45.

Year	Owner and Name of Winner	Betting	Jockey	Trainer	No. of Run'rs
1986	H. H. Aga Khan's Shahrestani	11-2	W. Swinburn ..	M. Stoute.....	17

THE NOBEL PRIZES

For prize winners for the years 1901–1985, see earlier editions of WHITAKER'S ALMANACK.

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. The prizes are awarded to those who have contributed most to the common good in the domain of:

- (a) Physics, awarded by the Royal Swedish Academy of Sciences;
- (b) Chemistry, awarded by the Royal Swedish Academy of Sciences;
- (c) Physiology or Medicine, awarded by the Karolinska Institute;
- (d) Literature, awarded by the Swedish Academy of Arts;
- (e) Peace, awarded by a five-person committee elected by the Norwegian Storting;
- (f) Economic Sciences (instituted 1969), awarded by the Royal Swedish Academy of Sciences.

The first awards were made in 1901 on the fifth anniversary of Nobel's death.

The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm, consisting of five members and three deputy members. The Swedish Government appoints a chairman and a deputy chairman, the remaining members being appointed by the awarding authorities.

Prize	1986	1987	1988
PHYSICS	Dr. G. Binnig (W. German) Dr. H. Rohrer (Swiss) Prof. E. Ruska (W. German)	Dr. J. G. Bednorz (W. German) Dr. K. A. Müller (Swiss)	Dr. L. Lederman (American) Dr. M. Schwartz (American) Dr. J. Steinberger (American)

WHITE PAPERS

BROADCASTING IN THE '90s

The White Paper *Broadcasting in the '90s: Competition, Choice and Quality* (Cm. 517) was presented to Parliament by the Home Secretary (Douglas Hurd) on November 7, 1988. The White Paper set out the Government's proposals for broadcasting in the United Kingdom in the 1990s. The Government feels that ■ radical reform of the framework for broadcasting in the U.K. is necessary for two reasons. First, the framework needs to be altered to take account of technological, international and other new developments. Second, the Government wishes a much wider range of programmes and types of broadcasting to be offered to viewers and listeners. It feels that choice should be widened and competition in the industry increased, though without detriment to programme standards and quality.

BBC

The Government sees the BBC continuing to be the cornerstone of public service broadcasting, at least for the foreseeable future. However, the Government feels that ■ new television services proliferate, the system of financing BBC television and radio services by a compulsory licence fee alone will become harder to sustain. The Government accepts that a sudden switch to subscription would be undesirable and damaging but feels that there should be ■ greater role for subscription.

The Government intends to encourage the progressive introduction of subscription on the BBC's television services and will authorize the BBC to encipher its services so that it can raise money through subscription. To provide ■ financial incentive, the Government intends after April 1991 to agree licence fee increases of less than the Retail Price Index increase in ■ way which takes account of the BBC's capacity to generate income from subscription.

A natural starting place for subscription is during the night hours. The BBC has already started night hours services providing information for the medical profession and it plans to run other similar services.

The Peacock Committee proposed that the night hours (which it defined as lasting from 1 a.m. to 6 a.m.) should be removed from the BBC and other broadcasting authorities and sold for use to provide new services by the highest bidder. The Government feels that this would hamper the BBC's plans for building ■ base for subscription technology. But the Government accepts the case for removing the night hours from one of the BBC's channels and assigning them to the independent television sector. The Government proposes to allow the BBC to retain the night hours of the other of its channels, on the basis that it ■ them for developing subscription services.

Independent Television Commission

The Government thinks that all independent sector television services should be brought within the ambit of a single agency responsible for the whole sector. The present powers of the Independent

Broadcasting Authority and the Cable Authority are limited to particular delivery technologies. The Government therefore proposes that there should be ■ Independent Television Commission (ITC).

The Government proposes that the ITC should be a licensing body rather than ■ broadcasting authority. This means that it will supervise, but not itself provide, programme services, applying broadly the same regulation across the board.

Independent Television

The Government feels that ■ the U.K. moves towards a more competitive multi-channel broadcasting market, the existing regime for ITV would become increasingly hard to sustain. It would be less sustainable to try to make all new services conform to the present requirements of the ITV system. The Government believes that this is the appropriate time to make major changes to the regime for what might henceforth be called Channel 3. If Parliament agrees, these changes will take effect from January 1, 1993 when the present ITV contracts come to an end.

The Government proposes that Channel 3 should be subject to positive programme requirements. Each Channel 3 station will be required: to show regional programming, including programmes produced in the region; to show high quality news and current affairs dealing with national and international matters, and to include news coverage in main viewing periods; to provide ■ diverse programme service calculated to appeal to a variety of tastes and interests; to ensure that a minimum of 25 per cent of original programming comes from independent producers; and to ensure that a proper proportion of programme material is of E.C. origin.

The Government intends to impose ■ duty on the ITC to ensure that there is at least one body effectively equipped and financed to provide news on its Channel 3 service. Channel 3 licensees would be required to finance the organization.

The Government wishes to introduce a more commercial element into the allocation of ITV franchises. It proposes that ■ suitably regulated tendering process should be introduced and that the ITC should operate ■ two-stage procedure. In the first stage applicants for licences would have to satisfy the ITC that they would meet the programming requirements. All applicants passing this stage would go on to the second stage, in which they would offer financial tenders for the licence. The ITC would be required to select the applicant for each licence who had submitted the highest tender.

Channels ■ and 6

The Government proposes to authorize a fifth channel with the same regulatory regime and the ■ licence allocation and review arrangements as Channel 3. The Government proposes that Channel 5 should begin broadcasting from the beginning of 1993, when the new Channel 3 licences will start. Bearing in mind that Channel 3 will be regionally

based, the Government believes that Channel 5 licences should be national in scope.

A sixth channel will also be authorized should technical studies show this to be feasible. It would be subject to broadly the ■■■■■ regulatory regime and oversight ■■■■■ Channel 5, ■■■■■ would be the night hours which the ITC would allocate by competitive tender following release from the BBC.

Channel 4 and S4C

The Government proposes that the programming remits of Channel 4 and S4C should be fully sustained.

However, the Government believes that its proposals for a more competitive independent television sector mean that the place for Channel 4 within such an integrated ITV system will no longer be available.

The Government believes that Channel 4's role is best fulfilled by an independent organization subject to ITC oversight, but without direct financial or structural links to the Channel 3 licensees. Advertising will be sold separately from the advertising on Channel 3 or other channels. The Government puts forward in the White Paper a number of options for the future constitution of Channel 4 and invites comment.

The Government believes that the independent television services operating in the U.K. should continue to finance the cost of the Welsh Fourth Channel (net of its own advertising revenue).

Satellite services

British Satellite Broadcasting (BSB) plans to provide three channels nationwide. The U.K.'s two remaining direct broadcasting by satellite (DBS) frequencies will be advertised by the Independent Broadcasting Authority in early 1989. This will account for all the DBS channels now allocated to the U.K.; should any additional DBS channels be allocated to the U.K. in future, the ITC will allocate licences for future DBS services.

The Government wishes to encourage the development of cable and microwave (MVDS) transmission services, particularly in order to facilitate the growth of local services. It proposes a flexible regime which will leave operators free to decide upon the best mix of technologies. At present this will mean a choice between, or a combination of, cable and MVDS; but the framework will be sufficiently flexible to leave the way open for new technologies which may emerge.

These arrangements will be based on fifteen-year local franchises awarded by the ITC. The ITC will be assigned suitable frequencies for local services, and will be responsible for advertising franchises.

Viewers will continue to be able to receive other satellite services directly, including those from the proposed Astra and Eutelsat II satellites. Steps will be taken to ensure that the programme content of all such services is supervised.

Financing of services

The Government proposes to allow all independent sector television operators to finance themselves by advertising or subscription or ■■■■■ mixture of the two.

The Government envisages that the ITC will have ■ duty to draw up and enforce ■ code or codes on advertising and sponsorship. The Government favours liberalizing the present restrictions on sponsorship, provided editorial independence and transparency for the viewer are adequately protected. The BBC will be free to raise finance through subscription and sponsorship but not by carrying advertising.

Ownership

The Government is determined to impose limits on concentration of ownership and on excessive cross-media ownership, in order to keep the market open for newcomers and to prevent any tendency towards editorial uniformity or domination by ■ few groups. The Government proposes to make use of subordinate legislation for such restrictions, to ensure maximum flexibility in reacting quickly to changing circumstances.

The Government envisages that local authorities and bodies whose objects are wholly or mainly of a religious or political nature will be disqualified from holding any ITC licence. The Government also envisages restrictions on the number of licences that may be held by one group.

Radio

The Government published in February 1987 a Green Paper *Radio: Choices and Opportunities* (Cmnd. 92). At the national level the Green Paper saw ■ continuing need for public service radio broadcasting provided by the BBC, but proposed that there should be additional national radio services provided on commercial lines. At the local level it proposed that the BBC should complete its chain of local stations, and that local independent stations, including new community radio services, should operate under broadly the same regulatory regime ■ envisaged for the new national services.

The Government's proposals in the White Paper are that there will be at least three new national commercial services operating alongside the BBC. The new national services and independent local services will be subject to ■ lighter regulatory regime than at present.

At the local level, licensing criteria will include financial viability, local audience demands, and the extent to which the proposed services would enhance the range of programming and the diversity of listener choice. National services will be expected to provide ■ diversity of programmes calculated to appeal to ■ variety of tastes and interests and not limited to ■ single narrow format. The proposed competitive tender procedure for national services will be subject to this test. National and local services will have to keep their promises of performance in order to retain their licences.

Radio Authority

A new Radio Authority will be responsible for assigning frequencies and issuing licences to, and supervising the performance of, all independent stations. Advertising and sponsorship will be more flexibly supervised than at present.

The Government also proposes to provide for any satellite radio services for direct reception to be regulated by the Radio Authority. In the case of satellite programming delivered to stations, Radio Authority regulation will apply to the stationtaking the service. The Authority will also license miscellaneous radio broadcasting services, such as special event and university radio.

Programme standards

All U.K. television and radio services will be required to observe acceptable standards of impartiality, taste and decency. The Government feels that nothing should be included in programmes which is offensive to public feeling or which encourages crime or disorder.

The Broadcasting Standards Council was established in 1988 by the Government to develop a code on the portrayal of sex and violence in all forms of broadcasting. The Government proposes to place the Council on a statutory footing.

The Government sees no case for continuing the exemption of broadcasting from the Obscene Publications Act 1959, and proposes to remove the exemption at the earliest opportunity.

Transmission

The Government considers that the best arrangement in due course would be a regionally based, privatized transmission system designed to promote competition, while containing certain common carrier obligations. The Government proposes to discuss with the BBC, the IBA and others how the objective of moving towards a privatized transmission system might best be taken forward. It will also be considering how any necessary regulatory oversight should be arranged.

Programme production

The Government has already set the BBC and the ITV companies the target of commissioning 25 per cent of original material from independent producers as quickly as possible. Both the BBC and the ITV companies are committed to achieving this target by the end of 1992, subject to satisfaction on cost and quality. The Government has welcomed these developments, and envisages that independent producers will continue to play a greater part in programme making in the U.K.

WORKING FOR PATIENTS

The Government's review of the operation of the National Health Service (NHS) has led to the publication in the past two years of two White Papers proposing reforms. In November 1987 the White Paper *Promoting Better Health* (Cm. 249) was published, containing proposals for improving primary health care services (summarized in *Whitaker's Almanack 1989*). The Government's proposals for improving the hospital service and the organization of the NHS were published in the White Paper *Working for Patients* (Cm. 555). This was presented to Parliament on January 31, 1989 by the Secretaries of State for Health (Kenneth Clarke), Wales (Peter Walker), Northern Ireland (Tom King) and Scotland (Malcolm Rifkind).

In the White Paper *Working for Patients* the government states its commitment to the principles that have guided the NHS for the past forty years. The Government emphasizes that the NHS will continue to be available to all, regardless of income, and will be financed mainly out of general taxation.

The Government praises the quality of care provided and the response to emergencies by the NHS. The Government feels, however, that rising demand and the ever-widening range of treatments made possible by medical advances present challenges to the efficient operation of the NHS that can only be met by reforming its organization.

The Government wishes to eliminate the wide variation in performance between different areas of the country. The average cost of treating patients and the waiting times for operations varies considerably between different health authorities. Similarly, there are wide variations in the drug prescribing habits of general practitioners (G.P.s)

and in the rate at which G.P.s refer patients to hospital.

The Government wants to raise the performance of all hospitals and G.P. practices to that of the best. It is convinced that this can be done only by delegating responsibility as closely as possible to where health care is delivered to the patient—predominantly to the G.P. and the local hospital. The proposals in the White Paper are intended to give patients, wherever they live in the U.K., better health care and greater choice of the services available; and afford greater satisfaction and rewards to those working in the NHS who successfully respond to local needs and preferences.

Management of the NHS

The Government wishes to make the Health Service more responsive to the needs of patients, and believes that this can best be achieved by delegating as much power and responsibility as possible to local level. This includes the delegation of functions from Regional Health Authorities (RHAs) to District Health Authorities (DHAs), and from DHAs to hospitals.

The central management of the NHS would be altered to reflect this change in the division of responsibilities. The Government proposes that responsibility for strategy rest with an NHS Policy Board chaired by the Secretary of State for Health. Responsibility for all operational matters would rest with an NHS Management Executive chaired by a Chief Executive. The Management Executive would be accountable to the Policy Board for the management of the NHS within the strategy and objectives

set by the Policy Board. Responsibility for the management of family practitioner services would be brought under the NHS Management Executive. The better integration of primary care and hospital services would be an important objective.

The NHS Management Executive could not directly exercise effective authority over the current 190 DHAs. Regional Health Authorities would therefore continue to ensure that Government policies are properly carried out within their Regions. Their essential tasks would include setting performance criteria, monitoring the performance of the Health Service and evaluating its effectiveness.

The Government also believes that there is scope for delegating more decision-making from DHAs to hospitals and their associated management units. The Government envisages DHAs delegating operational functions to hospitals and concentrating their efforts on ensuring the provision of the services required locally, setting targets and monitoring the performance of those management units for which they are responsible. The proposals include greater flexibility for hospitals in setting the pay and conditions of staff, and financial incentives to make the best use of a hospital's assets.

Self-governing hospitals

The Government intends to allow hospitals to apply for a new self-governing status as NHS Hospital Trusts. This means that, while remaining within the NHS, they would take fuller responsibility for their own affairs, harnessing the skills and dedication of their staff. NHS Hospital Trusts would earn revenue from the services they provided. They would therefore have an incentive to attract patients, so they would make sure that the services offered are what their patients want. This in turn would stimulate other NHS hospitals to respond to what people want locally. NHS Hospital Trusts would also be able to set the rates of pay of their own staff and, within annual financing limits, to borrow money to help them respond to patient demand.

The Government wishes the money required to treat patients to be able to cross administrative boundaries. It proposes that all NHS hospitals, whether run by health authorities or self-governing, should be free to offer their services to different health authorities and to the private sector. The Government believes that this will enable a health authority to make better use of its available funds to secure a comprehensive service, including emergency services, by obtaining the best service it can, whether from its own hospitals, from another authority's hospitals, from NHS Hospital Trusts or from the private sector.

The Government wishes to reduce waiting times and improve the quality of service, to help give individual patients appointment times they can rely on, and to help cut the long hours worked by some junior doctors. It proposes that 100 new consultant posts be created over the next three years. The new posts will be in addition to the two per cent annual expansion of consultant numbers already planned.

Practice budget scheme

The Government wishes to help the family doctor improve his service to patients. To this end, large

G.P. practices will be allowed to apply for their own budgets to obtain a defined range of services direct from hospitals.

At the start of the new scheme, G.P. practices with lists of at least 11,000 patients would be free to apply for their own NHS budgets for a defined range of hospital services. They would be able to obtain these services from either NHS or private sector hospitals. The size of each practice's budget would depend primarily on the number of patients on the practice's list. There would be three categories of hospital services within the scheme: out-patient services; a defined group of in-patient and day treatments (the inclusion of this category will make it easier for G.P.s to offer shorter waiting times to patients who are willing to travel, and will enable them to provide the hospitals concerned with NHS funds to pay for the treatment); and diagnostic tests, such as X-ray examinations and pathology tests.

In addition, the Government intends the scheme to cover three aspects of the services provided by G.P.s themselves: the 70 per cent of practice team staff costs which are directly reimbursed to G.P. practices at present and which will be cash-limited under the Health and Medicines Act 1988; improvements to practice premises; and prescribing costs.

Participation in the practice budget scheme would be voluntary, and practices which have joined the scheme would be free to leave it if they wish, after giving due notice.

Indicative drug budgets

The cost of the drugs prescribed by G.P.s is the largest single element of total expenditure by the Family Practitioner Service. There are wide differences in drug costs from one part of the country to another, reflecting varying attitudes of doctors towards prescribing.

In an attempt to contain the rise in the cost of medicines the Government introduced a 'Selected List' of drugs which doctors may prescribe. An information system was established to collect data about prescribing patterns. The Government now proposes to improve prescribing practice by introducing indicative drug budgets for G.P.s. The intention is that RHAs will set an annual drug budget for each Family Practitioner Committee (FPC). The FPCs will then set indicative drug budgets for each practice, after discussion with G.P.s. The spending of practices will be monitored during the year by the FPC, and the performance of the FPCs will be monitored by the RHAs. Practices may exceed their budget in exceptional circumstances but generally RHAs and FPCs will be expected to work to the budget they have been set.

Composition of management bodies

The Government feels that the delegation of greater management responsibility to the Regional and District Health Authorities and the Family Practitioner Committees necessitates changes to the composition of these bodies. At present there is some confusion of roles, so that they neither represent the full range of health interests in the locality, nor are they fully management bodies.

The Government believes that authorities based on this confusion of roles would not be equipped to handle the complex managerial and contractual issues that the new system of matching resources to performance will demand. The Government proposes to reduce the management bodies in size and reform them along business lines, with executive and non-executive directors.

Audits

To ensure that all concerned with delivering services to the patient make the best use of the resources available, quality of service and value for money will be more rigorously audited. Arrangements for what doctors call 'medical audit' (a systematic, critical analysis of the quality of medical care) will be extended throughout the Health Service. The Government hopes that this will help to ensure consistently high quality of treatment, and the best use of financial resources.

At present the Health Departments carry out the external audits of the health authorities and the Family Practitioner Committees. The Government proposes to transfer to the Audit Commission responsibility for auditing the accounts of health authorities and other NHS bodies. The responsibilities of the Audit Commission would also cover the proposed NHS Hospital Trusts and G.P. practice budgets. It would also undertake 'value for money' studies.

Putting patients first

It will take time for some of the reforms proposed in the White Paper to take effect, even when the necessary legislation has been passed. In the meantime the Government wishes health authorities to take more immediate action to tackle the problems of greatest public concern.

People still sometimes have to wait too long for treatment, and may have little choice over the time or place at which treatment is given. Also, the service provided on admission to hospital is sometimes impersonal and inflexible. The Government believes that each hospital should offer:

- (i) appointments systems which give people individual appointment times that they can rely on;
- (ii) quiet and pleasant waiting and other public areas, with proper facilities for children and for counselling;
- (iii) information leaflets about the facilities available and what patients need to know when they come into hospital;
- (iv) clearer and easier procedures for making suggestions for improvement and, if necessary, complaints;
- (v) once someone is in hospital, clear and sensitive explanations of what is happening, both in practical and in clinical matters;
- (vi) rapid notification of the results of diagnostic tests;
- (vii) a wider range of optional amenities for patients who want to pay for them (e.g. single rooms, personal telephones, televisions).

Use of resources

The Government feels that if the NHS is to provide the best service it can for its patients, the quest for value for money must be an essential element in its work. The Government believes that delegating more operational responsibility to local level will enable the Health Service to make better use of the available resources. The Government expects the changes to improve the information available to local managers, enabling them to make their budgeting and monitoring more accurate. It also expects health authorities to contract out more functions which do not have to be undertaken by health authority staff and which could be provided more cost effectively by the private sector.

Private health sector

The Government feels that the NHS and the independent health sector should be able to support each other and to provide services for each other. There is already a growing partnership between the NHS and the independent health sector and the Government hopes that its reforms to the NHS will create more opportunities for the two sectors to work together.

The Government expects to see further increases in the number of people wishing to make private provision for health care, but at the moment many people who do so during their working life find the cost of higher premiums difficult to meet in retirement. The Government therefore proposes to allow income tax relief on private medical insurance premiums for those aged 60 and over. This relief will be available on premiums paid by them or, for example, by their families on their behalf.

Implementation

The Government plans to implement the proposals in the White Paper in three main phases from 1989-91.

In 1989 the Secretary of State for Health will establish a new NHS Policy Board and reconstitute the NHS Management Board as a Management Executive (implemented in May/June 1989). The Health Departments and Regional Health Authorities in England will identify the first hospitals to become self-governing NHS Hospital Trusts, and plan for their new status; will devolve further operational responsibility to District Health Authorities and hospitals; and will begin preparing the ground for G.P. practice budgets.

The first additional consultant posts will be created; District Health Authorities will begin agreeing job descriptions with their consultants; and a new framework for medical audit will begin to be implemented. The existing resource management initiative will be extended to more major acute hospitals. Preparations for indicative drug budgets for G.P.s will begin. The Audit Commission will begin its work in the NHS.

In 1990 'shadow' boards of the first group of NHS Hospital Trusts will start to develop their plans for the future. RHAs, District Health Authorities and

Family Practitioner Committees will be reconstituted, and FPCs will become accountable to RHAs. Regions will begin paying directly for work they do for each other.

In 1991 the first NHS Hospital Trusts will be

established. The first G.P. practice budget-holders will begin buying services for their patients. The indicative drug budget scheme will be implemented. DHAs will begin paying directly for work they do for each other.

LEGAL SERVICES

The White Paper *Legal Services: A Framework for the Future* (Cm. 740) was presented to Parliament by the Lord Chancellor (Lord Mackay of Clashfern) on July 19, 1989. The Government's overall aim is to improve access to good quality legal services, to the courts and, ultimately, to justice. The proposals in the White Paper are intended to improve the structure and work of the legal profession and to ensure that legal services of the appropriate kind and quality are readily available.

In January 1989 the Government published three Green Papers about the work and organization of the legal profession, contingency fees, and conveyancing. Response to these was taken into account when the White Paper was prepared.

In the White Paper, the Government announces its proposals for legislation, which it intends to introduce at an early opportunity. The overall aims are to give the public ■ wide a choice as possible in the providers of legal services available to them. At the same time, the Government seeks to maintain the high standards of integrity and competence which are necessary for protecting the interests of the client and for the more general public interest in the administration of justice. The Government seeks also to remove any restrictions which are not necessary for the protection of those interests. These aims will be met by creating ■ framework which encourages flexibility and diversity in meeting the client's needs, yet maintains the necessary standards.

Statutory objectives

The Government believes it is of central importance that the objectives which govern the arrangements for the provision of legal services in advocacy and in the conduct of litigation should be simple and clear. Practitioners need that if they are to deliver what is expected of them. The professional bodies and other organizations need that to enforce standards consistently amongst their own members, in relation to other professions providing similar legal services. Above all the client needs to understand the basis of the work and the services for which he is paying.

The Government therefore proposes to include those basic objectives in the legislation. All those who contribute to setting and maintaining standards in the provision of legal services – the professional bodies and other organizations, the Lord Chancellor, and the judiciary – will be required to have regard to those objectives in carrying out their duties.

The objectives are:

- (i) to lay down standards of education and training in the provision of services in advocacy or the conduct of litigation which ensure

that those who offer such services to the public are competent to do so.

- (ii) to maintain the standards of conduct in advocacy and the conduct of litigation which are required in the interests of the proper and efficient administration of justice.
- (iii) to meet those objectives in ways which ensure that there are no obstacles to access to justice. No restrictions should inhibit the client's choice of how he may obtain legal services, should be imposed on those qualified to provide legal services or on what those who are qualified may do, which are not necessary in the interests of justice.

Rights of audience

The Green Papers proposed ■ system of statutory regulation for the purpose of ensuring common standards between the different, self-regulating parts of the profession which exercise similar functions, such as granting rights of audience in the courts. During the consultation process, that proposal was criticized for not reflecting fully the role of the judiciary; for indirectly compromising professional self-regulation; and for not adequately recognizing the diversity of advocacy practice. As a result of the consultation, and in particular the Law Society's acceptance that barristers should have immediate rights to appear in all courts on being called to the Bar by one of the Inns of Court, this system can be considerably simplified.

The Government recognizes, as the Green Paper proposals made plain, that the education and training of those who carry on litigation are of fundamental importance. The proposals for dealing with education and training and for regulating the conduct of those admitted to practice are crucial. The Government therefore proposes to replace the current complex arrangements for rights of audience with a single statutory framework. This would recognize the widely different needs of the practice of advocacy in the various courts and tribunals, and the different working practices of the many kinds of legal practitioners. It would ensure that the interests of all those who have a part to play in the court system – the client, the practitioner, the courts, and the Government – are represented in ■ full and balanced way. In particular, the Government acknowledges the role of the judiciary in encouraging the independence and competence of all advocates who appear before the courts. The system now proposed therefore includes ■ place in the framework for the full-time judiciary which builds on the present arrangements for the Law Society's training regulations. Above all, the framework for granting rights of audience must ensure that the development of legal services is

ordered, and rapid enough to meet clients' changing needs.

The principal features of the proposals are: that barristers who are qualified in terms of the Bar's rules on education and training will have rights of audience before all courts and tribunals; and that the Law Society will continue ■ before to decide which persons are qualified to be solicitors, but it will have power to declare solicitors qualified in terms of regulations for education and training to appear for clients in any specified level of court. A person declared by the Law Society to be qualified for particular courts or tribunals will then have rights of audience.

In both cases the professional body will need to satisfy the Lord Chancellor and the judiciary acting on advice from the proposed Lord Chancellor's Advisory Committee on Legal Education and Conduct that its members can uphold appropriate standards of competence and conduct.

Litigation

The provision for entitlement to do the work which is necessary to start and conduct litigation will be given ■ simplified statutory basis, on the same approach ■ for advocacy work. The Law Society will be entitled by statute to grant its members the right to conduct litigation. Arrangements will be made to enable other professions to do so, to an appropriate degree.

In each case, this will be subject to the professional body or other organization being able to satisfy the Lord Chancellor and the judiciary, in the light of advice from the Advisory Committee, that it can set and maintain appropriate standards of competence and conduct.

Conveyancing

The Government is taking and encouraging a number of steps to improve the quality of practice, and to eliminate abuse, throughout the house-buying market. The specific proposals in the conveyancing Green Paper to enable banks, building societies and other authorized practitioners to offer conveyancing services have been amended to provide, ■ the consultation suggested, greater protection against conflicts of interest, the lack of independent advice, and opportunities for unfair competition by larger institutions. In particular there will be ■ general ban on offering conveyancing services in situations in which conflicts of interest are regular or inescapable. Also, the qualified conveyancer undertaking the transaction should offer the client a personal interview, to be sure no conflict arises, and identify any areas in which independent advice might be desirable. Authorized practitioners will be required to certify that they are not cross-subsidizing conveyancing services from their other activities and to disclose financial benefits from all aspects of the transaction. Making the provision of one service conditional on taking others will be prohibited.

Probate

The Government's original proposals for extending the range of people who can prepare the documents

required to apply for probate will be amended to allow a greater measure of protection for the client. Trust corporations, which can already demonstrate the necessary standards of competence and conduct, will be authorized to do this work by statute. Arrangements will be made for the Lord Chancellor, after consultation with the judiciary, to authorize other groups to do so, if they can demonstrate that they meet appropriate standards.

Advisory Committee

The proposal in the Green Papers for a reconstituted Lord Chancellor's Advisory Committee on Legal Education and Conduct with executive powers ■ criticized. It was argued that the committee would interfere with professional self-regulation because it would represent ■ shift of power to the executive and because it would not be sufficiently independent.

The proposal has been thoroughly revised. There should be ■ reconstituted and vigorous Advisory Committee, but its functions will be purely advisory. Its prime role will be to give advice to all bodies authorized to grant to their members rights of audience, the right to conduct litigation, or the right to prepare probate documents. It will also advise the Lord Chancellor and the judiciary on the arrangements for ensuring appropriate standards of competence and conduct in the provision of legal services. The professional bodies and other organizations, the Lord Chancellor, and the judges will all be required by statute to have regard to advice from the Advisory Committee on the discharge of their statutory functions.

All the Advisory Committee's advice will be public: it will report to Parliament on all aspects of its work annually, and on specific issues as appropriate. The Advisory Committee will be financed from money provided by Parliament, and will be wholly independent, running its own procedure and appointing its own staff, who will be expected to come from a variety of backgrounds.

Professional bodies

The importance of professional self-regulation will be reinforced by leaving it to the professional bodies to prepare the regulations and codes which will set qualification standards and practice requirements for advocacy and the conduct of litigation. The Advisory Committee will advise the professional bodies on the codes. New rules will require the concurrence of the Lord Chancellor.

Under the adversarial system operated in this country, the courts depend on the competence and probity of advocates and litigators. The proposals seek to reflect this, and the concurrence of senior members of the judiciary will be required for new regulations or codes to become effective. Both the Lord Chancellor and the judges will be advised by the Advisory Committee on whether they should approve the new regulations or codes.

Legal education

The Advisory Committee will advise upon the arrangements for legal education. It will give advice

on the standards and selection procedures desirable for schemes to recognize legal practitioners and others ■ specialists in particular areas of the law. It will also comment on the need for such schemes.

The Committee's advice will be directed to ensure that the existence of such schemes does not create unnecessary barriers either to new practitioners, whether lawyers or suitably qualified non-lawyers, entering the area of work concerned, or general practitioners continuing to work in the area.

Complaints

The Government proposes a range of measures to ensure that complaints from members of the public about legal services provided to them can be simply and effectively met. Arrangements will be considered for ■ joint disciplinary body of the Bar and the Law Society, involving members of the judiciary when appropriate, to provide a common mechanism and common standards in dealing with complaints about court work. This might operate both nationally and at ■ local level. The courts' own powers to deal with poor work will be strengthened.

A new office of Legal Services Ombudsman will be created. He will have wide powers to examine the way in which complaints against legal practitioners have been investigated by the professional bodies. He will also have power to investigate such complaints himself where that is appropriate. He will have power to recommend the payment of compensation in most cases.

Competition

Aspects of the work and organization of the legal profession which do not need to be regulated in the interests of justice may, however, need to be scrutinized to ensure that there are ■ unnecessary restrictions on competition. The professional bodies' rules and practices therefore will in general be subject to consideration under the proposed legislation on restrictive trade practices. Under that legislation, however, rules approved by the Lord Chancellor will be exempt from prohibition.

Partnerships

The Government is concerned to ensure that clients have ready access to independent legal advice, and in particular an adequate choice of specialist practitioners, both barristers and solicitors. It believes it is for the professions to decide how they should best organize themselves to meet the needs of their clients. The statutory prohibition on the formation of partnerships between solicitors and other professionals will be removed, and the matter

left to professional rules. The Bar Council and the Law Society will continue to be able to make rules preventing such partnerships if they so wish, to the extent that this is justified by the needs of advocacy or the conduct of litigation.

The Government's proposals for lifting barriers to the formation of partnerships between advocates and litigators in this country and lawyers practising in other jurisdictions have been widely welcomed. Arrangements will also be made to ensure that United Kingdom lawyers have rights to practise in other parts of the kingdom at least equivalent to those available to lawyers from other member states of the European Community.

Fees

During the consultation process it became clear that there was general opposition to the introduction of ■ system of contingency fees which would permit clients to offer their lawyers ■ percentage of any damages if successful. That option has therefore been rejected.

There was, however, little objection in principle or in practice to clients being able to agree with their lawyers conditional fees on the speculative basis already permitted in Scotland, or to permitting a specified moderate percentage uplift on the normal bill which the parties to such agreements could contract to pay. The Government therefore proposes to implement this proposal.

Judicial appointments

The proposal that the qualifications for judicial appointments should be revised to make all suitably qualified lawyers eligible for judicial appointments has been widely welcomed. The general simplification in the arrangements for working as an advocate will permit significantly simplified arrangements to be implemented to achieve this.

The Government proposes that the minimum qualifications for a practitioner for appointment to the Bench should be rights of audience as follows:

Lord of Appeal in Ordinary—general rights of audience in the Supreme Court for 15 years.

Lord Justice of Appeal, High Court Judge, Deputy High Court Judge—general rights of audience in the High Court and Court of Appeal for ten years.

Circuit Judge, Recorder, Assistant Recorder—general rights of audience in the Crown Court or the county courts for ten years.

Master or Registrar of the Supreme Court, County Court Registrar, Stipendiary Magistrate—rights of audience in the Supreme Court or ■ general right of audience in the county court for seven years.

LITERATURE, 1988-89

The past year has been dominated by the controversy over *The Satanic Verses* by Salman Rushdie. Objections to the novel have been so widespread and so violent that the controversy sparked off a major international incident and provoked a strong reaction from those who felt that the right to freedom of speech was under threat.

The Satanic Verses is Rushdie's fourth novel. His second, *Midnight's Children*, won the Booker Prize in 1981, and his third, *Shame*, a savage satire on the recent history of Pakistan, was shortlisted for the same award in 1983. *The Satanic Verses* was widely reviewed and shortlisted for the 1988 Booker Prize; it also won the novel section of the 1988 Whitbread Prize.

The book opens with the explosion of a hijacked jumbo jet over the English Channel. Two figures without parachutes fall from the wreckage, Gibreel Farishta, a legendary Indian film star, and Saladin Chamcha, 'man of a thousand voices'. Both survive—'Out of thin air: a big bang, followed by falling stars. A universal beginning, a miniature echo of the birth of time'. One of the protagonists turns into the Angel Gabriel, the other into the devil, and the story concerns the eternal struggle between good and evil. It is written in Rushdie's flamboyant, sometimes overblown prose, with a proliferation of ideas and images which make the book dense and difficult to read.

The book's title is taken from an apocryphal incident in which the Prophet Mohammed was tricked by Satan into inserting into the Koran two verses which were diabolically, not divinely, inspired. The 'Satanic verses' were later expunged from the Koran, which is regarded by Muslims as the literal word of God, given to the Prophet Mohammed. However, Rushdie's reference to this incident was not the sole cause of the offence given by the novel. The novel portrayed the Prophet throughout as Mahound, which was considered derogatory, and in one section a number of whores each assume the identity of one of the Prophet's wives.

Salman Rushdie, speaking about his novel on Channel 4 television, said, 'Basically, there's two questions that the book seeks to answer. When an idea comes into the world, it's faced with two big tests: when you're weak, do you compromise; when you're strong, are you tolerant?' Rushdie received his answer in far more dramatic terms than he can have envisaged. Reaction against the book began within a few weeks of its publication in September 1988. India banned its importation, threats were made against it in Britain, and Rushdie was forced to cancel a public reading in Cambridge. In January, the book was burned by Muslims in Bradford and threats were made against the staff of W. H. Smith, causing the company to withdraw the book from its branch there. In Pakistan a demonstration led to the deaths of five people when police opened fire on the crowd.

Misunderstood

Rushdie claimed the book had been misunderstood, and that people were protesting against a book he

had not written. 'Islam is one of the greatest ideas that ever came into the world', he said. 'Nothing I can do can destroy Islam, even if it were my desire, which it isn't. I wished to provoke imagination, and increase the sum of what it is possible to think or say. A powerful tribe of clerics has taken over Islam and have turned Mohammed into a perfect being and his life into a perfect life. Obviously I have a view of the world which is not theirs. I insist on my right to have that and to express it as I think fit. It is not in my view an anti-religious book. It is an attempt to write about migration, its stresses and transformations for migrants from the Indian subcontinent to Britain. The saddest irony is that after working for five years to give voice and fictional flesh to the immigrant culture of which I am myself part, I should see the book burned and my life threatened.'

The most serious development came in February 1989. Rushdie had said that he expected that the mullahs wouldn't like it, but can hardly have anticipated the edict issued by Ayatollah Khomeini of Iran on February 14. This stated: 'I inform the proud Muslim people of the world that the author of *The Satanic Verses* book, which is against Islam, the Prophet and the Koran, and all those involved in its publication who were aware of its content, are sentenced to death. I ask all Muslims to execute them wherever they find them. If someone knows them but is unable to kill them, he should hand them over to the people for punishment.' After the threat, Rushdie went into hiding under armed police protection.

Solidarity

Following Ayatollah Khomeini's threat against Rushdie, the British Government announced that it was withdrawing its four envoys from Iran, and Iran was asked to withdraw its diplomats from London. Strong support was given by the other members of the European Community, who agreed to recall their ambassadors to Iran as an expression of solidarity. High-level visits between Europe and Iran were frozen. 'Britain has endeavoured to re-establish normal relations with Iran, but there can be no substance in this relationship while these threats of violence remain', said the Foreign Secretary, Sir Geoffrey Howe. The Spanish Foreign Minister described the threat against Rushdie as 'afront to civilization'.

Although there was a strong reaction to the threat to his life, Government support for Rushdie personally seemed to waver as time went by. Sir Geoffrey Howe said on the B.B.C. World Service, 'there is a huge distance between ourselves and the book ... it is found deeply offensive by people of the Muslim faith. The British Government, the British people, do not have any affection for the book ... [it] is extremely critical, rude about us. It compares Britain with Hitler's Germany. We do not like that any more than the people of the Muslim faith like the attacks on their faith contained in the book. So we are not sponsoring the book. What we are sponsoring is the right of people to speak freely, to publish freely.'

The Home Secretary, Douglas Hurd said, 'There is no doubt that real hurt and insult has been felt by the Muslim community in this country, ■ elsewhere. I sometimes feel that Mr. Rushdie has difficulty in understanding the institutions of the country to which he belongs.'

Apology

In an attempt to defuse the situation, Rushdie offered an apology: 'As author of *The Satanic Verses* I recognize that Muslims in many parts of the world are genuinely distressed by the publication of my novel. I profoundly regret the distress that publication has occasioned to sincere followers of Islam. Living as we do in a world of many faiths, this experience has served to remind ■ that we must all be conscious of the sensibilities of others.'

This failed to placate Iran: the Ayatollah Khomeini responded, 'Even if Salman Rushdie repents and becomes the most pious man of all time it is incumbent on every Muslim to employ everything he's got, his life and wealth, to send him to hell.'

Meanwhile, the book sold in vast quantities, both in Britain and abroad. In order to publish the book without risk to individuals, sixty German publishing houses set up a special imprint, *Artikel 19* (from the Declaration of Human Rights article on freedom of expression). In Britain, Rushdie's publishers, Viking Penguin, faced a dilemma about bringing out a paperback edition, publication of which would be seen as provocative by Muslims. A spokesman commented, 'We deplore the violence associated with the book. We regret the distress the book has caused to people who believe that it is blasphemous. But it is not blasphemous, it is ■ work of fiction by one of the world's leading writers and has been brilliantly reviewed here and in the U.S. There has also been support in the Muslim world. Those in the West, where freedom of expression is ■ cornerstone of democracy, believe that this is an outrageous reaction.' The book trade journal, *The Bookseller*, commented: 'The threat of ■ murder is not an acceptable form of literary criticism.' With the death of Khomeini in June 1989 and the election of ■ new leader in Iran, it seemed that Rushdie's only hope of ever returning to some semblance of normal life would be the resolution of the power struggle in which he had become a pawn.

The Booker

Michael Foot, M.P., chaired the panel of judges for the Booker Prize (worth £15,000) in 1988. Although he strongly favoured *The Satanic Verses*, he was outvoted by his fellow judges, who plumped for Peter Carey's *Oscar and Lucinda*. Carey's previous novel, *Ilywhacker*, was shortlisted in 1985, and he was the second Australian novelist to win the prize (Thomas Keneally won with *Schindler's Ark* in 1982). *Oscar and Lucinda* is the story of Oscar Hopkins, an Oxford seminarian with a passion for gambling, and Lucinda Leplastrier, ■ Sydney heiress whose fascination with glass was aroused by the phenomenon of Prince Rupert's drops—a pear-shaped drop of glass which can withstand the blow of ■ sledgehammer but will shatter if the end is snapped with pliers. The two meet on the luxury liner *Leviathan* on passage to

Australia; the novel tells their love story, and is ■ historical *tour de force*, funny and moving, ending with the creation of a glass church in the Australian outback as a remarkable act of faith—'Our whole faith is ■ wager', Oscar tells Lucinda.

David Lodge's *Nice Work* is ■ comic masterpiece, set in the Midlands, and featuring the concrete university of Rummidge which appeared in *Changing Places* and *Small World* (the latter shortlisted for the Booker in 1984). A modern version of 19th century industrial novels, the story takes place in the world of industry as Vic Wilcox, managing director of an engineering works, is shadowed at work by Robyn Penrose, post-structuralist feminist lecturer in English. Penelope Fitzgerald's *The Beginning of Spring* is the story of two weeks in the life of Frank Reid, ■ Briton born and raised in Moscow, who runs ■ printworks. The novel tells how he copes in pre-revolutionary Russia when his wife goes home to England with their three children. Fitzgerald ■■■ surprise winner with her novel *Offshore* in 1979.

Marina Warner's *The Lost Father* is the story of Anna, who works in ■ London museum cataloguing contemporary ephemera. Family legend has it that her grandfather died ■ the result of a duel, and she creates ■ imaginary memoir of her mother's background and life in southern Italy in the 1920s. Bruce Chatwin, author of *In Patagonia* and *The Songlines*, was ■ finalist with the short but carefully crafted *Utz*. Set in Prague, it tells the story of Kaspar Joachim Utz, ■ part-Jewish Czech collector of Meissen porcelain. Sadly, Chatwin died in January 1989 at the age of 48. *What Am I Doing Here*, a collection of his favourite pieces of journalism was also published this year.

Whitbread

The Whitbread Prize is worth £1,500 to the winner of each of its five categories, with ■ first prize of £20,000 for the work judged to be the best of the five. In the three years since the new format was introduced, the overall prize has been awarded to a volume of poetry, a novel and ■ biography. The 1988 award was won by Paul Sayer for his first novel, *The Comfort of Madness*, so ■ writer of a children's novel can reasonably expect a Whitbread windfall in the next awards!

Sayer, ■ staff nurse in ■ psychiatric hospital, wrote sensitively and with great skill about Peter, ■ catatonic 33-year-old who exists in a twilight world. He is unable to speak and never communicates with his helpers, but is able to comprehend more than is apparent. 'We know you're in there, Peter', his helpers tell him, as he observes them with total detachment. The Whitbread judges praised Sayer's 'black humour, like the young Evelyn Waugh', and his 'scrupulous prose that banishes squeamishness'. The novel also won the 1988 Constable Trophy for Fiction, which is awarded for ■■■ unpublished work of fiction from the north of England.

It was reported that *The Comfort of Madness* was a compromise choice, the judges being split between Rushdie's *The Satanic Verses* (novel) and A. N. Wilson's *Tolstoy* (biography). None the less the book ■■■ a worthy winner and the prize will allow Sayer

to write full-time. The judges said of Rushdie that his work and person are 'surrounded by continuing hostility and unease', and he wrote in 'English prose we never knew could be so elastic'. Winner in the poetry category was Peter Porter's *The Automatic Oracle*, while *Awaiting Development* by Judy Allen was judged the best children's novel.

Other Awards

The W. H. Smith Literary Award, worth £10,000, was awarded to Christopher Hill for his acclaimed biography *A Turbulent, Seditious and Factious People: John Bunyan and His Church*. The second N.C.R. Book Award for non-fiction, worth £25,000, was awarded to Joe Simpson for *Touching the Void*, his remarkable account of a climbing expedition in the Peruvian Andes that nearly ended in tragedy. Simpson and his climbing companion Simon Yates had an accident that left Simpson dangling injured from a rope, with Yates unable to help him. Eventually, Yates decided that his only hope of saving himself was to cut the rope that held Simpson, almost certainly sending him to his death. Yates survived, but miraculously so did Simpson, who crawled back to camp in three days. Yates's decision had saved both their lives. The book also received the Boardman Tasker Award for Mountain Literature. The other N.C.R. shortlisted books, which each received £1,500, were *A Brief History of Time* by Stephen Hawking (which also received the Sunday Times Special Award for Literature), *A Touch of Genius: The Life of T. E. Lawrence* by Malcolm Brown and Julie Cave, and *Tolstoy* by A. N. Wilson.

The second Sunday Express Book of the Year Award was won by David Lodge for *Nice Work*; he received £20,000. Winner of the £8,000 Smarties Grand Prize was *Can't You Sleep Little Bear?* by Martin Waddell, illustrated by Barbara Firth, which also won the category for children's books for under fives; Barbara Firth won the Kate Greenaway medal for her illustrations for the book. *Can It Be True* by Susan Hill, illustrated by Angela Barrett, won the prize in the 6-8 years group, while Therese Whistler's *Rushavenn Time* won the 9-11 group.

The Betty Trask Award of £10,000, for first novels of a romantic or traditional nature by writers under 35, was won by Nigel Watts for *The Life Game*. William Riviere received £5,000 for *Watercolour Sky*, while £2,000 each was awarded to Alasdair McKee for *Uncle Henry's Last Stand* and Paul Houghton for *Harry's Last Wedding*. Cholmondeley Awards for poetry, worth £2,000 were presented to Peter Didsbury, Douglas Dunn and E. J. Scovell, while the Eric Gregory Awards for poets under 30 went to Gerard Woodward (£8,000), David Morley (£6,000), Katrina Porteous (£6,000) and Paul Henry (£4,000). Somerset Maugham Awards, worth £5,000, are intended to enable young British authors to travel abroad. Awards were made to Rupert Christiansen for *Romantic Affinities*, Alan Hollinghurst for *The Swimming Pool Library* and Deirdre Madden for *The Birds of the Innocent Wood*. The £5,000 McVitie's Prize for the Scottish Writer of the Year was shared by Bernard MacLaverty for his volume of short stories, *The Great Profundo*, and Edwin Mickleburgh for

Beyond the Frozen Sea. The Guardian Fiction Prize was awarded to Lucy Ellman for *Just Desserts*.

The five regional winners of the Commonwealth Poetry Prize were Bronwen Wallace (Canada), for *The Stubborn Particulars of Grace*; Kofi Awoonor (Ghana), *Until the Morning After: Collected Poems 1963-1985*; Sujata Bhatt (India), *Bruniziem*; Allen Curnow (New Zealand), *Continuum: New and Later Poems 1972-1988* and John Heath-Stubbs (U.K.), *Collected Poems 1943-87*. The Commonwealth Writers Prize worth £10,000 was awarded to Festus Iyaye (Nigeria), for his novel *Heroes*; the runner-up was George Turner (Australia) for *The Sea and the Summer*.

Prestige

The flood of new literary awards continued unabated, with prizes for most types of book and for writers from practically every geographic location and age range. New prizes were announced for second novels, and for first novels by writers aged over 40, which plugged two of the more obvious gaps. The donation of large sums of money to help writers is widely applauded, but there is also concern that the prizes that carry prestige might be swamped by those that present the largest sums of money. Part of the problem is the erratic, and frequently eccentric, criteria involved in the judging process. The Booker and Whitbread prizes have yet to acquire the kudos carried by the Prix Goncourt in France. The latest recipient of that most prestigious of literary prizes was Erik Orsenna for *L'Exposition Coloniale*, a picaresque novel with a suggestion of *Tristam Shandy*. The prize was worth 50 francs.

The richest prize of all is the Nobel Prize for Literature, worth 2.5 million Kronor (about £230,000). In 1988 it was awarded to the Egyptian writer Naguib Mahfouz, 76-year-old author of some 40 novels, collections of short stories, plays and film scripts. His best-known works include *Children of Gebelawi*, *Respected Sir*, and his semi-autobiographical trilogy about the life of a Cairo family from the first world war to the end of the second, *Bain al-Qasrain*, *Qasr al-Shaqq* and *al-Sukkariyya*. The Swedish Academy said he was 'an author who, "through works rich in nuance—now clear-sightedly realistic, now evocatively ambiguous—has formed an Arabian narrative art that applies to all mankind. His work has meant a powerful upsurge for the novel genre, and for the development of the literary language in Arabic-speaking cultural circles. The range is, however, greater than that. His work speaks to us all.'

Second Edition

The publication of the second edition of the *Oxford English Dictionary* was a remarkable achievement. The first edition, inspired and edited by Sir James Murray, took seventy years from its conception to reach its completion in 1928. The four-volume supplement edited by Dr Robert Burchfield took some 14 years to complete. The second edition combines and updates the previous works, and also incorporates 5,000 new words. It took only five years to produce,

at a cost of over £8 million, but it is estimated that the work took 500 person-years. The twenty volumes, costing £1,500 ■ set, are intended to form ■ complete vocabulary of the English language from A.D. 1150 to the present. The whole work is now stored on a computer, greatly facilitating the production of revised or condensed versions. A Compact edition is scheduled for 1991, a third edition will be produced in the 21st century, and the whole work will be available in a few years on ■ compact disc for about £500.

The dictionary contains some 300,000 entries, with over 500,000 words defined in its 22,000 pages. The longest entry is for 'set', which has 154 main senses, over 430 tenses and sub-tenses, and a total of 60,000 words. The longest word now recorded is the rather ungainly 'pneumonoultramicroscopicsilicovolcanoconiosis', which describes a lung disease found mainly among miners. Prepared by John Simpson and Edward Weiner, the dictionary combines the best in lexicography and computer technology.

Last Greene?

Graham Greene's 24th novel (according to the author 'probably my last') was similar in plot to his first (*The Man Within*) and was influenced by his friendship with the late dictator of Panama, General Omar Torrijos, whom he remembered in his book *Getting to Know the General*. The new novel, *The Captain and the Enemy*, is the tale of Victor Baxter, claimed from school on his 12th birthday by the Captain who 'won him from his father at backgammon, or so he said'. The Captain, an enigmatic figure, has ■ strange and touching relationship with ■ girl called Liza who once had an affair with Baxter's father. The novel's inscription reads, 'Will you be sure to know the good side from the bad, the Captain from the enemy?' (written by George A. Birmingham) but Baxter never understands the relationship between the two until it is too late. The novel reaches its climax in Panama just before the signing of the Canal treaty between President Carter and General Torrijos. The Captain is involved in smuggling arms to the Nicaraguan Sandinistas and dies (like Torrijos) in ■ plane crash. Baxter, ■ failure as a writer and in human relationships, dies in ■ car crash, a curiously flat end to a sad tale.

