PREFACE

to the 122nd Annual Volume (1990)

This 122nd edition of Whitaker's Almanack continues to provide the information which has been the staple of the Almanack since the first edition. The Almanack has expanded considerably since 1869 – this edition has three times the number of pages of the first edition – and the information is more detailed and more varied.

We seek constantly to improve and expand the information provided. In this edition the Weights and Measures section has been expanded to include SI units, and a description of the various types of nature reserves in this country has been added to the information on conservation. In addition, the information about postal and telecommunications services has been revised and a table added showing airmail zones and international dialling codes.

Other changes in this edition are a response to recent events. The full results are given of the U.K. elections to the European Parliament in June 1989. The article describing the education system in the U.K. has been rewritten to include changes introduced as a result of recent legislation, and the directory of educational bodies has been revised. A new article describes the structure of the water industry after privatization. The Government's proposals for change in the broadcasting industry, the health service and the legal profession are included in the section summarizing White Papers.

For the fifth year a quiz is included with the Almanack, a feature which has kept thousands of readers busy in recent years. This year a questionnaire is attached to the quiz form as we are interested in knowing more about readers' views of the Almanack. We hope readers will return the questionnaire even if they do not wish to enter the quiz.

As ever, thanks are due to thousands of individuals and organizations worldwide who have provided information, comments, criticism and suggestions. We are most grateful for their assistance in preparing this edition of Whitaker's Almanack.

 H.M.C.—Headmasters' Conference.
 H.M.I.—Her/His Majesty's Inspector.
 H.M.L.—Her/His Majesty's Lieutenant.
 H.M.S.—Her/His Majesty's Ship.
 H.M.S.O.—Her/His Majesty's Stationery Office.
 H.N.C.—Higher National Certificate.
 H.N.D.—Higher National Diploma.
 H.O.L.M.E.S.—Home Office Large Major Enquiry System.
 Hon.—Honorary; Honourable.
 h.p.—horse power.
 H.P.—Hire purchase.
 H.Q.—Headquarters.
 H.R.H.—Her/His Royal Highness.
 H.S.E.—Health and Safety Executive; (*hic sepultus est*) here lies buried.
 H.S.H.—Her/His Serene Highness.
 H.T.R.—High temperature reactor.
 H.W.M.—High water mark.

I

I.A.A.S.—Incorporated Association of Architects and Surveyors.
 I.A.E.A.—International Atomic Energy Agency.
 I.A.T.A.—International Air Transport Association.
 I.B.A.—Independent Broadcasting Authority.
Ibid.—(*ibidem*) in the same place.
 I.B.R.D.—International Bank for Reconstruction and Development.
 I.C.A.O.—International Civil Aviation Organization.
 I.C.B.M.—Inter-continental ballistic missile.
 I.C.F.T.U.—International Confederation of Free Trade Unions.
 I.C.J.—International Court of Justice.
 I.C.R.C.—International Committee of the Red Cross.
 Id.—(*idem*) the same.
 I.D.A.—International Development Association.
 i.e.—(*id est*) that is.
 I.E.A.—International Energy Agency.
 I.F.A.D.—International Fund for Agricultural Development.
 I.F.C.—International Finance Corporation.
 I.H.S.—(*Jesus Hominum Salvator*) Jesus the Saviour of Mankind.
 I.L.E.A.—Inner London Education Authority.
 I.L.O.—International Labour Office/Organization.
 I.M.F.—International Monetary Fund.
 I.M.O.—International Maritime Organization.
 Inc.—Incorporated.
 Incoh.—(*incognito*) unknown, unrecognized.
 I.N.F.—International Nuclear Force.
 I.N.L.A.—Irish National Liberation Army.
 In loc.—(*in loco*) in its place.
 Inmarsat.—International Maritime Satellite Organization.

I.N.R.I.—(*Jesus Nazarenus Rex Iudeorum*) Jesus of Nazareth, King of the Jews.
 Inst.—(*instant*) current month.
 Intelsat—International Telecommunications Satellite Consortium.
 Interpol—International Criminal Police Commission.
 I.O.M.—Isle of Man.
 I.O.U.—I owe you.
 I.O.W.—Isle of Wight.
 I.Q.—Intelligence quotient.
 I.R.A.—Irish Republican Army.
 I.R.C.—International Red Cross.
 I.S.B.N.—International Standard Book Number.
 I.S.O.—Imperial Service Order.
 I.T.U.—International Telecommunication Union.
 I.T.V.—Independent Television.

J

J.—Judge (*after Judge's name*).
 J.P.—Justice of the Peace.

K

K.—Köchel numeration (*of Mozart's works*).
 K.A.N.U.—Kenyan African National Union.
 K.B.E.—Knight Commander, Order of the British Empire.
 K.C.B.—do, Order of the Bath.
 K.C.I.E.—do, Order of the Indian Empire.
 K.C.L.J.—do, Order of St. Lazarus of Jerusalem.
 K.C.M.G.—do, Order of St. Michael and St. George.
 K.C.S.I.—do, Order of the Star of India.
 K.C.V.O.—do, Royal Victorian Order.
 K.G.—Knight of the Garter.
 K.G.B.—(*Komitet Gosudarstvennoi Besopasnosti*) Committee of State Security (USSR).
 K.K.K.—Ku Klux Klan.
 K.L.J.—Knight, Order of St. Lazarus of Jerusalem.
 k.o.—knock out (*boxing*).
 K.P.—Knight, Order of St. Patrick.
 K.St.J.—Knight, Order of St. John of Jerusalem.
 Kt.—Knight.
 K.T.—Knight of the Thistle.
 kV.—Kilovolt.
 kW.—Kilowatt.
 kWh.—Kilowatt hour.

L

L. (or Lib.)—Liberal.
 Lab.—Labour.
 Lat.—Latitude.
 l.b.w.—leg before wicket.
 l.c.—lower case (*printing*).
 L.C.J.—Lord Chief Justice.
 L.C.M.—Least/lowest common multiple.
 L.D.S.—Licentiate in Dental Surgery.
 L.E.A.—Local Education Authority.
 L.H.D.—(*Literarum Humaniorum Doctor*) Doctor of Humane Letters/Literature.
 Lic.—(*Licenciado*) lawyer (Spanish).
 Lic. Med.—Licentiate in Medicine.
 Lit.—Literary.
 Lit. Hum.—(*Literae Humaniores*) Faculty of classics and philosophy, Oxford.
 Litt. D.—Doctor of Letters.
 L.J.—Lord Justice.
 LL.B.—Bachelor of Laws.
 LL.D.—Doctor of Laws.
 LL.M.—Master of Laws.
 L.M.—Licentiate in Midwifery.
 L.M.S.S.A.—do, in Medicine and Surgery, Society of Apothecaries.
 loc. cit.—(*locu citato*) in the place cited.
 log.—logarithm.
 Londin.—of London (*Bishop*).
 Long.—Longitude.
 L.S.—(*loco sigilli*) place of the seal.