Graham Greene once said, 'I don't want people looking into my life', and has limited the access of others to his papers. In 1971 he published *A Sort of Life*, a reticent account which appeared to be his final word on the subject of himself. However, Norman Sherry, Mitchell Distinguished Professor of Literature at Trinity University, San Antonio, Texas, and author of *Conrad's Western World*, met Greene in 1973 and was given complete access to all the author's papers, diaries, notebooks and correspondence. *The Life of Graham Greene, Vol 1, 1904-39* is an account of Sherry's travels round the world in the footsteps of the author. At times the narrative reads like a novel, but the book gives an interesting account of Greene's marriage to Vivien Dayrell-Browning, for whom he converted to Catholicism, and of his struggle to become a novelist.

Shaw

Michael Holroyd received a massive advance of £625,000 from Chatto for his biography of George Bernard Shaw. He has been engaged on the project since 1975 (Shaw's first official biographer, Archibald Henderson, laboured for fifty years over the task), and the first of three volumes has now been published. *Bernard Shaw, Volume I: 1856-1898—The Search for Love* is an account of the early years of the renowned playwright and critic, from his childhood with an unloving mother (who eloped with the original of the du Maurier character of Svengali), through to his marriage at the age of 42 and his first stage success with *The Devil's Disciple*. The absence of source notes was a cause of irritation to many critics, but Holroyd has deferred them until after the publication of the third volume to avoid them being 'stupendously out of date'.

Martin Seymour-Smith's biography of *Rudyard Kipling* attracted much hostile comment for his assertion, without any supporting evidence, that Kipling was ■ repressed homosexual. Stephen Gill's *William Wordsworth: A Life* was ■ definitive new biography of an enigmatic figure who from an early age was convinced of his 'High Calling' and lived his life to fit the ideal of a great poet. Robert Calder's *Willie: The Life of W. Somerset Maugham* gave an account of the life of the great storyteller; the biographer was hampered by the refusal of Maugham's literary executors, the Royal Literary Fund, to allow him to quote from the author's letters. The curious and sheltered life of one of the most prolific writers of all time ■ revealed in Mary Cadogan's *Frank Richards: The Chap Behind the Chums*. Frank Richards was one of the 28 pen-names of Charles Hamilton, who regularly produced 80,000 words a week, his most memorable creation being Billy Bunter, the 'Fat Owl of the Remove' at Greyfriars School.

Grand Old Men

Alistair Horne's official biography of Harold Macmillan was published in two volumes. *Macmillan 1894-1956* covered his life until he succeeded Eden as Prime Minister. Although ■ courageous Grenadier Guardsman, Macmillan comes over ■ a curiously dated figure who only acquired real *gravitas* and stature in his declining years. He inherited a vast fortune from the family publishing firm, but as an M.P. he served for 16 years in comparative obscurity until Churchill gave him office. His private life was clouded for many years by his wife's affair with Lord Boothby. *Volume II, 1957-86* quotes from Macmillan's diaries to show that the initial enjoyment he experienced on becoming Prime Minister soon wore off, leaving him tired and depressed with the job. He stayed too long in office and then regretted resigning. However, after belatedly accepting an earldom in 1984, he revelled in his new-found status as grand old ■■■■ of the Conservative Party, making widely-reported speeches in the House of Lords. Horne's life of Macmillan has made judicious use of his extensive private papers.

The Whitelaw Memoirs are untainted by scandal or revelation of any kind; Viscount Whitelaw has

always been renowned for his loyalty, especially to Margaret Thatcher, whom he served ■■■ distinguished second in command until his premature retirement through ill health. His avuncular image comes across in his memoirs, as does the impression that there is always more to Whitelaw than meets the eye. Roy Jenkins's *European Diary 1977-1981* covers the period of his presidency of the European Community; ■ cultured man, he is not above telling a story against himself at times.

Anthony Lambton's *The Mountbattens* sought to fill some of the gaps in Philip Ziegler's official life of Earl Mountbatten of Burma. The first volume examines Mountbatten's antecedents, suggesting that the facts of his birth do not support the image of a royal past that he created for himself. Peter Hennessy's *Whitehall* is a thorough examination of the civil service, containing in its 580 pages ■ great amount of information and anecdotes, while also suggesting how the organization could be improved. In *On My Way to the Club*, writer and broadcaster Ludovic Kennedy gives ■ readable account of his life, with the frequently funny stories of his early years being balanced by his later campaigns against miscarriages of justice.

Journey's End

William Golding's maritime trilogy began with the Booker-winning *Rites of Passage*. It continued (when the author realized that his characters were still *en voyage*) with *Close Quarters*, and has now been completed with *Fire Down Below*. In the final part, the crippled ship of the line suffers with ■ loose foremast; its repair involves the insertion of red-hot irons, which eventually set the core of the timber alight. Fire is a powerful image throughout the book; ■ one of the passengers, Aloysius Prettiman ('the Tom Paine of the Southern Ocean') says, 'Imagine our caravan, we, a fire down here below—spark of the Absolute—matching the fire up there—out there!' The narrator, Talbot, grows in stature throughout the voyage from the somewhat pompous, unperceptive character who was first encountered in *Rites of Passage*.

The story is a masterpiece of narrative sustained over 900 pages through the three volumes, and rich in image and allegory. Golding is always wary of too much being read into his work. Talbot is told at the end of the voyage, 'The voyage has been a considerable part of your whole life, sir. Do not refine upon its nature. As I told you, it was not an *Odyssey*. It is no type, emblem, metaphor of the human condition. It is, or rather it *was*, what it was. A series of events.' It is part of Golding's genius that such ■ series of events can convey so much about the human condition.

Bunn Revisited

In his latest novel, *Difficulties with Girls*, Kingsley Amis returned to two of the characters from his fourth book, *Take A Girl Like You*. The earlier novel examined the sexual mores of the 1960s through the experiences of the innocent Jenny Bunn and her relationship with the rakish schoolmaster Patrick Standish. In the latest novel the pair have married

and moved to London. Patrick now works for ■ publisher and Jenny, having suffered one miscarriage, works ■ a part-time teacher in ■ children's hospital. Set in the late 1960s, just before the Homosexual Reform Act, Amis follows Patrick's constant philandering, to the distress of the long-suffering Jenny, while also relating the problems of the other occupants of the block of flats in which the Standishes live. A homosexual couple bicker constantly, while a newcomer to the block, Tim Valentine, attempts to resolve his own particular problem with the opposite sex by accepting, with comic and unfortunate results, ■ psychiatrist's suggestion that he is ■ homosexual. Less sharp and satiric than Amis's last novel, the 1986 Booker Winner *The Old Devils*, *Difficulties with Girls* is concerned with human relationships at ■ time of sexual revolution. Also published in the past year was John McDermott's critical account of Amis's work, *Kingsley Amis: An English Moralist*.

Peter Ackroyd's novels concern the linking of past and present events across time, ■ theme to which he returns in his latest novel *First Light*. After ■ forest fire, an ancient tumulus is discovered at Pilgrim Valley, near Holblack Moor in Dorset. As archaeologist Mark Clare excavates the tumulus, in which he believes an ancient astronomer is buried, astronomer Damian Fall studies the heavens at ■ nearby observatory. Central to the book is the landscape of Dorset, over which hangs the influence of Thomas Hardy. Although some of Ackroyd's characters appear to be mere ciphers in the grand scheme of the novel, he sustains the narrative interest as the mysteries of heaven and earth are explored and finally conjoined.

Old Iron

In *Any Old Iron*, Anthony Burgess records the bloody history of the 20th century through Arthur's mythical sword Excalibur. The question is whether it still has power today or is just a piece of old iron. His 50th book, and 30th novel, shows Burgess as erudite and interesting ■ ever.

In *My Chocolate Redeemer*, Christopher Hope has written ■ bizarre fable, his plot influenced by recent Ugandan and Haitian dictatorships. His story concerns Monsieur Brown, 'Beast of Zanzibar', the recently deposed dictator of an African country 'not more than a thousand miles from Uganda'. The story is narrated by 15-year-old Bella, who has ■ passion for chocolate; Brown's tribespeople, the Wouff, believe that chocolate is made from the blood of their ancestors. As Brown and his entourage settle in the French town of La Fritette, Hope evokes the townspeople's fear of the foreigners in their midst.

Past Lives

Kazuo Ishiguro goes from strength to strength; his second novel, *An Artist of the Floating World*, won the Whitbread Prize, and his third, *The Remains of the Day*, has been widely praised. Critics still talk of the Japanese influence on his writing but his latest book takes peculiarly English themes, which he writes about with perception and skill. The story is narrated by Stevens, on holiday in the west country in 1956. He reflects on his years of service to Lord

Darlington but gradually comes to realize that his master is flawed. To be a great butler, it is necessary to work for a great man, a benefactor of mankind. Stevens comes to see that through his loyalty to the anti-Semitic Darlington he has been diminished, and has also lost his only chance of finding love.

In spite of *glasnost* and *perestroika*, John le Carré's world of espionage 'has not altered by a brush stroke'. His latest novel, *The Russia House* is named after a branch of the British intelligence service. It covers familiar territory, with a plot about the secret service acquiring an important manuscript which has been smuggled out of Russia to the West. Le Carré is once again master of the form which he has developed over the years; the novel's epigraph is 'Today one must think like a hero to behave like a merely decent human being'.

Julian Barnes' *A History of the World in 104 Chapters* covers events from Noah's Ark to nuclear apocalypse in a thought-provoking and comic study of history and myth through the ages. However, history to Barnes is not governed by 'power, money, history and death' but by love. 'I can tell you why to love. Because the history of the world, which only stops at the half-house of love to bulldoze it into rubble, is ridiculous without it. The history of the world becomes brutally self-important without love.'

Red Wheel

Alexander Solzhenitsyn, still in exile in Vermont, U.S.A., has been working on his 'main artistic design', an eight-volume history of the Russian Revolution called *The Red Wheel*. Each volume concerns a major historical event and the first volume is a revised edition of *August 1914*, first published in the West in 1971. A new translation by H. T. Willetts, personally approved by Solzhenitsyn, replaces the earlier version. The author has taken advantage of the extensive archives of Soviet history in the West to update and expand the novel from its original 600 pages to over 800 pages. The new sections deal mainly with

Peter Stolypin (Prime Minister of Russia from 1906 to 1911) and his murder, and with Tsar Nicholas II.

Other books of note published during the year included: *Collected Poems* by Philip Larkin, edited by Anthony Thwaite; *Collected Poems 1928-1985* by Stephen Spender; *The Letters of T. S. Eliot, Volume One, 1898-1922*, edited by Valerie Eliot; *The Oxford Book of Irish Short Stories*, edited by William Trevor; *In Sickness and In Health: The British Experience 1650-1850* by Roy Porter and Dorothy Porter; *The Grown-ups* by Victoria Glendinning; *Punishments* by Francis King; *A Theft* by Saul Bellow; *Passing On* by Penelope Lively; *The Burning Boys* by John Fuller; *Breathing Lessons* by Anne Tyler; *A Little Stranger* by Candia McWilliam; *Sugar and Rum* by Barry Unsworth; *Have the Men Had Enough?* by Margaret Forster; *The Facts: A Novelist's Autobiography* by Philip Roth; *The Gift of Stones* by Jim Crace; *The Skeleton in the Cupboard* by Alice Thomas Ellis; *The Lyre of Orpheus* by Robertson Davies; *The Edge* by Dick Francis; *The Girl at the Lion d'Or* by Sebastian Faulks; *Dictionary of the Khazars*; *Lewis Percy* by Anita Brookner.

Public Lending Right

The total sum available under the Public Lending Right Scheme was increased to £3.5 million in 1988. Of this £3.1 million was distributed to writers. The rate per loan was increased from 1.12 pence to 1.45 pence, and the maximum amount payable to any author was raised for the first time, from £5,000 to £6,000. There were 16,034 authors registered under the scheme; 67 received the maximum payment, 22 received between £5,000 and £6,000, 163 between £2,500 and £4,999, 411 between £1,000 and £2,499, 591 between £500 and £999, 3,103 between £100 and £499, and 8,854 between £1 and £99. Some 2,823 writers who were registered received no payment, and a total of £344,000 was redistributed — a surplus from writers who had exceeded the maximum limit. The Government has announced that £4.25 million will be available for the scheme in 1991-92.

DRAMA 1988-89

The National Theatre celebrated its 25th anniversary in October 1988. To mark the occasion, it was granted the right to use, at its discretion, the prefix 'Royal'; the theatre, however, has no immediate plans to change its name to the Royal National Theatre. Richard Eyre took over as director from Sir Peter Hall, who bowed out after a 15-year tenure which saw the National Theatre firmly established in its South Bank complex. Eyre was quoted as saying, 'I would like the stage to be the epicentre, as it were, of the organization; for the work to be accessible, popular (not "populist") and theatrical—in the sense of exploiting the characteristics peculiar to the medium. None of this is possible without subsidy, whatever the modish claims made for the feasibility of private sponsorship in taking its place. We function in the market-place and a constant pressure upon us—rightly—is the need to find 14,937 paying customers a week.'

One of the most significant National Theatre productions under the new regime of Richard Eyre was the company's joint production with the Bristol Old Vic, at the Theatre Royal, Bristol, of Molière's *The Misanthrope*. Eyre had promised that the company would tour the regions for 16 weeks a year and the Bristol production was the fulfilment of his promise to put the 'national' back into National Theatre. *The Misanthrope* was one of the company's great triumphs when performed in 1973 at the Old Vic in Tony Harrison's translation into rhyming couplets. A slightly amended version of Harrison's script was used in Paul Unwin's production. After Bristol, the play visited Bradford, Wolverhampton, Hull, Nottingham, Norwich and Brighton before entering the repertory at the Lyttelton in May. A strong cast was led by Edward Petherbridge (Alceste), whose subtle approach was compared favourably to Alec McCowen's more histrionic reading in the 1973 production.

South Bank Hamlet

In March, Richard Eyre produced *Hamlet* on the Olivier stage, the first National production of the play since Albert Finney took the role in 1976. Daniel Day-Lewis did not have quite the dramatic impact in the title role of Jonathan Pryce in Eyre's 1980 Royal Court production, but his energetic rather than intellectual approach was still impressive. John Gunter's Elsinore set, dominated by a statue of the dead king, was noteworthy, and the performances of Michael Bryant as Polonius, Judi Dench as Gertrude and Stella Gonet as Ophelia were praised.

A new play written and directed by Harold Pinter, *Mountain Language* was produced in the Lyttelton. It lasted for only twenty minutes but conveyed a powerful message about prison brutality, apparently inspired by the plight of the Kurdish population in Turkey. The cast featured Michael Gambon, Tony Haygarth and Eileen Atkins. Alan Bennett's *Single Spies* was a double bill featuring Simon Callow and Guy Burgess in *An Englishman Abroad* and Bennett himself as Anthony Blunt in *A Question of Attribution*. After opening at the Lyttelton in December

1988, the plays transferred to the Queens Theatre, Shaftesbury Avenue, for a successful West End run.

In the Cottesloe Lope de Vega's *Fuente Ovejuna*, in a new version by Adrian Mitchell, was directed by Declan Donnellan of the Cheek by Jowl company. Written in 1612, the play takes its name from a Spanish village and tells the story of the villagers' fight against the oppressive rule of a military governor, played by James Laurenson. Another neglected play revived at the Cottesloe was Harley Granville Barker's 1905 play about money and morals, *The Voysey Inheritance*. This was the first London production of the play for over twenty years. Directed by Richard Eyre and featuring Michael Bryant, David Burke and Jeremy Northam, it proved to be a well-constructed drama with much contemporary relevance. The same play was also revived at the Manchester Royal Exchange, directed by Gregory Hershov.

Plantagenets

The Royal Shakespeare Company's 1988 autumn season opened with Adrian Noble's production of *The Plantagenets*. This was an adaptation by Charles Wood of Shakespeare's *Henry VI Parts 1, 2 and 3* and *Richard III*. These were conflated to form three plays: *Henry VI*, *The Rise of Edward IV* and *Richard III, His Death*. Grouped together, *The Plantagenets* charts 'the changing values of a civilization — three boys grow up to assume the power of kingship in very different—but equally destructive—ways'. Anton Lesser gave a fine performance as Richard III, though that play sat unhappily with the more expansive *Henry* plays when they were shown together. The plays could be seen on separate evenings or as a nine-hour Saturday trilogy. Timberlake Wertenbaker's *The Love of the Nightingale* received its world premiere in November 1988 at The Other Place. It was announced that this stage would close in January. The company said that a new, improved theatre would open on the site in 1990 or 1991. The Other Place reopened briefly in August when Trevor Nunn made a welcome return to the company to produce *Othello*. The production, which featured the opera singer Willard White in the title role, was highly praised.

Productions on The Swan stage included Edward Bond's *Restoration*, with Simon Russell Beale attracting much praise as Lord Are in a black comedy based on 17th century Restoration drama. The play was the first transfer to the Barbican in the spring season.

With the start of the new season in Stratford and London in spring 1989, the company introduced a restructuring of its schedules. In future, plays which open at Stratford in the autumn will transfer to the Barbican in March, after a short season at Newcastle. Spring productions in Stratford will play there until August and then tour for two months before moving to London. The company was also reorganized into spring and autumn troupes of actors. In April, the company announced that poor box office returns had left it with a deficit of £1 million. Stratford, where 90 per cent of seats had been sold in 1987, achieved

only 80 per cent occupancy in 1988; the Barbican achieved only 76 per cent. There was ■ noticeable drop in foreign visitors but the surfeit of Shakespeare productions in other theatres cannot have helped.

The spring season at Stratford opened with John Caird's very funny punk production of *A Midsummer Night's Dream*. It was followed by *Hamlet*, directed by Ron Daniels, with Mark Rylance as the prince, and *Cymbeline*, directed by Bill Alexander, in its first Stratford main-house production since 1979. In *The Swan*, Terry Hands' *Romeo and Juliet* marked his first production in the new theatre. Featuring Mark Rylance and Georgia Sloe, it differed markedly in style from Hands' last production of the play on the main stage in the 1970s. Barry Kyle returned to *The Swan* to direct *Doctor Faustus*, and Danny Boyle made his directorial debut at Stratford with Ben Jonson's *The Silent Woman*, or *Epicoene*.

The Rose

The announcement that the remains of an Elizabethan theatre, the Rose, had been discovered in Southwark, London, caused great excitement. Excavation had been permitted on the site before building work began on an office development. The excavation work was carried out by archaeologists from the Museum of London at the expense of the developers, Imry Merchant. Little is known about the design and size of Elizabethan stages and when significant information emerged about the Rose stage and the shape of the building, there was concern at the prospect of the site disappearing beneath an office block.

The Rose theatre was built in about 1587 and was managed by Philip Henslowe. During its comparatively brief existence, Shakespeare's *Titus Andronicus* and *Henry VI* were performed there and Christopher Marlowe's *Tamburlaine the Great*, *Doctor Faustus* and *The Jew of Malta* received their first performances at the theatre. It is believed that Shakespeare may have acted at the Rose. Martin Clout, an expert in Elizabethan theatre, said, 'The importance of the Rose is that it is one of the most extensively documented theatres of the period. This excavation will have profound consequences on our understanding of Elizabethan theatre.'

Actors and Members of Parliament began ■ campaign to save the theatre. One suggestion is that the proposed office block should be built on stilts over the site, allowing access to the remains. However, despite ■ plethora of proposals and negotiations, the future of the site has not yet been decided.

Ironically, Sam Wanamaker's long-cherished dream to recreate the Globe theatre on a nearby site in Southwark came closer to reality in June when he signed the contract to begin building the International Shakespeare Globe Centre. The new Globe, 200 yards from the site of the original, will include ■ 'wooden O' Elizabethan-style theatre, and a second stage.

Lilian Baylis

An addition to London's theatres was the 200-seat Lilian Baylis Theatre built onto Sadler's Wells

Theatre. Its first production was John Guare's award-winning play *The House of Blue Leaves*. Controversy surrounded the second production, a revival of Jean Giraudoux's *The Madwoman of Chaillot*. The cast fell out with Sharon Gans, the director chosen by the sponsor, Robert M. Klein of Boston, who then withdrew. Nick Hamm took over as director but the play, which featured Eleanor Bron, was not a critical success.

There was also encouraging news about the Lyceum Theatre, the future of which had been in doubt for some time. The new owners, the Brent Walker group, announced that they would restore it for use ■■■ theatre once again.

Lost Chords

The beginning of 1989 was a bad time for musicals. A number of established shows ended their London run and several newcomers gave up the struggle to stay in business: six musicals closed in London in January. David Merrick's *42nd Street* ended its run at Drury Lane after nearly four and ■ half years, while *South Pacific* closed after ■ year at the Prince of Wales. *Follies* closed at the Shaftesbury after 18 months, ■ the producer was reportedly unable to recast the show to the ■■■ standard as the original. *Sugar Babies* starred American veterans Mickey Rooney and Ann Miller. The show ran for eight years on Broadway but the nostalgic tribute to vaudeville survived only four months at the Savoy Theatre.

Another casualty was *Budgie*, an undistinguished musical in which singer and actor Adam Faith recreated his television character, the Cockney villain Budgie. Even the presence in the cast of Anita Dobson, who achieved fame in the BBC television soap opera *EastEnders*, did not prove ■ big enough draw to avoid an early closure: the show was reputed to have lost nearly £1.4 million. Cole Porter's *Can-Can* at the Strand was neither a critical nor a popular success and closed after three months. In April *Chess* ended its three-year run at the Prince Edward.

Positive Aspects

Andrew Lloyd Webber showed that his magic touch had not deserted him when his new show, *Aspects of Love*, opened at the Prince of Wales in April. The musical is based on ■ novel by David Garnett. It should have marked the musical debut of former 'Saint' and James Bond actor Roger Moore, who was cast in the role of George Dillingham. Moore, who said he was 'frightened to death' at the prospect of leading the cast in a stage musical, was reported to have ■ fine singing voice. However, some weeks before the opening he withdrew, lacking the confidence to carry off the role, and his understudy Kevin Colson, stepped in. Critical reaction was largely favourable but immaterial to the show's success: advance bookings exceeded £2.5 million and it was fully booked nearly ■ year ahead by the time it opened. Meanwhile, Lloyd Webber's *Cats* reached its 3,358th performance in May, making it London's longest-running musical.

Elementary

After *Budgie* at the Cambridge came *Sherlock Holmes: The Musical*, with Ron Moody playing the detective. It was an odd conception that seemed to be aimed at the tourist market, and the cast appeared unsure whether to take it seriously—perhaps not surprising in a show that featured a wholly irrelevant Cockney knees-up by the Baker Street Irregulars. Holmes was also the subject of the more cerebral, but plotless play *The Secret of Sherlock Holmes*, in which Jeremy Brett and Edward Hardwicke repeated their familiar television characterizations.

A curious choice for a musical was *Metropolis*, inspired by Fritz Lang's 1926 film of the same name. The original propounded a simplistic message about the human spirit overcoming soul-destroying machines: sixty years later the message had gained little in profundity, and music and lyrics were unmemoable. It seemed unlikely that *Metropolis* would recoup its £3 million budget. The one redeeming feature was Ralph Koltai's spectacular design. The show was directed by Jerome Savary.

About Farce

Brian Rix returned to the stage after an absence of eleven years in John Chapman's *Dry Rot*. Rix had been in the cast of the farce when it had a successful run in the 1950s. He was persuaded to return with the promise that part of the profits of the show would be given to Mencap, the charity for which he had been working since giving up the stage. Brian Rix proved to have aged better than the play, which was considered very dated.

Alan Ayckbourn's new play, *Henceforward*, starred Ian McKellen as a hi-tech composer, divorced from his wife and attempting to regain custody of his daughter. Set in the near future, the play presents a picture of an inner city under siege by warring gangs. The American comedian Jackie Mason brought his one-man show—the longest-running and most successful in Broadway history—to London in February: *The World According to Me* ran at the Playhouse Theatre. Another Broadway import was *Forbidden Broadway: The West End Edition*. Gerard Alessandrini's take-off of stage shows has run for years on Broadway, satirizing the likes of *Les Misérables* and *Phantom of the Opera*. The London version had some entertaining and clever pastiches, but seemed unlikely to match the success of its transatlantic counterpart.

Also notable was *The Sneeze*, which featured Rowan Atkinson in hilarious form in eight Chekhov pieces. These were written in Chekhov's youth and were adapted to good effect by Michael Frayn. Mike Leigh, master of the improvised production, returned to the stage after an absence of some eight years with *Smelling a Rat* at the Hampstead Theatre.

Shakespeare

Shakespeare was much to the fore in the commercial theatre during the year. The R.S.C.'s *Plantagenets* was rivalled by *The Wars of the Roses* cycle presented by the English Shakespeare Company. This comprised *Richard II*, *Henry IV Part 1*, *Henry*

IV Part 2, the conflation of the three parts of *Henry VI* to make two plays, *Henry VI House of Lancaster* and *Henry VI House of York*, and *Richard III*. The cycle was performed on tour and in London at the Old Vic. Following *The Wars of the Roses* into the Old Vic was *King Lear*, which opened Jonathan Miller's second Old Vic season. Eric Porter played Lear, a part he had previously undertaken at Stratford. At the Phoenix, the Renaissance Company's visit with three Shakespeare plays was followed in autumn 1988 by a season starring Derek Jacobi, first as *Richard II* and then as *Richard III*. In the summer the Phoenix again housed a Shakespeare production when Dustin Hoffman made his London debut as Shylock in Peter Hall's production of *The Merchant of Venice*. The play sold out on the strength of its American star, taking £1.5 million in advance bookings.

Alec Guinness appeared with Edward Herrmann in Lee Blessing's *A Walk in the Woods* at the Comedy Theatre. This pre-glasnost drama dealt with the relationship of an American and a Soviet diplomat involved in disarmament talks in Geneva. John Osborne's *Look Back in Anger* was revived with Kenneth Branagh as Jimmy and Emma Thompson as Alison. Veteran actor Edward Jewesbury, who had appeared in the original 1956 Royal Court production, recreated his role as Alison's father. After a week's run in Belfast, the play was given a charity performance in London and filmed for television. Originally there was no intention of bringing the play into a West End theatre but due to public demand it received a four-week run in London.

The Royal Court had to close its Theatre Upstairs because of financial difficulties, mainly due to a reduced grant from the Arts Council. The main stage featured several notable productions, including Timberlake Wertenbaker's *Our Country's Good*. The play is based on Thomas Keneally's novel *The Playmaker* about the Australian convicts performing in the first play put on in the colony, Farquhar's *The Recruiting Officer*, in 1789. The Wertenbaker play was performed in repertory with Max Stafford-Clark's production of Farquhar's play. Also at the Royal Court was *Iranian Nights*, a play about the death threat made to the author Salman Rushdie because of his novel *The Satanic Verses*. The play, written by Howard Brenton and Tariq Ali, was felt to be bold but hastily conceived, addressing the complex issues simplistically.

Awards

In the Society of West End Theatre Awards, now known as the Laurence Olivier Awards, the commercial theatre, represented by the Old Vic, won more awards than the subsidised theatre for the first time. The awards themselves took the form of a bronze statuette of Olivier as Henry V, sculpted by Henry Franchetti. The main awards were: Best West End play, *Our Country's Good* by Timberlake Wertenbaker; best comedy, *Shirley Valentine* by Willy Russell; best musical, *Candide* (Old Vic); best actor in new play/comedy, David Haig (*Our Country's Good*); best actress, new play/comedy, Pauline Collins (*Shirley Valentine*); best actor, revival, Brian Cox (*Titus Andronicus*); best actress, revival, Harriet Walter (three R.S.C. plays); best comedy performance,

Alex Jennings (*Too Clever by Half*); best director, Deborah Warner (*Titus Andronicus*); best designer, Richard Hudson (Old Vic season). Sir Alec Guinness was presented with a special award for outstanding achievement. In the *Plays & Players* London Critics Awards, David Hare's *The Secret Rapture* was judged best play, Alex Jennings best actor, and Pauline Collins best actress. Howard Davies won the award for best director for *The Shaughraun*, for which William Dudley was voted best designer.

PRODUCTIONS

London productions between September 1, 1988, and August 31, 1989, included the following:

ALDWYCHE: WC2. (1988) Sept. 27. *The Sneeze* by Anton Chekhov (adapted by Michael Frayn), with Rowan Atkinson, Timothy West and Cheryl Campbell, directed by Ronald Eyre, designed by Mark Thompson. (1989) April 25. *The Black Prince* by Iris Murdoch, with Ian McDiarmid, Simon Williams, Sarah Badel and John Fortune, dir. by Stuart Burge, des. by Utz.

APOLLO: Shaftesbury Avenue, W1. (1988) Dec. 6. *Mrs Klein* by Nicholas Wright, with Francesca Annis, Gillian Barge and Zoë Wanamaker, dir. by Peter Gill, des. by John Gunter (National Theatre prodn.). (1989) June 14. *A Madhouse in Goa* by Martin Sherman (transfer from Lyric Hammersmith).

BARCIN: EC2. (1988) Sept. 6. Shakespeare's *The Taming of the Shrew*, with Brian Cox, Fiona Shaw, Alex Jennings, Barrie Rutter, Felicity Dean and Derek Hutchinson, dir. by Jonathan Miller, des. by Stefanos Lazaridis. Oct. 10. Shakespeare's *Measure for Measure*, with Josette Simon, Roger Allam, Phil Daniels, Mark Dignam, Alex Jennings and John Shrapnel, dir. by Nicholas Hytner, des. by Mark Thompson. Nov. 30. *The Churchill Play* by Howard Brenton, with Colin Welland, James Ellis, Sean Baker and Phil Daniels, dir. by Barry Kyle, des. by Kit Surrey. (1989) April 1. *The Plantagenets (Henry VI, Edward IV and Richard III)*, adapted from Shakespeare by Charles Wood, with Anton Lesser, Joanne Pearce, Ralph Fiennes, David Waller, Oliver Cotton, David Calder, David Lyon, Edward Peel and Penny Downie, dir. by Adrian Noble, des. by Bob Crowley. May 25. Shakespeare's *The Tempest*, with Melanie Thaw, Duncan Bell, John Kane, Desmond Barrit and John Wood, dir. by Nicholas Hytner, des. by David Fielding. May 4. Shakespeare's *Macbeth*, with Miles Anderson, Amanda Root, Duncan Bell, Colin McCormack and Tony Armatrading, dir. by Adrian Noble, des. by Bob Crowley. July 20. *The Man Who Came to Dinner* by George Kaufman and Moss Hart, with John Wood, Maureen Beattie, Desmond Barrit, Estelle Kohler, Ralph Fiennes and Barrie Ingham, dir. by Gene Saks.

BARCIN PIT: (1988) Sept. 5. *The Bite of the Night* by Howard Barker, with Nigel Terry, John Carlisle, Mark Dignam, Clive Russell, David O'Hara, Darlene Johnson and Diane Fletcher, dir. by Danny Boyle. Oct. 12. *Divine Gossip* by Stephen Lowe, with Sean Baker, Stella Gonet, Pippa Guard, Linus Roache and Nicholas Farrell, dir. by Barry Kyle. Nov. 29. *A Question of Geography* by John Berger and Nella Bielski, Harriet Walter, Clive Russell, with Linus Roache and Susan Colverd, dir. by John Caird, des. by Sue Blane. Dec. 20. *Electra* by Sophocles (translated by Kenneth McLeish), with Fiona Shaw, Natasha Parry, Susan Colverd, Piers Ibbotson and Sylvester Morand, dir. by Deborah Warner, des. by Hildegard Bechtler. (1989) March 29. *Restoration* by Edward Bond, with Simon Russell Beale, Duncan Bell, Pip

Hinton and Vivienne Rochester, dir. by Roger Michell. April 13. *The Man of Mode* by George Etherege, with Simon Russell Beale, Miles Anderson, Amanda Root, Katy Behan and Marie Mullen, dir. by Garry Hynes, des. by Di Seymour. May 2. (1989) May 11. *The Voysey Inheritance* by Granville Barker, with Robert Glenister, Harriet Bagnall, James Maxwell and Helen Atkinson Wood, dir. by Gregory Hershov, des. by Michael Holt.

OPERA, 1988-89

The 1988-89 season saw the tenth anniversary of Opera North. The Leeds-based Company was founded in 1978 as the northern offshoot of English National Opera, becoming totally independent after a few seasons. Leeds was one of the main venues in English National Opera's tours during the 1970s and it was hoped that establishing a permanent base in the region would create an artistically stronger and more consistent level of performance than was possible for a touring company. This hope was encouraged by the success of Welsh National Opera and Scottish Opera in establishing companies and building up audiences in their regions. Opera North has fulfilled these expectations and audiences for the company's performances in 1987-88 were running at nearly 90 per cent of theatre capacity.

Over its first ten years, Opera North has built up a repertory of seventy operas. Of these, 44 operas were productions originated by Opera North. In its early seasons its other productions were borrowed from English National Opera. Since it became independent of its parent company, Opera North has borrowed productions or co-produced operas with a number of other companies, notably Welsh National Opera and Scottish Opera. There have been a few occasions when the company's limited artistic control over borrowed productions has put poor work in front of its audiences. Generally, however, the risk involved in borrowing has paid off, enabling Opera North to present a broader repertory than would otherwise have been possible.

Opera North's reliance on borrowed productions was largely dictated by the financial restrictions it has faced since its inception. This coincided with the onset of an economic recession which has restricted public funding generally, and has led the other British companies increasingly to use co-production and borrowing as a way of making their funds stretch further. Despite the Arts Council's commitment to arts provision in the regions, Opera North's grant is less than that of Scottish Opera or Welsh National Opera, and the company's future growth will be very dependent upon sponsorship.

Company Folds

The vulnerability of companies dependent on box-office takings and private funding was demonstrated by the winding-up of New Sadler's Wells Opera company at the beginning of 1989. The company was founded in 1982 to give occasional productions of light opera performed for short seasons by artists attached to the major opera companies. Commercial sponsorship of £400,000 over four years helped to launch the company, which had considerable success in its six years of life with operas such as *The Count of Luxembourg*, *H.M.S. Pinafore*, *The Merry Widow* and *Ruddigore*. However, the productions of *The Gondoliers* and *La Belle Hélène* in autumn 1988 were not well received: despite good advance bookings, box-office receipts were very poor with only 38 per cent of seats filled during the season. The company went into liquidation in February 1989 with debts of over £500,000.

New Ventures

Despite financial stringency, most companies are committed to offering a broad repertoire and the Royal Opera House and English National Opera in particular have a history of premiering new operas or operas new to this country. During the past season both companies have developed projects bringing together composers, writers, performers and production staff as a first step towards creating new works.

The first project to reach fruition, known as the Garden Venture, was established by the Royal Opera at the instigation of staff and artists of the company. Its purpose is to promote the writing of new opera by commissioning small-scale works and organizing related seminars and workshop activities. In April 1988 a workshop weekend took place which provided composers, singers, musicians and production staff with the opportunity to collaborate on a number of experimental pieces and to consider the nature of music theatre. As a result of the weekend, seven chamber operas were commissioned by the Royal Opera House.

Independent Means

Funding for the commissions was largely provided by the Arts Council, but the money to stage the new works had to be found elsewhere without diverting funds from other commitments. This led in autumn 1988 to an innovative fund-raising scheme involving the *Independent* newspaper, which invited its readers to sponsor the Garden Venture's first season of chamber operas by donating £100 each towards the £100,000 needed to complete commission fees and to pay for performances of the works. The scheme was successful and the new works were premiered at the Donmar Warehouse, London, on May 17 and 18, 1989, as part of the London International Opera Festival.

The works were *The Uranium Miners' Radio Orchestra plays Scenes from Salomé's Revenge* by Andrew Poppy (libretto, the composer), *Survival Song* by Priti Paintal (libretto, Richard Fawkes), *The Standard Bearer* by Michael Christie (libretto, John McMurray), *Soap Opera* by Kenneth Chalmers (libretto, Felicity Hayes-McCoy), *Last Tango on the North Circular* by Peter Wiegold (libretto, the composer), *Caedmon* by Edward Lambert (libretto, from Christopher Fry's *One Thing More*), and *The Menaced Assassin* by Jeremy Peyton Jones (libretto, the composer and Claire MacDonald).

The Garden Venture was also involved in summer 1989 in working with student composers at the Dartington Summer School, and it plans further workshops and seminars to encourage collaboration on new works.

Opera Studio

English National Opera's plans for a Contemporary Opera Studio also concentrate on creating opportunities and providing resources to stimulate operatic composition. In March 1988 the company formulated the aims of the project: to bring composers and writers together to practise operatic writing; to draw them into the day-to-day workings of the company;

and to create a flexible schedule for the writing of new work, with time allowed for revising ideas and rewriting. A weekend forum at Dartington College in January 1988 was attended by sixty composers and writers, as well as singers, musicians, producers, arts administrators and E.N.O. staff. Discussions and performances at the forum helped to crystallize ideas about the structure of the Contemporary Opera Studio.

E.N.O.'s blueprint is for ■ Studio which will not initially be a building but a resource for composers and writers. It will work in two ways. At one level the Studio will provide opportunities for experimental and improvisational work, enabling composers and writers to try out ideas and different techniques without the pressure of final performance. Second, English National Opera will commission each year three or four teams consisting of composer, writer, producer and designer to write new opera within a flexible time-scale allowing time for rethinking and rewriting. Potential collaborators have already emerged ■ result of the Dartington forum.

A contribution of £10,000 towards the cost of the forum was made by Channel 4 television, which filmed the weekend's events for its 'Signals' programme. English National Opera has yet to find funding for the Studio project, although Channel 4, the Arts Council and the South Bank have promised support for English National Opera in the form of commissions and performance space.

Plumber's Gift

English National Opera has already embarked on a series of commissions for the company to perform at the Coliseum. The first of these to be performed is *The Plumber's Gift* which was premiered in May. It is the second opera by David Blake, whose first work, *Toussaint*, was premiered by English National Opera in 1977 and revived for the 1983-84 season. The two works are very different in scale. *Toussaint* is ■ tragedy on an epic scale, addressing broad issues and making full use of the company's vocal and orchestral resources. *The Plumber's Gift* is more modest in scope, a comedy of manners for a cast of six.

The libretto was written by the poet John Birtwhistle and the two collaborators decided that they wanted the opera to be original rather than an adaptation from another medium. They also decided upon ■ modern setting, and that the work should explore how people shape their lives, rather than having the characters propelled by destiny. Musically the starting points were *Cosi fan tutte*, *The Magic Flute* and *The Midsummer Marriage*.

The opera presents the relationships of two socially distinct couples: middle-aged, middle-class Marian and James, and the younger, working-class Sylvia and Colin. Both couples are taking ■ weekend break at a seaside guest-house and the opera explores the interaction between the characters and the effect this has on their relationships. The landlady of the guest-house, Mrs. Worthing, and the resident guest, Commander Hardcastle, are observers of the relationships.

The opening and closing sections of the opera have ■ naturalist setting, the first introducing the char-

acters and delineating the relationships. Between the two acts is a pastoral which the characters experience as a distorted alternative world. The pastoral reflects the events which have happened already and foreshadows how the relationships may develop. The final act shows the effects of their experiences upon the couples and their relationships.

The opera met with a mixed reaction. Music and libretto were acclaimed by some critics for their richness, beauty, and sustained imagination and ingenuity. Others felt that the material was fundamentally unoperatic and that the opera lacked dramatic purpose, while the pastoral was held to slow down the action. The production and the singers' performances were uniformly praised.

Glass Planet

The critics were more united in their opinion of another new work premiered by English National Opera, *The Making of the Representative for Planet 8*: they did not like it. Philip Glass was co-commissioned to write the opera by English National Opera, the Houston Grand Opera, Het Muzicktheater in Amsterdam and Bühnen der Landeshauptstadt in Kiel: the world premiere took place in Houston in July 1988.

The three-act work is based on ■ novel of the same name by Doris Lessing, who wrote the libretto. *Planet 8* has ■ prosperous rural civilization but the planet's sun is dying. The opera deals with the gradual extinction of the race as an ice age develops, and the people's realization that their immortal spirits will survive in the form of the Representative.

Glass is a minimalist composer, his music proceeding in units of simple harmonies and rhythms repeated over and over, which become more restless as the repetition continues. The repetition can achieve ■ compelling and hypnotic quality and in *Satyagraha* and *Akhnaten*, Glass' earlier full-length operas, this hypnotic quality works to telling effect. Neither of these earlier works has a conventional narrative requiring the story and characters to be developed. *The Making of the Representative for Planet 8*, however, is a narrative drama and some critics felt that Glass' musical idiom is unsuited to material that requires psychologically realistic characterization and dramatic climaxes and continuity. Doris Lessing's libretto did not find favour either, with complaints that the power of the writing in the novel had been stripped away to leave a libretto which was banal.

The production in Houston was described ■ 'compelling visually and superb musically'. Modifications were made to the production before it was staged in London and these may have lessened the visual impact, but the cast and orchestra at the Coliseum were praised for their performances.

First reactions to *The Making of the Representative for Planet 8* may have been unfavourable but Glass' minimalism also met with resistance or a baffled response when *Akhnaten* was first performed at the Coliseum. *Akhnaten* found more acceptance the second season it was performed: ■ return to the Coliseum by *The Making of the Representative for Planet 8* may lead to a similar reassessment.

OPERA PRODUCTIONS

In the summaries of the company activities shown below, the dates in brackets indicate the year the current production entered that company's repertoire.

ROYAL OPERA (1946)

Royal Opera House, Covent Garden, WC2E 9DD

Productions from the repertoire were *Turandot* (1984), *Die Entführung aus dem Serail* (1987), *Falstaff* (1982), *Semele* (1982), *Die Fledermaus* (1977), *Don Carlos* (1958), *La clemenza di Tito* (1974), *Der Rosenkavalier* (1984), *Le nozze di Figaro* (1987), *Cavalleria rusticana* and *I pagliacci* (1959), *L'Italiana in Algeri* (1988), *Alceste* (1981) and *Die Zauberflöte* (1979).

New productions were:

Sept. 29, 1988. *Das Rheingold* (Wagner). Conductor, Bernard Haitink; producer, Yuri Lyubimov; designer, Paul Hernon.

Alberich, Ekkehard Wlaschiha; *Fricka*, Helga Dernesch; *Wotan*, James Morris; *Freia*, Nancy Gustafson; *Loge*, Kenneth Riegel; *Mime*, John Dobson; *Erda*, Jadwiga Rappé; *Fasolt*, Roderick Kennedy; *Fafner*, Willard White.

Oct. 31, 1988. *Madama Butterfly* (Puccini), in association with Scottish Opera. Conductor, Michael Schenwandt; producer, Nuria Espert; designers, Ezio Frigerio (set), Franca Squarciapino (costumes).

Cio-Cio-San, Catherine Malfitano; *Pinkerton*, Arthur Davies; *Sharpless*, Jonathan Summers; *Suzuki*, Miao Qing.

Nov. 14, 1988. *Manon* (Massenet). Conductor, Michel Plasson; producer, John Cox; designer, Peter Rice.

Manon, Leontina Vaduva; *Des Grieux*, David Rendall; *Lescaut*, François Le Roux; *De Brétigny*, Barry Mora; *Comte de Grieux*, Donald McIntyre.

Dec. 8, 1988. *Rigoletto* (Verdi). Conductor, Michael Boder; producer, Nuria Espert; designers, Ezio Frigerio (set), Franca Squarciapino (costumes).

Rigoletto, Brent Ellis; *Gilda*, June Anderson; *Duke of Mantua*, Neil Shicoff; *Sparafucile*, John Tomlinson; *Maddalena*, Claire Powell; *Monterone*, Donald McIntyre.

Feb. 9. The British premiere of *Un ré in ascolta* (Berio). Conductor, Luciano Berio; producer, Graham Vick; designer, Chris Dyer.

Prospero, Donald McIntyre; Director, Robert Tear; *Venerdì*, Graham Valentine; *Protagonista*, Kathryn Harries; *Soprano I*, Penelope Walmesley-Clark; *Soprano II*, Rebecca Littig; *Mezzo*, Elizabeth Laurence; Singers, Robin Leggate, Omar Ebrahim, Matthew Best; *Nurse*, Linda Kitchen; *Wife*, Anthea Moller; *Doctor*, John Dobson; *Lawyer*, Eric Garrett; *Boy (Mime)*, Memnos Costa.

March 6. *Cosi fan tutte* (Mozart). Conductor, Jeffrey Tate; producer, Johannes Schaaf; designers, Hans Schavernoch (set), Lore Haas (costumes).

Fiordiligi, Margaret Marshall; *Dorabella*, Susanne Mentzer; *Despina*, Anne Howells; *Ferrando*, Hans Peter Blochwitz; *Guglielmo*, Andreas Schmidt; *Alfonso*, Claudio Desderi.

May 1. *Albert Herring* (Britten), in association with Glyndebourne Festival Opera. Conductor, Roger Norrington; producer, Peter Hall; designer, John Gunter.

Albert Herring, John Graham-Hall; *Lady Billows*, Pauline Tinsley; *Florence Pike*, Felicity Palmer; *Miss Wordsworth*, Elizabeth Gale; *Mrs. Herring*, Patricia Kern; *Gedge*, Derek Hammond-Stroud; *Upfold*, Alex-

ander Oliver; *Supt. Budd*, Richard Van Allen; *Sid*, Jeffrey Black; *Nancy*, Eirian James.

June 7. *Il trovatore* (Verdi). Conductor, Bernard Haitink; producer and designer, Piero Faggioni.

Leonora, Rosalind Plowright; *Azucena*, Eva Randová; *Manrico*, Plácido Domingo; *Count di Luna*, Sergei Leiferkus.

ENGLISH NATIONAL OPERA (1931)

London Coliseum, St. Martin's Lane, WC2N 4ES

Productions from the repertoire were *Carmen* (1986), *Tosca* (1987), *The Barber of Seville* (1987), *Simon Boccanegra* (1987), *The Mikado* (1986), *La Bohème* (1977), *The Pearl Fishers* (1987), *The Turn of the Screw*, (1979), *Don Giovanni* (1985), *The Makropulos Case* (1982) and *The Mastersingers of Nuremberg* (1984).

New productions were:

Sept. 14, 1988. *La traviata* (Verdi). Conductor, Mark Elder; producer, David Pountney; designer, Stefanos Lazaridis.

Violetta, Helen Field; *Alfredo*, Arthur Davies; *Germont*, Alan Opie.

Nov. 9, 1988. The European premiere of *The Making of the Representative for Planet 8* (Glass), a co-commission by E.N.O., Houston Grand Opera, Het Muziektheater and Bühnen der Landeshauptstadt Kiel. Conductor, Michael Lloyd; staging by Harry Silverstein, after Minoru Domberger's original production; designers, Eiko Ishioka, Minoru Domberger.

Alsi, Lesley Garrett; *Doeg*, Andrew Shore; *Johor*, Richard Angas; *Nooni*, Christopher Gillett; *Klin*, Gloria Crane; *Rivalin*, Judy Pearl; *Bratch*, Tamsin Dives; *Pedug*, John Kitchiner; *Marl*, Simon Masterton-Smith.

Dec. 14, 1988. *Christmas Eve* (Rimsky Korsakov). Conductor, Albert Rosen; producer, David Pountney; designer, Sue Blane.

Oksana, Kathryn Pope; *Vakula*, Edmund Barham; *Solokha/Tsarina*, Anne-Marie Owens; *The Devil*, Nigel Douglas.

Jan. 24. The British premiere of *Lear* (Reimann). Conductor, Paul Daniel; producer, Eike Gramss; set designer, Eberhard Matthies; costumes, Renate Schmitzer.

King Lear, Monte Jaffe; *Gloucester*, Rodney Mangan; *Kent*, Nigel Douglas; *Edmund*, Alan Woodrow; *Edgar*, Christopher Robson; *Goneril*, Phyllis Cannan; *Regan*, Vivian Tierney; *Cordelia*, Rose Mannion; *Albany*, Christopher Booth-Jones; *Cornwall*, Geoffrey Pogson; *Fool*, Eric Shilling; *France*, William Mackie.

Feb. 22. *Falstaff* (Verdi). Conductor, Mark Elder; producer, David Pountney; designer, Marie-Jeanne Lecce.

Falstaff, Benjamin Luxon; *Mistress Ford*, Janice Cairns; *Mistress Page*, Sally Burgess; *Mistress Quickly*, Anne Collins; *Ford*, Malcolm Donnelly; *Nannetta*, Joan Rodgers; *Fenton*, Barry Banks.

April 12. *Eugene Onegin* (Tchaikovsky). Conductor, Mark Elder; producer, Graham Vick; designer, Sally Jacobs.

Tatyana, Marie McLaughlin; *Eugene Onegin*, Jonathan Summers; *Olga*, Ethna Robinson; *Lensky*, Arthur Davies; *Gremin*, Norman Bailey.

May 25. The world premiere of *The Plumber's Gift* (Blake). Conductor, Lionel Friend; producer, Richard Jones; designer, Nigel Lowery.

Colin, Peter Coleman-Wright; *Sylvia*, Sally Burgess; *Marion*, Eiddwen Harrhy; *James*, Philip

Doghan; *Mrs Worthing*, Ann Howard; *Commander Hardfast*, Neil Howlett.

The opera *A Small Green Space*, commissioned by the Baylis Programme at the E.N.O., was performed at Basdon, Barrow-in-Furness, Buxton, the Glasgow Mayfest, Bury St. Edmunds and The Place, London.

NEW SADLER'S WELLS OPERA

Sadler's Wells Theatre, Rosebery Avenue, EC1

In a three-week season at Sadler's Wells Theatre in autumn 1988, the company presented two new productions:

Oct. 14, 1988. *La Belle Hélène* (Offenbach). Conductor, Simon Phipps; producer, Tim Luscombe; designer, Ulitz.

Helen, Rosemary Ashe; *Paris*, Peter Jeffes; *Menelaus*, Bernard Dickerson; *Agamemnon*, John Ayldon. Gerard Howland.

Marco, Stephen Austin; *Giuseppe*, Richard Jackson; *Gianetta*, Laureen Livingstone; *Tessa*, Jane Findlay; *Duke of Plaza-Toro*, Julian Moyle; *Duchess*, Linda Ormiston; *Luiz*, Robert Horn; *Casilda*, Carole Lesley Green.