- L.S.A.—Licentiate of Society of Apothecaries.
 L.S.d.—(Librae, solidi, denarii) £, shillings and pence.
 L.S.E.—London School of Economics and Political Science.
 L.S.O.—London Symphony Orchestra.
 Lt.—Lieutenant.
 L.T.A.—Lawn Tennis Association.
 Ltd.—Limited (liability).
 L.Th. (or L. Theol.)—Licentiate in Theology.
 L.V.O.—Lieutenant, Royal Victorian Order.
 L.W.M.—Low water mark.
- M**
- M.—Member of; Monsieur.
 M.A.—Master of Arts.
 M.A.F.F.—Ministry of Agriculture, Fisheries and Food.
 Maj.—Major.
 max.—maximum.
 M.B./D.—Bachelor/Doctor of Medicine.
 M.B.E.—Member, Order of the British Empire.
 M.C.—Master of Ceremonies; Military Cross.
 M.C.C.—Marylebone Cricket Club.
 M.Ch.(D.)—Master of (Dental) Surgery.
 M.D.S.—do., of Dental Surgery.
 M.E.—Middle English.
 M.E.C.—Member of Executive Council.
 M.Ed.—Master of Education.
 mega—one million times.
 M.E.P.—Member of the European Parliament.
 M.F.H.—Master of Foxhounds.
 Mgr.—Monsignor.
 M.I.—Military Intelligence.
 micro—one-millionth part.
 milli—one-thousandth part.
 min.—minimum.
 M.I.R.A.S.—Mortgage Interest Relief at Source.
 M.L.A.—Member of Legislative Assembly.
 M.L.C.—Member of Legislative Council.
 Mlle.—Mademoiselle.
 M.L.R.—Minimum lending rate.
 M.M.—Military Medal.
 Mme.—Madame.
 M.N.—Merchant Navy.
 M.O.—Medical Officer/Orderly.
 M.o.D.—Ministry of Defence.
 M.o.T.—Ministry of Transport.
 M.P.—Member of Parliament; Military Police.
 m.p.h.—miles per hour.
 M.R.—Master of the Rolls.
 M.R.C.—Medical Research Council.
 M.S.—Master of Surgery; Manuscript (*pl. MSS.*).
 M.Sc.—do., of Science.
 M.S.C.—Manpower Services Commission.
 M.S.F.—Manufacturing, Science and Finance Union.
 M.T.B.—Motor torpedo boat.
 M.Th.—Master of Theology.
 Mus. B/D.—Bachelor/Doctor of Music.
 M.V.—Merchant Vessel; Motor Vessel.
 M.V.O.—Member, Royal Victorian Order.
 M.W.—Medium Wave.
- N**
- N.—North.
 N.A.A.F.I.—Navy Army and Air Force Institutes.
 N.A.L.G.O.—National and Local Government Officers' Association.
 N.A.S.A.—National Aeronautics and Space Administration.
 N.A.S./U.W.T.—National Association of Schoolmasters/Union of Women Teachers.
 N.A.T.O.—North Atlantic Treaty Organization.
 N.B.—New Brunswick; (*Nota bene*) note well.
 N.C.O.—Non-commissioned officer.
 N.E.B.—New English Bible.
- N.E.D.C. (or NEDDY)—National Economic Development Council.
 Nem. con.—(*Nemine contradicente*) no one contradicting.
 N.E.R.C.—Natural Environment Research Council.
 n.e.s.—not elsewhere specified.
 N.F.T.—National Film Theatre.
 N.F.U.—National Farmers' Union.
 N.G.A.—National Graphical Association.
 N.H.S.—National Health Service.
 N.I.—National Insurance; Northern Ireland.
 No.—(numero) number.
 Non seq.—(*Non sequitur*) it does not follow.
 Norvic.—of Norwich (*Bishop*).
 N.P.—Notary Public.
 N.R.A.—National Rifle Association.
 N.S.—New Style (*calendar*); Nova Scotia.
 N.S.P.C.C.—National Society for the Prevention of Cruelty to Children.
 N.S.W.—New South Wales.

 R.S.W.—Royal Scottish Society of Painters in Watercolours.
 R.T.P.I.—Royal Town Planning Institute.
 R.U.—Rugby Union.
 R.U.C.—Royal Ulster Constabulary.
 R.V.—Revised Version (*of Bible*).
 R.V.M.—Royal Victorian Medal.
 R.W.S.—Royal Water Colour Society.
 R.Y.S.—Royal Yacht Squadron.

S

- s.—second; (*solidus*) shilling.
 S.—South.
 S.A.—Salvation Army; South Africa; South America; South Australia.
 S.A.E.—Stamped addressed envelope.
 Salop.—Shropshire.
 Sarum.—of Salisbury (*Bishop*).
 S.A.S.—Special Air Service Regiment.
 S.B.S.—Special Boat Squadron.
 Sc.D.—Doctor of Science.
 S.C.M.—State Certified Midwife.
 S.D.I.—Strategic Defence Initiative ("Star Wars").
 S.D.L.P.—Social Democratic and Labour Party.
 S.D.P.—Social Democratic Party.
 S.E.A.Q.—Stock Exchange Automated Quotations system.
 S.E.N.—State Enrolled Nurse.
 S.E.R.C.—Science and Engineering Research Council.
 S.E.R.P.S.—State Earnings Related Pension Scheme.
 S.I.—(*Système Internationale d'Unités*) International System of Units; Statutory Instrument.
 Sic.—So written.
 Sig.—Signature; Signor.
 S.J.—Society of Jesus (*Jesuits*).
 S.L.D.—Social and Liberal Democrats.
 S.M.P.—Statutory Maternity Pay.
 S.N.P.—Scottish National Party.
 S.O.G.A.T.—Society of Graphical and Allied Trades.
 S.O.S.—Save Our Souls (*distress signal*).
 s.p.—(*sine prole*) without issue.
 sp.gr.—specific gravity.
 S.P.Q.R.—(*Senatus Populusque Romanus*) The Senate and People of Rome.
 Sqn. Ldr.—Squadron Leader.
 S.R.N.—State Registered Nurse.
 SS.—Saints.
 S.S.—Steamship.
 S.S.C.—Solicitor before Supreme Court (*Scotland*).
 S.S.F.—Society of St. Francis.
 S.S.P.—Statutory Sick Pay.
 St.—Saint; Street.
 stet.—let it stand (*printing*).
 S.T.D.—(*Sacrae Theologiae Doctor*) Doctor of Sacred Theology; Subscriber trunk dialling.
 a.t.p.—Standard temperature and pressure.
 S.T.P.—(*Sacrae Theologiae Professor*) Professor of Sacred Theology.
 Sub Lt.—Sub-Lieutenant.
 S.W.A.P.O.—South West Africa People's Organization.