The two productions were subsequently given on tour at Southampton, Birmingham, Oxford, Nottingham and Bath.

WELSH NATIONAL OPERA (1946)

John Street, Cardiff CF1 4SP

Productions from the repertoire were *Madam Butterfly* (1978), *La traviata* (1988), *Die Frau ohne Schatten* (1981), *La Bohème* (1984), *The Bartered Bride* (1982) and concert performances of *Osud*.

New productions were:

Sept. 10, 1988. *Falstaff* (Verdi). Conductor, Richard Armstrong; producer, Peter Stein; designers, Lucio Fanti (*set*), Moidele Bickel (*costumes*).

Falstaff, Donald Maxwell; *Mistress Ford*, Suzanne Murphy; *Mistress Page*, Wendy Verco; *Mistress Quickly*, Cynthia Buchan; *Ford*, David Malis; *Nannetta*, Nuccia Focile; *Fenton*, Laurence Dale.

March 11. *The Seraglio* (Mozart). Conductor, Charles Mackerras; producer, Giles Havergal; designer, Russell Craig.

Constanze, Marilyn Hill Smith; *Blonde*, Andrea Bolton; *Belmonte*, Richard Croft; *Pedrillo*, Timothy German; *Osmín*, Peter Rose; *Pasha Selim*, Paul Bentall.

May 13. *La sonnambula* (Bellini). Conductor, Julian Smith; producer, Helmut Polixa; designers, Kathrin Kegler (*set*), Terry Parr and Dirk von Bodisco (*costumes*).

Amina, Valeria Esposito; *Elvino*, Peter Brondor; *Lisa*, Eirian Davies; *Count Rodolfo*, Geoffrey Moses; *Teresa*, Beverley Mills.

June 5. *Ariadne auf Naxos* (Strauss). Conductor, Charles Mackerras; producer, Giles Havergal; designer, Russell Craig.

Ariadne, Edith Davies; *Bacchus*, Gary Bachlund; *Zerbinetta*, Constance Hauman; Composer, Anne-Marie Sand; *Brighella*, Harry Nicoll; *Scaramouche*, David Owen; *Harlequin*, Peter Savidge; *Truffaldin*, Ian Comboy; *Major-Domo*, Nigel Douglas; *Music Master*, Barry Mora; *Naiad*, Eileen Hulse; *Dryad*, Kate MacCarney; *Echo*, Andrea Bolton.

Performances of *Falstaff* were given at the Royal Opera House, Covent Garden, in October 1988 and at the Teatro Lirico, Milan, in May 1989. Performances of the repertoire were given at the New Theatre, Cardiff, and on tour at Bristol, Swansea, Liverpool,

Birmingham, Oxford, Southampton and Manchester.

A tour of smaller venues with a production of *La traviata* was also undertaken.

SCOTTISH OPERA (1962)

Theatre Royal, Hope Street, Glasgow G2 3QA

Productions from the repertoire were *The Magic Flute* (1983), *Iolanthe* (1986) and *La Bohème* (1988).

New productions were:

Sept. 21, 1988. *The Midsummer Marriage* (Tippett), a co-production with Opera North. Conductor, John Pryce-Jones; producer, Tim Albery; designers, Tom Cairns, Antony McDonald.

Jenifer, Marie Slorach; *Mark*, Quade Winter; *Bella*, Patricia O'Neill; *Jack*, Bonaventura Bottone; *King Fisher*, Neil Howlett; *Madame Sosostris*, Penelope Walker; *the Ancients*, Claire Livingstone, David Marsh.

Oct. 18, 1988. *Die Fledermaus* (Strauss). Conductor, Jacek Kasprzyk; producer, Simon Callow; designer, Bruno Santini.

Rosalinde, Gillian Sullivan; *Eisenstein*, Robin Leggate; *Falke*, Russell Smythe; *Adele*, Amy Burton; *Alfred*, Justin Lavendar; *Orlofsky*, Omar Ebrahim; *Frank*, Oddbjørn Tennfjord; *Frosch*, Graham de Banzie.

Jan. 27. *Das Rheingold* (Wagner). Conductor, John Mauceri; producer, Richard Jones; designer, Nigel Lowery.

Alberich, Nicholas Folwell; *Fricker*, Felicity Palma; *Wotan*, Willard White; *Freia*, Anne Williams-King; *Loge*, Bonaventura Bottone; *Mime*, Paul Harrhy; *Erda*, Penelope Walker; *Fasolt*, Curtis Watson; *Fafner*, Oddbjørn Tennfjord.

Feb. 8. *Don Giovanni* (Mozart). Conductor, John Mauceri; producer, David Walsh; designer, Kathryn Hysing.

Don Giovanni, Jonathan Summers, *Donna Elvira*, Kathryn Bouley; *Donna Anna*, Jane Eaglen; *Don Ottavio*, Glenn Winslade; *Leporello*, Jan Opalach; *Commendatore*, Oddbjørn Tennfjord; *Zerlina*, Judith Howarth; *Masetto*, David Marsh.

March 23. *Oedipus Rex* (Stravinsky), a co-production with Opera North, given as a double-bill with *Petrushka*, performed by Scottish Ballet.

Conductor, Graeme Jenkins; producer, Kate Brown after Steven Pimlott; designer, Stefanos Lazaridis.

Oedipus, Alberto Remedios; *Jocasta*, Anne-Marie Owens; *Creon/Messenger*, Rodney Macann; *Tiresias*, John Tranter; *Narrator*, Robert O'Mahoney.

April 25. *La traviata* (Verdi), a co-production with Teatro Lírico Nacional La Zarzuela, Madrid. Conductor, John Mauceri; producer, Nuria Espert; designers, Ezio Frigerio (*set*), Franca Squarciapino (*costumes*).

Violetta, Nancy Gustafson; *Alfredo*, Jorge Pita; *Germont*, James Dietsch.

May 23. *Street Scene* (Weill), a co-production with English National Opera. Conductor, John Mauceri; producer, David Pountney; designer, David Fielding.

Anna Mairrant, Kristine Ciesinski; *Rose Mairrant*, Janis Kelly; *Willie Mairrant*, Ryan McBride; *Frank Mairrant*, Spiro Malas; *Sam Kaplan*, Mark Beudert.

Performances were given at the Theatre Royal, Glasgow, and on tour at Newcastle, Edinburgh, Aberdeen, Bradford, Oxford and Liverpool.

Scottish Opera Go-Round toured smaller venues in Scotland and Wales with a small-scale production of *Don Carlos* in autumn 1988.

OPERA NORTH (1978)

Grand Theatre, New Briggate, Leeds LS1 6NZ

Productions from the repertoire during the company's tenth anniversary season were *La Bohème* (1986), *Aida* (1986), *The Flying Dutchman* (1979) and *The Marriage of Figaro* (1987).

New productions were:

Sept. 17, 1988. *The Love of Three Oranges* (Prokofiev). Conductor, David Lloyd-Jones; producer Richard Jones; designers, the Brothers Quay (*set*), Sue Blane (*costumes*).

The Prince, Peter Jeffes; *Fata Morgana*, Pauline Tinsley; *Ninetta*, Juliet Booth; *Nicoletta*, Victoria Sharp; *Smeraldina*, Maria Jagusz; *Linetta*, Lesley Roberts; *Princess Clarissa*, Patricia Payne; *Truffaldino*, Paul Harrhy; *Leandro*, Andrew Shore; *Pantalo*, Alan Oke; *The King*, Mark Glanville.

Oct. 1, 1988. *Lucia di Lammermoor* (Donizetti). Conductor, Clive Timms; producer, David Gann; designer, Ultz.

Lucia, Valerie Masterson; *Edgardo*, Jorge Pita; *Enrico*, Keith Latham; *Arturo*, Barry Banks; *Raimondo*, John Connell.

Dec. 10, 1988. *Les Pêcheurs de perles* (Bizet), a co-production with English National Opera. Conductor, David Lloyd-Jones; producer and designer, Philip Prowse.

Leila, Anne Dawson; *Nadir*, Arthur Davies; *Zurga*, Sergei Leiferkus.

April 19. *Manon* (Massenet). Conductor, Clive Timms; producer, Richard Jones; designer, Richard Hudson.

Manon, Helen Field; *Des Grieux*, Patrick Power; *Lescaut*, Geoffrey Dalton; *De Brétigny*, Robert Poultton; *Comte des Grieux*, Matthew Best.

May 9. *Boris Godunov* (1869 version) (Mussorgsky). Conductor, David Lloyd-Jones; producer, Ian Judge; designers, Russell Craig (*set*), Deirdre Clancy.

Boris Godunov, John Tomlinson; *Xenia*, Juliet Booth; *Feodor*, Verona James; *Grigory*, Edmund Barham; *Shuisky*, Kim Begley; *Pimen*, Sean Rea.

Performances were also given on tour at Manchester, Nottingham, Hull and Birmingham. *The Marriage of Figaro* was given and *La Finta Giardiniera* premiered at the Mozart Festival at York in July 1989. *The Love of Three Oranges* was performed at the 1989 Edinburgh Festival.

KENT OPERA (1969)

Pembles Cross, Egerton, Ashford, Kent

The company began the season with performances of *A Night at the Chinese Opera* (1987) at the Queen

Elizabeth Hall, London. On their autumn 1988 tour, performances of *Fidelio* (1982), *Count Ory* (1988) and *Don Giovanni* (1983) were given at Dartford, Norwich, Tunbridge Wells, Wolverhampton, Canterbury, Northampton and Bath.

The spring 1989 tour (the company's twentieth anniversary season) included *Fidelio*, *The Return of Ulysses* (1979) and one new production: May 3. *Peter Grimes* (Britten). Conductor, Ivan Fischer; producer, Norman Platt; designer, Bernard Culshaw.

Peter Grimes, Howard Haskin; *Ellen Orford*, Meryl Drower; *Bulstrode*, Rodney Macann; *Auntie*, Enid Hartle; *Ned Keene*, Gwion Thomas; *Bob Boles*, Tomos Ellis.

Performances were given at Dartford, Canterbury, Eastbourne, Plymouth, Southsea, Norwich, the Bath Festival, Northampton and Tunbridge Wells. *Don Giovanni* and *Fidelio* were also given at Valencia, Spain, in December 1988.

In summer 1989 the company performed Britten's *Burning Fiery Furnace* at the Aldeburgh Festival and the London International Opera Festival. The producer was Ian Watt-Smith, the designer Mark Hinton and the music was conducted from the keyboard by Timothy Dean. The cast included David Johnson (*Nebuchadnezzar*), Richard Suart (*Abbot-Astrologer*), Gwion Thomas, Robert Horn and John Rath (*Shadrach, Meshach and Abednego*).

GLYNDEBOURNE FESTIVAL OPERA (1934)

Glyndebourne, Lewes, Sussex BN8 5UU

The 1989 Festival ran from May 19 to August 23; the orchestra was the London Philharmonic Orchestra for five of the six productions. The Orchestra of the Age of Enlightenment, making its début at the Festival, played for the performances of *Le nozze di Figaro*. Four of the productions were revivals: *Orfeo ed Euridice* (1982), *A Midsummer Night's Dream* (1981), *Arabella* (1984) and *The Rake's Progress* (1975). The new productions were:

May 19. *Jenůfa* (Janáček). Conductor, Andrew Davis; director, Nikolaus Lehnhoff; designer, Tobias Hoheisel.

Jenůfa, Roberta Alexander; *Štěva*, Mark Baker; *Laca*, Philip Langridge; *The Kostelníčka*, Anja Silja. July 2. *Le nozze di Figaro* (Mozart). Conductor, Simon Rattle; director, Peter Hall; designer, John Gunter.

Figaro, Dale Duesing; *Susanna*, Joan Rodgers; *Court Almaviva*, William Shimell; *The Countess*, Gunnel Bohman; *Cherubino*, Marianne Rorholm.

The Glyndebourne Touring Opera performed *Le nozze di Figaro*, *Il barbiere di Siviglia* and *Death in Venice* at Glyndebourne, Plymouth, Oxford, Southampton, Manchester and Norwich in autumn 1990.

DANCE, 1988-89

The Royal Opera House announced on January 12, 1989 that Sadler's Wells Royal Ballet will be based in Birmingham from August 1990. The first move in the transfer was made in December 1987 when the Birmingham Hippodrome and Birmingham City Council jointly invited the company to make the Hippodrome its main base. The submission in autumn 1988 of a report by independent consultant David Allen on the advantages and disadvantages of the proposal, was followed by detailed negotiations between the Royal Opera House and Birmingham. The facilities and funding offered by the city persuaded the Covent Garden management that the company's continued development would be ensured by moving its base to Birmingham.

Birmingham has a strong record of supporting the arts. Over the past ten years the city has spent around £5 million on improving backstage and front-of-house facilities at the Hippodrome and on increasing the size of the stage, which is now a similar size to that at Covent Garden. (This will be an improvement on the restricted conditions at Sadler's Wells Theatre, the SWRB's present base, where the stage is too small for the company's large-scale productions.) As a result of the company's relocation, Birmingham is to spend £4 million on providing backstage, rehearsal and administrative facilities for the exclusive use of the company which will be housed in a new building to be erected behind the Hippodrome.

The increased funding will bring the company an additional £2 million a year. Birmingham, which already helps fund the company, will provide £1 million extra and this sum will be matched by the Arts Council. Part of this money will be spent on relocation costs, including a grant of some kind to the dancers. Some are prepared to relocate to Birmingham but a number are unhappy about the move and might leave. The SWRB's director, Peter Wright, said that the company may be weaker for a short time after the move, but he feels that the better facilities and financial resources will enable him to build a stronger company in the long term. Longer seasons in Birmingham (five weeks a year instead of the present two weeks) will also give him scope to widen the repertoire, both with classics and new work.

Luke Rittner, secretary general of the Arts Council, welcomed the SWRB's relocation, saying that the move was in line with the Arts Council's policy to disperse the arts to the regions. However, at the end of January regional provision of dance in the north of England was threatened by the recommendation that the Manchester-based Northern Ballet should have its Arts Council funding withdrawn.

The recommendation was made in a report commissioned by the Arts Council Dance Department in 1988 to review the provision of dance in England and Wales. The report, by theatre and television director Graham Devlin, urged the Arts Council to concentrate its resources on improving quality and on building up audiences for dance in the regions. Where the major touring companies such as SWRB and the London Festival Ballet are concerned, Devlin suggested that their tours should be reorganized to

give each company longer seasons and a larger repertoire in fewer centres, but with the centres chosen to serve as wide an area of the country as possible. This suggestion was welcomed by the companies and Arts Council alike and moves towards implementing the idea are expected in future seasons.

Devlin also suggested that support for dance should be built up at local level by setting up regional dance agencies to encourage the growth of smaller companies and to develop young audiences. The possibilities of this idea are to be examined in detail by a working party before any action is taken.

The deciding factor in the implementation of Devlin's recommendations, as in the provision of dance generally, is money. Devlin acknowledges in his report that dance in Britain is underfunded and that there is not enough money available to support adequately those companies receiving grants at present. Although he recommends that the Dance Panel should ask the Arts Council for more money for dance, Devlin recognizes that this is unlikely to be forthcoming. He suggests that one company, Northern Ballet, should have its grant withdrawn so that the money can be used to relieve the financial restrictions on the other companies. An increase in small-scale tours by the London Festival Ballet and the introduction of similar ventures by the SWRB and the Royal Ballet are suggested to compensate for the loss of touring by the Northern Ballet.

The recommendation that the Northern Ballet's funding should be withdrawn aroused strong protests—nearly 20,000 people wrote to the Arts Council to protest at a move that would inevitably lead to the closure of the company. The company's artistic director, Christopher Gable, broke the Arts Council's embargo on publicity about the Devlin report to counter the report's criticism of the company's financial weakness. He pointed out that the company's subsidy had been fixed at a level well below the sum the Arts Council's own assessment considered necessary and then for three years the company had received no increase to compensate for inflation. The company produced figures to show that its subsidy per seat was about half that of other companies, despite the fact that the Northern Ballet gives far more performances than any of the main companies. The local authorities in the Greater Manchester area were appalled by the proposal and accused the Arts Council of wishing to safeguard London-based activities at the expense of the regions.

The Arts Council's response to the Devlin report was to welcome its positive recommendations but to state that it wished to avoid any client company having its funding threatened by the implementation of any of the report's recommendations. When the dust had settled, Northern Ballet found itself reprieved, with its Arts Council grant to continue at the present level for another two years. However, the company's future is not yet secure and it is now under pressure to improve its funding from donations and sponsorship.

The plight of Northern Ballet was raised in the House of Commons in May. The House considered also the problems facing companies such as London

Festival Ballet and English National Opera after April 1990. Both companies received funding from the Greater London Council until its abolition in 1986. Thereafter the grant was paid through Westminster City Council: it constitutes about one third of London Festival Ballet's running costs. The introduction of the community charge in April 1990 will greatly reduce the income of a council such as Westminster which has relatively few residents in its area, and there are doubts about whether the same level of funding by the council will still be possible. In his reply to a question in the House, the Minister for the Arts, Richard Luce, was non-committal about the Government's intentions regarding additional funding for the companies but said that he expected Westminster Council to decide what it could contribute to funding the arts and then to generate support from other London boroughs.

Faced with a shortfall in its funding from London boroughs, London Festival Ballet has been strengthening its links with the regions, in particular the Alhambra theatre, Bradford. The company has always performed at the larger regional venues, and with its offshoot company LFB also touring small venues, the company brings its work to most parts of the country. In view of the extent of its tours and with future changes to its funding likely, the company decided that a new title was needed that reflected its national role. The title English National Ballet was decided upon and came into use at the start of the company's London season in the summer of 1989. At the same time the renamed company gained a new royal patron, the Princess of Wales. Princess Margaret stood down to make way for her, after being patron of the Festival Ballet since 1976.

Contemporary dance in Britain lost one of its founders and guiding spirits with the death on June 12 of Robin Howard, at the age of 65. Howard gave much support in the years immediately after the Second World War to the companies at Covent Garden and Sadler's Wells. However, the visit to London of Martha Graham's company in 1954 opened up for him the wider possibilities of expression offered

by Graham's style of dance. When Graham's company came to Europe in 1963, Robin Howard helped to provide the financial backing for a London season.

The 1963 season proved a success and generated a desire to establish the contemporary style of dance in this country. In 1965 Howard started up Graham classes in London, and by the following year had founded a school and persuaded Robert Cohan, one of Martha Graham's leading men, to become artistic director. The original intention was to train dancers whom someone else would form into a company, but when 'someone else' was not forthcoming, Robin Howard founded the London Contemporary Dance Theatre in 1967. In 1969 the school and the company moved to The Place, a converted drill hall at Euston. Howard was general director of the Contemporary Dance Trust until 1988 when he handed over day-to-day management, retaining his connection with the school, company and theatre as Founder and Life President of the Contemporary Dance Trust.

If British dance was changed radically by Robin Howard's vision of the possibilities offered by modern choreographic techniques, Robert Cohan contributed much to making the vision a reality. Originally a member of Martha Graham's company, Cohan helped to establish first the school and then the company founded by Robin Howard. He left the company in July 1989 after 22 years as artistic director. In this period the company benefited greatly from his choreographic variety and inventiveness, gaining national and international distinction. Cohan created a programme of four new works to mark his departure from the company, *Stone Garden*, *In Memory*, *Metamorphoses* and *Crescendo*, which critics hailed as a worthy valediction. Cohan's successor as artistic director of London Contemporary Dance Theatre is Dan Wagoner, who took up the post in July 1989. Like Cohan, Wagoner is also a former member of the Martha Graham company and a choreographer. His first season with the company will see the British premiere of his work *To Comfort Ghosts*.

PRODUCTIONS

ROYAL BALLET (1931)

Royal Opera House, Covent Garden, WC2E 9DD

Full-length ballets from the repertoire performed during the 1988-89 season were *Ondine* (Ashton, 1988), *The Sleeping Beauty* (Petipa, after Sergueyev; additional choreography, Ashton, 1977), *Cinderella* (Ashton, 1987), *Romeo and Juliet* (MacMillan, 1975) and *Swan Lake* (Petipa/Ivanov, 1987).

Programmes also included the following shorter ballets from the repertoire: *Rhapsody* (Ashton), 'Still Life' at the Penguin Café (Bintley), *Apollo* (Balanchine), *A Month in the Country* (Ashton), *Grand Pas Classique* (Gsovsky) and *Enigma Variations* (Ashton).

Introduced into the company's repertoire for the first time were:

March 14. Capriccio for Piano and Orchestra, the 'Rubies' section from *Jewels* by Balanchine; music, Stravinsky; designs, André Levasseur.

May 18. La Bayadère. Choreography, Makarova after Petipa; music, Minkus, arranged by John Lanchberry; producer, Natalia Makarova; set, Pier

Luigi Samaritani; costumes, Yoland Sonnabend. The cast was led at the first performance by Sylvie Guillem; Fiona Chadwick and Jonathan Cope.

New works premiered were:

Oct. 20, 1988. The Trial of Prometheus. Choreography, David Bintley; score, Geoffrey Burgon; designer, Terry Bartlett. The cast was led at the premiere by Stephen Jefferies, Fiona Chadwick and Simon Rice.

Nov. 22, 1988. The Spirit of Fugue. Choreography, David Bintley; score, Peter McGowan; designer, Terry Bartlett.

July 11. Piano. Choreography, Ashley Page; music, Beethoven's 1st Piano Concerto; designer, Howard Hodgkin.

In addition to performances at Covent Garden, the company took *Romeo and Juliet* and *Ondine* to Bristol and Birmingham in February 1989. In July 1989 the company visited Plymouth with *La Bayadère*, *Ondine*, 'Still Life' at the Penguin Café, *Enigma*

Variations and Piano, which received its premiere during the visit.

SADLER'S WELLS ROYAL BALLET (1981)
Sadler's Wells Theatre, Rosebery Avenue,
EC1R 4TN

Full-length ballets from the repertoire performed this season were *Giselle* (Petipa after Coralli and Perrot, 1968), *The Snow Queen* (Bintley, 1986), *The Sleeping Beauty* (Petipa/Wright, 1984), *La Fille mal gardée* (Ashton, 1960) and *Swan Lake* (Pepita and Ivanov, additional choreography by Peter Wright, 1980).

Programmes also included the following shorter ballets: *Les Sylphides* (Fokine), *Petrushka* (Fokine), *Concerto Barocco* (Balanchine), *The Edge of Silence* (Lustig), *Pineapple Poll* (Cranko), *Bastet* (Seymour), *Chorus* (Bintley), *Lazarus* (Cauley) and *The Two Pigeons* (Ashton).

The company introduced into its repertoire:

Oct. 10, 1988. *Themes and Variations*. *Choreography*, George Balanchine; *music*, Tchaikovsky; *staging*, Patricia Neary; *designer*, Peter Farmer.

New works were:

Feb. 13. *Hobson's Choice*. *Choreography*, David Bintley; *score*, Paul Reade; *designer*, Hayden Griffin. The cast at the premiere was led by Karen Donavan (*Maggie*), Michael O'Hara (*Willie Mossop*) and Desmond Kelly (*Hobson*).

June 22. *Auras*. *Choreography*, Vincent Redmon; *music*, Poulenc's Sextet for piano and wind; *designer*, Malcolm Steed. The cast was led at the premiere by Marion Tait and Roland Price.

and

Those Unheard. *Choreography*, William Tuckett; *music*, Britten's Four Sea Interludes; *designer*, Stephen Meaha. The cast at the premiere was led by Annette Pain.

In addition to seasons at Sadler's Wells Theatre and at the Royal Opera House, the company gave performances on tour at Birmingham, Leeds, Oxford, Southampton, Eastbourne, Hull, Manchester, Sunderland, Milton Keynes (a Big Top season) and Lancaster (a Big Top season). The company also undertook a three-week tour of Japan in April-May 1989, visiting seven cities with productions of *The Sleeping Beauty* and *Swan Lake*.

London Festival Ballet/
English National Ballet
Markova House, 39 Jay Mews, SW7 2ES

Performances of full-length ballets from the repertoire included *Swan Lake* (Petipa, Ivanov, Ashton: prod. Makarova, 1988), *The Nutcracker* (Schaufuss, 1986), *Coppélia* (Hynd, 1985), *Romeo and Juliet* (Ashton), *La Sylphide* (Schaufuss after Bouronville, 1979) and *Onegin* (Cranko, 1983).

On June 12 a new production was premiered of *Napoli*: *choreography*, Schaufuss after Bouronville; *producer*, Peter Schaufuss; *musical adviser*, Ole Nørlyng; *designer*, David Walker. The cast at the premiere was led by Susan Hogard (*Teresina*) and Peter Schaufuss (*Gennaro*).

Programmes of shorter ballets included *Land* (Bruce), *Etudes* (Lander), and *Swansong* (Bruce). The company also introduced into its repertoire *Anastasia* (June 19: *choreographer*, Kenneth MacMillan).

Performances were given in London at the Royal Festival Hall and the Dominion Theatre, and on tour at Newcastle, Manchester, Bristol, Plymouth, Birmingham, Nottingham, Glasgow, Aberdeen, Oxford, Southampton, Liverpool and Bradford.

The company performed *Swan Lake* in Denmark,

and *La Sylphide*, *Sphinx* (Tetley), *Land* and *Etudes* in Egypt in autumn 1988. In July 1989 *Romeo and Juliet* was performed in Toronto, Canada, and *Romeo and Juliet*, *La Sylphide*, *Napoli*, *Anastasia*, *Land* and *Etudes* in Washington and New York, U.S.A.

The LFB company toured small venues in autumn 1988 with programmes comprising *Apollo* (Balanchine), *Corsair*, *pas de deux* (Petipa), *Swansong* (Bruce), *Song of a Wayfarer* (Béjart) and dances from *Napoli* (Bouronville).

RAMBERT DANCE COMPANY (1926)
94 Chiswick High Road, W4 1SH

Works from the repertoire performed during the season included *Mates* (Gordon), *Dark Elegies* (Tudor), *Rhapsody in Blue* (Alston), *Septet* (Cunningham), *Strong Language* (Alston), *Carmen Arcadias* (Page) and a revised version of *Mythologies* (Alston). One work was introduced into the repertoire: *Opal Loop* (March 8: *choreography*, Trisha Brown).

New works included:

Oct. 21, 1988. *Hymnos*. *Choreography*, Richard Alston; *music*, Peter Maxwell-Davies.

and

Soldat. *Choreography*, Ashley Page; *music*, Stravinsky; *designer*, Bruce McLean.

Oct. 27, 1988. *Embarque*. *Choreography*, Siobhan Davies; *music*, Steven Reich's *Octet*; *costumes*, David Buckland.

March 2. *Cinema*. *Choreography*, Richard Alston; *music*, Satie; *designer*, Allen Jones.

May 12. *Sounding*. *Choreography*, Siobhan Davies; *music*, Giacinto Scelsi's *Okanagon*; *designer*, Peter Mumford.

June 21. *Pulau Dewata*. *Choreography*, Richard Alston; *music*, Claude Vivier; *designer*, Antony McDonald.

and

Calm. *Choreography*, Mary Evelyn; *music*, Morton Subotnick's *The Key to Songs*; *designer*, Stephen Buckley.

During the 1988-89 season the company performed on tour at Canterbury, Manchester, Bath, Leicester, Glasgow, Newcastle, Oxford, Birmingham, York, London (Sadler's Wells Theatre), Nottingham, Brighton, Bristol, Southampton and at festivals at Arles, France, and Amsterdam, Netherlands.

LONDON CONTEMPORARY DANCE THEATRE (1967)
The Place, 16 Flaxman Terrace, WC1H 9AT

Productions from the repertoire were *John Somebody* (Newman), *Interlock* (Bhuller), *Smouldering Suit* (Bhuller), *Stand By Your Man* (Collins), *Testament* (formerly *Songs*, *Lamentations* and *Praises*) (Cohan), *Bottom's Dream* (Lunn), *Three Dances for Trois Gnoossiennes* (Bannerman), *Giant Steps* (Bhuller), *And do they do* (Davies), *Forest* (Cohan) and *Troy Game* (North).

The company introduced into its repertoire *Arden Court* (Nov. 23, 1988: *choreography*, Paul Taylor). Other new works included:

Nov. 29, 1988. *Good Morning Monsieur*. *Choreography*, Daniel Larrieu.

April 18. Four new works *choreographed* by Robert Cohan: *Stone Garden*, to Nigel Osborne's music of the same name; *In Memory*, to Hans Werner Henze's *Quattro Fantasie*; *Metamorphoses*, to Britten's *Six Metamorphoses after Ovid*; and *Crescendo*, to David Bedford's *Symphony for 12 Musicians*. The music was performed by the London Sinfonietta.

The company performed on tour at Southampton, Bristol, Plymouth, Cardiff, Liverpool, Coventry, Leeds, London (Sadler's Wells Theatre and Queen Elizabeth Hall), Newcastle, Oxford and Leatherhead. The company performed on tour in Italy in July 1989.

THE SCOTTISH BALLET

261 West Princes Street, Glasgow G4 9EE

Productions from the repertoire included *Giselle* (Petipa and Coralli, recreated by Graeme, 1971) and the shorter works *Carmen* (Darrell), *Three Dances to Japanese Music* (Carter), *Sonata in Time* (Corder) and the children's ballet *Skazka*.

New works included *Prix de Rome* (Oct. 12, 1988: choreography, Lloyd Embleton); *Petrushka* (March 23: choreography, Oleg Vinogradov) given in a Stravinsky double bill with Scottish Opera's produc-

tion of *Oedipus Rex*; and the three-act ballet *Peter Pan*, premiered on Feb. 24: choreography, Graham Lustig; score, Edward McGuire; designer, Margaret Wozniaca. The cast was led by Vincent Hantam (*Peter*).

These productions were performed at the Theatre Royal or the Robin Anderson Studio Theatre, Glasgow, and on tour at Canterbury, Nottingham, Darlington, Stirling, Oxford, Hull, Inverness, Belfast, Edinburgh, Bristol and Aberdeen.

The company also performed at smaller venues in Scotland and Wales in autumn 1988 and August 1989 with programmes including *Sonata in Time*, *Shoals of Herring* (Maldoom) *Homage to Nordi* (McDonald), pas de deux from *The Nutcracker*, *Prix de Rome*, *Vespri* (Prokovsky), *The Prisoners* (Darrell) and *Grand pas des Fiancées* (Carter).

BOOKER PRIZEWINNERS

- 1969 *Something to Answer For*—P. H. Newby (Faber).
- 1970 *The Elected Member*—Bernice Rubens (Eyre & Spottiswoode).
- 1971 *In A Free State*—V. S. Naipaul (Andre Deutsch).
- 1972 *G*—John Berger (Weidenfeld).
- 1973 *The Siege of Krishnapur*—J. G. Farrell (Weidenfeld).
- 1974 *The Conservationist*—Nadine Gordimer (Cape).
- 1975 *Holiday*—Stanley Middleton (Hutchinson).
- 1976 *Heat and Dust*—Ruth Prawer Jhabvala (Murray).
- 1977 *Saville*—David Storey (Cape).
- 1978 *Staying On*—Paul Scott (Heinemann).
- 1979 *The Sea, The Sea*—Iris Murdoch (Chatto & Windus).
- 1980 *Offshore*—Penelope Fitzgerald (Collins).
- 1980 *Rites of Passage*—William Golding (Faber).
- 1981 *Midnight's Children*—Salman Rushdie (Cape).
- 1982 *Schindler's Ark*—Thomas Keneally (Hodder & Stoughton).
- 1983 *Life & Times of Michael K*—J. M. Coetzee (Secker & Warburg).
- 1984 *Hôtel du Lac*—Anita Brookner (Cape).
- 1985 *The Bone People*—Keri Hulme (Hodder & Stoughton).
- 1986 *The Old Devils*—Kingsley Amis (Hutchinson).
- 1987 *Moon Tiger*—Penelope Lively (Deutsch).
- 1988 *Oscar and Lucinda*—Peter Carey (Faber).

The finalists for the 1989 prize are:

The Book of Evidence—John Banville (Secker & Warburg); *Cat's Eye*—Margaret Atwood (Bloomsbury); *A Disaffection*—James Kelman (Secker & Warburg); *Jigsaw*—Sybille Bedford (Hamish Hamilton); *The Remains of the Day*—Kazuo Ishiguro (Faber); *Restoration*—Rose Tremain (Hamish Hamilton).

FILM AND CINEMA, 1988-89

In a year dominated by the hugely successful American 'blockbuster' releases, *Indiana Jones and the Last Crusade* and *Batman*, it was encouraging that the British-made *A Fish Called Wanda* could attract an international audience and take more money at the box office than any other British film. Also encouraging for the film industry was the Government's promise of help for independent cinemas. The Government proposes to end the right of the large cinema chains to screen box office hits for as long as they wish before allowing distribution to smaller cinemas. New legislation will grant exclusive rights to the larger cinema chains for only 28 days, after which the independents will be able to screen popular new releases.

David Puttnam, after his uncomfortable sojourn in Hollywood, re-entered film production in Britain with the relaunch of Enigma Productions. Starting up with a \$50 million fund, the company plans to make at least six films over a period of four years, reinvesting part of the profits to top up the fund. Enigma has backing from Warner Brothers, British Satellite Broadcasting and international financiers, and began by buying three projects from Columbia, Puttnam's former employers.

Brent Walker announced that it wished to help rebuild the British film industry by rescuing the internationally famous Elstree Studios. These were threatened with closure and the sale of the land for property development. Brent Walker, which also owns Goldcrest, the film production company, intend to develop part of the Elstree site and to use the income to help finance the studios.

A further boost to British film production was provided by the new lease of life given to British Screen Finance Ltd. The company was formed in 1986 and receives an annual grant of £1.5 million from the Government. Its purpose is to encourage investment in British films and film-makers, and it has funded 33 films. In 1989, Rank, Cannon, Channel 4 and Granada Television agreed to reinvest until 1991 loans totalling £3 million which had been due for repayment. It was estimated that the decision would help to fund another 10 to 15 British films.

Last Temptation

Martin Scorsese's film, *The Last Temptation of Christ*, aroused controversy and much criticism and opposition, mostly from the Christian churches. Scorsese, a respected film-maker, based the film on a novel by Nikos Kazantzakis. The part of the film that caused most problems concerned Christ being tempted to renounce his divinity on the cross and to accept physical and earthly pleasures: by rejecting them, he affirmed his divinity. The film was not intended to challenge or reject Christian teaching.

At the Venice Film Festival, the Diocese of Venice prayed that 'the city will be spared a useless laceration of its social fabric' by the showing of the film. Despite the controversy, when the film was shown in Britain, the Director of Public Prosecutions decided not to prosecute it for blasphemous libel. Mrs. Mary Whitehouse dropped her plans for a private prosecution, announcing that she would instead lobby local

authorities, asking them to refuse to grant the film a licence. The British Board of Film Classification granted an 18 certificate for the film and decided that no cuts were required. The Director of the Board, James Ferman, said, 'The treatment is in no sense scurrilous or abusive, nor does it hold its subject up to ridicule or contempt. Indeed, the intention is plainly sincere, the atmosphere reverent and the ultimate effect, far from insulting sacred subjects, is to affirm their supreme importance.'

That statement was not enough to reassure those who objected to the film. The Archbishop of Canterbury, Dr. Robert Runcie, said that there were aspects of the film 'which caused great offence and distress ... there was a sensible argument for wishing the film was not shown in this country'. Cardinal Basil Hume advised Christians not to see it. Neither had seen the film. Many who had, felt that the fuss was out of proportion, and not merited by what was a serious study of an undoubtedly sensitive subject. Film critics on the whole recognized the film's honest intent, pointing to its failings on cinematographic grounds: the low budget showed in the production, the film's dialogue was flat and too wordy, and the accents were uncertain. However, there was praise for Willem Dafoe for his portrayal of Jesus. The cast included Barbara Hershey as Mary Magdalene, Harvey Keitel as Judas, and also featured Harry Dean Stanton and David Bowie.

Rain Man

At the 61st annual Academy Awards there were few surprises, with the major awards going to the favourites. *Rain Man* scooped the most prestigious prizes, winning the best picture award, with Dustin Hoffman taking the award for best actor and Barry Levinson for best director. Writers Ronald Bass and Barry Morrow received the award for best original screenplay for their script. *Rain Man* was widely praised for its sensitive and intelligent treatment of the condition of autism.

Tom Cruise played the part of Charlie, who discovers on his father's death that his inheritance has been left to an elder brother he did not know existed. Dustin Hoffman played the elder brother, an autistic savant called Raymond who has a brilliant mathematical brain but is unable to relate to or make eye contact with other people. Charlie kidnaps Raymond from the home where he had been living in an attempt to obtain the inheritance, but is gradually changed and won over by seeing life afresh through his difficult brother. Although some critics felt that Cruise's 'conversion' was a little too glib to be wholly convincing, he nevertheless coped well with what was a difficult role largely overshadowed by Hoffman's performance.

In his acceptance speech, Hoffman thanked 'all the people I talked to that were autistic and their families and their doctors for all their help'. The National Autistic Society was especially grateful that a complex and widely misdiagnosed condition had been treated with sensitivity and had achieved such widespread publicity: the film took over \$100 million at the box office in America. *Rain Man* had taken

nearly ten years to bring to the screen; 'This is a Cinderella story', said Hoffman, 'the picture was almost cancelled three times. But all of life is ■ soap opera.'

Accused

The best actress award was won by Jodie Foster, who was first nominated for an Academy award at the age of 12 for her role in *Taxi Driver*. In *The Accused*, she played the victim of ■ brutal gang rape. The film powerfully challenged male attitudes to women and to rape, affirming through Foster's performance (with strong support from Kelly McGillis ■ ■ prosecuting lawyer) that no-one deserved such treatment, however unsympathetic ■ character or whatever the supposed provocation.

Dangerous Liaisons was nominated for seven awards and won three. The film was based on Christopher Hampton's successful stage adaptation of the epistolary novel by Choderlos de Laclos about games of sexual intrigue. Hampton won the award for the best screenplay adapted from another medium, while James Acheson won the award for best costume design and Stuart Craig and Gerard James for best art direction. *Mississippi Burning* also received seven nominations but picked up only the prize for best cinematography for Peter Biziou. This powerful drama was inspired by the murder of three young civil rights activists in the American South in 1964, and the subsequent F.B.I. investigation which led to the arrest and conviction of the killers. Directed by Alan Parker, the film featured an especially fine performance from Gene Hackman (nominated for best actor) as an F.B.I. investigator, with Willem Dafoe ■ his partner.

Danish Winner

For the second year running the Oscar for best foreign film was won by a Danish film. *Pelle the Conqueror*, directed by Bille August, was a beautifully made film about the problems of migrant workers leaving ■ life of poverty in Sweden to find work on the wealthy Danish island of Bornholm. It featured Pelle Hvenegaard as the nine-year-old Pelle of the title, triumphing over adversity, with Max von Sydow (nominated for best actor) as his weak but loving father. The story was adapted from the first volume of a four-part work by the Danish Nobel prize-winning author Martin Andersen Heje. The unsuccessful nominees for Oscars included Sir Alec Guinness for his role in *Little Dorrit*, John Cleese for his screenplay for *A Fish Called Wanda* and Bob Hoskins in *Who Framed Roger Rabbit*. Particularly unfortunate was Sigourney Weaver, who was nominated as best actress for her role in *Gorillas in the Mist* and as best supporting actress for *Working Girl*, but won neither - the first time a double nominee has not picked up at least the lesser award.

Other Oscar winners were: best supporting actor, Kevin Kline (*A Fish Called Wanda*); best supporting actress, Geena Davis (*The Accidental Tourist*); best documentary feature, Marcel Ophuls (*Hotel Terminus: The Life and Times of Klaus Barbie*); William Guttentag and Malcolm Clarke (*You Don't Have to Die*) short documentary; film editing, Arthur Schmidt (*Who Framed Roger Rabbit*); make-up, Ve

Neill, Steve LaPorte and Robert Short (*Beetlejuice*); original score, Dave Grusin (*The Milagro Beanfield War*); original song, Carly Simon ('Let the River Run'—*Working Girl*); animated short film, John Lasseter and William Reeves (*Tin Toy*); live action short film, Dean Parisot and Steven Wright (*The Appointment of Dennis Jennings*); sound, Les Freescholtz, Dick Alexander, Vern Poore and Willie Burton (*Bird*); sound effects editing, Charles Campbell and Louis Edelmann (*Who Framed Roger Rabbit*); visual effects, Ken Ralston, Richard Williams, Edward Jones and George Gibbs (*Who Framed Roger Rabbit*). Honorary Oscars were awarded to the National Film Board of Canada and to Eastman Kodak; ■ special achievement award was given to Richard Williams for animation direction, including *Who Framed Roger Rabbit*; and an award of merit went to Ray Dolby and Joan Allen, sound engineers.

British Awards

At the British Academy of Film and Television Awards, the Michael Balcon Award for Outstanding Contribution to British Cinema was presented to Charles Crichton, veteran director of such British classics ■ *The Lavender Hill Mob*. Crichton had not made ■ film since 1965 until he was brought back by John Cleese to direct *A Fish Called Wanda*. John Cleese was named best actor for his portrayal in the film of a barrister mixed up with ■ gang of jewel thieves. Tightly scripted and with disciplined direction, Cleese's film was fast and funny, and deserved its international success. The cast included Jamie Lee Curtis, Kevin Kline, Maria Aitken and Michael Palin, who won the award for best actor in a supporting role.

The BAFTA award for best film went to *The Last Emperor*, directed by Bernardo Bertolucci. This told the remarkable story of the last emperor of China, Pu Yi, who acceded to the throne at the age of three and was deposed when the revolution of 1949 made him an anachronism in his own land. Produced by Jeremy Thomas, *The Last Emperor* won nine Oscars in last year's ceremony. Maggie Smith was voted best actress for her performance in *The Lonely Passion of Judith Hearne*. Directed by Jack Clayton from ■ novel by Brian Moore, the film also featured Wendy Hiller, Bob Hoskins and Ian McNeice. Louis Malle was judged best director for *Au Revoir Les Enfants*, which he wrote, directed and produced. The film is based on an event that he said was central to his life when he was aged 11. The personal and moving story is set in occupied France in 1944, and tells the story of ■ boy who joins a school, is eventually discovered to be Jewish and is arrested by the Gestapo. Malle's first film in France for ten years, *Au Revoir Les Enfants* featured Gaspard Manesse and Raphael Fejto.

Best supporting actress was won by Judi Dench (*A Handful of Dust*); original screenplay, Shawn Slovo (*A World Apart*); adapted screenplay, Jean-Claude Carriere and Philip Kaufman (*The Unbearable Lightness of Being*); score, John Williams, (*Empire of the Sun*); foreign film, Just Betzer, Bo Christensen and Gabriel Axel (*Babette's Feast*); short film, *Defence Counsel Sedov* (USSR). A BAFTA Fellowship was awarded to Sir Alec Guinness.

Restored

The latest cinematic masterpiece to be restored to its full glory is David Lean's classic *Lawrence of Arabia*. At its world premiere in 1962 the film ran for 222 minutes but within a few months about 20 minutes had been removed. Further cuts were made later so that the film distributed on general release differed substantially from the print first screened. An archivist producer, Robert A. Harris, who had been involved in the restoration of Abel Gance's *Napoleon*, set about tracing the missing footage. After much research, which involved using lipreaders to identify dialogue from some sections of film for which both soundtrack and script had been lost and then re-recording the lines using the original actors, a complete print was assembled. David Lean became involved at this point and produced a final version edited to his satisfaction. The film now runs for 216 minutes, Lean having removed some six minutes to produce a final director's cut, a stage which time had prevented when the film was first released. The project cost \$600,000 in total, which was more than recouped on a limited release in the U.S.A. Furthermore, a new generation now has the opportunity to see a true classic of the cinema in 70 mm, as its director had intended it should be shown.

Numbers

Peter Greenaway's film, *Drowning by Numbers*, was another intriguing and wholly idiosyncratic film from a highly original director. Set in Suffolk, it featured Joely Richardson, Juliet Stevenson and Joan Plowright. Each played a character called Cissie Colpitts; each Cissie Colpitts kills her husband, and throughout the film the numbers 1 to 100 are spoken or depicted in various ways. Greenaway said the film affords 'an opportunity to play games in an idyllic English landscape... a film about the confederacy, the solidarity—even the "conspiracy" of women'.

Terry Gilliam, whose last film, *Brazil*, won critical approval but involved him in highly publicized disputes with the studio, made news again with *The Adventures of Baron Munchausen*. Scripted by Gilliam with Charles McKeown, this story of the German soldier who told fantastic yarns was reported to have been budgeted at \$23.5 million, but to have cost \$40 million or more. Dogged by financial problems throughout its production, it is surprising that the film was ever completed and released. *Munchausen* featured John Neville as the Baron, supported by Robin Williams (who was not credited in the film), Oliver Reed, Jonathan Pryce and Bill Paterson. Although visually splendid and intermittently entertaining, the film was considered extravagant and self-indulgent.

My Left Foot was a remarkable film, which told the life story of the Irish writer Christy Brown. Crippled by cerebral palsy, Brown learned to paint and type with his left foot, the only part of his body which he could control; he achieved fame for his struggle against adversity and for his skills as a writer. Daniel Day-Lewis was widely praised for his portrayal of Christy, which was moving without resorting to

sentimentality. Directed by Jim Sheridan, the cast also included Hugh O'Conor as Christy Brown when young, and Ray McAnally and Brenda Fricker ■ Brown's parents.

Buster featured a strong cast in a weakly plotted and somewhat anodyne treatment of the life of one of the Great Train Robbers. The film aroused much controversy: the Prince and Princess of Wales cancelled their attendance at a charity premiere in aid of the Prince's Trust after press criticism that their presence would imply support for a film that appeared to glorify crime and violence. Directed by David Green, the film featured singer and actor Phil Collins ■ Ronald 'Buster' Edwards and Julie Walters as his wife June.

Scandal

One of the great British *causes célèbres* of the twentieth century, the Profumo affair of 1963, was recreated in *Scandal*. Written by Michael Thomas, the story was originally intended for television but the B.B.C. withdrew its backing. The film was criticized in some quarters for reviving a sorry saga that some people would rather have forgotten. It also attracted criticism of its historical accuracy in its attempt to prove that Stephen Ward was the victim of an establishment conspiracy, but otherwise was generally well received. Directed by Michael Caton-Jones, it featured Ian McKellen ■ John Profumo, the War Minister who was forced to resign for lying to the House of Commons, John Hurt ■ Stephen Ward, and Joanne Whalley as Christine Keeler.

Distant Voices, Still Lives, written and directed by Terence Davies, was a highly original work that achieved international recognition for its depressing but richly evocative study of family life in Liverpool. Featuring Freda Downie, Angela Walsh and Pete Postlethwaite, *Distant Voices, Still Lives* picked up a clutch of awards, including the Golden Leopard at Locarno, the Critics' Prize at Toronto, and the International Critics' Prize at Cannes.

Paris by Night by David Hare was an attack on Thatcherite Britain. It featured Charlotte Rampling as a Conservative Member of the European Parliament mixed up in scandal and intrigue. Timothy Dalton reappeared in another James Bond film, *Licence to Kill*. Directed by John Glen, this glossy, violent but insubstantial adventure suggested that the series had run beyond its natural life. Mike Leigh's *High Hopes* showed that the master of the improvised work, most of which has been seen on television, had lost none of his skill in working with a group of actors to produce worthwhile drama. The film was richly comic in its view of modern Britain, though occasionally tending towards caricature. It featured Philip Davies, Edna Doré, Heather Tobias and Ruth Sheen.

Pascal's Island was adapted and directed by James Dearden from a novel by Barry Unsworth which is set on an Aegean island in 1908 towards the end of Ottoman rule. The cast included Charles Dance, Ben Kingsley and Helen Mirren. *The Dressmaker* was adapted by John McGrath from Beryl Bainbridge's novel. Directed by Jim O'Brien, it featured Joan Plowright, Billie Whitelaw and Jane Horrocks.

Batmania

The film *Batman* was released fifty years after the creation of the comic-book character. Filmed on the biggest set ever created at Pinewood studios, at a cost of some \$35 million, the film takes itself much more seriously than the 1960s television series. Furst's design for the five-block set of Gotham City effectively conveyed ■ mood of gloom and evil. However, many critics felt that the film suffered from a weak script and poor direction, while Jack Nicholson's extravagant performance as The Joker seemed totally at odds with Michael Keaton's Batman in style and mood. A massive, carefully orchestrated pre-publicity campaign made *Batman* ■ huge commercial success, taking \$57 million in its first six days after release in the U.S.A.

Steven Spielberg's third film in the Indiana Jones series, *Indiana Jones and the Last Crusade*, trod familiar ground with ■ tale of an archaeologist seeking a mythical artefact, opposed by evil Nazis. Nevertheless, Spielberg proved once again that there is still a market for well-made adventure films. Harrison Ford repeated his role as Indiana Jones, with Sean Connery appearing as his father, who vanishes while searching for the Holy Grail. Produced by George Lucas, it also featured Denholm Elliott and Alison Doody.

Clint Eastwood directed *Bird*, an impressive study of the jazz genius Charlie Parker, who died at the age of 34, wrecked by drink and drugs. This dark and brooding film concentrated on Parker's last few years, and worked mainly through flashback to give a vivid impression of the life of the great saxophonist, played by Forest Whitaker. Overall, the film was dominated by his music, which had been remixed from original recordings.

Animal Magic

Who Framed Roger Rabbit was ■ triumph of reality and animation, a brilliant interweaving of cartoon characters with photography that deservedly won Oscars for Richard Williams, director of animation, and the technical team. The film featured Bob Hoskins as a private detective, with Stubby Kaye, Kathleen Turner and Christopher Lloyd providing the voices for some of the sixty years' worth of cartoon characters in ■ pastiche of 1940s Hollywood. Directed by Robert Zemeckis, it was produced by Steven Spielberg in association with Walt Disney studios.

Melanie Griffith was acclaimed for her role in *Working Girl*, in which she played an office typist in New York who proves herself as capable ■ stock broker as her boss during the latter's temporary absence from the office. With a script by Kevin Wade, and directed by Mike Nichols, *Working Girl* also featured Sigourney Weaver and Harrison Ford. In *Big*, Tom Hanks played a 12-year-old boy who suddenly finds himself inhabiting the body of a 35-year-old. Hanks carried off the difficult task of appearing convincing in such a role reversal with great success; the film was directed by Penny Marshall. *Twins* featured the huge Arnold Schwarzenegger and the diminutive Danny de Vito ■ twin

brothers created as the result of a genetic experiment. Directed by Ivan Reitman, from a script by Timothy Harris and Herschel Weingrod, this amusing idea worked well and was highly entertaining.