T

- T.A.—Territorial Army.
 T.B.—Tuberculosis.
 T.C.C.B.—Test and County Cricket Board.
 T.D.—Territorial Efficiency Decoration.
 temp.—temperature; temporary employee.
 T.E.S.—*Times Educational Supplement*.
 T.G.W.U.—Transport and General Workers' Union.
 T.L.S.—*Times Literary Supplement*.
 T.N.T.—trinitrotoluene (*explosive*).
 tr.—transpose (*printing*).
 T.R.H.—Their Royal Highnesses.
 Truron.—of Truro (*Bishop*).
 T.T.—Teetotal; Tuberculin tested.
 T.U.C.—Trades Union Congress.
 T.V.—Television.
 T.V.E.I.—Technical and Vocational Education Initiative.

U

- U.A.E.—United Arab Emirates.
 u.c.—upper case (*printing*).
 U.C.A.T.T.—Union of Construction, Allied Trades and Technicians.

- U.C.C.A.—Universities' Central Council on Admissions.
 U.D.I.—Unilateral Declaration of Independence.
 U.D.M.—Union of Democratic Mineworkers.
 U.D.R.—Ulster Defence Regiment.
 U.E.F.A.—Union of European Football Associations.
 U.F.C.—Universities' Funding Council.
 U.F.O.—Unidentified flying object.
 U.H.F.—ultra-high frequency.
 U.K.—United Kingdom.
 U.K.A.E.A.—United Kingdom Atomic Energy Authority.
 Ult.—(*ultimo*) in the preceding month.
 U.N.—United Nations.
 U.N.E.S.C.O.—United Nations Educational, Scientific and Cultural Organization.
 U.N.I.C.E.F.—United Nations Children's Fund.
 U.N.I.D.O.—United Nations Industrial Development Organization.
 Unita.—National Union for the Total Independence of Angola.
 U.P.U.—Universal Postal Union.
 U.S. (or U.S.A.)—United States (of America).
 U.S.D.A.W.—Union of Shop, Distributive and Allied Workers.
 U.S.M.—Unlisted Securities Market.
 U.S.S.R.—Union of Soviet Socialist Republics.

V

- v.—(*versus*) against.
 V.A.—Vicar Apostolic; Victoria and Albert Order.
 V.A.D.—Voluntary Aid Detachment.
 V.A.T.—Value added tax.
 V.C.—Victoria Cross.
 V.D.—Venereal disease; Volunteer Officers' Decoration.
 V.D.U.—Visual display unit.
 Ven.—Venerable.
 Verb. sap.—(*Verbum sapienti satis est*) A word to the wise is enough.
 V.H.F.—very high frequency.
 V.I.P.—Very important person.
 Viz.—(*videlicet*) namely.
 Vo.—(*Verso*) on the left-hand page.
 V.R.D.—Royal Naval Volunteer Reserve Officers' Decoration.
 V.S.O.—Voluntary Service Overseas.
 V.T.O.L.—Vertical take-off and landing (*aircraft*).

W

- W.—West.
 W.C.C.—World Council of Churches.
 W.E.A.—Workers' Educational Association.
 W.E.U.—Western European Union.
 W.F.T.U.—World Federation of Trade Unions.
 W.H.O.—World Health Organization.
 W.I.—West Indies; Women's Institute.
 Winton.—of Winchester (*Bishop*).