Less successful was Neil Jordan's *High Spirits*, a rather weak story about an Irish landowner, played by Peter O'Toole, who attracts guests to his decrepit castle by advertising that it is haunted. When the guests discover his trick, real ghosts appear, in ■ unhappy blend of farce and pathos. The cast also included Darryl Hannah and Ray McAnally. John Schlesinger directed *Madama Sousatzka* from a script by Ruth Prawer Jhabvala based on a novel by Bernice Reubens about an émigrée piano teacher. Shirley MacLaine was excellent in the leading role, with good support from Navin Chowdhry, Twiggy, Leigh Lawson and Peggy Ashcroft. *The Accidental Tourist* was directed by Lawrence Kasdan from Anne Tyler's novel, and starred William Hurt, Kathleen Turner and Geena Davies. In *Good Morning Vietnam*, Robin Williams played Adrian Cronauer, ■ disc jockey in Vietnam in 1965 whose irreverent approach was popular with the troops but upset the army bureaucracy. It was directed by Barry Levinson. *Betrayed* was directed by Costi Costa-Gavras from a script by Joe Eszterhas. It featured Debra Winger as an undercover F.B.I. agent investigating ■ murder.

Gorillas in the Mist was both a critical and popular success. It told the story of Dian Fossey, played by Sigourney Weaver, who dedicated her life for twenty years to the study of the mountain gorillas in Rwanda. She saved the species from extinction but was murdered in 1985. Directed by Michael Apted, the film cost \$27 million; its success was largely due to the efforts of Weaver, who worked hard to build up a rapport with the gorillas in the film. Where it was not possible to use live animals, make-up expert Rick Baker provided some very convincing fakes. Although she failed to win an Oscar, Sigourney Weaver received ■ Golden Globe award for her performance in *Gorillas in the Mist* (shared with Jodie Foster for *The Accused*), and also received the best supporting actress award for *Working Girl*.

Fred Schepisi's *A Cry in the Dark* was based on the story of Lindy and Michael Chamberlain of Australia, whose nine-week old daughter Azaria was killed by a dingo (wild dog) while they were visiting Ayers Rock. The couple were tried and convicted for her murder in a case which made headline news throughout the world; it was only recently that they were finally believed and exonerated. Meryl Streep gave ■ typically powerful performance as Lindy, with Sam Neill as her husband Michael.

Festivals

At the 45th Venice Film Festival, the Golden Lion was awarded to *The Legend of the Holy Drunkard*, directed by Ermanno Olmi of Italy. The Silver Lion went to *Landscape in the Clouds*, directed by Theo Angelopoulos of Greece, who also won the award for best director. The Special Prize of the Jury was awarded to *The Camp at Thiaroye*, a Senegalese film made by Sembene and Sow. Don Ameche was voted best actor for his role in *Things Change* (U.S.A.).

while Isabelle Huppert was joint best actress for *Une Affaire de Femmes* (France), with Shirley MacLaine for *Madame Sousatzka* (U.K.).

At the 39th Berlin Film Festival, Barry Levinson's *Rain Man* won the Golden Bear for best film and Dustin Hoffman received a special award for his acting. Gene Hackman was voted best actor for *Mississippi Burning*. Best director was Dusan Hanah for *I Love, You Love* (Czechoslovakia), and Isabelle Adjani won the best actress award for *Camille Claudel*.

At the 42nd Cannes Film Festival, which was notable for the fact that none of the eight British

films submitted were accepted for competition, the Palme d'Or was won by Steven Soderbergh (U.S.A.) for *Sex, Lies and Videotape*. The Grand Prix of the Jury went to *Jesus of Montreal* (Canada), directed by Denys Arcand, and the Special Jury Prize to *Nuovo Cinema Paradiso* (Italy), directed by Giuseppe Tornatore, and *Trop Belle pour Toi* (France), directed by Bertrand Blier. Best actor was James Spader for *Sex, Lies and Videotape*, and best actress Meryl Streep for *A Cry in the Dark*.

At Locarno, the main award was won by the South Korean film, *Why has Bodhi-Dharma left for the Orient?*, directed by Yung-Kyun Bae.

THE ACADEMY AWARDS 1988

Best Picture.—*Rain Man*.

Best Director.—Barry Levinson, *Rain Man*.

Best Actor.—Dustin Hoffman, *Rain Man*.

Best Actress.—Jodie Foster, *The Accused*.

Best Supporting Actor.—Kevin Kline, *A Fish Called Wanda*.

Best Supporting Actress.—Geena Davis, *The Accidental Tourist*.

Best Original Screenplay.—Ronald Bass and Barry Morrow, *Rain Man*.

Best Adapted Screenplay.—Christopher Hampton, *Dangerous Liaisons*.

Best Foreign Language.—*Pelle the Conqueror*, Denmark.

Best Original Score.—Dave Grusin, *The Milagro Beanfield War*.

Best Original Song.—Carly Simon, 'Let the River Run', *Working Girl*.

Best Cinematography.—Peter Biziou, *Mississippi Burning*.

Best Art Direction.—Stuart Craig and Gerard James, *Dangerous Liaisons*.

Best Costume Design.—James Acheson, *Dangerous Liaisons*.

Best Film Editing.—Arthur Schmidt, *Who Framed Roger Rabbit*.

Best Sound.—Les Frescholtz, Dick Alexander, Vern Poore and Willie Burton, *Bird*.

Best Sound Effects Editing.—Charles Campbell and Louis Edemann, *Who Framed Roger Rabbit*.

Best Visual Effects.—Ken Ralston, Richard Williams, Edward Jones and George Gibbs, *Who Framed Roger Rabbit*.

Best Make-up.—Ve Neill, Steve LaPorte and Robert Short, *Beetlejuice*.

Best Animated Short.—John Lasseter and William Reeves, *Tin Toy*.

Best Short Documentary.—William Guttentag and Malcolm Clarke, *You Don't Have to Die*.

Best Documentary Feature.—Marcel Ophuls, *Hotel Terminus: The Life and Times of Klaus Barbie*.

Best Live Action Short.—Dean Parisot and Steven Wright, *The Appointment of Dennis Jennings*.

TELEVISION, 1988-89

The Government's long-awaited White Paper on broadcasting (for summary, see pp. 1089-91) was published in November 1988. It proposed a radical reform of the whole structure of broadcasting in Britain, moving away from the present highly regulated system to more liberal regulation, particularly of independent television. 'We aim to ensure that viewers and listeners have greater freedom of choice from a more varied output of programmes, including programmes of high quality', the Home Secretary (Douglas Hurd) told the House of Commons. 'British television has a deservedly high reputation in the world. We expect to see that reputation grow.'

The BBC was largely unaffected by the Government's proposals for the future of broadcasting. The Corporation was acknowledged to be 'for the foreseeable future, the cornerstone of British broadcasting'. However, 'the Government looks forward to the eventual replacement of the licensing fee ... (it) intends to encourage the progressive introduction of subscription on the BBC's television services.' It was also proposed that after 1991 licence fees would be increased by less than the rate of inflation, to hasten this process.

A suggestion that the BBC would lose the night hours from one of its channels for franchising by the body which would replace the IBA, the Independent Television Commission (ITC), was deemed 'surprising' by the BBC's director general Michael Checkland. He said that the BBC was best placed to make maximum use of its night-time hours. In a Commons debate on broadcasting in May 1989, Home Office Minister Timothy Renton said that the Government had agreed in principle to the BBC launching a late-night subscription service for business which would last an hour and be supported by advertising.

Response to White Paper

The Home Office received over 2,300 submissions in response to the White Paper. The most contentious issue proved to be the proposal that the present ITV franchises on what would be renamed Channel 3, and the franchises on a new terrestrial Channel 5, should go to the highest bidder provided that applicants meet strict quality requirements for programmes. The ITV companies said in the combined response: 'The single most important issue is competitive tendering, and if the methods proposed were not to be revised, great damage would be done to the quality and range of programmes in regional Channel 3.' They proposed safeguard options when the current franchises expired in 1992: value for money in terms of public service should be the crucial factor, not the highest bid, they suggested.

In the 1988 Robert Fraser Lecture, Lord Thomson of Monifieth, outgoing Chairman of the IBA, made a swinging attack on the White Paper. He said that the Government's plans for ITV amounted to 'an act of wanton destruction, carried out for doctrinaire reasons'. He also criticized the removal of much of the public service role that the ITV companies had performed in response to the present requirement that they should provide adult education and reli-

gious programmes, and the removal of the 'national spine' of network programming. He warned that the BBC would become a 'cultural ghetto' if subscription television was introduced, and that 'near anarchy' would result in the 1990s if the changes proposed in the White Paper were implemented.

The IBA opposed the system of awarding franchises that the Independent Television Commission would be expected to operate. Under this companies would have to pass a minimum quality hurdle before entering an auction at which the franchise would be awarded to the highest bidder. The IBA suggested that instead of the proposed system, companies should submit confidential tenders and public programme plans. The tenders would be judged on the money tendered and the company's suitability to run a television station, with its programme plans being taken into account also. The IBA proposal would not oblige the ITC to accept the highest bid if it was not satisfied with other aspects of a company's proposals.

In June the Government said that the ITC would be given reserve powers to veto the award of a franchise to the highest bidder if it did not offer the best choice to viewers. In normal circumstances, however, the ITC would be expected to accept the highest bid. The quality hurdle would be strengthened, with applicants being required 'to provide a reasonable proportion of programmes (in addition to news and current affairs) of high quality, and to provide a diverse programme service calculated to appeal to a wide variety of tastes and interests'. If applicants failed to satisfy the ITC that they could meet this requirement, their bids would not be considered. The Home Secretary would be able to veto a bid if its funding came from a source which was considered undesirable taking into account the public interest. Companies would also be required to post substantial performance bonds, which they would risk forfeiting if they failed to provide programmes of the necessary quality and diversity.

Objections

Condemnation of the White Paper's proposals came from several other quarters. The TUC said that the White Paper represented a lost opportunity for cable and satellite services and failed to put viewers first. The British Medical Association was concerned that the proposals could open the floodgates to sponsorship by tobacco companies and that health education programmes might be dropped. The Association of Cinematograph, Television and Allied Technicians said that the White Paper needed fundamental reconsideration; 'opportunities provided by new technology and the new media should be used to enhance our existing broadcasting system and not to undermine it'. The Social Democratic Party's response was one of the few to favour the franchise auction, but believed an under-bidder should be able to win if it offered a better public service. The Peacock Committee, which in its report on public service broadcasting in 1986 had recommended competitive tendering for franchises on such a basis, rejected the auction proposal in the White

Paper. It was also concerned that any premature reduction in the licence fee would be damaging to the BBC. The Consumers' Association felt that the franchise auction would lead to less choice in programmes and an increase in soap operas and game shows. They agreed with Sir Richard Attenborough, chairman of Channel 4, who warned of the dangers of 'market-place' economics, which the Association felt were an 'entirely inadequate guarantee' of consumers' interests.

A Labour Party document on the future of broadcasting called for new regulations to uphold standards and to control ownership of franchises; 'awarding television contracts to the highest bidder is certain to reduce standards'. It said the White Paper proposals offered less variety and would encourage cheap imports at the expense of home-grown quality programmes. The BBC should be funded by an inflation-linked licence fee, and the Broadcasting Standards Council was 'wholly unnecessary' and should be scrapped. The Labour Party was also concerned about the overlapping of newspaper and television interests. The Home Secretary said that the Government would take reserve powers to control media ownership and cross-holding between newspaper and broadcasting companies; restrictions would be written into the Broadcasting Bill to prevent 'unhealthy' cross-media ownership.

The Government intends to introduce a Broadcasting Bill in autumn 1989, and has given no indication of being prepared to amend its main proposals.

Broadcasting Standards Council

The Broadcasting Standards Council was set up in 1988 by the Government because of concern about offensive sex and violence on television. It operates at present on a non-statutory basis but its powers are to be enshrined in the Broadcasting Bill. Lord Rees-Mogg was appointed chairman, and the Council held its first meeting in September 1988. It began work on a code designed to keep unacceptable scenes of sex and violence off television, and to establish standards of taste and decency. Lord Rees-Mogg held talks with the BBC, IBA, the Cable Authority and other parties with satellite and cable interests, such as Rupert Murdoch and Robert Maxwell.

The Council issued a draft code in February and published revised guidelines in August. It said that these should apply to satellite stations as well as the BBC and ITV; British Satellite Broadcasting and Sky Television had argued for more relaxed guidelines for their planned subscription film channels. The Council said 'a single set of standards is more readily comprehensible to the audience... The mere fact of payment by direct subscription for material which would not usually be transmitted on non-subscription services does not eliminate the need for careful editorial judgments of its suitability for transmission... the relative exclusivity of subscription services does not relieve them of any obligations towards the social consequences of what they carry.'

The BBC published for the first time a comprehensive set of guidelines for programme-makers. It covered 125 subjects in 25 chapters, such as straight dealing in production, sensitivity to others, privacy,

the scheduling of warnings about programme content, violence, bad language, sexual portrayal, and treatment of animals. An IBA survey of public attitudes to television in 1988 found that viewers considered that television screened less offensive programmes than before — far as sex, violence and bad language were concerned.

The BBC

The BBC continued its policy of *glasnost* with a second magazine entitled *See for Yourself*, reviewing 1988. The chairman, Marmaduke Hussey, wrote: 'We believe that you, who provide all the money for our programmes, should have the chance to learn how we spend it and about our plans for the future. That is why we are continuing the dialogue between the BBC and the public again this year through TV and radio programmes and through this new edition of *See for Yourself*.' Referring to the birth of satellite television, he said, 'I believe that we are in good shape to face the challenge of this new broadcasting climate. We are confident that the BBC will remain the standard setter by which other channels will be judged and that you will be able to enjoy, once again in 1989, entertaining, wide-ranging, invigorating and challenging programmes.'

The director general, Michael Checkland, wrote in the review, 'In 1988 the BBC has been building decisively and swiftly on the previous year's structural and management changes. As a result, we are a more streamlined and better-managed organization. This was recognized in the Government's White Paper in November which outlined the role the BBC must continue to play — the provider of high-quality programmes across the full range of public tastes and interests... The popular base of so many of our programmes allows educational and information programmes to be nourished. Whatever our competitors may feel tempted to trim because of commercial pressures, the BBC will always have particular responsibilities in the area of education and patronage of the arts. But, by the same token, the BBC must never be driven into a single corner of the marketplace to concentrate exclusively on cultural and information programmes, leaving entertainment to others.'

In its Annual Report, published in November 1988, Mr. Hussey said that the BBC would 'admit our mistakes when we make them. You cannot put out 15,000 hours of television and 200,000 hours of radio a year without the occasional mistake'. In particular, the BBC admitted that it 'took no great pride' in *Airbase*, the controversial play about U.S. servicemen based in Britain, which had been widely criticized. The report was also critical of two inaccurate opinion polls taken during the last general election.

Mr. Checkland said that the BBC was now much more efficient after its reorganization, and that an extra £30 million had been moved to programme-making from other areas. 'Good housekeeping is possible in broadcasting: the BBC steps into the new marketplace well prepared.'

The television licence fee, now index-linked, rose to £66 for colour and £22 for black and white. To make payment easier, it was announced that from

September 1989 an optional quarterly payment facility would be introduced.

During the year, the BBC suffered a long pay dispute which caused the disruption of live transmissions. The broadcasting unions were seeking a 16 per cent pay rise, against the BBC's 'final' offer of 7 per cent. Much bad feeling was caused by large pay rises and perks that managers had received. The BBC's protestations that no more money was available seemed less convincing to the unions after the well-publicised offer in June of a reported £500,000 over three years to Peter Sissons, which brought him to the BBC from Channel 4.

BSB match

Mr. Checkland's assertion that the BBC was 'keen to work alongside the new TV channels as a programme provider' was put into practice in deals with British Satellite Broadcasting. While ITV arranged a controversial and extremely costly contract for exclusive showing of league football, the BBC and BSB agreed a £30 million deal with the Football Association to show F.A. Cup matches and England home international matches for a five-year term. BSB will screen a live match from each round from September up to and including the sixth round on Saturdays, with live mid-week replays. The BBC will show edited highlights on Saturdays, plus a live match from the third to sixth rounds on Sundays. For this the BBC will contribute £12 million. The two companies will also have 'exclusive access' to the best of foreign football.

One consequence of this arrangement was that ITV decided not to televise the F.A. Cup Final in 1989 although it was still entitled to do so. The duplication of televising major sporting events live on both main channels has long been a cause of annoyance to viewers. ITV now announced, 'We do not feel that the duplication is in the best interests of the viewer'.

The BBC revamped its *Nine O'Clock News* programme in October 1988. After three years with two presenters, it reverted to one anchorman in charge of an extended, 30-minute programme. The controversial programme in the *Secret Society* series, *The Zircon Affair* was finally broadcast in an edited form. It had been shelved for 20 months because of claims that transmission would pose a threat to national security. However, a *Panorama* programme on the role of the SAS in Northern Ireland was withdrawn on the orders of deputy director general, John Birt, even though it had been through the internal vetting procedure. It was reported that Mr. Birt was concerned because the programme failed to examine a proposal that the SAS should be publicly accountable.

Other controversial programmes were broadcast, however. These included *Elephant*, made by BBC Northern Ireland. A relentless catalogue of violent killings, it had been postponed from the previous year because of increasing sectarian violence. Before its screening, viewers were warned that it was a 'chilling and vivid comment on the pitiless sectarian killings'. *The Blasphemer's Banquet*, shown in the *Byline* series on BBC1, was a verse discourse by Tony Harrison on religious intolerance. The programme

was inspired by the death threat to Salman Rushdie because of his novel *The Satanic Verses*. The Archbishop of Canterbury, Dr. Robert Runcie, requested, unsuccessfully, that the programme should not be screened as it might offend the Muslim community.

Independent Television

The independent television companies, with the White Paper posing a threat to their existence after 1992, launched a corporate advertising campaign in the press in March. However, while they were attempting to present a united front and to defend the status quo, it became clear that the federal system would not survive long if the Government's proposals became law. In future, the companies will be able to bid for each other's franchises, and George Russell, the new chairman of the IBA, expressed the fear that boardroom battles and franchise bidding could distract attention from programme-making. Furthermore, a company that knew it had lost its franchise would have no incentive to continue making programmes, and if one of the main five programme-making companies lost its franchise, this could have a serious effect on ITV's national scheduling of programmes. Several of the companies have interests in satellite television, and the prospect of switching to that medium if franchises were lost was also being openly considered.

Thames Television showed a pioneering spirit in arranging to transmit some of its most popular programmes on Soviet television for a week in April. It was reported that the advertisements were very popular with Channel Gosteleradio's estimated audience of 150 million, who would gladly have watched more than six minutes an hour of promotions for products which were not available in the USSR. However, programmes such as *The Bill* and *Minder* were said to have caused Soviet viewers some confusion.

The row continued over Thames Television's *This Week* programme *Death on the Rock*, about the shooting of three IRA terrorists in Gibraltar by the SAS in March 1988. In October 1988, Thames commissioned a report into the making of the programme. A three-month investigation was carried out by Lord Windlesham, a former Conservative Minister, and Richard Rampton, Q.C. The purpose of the inquiry was to attempt to resolve discrepancies between statements made in the film and statements made at the inquest, and to investigate the circumstances leading to the production and broadcasting of the film.

Windlesham Report

The 145-page Windlesham report accepted that the programme was basically fair and proper; however, 'the paradox is that while taken overall the programme fulfilled the requirements of a complex regulatory system, its transmission outraged a section of the population at large as well as provoking bitter criticism in Parliament and the press... The programme was trenchant and avoided triviality... we accept that those who made it were acting in good faith and without ulterior motives. Yet we have

found that the effect of the programme went beyond its stated intention of laying before the viewers certain evidence giving rise to questions that deserved to be examined by an authoritative tribunal such as a judicial inquiry... While the public mood is notoriously difficult to interpret there are sufficient indications that *Death on the Rock* was out of step with a substantial body of national opinion.'

The report failed to appease government critics of the programme. In the House of Lords, Lord Trefgarne, Minister of State for Defence Procurement, said the programme had cast a slur on the reputation of the security services. He claimed that the report was as flawed as the programme as the report had given Thames Television a clean bill of health. 'The Government profoundly disagrees with this conclusion, but I wish to emphasize that neither I nor any member of the Government would wish to cast the slightest aspersion on Lord Windlesham's integrity or that of his colleague, Mr. Rampton.' He said that the report's finding that the programme did not conclude that the terrorists had been unlawfully killed, was insupportable. In response, Lord Windlesham rebuked the Prime Minister and the Foreign Secretary for their 'almost contemptuous dismissal' of his report; he refused a fee for his work from Thames, saying that his 'independence and integrity have been questioned'.

In February, the ITV companies announced that they would end national agreements with the broadcasting unions from July. In future, pay and conditions will be agreed at local level. In May, it was announced that repeats on ITV had been reduced by half, to 9 per cent of programme output, in an attempt to attract viewers.

ITV's much-heralded new football programme, *The Match*, was intended to be 'live, pacey and popular', but failed initially to have an impact on viewers. An audience of eight million had been hoped for, but only six million watched the opening programmes: *The Match* appeared to be an expensive investment. The deal cost £44 million over four years, and entitles ITV to screen 21 live matches a season on Sundays; at half-time, a catalogue of the previous day's first division goals is screened. There was also concern that football clubs had sacrificed their independence, as ITV is able to reschedule matches to suit programming requirements and to alter kick-off times.

TV-am, having survived its dispute with the ACTT, announced a 56 per cent increase in profits for the half-year in September 1988. Viewing figures were up by 1 million to 14.8 million a week. However, the company was told by the IBA to improve its standards or risk losing its franchise. In response, it announced that it would increase its budget for children's programmes, and would stop importing repeats of American series such as *Batman* and *Happy Days*. It also intends to increase the educational and regional content of programmes for the young. In November the IBA said that TV-am had made 'significant improvement' in the main areas of complaint, and the ACTT dropped its demand for a judicial review of TV-am's fulfilment of its programming obligations. In September 1989, redundancy payments were agreed for the ACTT members who had been dismissed.

Channel 4 launched a new breakfast show in April, for which TV-am sells the advertising. The programme was targeted at young working people who might be expected to watch for short periods during the extra three and a half hours a day of transmission. Accordingly, the programme was arranged in 15-minute segments, featuring headline news, weather, travel reports, arts and entertainment, and 15 minutes of world news from ITN's international bureaux.

Satellite Services

Following the successful launch of the Ariane rocket which placed the Sky satellite in orbit, the new Sky television station began broadcasting at 6 pm on February 5, 1989. Rupert Murdoch, chief executive of News International, the owners of Sky, said that 'Sky Television will bring competition, choice and quality to British Television. The monopoly is broken. With the four channels we have launched today and the two more that we will start later this year, television in Britain will begin to deliver the diversity it has lacked.' In its opening message the station heralded, 'the dawn of television's new age and the most dramatic innovation in broadcasting since the launch of commercial television in Britain more than three decades ago'.

Sky began with four channels: Sky Channel, which features game shows, including revivals of ITV shows such as *The Sale of the Century* and *The Price is Right*, a magazine programme with Tony Blackburn and Jenny Hanley, an evening chat show hosted by Derek Jameson, American imports and repeats such as *The Lucy Show*, a music programme and business reports. Sky News consists of half-hourly news bulletins provided by the television news agency Visnews (jointly owned by Reuters, the BBC and the American-based NBC). It also features a current affairs programme called *Target*, which is co-presented by the former Conservative Minister Norman Tebbit and the Labour M.P. Austin Mitchell. When Mr. Mitchell's involvement with Sky was announced, he was sacked as Labour's spokesman for trade and industry by the Labour Party leader Neil Kinnock. Mr. Kinnock said that the job with Sky was inappropriate to his status, and to the Shadow Cabinet concept of collective responsibility. The Sky Films Channel features movies 12 to 18 months after their cinema release, plus older films. The fourth channel, Eurosport, shows a wide range of sports, including some ignored by the terrestrial channels. Sky originally intended to offer the Disney Channel but the Disney Corporation withdrew. Although Sky issued a writ for \$1.5 billion in damages, the case was later dropped.

■ H postponed

Sky had predicted sales of 1 million satellite dishes in 1989, but with a significant decline in retail sales, this estimate had to be revised downwards. The other satellite station, British Satellite Broadcasting, predicted that three million homes would receive its programmes by 1991. However, an independent survey predicted that only 1.6 million to 2.2 million

homes in total would be receiving satellite transmissions by 1991, 45 per cent via a satellite dish and the rest through cable services. Sky gained a significant early advantage over BSB with a well-publicized and trouble-free launch. An early coup was its exclusive live coverage of Frank Bruno's world title boxing match against Mike Tyson. ITV, which considered it had rights to all Tyson fights screened in the U.K., challenged Sky in the High Court, but its claim was rejected. The IBA also told the ITV companies that they could not refuse to carry advertisements for Sky even though they were in direct competition.

Despite its successful launch, Sky Television ran into problems and embarked on a campaign, especially through the newspapers of its proprietor, Rupert Murdoch, to persuade the public to invest in satellite dishes. British Satellite Broadcasting, due to go on the air in autumn 1989, was forced to postpone its launch by at least six months after experiencing problems in the manufacture of the microchip in its decoder box. The station's first full-time employee, deputy chief executive Graham Grist, resigned because of the problem. BSB was also forced to postpone production of its 'squarial' plastic receiving dish, which it had announced with a fanfare of publicity, in favour of a metal dish. Questions were also raised about the viability of the BSB operation after the IBA awarded it two extra satellite channels. Many felt that the signals from the satellite would not be powerful enough to provide what the service was proposing to broadcast.

BSB was set up with a budget of £625 million, which it later said was not sufficient due to the high cost of programmes. It spent £200 million on the rights to 1,800 Hollywood films from Gulf and Western and MCA/Universal. In August, BSB chief executive Anthony Simonds-Gooding said that his satellite services would not degenerate into game shows and pornographic films: 'BSB will be a regulated extension of choice for the British public', he averred. However, the high capital cost of receiving equipment and the delay in BSB's launch has left the public reluctant to commit themselves to one service which would prove incompatible with the alternative. Until equipment is widely available that would receive all satellite stations, consumer resistance seems inevitable. One possible solution was provided by W.H. Smith, which announced that it would be moving its two satellite channels, Lifestyle and Screensport, from the low-powered Intelsat that serves the cable networks to the Astra satellite. W.H. Smith intends to sell receiving equipment that will cost about £300, and will be compatible with both Sky and BSB.

Government

Following government complaints that the film and television unions were 'the last bastions of trades union restrictive practices', the Monopolies and Mergers Commission undertook an 11-month investigation into the Association of Cinematograph, Television and Allied Technicians, the Broadcasting and Entertainment Trades Alliance and the Electrical, Electronic, Telecommunication and Plumbing Union. The Commission's report cleared the unions of operating restrictive practices and said that where

there were restrictive practices, these were not contrary to public interest.

In October 1988, the Home Secretary (Douglas Hurd) announced measures designed to restrict the publicity given to terrorist organizations. The main restriction was on radio or television interviews with members of eleven republican and loyalist paramilitary groups in Northern Ireland. Exemptions to the rules mean that, for example, they do not apply during elections. However, the loopholes and inconsistencies caused considerable confusion. It was apparently permissible to screen an interview with a Sinn Fein councillor provided the recorded sound was not broadcast and a reporter gave a voice-over commentary of what had been said. The BBC said that the Government had set a 'damaging precedent', and the National Union of Journalists said that British broadcasters were now operating under conditions similar to those in South Africa under that country's state of emergency. The NUJ unsuccessfully challenged the Government order in the High Court, alleging that it contravened the European Convention on Human Rights and prevented impartial reporting. Television companies also had to amend documentaries on Northern Ireland which had already been screened, repeating them in their original form fell foul of the order.

Televising the Commons

The House of Commons Select Committee on televising proceedings of the House of Commons finally published the rules under which cameras would be allowed into the chamber in April. Both the BBC and ITN complained that the rules were too restrictive; they are more severe than those which already operate in the House of Lords. Under the rules, cameras would be forbidden to show Members of Parliament misbehaving and would have to focus on the Speaker's chair during any disorder. They would only be permitted to show the head and shoulders of Members who were speaking, although showing the reactions of other Members who were mentioned would be permitted. In June the House agreed to the experimental televising of the House of Commons during the next session. The contract for providing television pictures of the Commons was awarded to Broadcast Communications.

Ironically, more liberal broadcasting of proceedings was permitted in the Soviet Union. For the first time cameras were allowed to broadcast live for eight hours a day from the Congress of People's Deputies. The scene of deputies queuing up to take advantage of their new-found freedom to criticize the old guard, was watched by an estimated audience of 200 million viewers throughout the USSR.

Awards

At the BAFTA Awards for television production and performance, the main awards were: Best light entertainment, *An Audience with Victoria Wood* (LWT); best drama series/serial, *A Very British Coup* (Skreba Films for Channel 4); best single drama, *Tumbledown* (BBC1); writer's award, Alan Plater; best comedy series, *Only Fools and Horses* (Christmas Special, BBC1); best factual series, *Arena* (BBC2);

best news and outside broadcast, *Channel 4 News*; best short animated film, *The Hill Farm*; best foreign programme, *Tanner* (U.S.A., Channel 4); Robert Flaherty Documentary Award, *Death on the Rock* (Thames); Richard Dimbleby Award for Outstanding Contribution to Factual Broadcasting, Ludovic Kennedy; Huw Weldon Award for Best Arts Programme, *Bertolucci and the Last Emperor* (South Bank Show, LWT); best light entertainment performance, Victo-

ria Wood (*An Audience with Victoria Wood*, LWT); best actress, Thora Hird (*A Cream Cracker Under the Settee*, BBC1); best actor, Ray McAnally (*A Very British Coup*, Channel 4). The Broadcasting Press Guild gave their award for best documentary to Thames for *Death on the Rock*; best single drama, *Tumbledown* (BBC1); and best drama, *A Very British Coup* (Channel 4); Ray McAnally received the best actor award for his role in the ~~=====~~ series.

FILM CERTIFICATES

The British Board of Film Classification issues the following categories of film certificates:

- U Universal: suitable for all.
- PG Parental Guidance: some scenes may be unsuitable for young children.
- 12 Passed only for persons of twelve years and over.
- 15 Passed only for persons of fifteen years and over.
- 18 Passed only for persons of eighteen years and over.
- R18 For Restricted Distribution Only (through segregated premises to which no one under the age of eighteen is admitted).

The classifications of video tapes differ slightly:

- U Universal: suitable for all.
- Uc Universal: particularly suitable for children.
- PG Parental Guidance: general viewing, but some scenes may be unsuitable for young children.
- 15 Suitable only for persons of 15 years and over.
- 18 Suitable only for persons of 18 years and over.
- R18 Restricted: to be supplied only in licensed sex shops to persons of not less than 18 years.

ARCHITECTURE 1988-89

BILLINGSGATE FISH MARKET, LONDON

Architect: Richard Rogers Partnership

Ten years ago Billingsgate Market in London was threatened with extinction as a result of the City of London's decision to relocate the fish market to newly constructed premises on the Isle of Dogs, and to offer the valuable central site for redevelopment. Concern over the fate of the 1875 fish market building led to its being given a Grade 2 listing in April 1980. Alternative proposals for the site were put forward by SAVE Britain's Heritage, which suggested that new offices should be built on the adjacent lorry park, and the market hall converted to house restaurants and shops. This was only the first in a series of political and commercial developments which eventually led to the purchase of the site by S. and W. Berisford and the London and Edinburgh Trust immediately after the relocation of the fish market in January 1982. SAVE's proposals and their firm stand against demolition had, however, led to a change of attitude by the City of London Corporation and the retention and re-use of the market hall was accepted as a viable and desirable option.

The lorry park adjacent to the site was developed, but the then architect's proposals for the market hall, which envisaged a conversion to office use, were not implemented. At that time demand for office space for financial institutions was burgeoning and the site was purchased by the American institution Citicorp, who appointed Richard Rogers Partnership as architect for the conversion. The architect's task was to accommodate the stringent accommodation and servicing requirements of his client while respecting the essential qualities and character of the historic structure. Despite its run-down condition, the architect recognized a building of considerable stature and merit.

The main problem in developing the 33,000 sq. feet of the main floor into a dealing room for some 400 dealers was the onerous air conditioning requirements. The air conditioning would have to be able to control the heat output from the 1,500 display screens which would be accommodated in the dealing room. The architect's desire to preserve the visual qualities of the roof structure resulted in the extensive ducting for the air conditioning system being incorporated within a raised floor 450 mm deep. Great effort has gone into the concentration and concealment of services in this zone to leave the floor space as uncluttered as possible. Where new elements have been introduced, however, they have been designed in an unequivocally modern style to create a distinction between new and old and to preserve the integrity of the earlier structure.

A substantial amount of extra space has been squeezed into the existing structure, but the insertion is handled with skill. An additional 10,000 sq. feet was created by adding suspended mezzanine galleries arranged in an H-plan in the main hall. These are partially suspended from columns which form new arcades along the north and south sides of the hall and complement the existing Haddock Gallery. The

Haddock Gallery runs north to south between the two halves of the hall above the central aisle. It is at a higher level than the modern galleries and takes support from two rows of massive cast-iron Doric columns. The new mezzanine structures are lightweight and visually unobtrusive. The white-painted tubular steel floor trusses are suspended from pairs of inclined steel tension rods at each column position.

The existing timber roof structure, with its curved timber framework supported on wrought iron trusses, required substantial rebuilding. A new glazing system was developed to provide diffuse and subdued lighting so that the V.D.U. screens below would be easily visible and free of reflections. A system of double glazed units incorporating a faceted acrylic prism was devised. The facets in one direction are mirrored and are orientated according to the position of the sun. This is in order that direct sunlight is reflected away from the interior but natural daylight is allowed in. The diffused daylight from above and the predominantly white interior treatment contribute to a cool atmosphere on the trading floors.

The exterior of the building has been cleaned and restored. The removal of excrescences from the frontage has revealed the original elevations, which are now set back behind a wide promenade forming part of the City's intended riverside walkway. Classical in style, the frontage has yellow brick walls over a rusticated stone ground storey and central colonnade. There are decorative stone window dressings and pilasters at the upper levels. It is a beautifully balanced and ordered composition, the tall central colonnade terminating at each end in four-storey pavilions. Each pavilion carries a weather vane surmounted by a huge fish.

As an example of fastidious restoration allied to the introduction of new uses and the incorporation of the latest technology, Billingsgate Market achieves the highest standards. The final cost of the project was some £26 million, but the recent downturn in demand for space by the financial institutions has resulted in the completed building remaining empty.

COURTS OF JUSTICE, TRURO

Architect: Evans and Shalev

The new Courts of Justice in Truro stand on the site of the medieval castle. The commercial heart of the town lies to one side and the Victoria Gardens to the other. The principal public entrance is between the two at the top of Edward Street, with terraces of houses stepping up the slope towards the steeply pedimented portico.

Whereas it is common for new crown courts to contain between four and six courtrooms, the brief at Truro required only three—one medium-sized crown court, one small crown court, and a dual purpose court—together with ancillary accommodation for judges and juries, and the necessary cells and secure areas. These functional spaces are arranged around the main public concourses and waiting

areas, with a large open courtyard to one side. The organization of circulation spaces is the key to the building's layout. It is geared to ordering the movements of a number of specific categories of user with different requirements and different priorities of access, privacy and security.

The main entrance is approached through the pedimented portico at the top of Edward Street. The actual main entrance into the courthouse is set deep in the heart of the building. Passing through the portico, the visitor enters a covered loggia which opens directly onto an open courtyard on the east side and rises through a series of levels by means of either a ramp or short flights of steps. The internal wall of the loggia adopts a gently curving form, its rendered lower half topped by a clerestory of glass blocks. The curved sweep of the stairs leads the eye upwards to the glazed entrance screen and revolving door. These are set at right angles to the curve and at 45° to the axis of the entrance portico.

Inside the entrance, the reception desk continues the curve away to the left and the final 135° turn past the lower flights of opposing staircases brings the visitor to the tall and dignified spaces of the central concourse and waiting areas. The concourse acts as the focus of all public activity in the building and gives access to each of the three courtrooms. It is long and spatially complex, accentuated by two circular waiting areas, one serving the two crown courts and the other the dual purpose court. Both spaces rise through two-storey rotundas and are capped by a ring of glass block clerestory windows under a conical plastered ceiling, with small glazed rooflights at the apex. The use of double-height spaces reflects their functional importance as the hub of the building and also enables full advantage to be taken of natural daylight and ventilation.

Directly accessible from the public waiting areas are four consultation rooms which are set into the curve of the wall backing the entrance staircase. A further two consultation rooms and two witness waiting rooms are situated off the dual purpose court waiting area. Staircases rising out of the central concourse give access to administrative offices and further waiting areas. The crown and county court office suites are also situated at first floor level. The general office fills the east side of the building, overlooking the courtyard.

Access for members of the jury to their own special assembly suite is gained directly from the main entrance via a private corridor. Accommodation for judges and jury members is wrapped around the perimeter of the three courts away from the public concourse, set 'back stage', as it were, to the 'stages' of the courtrooms and 'front of house' of the waiting areas. The judges' accommodation, occupying two storeys, overlooks the judges' garden. This is an expanse of gravel filling the area between the neighbouring Victoria Gardens and the serrated profile of the judges' quarters. The rooms in the quarters form a series of prow-shaped projections accentuated by the overhanging cornice.

The most important areas are the courtrooms themselves. The transition from the light, airy and informal public spaces to the light, airy and formal courtrooms is emphasized by the darker, narrower

lobbies that connect the two. Each courtroom is symmetrical about its long axis, and each has structural and decorative features in common. These include the curved wall behind the judge, the white panelled furniture and fixtures, the bright blue carpeted floor, and the stepped cross-section through the ceiling, with natural daylight spilling down the length of the side walls through high-level glazed rooflights. The dual purpose court differs slightly in having a high-level south-facing clerestory light along one side in lieu of a glazed rooflight. The largest courtroom, the medium-sized crown court, has an engaged column (i.e. half within the wall, half projecting) either side of the judge's bench and two free-standing columns framing the dock. The columns are positioned at each corner of the dropped central ceiling section. The panelled theme, based on a square motif, recurs throughout the courtrooms; in the desks and benches of courts, in the square panelled string courses around the walls, and in the perimeter band around the lowered ceilings. It is echoed elsewhere in the glass panelled entrance doors to the courtrooms, and in the square glass blocks used in the rotunda clerestory lights and the windows to internal rooms and corridors.

Internally all attention is focused on the modelling and the inter-relationships of planes and forms. The simple white plastered finish picks up the subtlest nuances of light and shade as daylight floods in, particularly in the principal public areas. A single string course of dark brown plinth header bricks provides tonal contrast and underlines the predominant shapes and forms. The same dark bricks are used in the staircases and in the curved seating areas of the concourse.

The string course of dark brown bricks functions in a similar way externally. It reappears on all the elevations as a separating strip marking the transition from pre-cast projecting cornice to vertical rendered wall. This provides a dark 'shadow' line at eaves level that adds crispness and clarity to the profusion of forms and planes generated by the complex massing of the building. Similar lines of plinth headers are used to accentuate particular elements, such as the heads and sills of windows, and a capping to low walls and planters. As with the interior, the vocabulary of materials is limited and the colour mainly white. The rough texture of the rendered finish is obtained by using white spar chippings from a local quarry near St Austell. It contrasts well with the smooth white finish of the pre-cast concrete cornices, lintels and sills.

Apart from the lines of brick, the only other material visible from the outside is the dark grey slate covering the two domed roofs over the public waiting areas. From the streets leading up to it the building looks like a small hill-top settlement, while from the south a seemingly random muddle of white geometric forms focuses on the two conical slate roofs that mark the summit of the hill as well as the core of the building. This townscape image is a reflection of the internal organization of the building, with materials, decorative motifs and forms relating from interior to exterior.

This is a truly Modernist building, in the sense

that every aspect of its form, organization and detail stems from a rigorous analysis of the needs of the occupants and users, the requirements of its functions and the influences of its physical and cultural context.

DOCKLANDS HOUSING

The creation of the London Docklands Development Corporation in 1981 brought vast areas of land to the north and south of the River Thames and to the east of Tower Bridge under the aegis of one co-ordinating planning authority. Since then the development of London's dockland sites has proceeded at a frantic pace. The initial stages of development were principally within the Isle of Dogs area, but work is now spreading to less well-known areas. This will test the Corporation's ability to generate and implement strategic design and development criteria to produce a coherent and urbane built environment. A 'laissez-faire' attitude towards planning controls is evident in the mish-mash of competing styles which characterized the first generation of development. However, experience and the stringent demands of the more powerful developers has led to an improvement in the quality of the architectural and urban design of many of the current residential and office developments.

Finland Quays, Surrey Docks Architect: Richard Reid Architects

Typical of the best of the second generation of housing developments is Finland Quays. This is a development of 67 luxury apartments on the north side of Greenland Dock in the Surrey Docks area south of the river. It takes the form of a series of seven linked pavilions, each pavilion having a double fronted design. Accommodation is arranged symmetrically around a central staircase which features as a semi-circular projecting bay on the north-facing rear elevation. Car parking is accommodated under the building as a semi-basement. The extra height resulting from the half-storey podium base adds greatly to the scale of the dockside elevations, which are set back behind a broad brick-paved public walkway. Over this base the flat blocks rise to a further four storeys, with the balcony bedroom of the studio flats at fourth-floor level tucked into the pitch of the roof and looking out over the water through a huge central double-height window.

External elevations are constructed in a warm red brick set out in horizontal bands of subtly different colour, relieved by plain rendered treatment for the projecting window bays that enliven the living rooms and bedrooms of the flats on the second and third floors. The central window to the topmost studio flats is recessed and is surmounted by a curved vault in the roof. In each of the end pavilions the brickwork continues upwards over the vault to form a triangular brick pediment, a device which emphasizes the ends and balances the overall composition. The projecting and recessed window bays at upper levels, the shallow bow-fronted balconies of the link sections at ground

level, and the projecting entrance staircases behind their sloping parapet walls at intervals along the promenade, lend interest and variety to the dockside elevation.

The whole of the dockside elevation is modelled in forms which refer to past housing to be found in south London. The rear elevations are less successful, lacking the interest and humanity of the main frontage. Here the lack of modelling, the treatment of the basement car park enclosures, and the feeling of meanness implicit in the plain render of the stair towers, give the landside facade a stark and almost institutional character. The commercial pressure of docklands development is also evident in the minimal space of the flat interiors, a consequence of rapidly rising land values and profit expectations. Nevertheless, the scheme provides an excellent example of an appropriate response to a waterside location widely typical of docklands.

Shadwell Basin, Wapping Architect: MacCormac, Jamieson, Prichard & Wright

The housing scheme at Shadwell Basin is similar to Finland Quays in its formal layout and spatial relationship to the dock. Here the housing encloses three sides of the dock basin, with the north side punctuated by St Paul's Church (John Walters, 1820-21) and churchyard.

The housing is made up of articulated terraces forming a solid wall of building set back behind a paved public promenade. The main plane of the ground storey is recessed behind a series of simple circular columns in the manner of the traditional dockside warehouses. The brick elevations of the houses are punctuated by projecting balconies, which are painted blue. These highlight the subdivision of the terrace into distinct dwelling groups. The spacing of the balconies varies at different levels. Those at first and second floor level are combined in pairs positioned between each pavilion. Those at third floor level are single and spaced at regular intervals right across the frontage. They combine visually, looking like a cornice band, when viewed from oblique angles.

The north and west terraces accommodate a wide range of different sized flats and are distinguished by their greater height. The recessed central balconies at the upper level open up the brick gable ends to create a split pediment. The terrace on the east side is lower, three storeys high rather than four. It is grouped more distinctly into separate dwelling units, though it perpetuates the linked pavilion format of the other terraces. In all the terraces, elements that are recessed behind the main brick elevations are treated in a contrasting bright red colour. These elements include the glazed link elevations, windows, and the doors opening onto balconies.

Surprisingly, the design architects were not retained to produce the working drawings and supervise work on site. Despite this loss of design control, the good sense and appropriateness of the design mark this another of the better quality Docklands housing schemes.

Cascades, Isle of Dogs

Architects: Campbell, Zogolovitch, Wilkinson & Gough

Cascades is an unusual development on the bend of the River Thames as it turns south round the Isle of Dogs. At 20 storeys high and on an exposed site, the system-built block of flats can be seen for miles around. Although constructed in only 18 months, the designers have eliminated the usual features of system building, such as standard prefabricated wall panels, and have created a truly 'bespoke' building. It is clad in colour-banded brickwork with a wide variety of window shapes and balcony openings, a multi-faceted façade, and a range of other features, all encompassed within a bold but unconventional form. The massing of the building might be described as a single bookend. The principal part of the tower block is buttressed and extended by a triangular infill on one side which rises up from ground level to the fifteenth floor.

The primary vertical circulation core of three lifts and staircase is sited at the north end within the tower section. From this point on each floor a central corridor divides the building in two halves. The west-facing flats have views across and up the River Thames, the east-facing ones overlook the Canary Wharf area. At the far end of the corridor a fire escape staircase runs down the centre of the sloping lower portion. It is capped by a continuous rooflight which from the outside forms the backbone of the 'buttress', and from the inside offers commanding views towards Greenwich. At each floor level down the slope the flats extend a little further, generating a 'cascade' (hence the name) of small roof terraces and conservatories set into the angle behind the sloping parapet line of the main walls. From the junction with the main block at the sixteenth floor, the stair enclosure rises vertically in a prominent white metal-clad tower with a large porthole window at each level.

Nautical references abound, and the porthole type of window is liberally featured elsewhere on the elevations. At the south end of the building, ventilation ducts emerge from the basement car park and terminate in exact reproductions of the circular cowls that used to be found on ocean liners.

Perhaps the most unusual features are the tapering semi-circular projections created by linking the half-round projecting balconies of the uppermost four storeys by means of a series of vertical mullions. At roof level these extend to enclose an open spiral staircase from penthouse level up to private roof gardens. The appearance is that of an extended shuttlecock protruding above the roof parapet, which adds a bizarre flourish to the roofline and silhouette of the building.

The angled outer walls of the flats are set in and out alternately to produce a series of faceted projections from the main building line. The projections are intended to provide individual flats with the best possible orientation and outlook, as well as adding life and interest to the elevations.

Such an eccentric and exuberant building is unlikely to be a role model for future docklands development, though there can be no doubtting its

success as a commercial enterprise. However, there are clear visual links to related building types and activities, such as its references to ships and quayside warehouses, that might offer future designers scope for development.

THE MARKET PLACE, BOLTON

Architect: Chapman Taylor Partners

Bolton is a northern town whose centre is dominated by Victorian and Edwardian buildings, vigorous and confident expressions of an earlier era of prosperity based on commerce and industry.

Like many such towns, however, Bolton has suffered in recent years from the decline of its industrial base, and areas in the heart of the town have become derelict. One such area was situated next to the nineteenth century market hall and has been given a new lease of life with the completion of the Market Place shopping centre. The shopping centre incorporates and complements the market hall in the general pattern of pedestrian circulation and the mix of retail uses. It also strengthens the architectural continuity of the town centre, its architectural styling making clear references to its historic neighbours.

Completed in March 1988 for a cost of approximately £21 million, the new part of the development contains some thirty shop units and a large department store. It extends to 240,000 sq. feet, trading on two levels. It is set out on a strong central axis which continues into the central aisle of the elegant cast-iron and glass structure of the market hall. The new and the old structures are contiguous and at the junction of the two is a new rotunda containing a staircase and escalators to the first-floor mall of the new section. This space acts as a crossroads at the heart of the scheme. Picking up the secondary axes of pedestrian cross-malls from the Bridge Street and Knowsley Street entrances, it effects the transition from the open spaces of the market hall to the more linear spaces of the new malls in an easy and natural way.

Externally, the architectural treatment of the elevation indicates an inventive response to the mid-Victorian Classicism of the market hall (1855) and the adjacent Victoria Hall (1900). Slavish copying of specific features from these buildings has been avoided but certain thematic elements recur, such as the semi-circular arches and circular windows of the market hall, and the double-curved profile of the domed lanterns over the projecting towers which mirrors that of the tower of the Victoria Hall. The building profile is very strongly modelled, both on plan and in section. The corners of the building, particularly at the pedestrian entrance points, take the form of brick- and stone-clad towers, cruciform on plan. These are surmounted by an intersecting barrel-vaulted attic storey and topped with an ogee-shaped dome motif. The linking elevations have overhanging eaves under slate-covered pitched roofs. At upper level, a band of red aluminium-framed

curtain walling is set behind a series of vertical red metal 'detached' mullions. These give visual support (rather than structural support) to the eaves, and emphasize the bays of the curtain wall behind.

Despite the fact that the upper three levels of the new development contain parking space for some 750 cars, the building has developed a dynamic skyline. The most notable features are the perimeter towers, with their copper-clad barrel vaults and varied treatments of the domed turrets, and the air vents. These either project from the roof plane in simple dormer-like shapes or form a continuous horizontal break between the separated planes of the pitched roofs. The overall composition complements its neighbouring Victorian buildings and the surrounding streets.

Internally, the neo-Victorian imagery is abandoned, though a classical style is retained for the columns and arches of the three atrium spaces which penetrate the building and offer daylight down to the lowest mall level. Here, in contrast to the exterior, the elements are rather self-consciously non-structural, being constructed in hollow GRC casings. The marbled paint finish lends a somewhat theatrical air. However, the absence of large expanses of reflective chrome and mirror does give the interior the sense of solidity that one expects in an internal room of the scale that these atrium spaces possess. The effect is enhanced by the use of solid mahogany handrails, sober but positively patterned tiled flooring, and large centre-piece light fittings.

The character of these new malls, smart, smooth, up-market and design conscious, contrasts with the more traditional character of the market hall. The central rotunda at the focal point of the development both separates and links the two 'cultures'. It expresses the sometimes uneasy relationship between the two in the confrontation of old and new architectural styles.