Epiphany	Jan. 6	Whit Sunday (Pentecost)	June 3
Ash Wednesday	Feb. 28	Trinity Sunday	June 10
Ramadân, first day	March 28	Corpus Christi	June 14
Passover, first day	April 10	Islamic New Year (1411)	July 24
Good Friday	April 13	Jewish New Year (5751)	Sept. 20
Easter Day	April 15	Day of Atonement (Yom Kippur)	Sept. 29
Greek Orthodox Easter	April 15	Feast of Tabernacles, first day	Oct. 4
Rogation Sunday	May 20	First Sunday in Advent	Dec. 2
Ascension Day	May 24	Christmas Day	Dec. 25
Feast of Weeks, first day	May 30		

SEASONS 1990

Northern Hemisphere

Spring Equinox	Sun enters Sign Aries	March 20d 21h	G.M.T.
Summer Solstice	" " Cancer	June 21d 16h	
Autumn Equinox	" " Libra	Sept. 23d 07h	
Winter Solstice	" " Capricornus	Dec. 22d 03h	

Southern Hemisphere

Autumn Equinox	Sun enters Sign Aries	March 20d 21h	G.M.T.
Winter Solstice	" " Cancer	June 21d 16h	
Spring Equinox	" " Libra	Sept. 23d 07h	
Summer Solstice	" " Capricornus	Dec. 22d 03h	

British Summer Time in 1990 begins March 25d 01h GMT and ends on October 28d 01h GMT.

LAW TERMS 1990

Hilary Term begins Jan. 11 and ends April 11
 Easter Term begins April 24 and ends May 25
 Trinity Term begins June 5 and ends July 31
 Michaelmas Term begins Oct. 1 and ends Dec. 21

QUARTER DAYS
(England, Wales, N. Ireland)

Lady Day	March 25
Midsummer	June 24
Michaelmas	Sept. 29
Christmas	Dec. 25

TERM DAYS
(Scotland)

Candlemas	Feb. 2
Whitsunday	May 15
Lammas	Aug. 1
Martinmas	Nov. 11
(Removal Terms are May 28 and Nov. 28).

ASTRONOMICAL NOTES

MERCURY is unsuitably placed for observation at first, inferior conjunction occurring on the 9th. For the last ten days of the month Mercury may be glimpsed as a difficult morning object, magnitude +0.6 to 0.0, low above the south-eastern horizon at about the time of beginning of morning civil twilight. Despite the fact that it is at greatest western elongation on February 1st it is not very well placed for observation, since its declination is -21°. The old crescent Moon will be near Mercury on the mornings of the 24th and 25th.

VENUS, magnitude -4, is a brilliant object in the south-western sky in the early evening for the first half of the month but rapidly drawing closer to the Sun. A few days after inferior conjunction, which occurs on the 18th, it becomes visible in the evenings before dawn, low above the E.S.E. horizon. Both in

the evening and morning apparitions Venus exhibits a slender crescent appearance in the telescope.

MARS, magnitude +1.5, is a morning object, low above the south-eastern horizon, visible by about the time of beginning of morning nautical twilight. During the month Mars moves from Ophiuchus into Sagittarius.

JUPITER, magnitude -2.7, is only just past opposition, and therefore visible a brilliant object for most of the night. The Moon, only 1 day before Full, passes 4°N. of the planet on the night of the 9-10th. Jupiter is in the western part of Gemini.

SATURN is in conjunction with the Sun on the 6th and thus unsuitably placed for observation.

ECLIPSE. An annular eclipse of the Sun occurs on the 26th. See page 74 for details.

ASTRONOMICAL NOTES

MERCURY is unsuitably placed for observation throughout the month.

VENUS, magnitude -4.6, is a brilliant object in the morning skies, visible in the E.S.E. before dawn. Telescopically it appears as a thin crescent waxing noticeably during the month as the area illuminated increases from 6 per cent to 30 per cent. On the morning of the 22nd the old crescent Moon passes 8°S. of the planet.

MARS continues to be visible — a morning object, magnitude +1.3. However it is now at a declination of -24°, and will be quite difficult to detect, low above the south-eastern horizon, about an hour before sunrise.

JUPITER continues to be visible as a brilliant object for most of the night, magnitude -2.5. Even by the

end of the month it can still be seen in the western sky after 03h. The gibbous Moon will be seen approaching the planet on the night of the 5-6th, passing 4°N. of it as the two bodies are setting in the west.

SATURN is too close to the Sun for observation during February.

ECLIPSE. A total eclipse of the Moon, visible from the British Isles, occurs on the 9th. See page 74 for details.

ZODIACAL LIGHT. The evening cone may be observed in the western sky after the end of twilight from the 11th to the 25th. This faint phenomenon is only visible under good conditions in the absence of both moonlight and artificial lighting.