One half of the circular rotunda projects into the market hall, and has a balcony level intended to function as a restaurant. The glazed, domed rooflight sits upon a bold, decorated frieze supported on a colonnade of columns. These maintain the disciplined classical vocabulary of the two-storey high pilasters and the moulded cornice of the market hall exterior. The recessing of the first floor balustrades reveals the dignified proportions of the double-height columns. The other semicircle of the rotunda offers a dramatic change of order. The marbled-effect GRC casings appear in a circular format recessed behind a projecting version of the balustrade design. The conflict between the two orders robs this space of the architectural unity which is present in the treatment of frieze and rooflight and in the attractive flooring.

However, the design acknowledges that old meets new in the most direct of ways, and the external junctions between the old market hall and the new centre are most competently handled. The building has achieved commercial success as well as repairing the damage done to the town centre, which is greatly to the credit of Grosvenor Developments, client in succession to Wimpey, and the design team.

STOCKLEY BUSINESS PARK, HEATHROW

Office for Apple Computers U.K. Ltd.:
Architect: Troughton McAslan

Speculative Office Development for Stanhope Properties: Architect: Foster Associates

Stockley Park is one of the new breed of business parks being developed in response to the demand for purpose-built office space and light industrial accommodation. Situated on a land reclamation site to the west of Heathrow Airport, Stockley Park has attracted a number of high quality developments. An extensive scheme of landscaping, including a new lake, provides an appropriate setting for some stylish new designs reflecting the technical sophistication of the new tenants.

The new office for Apple Computers is an assured essay in grey and white modular curtain walling. The accommodation is arranged on two floors either side of a central top-lit internal circulation 'street'. Individual rooms are given over to specific functions, such as storage and computer areas, an auditorium and demonstration area, catering facilities and a customer entertainment suite at ground floor level. At the upper level the office areas are open plan. The simple shape of the building is subtly modelled by the recessing of the curtain wall at ground level to reveal the circular columns at the perimeter. At first floor level the curtain wall projects beyond the column line. This device introduces a strong shadow line at first floor level and lightens the massing, eliminating any impression of 'boxiness'. The sober bands of grey and white spandrel panels are softened on the south side by the introduction of a tensile stretched fabric sunshade, like a series of narrow sails. This runs along the eaves line and briefly turns the corners onto the west and east elevations. Supported on white painted triangulated outriggers, the scalloped sail shapes and steel rigging add a welcome sense of fun and an interesting pattern of shadows. Further visual relief is afforded by two open-tread steel fire escape staircases, which project forwards from the centre of each long elevation, and by the main entrance canopy. Around the entrance canopy a tent-like enclosure of panels is suspended, continuing the stretched sail idea. The ends of the central 'street' of the building continue beyond the main building line under the pitched roof of the canopy, which mirrors the glazed rooflight behind.

Internally the treatment is unremarkable, with the high quality finishes and minimal detailing that are frequently to be found in modern commercial buildings. The logic and clarity of the plan reflects the simplicity of the building's form and is allied to a restrained and elegant external appearance.

A different but no less sophisticated solution to a similar brief stands on a nearby site in the business park. The requirement was for a speculative office building constructed as shell and core, i.e. for fitting out by the tenant. The architects, Foster Associates, seized the opportunity to achieve a rational and flexible structure of visual elegance and simplicity,

using a range of technical solutions to eliminate many of the traditionally troublesome aspects of building construction.

The resulting office accommodation is on three floors and is divided into three major sections. The two outer sections, 18 metres in width, are linked to a central 21 metre bay. Each bay is separated from the next by a 6 metre wide continuous atrium space. Both of the atria are spanned by circulation bridges linking the adjacent bays. Both have straight staircase flights linked end to end on the central axis in one continuous 'cascade'. The three bays are staggered on plan. This device owes much to the requirements for fire escape distances but has clear benefits for the massing of the exterior.

The most obvious visual characteristic of the elevations is the use of a graduated shading pattern on the glass window panels. A technological spin-off from the automobile industry, the treatment of the glass eliminates glare and offers solar control at less cost than conventional tinted glass. The unusual shading effect gives the building a hazy, insubstantial quality.

The special glass panels are incorporated within factory-assembled cladding developed in Austria. The cladding consists of a four-sided structural silicone jointing system for each constituent panel. A modification to the supporting aluminium frames was made to satisfy British building control requirements, so that the panels are now retained by a splayed frame section in the event of a failure of the silicone jointing material.

The end bay of each of the three blocks containing the main services plant areas is treated differently,

with white louvre-panelled walls rising to the full height on the three exposed sides. The fine horizontal shadow lines created by the louvres impart a delicate texture of light and shade to the otherwise solid end bays.

The primary structural system supporting the roof comprises a series of Y-shaped frames. The upper arms of the frames are braced at a shallow angle by a horizontal tie rod supported on triangulated bracing struts, and by vertical ties and spring-loaded tension fixings to points in the ground around the perimeter. Where adjacent frames meet at the apex of the glazed rooflight over the linking atria, the frames are pinned by a common tubular steel member running along the ridge line. Where the Y-shaped arms project beyond the outer face of the curtain walling around the perimeter, a simple white metal fascia panel terminates the glazed walling and a series of slatted sun shades are introduced. These not only give useful shading from the sun, but also provide a delicate projecting cornice which terminates the elevations and enlivens the skyline of an otherwise very simple box form.

A secondary structural system of steel columns and concrete floor slabs supports the office floors. The structure terminates at second floor level. This leaves the whole of the topmost floor under the sloping roof and glazed rooflights free of any structural interruptions, apart from the tapering central legs of the roof support columns.

This elegant building was completed in March 1989 and, like the office for Apple Computers, is an excellent example of a modern architectural style totally in keeping with the technology of its age.

ARCHAEOLOGY 1988-89

The most important archaeological event of the year in the opinion of the press was the excavation of the late 16th century Rose theatre at Banksy in London. Seldom has an archaeological site so caught the imagination that it has appeared regularly ■ front-page news. The reason for this is that what was initially an important archaeological discovery developed into ■ debate about how the law treats the development and preservation of archaeological sites.

The saga began with press reports in mid February 1989 of the discovery of the remains of the Rose playhouse, the predecessor of Shakespeare's Globe Theatre which was situated close by. The site of the Rose playhouse was well-known and was indicated by current street names. Excavation at the site began in December 1988 and ■ undertaken by archaeologists from the Museum of London with the full agreement, and the financial support, of the developers, Imry Merchant, who had planning permission to build a ten-storey office block on the site.

Following the discovery discussions between English Heritage, the Museum of London and the developers took place in an attempt to extend the period the archaeologists could work on the site, so that a proper excavation could be carried out. Suggestions were already being made that the site should be preserved for the public benefit and on March 2, 1989 Simon Hughes, M.P. (S.L.D., Southwark and Bermondsey) tabled questions in the House of Commons supporting the wish of the archaeologists to secure more than ■ two-month evaluation excavation, which was all that the developers would originally agree to. Mr Hughes also proposed the designation of this part of Southwark under the 1979 Ancient Monuments and Archaeological Areas Act, which would secure sufficient time for ■ proper investigation. The Museum of London archaeologists were successful in winning more time for their investigation and by May 1 ■ campaign to save the site of the Rose playhouse was being launched, led by the actor Ian McKellen, Simon Hughes and Gerald Bowden, M.P. (Conservative, Dulwich). The two M.P.s requested the Secretary of State for the Environment, Nicholas Ridley, to schedule the site as an ancient monument and in a debate in the House of Commons on May 10 Simon Hughes urged this move because 'we have found the first and, so far as yet we know, the only *in situ* evidence of any of the Elizabethan theatres. No-one knows whether we will find any more.'

For the Government, Mrs. Virginia Bottomley, Under Secretary of State for the Environment, stated that consideration was being given to designation under the Ancient Monuments and Archaeological Areas Act. She said, however, that the Government was satisfied that the remains of the Rose playhouse could be preserved to a substantial degree beneath the proposed new office block: 'We cannot do anything to mitigate the damage that has already been done by the piling from previous office blocks, and any future damage to be caused by the new building is minimal.' The following day the Prime Minister told the House of Commons that the remains must be preserved and that she was satisfied that discussions between

English Heritage, the Museum of London and the developers would result in such preservation with the minimum damage. This view was immediately challenged by the archaeologists, who argued that parts of the stage walls would have to be demolished so that piles for the new building could be inserted and Simon Hughes claimed that the assurances were 'totally unjustified and totally misleading'. Imry Merchant Developers, the site owners, stated that 'the remains are going to be wrapped as carefully as ■ porcelain doll. There must be a building over the top of it and to protect the Rose there has to be protective covering for it, and that is being done under the guidance of English Heritage.' This did not satisfy Mr. Hughes who said on May 13 'The developers are going to take possession of the site on Monday morning. They have given no assurance that the site will not be infilled, no assurance that the piles will not be driven into the remains including into the stage, no assurance that permanent damage won't be done ■ a result of the removal of the covering over the site, and no assurance that the public will ever be able to see the Rose again.'

The M.P.'s unease was reflected in the correspondence columns of the national press, especially *The Times*, and the Rose Theatre Trust was launched with the intention of raising £20 million to buy the site. By this time much interest was being directed to the adequacy, or otherwise, of the legal protection given to archaeological sites and there was a move afoot for the implementation of the European Communities Environmental Impact Assessment so far ■ the archaeology of the site was concerned.

Archaeologists were required to leave the site at midnight on May 14 after five months excavating at the developer's expense. That evening ■ number of protesters supporting the preservation of the site held a vigil with the intention of preventing workmen from starting building work on the morning of May 15. Distinguished members of the acting profession gave readings to the protesters and Lord Olivier sent ■ message of solidarity. There was a reprieve for the Rose on May 15 when the Government paid £1 million towards the cost of delaying the project for ■ month while ways of preserving it were considered. In ■ statement to the Commons on that day the Secretary of State for the Environment said that this money would be the full extent of the Government's financial commitment. Mr. Ridley said: 'It has become clear in the light of the most recent discoveries that the remains are of greater importance than was previously thought. As a result, the developers and their architect have been working urgently on possible ways of ensuring that the excavated remains are properly preserved and displayed to the public.'

On June 2 the developers, Imry Merchant, announced a plan to save the remains of the Rose playhouse. They put forward ■ redesign of the proposed ten-storey office block, proposing to build it on stilts so that it would clear the site. On June 15 the Secretary of State for the Environment announced that he did not intend to schedule the site ■ he was satisfied, on the advice of English Heritage, that the new £10 million design for the building

would, if approved by the local planning authority protect the remains and obviate the need for scheduling. Mr. Ridley's decision did not satisfy those who wished to see the site preserved and on June 22 the Rose Theatre Trust was granted a judicial review of the Secretary of State's refusal to schedule the site of the Rose playhouse. The campaign's case was based on the allegation that the Secretary of State was acting unlawfully under the terms of the 1979 Ancient Monuments and Archaeological Areas Act. Subsequently the Rose Theatre Trust won a High Court injunction against Imry Merchant Developers preventing them from beginning work on the office block until the judicial review had been carried out. However, on July 3 the injunction was lifted by the High Court. On July 17 the High Court ruled that the Rose Theatre Trust had no standing in law to ask for a judicial review of the Secretary of State's decision. Mr. Justice Schiemann, in giving judgement, said: 'It seems to me that the decision not to schedule is one of those Government decisions in respect of which the ordinary citizen does not have sufficient interest to entitle him to obtain leave to move for a judicial review.' On the same day Imry Merchant Developers were the subject of a £314 million takeover by Marketchieft, but it was stated that this would make no difference to the plans for the Rose playhouse site.

On July 25 the local planning authority, the London Borough of Southwark, approved the revised plans for the office block subject to 'a legally binding agreement with Imry Merchant, the developers, that archaeological supervision continues, that the remains are preserved and protected and that a public museum run by a third party is created.' With the revised plan for the office block approved and the preservation of the Rose theatre site ensured, the campaign had succeeded in saving the site, albeit not in the way that the Rose Theatre Trust would have wished.

The significance of the excavation of the Rose playhouse cannot be overstated. The archaeological excavations revealed parts of the outer and inner walls, the first stage of 1587 and the second stage of 1592. In addition, a substantial amount of archaeological evidence was found which, when interpreted, will reveal much about these poorly understood post-medieval structures: only one drawing of the Swan Theatre survives as pictorial evidence of playhouse interiors of Shakespeare's day. It will be some time before the report on the excavations of the Rose playhouse is complete and available for study, but from the present knowledge of the theatre's history, it is clear that it is a very important discovery. Stanley Wells, writing in *The Times Literary Supplement* (May 12-18, 1989), described its significance thus: 'Open by the Autumn of 1587, this was the fourth of London's theatres—after the Red Lion, the Theatre, and the Curtain—and the first to be built south of the Thames. In many respects it is the best documented of pre-Restoration theatres. It belonged to the financier Philip Henslowe whose son-in-law the great tragedian Edward Alleyn, founded Dulwich College ... the Rose saw first or early performances of a great range of plays by dramatists including Thomas Kyd, Christopher Marlowe, Robert Greene,

Thomas Heywood and Thomas Dekker. Here Alleyn had some of his greatest triumphs and Will Kemp raised laughter. In 1592 'Harey the vi'—presumably Shakespeare's *Henry VI, Part I*—drew the crowds, receiving sixteen performances and in 1593 'Titus & ondronicus' was a box office sensation. This was before the founding of the Lord Chamberlain's Men, with whom Shakespeare worked continuously from 1594. He is extremely likely to have acted at the Rose, and certainly must have seen plays from its yard or galleries. The discovery of the material remains of this theatre is an event of the highest importance for anyone interested in the history of English theatre and in the society and culture of Elizabethan England.'

Prehistory

Volume 54 (1988) of the *Proceedings of the Prehistoric Society* contains a most interesting report on the excavation of The Street House Wossit (the latter word explained by the excavator Blaise Vyner, in a summary account in *Current Archaeology* (Number 111), as 'An A. A. Milne-style shortening of "What is it?"'). This curious site, excavated between 1984 and 1986, is situated on cliff tops just north of Whitby. Over a surface which originally was ploughed was built what the excavator ultimately decided was a 'late Neolithic or early Bronze Age palisaded ritual enclosure.' The British Museum undertook the radiocarbon dating of the samples to provide dates which 'centre in the 18th century BC.' According to the summary, 'This palisaded enclosure would appear to belong to the very beginning of the second millennium. Beaker sherds were found in the construction levels as well as coarse wares which appear to be late neolithic.' Following the destruction of the palisaded enclosure there was a second phase. 'By this time the filling of the palisade trenches and the central pit had slumped, and the resulting depressions were filled with further deposits of rubble. This included cup-marked stones, which were noticeably absent from the initial back-filling. (An indication that cup-marked stones belong essentially to the Early Bronze Age?). At the same time a single cremation was deposited in a collared urn in the rubble at the centre of the site and traces of a second cremation were found at its north-eastern edge.'

A very different prehistoric site is that of Flag Fen, which won the Hepworth Heritage Award for 1988. Described by Francis Pryor, the excavator, in *Current Archaeology* (Number 110), this site was discovered in 1982 during the clearing of Fen drainage ditches. Carbon 14 dating indicates that the Late Bronze Age was the centre of the period of origin. English Heritage provided funding for excavation as part of a Fenland project prompted by the substantial drainage of the Fenlands. Bore hole surveys indicate that preserved wood covered an area of some 2.5 acres on either side of the dyke. From the sides of the dyke some five hundred pieces of wood had originally protruded which were discovered by archaeologists watching the cleaning process. Bronze Age pottery found amongst the upright pieces of wood suggested the possibility of a domestic site and, in the words of the summary, as the excavation

progressed 'We were soon convinced that the uprights were the roof and wall supports of a rectangular building—or buildings.' The excavators found long pieces of wood which they interpreted as collapsed roof purlins. Below the roof and walling material was found the latest floor level which 'had been dusted with sand and fine gravel and was composed of planks, wood chips and off-cuts. On it and within it we found numerous pot sherds, a few crudely bashed flints and pollen from wheat or barley.'

After subsequent seasons of excavation 'the layout of the building was becoming reasonably clear. There were two distinct rows of posts about 6 to 6.5 metres apart which formed the uprights of the external walls. Inside these there were two further rows of posts that had supported the roof; in other words, the building had a central "nave" and two aisles. Outside these (on the south side, if not on the north), was a further row of regularly spaced timbers that may have supported the eaves.' Continued investigation of the methods of construction and the various floor levels led to the conclusion that 'we were uncovering ■ Bronze Age drama: the building had collapsed at an early stage in its history, and two or three of the vertical timbers lay at an angle of roughly 45 degrees. They were about 2.5 metres long and one had fallen across a near-complete Bronze Age pot which lay crushed beneath it.' The finding of a coppiced tree 'demonstrated that the building had been erected when conditions were by no means completely waterlogged: water-loving trees or shrubs (for example alder and willow) grew in some places when the fen was slowly forming in the late second or early first millennium BC.'

It is estimated that there is about twenty five years' work still to be done at Flag Fen and therefore it is essential to keep the site wet so that the wood retains its shape. 'We therefore', said Francis Pryor, 'decided to build a large lagoon over the middle of the Bronze Age platform. The purpose of this is purely functional, but we have also turned it to educational use, by creating an island in the middle of the lagoon, the approximate shape of our Bronze Age island ... On this we have set model houses, and animals, and people, to give an idea of what we think it may originally have looked like.'

Another major discovery was that of a chariot burial at Kirkburn, North Humber-side. The summary in *Current Archaeology* (Number 111) said of it: 'The unique feature of this burial is that it is buried with a complete coat of mail—by far the earliest so far discovered in Iron Age Britain. The chariot was buried with the wheels in the normal position with the body laid on top. The coat was then laid on top of the body—but upside down; the hem of the coat was across his chest, and the shoulder pieces over the legs. There were three little bronze toggles by the top, presumably the ends of the cord which fastened it. Apart from this however, the only other objects with the body were two groups of pig-bones—sadly no sword or other offensive weapons.'

This kind of burial contrasts with the very different disposal of the dead reported by John Musty in *Current Archaeology* (Number 113). He reports upon research into the large number of human skulls which have been found in the River Thames,

'including a group of over 100 from Strand-on-the-Green'. Research has found some 299 skulls surviving from the Thames between Oxford and London, with the main concentration between Richmond and Mortlake. Dating evidence suggests the prehistoric period ■ the time of deposition, perhaps associated with the metalwork of the ■ period found in the Thames. The Editor suggests that these skulls are 'simply evidence for the cult of the head, as was practised in Britain from the Neolithic right through to the Iron Age'.

Although for many people the fascination of archaeology lies in the discovery and investigation of specific objects, the archaeologist is often more concerned with the elucidation of new evidence suggesting how communities lived. To that end a number of wide-ranging archaeological surveys ■ being carried out. One reported in *Current Archaeology* (Number 113) by Keith Branigan was on the Hebridean island of Barra. Some seventy-eight new archaeological sites were discovered, of which forty were hut circles. It is noted that 'The most famous sites in the Hebrides are the magnificent Neolithic and Bronze Age ritual sites, and Barra has one of the finest, Dun Bharpa, ■ burial cairn of typical Hebridian type with a ring of orthostats forming the limits of the cairn. Dun Bharpa and ■ second cairn had long been known but two further cairns were also discovered by the survey, thus doubling the number.' For the Survey team from the Department of Archaeology at Sheffield University 'The most exciting discovery of all, however, were two large walls that were found buried beneath the blanket peat on the slopes below Dun Bharpa. Similar walls had been discovered beneath the peat in Western Ireland where they are thought to be Neolithic. These walls in Barra seem likely to be at least pre-Iron Age as they are sealed by the blanket peat which presumably was laid down in the wet conditions in the first millennium BC.' Although the hut circles could not be dated, it is suggested that the largest ones might be Iron Age while the smallest 'are in some respects similar to the shielings of Medieval or Post-Medieval dates.'

Roman Britain

An extensive summary of work carried out on sites of the Roman period is contained in *Britannia*, Volume XIX for 1988. From this volume may be noted extensive work on Hadrian's Wall, including at Denton Burn, Tyne and Wear. Here the excavation of some 49 metres of Hadrian's Wall was carried out in advance of road building. It is noted that 'The Wall was of broad gauge, with clay and rubble core surviving to a height of 0.96 m. although only seven facing-stones were *in situ*. There was evidence that the S. face had been plastered; at one place the imprint of seven courses was preserved on a slab of fallen plaster. Immediately behind the Wall masons' chippings were incorporated in a lightly-metalled surface up to 8.18 m. wide, carrying cart-ruts and apparently laid down soon after the Wall was built; above this was a second road-surface 5.56 m. wide containing a coin of A.D. 202-10. Silt had accumulated

on this—before the collapse of the S. face. Neither road resembled the construction of the Military Way as known elsewhere.'

Work continued at the important Wall site of *Vindolanda* at Chesterholm, Northumberland, where it is reported that 'Most of the wooden tablets found in 1987 were of the stylus type; several were seen to carry an ink inscription by the filing-clerk written on the outside of the rim.' Other finds included 'the oak back of a flat brush measuring 22 by 18 cm. from the primary ditch and so dating before A.D. 90; 243 holes survive out of a probable total of c.505 and each appears to have held c.20 bristles (whose origin is not yet certain). There are attachment-holes at the four corners.' In addition ■ substantial quantity of leatherwork came from two Antonine ditches and some 490 shoes and boots were found.

In excavations at 16 Parliament Street, York, the South-east wall of the fortress and its rampart were found standing over 2 m. high near the south angle during construction work. The wall had ■ stepped plinth, similar to that seen nearby in 1976, and is thought to be of late third- or early fourth-century date. The rampart of clay and turf was part-sectioned to ■ depth of 0.80 m. The wall was reduced in the Anglo-Scandinavian period, when post-and-wattle buildings were erected against the outer face.

Across the Pennines recent excavations have clarified the topography of the Roman fort at Lancaster, while at Chester modern technology was pressed into service for the exploration of a Roman drain with a video camera. In Lincolnshire excavations in advance of the laying of a pipe-line led to the discovery at Swanpool of 'two poorly-preserved kilns of normal Swanpool type, sharing the ■■■■ stoke hole. Wasters were mainly of coarse grey ware. Around lay some ditches and gullies (presumably for drainage), which also yielded wasters.' A survey of the south Lincolnshire fens 'has revealed over 50 sites yielding middle or late Iron Age sherds in the silt fens, ■■ area previously thought to be deserted at that time; 185 sites produced evidence of Iron Age or Roman salt-production. Study of the Roman pottery, particularly the fine wares, suggested that the fenland settlements were more prosperous than those on the fen margins.'

At Old Stratford, Northamptonshire, 'the site of Priestly Regalia reported by Lysens (in 1818) as found in Windmill Field may have been identified by the discovery, in ■ field of that name just within the county, of ■ group of brooches and over 300 first- to fourth-century coins together with pottery and stonework, not far from the Deanshanger villa'. In the ■■■■ county, the excavation of the Piddington villa site may be taken ■ representative of that class of building. The villa was first located in 1781. From aerial photographs and a field survey it is suggested that it is ■ courtyard villa extended at one side to include perhaps a bath-suite. A mosaic was destroyed in 1781, but 'surviving traces show that this had had ■ wide border of red tesserae and a centre panel; ■ small surviving fragment depicts ■ heart-shaped leaf with stalk'. It is also reported that 'Among the debris was painted plaster, some decorated with the pigment cinnabar. By 340-350 the villa was ruinous but still inhabited. Huge quantities of oyster-shells belong to

this phase (350-390) together with a corn dryer yielding charred peas and grain.'

There is no diminution in the number of coin hoards found. At Bletchley, Buckinghamshire, 'a hoard of 627 denarii down to Commodus (A.D. 186), is reported in a field between Bletchley and Little Brickhill'. In Hertfordshire important work was carried out at Verulamium, and it is also interesting to note that at Chells Manor 'during trial-trenching of a settlement site ■ hoard of 2,192 *Antoniniani* and 387 denarii was found in 1986, scattered from a plough-damaged jar. The hoard, buried soon after 260, contained several rare coins including issues of Balbinus and Pupienus (238), Pacatianus (248-9) and Saloninus ■ Augustus (260)'. At Sutton, Suffolk, 'a hoard of 204 denarii ranging from the Republic of Caligula was found in a wheel-made grey jar. This had been buried in the upper filling of ■ Iron Age ditch'. Discoveries in Norfolk included, at Great Walsingham, 'an extensive settlement or temple establishment is suggested by metal-detector finds, which include many coins from Claudius I to Theodosius I, three bronze statuettes of Mercury and evidence for bronze-working in the form of a miniature axe and ■ cylindrical object both left untrimmed from bivalve moulds'. At Snettisham, Norfolk, 'a hoard consisting of five British M staters, eight British L ('Whaddon Chase') staters of a new type, three uninscribed gold quarter-staters of ■ new type, 26 staters of British J ('Norfolk Wolf') and one silver Icenian coin (early Face Horse type) is reported.

Southern England was not short of coin hoards either. At Silchester 'a hoard containing 51 silver siliquae and fragments of siliqua down to Honorius (c. A.D. 402) together with three bronze fourth-century coins and seven whole or broken rings is reported', while at Whitchurch, also in Hampshire, 'a hoard of 34 Gallo-Belgic E staters and 108 British B staters' was found. On the Isle of White, at Bembridge Harbour some '27 coins probably from a scattered hoard were found in intertidal silt c.130 m offshore. Legible coins ranged from Domitian to Faustina II; the majority are sestertii and dupondii of Antoninus Pius and the two Faustinas.' Other coins were found at Fishbourne, while at Gurnard Bay 'a hoard of counterfeit lead-tin denarii of Lucius Verus and the two Faustinas were found on the foreshore 2 km east of Cowes, together with residues of copper-alloy smelting. The site lies c. 300 m from a Roman building destroyed by coastal erosion in 1864.'

At an investigation at Billericay School, Essex, 'excavation in advance of building revealed cremations in vessels of late Iron Age or early Roman type together with shallow ditches, at least two wells and some fourth-century coins. The kiln found in 1977 was re-exposed for archaeomagnetic dating; the results, described as tentative, give ■ date between A.D. 43 and 100 (68% probability) or 150 (95%). The archaeological date was in the late second century.' At Colchester 'the east and north faces of the inturn of the city wall on the East side of the South-West Gate were located.' It is reported that 'traces of whitewash on the inner face of the city wall have been recorded at four sites; analysis of the first indicates at least 45 coats, suggesting repeated applications during the interval before the bank was

built in the late second century. On evidence recovered at Culver Street ■ date of c. A.D. 65-80 is thought possible for the erection of the wall.'

In London a considerable amount of investigative work continues to be undertaken. At Dowgate House it was found that soil had been dumped in the late third or early fourth century probably for land-reclamation. 'These deposits yield much pottery, including glazed ware thought to be from Italy or the Eastern Mediterranean, together with over 100 shoes and sandals. These demonstrate the continued use of one-piece shoes well into the third century.' At the junction of 31-43 Mansell street and 1-7 Alie street was found 'a shallow ditch bounded by ■ cemetery. South of it, parallel or at right-angles, lay 85 inhumations, 16 of them gypsum burials and one in a tile-lined grave. The latter yielded three glass vessels, ■ bronze mirror and an anklet of jet and glass beads. Only a minority of the rest were accompanied, usually by personal ornaments or pottery vessels. In addition, 17 cremations were excavated, 4 of them in pits and 13 in urns, three of which had been placed in amphorae.' Across the Thames at Southwark interesting discoveries continue to be made: 'at Cherry Garden Pier in ■ small area of relatively high ground were a ditch and three cremations in urns; two were of infants, one of them with a small colour-coated beaker, a lamp-holder stamped STROBILI and ■ shale bracelet, the other with a poppy head beaker and lamp. The third was an unaccompanied adult.'

At Catherine Street, Exeter, 'the position and line of the NE defences of the legionary fortress, the only side hitherto uncertain, were confirmed at St. Catherine's Almshouses; they proved to run not quite parallel with the SW defences, inclining slightly outwards in the direction of the eastern angle.' In Dorset at Dorchester three inhumations in wooden coffins were found, 'one of them ■ decapitated female with head placed between the feet, while at Poundbury Cemetery a further 27 burials were investigated. 'All were in wooden coffins; one grave contained two coffins, the upper one holding a body much mutilated before burial. Only two burials yielded grave goods, one ■ bone comb and iron pin, the other ■ coin.' In Andover, Hampshire, 'a cemetery was further explored which was first located in 1982, when inhumations accompanied by hobnails, knives, ■ comb, bone bracelets and coins were examined. Three graves were excavated: (a) a large timber-mining pit containing ■ primary inhumation with hobnails and ■ flagon; ■ secondary unaccompanied burial had been inserted after the decay of the timber chamber. (b) An inhumation lacking grave-goods. (c) A decapitated inhumation with the skull between the legs, accompanied by hobnails, two knives, and the fragmentary bones of an infant.' At Meonstoke, Hampshire, further work at Shavards Farm 'identified the building ■ an aisled house to which ■ new east end had been added 2 m further out in the early fourth century. The new end-wall later collapsed outwards with some features still in position, including stone and tile bonding-courses and ■ window of three round-headed lights near the apex of the gable. The openings, each 1 m wide by 1.5 m high were framed by courses of re-used square tiles set in thick bands of mortar to give a red and white effect. Some time in

the mid fourth century the windows had been blocked with courses of flint and tile. The gable itself, poorly preserved, appeared to be steep-sided, as suggested by an angled line of tiles and mortar, allowing ■ height of c.15 m; the wall was 15 m long at its base. The discovery of tesserae and remains of quarter-round moulding above the level of the fallen wall may suggest the former existence of an upper storey.' At Canterbury, an excavation at 36-7 Stour Street revealed that in the dark earth sealing ■ Roman street was ■ sixth or seventh century gruben-used tile.

Medieval Period

A multi-million pound development programme is planned at Edinburgh Castle to facilitate access by tourists, at the ■ time separating them from the military and other activities of the Castle. The development programme has provided an opportunity for archaeological investigations at this very important monument. The work undertaken in 1988 was summarized in *Current Archaeology* (No 112), where it was stressed just how little has previously been known about the archaeology of the area, despite strong literary traditions. Finds included five sherds of Roman Samian ware as well as an early Roman brooch. There was also the remains of ■ comb dating from the sixth to tenth centuries A.D. and being possibly Pictish or Northumbrian, i.e. relating to either the native Din Eidyn or the Northumbrian Edwinesburch. It is reported that the 'excavation on Mils Mount in front of the gift shop has produced the unexpected evidence of Roman Iron Age as well ■ Dark Age Din Eidyn. The area produced over three metres depth of stratified deposits with the earliest surfaces being sealed by ■ hitherto unknown medieval approach road skirted by very rich midden deposits. A 14th century smithy was also discovered, complete with furnace, quenching trough and a sheet-iron lined tool box.' It is further noted that 'One area which aroused considerable public interest was another deep excavation outside the vaults where a mass burial of more than fourteen diseased hunting dogs was found dated c.1600.'

Work took place on the many ecclesiastical sites of the period, including excavations at Sandwell Priory in West Bromwich, Birmingham, which are described in *Current Archaeology* (No 113). The ground surface has produced over 700 worked flints of late Mesolithic type and heat-shattered pebbles, perhaps suggesting a Bronze Age burnt mound. On this ground surface was constructed Sandwell Priory, a small Benedictine monastery. The summary of the excavations points out that it never had more than four monks and was down to two at the time of its suppression in 1524. Nevertheless, the archaeologists found a building which suggested ■ somewhat grander existence. The first church dating to the mid twelfth century appears 'extremely odd, with ■ very elaborate east end but no nave. There was a long central choir flanked by two shorter chapels on each side—though the remains on the northern side were destroyed by the construction of ■ post-medieval country house. There were also elaborate north and south transepts off which the side chapels opened. However, despite the elaborate

east end, there does not appear to have been a nave.' It is suggested that the reason for this may be connected with the activities of the founding family and the fact that the Priory's initial benefactor, William Fitz Guy de Opheni, Lord of the Manor of West Bromwich, is probably buried in the stone coffin which was found at the east end of the chancel near to the high altar. 'The coffin had been disturbed by a 19th century pit but it was probably originally covered by a life-sized stone effigy of a knight in chain mail, the head of which was found in demolition rubble near the coffin.'

Most of the graves in the church were found in the south transept 'which was presumably the family burial ground'. Burials took place here throughout the Priory's lifetime and included men, women and children. The specialist examination of the skeletons suggests 'that a number of them have a metopic suture. This is an abnormal joint down the middle of the forehead and occurs in only 9% of the modern population. As nearly 50% of the burials in the south transept had this condition, it looks as if they were related. Can we not suppose that these are the lords of the manor and their families who paid for the building of the Priory and have used the south transept as their chantry chapel?'

The archaeological evidence throws an interesting light on the date of 1180, traditionally the date when the grant to the monks by the founder was confirmed by his overlord Gervase Pagnell, Lord of Dudley. From the evidence recovered it may be that the Priory was constructed somewhat earlier. 'To the north of the church underlying the later buildings were some timber posts, presumably the timber east range. One of these posts with its bark intact, gave a felling date of 1159/1160.' In the middle of the thirteenth century there was a major rebuilding. 'This was possibly centred on the collapse of the central bell tower. In the survey of 1526 there is no mention of a tower, but instead there is a bell frame between the nave and chancel.' At about this time various other changes were made, including the side chapel being blocked off at the east end and probably demolished so that only the long central choir remained. 'The blocking wall contained architectural details including a carving of a lamb and cross. A date for this—a *terminus post quem*—is given by a wooden plank from a grave which underlies the blocking wall and which gave a dendro date of 1252. Tracery from a window in the new wall has been dated to around 1300.' Also about this time the nave was constructed which had the effect of converting the structure to a more normal type of church. 'We should perhaps remember that the nave was for the laity and in this case the laity were living a mile away in the village of West Bromwich where they had their own Parish Church. Many of the Oxford and Cambridge colleges were designed quite deliberately without a nave: was Sandwell Priory also designed in the first stage with no nave?'

The burials are of particular interest in that one 'had a remarkable graffiti on it in the form of Nine Men's Morris Board crudely scratched on the upper surface of the coffin adjacent to the head'. Many of the coffins were well preserved because of the very wet nature of the site and this meant that leather

and textiles also survived. The nature of the burials were of interest in that 'Many were buried with long staves, 6 foot long and two inches thick. Were these pilgrims' staves? Probably not pilgrims who had died while visiting the church, but perhaps the sign that the person concerned had been on a pilgrimage. Some also had a smaller wand, often lying across the staff—the sign of a second pilgrimage? There were also three boot burials. Two had ordinary ankle length boots, but one had splendid thigh length boots or leggins. Were these also the sign of a pilgrim, who had walked far? In many cases the shroud had also survived, often rather coarse, like a string vest.'

Turning to Northern Ireland, excavations at Deer Park Farm, described in *Current Archaeology* (No 113), 'revealed a long sequence of occupation in the Early Christian period from perhaps about A.D. 600 to 1000. The crucial episode of build-up occurred at around A.D. 750 when the occupants decided to heighten their damp, midden-filled rath, which had already seen several phases of re-modelling. The bank of the rath was used to contain the build-up for the mound. The houses in the rath were then roughly dismantled in sequence over a lengthy period. Door-frames and perhaps also roofing poles were salvaged for re-use, but the wicker walls were either encased in the build-up or were pushed over and covered. These were preserved because the base of the mound became water-logged, while the mass of organic midden material already collected in the rath increased the dampness. In the lower, undrained northern section there was about 1.5 m. of preserved organic material.' The significance of the water-logged nature of the site is stressed. 'As a result of this unique preservation we are able to describe for the first time exactly how the walls of an Early Christian circular wicker hut were actually built.' Furthermore, 'It can even be suggested that the construction methods used in these circular wicker huts of Early Christian Ireland represent the end of a prehistoric tradition of house-building which was once more widespread in these islands.' The account of the surviving evidence of construction and material culture demonstrate again just how important to the archaeologist is the survival of waterlogged sites.

Post-Medieval Period

A comprehensive summary of work relating to post-medieval Britain may be found in *Post-Medieval Archaeology* Vol. 22 for 1988. Amongst the investigations undertaken was the recording of the Poulett family vault at Hinton St. George, Somerset. 'The Poulett Family Chapel was rebuilt in 1814 by Sir Jeffry Wyatville for John, 4th Earl Poulett. Since 1814 the vault has been entered through Wyatville's Hamstone portico on the W. external face of the Poulett pew. It is enclosed by a contemporary paved and railed courtyard. Studded oak doors open on to a staircase leading down to a large brick room.' An account follows of the vaults and the coffins therein. A particularly notable coffin is 'the richly-decorated triple-shell coffin of John, 1st Earl Poulett (died 1743). The gilt coffin furniture consists of ornate grips and grip plates decorated with winged cherubs, sur-

mounted by an Earl's coronet. Identical gilt fittings along the side(s) are enhanced with sunburst escutcheons.'

A complete contrast was the excavation of Clogh Oughter Castle in Co. Cavan. 'It is on a tiny island in Lough Oughter and played an important part in the 1641 rebellion until its siege and subsequent slighting by the Cromwellian forces in 1653.' A large number of objects were discovered, most being of seventeenth century date. 'Many broken fragments of iron cannonballs bear witness to heavy bombardment during the 1653 siege, and other finds of a military nature include musket balls of lead, ■ flintlock, and iron and bronze spurs. A cast-iron fireback found in the rubble probably also dates to the early 17th-century rebuilding. Other finds of ■ domestic nature include 16th/17th-century pottery (including Crannog ware), metal skillets, candlesticks, iron keys, knives and harp pegs. An unusual discovery was half a papal bulla of lead.'

At Merchants Road, Galway, an excavation was undertaken in advance of redevelopment work during which one of the bastions and part of the outer wall where it joined the bastion were recovered. These relate to the strengthening of the eastern defences of the city in the 1640s. 'The majority of the pottery is post-medieval in date. Some is of local manufacture but the bulk consists of north-Devon sgraffito and gravel-tempered wares, tin-glazed earthenwares and 19th-century transfer-printed wares. Spanish wares included amphora sherds and fragments of Merida-type wares. Twenty-seven clay pipe bowls and a large number of stem fragments, most of which came from disturbed contexts, were found. They date from the late 17th to the 19th centuries, and are English, Dutch and Irish in origin. Other finds included two tokens, ■ bronze needle, a decorated bone scoop, ■ perforated, polished bone disk, the remains of five human skulls and some glass, wood, leather and iron objects.'

At Poole in Dorset, investigation of the Studland Bay wreck continued, with work concentrating 'on the starboard side of a Spanish merchant vessel of c.1500, about 23 m. long. The 1987 season completed the excavation of c. 75% of the main coherent part of the wreck site.' Among the 189 finds recorded, there were many small fragments of wood; in addition, 'more Iberian coarsewares and Isabela polychrome pottery have been recovered, and Columbia plain tin-glazed pottery was found for the first time. Other finds include a glass fragment probably of Mediterranean origin.'

The excavation took place in London at the City of London Boys' School on the Victoria Embankment. 'Features recorded on top of medieval dumping were sealed by ■ burnt horizon of late 17th-century date, probably from the 1666 Fire. The area to the S. of the site appeared to have been reclaimed from the River Thames around this time, and an associated timber rivetment was recorded at the S. limit of the excavation. The rivetment is thought to represent the construction of the new wharves during the post-fire rebuilding along the waterfront in this area. The new land behind the rivetment was consolidated by the driving of several hundred timber piles; some of these were re-used from up to five 17th/18th-century

sailing vessels and a number are painted and/or decoratively carved.'

At Poole in Dorset excavations disclosed 'a simple rectangular building on the frontage of Thames Street, constructed on reclaimed land of c.1500. This building, which had been extended, corresponds with cartographic evidence of the 18th-century Free School. Beneath the reclamation make-up was a beach containing over sixty timbers from a boatyard store, which were being seasoned in the tidal sand. The analysis of this deposit in conjunction with the National Maritime Museum will provide important information on coastal craft of c.1500.' In Scotland, at York Place, Aberdeen, an excavation revealed 'disarticulated human remains from at least three individuals in ■ beach-sand deposit. In 1647 Aberdeen suffered severely from plague, and a contemporary reference suggests burial in the sands. This spot is traditionally held to be one of the main burial areas. These bones were probably disturbed during building work nearby, possibly in 1891, when sewer construction is said to have uncovered ■ large number of skeletons.'

From Ryhall, Stamford, Leicester, there is a report of the discovery by workmen in February 1987 of one gold and 3,219 silver coins ranging in date from Elizabeth I to Charles I. Following the discovery an excavation was mounted to assist the coroner to determine whether the hoard was treasure trove. 'The excavation revealed a further 42 silver coins associated with the remains of a rectangular oak box, 0.34 x 0.21 m., with a minimum height of 80 mm. and minimum thickness of 5 mm. Some of the coins were still stacked within the box and impressions of others were discernible on the surface of the base. The box had been placed in ■ shallow pit 0.38 x 0.30 x 0.16 m. deep. To the S.W. ground disturbance, possibly caused by a hedge line or tree, was noted, suggesting that the hoard had been buried near ■ landmark, perhaps to facilitate recovery. Examination of the coins at the British Museum revealed that several had been struck from the same dies. This is the largest Civil War period hoard of coins discovered this century, with a face value on deposition of £158.0.6d. The hoard was pronounced to be treasure trove at Oakham Crown Court on December 4, 1987.'

In advance of road-widening, excavations were undertaken in Old Castle Lane, Barnstaple, Devon, which revealed 'a second 17th-century pottery kiln. This kiln resembled that discovered in Potter's Lane in size and design. However in this instance the construction used fully-fired bricks from the firing chamber and flue walls, with large tiles from the chamber floor. These tiles respected a central pedestal within the chamber; a further two pedestals set on the tiled floor may have been later additions. Pottery waste-dumps filled both the kiln and its associated stoke pit. These included both fine sgraffito and domestic earthenware, the former suggesting a *terminus ante quem* of the mid to late 17th-century for the kiln's last firing.' As to the other kiln in Potter's Lane, excavation indicated it to be a 'double-flue updraught kiln of early to mid 17th-century date. The kiln consists of ■ sub-circular chamber with ■ one-piece clay base, opening out into two flues separated by ■ central pedestal. The walls are

constructed of random, partially-fired clay bricks. Traces of the collapsed arches survive.' From a further description of the kiln it is noted that 'In all a total of approximately 3·5 tonnes of pottery was recovered from the excavation, amongst which are most known North Devon vessel types and some hitherto unrecorded forms. Other finds include an almost complete stamped ceramic fire dog and several relief-glazed tiles.'

On the theme of ceramic production, at Riddings Lane in Wednesbury, West Midlands, excavations in advance of development 'revealed two groups of pits containing 16th- and 17th-century Cistercian-type ware beakers and glazed coarse-ware bowls, including wasters and saggars, which suggest the existence of

a kiln on the site. Wednesbury's pottery industry is well-documented from the 15th-century onwards, but no kiln has yet been located.' In London, at 38-46 Albert Embankment, Lambeth, an excavation on a redevelopment site 'in the vicinity of a pottery recorded on maps of 1746, indicated that the major development of the site took place in the 17th-18th centuries and was probably associated with the pottery. Large quantities of discarded kiln furniture and wasters were found—of Delft ware in the earlier levels and stoneware in the later levels. Some fragments of porcelain indicate its early manufacture on the site. One sherd had been used as a test piece with numbered samples of glazes applied and subsequently fired to test their suitability for further use.'

SCIENCE AND DISCOVERY, 1988-89

Armenian earthquake.—At 0741 U.T. (Universal Time) on December 7, 1988 a severe earthquake devastated northern Armenia, a republic of the Soviet Union. Although the area is prone to earthquakes, the tremor ■ the strongest ever experienced in the region.

The devastated region lies in the Lesser Caucasus, and is part of a long belt of mountains extending from Gibraltar to the Himalayas. The belt started to develop about 150 million years ago as the crustal plates carrying Africa, Arabia and India collided with the Eurasian plate. The area is dominated by ■ north-south compression in the rocks due to the continental collision between the Arabian plate and the Eurasian plate, which are converging at ■ rate of about 3 cm. per year. The area is also characterized by reverse faulting and folding associated with large strike slip faulting.

Armenia lies in ■ very active earthquake zone and there are a number of shocks each year. Tremors of magnitude 6.9, the magnitude of the main shock on December 7, occur at least once ■ month. They do not usually attract attention because they occur in sparsely populated areas. On this occasion the destruction was on a large scale because the epicentre of the earthquake lay at ■ depth of 10 km., just a few kilometres north-west of the town of Spitak, which was virtually destroyed. Severe damage was also caused to the towns of Leninakan and Kirovakan. Official figures put the death toll at 25,000, with about half ■ million people left homeless. Deaths, injuries and damage were also reported in Iran and Turkey. A second tremor of magnitude 5.9 was recorded 4 min. 20 sec. after the main shock. A French-Soviet team of seismologists and geologists visited the area to monitor the after-shocks and to map the surface breaks. The fault scarp was mapped for 13 km. and showed a reverse dislocation of up to 1.6 metres.

Auroral display.—The most spectacular auroral display of the last half-century was visible throughout most of the world on the night of March 13, 1989. The display was seen as far south as Texas in the northern hemisphere, and the corresponding display in the southern hemisphere was seen ■ far north ■ Queensland, Australia. The aurora was only the visible sign of ■ magnetic disturbance caused by solar activity during the previous days. Solar activity peaks at approximately eleven-year intervals and the current peak is expected during 1989-90. Already the cycle is rivalling the strongest on record, a record peak of activity which occurred in 1957.

As far as the display of March 13 is concerned, the first signs of what was to occur became evident on March 6 when a large and complex group of sunspots appeared on the Sun's eastern rim. Intense solar flares were seen in the region of the spots on March 6, 9 and 10. The event on March 9 was spectacular: an observer at the National Solar Observatory at Sunspot, New Mexico, remarked that he had never seen anything like it. By March 10 the giant sunspot group was approaching the centre of the Sun's visible disc, pointing directly towards the Earth. A giant

flare, the largest flare ever observed, erupted from the spot group on March 12 and it ejected particles which were subsequently intercepted by the Earth. This caused ■ severe disturbance in the Earth's magnetic field, creating havoc with communications, and subsequently caused the auroral display.

Auroral activity is limited usually to high latitudes but on occasions when the Earth's magnetic field is grossly distorted, the band of visibility moves to lower latitudes and the aurora becomes visible in regions where it is not normally seen. Magnetometer readings taken on March 12 showed that the Earth's magnetic field ■■■ in turmoil. An observer in Northern Ireland reported seeing ■■■ aurora in the early hours of the morning of March 13. During the daylight hours radio communications were chaotic. At nightfall, about 1900 U.T. (Universal Time), the aurora could be seen from the south of England. At its peak of activity, it filled the southern half of the sky. Perspective caused the rays to appear to come from a single point in the sky, producing what is known ■■■ a corona. Activity was observed all night, and as the belt of darkness moved westwards the aurora became visible in America. In the James Bay area of Canada it was reported that the magnetic effects of the activity were strong enough to cause failures in the electricity supply.

Brown dwarf discovered.—There have been many claims of identification of brown dwarf stars in the past but none have been substantiated. Brown dwarfs are what one may call failed stars because they do not contain enough mass for nuclear reactions to start in their cores. If brown dwarfs exist in large numbers then they may make up the dark matter in our galaxy. From studies of the motions of stars in the disc of the Milky Way, it is known that there exists about twice the amount of matter that can be observed optically.

David Latham, of the Harvard-Smithsonian Center for Astrophysics, and colleagues at the Tel Aviv University, Israel, and Geneva Observatory, Switzerland, have been running ■ project for over ten years to survey standard stars and establish their radial velocities. In the course of this work they found by accident an object which appears to be a companion star to the star known ■ HD 114762. The companion star is in orbit round HD 114762 but it could not be seen. The orbiting object was detected because of the effect of its behaviour on the main star, which moved in a cyclic manner with period of 84 days. This implies that the companion is in ■ orbit similar to that of Mercury around the Sun. The low velocity amplitude of the displacement implies that it has a mass of about 11 times that of the planet Jupiter, or about 1 per cent that of the Sun. This mass puts the star into the category of a brown dwarf or ■ very large planet. In this case it is thought to be unlikely that the object is ■ planet because the inclination of the orbit to the line of sight is unknown and so the mass may be much larger than the lower limit quoted.

The discovery of one brown dwarf does not prove that all the matter unaccounted for in our galaxy is

in the form of such objects. However, the discovery should provide the incentive for others to follow up the work with larger and more sophisticated equipment.

Chiron a comet?—The discovery in 1977 of a minor planet circling the Sun at a distance beyond that of Saturn caused quite a stir. One school of thought suggests that this object, named Chiron, could be one of a series of bodies with similar orbits. This theory would imply the existence of a second minor planet belt, similar to the one between Mars and Jupiter. However, no further objects have been discovered, although Charles Kowal, an astronomer who has carried out a major survey, says that it is still not known whether Chiron is unique or the largest member of a population of such objects. An alternative idea that Chiron was a dormant cometary nucleus in the deep freeze of the outer solar system has been considered, and observations over the last few years indicate that this is likely to be the case.

In February 1988, Chiron suddenly brightened up by about 0·6 magnitude. The brightness persisted for at least a month, suggesting possible cometary activity. This idea was strengthened in April when it was found that the object had developed a coma. The coma was recorded on a CCD (charge-coupled device) image on April 11 and 10 using the 4 metre reflector at Kitt Peak, Arizona. It is assumed that the coma was formed by dust and carbon dioxide escaping from the surface of Chiron. Independently, Schelte J. Bus and colleagues at the Lowell Observatory in Arizona carried out a series of observations over the six-hour rotational period of Chiron and discovered brightness variations during the rotation. When the experiment was repeated, a corresponding but brighter light curve was found. These results confirmed those obtained at the University of Hawaii.

All this data gives very strong evidence for a cometary origin. If Chiron is found to be a true comet, then it will be the largest to have been identified. It has a diameter of approximately 180 km., compared with the average diameter of 16 km. of Halley's Comet.