ASTRONOMICAL NOTES

MERCURY remains too close to the Sun for observation throughout the month, superior conjunction occurring on the 19th.

VENUS continues to be visible as a magnificent object in the morning skies, magnitude -4.5, though only visible for about an hour before sunrise, low above the E.S.E. horizon. On the morning of the 23rd the old crescent Moon passes 2°S. of the planet.

MARS, magnitude +1.1, is a very difficult morning object, even though it is moving steadily away from the Sun. The best chance of detecting it is about an hour before sunrise, when it is very low on the south-

easterly horizon. During March Mars moves from Sagittarius into Capricornus.

JUPITER, magnitude -2.3, is still a brilliant object in the southern skies in the evening, visible until well after midnight even by the end of the month.

SATURN slowly becomes visible as a morning object low above the south-eastern horizon for a short while before the brightening twilight inhibits observation.

ZODIACAL LIGHT. The evening cone may be observed in the western sky after the end of twilight from the 13th to the 27th.

ASTRONOMICAL NOTES

MERCURY is an evening object, magnitude -1·2 to +2·5, for all except the last week of the month. It may be seen low above the W.N.W. horizon at the time of end of evening civil twilight. For observers in the northern hemisphere this is the best evening apparition in 1990.

VENUS continues to be visible ■ a brilliant object in the morning skies but only visible for a short while before dawn, low above the E.S.E. horizon. The old crescent Moon will be seen close to the planet on the morning of the 22nd.

MARS is a morning object, magnitude +0·9, and by

the end of the month will be seen low above the south-eastern horizon shortly before 04h.

JUPITER continues to be visible as ■ brilliant object in the south-western skies in the evenings, magnitude -2·1. Jupiter is in the constellation of Gemini. On the early evening of the 1st, the Moon, just before First Quarter, will be seen passing 3° above the planet.

SATURN, magnitude +0·6, is ■ morning object, low in the south-eastern sky. On the morning of the 18th, the Moon, at Last Quarter, will be seen near the planet. Saturn is in the constellation of Sagittarius.

ASTRONOMICAL NOTES

MERCURY is unsuitably placed for observation although it reaches greatest western elongation on the last day of the month.

VENUS is a splendid object in the morning skies, magnitude -4.1, though only visible for about half-an-hour before dawn, low above the eastern horizon.

MARS, magnitude +0.7, continues to be visible a morning object. Mars is in Aquarius until towards the end of the month when it moves into Pisces. The planet has a reddish tint which is an aid to its identification.

JUPITER, magnitude -1.9, continues to be visible as a bright object in the south-western sky in the evenings. On the evening of the 26th the gibbous Moon will be seen approaching the planet. The four Galilean satellites are readily observable with any small telescope or even a good pair of binoculars provided that they are held rigidly. Times of eclipses and shadow transits of these satellites are given on page 73.

SATURN continues to be visible as a morning object low in the south-eastern sky. By the end of the month it is rising before midnight.

ASTRONOMICAL NOTES

MERCURY remains unsuitably placed for observation throughout the month.

VENUS, magnitude -4.0, is a splendid object in the early mornings, low above the eastern horizon before dawn. For observers in the latitudes of the British Isles its movement towards the Sun is more than offset by its northward motion in declination so that it is gradually visible for longer each morning throughout the month.

MARS, magnitude +0.4, is still a morning object. By the end of June it is visible low on the eastern horizon by about 01h.

JUPITER, magnitude -1.8, is now coming to the end of its period of evening visibility and is unlikely to be seen after the first two weeks of the month.

SATURN, magnitude +0.2, is now rising before midnight and visible low in the south-eastern sky until the long morning twilight inhibits observation.

URANUS is at opposition on the 29th, in the constellation of Sagittarius. Uranus is barely visible to the naked eye since its magnitude is +5.6, but it is readily located with only small optical aid.

TWILIGHT. Reference to the section just above these notes shows that astronomical twilight lasts all night for some time around the summer solstice (i.e. in June and July), even in southern England. Under these conditions the sky never gets completely dark since the Sun is always less than 18° below the horizon.

ASTRONOMICAL NOTES

MERCURY is too close to the Sun for observation.

VENUS continues to be visible as a splendid object in the morning skies, magnitude -3.9. By the end of the month it is visible above the E.N.E. horizon for as long as an hour and a half before sunrise. On the morning of the 20th the old crescent Moon, only 2 days before New, passes 4°N. of the planet.