Close encounter with minor planet.—Henry E. Holt, a retired geologist, spends much of his time helping Eugene and Carolyn Shoemaker in their search for near-Earth asteroids. He identified short trails on two exposures made on March 31, 1989 using the Palomar 45 cm. Schmidt telescope. Of principal concern were the trails from a fast-moving object also recorded on the photographs. By comparing the trails with those on follow-up exposures made on April 2, 3 and 4, Holt recognized a dramatic slowing down in the motion against the star background. This was interpreted as the motion of an object which was travelling almost directly away from the Earth. Using Holt's observations and a further one taken on April 9 with the 150 cm. reflector at Harvard College Observatory, Brian Marsden, of the Minor Planet Center at Cambridge, Massachusetts, calculated that the object was in a near elliptical orbit inclined at 5°

to the ecliptic and was circling the Sun in 1·03 years. On March 22 it passed within 690,000 km. of the Earth. This is less than twice the distance to the Moon, and makes the encounter the closest in recorded history for any minor planet or comet.

It is estimated that the minor planet, designated 1989FC, has an absolute magnitude of 21, i.e. the brightness it would have when it is 1 A.U. (astronomical unit) from the Earth and Sun. (1 A.U. is the mean distance between the Earth and the Sun.) This is extremely faint and implies that the planet cannot be very large. The reason it was not picked up on its approach to the Earth was that it came from approximately the direction of the Sun. The predicted size depends on the type of the asteroid. If it were a stony body, a diameter of about 200 metres has been suggested, but if it were a darker carbonaceous type the diameter may be twice that value. These values make the object quite small compared with other 'Earth-crossing' minor planets. Even so, if impact with the earth had taken place the effects would have been disastrous.

Cold fusion controversy.—The scientific sensation of the year was the announcement in March 1989 by Stanley Pons of the University of Utah and Martin Fleischmann of the University of Southampton, and independently by Stephen E. Jones and colleagues at the Brigham Young University in Utah, that they had produced continuous power by nuclear fusion in a test-tube at room temperature. The experimenters placed a rod of palladium metal wrapped with platinum wire into a test-tube filled with deuterium (heavy hydrogen). An electric current was then passed through the cell. Deuterium nuclei, called deuterons, collected on the palladium and became so tightly packed that they moved through the lattice of the metal and fused. The scientists claimed that the output of energy was four times the power supplied. In addition to the heat generated, neutrons and tritium were produced, indicating that fusion had taken place.

The traditional method of communicating scientific discoveries is by submitting a paper to a reputable journal, which referees and checks the work. This discovery was announced in the newspapers, with accounts in the *Wall Street Journal* and the *Financial Times*, and at a press conference held at the University of Utah. Subsequently, other establishments tried to duplicate and confirm the work and claims of success and failure appeared in the newspapers and in scientific literature throughout the spring of 1989. By the middle of the year, the consensus of opinion was that the original claims could not be substantiated. The evidence does not prove that the observations of cold fusion were wrong, but much of the scientific community seems inclined to dismiss the work because they cannot with confidence replicate the experiments and results.

Dinosaurs at the Poles.—The traditional view that dinosaurs were creatures that inhabited only tropical and sub-tropical regions has been seriously undermined over the last few years. Australian

palaeontologists working in south-east Australia have discovered fossils of dinosaurs that lived about 130 to 105 million years ago. At this time, the early Cretaceous period, Australia was situated much nearer the South Pole and temperatures averaged 5°C and probably fell to -6°C. Even during the summer months the weather would have been cold and wet.

The Australian scientists identified three or four species of plant-eating ornithodir dinosaur called hypsilophodonts, three species of meat-eating dinosaur (theropods), flying reptiles (pterosaurs), freshwater reptiles (plesiosaurs) and freshwater turtles. They were all relatively small creatures, the largest being 2 metres high. For many months these animals must have lived in darkness or semi-darkness and there has been speculation that the creatures may have developed extra large eyes and visual acuity. It is possible that during the winter months they may have hibernated or reduced their levels of activity in some other way. They could have migrated long distances to avoid the worst of the winter, although this is thought to be unlikely because there was no shortage of vegetation during that period.

The discovery in Australia supports the work carried out by American scientists, who have found similar evidence in the Arctic of dinosaurs having inhabited non-tropical regions. Workers from the U.S. Geological Survey reported in 1987 that dinosaur fossils had been found in northern Alaska, where conditions would have been similar to those in Australia. Until recently palaeontologists had assumed that in Cretaceous times the Arctic and Antarctic were warm and so the discovery that dinosaurs lived in these regions would not have been surprising. However, work during the last few years on fossils of vegetation and invertebrates in the polar regions, and other indicators, have shown that temperatures near to the Poles during the cretaceous period was quite low and reached at the most to 12°C.

Dinosaur egg fossil.—Thousands of dinosaur remains have been found at the Cleveland-Lloyd quarry in Utah. The latest find is the fossilized remains of a dinosaur's egg, which was still in the oviduct of the mother at the time of her death some 150 million years ago, in late Jurassic times. At that period the area of the quarry was a shallow lake or marsh and it is possible that the dinosaur became trapped in the mud and subsequently died. Alternatively, some form of illness might have prevented the egg being laid.

The egg was examined by a team led by Karl Hirsch of the University Museum in Boulder, Colorado. The team found that the egg was broken but the two halves remained attached. Computerized axial tomography scans have shown what was possibly an early embryo in one half of the egg. The team thinks that the egg was broken in the oviduct during the mother's death and that the two halves held together until they began to fossilize. It has been estimated that the original shape of the egg was elliptical and that it was approximately 110 mm. long and 55 mm. wide, with a volume of about 175 cc. The team has shown that the egg had an outer secondary layer of

shell. This is a pathological sign which is familiar in modern reptiles and indicates that there was a delay in laying the egg. There are signs that at the time when the egg was broken the shell was still pliable: the shell is distorted and has inverted curvature in places.

It has not been possible to identify what type of dinosaur was responsible for the egg because the egg could not be linked directly with any particular skeleton. Remains of several types of dinosaur have been found in the quarry but it is thought that the theropod *Allosaurus* could well be responsible.

Dinosaur extinction theory.—About a decade ago the discovery that Cretaceous-Tertiary boundary layers of rock were rich in iridium, a relatively rare element in the Earth's crust, suggested an explanation for the extinction of the dinosaurs. The amount of iridium present in the layers of rock corresponds with the iridium content of numerous extraterrestrial bodies. This led to the formulation of a theory that a large body some 10 km. in diameter had collided with the Earth about 65 million years ago, producing conditions which killed the dinosaurs. Although the theory has had much support, there has been strong opposition from some geologists who claim that the origin of the iridium is terrestrial and that the rock layers are of volcanic origin.

Recent work by chemists Meixun Zhao and Jeffrey Bada at the Scripps Institute of Oceanography at the University of California at San Diego, seems to give support to the impact theory. They have found amino acids in the sediments at Stevns Klint, Denmark, which are exceedingly rare on the Earth. These amino acids are, however, found in carbonaceous chondrites, relatively rare types of meteorite rich in organic compounds. The two amino acids identified, α -amino isobutyric acid and racemic isovaline, were isolated using standard chromatographic techniques. The latter compound was found to exist in both right- and left-handed forms, a result which would not be expected if the sample had been biologically contaminated.

Despite this discovery, the case for the iridium having an extraterrestrial source is still not certain. The amount of the acids and their spatial distribution within the sediments is surprising when one considers the conditions that would have obtained at the time of an impact. In addition, the amount of α -amino isobutyric acid is about five times the maximum one would expect to find in carbonaceous chondrites. Zhao and Bada consider that this would not invalidate the impact theory if the impacting body were a comet, because the elements which compose amino acids are far more abundant in comets than in meteorites. However, one point that requires explanation is the fact that the amino acids were found just above the Cretaceous-Tertiary boundary layers, not in the boundary clay itself.

Another flaw in the impact theory of the extinction of the dinosaurs is the lack of evidence pointing to the location of the crater which a 10 km. object might be expected to cause.

Recent studies have put forward the idea that what is known as the 'Manson Structure', situated in Iowa,

might be this crater. Scientists have been aware of the existence of the crater since the 1960s but had not been able to date it accurately before; a value of 61 millions years with an uncertainty of 18 million years was the best estimate. Now Mick Kunk of the U.S. Geological Survey has produced an argon-40 and argon-39 isotope date of 66 million years, to within a few million years. The crater is at present buried under 30 metres of glacial till but at the end of the Cretaceous period it would have lain under a shallow sea.

The main objection to the theory identifying the Manson Structure as the crater of the meteorite that led to the dinosaurs' extinction is that an impact in shallow water or on dry land could not have generated the huge tsunami known to have occurred in Texas at that time. A suggestion has been put forward that the tsunami was generated in the open ocean. Possible explanations are that it was generated by a second impact or by a submarine landslide triggered by the impact in Iowa. There is not doubt about the severity of the tsunami. An unusual sandstone bed, 70 cm. thick in places, has been found sandwiched between strata of mudstone. This layer has been found to be packed with shell fragments, pellets of clay minerals and lumps of mudstone.

Studies of the Cretaceous-Tertiary boundary clays have revealed not only high levels of iridium but also quantities of soot far greater than would have been present under normal conditions. What is significant about the soot is that at a variety of locations throughout the world the carbon concentration is constant and the isotopic composition is the same. This indicates that the soot came from a global fire. All this evidence strengthens the case for an impact being the cause of the extinction of the dinosaurs.

Earth's magnetic field changes.—Periodic magnetic reversals in the Earth's magnetic field have been recognized for a long time. These reversals have been identified by the direction of the magnetism left in rocks when they were formed. The changes are thought to occur fairly rapidly, geologically speaking. In the same way, any small changes in the strength of the overall magnetic field are recorded in the rocks. At the moment, typical rates of change in the direction of the magnetic field are about a few degrees per century. Changes in the strength of the field are attributed to internal sources and are of the order of hundreds of gammas per century.

The behaviour of transitional fields during geomagnetic reversals has been one of the principal concerns of the palaeomagnetist for some time. The Miocene lava flows on the Californian-Oregon border have been under close study since the 1960s and recently have been reinvestigated by researchers from the U.S. Geological Survey, the University of California at Santa Cruz and the Université des Sciences et Techniques at Montpellier. Two members of the group, Robert Coe and Michel Prévôt, undertook a detailed extension of this study and identified more rapid rates of change in the Oregon lava flows than have hitherto been found anywhere. Coe and Prévôt considered every other possibility that might explain

the results, but none were satisfactory. The observations are straightforward and the techniques used to measure the magnetic fields are standard. In addition, fields measured in lava flows are considered to be the easiest to determine. Nevertheless, the scientists realize that the results they have obtained are virtually unbelievable. The nub of the problem is whether the observed changes are true records of magnetic field changes. If they are, there will have to be a drastic reappraisal of palaeomagnetic theories.

Echidna's electro-receptors.—*Whitaker's Almanack 1989* included a report of the discovery of electro-receptors in the bill of the platypus by research workers at Monash University, Melbourne, Australia. Following their success in the study of the platypus, the researchers turned their attention to the echidna, the only mammal apart from the platypus to lay eggs and suckle its young, and noticed similar structures in its snout.

The researchers electrically stimulated small areas of the echidna's snout and recorded the transmission of the resulting nervous activity to the brain. The mammal's receptors are so sensitive that they can detect fields as weak as one millivolt per centimetre but the response is not so vigorous as that of the platypus. Also, the nerve fibres in the echidna are smaller and did not react when stimulated. The echidna's system seems to work best in alternating electric fields at about 20 hertz, whereas the platypus' system peaks at 100 hertz.

Work is still being carried out on the way the animal uses these abilities when searching for food. It is thought that the echidna's electro-receptors enable it to detect electrical signals given off by ants and worms, but the manner in which it does this is not yet known.

Europe's meteoritic crater.—One of the principal features of the surfaces of the non-gaseous bodies in our solar system is the high concentration of impact craters. The Earth would have similar features but for the rapidity with which erosion takes place and removes evidence of such surface features in what is geologically speaking a relatively short time. Even so, over the last few decades there has been a dramatic increase in the number of meteoritic scars discovered and currently over 100 such features are known. Study of photographs taken from space has revealed circular features which could not have been identified from the surface. One such circular feature, about 320 km. in diameter, has been discovered in Czechoslovakia and identified from photographs taken by the Meteosat 2 weather satellite.

Michael Papagiannis and Farouk El-Baz of Boston University identified the structure, which is centred approximately on the city of Prague, and have named it the Praha Basin. It is estimated that the impact which caused the Praha crater took place about 15 million years ago. The researchers have suggested that a meteoroid of about 80 km. in diameter was responsible. If this is the case, the explosion produced by the impact would have been a million million times more powerful than the explosion of the atomic bomb.

at Hiroshima. An explosion of such magnitude would have generated a huge cloud of dust and this would have had a marked effect on the Earth's weather. Moldavite tektites, glassy pebbles known to be associated with major impacts at other locations throughout the world, had been found in the past near an arc coincident with what is now identified as the southern rim of the crater, and investigations will no doubt reveal further evidence of the impact.

The Praha feature is the third large scar of possible impact origin in central Europe. The other two are the Rieskessel (24 km. in diameter) and the Steinebasin (3·4 km. in diameter), both of which are in Germany. Both are estimated to be approximately 14·8 million years old.

Evolution theory upset.—It has been accepted for a long time that the Milky Way galaxy was formed when a spherical cloud of gas collapsed under its own gravity. The collapse left a spherical halo of globular clusters encasing the spiral structure of the galaxy. There are about 125 globular clusters in the halo, each containing tens of thousands or millions of stars. The conventional theory holds that the Milky Way was formed over a period of about 200 million years, and this rapid formation implies that all the globular clusters should have approximately the same age. Recent work has upset this relatively simple theory.

Michael Bolte, of the Dominion Observatory in Victoria, Canada, has studied the globular clusters NGC 288 and 362 and found that the former is two thousand million years older, and the latter two thousand million years younger, than other clusters in the galaxy. A colleague of Bolte, Peter Stetson, focused his attention on another cluster, Palomar 12, and found it to be five thousand million years younger. These values have been confirmed by other researchers. The results have been made possible because of the use of charge-coupled devices (CCDs), which are so sensitive that more detailed and more accurate results can be achieved than was possible using photographic plates.

If further research confirms that the clusters have such a range of ages, the standard theory for the formation of galaxies will no longer hold. Bruce Carney of the University of North Carolina claims that the work he has carried out on 1,500 single widely-spaced stars, which account for 99 per cent of the stars in the halo, agrees with Bolte and Stetson's findings. So do the results of recent, unpublished, work carried out at Yale University.

There has been a rush of new theories to explain the results but as yet there is no consensus of opinion. A growing number of astronomers accept the idea that any substructure in a protogalaxy is likely to evolve over a long period of time into small systems of stars, such as globular clusters or dwarf galaxies, before progressively larger systems such as the Milky Way develop.

Factorizing high numbers.—A team of computer scientists from the United States, Netherlands and Australia has broken all previous records by finding

two large prime factors for a 100 digit number. The project organizers used a method known as a quadratic sieve. This discovers factors of a given number by finding two numbers that, when squared and divided into the original number, leave the same remainder. Once the two numbers have been found, the factors can be calculated. This method is like using a sledge hammer to crack a nut if the number is low, but for very large numbers it is the fastest method known. An advantage of the method is that the work can be distributed over a large number of computers. A computer at the Digital Equipment Corporation in Palo Alto, California, did much of the basic work while computers elsewhere shared the rest of the calculation. By the 26th day of the exercise enough data had been collected to factorize a 100 digit number into prime factors containing 41 and 60 digits.

In itself this discovery is of interest to the mathematician, but it also has serious implications for the security of many cryptographic codes used by government agencies and industry. The ability to factorize high numbers provides a method for breaking security codes which are derived from a widely-used cryptographic system. This system is based on the fact that although large prime numbers can be computed easily, factorizing the product of two such numbers has been impractical. Each user of the system chooses two large prime numbers and publishes the product. A message is converted into a series of numbers by a conventional mathematical method and is then encoded by a mathematical process which is based on the published number. If the number can be factorized then the code can be broken easily. In the past the security of the code has been based on the fact that it would take too long, millions of years, to factorize the published number. Now it can be done in less than a year and a new method of coding will have to be devised.

Great attractor or great wall?—All the galaxies in our region of the universe appear to be travelling in the same direction. In order to explain this, astronomers have put forward the idea that there is a large concentration of mass whose gravitational pull is causing this particular motion. This mass has been referred to as the 'great attractor'. To produce the observed motion (about 600 km. per second relative to the overall expansion of the universe) would require a mass 10^{16} times the mass of the Sun and situated about 200 million light years away. Current ideas about the formation of galaxies and the evolution of the universe make such a body unlikely.

Albert Stebbins and Michael Turner of the University of California at Santa Barbara have come up with an entirely new idea which they claim explains the observations without assuming the existence of a great attractor. They think the direction of the galaxies could be due to the repulsion of a defect of space caused by a relatively recent phase transition in the universe. During a phase change, e.g. when steam condenses to liquid water or water freezes to ice, there is a release of energy in the form of latent heat. Cosmologists believe that during the first

second of the existence of the universe there was a phase change from one energy state of the vacuum to another form of energy. This would have provided the mechanism which made the universe expand out of its initial state, a mechanism known as inflation.

Phase changes produce other features in addition to releasing energy. As solid ice forms, it may produce cracks in the solid, known as defects. Analogous defects might form in the structure of space-time, producing very long thin walls which would have the effect of cutting off different regions of space-time from one another. Although such defects may have occurred in the first moments of the existence of the universe, the chance of one existing nearby at the present time is remote. But Stebbins and Turner have suggested that smaller phase changes may have occurred at a much later date when the temperature was about 3,000 K. The transition involving neutrinos may have created walls which could still affect space. The pressure in such a wall would be negative with the result that it would produce a negative gravitational field. This 'great wall' would have the same effect on the galaxies as the 'great attractor'. More research is needed to verify these ideas.

Halley's Comet.—Much publicity was given to the achievements of the Soviet and European space probes when they flew close to the nucleus of Halley's Comet in 1986. This flyby permitted astronomers to gain their first glimpse of the nucleus of a comet. Groundbased observations also provided information which has provoked considerable discussion.

A group of astronomers from the United States, France and Australia used the 190 cm. (74 inch) reflector at the Mt. Stromlo Observatory near Canberra, Australia, to observe the comet. Their results suggest that the comet is made of material unlike that of any other body in the solar system. Susan Wyckoff, a physicist at the Arizona State University at Tempe, commented that the carbon in the comet's nucleus differed from that found elsewhere in that the ratio of carbon-12 to carbon-13 varied between 40 to 1 and 65 to 1. This compares with a ratio of 89 to 1 found in rocks on the Earth and Moon, the atmospheres of the planets and the Sun.

Several explanations of this difference have been proposed. One is that a nearby supernova 'splattered' the proto-Sun and the surrounding nebular disc before the planets were formed, within about 10 million years of the formation of the Sun. The theory suggests that the supernova material did not mix thoroughly with the gaseous disc and that Halley's Comet was formed from an uncontaminated region. This is in line with the theory that comets were formed in a belt well beyond the orbit of Neptune, an area which could well have escaped the supernova contamination. Another explanation suggests that the comet came from interstellar space. This is supported by the fact that the carbon ratio is in agreement with that found in interstellar gas. Wyckoff, however, favours the former explanation. The problem might be solved when another comet is studied in detail and Comet Brorsen-Metcalf is

favourably placed for observations from the northern hemisphere in late 1989.

Hubble Constant refined.—Much work has been carried out recently on gravitational lenses and the effect of such a lens on the time taken by light to come from a distant quasar; light travels in differing ways round gravitational lenses. The work is leading to a new method of investigating the universe and to the possibility of obtaining a more accurate value for the Hubble Constant. The Hubble Constant is used for measuring the rate at which the universe is expanding and there exists an uncertainty of about a factor of two in the value currently used.

One of the studies involves the images of the 'double quasar' 0957+561, which have been analysed by a team of French and Spanish astronomers over many years. They found that the fluctuations in brightness of the two objects kept in step but that there was a constant difference of about 415 days. This showed that both images had a common source. In addition, the relative brightnesses of the two images changed slightly with time. It is thought that this was due to microlensing, the effect caused by an individual star in the galaxy passing in front of the images and acting as a lens. The time the second quasar image is delayed provides information on the mass in the galaxy causing the lens effect.

This information, together with the brightness of the images, gives information useful in determining the Hubble Constant. So far these studies have not improved the accuracy of the constant, but they have set a fairly reliable value for the upper limit which is consistent with other investigations. A precise value for the constant could be obtained from a system which had three quasar images.

Ice age theory upset.—Until recently an astronomical theory known as the Milankovitch model was widely accepted as an explanation of the dates of the ice ages. The theory is based on the known changes in the tilt of the spin axis of the Earth and the direction of this tilt. Work carried out by geologists at the U.S. Geological Survey suggests that the Milankovitch model is not completely in accordance with geological data. The geologists obtained data from sediments from a site in southern Nevada known as Devil's Hole. Water flows into this region from a large catchment area and has deposited a vein of calcite for over a quarter of a million years. It is possible to measure the ages of the different layers of the calcite by recording the ratio of thorium-230 to uranium-234, or the ratio of uranium-234 to uranium-238. The results of these measurements indicate that the vein of calcite built up gradually between 50,000 and 300,000 years ago. A climatic record can also be obtained from the vein by measuring the ratio of oxygen-16 to oxygen-18, both stable isotopes in the atmosphere. However, the value of the ratio depends on global temperatures. The data obtained shows that the temperature variations recorded in the vein of calcite are not in step with those obtained by analysis of deep-sea sediments or from the ratio of

isotopes in air bubbles trapped in ice-sheets, although they show the same pattern of variations.

The new study suggests that the previous interglacial period (the warmer periods between the ice ages proper) started earlier than 147,000 years ago and possibly as much as 163,000 years ago; earlier work has indicated that it was warmest about 125,000 years ago. The new study does not completely conflict with older theories or the Milankovitch model. Statistical analysis shows that other rhythms emerge in addition to the cycles of warming and cooling. It would appear that the Milankovitch model is only one factor in an explanation of the ice ages and that there were other major contributory factors, such as changes in ocean currents.

Lindow Man.—Four years ago the upper torso of a man was dug up from the bog at Lindow Moss in Cheshire. Studies at the time indicated that the man died in the middle or late Iron Age but more recent work has shown that it was more likely to have been early Roman times. The man, nicknamed Pete Marsh by archaeologists, was garrotted before being dumped in the bog. Evidence for the date of the event is contradictory and could indicate any of three dates; 4th century A.D. (at the end of the Roman occupation); 1st century A.D. (early Roman times); and between 200 and 760 B.C. (Iron Age).

Difficulties in dating the event have arisen for several reasons. Radio-carbon dating of the body tissue was carried out at the Atomic Energy Research Establishment at Harwell and the Radio-carbon Accelerator Unit at the University of Oxford. The dates obtained by the two establishments were several centuries apart, the Oxford studies giving the early Roman period whilst the Harwell work seemed to indicate a late Roman date. Radio-carbon dates for the peat which surrounded the body were found by both establishments to be from the Iron Age. Another problem is the ritualistic nature of the murder, which points to the Iron Age rather than to dates during the Roman occupation of Britain.

Recent studies carried out by John Gowlett (formerly at Oxford but now at the Institute of Prehistoric Science and Archaeology at Liverpool) and Robert Hedges and Ian Low from Oxford, on the body and the contents of the stomach and on the peat surrounding the body seem to have solved the problems. The results for the body and the contents of the stomach all fall within the range of 2 B.C. and 119 A.D.. The date for the enclosing peat agrees with that obtained in the earlier studies, making the peat much older. There now appears to be some consistency in the radio-carbon dating, but in spite of this data argument continues over the time of the killing.

Metallic hydrogen.—Some theoretical physicists have predicted that under very high pressures hydrogen molecules would separate into individual atoms. They believe this would result in a metal with the atomic nuclei immersed in a sea of conducting electrons. Others have predicted that the metal would be solid with the nuclei arranged in a

crystalline lattice, as in other metals. Work carried out by Ho-Kwang Mao and Russell Hemley at the Carnegie Institution at Washington has provided strong circumstantial evidence that at very high pressures hydrogen is a black solid. The pressure required was 2.5 million atmospheres.

Mao and Hemley obtained their results by compressing the hydrogen between two diamond anvils at 77 K. They were unable to confirm that the solid produced by the process was metallic hydrogen because the sample was too small to be checked for electrical conductivity. The question may be settled using X-ray crystallographic techniques. Mao and Hemley used a sample of hydrogen several cubic micrometres in volume and gradually increased the pressure in stages, holding it at a given value for several hours or days. The tiny diamond anvils failed at between 250 and 300 gigapascals. As the pressure was increased, it was possible to observe the alterations in the structure of the gas, which changed from an insulator to a semiconductor and a semi-metal. The changes were observed visually, through the transparent diamonds, and also by monitoring the spectral changes.

The work is of importance to the study of superconductors, as it is thought that metallic hydrogen might be superconducting at high temperatures. It will also help in the study of the major planets, in particular Jupiter and Saturn; if the conditions under which hydrogen becomes a metal are understood, it will be possible to determine the percentage of metallic hydrogen in the planets and so to determine what contribution this makes to the planets' electrical properties.

The oldest insect.—In the early days of their evolution insects did not fossilize easily because they lacked wings and they had relatively soft bodies. Consequently early insect fossils are difficult to find. The discovery by Conrad Labandeira and colleagues at the University of Chicago of the fossil remains of the head and thorax of an insect that lived about 390 million years ago is unusual and most rewarding. It is claimed that this fossil is the remains of the earliest known insect, and also that the fossil is the earliest record of a land animal from North America.

The fossil was found in mudstone rocks in Quebec Province, Canada. Studies have suggested that it might be related to a primitive group of insects called jumping bristletails (*Archaeognatha*). Descendants of these insects still exist today, living in soil and under stones. An alternative theory put forward by the researchers is that the insect could represent a group of insects that have evolved to give both wingless and winged insects.

The generally accepted theory of the evolution of insects is that the earliest insects appeared between 400 and 440 million years ago in the Silurian period. It is believed that their form was like that of the present-day centipede or millipede and that they evolved into different forms when new varieties of primitive land plants provided new sources of food.

Phobos reaches Mars.—The first of the two Soviet *Phobos* space probes to Mars was lost in August 1988 due to an operator's error. *Phobos 2* arrived in the vicinity of Mars and went into orbit round the planet on January 29, 1989. After adjustment to the orbit, the probe approached within 850 km. of the surface and sent back data which suggests that Mars has a magnetic field. A bowshock wave was registered on the sunward side and studies of the regions surrounding the planet reveal characteristics unlike those of the solar wind. These observations indicate that Mars is surrounded by charged particles but not necessarily that Mars has a magnetic field. Soviet experimenters have, however, suggested that this electromagnetic bubble is probably too large and distinct to be the result solely of an ionosphere. Further, the data sent back indicated the possibility that Mars has the equivalent, but weaker, of the earth's Van Allen belts. (The Van Allen belts are areas of intense radiation around the Earth in which atomic particles are trapped by the Earth's magnetic field.) A specially developed instrument capable of detecting electrons and ions with energies between 30 kiloelectron volts and several megaelectron volts was built by a team led by Susan McKenna-Lawlor of St. Patrick's College, Maynooth, Ireland. The Martian radiation belt stretches out to about 950 km. above the planet's surface, which is equivalent in terms of the size of the planet to the distance of the Earth's inner belt. A detailed analysis of this data has yet to be made.

On February 18, the probe was placed in a new, approximately circular, orbit, with a radius about 300 km. farther out than the orbit of Phobos, one of the satellites of Mars. A few days later the programme of photographing the satellite started and high quality images were obtained. Data was collected to enable the probe to approach Phobos more closely. More photos were relayed back, together with infrared spectra of Mars and the satellite. By the end of March 1989 everything was ready for a manoeuvre to bring the probe to within 50 metres of the satellite but on March 29 it was announced that contact with the probe had been lost.

Pulsar in supernova 1987A.—The supernova 1987A which erupted in the Large Magellanic Cloud in February 1987 is still providing new information on this type of event. Some of the results have fallen into line with established theories but there have also been some surprising observational data which have led to theories being revised.

One of these surprising observations is the identification of a rapidly rotating pulsar at the centre of the supernova explosion. It is generally accepted that a pulsar is a rapidly spinning neutron star with a diameter between 20 and 30 km. and a mass just under one and half that of the Sun. This new pulsar is rotating every 0.5 milliseconds, some three times faster than any previously observed. With such a rapid rotation the star should be flung apart so it is obvious that the make-up of this star is not in accordance with accepted ideas. Various theories have been put forward to explain the high rotational speed. One is that it initially rotated much more

slowly but that surrounding matter is being drawn in and the star has thus gained momentum. An alternative suggestion is that the star is not rotating at such a high speed and the visual data is caused by the vibration of the pulsar. It is thought that the neutron star is still ringing like a bell as a result of the explosion which formed the star. The idea of pulsars 'ringing' has been considered before but there is a lack of observational support. This is the only event in recent years that has been close enough to the Earth to provide detailed information. If the ringing theory is correct, it is expected that the very high vibration of the pulsar will die down fairly rapidly to reveal another periodic variation which can be attributed to the rotation of the pulsar.

Pulsar speeds up.—Pulsars are the relics of supernova explosions and are thought to be neutron stars. They spin rapidly at the time of their formation and then, in most cases, the rotational periods gradually increase as they lose energy. However, some pulsars have been observed to spin faster with time. The theory put forward to explain this is that the pulsar gains energy as a result of gas swirling onto the pulsar from a companion star. But this explanation cannot be used for the newly discovered pulsar PRS2127+11 because it does not have a companion star.

The pulsar was observed using the 305 metre radio telescope at Aricebo in Puerto Rico. It is situated in the globular cluster M15, which contains about a million stars. The pulsar was observed to be spinning at a rate of roughly nine times a second; during the few months it has been monitored, the rotational period has been found to decrease, i.e. the pulsar is speeding up.

The only feasible explanation put forward so far is that the pulsar may be moving towards a group of stars in the centre of the globular cluster, or towards the Earth due to gravitational pull of another star. However, this theory is not entirely satisfactory as the effect of such a force should be smaller than the acceleration actually observed. The star will have to be monitored for some time before the correct explanation becomes available.

The receding Moon.—There is a theory that the Moon, in its orbit round the Earth, is receding from the Earth and that at the same time the Earth is slowing down; in other words, the day is getting longer. Much of the observational proof of this theory has been derived from a study of Arabian and Babylonian records of eclipses. However, these records only go back to about 700 B.C. American and British astronomers have recently used Chinese records of solar eclipses which took place in 532 A.D., 899 B.C. and 1876 B.C. to show that the length of the day is 0.07 seconds longer than it was 4,000 years ago.

To obtain evidence from earlier periods, geologists have studied a fine band of material between 0.2 and 3 mm. thick in sediments found in the Flinders Range in South Australia. Layers of sandstone gradually built up as the material lay at the bottom of a lake or river delta some 650 million years ago. Originally it

was thought that variations in the thickness of the layers was due to the effects of the Sun. More recent studies have shown this to be wrong and that the Moon was responsible: the varying thickness was due to tidal effects. The evidence came from similar banded deposits elsewhere in Australia.

From this information George Williams of the University of Adelaide has calculated that at the time when the deposits were forming, there were 13·1 lunar months a year compared to the current 12·4 months. He also calculates that there were 30·5 days in the lunar month compared with the present 29·5, and that there were 400 days in the year. A team of workers at the University of Arizona at Tucson has deduced that the Moon — only about 346,000 km. from the Earth in Precambrian times and that it has receded since then at a rate of just over 2 cm. per year to its present distance of 384,000 km. These values are in line with the accepted values used in astronomical calculations.

Rotation of the Sun.—It has been known for many years that the Sun, being a ball of gas, does not rotate as a solid body. At the equator of the Sun the surface gases rotate in about 26 days. This period of rotation lengthens gradually with latitude until near the poles the rotational period is about 36 days. The rate of rotation of the interior of the Sun could only be deduced from theoretical considerations. Now Kenneth Libbrecht of the Big Bear Solar Observatory in California has deduced the rotational speeds below the surface using a new technique known as solar seismology. He has shown that the rotational rates recorded at the surface persist throughout the Sun's convective zone to a depth of 200,000 km. below the surface, i.e. approximately a third of the way to the centre of the Sun. Below this level the Sun appears to rotate as a solid body with a period of 27 days.

In the early 1960s, physicists were puzzled by a phenomenon known as the 'five minute oscillation'. This is a kind of pulsation of the material on the Sun's surface. For a time it was thought this was a random motion but later it was realized that the Sun was vibrating as a resonant object. The oscillations are, in fact, seismic waves in the Sun and their propagation is affected by temperature. The temperature rises as the Sun is penetrated and this causes the speed of propagation to increase. The wave front will speed up and eventually be refracted back to the surface, like light waves in a mirage. As the wave front reaches the surface it encounters an abrupt decrease in density, the visible surface of the Sun. This acts like a mirror and reflects the wave back again. This may occur many times and the waves interfere with each other, resulting in standing wave patterns which may last for days. Because the Sun is nearly spherical, these oscillations may be expressed mathematically as spherical harmonics, and information about the solar interior can be deduced from them.

Saturn's satellite Titan.—Radar signals are gradually being sent over much greater distances and signals have now been successfully reflected back

from Titan, Saturn's largest satellite. The work has been carried out by a team of astronomers from the Californian Institute of Technology in Pasadena. The team used the 70 metre radio dish at Goldstone to send the signals and the Very Large Array Telescope at Socorro, New Mexico to pick up the reflected signal. Although the strength of the transmitted signal was 360 kilowatts, the reflected signal was barely detectable. The round trip for the signal took two and a half hours.

Observations of Titan by the *Voyager 2* space probe in 1980 showed that the upper atmosphere of the satellite consists of ethane, methane and other hydrocarbons but that most of the atmosphere is, like the Earth's, made up of nitrogen. However, the pressure is 1·3 times that of the Earth's and the temperature much lower at 94 K. It had been suggested from the data supplied by *Voyager* that the surface of Titan is covered by a layer of ethane up to 1·6 km. deep. Because ethane reflects radar waves very poorly, it was expected that the return signals would be very weak. This was found to be the case on June 3 and 5, but on June 4 the signal was found to be four times stronger. This, the astronomers concluded, showed that Titan was not uniformly covered with ethane. The stronger signals were what would be expected from ice. If the bright region of the satellite is due to ice, it has been estimated that the ice is about 1,000 km. across. It has been suggested that Titan has oceans of ethane and continents of ice or some other solid substance.

Observations at wavelengths other than the 3·5 cm used for this study might provide more information but the Very Large Array Telescope can only work at that wavelength with the necessary resolution. The radio telescope at Aricebo, Puerto Rico, could provide the critical information, but it will be about ten years before this can be used.

Semiconductors from diamonds.—Semiconductors are crystals with electrical conductivity which are used in transistors and other electronic devices. For the last forty years silicon has been used to manufacture semiconductors, but advances in electronics in recent years means that better and faster semiconductors are needed. During the 1980s research in this field produced so-called exotic semiconductors, which have gone some way to satisfying the demands of industry, but problems still remain.

Until recently it was possible to use only the most stable form of an element or compound for making semiconductors, which are produced by growing a thin film of crystals of a second element on the surface of the underlying silicon (epitaxy). Attempts to put a layer of diamond on silicon using a method called chemical vapour deposition were unsuccessful because the result was a jumbled arrangement, not an epitaxial growth. However, Rabalais and Yeshayahu of the University of Texas at Houston have now revealed a new technique which punches atoms onto the sub-surface rather than laying them gently onto it. The process is carried out at room temperature, a condition which would normally generate graphite. However, the bonds binding graphite are much weaker than those in diamonds; the process involves

giving the carbon atoms enough energy to shatter the bonds in graphite but leave the bonds in diamond intact, thereby ensuring the deposited material is solely diamond.

The success in growing diamond epitaxially opens the way to the development of more efficient semiconductors. Diamond-coated semiconductors are resistant to radiation and so are ideal for space communications, nuclear reactors and military uses. They can also operate at much higher frequencies than other semiconductors because the electrons in diamond move much faster than the electrons in other materials. In addition the breakdown voltage is much higher. More research is needed, however, before diamond-coated semiconductors can be mass-produced with the quality required by modern technology.

Tapeworm vaccine.—The world's first effective vaccine against a parasitic disease has been developed by scientists in Australia and New Zealand. Usually a vaccine is used for protection against viral or bacterial infections. This new product has been developed using genetic engineering techniques and appears to be a breakthrough in the control of a tapeworm parasite, *Taenia ovis*. This causes a disease in sheep popularly known as sheep measles because spotty cysts, similar to measles in appearance are formed in the sheep's muscles. Sheep pick up the eggs of the tapeworm from dog faeces.

The development of a vaccine against a parasite has proved very difficult because the parasites are multicellular organisms which elicit a complex immune system response in sheep. Further, the parasites have evolved means whereby they can avoid the host's immune responses by altering the structure of their antigens. The vaccine is the result of 18 years of research. The main difficulty for the researchers was their inability to obtain sufficient quantities of the antigen needed to develop the vaccine commercially. This difficulty was overcome by the advent of techniques employing genetic engineering which enabled scientists to obtain large amounts of the antigen through bacterial culture. The trials carried out in New Zealand have indicated that the vaccine is successful in about 95 per cent of the cases. It is expected that the vaccine will be available for commercial use within two years.

The sheep measles vaccine is the first of a series of vaccines which it is hoped will soon be available for beef measles, pork measles and hydatids, all of which are more widespread than sheep measles. The hydatid parasite, an adult tapeworm in dogs, can cause large cysts in the human brain, lungs, kidneys and liver. Humans can also be infected by pork measles parasite. Of particular concern in South America and Africa is the tapeworm *Taenia saginata*, carried by humans and passed on to cattle which are exposed to human faeces, causing beef measles.

Turin Shroud.—The Shroud of Turin is believed by many to be the burial cloth of Christ. In 1988 the Church authorities allowed the cloth to be scientifically tested for the first time. Teams from Oxford,

Zurich and Arizona were given samples taken from the shroud, together with control samples from items of a known age, for analysis using radio-carbon dating techniques. The teams were unaware which was the genuine sample and which were the control samples. Radio-carbon analysis involves measuring the proportion of carbon-14 to carbon-12 present in an object. There is a constant amount of carbon-13 in living tissue but in dead tissue this decays to carbon-14 at an accurately known rate. By measuring the amount of carbon-14 in a sample, it is possible to calculate the length of time that has elapsed since organic matter died. In October 1988 the three teams concluded unanimously that the shroud is medieval. The results obtained indicate that the linen used in the shroud could be dated to within the range of 1260-1390 A.D., with at least a 95 per cent confidence in the accuracy of these dates.

However, the result was challenged by Thomas Phillips of the High Energy Physics Laboratory at Harvard University. Phillips put forward the theory that the body which once filled the shroud radiated light and heat, thus accounting for the image on the cloth. He also suggested that the body generated a burst of neutrons. If any of these were captured by the carbon-13, they would be converted into carbon-14 and so produce inaccurate dating. Phillips said that his neutron theory would be strengthened if it could be shown that there existed in the shroud two isotopes, chlorine-36 and calcium-41. Neither of these isotopes appears in nature and could only be created from natural isotopes by neutron capture. Robert Hedges, who headed the Oxford team of original investigators, dismissed Phillips' theories, saying that the likelihood that such factors influenced the date in the way suggested is so exceedingly remote that it beggars scientific credulity. He also pointed out that Phillips had given no reasons to back his theory that the body would produce neutrons.

Venus.—The atmosphere of Venus contains large quantities of sulphuric acid droplets. The source of these was assumed to be volcanic activity, and the implication of this assumption is that volcanic activity on the planet occurs on a large scale. Recent studies, however, indicate that this activity may be about one-twentieth of that occurring on the Earth.

Results obtained by Soviet spacecraft show that one of the main constituents of the surface rocks on Venus is calcite (calcium carbonate). Ronald Prinn of the Massachusetts Institute of Technology, near Boston, showed some years ago that calcite should react with the sulphuric acid to form anhydrite (calcium sulphate) and carbon monoxide. Prinn and co-worker, Bruce Fegley, have studied the reaction of the two compounds at the same temperature as that on Venus (750 K) and have shown that the calcite should remove all the sulphur dioxide in the atmosphere within two million years. They have calculated the amount of volcanic activity required to maintain the current concentration. It turned out to be about one cubic kilometre of lava a year is needed, a value which is only five per cent of that produced by terrestrial activity.

This relatively low value is supported by the findings of the Soviet probes *Venera 15* and *Venera 16*.

Using radar techniques, the probes showed that the surface of the planet contained many craters. If huge quantities of lava were exuded, this would have covered up most of the craters. The number and density of the craters indicate that the rate of volcanic activity is less than 2 cubic kilometres per year.

This finding raises a question about the amount of heat Venus produces. Because the Earth and Venus are of similar size, it was thought that both should produce similar amounts of heat. Unlike Venus the Earth can lose heat from its interior at the edges of crustal plates. Research is currently investigating whether Venus actually produces less heat than the Earth or whether there are alternative ways for venting the heat on Venus which do not produce volcanic eruptions.

Voyager passes Neptune.—The *Voyager 2* spacecraft was launched in 1977. Its journey across our solar system has taken it past Jupiter, Saturn and Uranus, and in each case the probe has provided data which could never have been obtained from earth-based studies. The outermost of the major planets, Neptune, was reached in August 1989. Valuable new data was obtained during the flyby, though most of the information is still provisional.

For several months prior to the flyby of Neptune *Voyager 2* sent back full disc pictures of the planet, but it was not until the probe was nearer to Neptune that the sensational discoveries were made. By January 1989 it was possible to resolve features 6,000 km. across, better than the best earthbased pictures. The approach photographs have shown an ever-changing picture of clouds in the atmosphere, some persisting for a long time and others short-lived. For example, in April, during the period of one revolution of 18 hours, a faint white spot near to the south pole suddenly became the brightest feature on the planet.

The discovery of another six moons will require a reappraisal of the theories for the origins of the two previously known satellites, Triton and Nereid. The first of the new moons to be identified, 1989 N1, is in a circular orbit some 93,000 km. from the planet and has a period of 1 day 3 hours. Triton's orbit is also circular but is inclined to the planet's equator by 20°

and has a retrograde motion, the only large satellite in the solar system to do so. Nereid is in a direct orbit but is tilted to the equator by 30° and is the most elliptical of any known planetary satellite. 1989 N1 lies closer to the planet than Triton and Nereid, has a circular orbit in the same direction as Neptune's rotation, and is slightly larger in diameter than Nereid. The other newly-discovered moons are much smaller, ranging from about 50 km. to 200 km. in size. The smallest is very irregular in shape and is about the largest size of satellite that could exist without having been pulled into a roughly spherical shape. All these new satellites lie very close to the planet and all are in circular orbits travelling in a direct motion.

The biggest sensation was the information collected about the satellite Triton. It has an atmosphere of methane and possibly nitrogen. The surface is covered by glaciers of methane ice stretching from the poles to the equator. Some craters have been identified but they are heavily eroded. The surface has a reddish colour in some places and a strong blue colour in others.

In addition to the moons, two complete rings around the planet have been identified. One had never been seen before; the presence of the other had been suspected from earthbased studies but was thought to be incomplete. The data received has shown it to be a complete ring of uneven density.

The planet itself, thought previously to be a relatively quiet body similar to Uranus, has been found to be very active. A dark-featured anticyclonic storm the size of the Earth was identified. In addition, bright features, one named the 'scooter', travel round the planet in a jet stream of winds of up to 600 km. per hour. Clouds of methane have been identified lying about 50-75 km. above a lower cloud layer. The strength of the magnetic field of the planet is weaker than that of the Earth and the other outer planets but the magnetosphere is very large, extending three quarters of a million kilometres towards the Sun. The magnetic field itself is inclined at 30° to the spin axis and the track of *Voyager 2* passed through the radiation belts.

Voyager 2 will now pass through the outer regions of the solar system and on into interstellar space. The probe is heading in the direction of the star Sirius, which it will reach in about 300,000 years.

CONSERVATION AND HERITAGE, 1988-89

THE NATURAL ENVIRONMENT

Break-up of conservation agencies.—The Government has decided to change its longstanding arrangements for safeguarding wildlife and the countryside. Claiming that the present system operates with too little regard for social needs and conditions in Scotland and Wales, the Environment Secretary (Nicholas Ridley) announced in mid 1989 that the Government's main conservation advisory bodies in Britain, the Nature Conservancy Council (NCC) and the Countryside Commissions, are to be dismembered. In Scotland and Wales their functions will be merged to form new 'Natural Heritage Agencies' under the control of the Scottish and Welsh Offices. In England they are to remain separate for the time being 'because of the much greater density of population and consequent pressure on the land'. Legislation to implement these changes will be introduced in the 1989-90 Parliamentary session.

The devolution of the advisory bodies was welcomed in Scotland by the Highlands and Islands Development Board and the Country Landowners Federation, but most press comment was adverse. Conservation bodies reacted with surprise and alarm, believing that the proposals will seriously weaken nature conservation in Britain. They are concerned that the Government will no longer pursue coherent national policies on countryside and wildlife issues, and that the NCC's scientific capability in particular will suffer. Most conservation problems are shared by Scotland, England and Wales, and wildlife is no respecter of political boundaries: ■ one former NCC chairman put it, 'merlins do not speak Welsh, nor corncrakes Gaelic'.

Neither the NCC nor the Countryside Commissions were consulted about the new proposals. It is widely believed that the proposals are intended not so much ■ an improvement to environmental protection as ■ a revolutionary gesture to the Scots and the Welsh. Many question whether the new Natural Heritage Agencies will be able to safeguard wildlife and the countryside with the same vigour and independence as the old.

Breeding birds.—The Shetland Islands offer some of the largest and most spectacular seabird 'cities' in Britain and are a major tourist attraction. Recently, however, some species have been declining in numbers because there is no longer enough food to rear their young. Many seabirds, such as terns, puffins and kittiwakes, rely largely on sand-eels for food during the breeding season. Since 1982 the number of sand-eels in waters around the Shetlands has fallen sharply: 52,600 tonnes were netted by a local fishery in 1982 but only 4,800 tonnes in 1988. Many seabird chicks have starved to death: arctic terns have raised very few young since 1983, and kittiwakes and puffins have fared almost as badly. Other birds affected by the lack of food are red-throated divers, fulmars, arctic skuas and great skuas. The extent of the present crisis is unprecedented.

Sand-eels are short-lived fish whose populations fluctuate according to natural changes. They are not

valued ■ food for human consumption and the main commercial markets are for fish-meal, oil and fertilizer, the eels being deep-frozen after capture and processed on-shore. They are usually netted while still immature, so commercial fishing reduces the number of eels which live long enough to spawn. In these circumstances, over-fishing can quickly eliminate a fishery: this happened, for instance, to the once prolific shoals of anchovies off Peru. It is not known for certain whether the Shetland sand-eel fishery, established in 1974, caused the population decline or merely exacerbated ■ natural downward trend. The Royal Society for the Protection of Birds first recommended ■ ban on sand-eel fishing to allow stocks to recover seven years ago. The Department of Agriculture and Fisheries for Scotland (DAFS) refused to impose a ban at that time, claiming that the sand-eel population was returning to a more 'normal' level after ■ population explosion in the 1970s. However, in 1989 DAFS agreed to ban fishing from July to December to allow the young sand-eels to mature. In the meantime, fishery scientists are studying the problem.

By contrast, some of Britain's rarest birds of prey had one of their most productive seasons this century. Scotland's 52 pairs of osprey raised 80 chicks between them, and golden eagles, Montagu's harriers and red kites also bred successfully. The 1989 season saw the first experimental release of young red kites into areas that were formerly their habitat in England and Scotland. This rare bird, for long confined to the Welsh hills, is unlikely to spread far without such help but hope of re-establishing the kite is encouraged by the success of the earlier white-tailed sea-eagle project. This project involved the release of young birds from Norway on the Scottish west coast between 1975-85. They have bred in small numbers each year since, and in 1989 seven pairs of ■ eagles raised a total of five chicks.

An exception in an otherwise good year for birds of prey was the hen harrier. At least six pairs on the Cumbrian moors were shot, and their chicks stamped to death, after ■ report by the Game Conservancy claimed that hen harriers were eating grouse chicks. The hen harrier has been fully protected by law since 1954 but is still persecuted in some areas.

Enterprise forests.—In the summer of 1989, the Countryside Commission and the Forestry Commission announced plans to create forests around twelve cities in England and Wales. Success will depend on attracting private landowners to participate by planting trees and opening more land to the public. Similar enterprises have been started elsewhere in Europe.

It is believed that the time is right for large-scale planting on the fringes of urban areas as land is being taken out of agricultural production at the same time as demands on the countryside for recreational use are increasing. The forests will mostly be planted on derelict land, but poor-quality farmland set aside from agricultural production is also likely to be used. The forests will contain not only woodland, but

working farms, meadows, lakes, orchards and adventure play-areas. The originators of the scheme hope that it can be financed and supported by local communities and industries, with some initial funding from government grant-aid.

Three pilot schemes are beginning in Tyne and Wear, Staffordshire and East London. The Countryside Commission is also promoting the concept of a large Midlands Forest ranging over an area the size of the New Forest, drawing land into the project through grant-aid. The idea of 'enterprise forests' has also seized the imagination of Scottish Ministers, who are planning a similar initiative in central Scotland, to be carried out by a new company, Central Scotland Woodlands. Local authorities and private trusts are considering similar forest projects in places far apart — the Pennines and Hampshire.

Whether these schemes reach fruition will depend on their success at raising the value of land and boosting the local economy, thus encouraging land-owners to invest in forestry and recreation-related projects. If successful, they have the potential to change dramatically the landscape around our cities.

Heaths versus houses.—Heaths are limited to areas with acidic soils in humid, temperate climates. Outside Britain and western Europe they are found only at the southern tip of Africa, in south-east Australia and on a few mountain tops in central Africa. Lowland heaths are one of Britain's most precious wild habitats. In southern England they are the home of many rare animals and plants, among them the smooth snake, Dartford warbler, silver-studded blue butterfly and marsh gentian.

The Dorset heaths, grouped around Poole Harbour and immortalized in the works of Thomas Hardy, are the richest in wildlife of all the British lowland heaths. Only a tenth of their original extent survives and some of the remainder lies in the path of the rapidly expanding suburbs of Poole and Bournemouth. Since 1980, an area of more than 400 hectares, much of it nominally protected as Sites of Special Scientific Interest, has been destroyed to make way for housing, roads and light industry. The problem is that while natural heathland is of negligible economic value, land and property values in the Poole area have soared in recent years.

The heath versus housing argument has centred recently on the fate of Canford Heath, the largest remaining heath outside nature reserves and the closest to Poole. The southern half of the heath was acquired a decade ago by Poole Borough Council, which granted itself planning permission to build houses. A proposal to build a major road across the northern half of the Heath led to a public inquiry in 1988, following which the Secretary of State refused planning permission. This decision surprised many but indicated that local development needs in south-east Dorset would not always outweigh other considerations. Moreover, a proposed trade-off, by which the Council offered to preserve one part of Canford Heath in exchange for permission to build on another part, was deemed unacceptable. At present local authorities are reviewing their policies in the light of recent events.

Because of their exceptional populations of rare

birds, Canford Heath and other heaths around Poole Harbour have been proposed for designation as a Special Protection Area under European Community legislation.

Marine wildlife threatened.—Farming of salmon and shellfish is a growing industry in the sheltered inshore waters of the west coast and the northern isles of Scotland. The establishment and maintenance costs of fish-farms are relatively low, while the public are willing to pay high prices for salmon. Production rose from a total of 600 tonnes of farmed salmon in 1980 to a total of 17,951 tonnes in 1988; it is expected to reach more than 50,000 tonnes by 1991.

Fish-farms are often established in sea-lochs, where the waters are sheltered from wind and tide, and warmed by the Gulf Stream. These waters are of great value for marine wildlife and contain communities of animals and seaweeds rare or absent elsewhere in Britain. The thick, soft bottom mud of the lochs is full of burrowing crustaceans, sea-pens and tall anemones. Some of these underwater communities are very sensitive to physical disturbance and pollution.

Salmon bred in cages affect the marine environment in a number of ways. The water surrounding the cages is enriched by fish-feed and chemical waste, while solid waste pollutes the sediments below the fish cages, killing the natural fauna. Since many Scottish sea-lochs are quiet, land-locked waters with narrow tidal entrances, these pollutants may not be removed by tidal flushing. Toxic chemicals such as Nuvan, used to control sea-lice, can kill organisms which are not their target, such as lobsters and crabs, and can cause blindness in fish. Fish farms also attract predators, such as seals and cormorants, and there is the perennial risk of the transmission of disease or parasites to wild fish. If farmed fish escape, their interbreeding with wild salmon can weaken or even swamp natural genetic strains: large-scale releases into rivers of non-native strains have sometimes resulted in the complete collapse of a fishery. To add to the pressure on marine wildlife, many sea-lochs have, since the Inshore Fishing (Scotland) Act of 1984, been opened to trawling and dredging. Divers report very widespread disturbance of bottom sediments in Scottish inshore waters.

Prospective fish-farmers must obtain a sea-bed lease from the Crown Estate Commission, which is therefore in a position to regulate the growth of the industry. The involvement of local authorities is limited to on-shore development. Sea-bed leases have hitherto been granted freely, though since 1986 the Nature Conservancy Council has been consulted, in the statutory advisory body on wildlife matters, on more than 400 cases. Of these only 16 were refused on grounds of wildlife and conservation, suggesting that nature conservation has taken second place to commerce.

There is no statutory nature conservation protection for marine areas in British waters except that of Marine Nature Reserves: only one such Reserve, Lundy, has been declared so far. Conservationists have been pressing for a national marine planning strategy, setting out environmental principles for fish-farming and defining areas which should be

protected from damaging forms of commercial exploitation. However, during the past year the Crown Estate Commission introduced its own non-statutory concept of 'Very Sensitive Areas' in which there is a presumption against granting further sea-bed leases. And under recent European Community legislation, fish-farms larger than 6,000 square metres on the west coast of Scotland north of Argyll, and larger than 12,000 square metres elsewhere, will require an environmental impact assessment. (This requirement does not, however, apply to smaller but more densely stocked cages.) The Scottish Office has completed a review of the fish-farming industry and proposed to set up a committee to arbitrate between the demands of conservation and commerce but the appointed committee has not yet sat.

These developments offer the possibility of a more considered expansion of marine fish-farming in future, although it remains to be seen whether those empowered to do so will take urgent steps to safeguard marine wildlife in the best remaining sites.

Skiing affects Cairngorms.—Despite one of the worst seasons for skiing in living memory, the Scottish downhill skiing industry continues to expand. A doubling in capacity is forecast over the next decade — those who have learned to ski on Britain's 120 dry slopes look for downhill skiing relatively close to home. At present there are four main ski resorts in the Highlands: at Cairngorm, Glenshee, Glencoe and The Lecht. Three others are at the planning or development stage, at Ben Wyvis, the Dalwhinnie Corries and Aonach Mor near Ben Nevis. The Glenshee and Lecht resorts have increased their capacity in recent years, and at Cairngorm there are proposals to double the size of the present development.

Organized downhill skiing needs easy access to the main slopes and long-lasting snow beds. Many areas which best meet these requirements are of great scenic and scientific interest, containing rare birds and plants and sensitive geological features. All the Scottish ski resorts, present or planned, lie close to or within Sites of Special Scientific Interest (SSSI). Careful planning is needed, therefore, to minimize environmental damage, especially in view of the harsh Highland climate, more arctic than alpine, and the thin gravelly soils and wet peat which clothe the hills. Unfortunately, it has proved difficult in practice to achieve a reasonable balance between a healthy skiing industry on the one hand and nature conservation and scenic protection on the other. Recent efforts by the Scottish Office to formulate an overall development strategy have not succeeded in preventing conflict between competing interests.

Current controversy revolves around the plans of the Cairngorm Chairlift Company to expand into the Northern Corries, — SSSI and National Scenic Area. The company's plans are backed by sporting and enterprise agencies and the Highland Regional Council, and opposed by the Countryside Commission for Scotland and the Nature Conservancy Council. After a public inquiry in 1981, the Scottish Secretary refused planning permission for an access road into the Northern Corries area. In 1988, however, a working party under the aegis of Highland Regional

Council recommended a similar plan. If planning permission is given, it rests with the Secretary of State to decide whether to call another public inquiry.

Water privatization.—The Water Act 1989 created a new agency, the National Rivers Authority, which takes over from the water authorities in England and Wales responsibility for pollution control, water resource management, flood defence, fisheries and, in certain areas, navigation. The new authority also has a duty to promote nature conservation and, unlike the water authorities, it can finance conservation projects which are not part of a current drainage scheme. An amendment to the Act provides for the establishment of nitrate-sensitive areas. In these areas controls will be introduced to reduce the amount of nitrogen fertilizer entering water sources.

The privatization of the water industry takes place against a background of an increasing number of pollution incidents, mainly from sewage effluent and farm waste, and the deterioration of many hitherto clean stretches of river. Considerable concern has been expressed over the quality of Britain's bathing beaches and domestic tap water, both of which are well below European Community safety standards in some areas. The abstraction of groundwater has reduced water flows and increased the risk of pollution, especially in hot, dry summers like that of 1988. The Government has, in general, chosen to rely on the more effective implementation of existing powers, rather than the introduction of new ones, to improve this situation.

The newly privatized water companies will probably seek to capitalize on their assets by increasing the use of reservoirs and other stretches of water for sport and recreation, and by selling surplus land for housing and commercial development. Much water authority land is of great value for landscape and wildlife. No less than 44 nature reserves managed by Nature Conservation Trusts lie on water authority land, and in Wales half of the 97,000 acres owned by the Welsh Water Authority are designated as Sites of Special Scientific Interest. One of the options open to the Secretary of State is to offer suitable surplus land to an amenity or conservation body on a first refusal basis. However, conservation bodies fear that they may not be able to afford to purchase these areas.

THE BUILT ENVIRONMENT

Church fabric.—The report of the Faculty Jurisdiction Commission of 1984 proposed a number of substantial changes in the internal control exercised by the Church of England over the repair and alteration of cathedrals and churches. The General Synod of the Church of England rejected the first attempt to introduce a Care of Cathedrals Measure some years ago, but a recent successor found much more favourable reaction. This new Measure provides for a central Cathedrals Fabric Commission, and for a Fabric Advisory Committee at each cathedral. The former will decide major cases, the latter, minor cases.

A Measure to liberalize the system of faculty jurisdiction was also introduced into the Synod. This

allows the consistory court in each diocese to consider cases submitted by parties other than a local parish or the Chancellor of the diocese. The intention where alterations to churches are concerned is to make the system more like that of the secular public inquiry. However, consistory courts will remain the vehicle by which the Chancellor, advised by the Diocesan Advisory Committee, grants or denies permission for alterations at any church, listed or otherwise.

Churches funding increase.—The Redundant Churches Fund cares for over 250 Anglican churches no longer in pastoral use. The Fund is voted money for its work every five years by the Church Commissioners and the House of Commons Fifth standing committee. The Government's agreement with the Church Commissioners is that the maximum combined grants from Church and Government during the quinquennium which began in April 1989 shall not exceed £12.4 million; of that sum, 30 per cent will be contributed by the Church and 70 per cent by the Government. That compares with the proportions of 40 per cent and 60 per cent respectively in the quinquennium just ended.

The increase in Government funding for redundant churches is of benefit to churches of all denominations and will help to offset the increased financial burden of the community charge. Other benefits announced in the past year are an extra £3 million aid for historic churches in use and the exemption from non-domestic rates of a wide range of church buildings, including church halls with an income from lettings.

The extra £3 million ■ year for historic places of worship will be granted by the Government from 1990 and administered by English Heritage. The Government preferred to give this indirect assistance to churches rather than to exempt the clergy from paying community charges for church buildings. Decisions on how the bonus will be distributed have yet to be taken but it is likely to finance an increase in the grant levels, greater resources to conserve contents and wall paintings, and some assistance for nonconformist chapels through the Redundant Churches Fund.

Farm buildings.—The Ministry of Agriculture has introduced ■ scheme which offers farmers grants towards the repair of 'vernacular farm buildings' retained in agricultural use. Many traditional buildings in stone and timber-frame remain either unlisted or have only Grade II listing. As a result they are not eligible for English Heritage monies, unless they happen to be within a conservation area; this is unlikely where more remote farms are concerned.

The grants range from 35 per cent to 50 per cent of the cost of eligible work in any six-year period, up to ■ ceiling of £74,000. The building in question must be in agricultural use at the time of the application and must remain so for at least ten years after that date. A structure in receipt of grant-aid from English Heritage is ineligible. Money is not available for normal maintenance or for works of conversion or extension. Repairs must be sympathetic to the

building and the use of materials such as asbestos, fibre cement, concrete blocks or steel aluminium profiled sheeting is specifically prohibited.

Grants to convert former farm buildings to non-agricultural purposes continue to be administered through the Rural Development Commission.

Historical monuments.—Among the ongoing projects of the Royal Commission on Historical Monuments of England is the detailed assessment of York Minster and studies of the medieval rural houses of Kent, the Rows in Chester, and the churches and country houses of Northamptonshire. Publication of an inventory of historic nonconformist chapels and meeting houses is closer to completion following the decision of the Commissioners to give priority to the preparation for publication of the section covering south-west England. This will include the counties of Berkshire, Cornwall, Devon, Dorset, Hampshire, Somerset and Wiltshire. A survey of buildings built before 1922 in the six towns of the Staffordshire Potteries has been completed. This was a joint project carried out with the Stoke-on-Trent City Museum. Three surveys of textile mills in Yorkshire, Greater Manchester and East Cheshire are other joint projects in which the Commission is involved, mostly with local authority assistance.

The Threatened Buildings section of the Commission uncovered in Gosford Street, Coventry, what is probably the oldest secular structure in the city dated to c.1330 after dendrochronological analysis of the timber. Detailed studies have been organized of Calke Abbey, Derbyshire, opened in spring 1989 by the National Trust; Upton Court, Slough, Berkshire; and the flax milling complex at Ditherington, Shrewsbury, of 1797, the earliest complete fireproof building in England.

The Survey of London became part of the Royal Commission in 1986 following the abolition of the Greater London Council. Work continues on Volume XLIII of the Survey, covering the Parish of All Saints, Poplar. Monographs on County Hall, the Mansion House and Smithfield Market are nearing completion. In 1987-88 the National Monuments Record carried out detailed photographic recording of sites as diverse as the New River in Hertfordshire and London, soon to become redundant as a water supply; St. James's Palace and Clarence House; and 17th century painted decoration in Lincoln Cathedral. A joint project with English Heritage to provide a classification of building types is progressing. The number of classification terms has increased to 5,330 following the development of a computer data base. A 'Draft Thesaurus of Architectural Terms' was published in 1987 and distributed to interested parties. Work has now begun on drafting glossary entries, and it is hoped to publish this in due course.

Finally, the medieval stained glass archive – the Corpus Vitrearum Medii Aevi (CVMA) – continues with the help of the Royal Commission and funds provided by the British Academy. The CVMA's first study – of York Minster – was published in June 1987 and work is proceeding on texts about Balliol College, Oxford, and Norwich churches, and on a catalogue of Netherlandish roundels in England.

Increased aid for repairs.—English Heritage has developed a new strategy to maintain buildings within England's 6,000 conservation areas. This combines a survey of the problem, an extension of grant-aid, and financial support for local authorities carrying out urgent repairs. These proposals are intended to complement the launch of a new computerized Buildings At Risk survey.

Until recently only 'outstanding' listed historic buildings were eligible for grant-aid from English Heritage. Others could be considered for grants only if they were in one of 500 selected conservation areas. Now, however, a grant covering about 25 per cent of the repair costs can be offered to the owner of a listed building in any of the conservation areas, provided that the building is vacant and in need of urgent work to preserve its structure.

Where an owner is unwilling to undertake the work, English Heritage will, if necessary, assist the local authority concerned to serve an Urgent Works Notice under Section 101 of the Town and Country Planning Act 1971. This empowers the local authority to carry out the work itself and reclaim the cost from the owner. Where the cost cannot be reclaimed, up to half the cost will be met by English Heritage.

A pilot study carried out in Kirklees, West Yorkshire, showed that nearly 5 per cent of the total number of listed buildings in the district were at risk. If the result of the pilot study is representative of the whole country, 23,000 historic buildings could be in need of structural repair. Of these, more than 9,000 will probably be in Conservation Areas. Half of these are likely to be unoccupied and thus eligible for the new grant-aid.

The grant scheme, for which £350,000 has been allocated in 1989-90, will be reviewed after 12 months.

Listed buildings.—By the end of June 1989 the total of buildings listed as being of special architectural and historic interest stood at 431,739. Of these, 6,059 were in the Grade I category.

In the past year, listing afforded statutory protection to Birch Grove at Horsted Keynes, Sussex. Until recently the home of Harold Macmillan, Birch Grove was built by his father in 1926, and incorporates 18th century doorcases and chimneypieces from Devonshire House, Piccadilly, London, which was demolished in the 1920s. The road bridge with remains of c. 1250 in Hyde Street, on the site of the North Gate at Winchester, was given a Grade II* listing, as was the early 19th century custom-built wool drying house at Bourne Mill, London Road, Thrupp, Gloucestershire. Other recent listings include: three hangars of c. 1917 built for the Royal Flying Corps at Hooton Park, Bebington in the Wirral; three aircraft hangars of c. 1910 at the former Sundridge Aerodrome in Kent which were built for the manufacture of planes by the Polish Prince de Bolotoff; a row of five tenter posts in Longwood Gate, Huddersfield, with sockets for iron hooks used as part of the cloth manufacturing process, a length of cloth being stretched out to dry between them; the 'well preserved and relatively early cricket pavilion' of 1902 in Dean Park Sports Ground, Cavendish Road, Bournemouth; a cast iron electricity service box of the late 19th century made by Hardy & Padmore Ltd.

for the Taunton Corporation Electricity Department; the Elephant House at Whipsnade Zoo, Bedfordshire, designed in 1935 by Lubetkin & Tecton (Grade II*); a look-out tower in the boundary wall at 39-40 East Parade, Rhyl, Clwyd, built c. 1841 as a semaphore signalling 'station' for the paddle steamers operating between the Foryd Harbour, Rhyl, and Liverpool; 34 gas lamp standards of c. 1890 in Kippington Road and Oakhill Road, Sevenoaks; and the tomb in the grounds of Christchurch, Virginia Water, Surrey, of Ramon Cabrera, a Carlist general in the Spanish civil war 1836-43 who became a political exile in this country.

Listed domestic buildings include a cottage known as Zennor in The Gardens, Adstock, Buckinghamshire, which dates from the 17th century and is described as 'a rare and interesting survival of a one-storey peasant house, probably representing the survival of a squatter's house built on the edge of common land'; council houses of c. 1924 in Ernest Road, Dudley, built as part of an experiment using cast iron as a building material, in a pre-fabricated system designed by the Horsley Ironworks Company of Tipton; 50, 52 and 54 Inge Street, Birmingham, built in 1789 and reputed to be the last remaining example of back-to-back housing in the city; 7 Water Lane, Debenham, Suffolk, a cottage of the late 17th century converted in 1849 and 'believed to be the earliest surviving rural police house or station in Suffolk'; and 1-5 Flitcroft Street, in the London Borough of Camden, of 1903-4, 'an important survival of a theatrical scene painting workshop'; Hogsbeck House, Willoughby, Lincolnshire, of 1796 astonished the lister because of the survival internally of 'a remarkable room running the depth of the house on the first floor. Apart from the grates this room remained unplastered until c. 1950. It seems that it may have been intended for a specialized use to which it was never put, for example hunt or shooting breakfasts'.

The resurvey of rural areas of the country begun in the early 1980s is now complete although the results are still being published. Pilot surveys of underlisted urban areas, such as Stoke, Brighton, Leeds and Manchester have commenced. It seems likely that the final total of listed buildings will exceed 500,000, more than that of any other country in the world.

Listed buildings under threat.—In 1988 there were applications to demolish in their entirety 585 listed buildings in England and Wales. This compares with 649 in 1987, 557 in 1985 and 480 in 1983. The upward trend is not very surprising given the spectacular rise in recent years in the number of protected buildings. That only 500 or so are threatened out of a total exceeding 430,000 indicates that most listings cover buildings in good condition and productive use. The gradual rise in applications to demolish disguises a change in the nature of applicants. Ten years ago almost a third of applications were made by local authorities, either at district or county level. Now the equivalent ratio is 1 in 24. In 1988 only three buildings were menaced by local authority inspired schemes for road widening and only two by proposals for slum clearance.

Buildings threatened by demolition applications in the year under review included: the Great Barn at Waxham, Norfolk (Grade I); Grimethorpe Hall, South Yorkshire, a fine 17th century house combining a 'vernacular' façade with mullioned and transomed windows and an attempt at a 'polite' façade with sash windows and a substantial Dutch gable; the Little Temple at Coleyby Hall, Lincs., the smaller 18th century counterpart to the famous rotunda on the same estate; the Tobacco Warehouse, Stanley Docks, Liverpool, built c.1900, when it was claimed to be the largest warehouse in the world; the former Theatre Royal at Chatham, Kent, of 1899; the massive boat hoist of 1862 (Grade II*) in the Aldam Dock, Goole; St. Augustine's Church, Preston, of 1838 and 1890; and the early Georgian terrace at 159-163 Duke Street, Liverpool.

One of the biggest controversies of the year centred on the projected rail link for the Channel Tunnel. A parliamentary private bill lodged in 1989 provided for the construction of a new British Rail terminal between Kings Cross and St. Pancras Stations (both Grade I listed). Two listed buildings were proposed for demolition without replacement, including the Great Northern Hotel of 1850 by Cubitt, and two listed buildings were proposed for reconstruction. The scheme was to be paid for by the redevelopment of 134 acres of former railway land lying behind the site. Proposals for this site included a park but offices were to be the principal ingredient of this 'enabling development'.

A potentially more serious threat to conservation is posed by the link itself, covering the 72 miles between London and the Kent coast. At the time of writing, details of the route had not been released, but it is anticipated that British Rail will lodge a second Parliamentary private bill in November providing for work to be started on the rail link. British Rail's 'preferred route' will include 17 miles of tunnelling under South London and a shorter stretch at two further points, including around Ashford. Further changes announced in August are expected to reduce the number of listed buildings facing demolition, but many still face damage to their setting and amenity. In addition, the prosperity generated in the area by the transport links to the Continent is expected to increase greatly the development pressures in Kent, particularly in the vicinity of the two intermediate stations.

National Heritage Memorial Fund.—In 1988 the National Heritage Memorial Fund awarded

grants to the following new projects: £300,000 to the National Trust to assist in the restoration of the 19th century garden at Biddulph Grange, Staffordshire; the purchase by Essex County Council of the 12th and 13th century Barley and Wheat Barns at Cressing Temple; the acquisition by the Royal Institute of British Architects of the drawings of the architect Detmar Blow (1867-1939); the conservation by the Ironbridge Gorge Museum Trust of 12,000 floor tiles made by Craven Dunhill following their salvage from Palace Chambers, adjacent to Westminster Tube Station which was demolished in 1986; the restoration of the medieval glass and 12 monuments in St. Nicholas Church, Stanford-on-Avon, Northamptonshire; the purchase of the lease of the 1854 Mechanics Institute in Princess Street, Manchester, by the city's Trades Union Council, which was founded in the building in 1868; the purchase of James Northcote's portrait of John Ruskin at the age of 3 by the National Portrait Gallery; the repair of the so-called St. John Triptych, a set of painted panels commissioned in 1615, in St. Mary's Church, Lydiard Tregoze, Wiltshire; the purchase by the V. & A. of an ornamental firegrate dated 1788 and believed to have been commissioned for the Music Room at Powderham Castle, Devon; and the purchase by the Jewish Museum of two silver-gilt, Queen Anne-style Torah finials which top the scroll of the Pentateuch when in procession and display.

New museums.—A museum covering the history of the Bank of England has opened in the Bank of England building in the City of London. The Bank Stock Office designed by Sir John Soane (1788) has been faithfully reconstructed and 12 of Soane's original caryatids have been used to frame the exhibition cabinets. The new museum is mostly housed in the rotunda just beyond the Stock Office.

At the Ironbridge Gorge Museum a Museum of the River opened in spring 1989 in the 1840s Gothic warehouse. In May 1989 the Ironbridge Gorge Museum started to manufacture wrought iron. Wrought iron has not been produced commercially in Britain since the early 1970s, when the last firm to do so, Walmsley of Bolton, closed. Walmsley's survived for a number of years before their closure by remelting and reroiling wrought iron plates from the fire-damaged Menai Bridge, which were purchased from British Rail. The Museum acquired the equipment from Walmsley's and to house the works, re-erected at the Museum site an early iron-framed building of 1813, designed by John Rennie, from the Royal Dockyard at Woolwich.

COUNTRYSIDE CONSERVATION

NATIONAL PARKS England and Wales

The ten National Parks of England and Wales were established in the 1950s under the provisions of the National Parks and Access to the Countryside Act 1949. The National Parks were set up to conserve and protect scenic landscapes from inappropriate development and to provide access to the land for public enjoyment.

The Countryside Commission is the statutory body which has the power to designate National Parks. The designation of National Parks in England is considered and confirmed by the Secretary of State for the Environment, and the designation of National Parks in Wales by the Secretary of State for Wales. The designation of a National Park does not affect the ownership of the land, nor does it remove the rights of the local community. Although the parks are administered through local government, the vast majority of the land is owned by private landowners (74 per cent) or by other bodies like the National Trust (7 per cent) and the Forestry Commission (7 per cent). The National Park Authorities own only 2·3 per cent of the land in the National Parks.

Under the Local Government Act 1972, National Park Authorities (N.P.A.s) are the authorities responsible for park administration. They also influence land use and development, and deal with planning applications.

Two-thirds of the members of each authority are appointed by the county and district councils within whose boundaries the parks lie. One-third of the members are appointed by the Secretary of State for the Environment or the Secretary of State for Wales with advice from the Countryside Commission.

In the Peak District and the Lake District the N.P.A.s are special boards: the Peak Park Joint Planning Board and the Lake District Special Planning Board. These are autonomous authorities which are financially independent, unlike the authorities in the other eight parks which are county council committees. The N.P.A.s appoint the National Park Officer for the National Park they administer.

Central government provides 75 per cent of the funding for the parks through the National Park Supplementary Grant. The remaining 25 per cent is supplied by the local authorities concerned. Net expenditure in 1987-88 totalled £13,456,200.

The Countryside Commission has stated that other areas are regarded as being worthy of National Parks status. A special statutory authority was established in 1989 to develop, conserve and manage the Norfolk and Suffolk Broads (see p. 302). The other area considered worthy of designation is the New Forest and it has been the subject of a consultative report to decide upon its future.

The National Parks in England and Wales are:

Brecon Beacons (519 sq. miles/1,344 sq. km.).—Designated in 1957, the park lies in Powys (66 per cent), Dyfed, Gwent and Mid Glamorgan. The park is centred on the Beacons, Pen y Fan, Corn Du and Cribyn, but also includes the valley of the Usk, the Black Mountains to the east and the Black Mountain to the west.

There are information centres at Brecon, Craig-y-nos Country Park, Abergavenny and Llandovery, a study centre at Danywenaln and a day visitor centre near Libanus.

Information Office, 7 Glamorgan Street, Brecon, Powys LD3 7DP. (Tel. 0874-4437). National Park Officer, J. Bradley.

Dartmoor (365 sq. miles/945 sq. km.).—Designated

in 1951, Dartmoor lies wholly in Devon. Dartmoor consists of moorland and rocky granite tors, and is rich in prehistoric remains.

There are information centres at Newbridge, Tavistock, Bovey Tracey, Steps Bridge, Princeton and Postbridge.

Information Office, Parke, Haytor Road, Bovey Tracey, Devon TQ13 9JQ. (Tel. 0626-832093). National Park Officer, I. Mercer.

Exmoor (265 sq. miles/686 sq. km.).—Designated in 1954, Exmoor lies in Somerset (71 per cent) and Devon. Exmoor is a moorland plateau inhabited by wild ponies and red deer. There are many ancient remains and burial mounds.

There are information centres at Lynmouth, County Gate, Dulverton and Combe Martin.

Information Office, Exmoor House, Dulverton, Somerset TA22 9HL. (Tel. 0398-23665). National Park Officer, Dr. L. F. Curtis.

Lake District (880 sq. miles/2,280 sq. km.).—Designated in 1951, the Lake District lies wholly in Cumbria. The Lake District includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) but it is most famous for its glaciated lakes.

There are information centres at Keswick, Waterhead, Hawkshead, Seatoller, Bowness, Grasmere, Coniston, Glenridding and Pooley Bridge, an information van at Gosforth and a park centre at Brockhole, Windermere.

Information Office, Busher Walk, Kendal, Cumbria LA9 4RH. (Tel. 0539-24555). National Park Officer, J. Toothill.

Northumberland (398 sq. miles/1,031 sq. km.).—Designated in 1956, the Northumberland National Park lies wholly in Northumberland. The park is an area of hill country stretching from Hadrian's Wall to the Scottish Border.

There are information centres at Ingram, Once Brewed, Rothbury, Housesteads, Harbottle and Kielder, and an information caravan at Cawfields.

Information Office, Eastburn, South Park, Hexham, Northumberland NE46 1BS. (Tel. 0434-605555). National Park Officer, T. Macdonald.

North York Moors (553 sq. miles/1,433 sq. km.).—Designated in 1952, the North York Moors lie in North Yorkshire (96 per cent) and Cleveland. The park consists of woodland and moorland, and includes the Hambleton Hills and the Cleveland Way.

There are information centres at Danby, Pickering, Sutton Bank, Ravenscar, Helmsley and Hutton-le-Hole, and a day study centre at Danby.

Information Office, The Old Vicarage, Bondgate, Helmsley, York YO6 5BP. (Tel. 0439-70657). National Park Officer, D. Statham.

Peak District (542 sq. miles/1,404 sq. km.).—Designated in 1951, the Peak District lies in Derbyshire (64 per cent), Staffordshire, South Yorkshire, Cheshire, West Yorkshire and Greater Manchester. The Peak District is composed of the gritstone moors of the 'dark peak' and the limestone dales of the 'white peak'.

There are information centres at Bakewell, Edale, Fairholmes and Castleton, and information points in the Goyt Valley and at Hartington.

Information Office, Aldern House, Baslow Road, Bakewell, Derbyshire DE4 1AE. (Tel. 062 981-4321). National Park Officer, M. Dower.

Pembrokeshire Coast (225 sq. miles/583 sq. km.).—Designated in 1952, the Pembrokeshire Coast National Park lies wholly in Dyfed. The park consists of cliffs, open moorland and Skomer Island.

There are information centres at Tenby, St. David's, Pembroke, Newport, Kilgetty, Haverfordwest and Broad Haven.

Information Office, County Offices, Haverfordwest, Dyfed SA61 1QZ. (Tel. 0437-4591). National Park Officer, N. Wheeler.

Snowdonia (838 sq. miles/2,171 sq. km.).—Designated in 1951, Snowdonia lies wholly in Gwynedd. It is an area of deep valleys and rugged mountains in northern Wales.

There are information centres at Aberdovey, Bala, Betws y Coed, Blaenau Ffestiniog, Conwy, Harlech, Dolgellau and Llanberis.

Information Office, Penrhyneddraeth, Gwynedd LL48 6LS. (Tel. 0766-770274). National Park Officer, A. Jones.

Yorkshire Dales (680 sq. miles/1,762 sq. km.).—Designated in 1954, the Yorkshire Dales National Park lies in North Yorkshire (88 per cent) and Cumbria. The Yorkshire Dales are composed primarily of limestone overlaid in places by millstone grit. The three peaks of Ingleborough, Whernside and Pen-y-Ghent are within the park.

There are information centres at Clapham, Grassington, Hawes, Aysgarth Falls, Malham and Sedbergh.

Information Office, Yorebridge House, Bainbridge, Leyburn, North Yorkshire DL8 3BP. (Tel. 0969-50456). National Park Officer, R. Harvey.

Scotland and Northern Ireland

The National Parks and Access to the Countryside Act 1949 dealt only with England and Wales. It made no provision for Scotland or Northern Ireland and there are no national parks in these two countries. However, in 1989 the Scottish Office asked the Countryside Commission for Scotland to report on whether national parks should be designated in Scotland.

AREAS OF OUTSTANDING NATURAL BEAUTY

England and Wales

Under the National Parks and Access to the Countryside Act 1949, provision was made for the designation of Areas of Outstanding Natural Beauty (AONBs) by the Countryside Commission. The Countryside Act 1968 further defines the role of AONBs, suggesting that they should show due regard for the interests of other land users, such as agriculture and forestry groups. Designations in England are confirmed by the Secretary of State for the Environment and those in Wales by the Secretary of State for Wales.

Although less emphasis is placed upon the provision of open-air enjoyment for the public than in the national parks, AONBs are seen as areas which are no less beautiful and require the same degree of protection to conserve and enhance the natural beauty of the countryside. This includes protecting flora and fauna, geographical and other landscape features.

In AONBs planning and management responsibilities are split between county and district councils (there are 14 which cross county boundaries). Finance for the AONBs is provided by grant-aid.

Thirty-eight Areas of Outstanding Natural Beauty have been designated since 1956. They are (with dates of foundation and area):

Anglesey (1967) (83 sq. miles/215 sq. km.).—The designated area extends along the entire coastline of the island, except for breaks around the urban areas and in the vicinity of Wylfa.

Arnside and Silverdale (1972) (29 sq. miles/75 sq. km.).—The area embraces the upper half of Morecambe Bay, the Kent estuary, and includes extensive tidal flats in the Bay.

Cannock Chase (1958) (26 sq. miles/68 sq. km.).—An area of high heathland in Staffordshire. Deer continue to roam over the Chase.

Chichester Harbour (1964) (29 sq. miles/75 sq. km.).—The area extends from Hayling Island to Apuldram and includes Thorney Island.

Chilterns (1965) (309 sq. miles/800 sq. km.).—Chalk downlands running from South Oxfordshire north-eastwards to Bedfordshire, including the outlying group of hills beyond Luton.

Clwydian Range (1985) (60 sq. miles/156 sq. km.).—A prominent ridge extending southwards from Prestatyn on the North Wales coast. Offa's Dyke runs along the crest of the Range.

Cornwall (1959; Camel Estuary 1983) (370 sq. miles/957 sq. km.).—A number of separate areas including Bodmin Moor; most of the Land's End peninsula; the coast between St. Michael's Mount and St. Austell (with Falmouth omitted); the Fowey Estuary; in north Cornwall most of the coast to Bedruthan Steps and between Perranporth and Godrevy Towns, plus the Camel Estuary.

Cotswolds (1966) (582 sq. miles/1,507 sq. km.).—The area of limestone hills above the Vale of Gloucester and Evesham.

Cranborne Chase and West Wiltshire Downs (1983) (371 sq. miles/960 sq. km.).—A chalkland area, covering parts of Wiltshire, Dorset, Hampshire and Somerset, including the wooded remnants of the ancient Chase.

Dedham Vale (1970; extended 1978) (28 sq. miles/72 sq. km.).—The area bordering Essex and Suffolk, where John Constable painted.

East Devon (1963) (103 sq. miles/267 sq. km.).—The coastline between Exmouth and Lyme Regis, with Sidmouth, Beer and Seaton omitted. Inland Gittisham Hill, East Hill and Woodbury and Aylebeare Commons are included.

North Devon (1960) (66 sq. miles/171 sq. km.).—Includes most of the N. Devon coastline, from just north of Bude to the boundary of the Exmoor National Park.

South Devon (1960) (128 sq. miles/332 sq. km.).—Includes the coast between Bolt Head and Bolt Tail, Salcombe, Slapton Sands and Dartmouth, and the estuaries and valleys of the Yealm, Erme, Avon and Dart.

Dorset (1959) (400 sq. miles/1,036 sq. km.).—The coastline between Lyme Regis and Poole, with the Isle of Portland and Weymouth omitted, stretching inland to include the Purbeck Hills and the downs of Hardy country.

Forest of Bowland (1964) (310 sq. miles/803 sq. km.).—A moorland area mostly in Lancashire running westward from the River Ribble, with a small outlying area east of the Ribble which includes Pendle Hill.

Gower (1956) (73 sq. miles/189 sq. km.).—A peninsula in West Glamorgan, South Wales, known for its coastline.

East Hampshire (1962) (151 sq. miles/391 sq. km.).—A chalkland area stretching from the outskirts of Winchester to the Sussex border at a distance of about 10 miles inland.

South Hampshire Coast (1967) (30 sq. miles/78 sq. km.).—14 miles of coastline between Hurst Castle and Calshot Castle, extending inland up the Beaulieu River for about six miles.

High Weald (1983) (560 sq. miles/1,450 sq. km.).—The area covers parts of East and West Sussex, Kent and Surrey. It is predominantly wooded, and includes larger heathland areas like Ashdown Forest, the remnants of the old Wealden forests.

Howardian Hills (1987) (79 sq. miles/205 sq. km.).—Wooded hills which rise above the Vales of York and Pickering.

Kent Downs (1968) (326 sq. miles/845 sq. km.).—Running east and south-east from the Surrey border near Westerham to the coast near Dover and Folkestone, with a coastal outlier at South Foreland and a narrow strip of the old sea cliff escarpment west of Hythe overlooking Romney Marsh.

Lincolnshire Wolds (1973) (216 sq. miles/560 sq. km.).—The area extends in a south-east direction from Laceby and Caistor in the north to the region of Spilsby, about ten miles west of the coast.

Llyn (1957) (60 sq. miles/155 sq. km.).—An isolated peninsula in Gwynedd, North Wales.

Malvern Hills (1959) (40 sq. miles/104 sq. km.).—The whole range of the Malvern Hills in the county of Hereford and Worcester, just touching Gloucestershire.

Mendip Hills (1972) (78 sq. miles/202 sq. km.).—Comprising over half of the Mendip Hills, the area stretches from Bleadon Hill to the A39 road north of Wells and includes Cheddar Gorge and Wookey Hole.

Norfolk Coast (1968) (174 sq. miles/450 sq. km.).—An almost continuous coastal strip three to five miles in depth from Hunstanton to Baconsthorpe, with a further small strip between Sea Palling and Winterton-on-Sea. The area includes part of the Sandringham Estate.

North Pennines (1988) (869 sq. miles/2,251 sq. km.).

Northumberland Coast (1958) (50 sq. miles/129 sq. km.).—Stretches from just south of Berwick to Amble and includes Holy Island and the Farne Islands.

Quantock Hills (1957) (38 sq. miles/99 sq. km.).—A range of sandstone hills in Somerset.

Isles of Scilly (1976) (6 sq. miles/16 sq. km.).—About 140 islands and skerries in the Scillies group of which only five are inhabited. There are a number of sites of special scientific interest.

Shropshire Hills (1959) (300 sq. miles/777 sq. km.).—Most of south-west Shropshire between the Welsh border and the boundary with Hereford and Worcester, including the region around Clun, the area of the Stiperstones, the Long Mynd and Wenlock Edge, with the tongues of land running north-east to the Wrekin and south towards Ludlow.

Solway Coast (1964) (41 sq. miles/107 sq. km.).—A stretch of coastline in Cumbria from Maryport to the estuaries of the Rivers Eden and Esh (with Silloth omitted) backed by the Solway Plain.

Suffolk Coast and Heaths (1970) (151 sq. miles/391 sq. km.).—The area includes 38 miles of coastline and parts of the Stour and Orwell estuaries, while the Deben, Alde and Blyth flow through it.

Surrey Hills (1958) (160 sq. miles/414 sq. km.).—An area of hills to the east and south of Guildford, including the Hog's Back and the ridge of the North Downs.

Sussex Downs (1966) (379 sq. miles/981 sq. km.).—The area includes the chalk escarpment of the South Downs from Beachy Head to the Hampshire border, and stretches down to the coast between Eastbourne and Seaford.

North Wessex Downs (1972) (671 sq. miles/1,738 sq. km.).—An upland area in Hampshire, Wiltshire, Oxfordshire and Berkshire, bounded by the Marlborough and Lambourn Downs in the west and the Chiltern Hills in the east. Salisbury Plain forms the southern limit of what is so far the largest area designated.

Isle of Wight (1963) (73 sq. miles/189 sq. km.).—A number of separate areas comprising stretches of coastline, the Yar Valley, the high downland behind Ventnor and the chalk ridge which runs from Newport to Culver Cliff and Foreland.

Wye Valley (1971) (125 sq. miles/325 sq. km.).—The river valley running through the counties of Gwent, Gloucestershire and Hereford and Worcester.

Proposals for further designations include: the Tamar and Tavy Valleys, Devon/Cornwall; the Blackdown Hills, Somerset; the Berwyn Mountains, mid-Wales; and the Nidderdale Moors, N. Yorkshire.

Scotland

There are no Areas of Outstanding Natural Beauty in Scotland.

Northern Ireland

The Department of the Environment for Northern Ireland, with advice from the Council for Nature Conservation, designates Areas of Outstanding Natural Beauty in Northern Ireland. At present there are nine and these cover a total area of approximately 695,166 acres (282,546 hectares).

Antrim Coast and Glens, Co. Antrim (174,452 acres/70,600 ha.).

Causeway Coast, Co. Antrim (10,378 acres/4,200 ha.).

Lagan Valley, Co. Down (5,119 acres/2,072 ha.).

Lecale Coast, Co. Down (7,679 acres/3,108 ha.).

Mourne, Co. Down (140,876 acres/57,012 ha.).

North Derry, Co. Londonderry (31,999 acres/12,950 ha.).

South Armagh, Co. Armagh (31,999 acres/12,950 ha.).

Spirrin, Co. Tyrone/Co. Londonderry (249,585 acres/101,006 ha.).

Strangford Lough, Co. Down (46,079 acres/18,648 ha.).

NATURE CONSERVATION AREAS

SITES OF SPECIAL SCIENTIFIC INTEREST

'Site of Special Scientific Interest' (SSSI) is a legal designation applied to land in England, Scotland or Wales which the Nature Conservancy Council (N.C.C.) identifies as being of special interest because of its flora, fauna, geological or physiographical features. In some cases, SSSI are managed as nature reserves.

The N.C.C. must notify its intention to declare the land of special interest to the local planning authority, the water and drainage authority, every owner/occupier of the land, and the Secretary of State for the Environment (or Secretary of State for Scotland or for Wales where applicable). Forestry and agricultural departments must also be notified.

Objections to the designation of SSSI can be made and ultimately heard at a full meeting of the N.C.C. Council. As a last resort the N.C.C. can purchase a site.

The protection of most sites depends on the co-operation of individual landowners and occupiers. Occupiers must consult the N.C.C. and gain written consent before they can undertake certain listed activities on the site.

As at Dec. 31, 1988 there were 5,149 SSSI in Britain, covering 4,397,151 acres (1,779,503 hectares).

	No.	Acres	Hectares
England	3,262	2,010,081	813,469
Scotland	1,169	1,888,968	764,455
Wales	718	498,101	201,579

Northern Ireland

In Northern Ireland 24 Areas of Special Scientific Interest (ASSIs) have been established by the Department of the Environment for Northern Ireland. These cover a total area of 16,348 acres (6,616 hectares).

NATIONAL NATURE RESERVES

National Nature Reserves are defined in the National Parks and Access to the Countryside Act 1949 as land designated for the study and preservation of flora and fauna, or of geological or physiographical features.

The N.C.C. can designate as a National Nature Reserve land which is being managed as a nature reserve under an agreement with the N.C.C.; land held and managed by the N.C.C.; or land held and managed as a nature reserve by another approved body. The N.C.C. can turn to the appropriate Secretary of State to impose by-laws for the protection of the reserves from undesirable development.

As at Dec. 31, 1988 there were 234 National Nature Reserves in Britain, covering 408,908 acres (165,483 hectares).

	No.	Acres	Hectares
England	121	101,983	41,272
Scotland	68	276,848	112,039
Wales	45	30,077	12,172

Northern Ireland

National Nature Reserves are established and managed by the Department of the Environment for Northern Ireland, with advice from the Council for Nature Conservation and the Countryside. There are 45 National Nature Reserves covering 10,736 acres (4,345 hectares).

LOCAL NATURE RESERVES

Local Nature Reserves are defined in the National Parks and Access to the Countryside Act 1949 as land designated for the study and preservation of flora and fauna, or of geological or physiographical features. The Act gives local authorities in England and Wales and district councils in Scotland the power to acquire, declare and manage local nature reserves in consultation with the Nature Conservancy Council.

As at March 31, 1988 there were 154 designated Local Nature Reserve areas in Britain, covering 37,895 acres (15,336 hectares).

	No.	Acres	Hectares
England	133	22,891	9,264
Scotland	6	6,642	2,688
Wales	15	8,362	3,384

Conservation trusts can also own and manage non-statutory local nature reserves.

FOREST NATURE RESERVES

The Forestry Commission has created Forest Nature Reserves from conservation sites within the Commission's estate. These are like other nature reserves in that their purpose is to protect and conserve special forms of natural habitat, flora and fauna existing in forested areas.

The Forestry Commission has 340 SSSI on its estates and has chosen 46 as Forest Nature Reserves. They extend in size from under 124 acres (50 hectares) to 1,236 acres (500 hectares). The largest include the Black Wood of Rannoch, by Loch Rannoch; Cannop Valley Oakwoods, Forest of Dean; Culbin Forest, near Forres; Glen Affric, near Fort Augustus; Kylerhea, Skye; Pembrey, Carmarthen Bay; Starr Forest, in Galloway Forest Park; Wyre Forest, near Kidderminster.

Northern Ireland

There are 38 Forest Nature Reserves in Northern Ireland, covering 4,522 acres (1,830 hectares). They are designated and administered by the Forest Service, a division of the Department of Agriculture for Northern Ireland.

MARINE NATURE RESERVES

The Wildlife and Countryside Act 1981 gave the Secretary of State for the Environment (and the Secretaries of State for Wales and for Scotland where appropriate) power to designate Marine Nature Reserves and the Nature Conservancy Council powers to select and manage these reserves. Interested parties at a local and at a national level are consulted prior to the confirmation of an area.

Marine Nature Reserves provide protection for marine flora and fauna and geological and physiographical features on land covered by tidal waters up to and including the limit of territorial waters. Reserves also provide opportunities for study and research.

Lundy, in the Bristol Channel, became the first statutory Marine Nature Reserve in November 1986. Other areas proposed for designation as reserves are: the Isles of Scilly; Skomer Island and the Marloes peninsula, Dyfed; the Menai Strait; Bardsey Island and part of the Lleyn peninsula, Gwynedd; Loch Sween, Strathclyde; St. Abb's Head, Berwickshire; and a number of sea lochs in the Hebrides and inlets on the Cornwall/Devon coast.

A number of non-statutory marine reserves have been set up by conservation groups.

HISTORIC MONUMENTS

England

A select list of monuments under the control, since its creation in April 1984, of the Historic Buildings and Monuments Commission for England.

Charges for admission represent the figures obtaining in 1989-90. Concessionary rates are available for children etc.

Annual membership passes are available at £12.50 for adults, £9 for pensioners and £6 for children upon application to English Heritage Membership Dept., P.O. Box 1BB, W1A 1BB.

Standard hours of opening (marked *) are as follows:

	Daily
Good Friday-Sept. 30	10-6
Oct. 1-Maundy Thursday	10-4

Monuments not marked * open Good Friday-Sept. only.

All monuments are closed on Christmas Eve, Christmas Day, Boxing Day and New Year's Day. Some smaller sites may close for the lunch-hour, which is normally 1-2 p.m. During the winter season, many monuments are closed on Mondays.

BEESTON CASTLE, Cheshire. £1.30*. Thirteenth-century inner ward with gatehouse and towers, and considerable remains of large outer ward.

BERKHAMSTED CASTLE, Hertfordshire*. Extensive remains of a large 11th century motte-and-bailey castle.

BOLSOVER CASTLE, Derbyshire. £1.30*. Notable for its exceptionally interesting 17th century buildings.

BOSCOBELL HOUSE, Shropshire. £1.80*. Timber-framed early 17th century hunting lodge with later alterations. Charles II's 'Royal Oak' is nearby.

BRINKBURN PRIORY, Northumberland. 80p. A house of Augustinian canons; the church (c. 1200, repaired in 1858) and parts of the cloister buildings survive.

BROUGHAM CASTLE, Cumbria. 80p*. Extensive remains of the 13th century keep, and of other buildings of periods up to the 17th century.

BYLAND ABBEY, North Yorkshire. 80p*. Considerable remains of church and conventional buildings date from the abbey's foundation in 1177 by the Cistercians.

CARISROOKE CASTLE, Isle of Wight. £2.20*. Norman castle, the prison of Charles I from 1647-1648.

CARLISLE CASTLE, Cumbria. £1.30*. Medieval castle, prison of Mary Queen of Scots. Inner and outer wards enclosing a 12th century keep.

CASTLE ACRE PRIORY, Norfolk. £1.10*. Extensive remains include the 12th century church and the prior's lodgings.

CASTLE RISING CASTLE, Norfolk. 80p*. A 12th century keep standing in a massive earthwork with its gatehouse and bridge.

CHESTERS ROMAN FORT, Northumberland. £1.30*. Fine example of a bath house.

CHYSAUSTER ANCIENT VILLAGE, Cornwall. 80p*. Romano-Cornish village, 2nd and 3rd century A.D., probably on a late Iron Age site.

CLEEVE ABBEY, Somerset. £1.10*. Much of the claustral buildings survive including timber-roofed frater, but only foundations of the church.

CORBRIDGE ROMAN SITE, Northumberland. £1.30*. Excavations have revealed the central area of a Roman town and successive military bases.

DEAL CASTLE, Kent. £1.10*. The largest and most complete of the forts erected by Henry VIII for coastal defence.

DOVER CASTLE, Kent. £2.50*. One of the strongest British castles, with Roman, Saxon and Norman features.

DUNSTANBURGH CASTLE, Northumberland. 80p*. The 14th century castle standing on a cliff above the sea has a substantial gatehouse-keep.

FARLEIGH HUNGERFORD CASTLE, Somerset. 80p*. Late 14th century castle of two courts. The chapel contains fine tomb of Sir Thomas Hungerford.

FARNHAM CASTLE KEEP, Surrey. 80p. Built by the Bishops of Winchester, the motte of the castle is enclosed by a large 12th century shell keep. Foundations of a Norman tower.

FINCHALE PRIORY, Durham. 80p* (free in winter). Benedictine priory on banks of River Wear with considerable 13th century remains.

FRAMLINGHAM CASTLE, Suffolk. £1.10*. Impressive castle (c. 1200) with high curtain-walls enclosing a porchouse of 1639.

FURNESS ABBEY, Cumbria. £1.10*. Founded in 1123 by Stephen, afterwards King of England; extensive remains of church and conventional buildings.

GOODRICH CASTLE, Hereford and Worcester. £1.10*. Extensive remains of 13th and 14th century castle incorporating 12th century keep.

GRIMES GRAVES, Norfolk. 80p*. Extensive group of flint mines dating from the Neolithic period. Several shafts can be inspected.

HAILES ABBEY, Gloucestershire. £1.10*. Ruins of a Cistercian monastery founded in 1246. Museum contains some fine architectural fragments.

HELMSTRELL CASTLE, North Yorkshire. £1.10*. Twelfth century keep and curtain wall with 16th century domestic buildings. Spectacular earthwork defences.

HOUSESTEADS ROMAN FORT, Northumberland. £1.30*. Excavation has exposed this infantry fort on Hadrian's Wall with its extra-mural civilian settlement.

KENILWORTH CASTLE, Warwickshire. £1.10*. One of the most extensive castles in Britain, showing many styles of building from 1155 to 1649.

LANERCOST PRIORY, Cumbria. 55p. The nave of the Augustinian priory church, c. 1166, is still used and there are remains of other claustral buildings.

LINDISFARNE PRIORY, Northumberland. £1.10* (subject to tide). The bishopric of the Northumbrian Kingdom destroyed by the Danes; re-established in 11th century as a Benedictine priory, now ruined.

LULLINGSTONE ROMAN VILLA, Kent. £1.30*. A large villa occupied through much of the Roman period; fine mosaics.

MIDDLEHAM CASTLE, North Yorkshire. 80p*. Childhood home of Richard III. The 12th century keep stands within later fortifications and domestic buildings.

MOUNT GRACE PRIORY, North Yorkshire. £1.10*. Carthusian monastery, founded 1398, with remains of monastic buildings.

NETLEY ABBEY, Hampshire. 80p* (weekends only in winter). Extensive remains of Cistercian abbey, founded 1239, with ruined Tudor house.

OLD SARUM, Wiltshire. 80p*. Large earthworks enclosing the excavated remains of the castle and the first Salisbury cathedral, begun in 1078.

ORFORD CASTLE, Suffolk. 80p*. Circular keep of c. 1170 and remains of coastal defence castle built by Henry II.

PENDENNIS CASTLE, Cornwall. £1.30*. Well-prepared castle erected by Henry VIII for coastal defence.

PEVENSEY CASTLE, East Sussex. £1.10*. Walls of a 4th century Roman fort enclosing remains of an 11th century castle.

PEVERIL CASTLE, Derbyshire. 80p*. In a picturesque and nearly impregnable position, this 12th century castle is defended on two sides by precipitous rocks.

PORTCHESTER CASTLE, Hampshire. £1.10*. Walls of a late-Roman fort enclosing a Norman keep and an Augustinian priory church.

RECULVER TOWERS and ROMAN FORT, Kent. 80p*. Remains of Saxon and Norman church with 12th century towers, standing in a Roman fort.

RICHBOROUGH CASTLE, Kent. 80p*. The landing-site of the Claudian invasion in 43 A.D., with massive 3rd century stone walls.

RICHMOND CASTLE, North Yorkshire. £1.10*. This 12th century keep, with 11th century curtain-wall and gatehouse, commands Swaledale.

RIEVAULX ABBEY, North Yorkshire. £1.30*. Founded c. 1132. Extensive remains include an early Cistercian nave and fine 13th century choir and claustral buildings.

ROCHESTER CASTLE, Kent. £1.10*. Eleventh century castle partly founded on the Roman city wall, with a square keep of c. 1130.

ST. AUGUSTINE'S ABBEY, Kent. 80p*. Remains of Benedictine monastery, with Norman church, on site of abbey founded by St. Augustine in 598.

ST. MAWES CASTLE, Cornwall. 80p*. Coast defence castle built by Henry VIII consisting of central tower and three bastions.

SCARBOROUGH CASTLE, North Yorkshire. £1.10*. Remains of 12th century keep and curtain-walls dominating the town.

STONEHENGE, Wiltshire. £1.60*. Prehistoric monument consisting of a series of concentric stone circles surrounded by a ditch and bank.

TILBURY FORT, Essex. £1.10*. One of Henry VIII's coastal forts, extended by Charles II.

TINTAGEL CASTLE, Cornwall. £1.30*. 12th century castle on cliff-top Dark Age settlement site.

TYNEMOUTH PRIORY and CASTLE, Tyne and Wear. 80p*. Remains of a Benedictine priory, founded 1090, on Saxon monastic site. Coastal batteries with reconstructed First World War magazine.

WALMER CASTLE, Kent. £1.60*. (Closed when Lord Warden is in residence.) One of Henry VIII's coastal defence castles, now the residence of the Lord Warden of the Cinque Ports.

WARKWORTH CASTLE, Northumberland. 80p*. 15th century keep amidst earlier ruins with a 14th century hermitage upstream.

WHITBY ABBEY, North Yorkshire. 80p*. 13th and 14th century Benedictine church on site of monastery founded in 657.

WROXETER ROMAN CITY, Shropshire. 80p*. The 2nd century public baths and part of the forum remain of the Roman town of Viroconium.

Wales

Open Easter-Sept. 10.30-4.30. Closed Mon. morning and Suns. Adm. charge. *Cathedral Treasury*. Exhibition of silverware. Open May-Sept. 10.30-4.30, Sun. 2.30-4.30. Adm. free.

Worcester.—*City Museum and Art Gallery*. National history of Worcestershire and temporary art exhibitions; also museum of the Worcestershire Regiment and the Worcester Yeomanry Cavalry. Open Mon.-Wed., Fri. 9.30-6, Sat. 9.30-5. Closed Thurs., Sun. *The Commandery*, Sidbury. Civil War Centre, costume, industrial history. Weekdays 10.30-5, Sun. 2-5. *Tudor House Museum*, Friar Street. Local domestic and social history. Mon.-Wed., Fri., Sat. 10.30-5. *Dyson Perrins Museum of Worcester Porcelain*, Severn Street. Mon. to Fri. 9.30-5, Sat. 10-5.

York.—*Castle Museum*. Museum of everyday life of the last three centuries. Open weekdays 9.30-5.30, Sun. 10-5.30 (closes 6.30 April-Oct.). Adm. £2.75, con. £1.35. *Jorvik Viking Centre*, Coppergate. Reconstruction of Viking York and display of artefacts. Open daily. Adm. £2.75, con. £1.35. *Yorkshire Museum and Gardens*, Museum Street, Roman Life gallery, archaeology, decorative arts, geology, natural history. Open weekdays 10-5, Sun. 1-5. Adm. charge. *Gardens*, Roman, Anglian and medieval ruins. Open weekdays 7.30-dusk (summer 7.30-8), Sun. 10-dusk. *The York Story*, Castlegate. Open weekdays 10-5, Sun. 1-5. Adm. 80p, con. 40p. *Art Gallery*, Exhibition Square. European paintings, 14th-20th century; watercolours and prints of Yorkshire; modern English stoneware pottery. Open weekdays 10-5, Sun. 2.30-5. Adm. free. *Treasurer's House* (National Trust), Chapter House Street. Open April-Oct. 10.30-5 (closed Good Friday). Adm. charge.

WILDLIFE

PROTECTED SPECIES

The Wildlife and Countryside Act 1981 gives legal protection to a wide range of wild plants and animals.

Under Schedule 5 of the Act it is normally an offence to kill, injure, take, possess or sell any of the animals mentioned below (whether alive or dead) and to disturb its place of shelter and protection or to destroy that place.

- * Adder (*Vipera berus*)
- Anemone, Ivell's Sea (*Edwardsia ivelli*)
- Anemone, Startlet Sea (*Nematosella vectensis*)
- Apus (*Triops cancriformis*)
- Bat, Horseshoe (*Rhinolophidae*, all species)
- Bat, Typical (*Vespertilionidae*, all species)
- Beetle, Rainbow Leaf (*Chrysolina cerealis*)
- Beetle, Violet Click (*Limoniscus violaceus*)
- Burbot (*Lota lota*)
- Butterfly, Heath Fritillary (*Mellicta athalia* (or *Melitaea athalia*))
- Butterfly, Large Blue (*Maculinea arion*)
- Butterfly, Swallowtail (*Papilio machaon*)
- Cat, Wild (*Felis silvestris*)
- Cicada, New Forest (*Cicadetta montana*)
- ** Crayfish, Atlantic Stream (*Austropotamobius pallipes*)
- Cricket, Field (*Gryllus campestris*)
- Cricket, Mole (*Gryllotalpa gryllotalpa*)
- Dolphin (*Cetacea*)
- Dormouse (*Muscardinus avellanarius*)
- Dragonfly, Norfolk Aeshna (*Aeshna isosceles*)
- * Frog, Common (*Rana temporaria*)
- Grasshopper, Wart-bitter (*Decticus verrucivorus*)
- Leech, Medicinal (*Hirudo medicinalis*)
- Lizard, Sand (*Lacerta agilis*)
- † Lizard, Viviparous (*Lacerta vivipara*)
- Marten, Pine (*Martes martes*)
- Moth, Barberry Carpet (*Pareulype berberata*)
- Moth, Black-veined (*Siona lineata* (or *Idaea lignata*))
- Moth, Essex Emerald (*Thetidia smaragdaria*)
- Moth, New Forest Burnet (*Zygaea viciae*)
- Moth, Reddish Buff (*Acosmetia caliginosa*)
- Moth, Viper's Bugloss (*Hadena irregularis*)
- Newt, Great Crested (or Warty) (*Triturus cristatus*)
- * Newt, Palmate (*Triturus helvetica*)
- * Newt, Smooth (*Triturus vulgaris*)
- Otter, Common (*Lutra lutra*)
- Porpoise (*Cetacea*)
- Sandworm, Lagoon (*Armandia cirrhosa*)
- Sea-Mat, Trembling (*Victorella pavida*)
- Shrimp, Fairy (*Chirocephalus diaphanus*)
- Shrimp, Lagoon Sand (*Gammarus insensibilis*)
- † Slow-worm (*Anguis fragilis*)
- Snail, Glutinous (*Myxas glutinosa*)
- Snail, Sandbowl (*Catinella arenaria*)
- † Snake, Grass (*Natrix natrix* (*Natrix helvetica*))
- Snake, Smooth (*Coronella austriaca*)
- Spider, Fen Raft (*Dolomedes plantarius*)
- Spider, Ladybird (*Eresus niger*)
- Squirrel, Red (*Sciurus vulgaris*)
- * Toad, Common (*Bufo bufo*)
- Toad, Natterjack (*Bufo calamita*)
- Turtle, Marine (*Dermochelyidae* and *Cheloniidae*, all species)
- Vendace (*Coregonus albula*)
- Walrus (*Odobenus rosmarus*)
- Whale (*Cetacea*)
- Whitefish (*Coregonus lavaretus*)

* the offence relates to "sale" only.

** the offence relates to "taking" and "sale" only.

† the offence relates to "killing, injuring and sale".

Under Schedule II of the Wildlife and Countryside Act, it is normally an offence to pick, uproot, sell or destroy any of the plants mentioned below and, unless authorized, to uproot any wild plant.

- Adder's tongue, Least (*Ophioglossum lusitanicum*)
- Alison, Small (*Alyssum alyssoides*)
- Broomrape, Bedstraw (*Orobanche caryophyllacea*)
- Broomrape, Oxtongue (*Orobanche loricata*)
- Broomrape, Thistle (*Orobanche reticulata*)
- Cabbage, Lundy (*Rhynchosinapis wrightii*)
- Calamint, Wood (*Calamintha sylvatica*)
- Catchfly, Alpine (*Lycnis alpina*)
- Cinquefoil, Rock (*Potentilla rupestris*)
- Club-rush, Triangular (*Scirpus triquetus*)
- Colt's-foot, Purple (*Homogyne alpina*)
- Cotoneaster, Wild (*Cotoneaster integerrimus*)
- Cottongrass, Slender (*Eriophorum gracile*)
- Cow-wheat, Field (*Melampyrum arvense*)
- Crocus, Sand (*Romulea columnae*)
- Cudweed, Jersey (*Gnaphalium luteoalbum*)
- Cudweed, Red-tipped (*Filago lutescens*)
- Diapensia (*Diapensia lapponica*)
- Eryngo, Field (*Eryngium campestre*)
- Fern, Dickie's bladder (*Cystopteris dickieana*)
- Fern, Killarney (*Trichomanes speciosum*)
- Fleabane, Alpine (*Erigeron borealis*)
- Fleabane, Small (*Pulicaria vulgaris*)
- Galingale, Brown (*Cyperus fuscus*)
- Gentian, Alpine (*Gentiana nivalis*)
- Gentian, Fringed (*Gentianella ciliata*)
- Gentian, Spring (*Gentiana verna*)
- Germander, Cut-leaved (*Teucrium botrys*)
- Germander, Water (*Teucrium scordium*)
- Gladiolus, Wild (*Gladiolus illyricus*)
- Goosefoot, Stinking (*Chenopodium vulvaria*)
- Grass-poly (*Lythrum hyssopifolia*)
- Hare's-ear, Sickle-leaved (*Bupleurum falcatum*)
- Hare's-ear, Small (*Bupleurum baldense*)
- Hawk's-beard, Stinking (*Crepis foetida*)
- Heath, Blue (*Phyllocoete caerulea*)
- Helleborine, Red (*Cephalanthera rubra*)
- Helleborine, Young's (*Epipactis youngiana*)
- Horsetail, Branched (*Equisetum ramosissimum*)
- Hound's-tongue, Green (*Cynoglossum germanicum*)
- Knawel, Perennial (*Scleranthus perennis*)
- Knotgrass, Sea (*Polygonum maritimum*)
- Lady's-slipper (*Cypripedium calceolus*)
- Lavender, Sea (*Limonium paradoxum*) (*Limonium recurvum*)
- Leek, Round-headed (*Allium sphaerocephalon*)
- Lettuce, Least (*Lactuca saligna*)
- Lily, Snowdon (*Lloydia serotina*)
- Marsh-mallow, Rough (*Althaea hirsuta*)
- Marshwort, Creeping (*Apium repens*)
- Milk-parsley, Cambridge (*Selinum carvifolia*)
- Naiad, Holly-leaved (*Najas marina*)
- Orchid, Early Spider (*Ophrys sphegodes*)
- Orchid, Fen (*Liparis loeselii*)
- Orchid, Ghost (*Epipogium aphyllum*)
- Orchid, Late Spider (*Ophrys fuciflora*)
- Orchid, Lizard (*Himantoglossum hircinum*)
- Orchid, Military (*Orchis militaris*)
- Orchid, Monkey (*Orchis simia*)
- Pear, Plymouth (*Pyrus cordata*)
- Pennyroyal (*Mentha pulegium*)
- Pigmyweed (*Crassula aquatica*)
- Pink, Cheddar (*Dianthus gratianopolitanus*)
- Pink, Childling (*Petroragia nanteuilii*)
- Ragwort, Fen (*Senecio paludosus*)
- Ramping-fumitory, Martin's (*Fumaria martinii*)
- Restharrow, Small (*Ononis reclinata*)
- Rock-cress, Alpine (*Arabis alpina*)
- Rock-cress, Bristol (*Arabis stricta*)

Sandwort, Norwegian (*Arenaria norvegica*)
 Sandwort, Teesdale (*Minuartia stricta*)
 Saxifrage, Drooping (*Saxifraga cernua*)
 Saxifrage, Tufted (*Saxifraga cespitosa*)
 Solomon's-seal, Whorled (*Polygonatum verticillatum*)
 Sow-thistle, Alpine (*Cicerbita alpina*)
 Spearwort, Adder's-tongue (*Ranunculus ophioglossifolius*)
 Speedwell, Fingered (*Veronica triphyllus*)
 Speedwell, Spiked (*Veronica spicata*)
 Spurge, Purple (*Euphorbia peplis*)
 Star-of-Bethlehem, Early (*Gagea bohemica*)
 Starfruit (*Damasonium alisma*)
 Stonewort, Foxtail (*Lamprothamnium papulosum*)
 Strapwort (*Corrigiola litoralis*)
 Violet, Fen (*Viola persicifolia*)
 Viper's-grass (*Scorzoneroides humilis*)
 Water-plantain, Ribbon-leaved (*Alisma gramineum*)
 Wood-sedge, Starved (*Carex depauperata*)
 Woodsia, Alpine (*Woodsia alpina*)
 Woodsia, Oblong (*Woodsia ilvensis*)
 Wormwood, Field (*Artemisia campestris*)
 Woundwort, Downy (*Stachys germanica*)
 Woundwort, Limestone (*Stachys alpina*)
 Yellow-rattle, Greater (*Rhinanthus serotinus*)

CLOSE SEASONS AND TIMES

Wild Birds

The Wildlife and Countryside Act, 1981, lays down a close season for wild birds (other than game birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for:
Capercaillie and (except Scotland) *Woodcock*—Feb. 1–Sept. 30.
Snipe—Feb. 1–Aug. 11.
Wild Duck and *Wild Goose* (below high water mark)—Feb. 21–Aug. 31.

Birds which may be killed or taken outside the close season (except on Sundays and on Christmas Day in Scotland, and on Sundays in prescribed areas of England and Wales) are the above and coot, certain wild duck (gadwall, goldeneye, mallard, pintail, pochard, shoveler, teal, tufted duck, wigeon), certain wild geese (Canada, greylag, pink-footed, white-fronted (in England and Wales only)), moorhen, golden plover and woodcock.

Certain wild birds may be killed or taken at any time by authorized persons—crow, collared dove, gull (great and lesser black-backed or herring), jackdaw, jay, magpie, pigeon (feral or wood), rook, sparrow (house), and starling.

All other British birds are fully protected by law throughout the year.

Game Birds

In each case the dates are inclusive:—

Black Game—Dec. 11–Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).
 **Grouse*—Dec. 11–Aug. 11.
 **Partridge*—Feb. 2–Aug. 31.
 **Pheasant*—Feb. 2–Sept. 30.
 **Ptarmigan*—(Scotland only) Dec. 11–Aug. 11.

It is also unlawful in England and Wales to kill the game marked * above on a Sunday or Christmas Day.

Hunting and Ground Game

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for hares: but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. November 1 is the recognized date for the opening of the fox-hunting season, which continues till the following April.

Deer

The statutory close seasons for deer (all dates inclusive) are:

	England and Wales	Scotland
Fallow deer		
Male	May 1–July 31	May 1–July 31
Female	Mar. 1–Oct. 31	Feb. 16–Oct. 20
Red deer		
Male	May 1–July 31	Oct. 21–June 30
Female	Mar. 1–Oct. 31	Feb. 16–Oct. 20
Roe deer		
Male	Nov. 1–Mar. 31	Oct. 21–Mar. 31
Female	Mar. 1–Oct. 31	April 1–Oct. 20
Sika deer		
Male	May 1–July 31	Oct. 21–June 30
Female	Mar. 1–Oct. 31	Feb. 16–Oct. 20
Red/Sika hybrids		
Male	—	Oct. 21–June 30
Female	—	Feb. 16–Oct. 20

Angling

Close seasons (dates inclusive) are:

Coarse fishing.—Yorkshire, last day in Feb.–May 31; South West, none; rest of country, March 15–June 15.

Game fishing.—Trout, Oct. 1–last day of Feb.*; Salmon, Nov. 1–Jan. 31*.

* The above dates are statutory close times. Particularly with salmon, migratory trout and trout, close seasons vary in accordance with water authority local by-laws. In all cases, it is best to check with the water authority concerned.

HALLMARKS ON GOLD, SILVER AND PLATINUM WARES

London (Goldsmiths' Hall) Date Letters

From 1498

	Black letter, small	1498-9 to 1517-8		Roman letter, small ...	1739-40 to 1755-6

Hallmarks are the symbols stamped on gold, silver, or platinum articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold, silver, or platinum articles are required by law to be hallmarked before they are offered for sale. Hallmarking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hallmark consists of four symbols—the maker's mark or sponsor's mark, assay office mark, standard mark and date letter.

Additional marks have been authorized from time to time.

Maker's Mark.—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lis* and now consists invariably of the initial letters of the name or names of the maker or sponsor, or of the firm.

Assay Office Mark.—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697 to 1974 ■ lion's head erased was used on silver of the higher (Britannia) standard.

BIRMINGHAM (Newhall Street, B3 1SB) . An anchor
SHEFFIELD (137 Portobello Street, S1 4DS) . A rose
EDINBURGH (9 Granton Road, EH5 3QJ) . A castle

Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark.—Instituted in 1544. The current legal standards and their marks are as follows:—

PLATINUM

SILVER.—Sterling silver (92.5 per cent silver) is marked by English assay offices with ■ *lion passant* and by the Edinburgh Assay Office with a *lion rampant*. A full-length figure of *Britannia* was impressed on silver of a higher standard (95.84 per cent silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.—Since 1975 gold articles are marked with ■ crown followed by the millesimal figure for the standard, i.e. 916 for 22 carat, 750 for 18 carat, 585 for 14 carat and 375 for 9 carat.

PLATINUM.—Hallmarking of platinum articles began in 1975. The only standard permitted contains at least 95 per cent platinum.

Date Letter.—Instituted in 1478. The date letter denotes the year in which an article was assayed and hallmarked. Each alphabetical cycle has a distinctive style of lettering or shape of shield. The date letters were different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. Specimen shields and letters used by the London Office on silver articles in each period from

1498 to date are shown on the previous page. The same letters are found on gold articles but the surrounding shield may differ. Since Jan. 1, 1975 each Office has used the ■■■ style of date letter and shield for all articles.

OTHER MARKS

Duty Mark.—In 1784 ■■■ additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

Commemorative Marks.—There are three other marks to commemorate special events, the Silver Jubilee of King George V and Queen Mary in 1935, the Coronation of Queen Elizabeth II in 1953 and her Silver Jubilee in 1977.

Foreign Wares.—Since 1842 foreign wares imported into Great Britain have been required to be hallmarked before sale. The marks consist of the importer's mark, ■ special assay office mark (see below), the figures denoting fineness and the annual date letter. The current assay office marks for foreign wares are as follows:—

LONDON.—The sign of the Constellation Leo.

BIRMINGHAM.—Equilateral triangle.

SHEFFIELD.—The sign of the Constellation Libra.

EDINBURGH.—St. Andrew's Cross.

Common Control Mark.—Special marks at authorized Assay Offices of the signatory countries of the International Convention—United Kingdom, Austria, Denmark, Finland, Ireland, Portugal, Norway, Sweden and Switzerland—are legally recognized in the United Kingdom as approved hallmarks. These marks consist of a Sponsor's Mark, a Common Control Mark, a Fineness Mark (arabic numerals showing the standard in parts per thousand) and an Assay Office Mark. There is no date letter.

WEIGHTS AND MEASURES

SI UNITS

The Système International d'Unités (SI) is an international and coherent system of units devised to meet all known needs for measurement in science and technology. The system was adopted by the 11th Conférence Générale des Poids et Mesures (C.G.P.M.) in 1960. The British Standards describing the essential features of the International System of Units are *Specifications for SI Units* (BS 5555:1981) and *Conversion Factors and Tables* (BS 350, Part 1:1974).

The system consists of seven base units and the derived units formed as products or quotients of various powers of the base units. Together the base units and the derived units make up the coherent system of units. In the U.K. the SI base units, and almost all important derived units, are realized at the National Physical Laboratory and disseminated through the National Measurement System.

Base Units

Metre (m) = unit of length

Kilogram (kg) = unit of mass

Second (s) = unit of time

Ampere (A) = unit of electric current

Kelvin (K) = unit of thermodynamic temperature

Mole (mol) = unit of amount of substance

Candela (cd) = unit of luminous intensity

Derived Units

For some of the derived SI units, special names and symbols exist; those approved by the C.G.P.M. are listed below.

Hertz (Hz) = unit of frequency

Newton (N) = unit of force

Pascal (Pa) = unit of pressure, stress

Joule (J) = unit of energy, work, quantity of heat

Watt (W) = unit of power

Coulomb (C) = unit of electric charge, quantity of electricity

Volt (V) = unit of electric potential, potential difference, tension, electromotive force

Farad (F) = unit of electric capacitance

Ohm (Ω) = unit of electric resistance

Siemens (S) = unit of electric conductance

Weber (Wb) = unit of flux of magnetic induction, magnetic flux

Tesla (T) = unit of magnetic flux density, magnetic induction

Henry (H) = unit of inductance

Degree Celsius ($^{\circ}\text{C}$) = unit of Celsius temperature

Lumen (lm) = unit of luminous flux

Lux (lx) = unit of illuminance

Becquerel (Bq) = unit of activity (of a radionuclide)

Gray (Gy) = unit of absorbed dose, specific energy imparted, kerma, absorbed dose index

Sievert (Sv) = unit of dose equivalent

Supplementary Units

The derived units include, as a special case, the supplementary units which may be treated as dimensionless within the SI.

Radian (rad) = unit of plane angle

Steradian (sr) = unit of solid angle

Other derived units are expressed in terms of base units and/or supplementary units. Some of the more commonly-used derived units are the following:

Unit of area = square metre (m^2)

Unit of volume = cubic metre (m^3)

Unit of velocity = metre per second (m s^{-1})

Unit of acceleration = metre per second squared (m s^{-2})

Unit of density = kilogram per cubic metre (kg m^{-3})

Unit of momentum = kilogram metre per second (kg m s^{-1})

Unit of magnetic field = ampere per metre (A m^{-1})

Unit of surface tension = newton per metre (N m^{-1})

Unit of dynamic viscosity = pascal second (Pa s)

Unit of heat capacity = joule per kelvin (J K^{-1})

Unit of specific heat capacity = joule per kilogram kelvin ($\text{J kg}^{-1} \text{ K}^{-1}$)

Unit of heat flux density, irradiance = watt per square metre (W m^{-2})

Unit of thermal conductivity = watt per metre kelvin ($\text{W m}^{-1} \text{ K}^{-1}$)

Unit of electric field strength = volt per metre (V m^{-1})

Unit of luminance = candela per square metre (cd m^{-2})

SI Prefixes

Decimal multiples and submultiples of the SI units are indicated by SI prefixes. These are ■ follows:

multiples

exa (E) $\times 10^{18}$

peta (P) $\times 10^{15}$

tera (T) $\times 10^{12}$

giga (G) $\times 10^9$

mega (M) $\times 10^6$

kilo (k) $\times 10^3$

hecto (h) $\times 10^2$

deca (da) $\times 10$

submultiples

deci (d) $\times 10^{-1}$

centi (c) $\times 10^{-2}$

milli (m) $\times 10^{-3}$

micro (μ) $\times 10^{-6}$

nano (n) $\times 10^{-9}$

pico (p) $\times 10^{-12}$

femto (f) $\times 10^{-15}$

atto (a) $\times 10^{-18}$

U.K. UNITS

The legal measures for United Kingdom are enacted in the Weights and Measures Act 1985. The United Kingdom primary standards are the yard or the metre ■ the unit of measurement of length, and the pound or the kilogram ■ the unit of measurement of mass. Other units of measurement are defined by reference to the primary standards. Responsibility for the maintenance of the primary standards and for the determination or redetermination of their value rests with the Secretary of State for Trade and Industry.

The definition of the U.K. primary standards is as follows:

YARD = 0.9144 metre.

METRE is the length of the path travelled by light in vacuum during ■ time interval of 1/299 792 458 of a second.

POUND = 0.453 592 37 kilogram.

KILOGRAM is equal to the mass of the international prototype of the kilogram.

The following list shows the definitions of measures set out in Schedule 1 of the Weights and Measures Act, 1985.

Measurement of Length

Imperial Units

Mile = 1,760 yards.
 YARD (yd) = 0.9144 metre.
 Foot (ft) = 1/3 yard.
 Inch (in) = 1/36 yard.

Metric Units

Kilometre (km) = 1,000 metres.
 METRE (m) is the length of the path travelled by light in vacuum during a time interval of 1/299 792 458 of a second.
 Decimetre (dm) = 1/10 metre.
 Centimetre (cm) = 1/100 metre.
 Millimetre (mm) = 1/1000 metre.

Measurement of Area

Imperial Units

Acre = 4,840 square yards.

SQUARE YARD = a superficial area equal to that of a square each side of which measures one yard.
 Square foot = 1/9 square yard.

Metric Units

Hectare (ha) = 100 ares.
 Decare = 10 ares.
 Are (a) = 100 square metres.
 SQUARE METRE = a superficial area equal to that of a square each side of which measures one metre.
 Square decimetre = 1/100 square metre.
 Square centimetre = 1/100 square decimetre.
 Square millimetre = 1/100 square centimetre.

Measurement of Volume

Metric Units

CUBIC METRE (m^3) = a volume equal to that of a cube each edge of which measures one metre.
 Cubic decimetre = 1/1000 cubic metre.
 Cubic centimetre (cc) = 1/1000 cubic decimetre.
 Hectolitre = 100 litres.
 LITRE = a cubic decimetre.
 Decilitre = 1/10 litre.
 Centilitre = 1/100 litre.
 Millilitre = 1/1000 litre.

Measurement of Capacity

Imperial Units

GALLON = 4.546 09 cubic decimetres.
 Quart = 1/4 gallon.
 Pint (pt) = 1/2 quart.
 Gill = 1/4 pint.
 Fluid ounce (fl oz) = 1/20 pint.

Metric Units

Hectolitre (hl) = 100 litres.
 LITRE (l) = a cubic decimetre.
 Decilitre (dl) = 1/10 litre.
 Centilitre (cl) = 1/100 litre.
 Millilitre (ml) = 1/1000 litre.

Measurement of Mass or Weight

Imperial Units

POUND (lb) = 0.453 592 37 kilogram.
 Ounce (oz) = 1/16 pound.

*Ounce troy = 12/175 pound.

Metric Units

Tonne, metric tonne (t) = 1000 kilograms.
 KILOGRAM (kg) is the unit of mass; it is equal to the mass of the international prototype of the kilogram.
 Hectogram (hg) = 1/10 kilogram.
 Gram (g) = 1/1000 kilogram.

**Carat (metric) = 1/5 gram.

Milligram (mg) = 1/1000 gram.

*used only for transactions in gold, silver or other precious metals, and articles made therefrom.

**used only for transactions in precious stones or pearls.

Certain units of measurement may no longer be used for trade although the measure may still be used, e.g. it is legal to sell ■ 112 lb quantity of a commodity but it must be referred to in invoices, etc., ■ 112 lb, not as a cwt. These units are defined as follows:

Measurement of Length

Furlong = 220 yards.

Chain = 22 yards.

Measurement of Area

Square mile = 640 acres.

Rood = 1210 square yards.

Square inch = 1/144 square foot.

Measurement of Volume

Cubic yard = a volume equal to that of a cube each edge of which measures one yard.

Cubic foot = 1/27 cubic yard.

Cubic inch = 1/1728 cubic foot.

Measurement of Capacity

Bushel = 8 gallons.

Peck = 2 gallons.

Fluid drachm = 1/8 fluid ounce.

Minim (min) = 1/60 fluid drachm.

Measurement of Mass or Weight

Ton = 2,240 pounds.

Hundredweight (cwt) = 112 pounds.

Cental = 100 pounds.

Quarter = 28 pounds.

Stone = 14 pounds.

Dram (dr) = 1/16 ounce.

Grain (gr) = 1/7000 pound.

Pennyweight (dwt) = 24 grains.

Ounce apothecaries = 480 grains.

Drachm (3l) = 1/8 ounce apothecaries.

Scrapule (3l) = 1/3 drachm.

Metric tonne = 1,000 kilograms.

Quintal (q) = 100 kilograms.

Measurement of Electricity

Units of measurement of electricity are defined by the Weights and Measures Act, 1985, as follows:

An AMPERE (A) is that constant current which, if maintained in two straight parallel conductors of infinite length, of negligible circular cross-section and placed 1 metre apart in vacuum, would produce between these conductors a force equal to 2×10^{-7} newton per metre of length.

An OHM (Ω) is the electric resistance between two points of a conductor when a constant potential difference of 1 volt, applied between the two points, produces in the conductor a current of 1 ampere, the conductor not being the seat of any electromotive force.

A VOLT (V) is the difference of electric potential between two points of a conducting wire carrying a constant current of 1 ampere when the power dissipated between these points is equal to 1 watt.

A WATT (W) is the power which in one second gives rise to energy of 1 joule.
 Kilowatt (kW) = 1,000 watts.
 Megawatt (MW) = one million watts.

Water Measures

1 cubic foot = 62.321 lb.
 1 gallon = 160 fluid ounces.
 = 1 lb (distilled).
 1 cubic cm = 1 gram.
 1,000 cubic cm = 1 litre; 1 kilogram.
 1 cubic metre = 1,000 litres; 1,000 kg; 1 tonne.
 An inch of rain on the surface of an acre (43,560 sq. ft) = 3,630 cubic ft = 100.992 tons.

Cisterns: A cistern $4 \times 2\frac{1}{2}$ feet and 3 feet deep will hold brimful 186.963 gallons, weighing 1,869.63 lbs in addition to its own weight.

Water for Ships
 Kilderkin = 18 gallons.
 Barrel = 36 gallons.
 Puncheon = 72 gallons.
 Butt = 110 gallons.
 Tun = 210 gallons.

Bottles of Wine
 Equivalent in standard champagne bottles
 Magnum = 2 bottles.
 Jeroboam = 4 bottles.
 Rehoboam = 6 bottles.
 Methuselah = 8 bottles.
 Salmanazar = 12 bottles.
 Balthazar = 16 bottles.
 Nebuchadnezzar = 20 bottles.
 A quarter of a bottle is known as a *nip*.
 An eighth of a bottle is known as a *baby*.

NAUTICAL MEASURES

Distance at sea is measured in nautical miles. The British standard nautical mile was 6,080 feet (the length of a minute of an arc of a great circle of the earth, rounded off to a mean value to allow for the length varying at different latitudes). This measure has been obsolete since 1970 when the international nautical mile of 1,852 metres was adopted by the Hydrographic Department of the Ministry of Defence as a result of a recommendation by the International Hydrographic Bureau.

The cable (600 feet or 100 fathoms) was a measure approximately one tenth of a nautical mile. Such distances are now expressed in decimal parts of a sea mile or in metres.

Soundings at sea were recorded in fathoms (6 feet). Depths are now expressed in metres on new Admiralty charts.

Speed is measured in nautical miles per hour, called knots. A ship moving at the rate of 30 nautical miles per hour is said to be doing 30 knots.

Knots	m.p.h.	Knots	m.p.h.
1	1.1515	9	10.3636
2	2.3030	10	11.5151
3	3.4545	15	17.2727
4	4.6060	20	23.0303
5	5.7575	25	28.7878
6	6.9090	30	34.5454
7	8.0606	35	40.3030
8	9.2121	40	46.0606

The tonnage of a vessel is measured in tons of 100 cubic feet.

Gross tonnage = the total volume of all the enclosed spaces of a vessel.

Net tonnage = gross tonnage less deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

THERMOMETER COMPARISONS

The Celsius scale is the SI name for the Centigrade scale.

$$C = (F - 32) \div 1.8$$

$$F = (C \times 1.8) + 32$$

Comparison between Scales of Celsius and Fahrenheit

CELC.	FAH'T.	CELC.	FAH'T.	CELC.	FAH'T.

61	141.8	21	69.8	19	-2.2

NOTE.—The normal temperature of the human body is 36.9°C or 98.4°F. Freezing point = 0°C = 32°F. Boiling point = 99.975°C (on adoption of a new International Temperature Scale, ITS-90, from Jan. 1, 1990) = 212°F.

On the kelvin temperature scale, kelvin = 1/273.16 of the triple point of water (i.e. where ice, water and water vapour are in equilibrium). Absolute zero is zero K, the freezing point of water is 273.15 K and the boiling point is 373.125 K.

Million, Billion, etc.*Value in the United Kingdom*

Million	thousand × thousand (10^6)
Billion	million × million (10^{12})
Trillion	million × billion (10^{18})
Quadrillion	million × trillion (10^{24})

The American usage of billion (i.e. 10^9) is increasingly common, and is now universally used by statisticians.

Value in U.S.A.

Million	thousand × thousand (10^6)
Billion	thousand × million (10^9)
Trillion	million × million (10^{12})
Quadrillion	million × billion U.S. (10^{15})

Angular or Circular Measures

60 seconds ('') = 1 minute (').
60 minutes = 1 degree (°).
90 degrees = 1 right angle or quadrant.
Diameter of circle $\times 3\cdot1416$ = circumference.
Diameter squared $\times 0\cdot7854$ = area of circle.
Diameter squared $\times 3\cdot1416$ = surface of sphere.
Diameter cubed $\times 0\cdot523$ = solidity of sphere.
One degree of circumference $\times 57\cdot3$ = radius.*
Diameter of cylinder $\times 3\cdot1416$; product by length or height, gives the surface.
Diameter squared $\times 0\cdot7854$; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = $57\cdot3$ degrees.

PAPER MEASURES*Writing Paper*

480 sheets = 1 ream
24 sheets = 1 quire
20 quires = 1 ream

Printing Paper

516 sheets = 1 ream
2 reams = 1 quire
5 bundles = 1 bale

INTERNATIONAL PAPER SIZES

The basis of the international series of paper sizes is a rectangle having an area of one square metre, the sides of which are in the proportion of 1: $\sqrt{2}$. The proportions 1: $\sqrt{2}$ have a geometrical relationship, the side and diagonal of any square being in this proportion. The effect of this arrangement is that if the area of the sheet of paper is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion 1: $\sqrt{2}$. This feature is useful where photographic enlargement or reduction is used, as the proportions remain the same.

Description of the A series is by capital A followed by a figure. The basic size has the description A0 and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the sheet. Half A0 is A1 and half A1 is A2. Where larger dimensions are required the A is preceded by a figure. Thus 2A means twice the size A0; 4A is four times the size of A0.

Subsidiary Series.—A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

In addition there is a series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and other large items, C for envelopes particularly where it is necessary for an envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

Long Sizes.—Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or eight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph 2 (above) are not maintained, the ratio between the longer and the shorter sides being greater than $\sqrt{2}:1$. In practice long sizes should be produced from the A series only.

It is an essential feature of these series that the dimensions are of the trimmed or finished size.

'A' Series

	mm	inches
A0	841	× 1189
A1	594	× 841
A2	420	× 594
A3	297	× 420

SIZES OF BOUND BOOKS

The book sizes most commonly used are listed below. Approximate centimetre equivalents are also

shown. International sizes are converted to their nearest imperial size (e.g. A4 = D4; A5 = D8).

	<i>inches</i>	<i>cms</i>
Royal 8vo	R8	16 x 25
Super Royal 8vo	suR8	17 x 25
Foolscap 4to	F4	17 x 22
Crown 4to	C4	19 x 25
Imperial 8vo	Imp8	19 x 28
Demy 4to	D4	22 x 29
Royal 4to	R4	25 x 31
Super Royal 4to	suR4	25 x 34
Crown Folio	Cfol	25 x 38
Imperial Folio	Impfol	28 x 38

Folio means ■ sheet folded in half, *quarto* (4to) folded into four, *octavo* (8vo) folded into eight. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time—32 pages on each side of a sheet of quad.

A TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS

PARKINSON'S DISEASE CAN BE ANYBODY'S DISEASE.

YOU CAN HELP TO MAKE IT NOBODY'S DISEASE

You needn't be famous. Men and women all over the world suffer from Parkinson's Disease. There is no known cure. Researchers need your help. So do more than 100,000 sufferers in this country alone. Please send a donation, a covenant or leave us a legacy. You can even phone your donation by Access or Visa to 01-255 2432.

PARKINSON'S DISEASE SOCIETY

36 Portland Place, London W1N 3DG. Tel: 01-255 2432.

ARTHRITIS RESEARCH

If Timmy could write a Will, he would probably leave something to us.

You see, he's an arthritis sufferer. He's one of about 15,000 children in our country today who, along with over 8 million people of all other ages, are seriously affected by the disease. And, young as he is, Timmy knows we're his only hope.

We are the Arthritis and Rheumatism Council, the only UK charity financing medical research into all aspects of arthritis. Currently, we spend over £8 million annually on our research and legacies are a major source of our income. We rely entirely on voluntary contributions, receive no State aid whatsoever and spend a mere 3p in the £ on administration.

We've made many advances in treatment through our research, but as yet there's no cure. With your help, though, we'll find one. Please do what Timmy would do: remember us in your Will.

You'd be helping us achieve the goal of ensuring future generations of Timmy's don't have to suffer this dreadful disease. Talk to your solicitor today; or alternatively, write to the address below for our Legacy leaflet.

THE ARTHRITIS AND RHEUMATISM COUNCIL FOR RESEARCH

Working to find an earlier cure

We all need a break!

**Coping with disability
is stressful for the
disabled and their
carers.**

**They need a holiday that
takes account of their
special needs.**

As a development of the Society's continuing help for men and women who have served in H.M. Forces, especially the disabled, whether or not their disabilities result from their service, the FORCES HELP SOCIETY is building a bungalow-style complex consisting of self-contained units designed for the disabled, in the grounds of its Convalescent and Retirement Home at Ryde, Isle of Wight, which will provide independent restful holidays either for married couples together, or for the wife to stay in one of the units while her disabled husband is cared for elsewhere, or for a woman widowed after years of caring for a disabled husband, or for a disabled man or woman who can stay independently provided there are the right facilities and there is someone to call on in an emergency. The Society's carefully designed cottage homes for the disabled have been widely praised, and the holiday units will incorporate the same features.

This project, like the building of more specially designed homes, depends on your support through donations, covenants and legacies.

Please help us to help those who served us so well.

The Forces Help Society

and Lord Roberts Workshops

LEAVE THEM SOMETHING TO FIGHT WITH.

For the thousands of ex-service people and their dependants left from World War II, and the many who have suffered from conflict since, the battle goes on.

Give a helping hand to those left behind. For housing, food, clothing, fuel and employment.

The money that is raised during Remembrancetide is not enough to help the Royal British Legion with their support and care.

What you make provision for in a will or covenant can give them something to fight with.

And give them a life that is rightfully theirs.

**THE
ROYAL BRITISH LEGION
POPPY APPEAL.**

**PAPWORTH
AND
ENHAM
FOUNDATION
FOR
HANDICAPPED PEOPLE**

(Central Register of Charities No. 277670)

Patron: HRH The Duchess of Gloucester

*Able and
willing...
...but needs
a little
help.*

Since 1917, Papworth Village Settlement, near Cambridge and Enham Village Centre, near Andover in Hampshire have been helping handicapped people to help themselves and today provide employment and housing for over 500 physically handicapped people and their families.

PLEASE HELP US TO HELP THEM
with a Legacy, a Covenant, a Donation

Appeals Office:

**Room 7B, The White House, Enham-Alamein, Andover,
Hampshire SP11 6HJ**
Telephone: Andover (0264) 51551

THE MALCOLM SARGENT CANCER FUND FOR CHILDREN

Patron: HRH THE PRINCESS OF WALES

The Fund gives practical help to children suffering from cancer, leukaemia or Hodgkin's disease and over 900 NEW grants are accepted each year.

A Malcolm Sargent Social Worker has written:

"The Sister of the ward where Dean is an inpatient was very impressed with the speed and efficiency with which the grant was made. She said that in all her years working as a nurse she had never seen any arrangement made so promptly and with so little fuss!"

Donations please to:

MALCOLM SARGENT CANCER FUND FOR CHILDREN

Miss Sylvia Darley, OBE, General Administrator, 14 Abingdon Road, London, W8 6AF

Or if you live in Scotland to:

Miss Venetia Fane,

Drumwhill, Mossdale, By Castle Douglas, Kirkcudbrightshire, DG7 2NL.

THE BRITISH POLIO FELLOWSHIP

(The Infantile Paralysis Fellowship, registered as a charity in accordance with the National Assistance Act 1948)

THE NATIONAL VOLUNTARY ORGANISATION FOR THE POLIO DISABLED

(Patron: Lavinia, Duchess of Norfolk, C.B.E.)

- Founded in 1939, the Fellowship has helped thousands of polio victims to live a fuller life and to cope with their disabilities.
- Polio is no respecter of persons; it has stricken the physically strong of all age groups and from different walks of life.
- The Fellowship's work in caring for all polio victims knows no barriers and helps all who have suffered from polio.
- Over £300,000 spent annually on welfare grants, aids, residential care, etc. Can you help—by donation? covenant gift? or by legacy? Please write to:

A LEGACY MEANS A LOT TO THE LIMBLESS

We come from two World Wars, Korea, Kenya, Malaya, Aden, Cyprus, Ulster, The Falklands and all those areas of turmoil where peace must be restored.

Now, disabled and mainly aged, we must look to you for help. Please help by helping our Association.

BLESMA looks after the limbless from all the Services. It helps to overcome the shock of losing arms, or legs or an eye. And, for the severely handicapped, it provides Residential Homes where they can live in peace and dignity.

Help the disabled by helping BLESMA with a donation now or a legacy in the future. We promise you that not one penny will be wasted.

PLEASE GIVE TO THOSE WHO GAVE

Give to those who gave — please

Donations and information: The Chairman, National Appeal Committee, BLESMA, Midland Bank PLC, 60 West Smithfield, London EC1A 9DX

BLESMA
BRITISH LIMBLESS
EX-SERVICE MEN'S ASSOCIATION

THE FIRST STEP
by a recent, young double amputee

SOCIETY FOR THE ASSISTANCE OF LADIES IN REDUCED CIRCUMSTANCES

(Founded by the late Miss Edith Smallwood)

Patron: HER MAJESTY THE QUEEN

AS THEY GROW OLDER OUR NEED IS GREATER

THEY ARE "our ladies" who are elderly and infirm and of British Nationality living alone on low incomes. Women in all parts of the United Kingdom are assisted by way of regular and single grants.

OUR NEED is for donations, covenanted subscriptions and legacies to enable us to continue our work.

The Society is entirely supported by voluntary help and we welcome enquiries from those wishing to assist in our work or from those who may need our help.

S.A.L.R.C. (W), Lancaster House,

MEDICAL RESEARCH IS VITAL!

Scientists find **NON-ANIMAL** research more relevant to man, often - cheaper, more efficient, quicker! The **SENSIBLE** way to replace the use of animals in laboratories is by **FUNDING** programmes in Research Establishments that use **NEW ALTERNATIVE METHODS**. Such alternatives ARE ALREADY PROVING EFFECTIVE.

The HUMANE RESEARCH TRUST has given grants for work on

many diseases. The following are a very few examples:—

CANCER(Christie Hospital Manchester, York ■ Edinburgh Universities, Inst. of Psychiatry, London, ■ many others)

KIDNEY DISEASE

(Edinburgh & Glasgow Unies.)

CATARACTS(University of E. Anglia)

ARTHRITIS (Royal Col of Surgeons London),

DIABETES (Unis. of Oxford & Reading),

ALZHEIMER'S DISEASE

(UMIST Manchester)

PARKINSONS DISEASE

(St George's Hospital Medical School, London)

The Trust relies entirely on voluntary funding, please write for more information:

SO MUCH STILL TO BE DONE

for the hundreds of elderly people from all parts of the country—lonely, living in distressing circumstances—who are waiting and hoping that we can accommodate them soon in self-contained flatlets of their own.

Time for them is running out fast!

We have the skill, experience and desire to provide still more self-contained flatlets, where the elderly can live independent, secure and comfortable lives.

But tomorrow may be too late. We need your help now.
Only the unceasing flow of legacies, gifts and covenants will enable us to continue to provide this vital housing need.

PLEASE REMEMBER US AND THE ELDERLY
IN YOUR WILL

The Secretary (W.A.),

FELLOWSHIP HOUSES TRUST,

Clock House, Byfleet,
Weybridge, Surrey.

Telephone: Byfleet 43172

Occurrences During Printing

Events

Sept. 1. Spain's Prime Minister, Felipe Gonzalez called a general election for October 29. **4.** The T.U.C. conference opened in Blackpool. A man ■■■ lost overboard when fighting broke out between England football fans on ■ North Sea ferry taking them to England's World Cup qualifying game in Sweden. A Cubana Airlines aircraft crashed in Cuba killing all 126 people on board. **6.** The National Party won the South African elections. The Christian Democrat party won the Dutch elections. There was ■ further riot by England football fans in Stockholm where England drew 0-0 with Sweden. **7.** The Polish Prime Minister named his new cabinet. A British serviceman's wife ■■■ shot dead by the I.R.A. in Dortmund, West Germany. Graham Gooch was appointed captain of England's cricket team for the winter tour to the West Indies. **10.** The Social and Liberal Democrat conference opened in Brighton. President Chadli of Algeria dismissed the Prime Minister and replaced him with Mouloud Hamrouche. Hungary opened its border with Austria to admit thousands of East Germans who subsequently travelled to the West. On Oct. 1 the West German embassy in Prague started to offer refuge and permits to many more East Germans who wished to travel to the West. Steve Backley set ■ British record of 85.90 m. (281 ft. 10 in.) in the javelin event at the World Cup athletics championships in Barcelona. **11.** The Norwegian general election resulted in gains for the far left and far right parties but produced no conclusive result. **12.** It was announced that the Duchess of York is expecting the birth of her second child in March 1990. **14.** A police inspector was shot and killed in Greater Manchester; his assailant later shot himself. **17.** A collision between two tankers off Spurn Head, Humberside, left a 20-mile oil slick which threatened wildlife in the area. **17-22.** Hurricane Hugo, the most powerful hurricane to hit the Caribbean in a decade, killed at least 30 people and left many thousands homeless as it passed over Guadeloupe, Puerto Rico, Montserrat, Virgin Islands, Antigua and South Carolina, U.S.A. **18.** India and Sri Lanka signed ■■■ agreement under which Indian peace-keeping troops will be withdrawn from Sri Lanka by Dec. 31. **19.** Margaret Thatcher began a four-day visit to Japan. A New York appeal court reversed an earlier decision disqualifying the U.S.A. as winners of the 1988 America's Cup; on the 20th it was announced that New Zealand would lodge an appeal against the reinstatement of the U.S.A. as the winner of the Cup. A bomb exploded on board ■ French DC10 flying over the Sahara desert, causing 171 deaths. **20.** President Gorbachev dismissed three conservative members of the politburo, Vladimir Shcherbitsky, Victor Chebrikov and Viktor Nikonorov, and appointed several new members. Two people were killed when a Boeing 737 crashed on take-off into the East River in New York. **21.** The Green Party conference opened in Wolverhampton. The Colombian justice minister, Monica de Greiff, resigned after receiving death threats from powerful drug traffickers. **22.** An I.R.A. bomb killed 10 servicemen at the Royal Marines School of Music, in Deal, Kent. **25.** The S.D.P.

conference opened in Scarborough. In provincial elections in Quebec the Liberal party led by Robert Bourassa gained 92 seats in the 125-seat legislature. **28.** Ex-President Marcos of the Philippines died in exile in Hawaii. **29.** The Peruvian cabinet resigned and on Oct. 2 it was reported that the foreign minister, Guillermo Larco Cox would take over ■ Prime Minister. The Archbishop of Canterbury began ■ visit to the Vatican.

Oct. 1. The Labour Party conference opened in Brighton. Pakistan returned to membership of the Commonwealth. **2.** Postal rates went up by 1p for first and second class postage. The Labour Party voted to abandon its unilateral defence policy. **3.** An attempted coup against Gen. Noriega of Panama was put down by loyal Panamanian troops. **4.** Two people were killed when a gas explosion demolished ■ block of flats in Edinburgh. **5.** The Dalai Lama, Tibet's exiled spiritual leader, won the Nobel Peace Prize. Bank base rates rose to 15 per cent. **7.** Mass demonstrations against the government in East Berlin, Leipzig, Potsdam and other East German cities were crushed by the police. However, the largely peaceful demonstrations continued for several days afterwards. In Hungary, the ruling Socialist Workers' Party (Communist) voted to dissolve itself in order to make way for a pluralist socialist political system; elections are planned for early 1990. The Greek cabinet resigned. **8.** The Latvian Popular Front announced plans for the secession of the Latvian republic from the U.S.S.R. **9.** The Nobel Prize for Medicine ■■■ won by two American professors, Michael Bishop and Harold Varmus. The Queen and the Duke of Edinburgh began ■ three-day State visit to Singapore. **10.** President de Clerk of South Africa released eight long-term black prisoners, including Walter Sisulu who was imprisoned with Nelson Mandela in 1964. An I.R.A. cache of arms was found on Hampstead Heath, London.