MARS continues to be visible as a morning object, magnitude +0.1. It moves from Pisces to Aries during the month.

JUPITER is in conjunction with the Sun on the 15th and is therefore unsuitably placed for observation.

SATURN, magnitude +0.1, is at opposition on the 14th and thus visible throughout the hours of darkness. The Moon, near Full, is near the planet on the night of the 8th. Saturn is in Sagittarius. The rings of Saturn present a beautiful spectacle to the observer with only a small telescope. The rings are still well open.

NEPTUNE is at opposition on the 5th, in the constellation of Sagittarius. It is not visible to the naked eye since its magnitude is +7.9.

ECLIPSE. A total eclipse of the Sun occurs on the 22nd. See page 74 for details.

ASTRONOMICAL NOTES

MERCURY, despite being at greatest eastern elongation on the 11th, is not suitably placed for observation.

VENUS, magnitude -3.9, is still a splendid morning object, visible above the E.N.E. horizon before dawn. On the morning of the 9th Venus passes 7°S. of Pollux while it will be close to Jupiter for a few days around the 12th: Jupiter is two magnitudes fainter than Venus.

MARS, magnitude -0.2, is a morning object, though now visible in the eastern sky before midnight. Mars is passing from Aries into Taurus and by the end of August is south of the Pleiades.

JUPITER, after the first week of the month, becomes visible a morning object, low in the east before

dawn. Jupiter, magnitude -1.8, moves from Gemini into Cancer during the month.

SATURN is still visible in the southern skies for the greater part of the night though by the end of the month it will be too close to the south-western horizon to be seen after midnight. On the evenings of the 4th and 31st the gibbous Moon will be seen near the planet.

ECLIPSE. A partial eclipse of the Moon occurs on the 6th. See page 74 for details.

METEORS. The maximum of the famous Perseid meteor shower occurs on the night of August 12-13. The Moon, at Last Quarter, will provide some hindrance to observation.

AUGUST—Eighth Month

[1990]

46

ASTRONOMICAL NOTES

MERCURY is a morning object, magnitude +1.7 to -1.0, during the second half of the month, visible low above the eastern horizon around the time of beginning of morning civil twilight. This is the most suitable morning apparition of the year for observers in the northern hemisphere. On the morning of the 17th the old crescent Moon will be seen approaching the planet.

VENUS is a splendid object in the morning skies, magnitude -3.9, visible above the eastern horizon before dawn. It is getting noticeably closer to the Sun and by the end of the month will only be seen for about 10-15 minutes before being lost in the glare of the rising Sun.

MARS, magnitude -0.6, is now becoming quite a prominent object in the sky from the late evening onwards. Late on the evening of the 10th the Moon,

at Last Quarter, passes 6°N. of the planet. Mars is in Taurus and on the morning of the 25th passes 4°N. of Aldebaran.

JUPITER, magnitude -1.9, is a bright morning object in the eastern sky, visible for several hours before dawn. On the morning of the 15th the old crescent Moon will be seen very close to the planet.

SATURN, magnitude +0.4, continues to be visible low in the southern and south-western skies in the evenings.

ZODIACAL LIGHT. The morning cone may be seen stretching up from the eastern horizon before the beginning of morning twilight from the 17th to the end of the month. This faint phenomenon is only visible under good conditions, in the absence of both moonlight and artificial lighting.

ASTRONOMICAL NOTES

MERCURY continues to be visible ■■ morning object for the first week of the month, magnitude -1.0. It may be detected low on the eastern horizon around the time of beginning of morning civil twilight.

VENUS is ■ morning object, magnitude -3.9, but only visible for the first ten days of the month, low above the E.S.E. horizon for ■ few minutes before dawn. Thereafter the planet is too close to the Sun for observation.

MARS is now becoming quite a bright object in the night sky, its magnitude brightening during the month from -0.9 to -1.6, ■ it moves towards

opposition. By the end of the month it may be seen low in the east by 19h. When the gibbous Moon rises on the evening of the 8th Mars will be seen passing 5°S. of it.

JUPITER continues to be visible as ■ brilliant morning object, magnitude -2.1. By the end of the month it is rising in the east well before midnight. On the night of the 12-13th observers will see the old crescent Moon rising at about the same time as Jupiter (around midnight).

SATURN is still visible low in the south-western sky in the evenings, magnitude +0.5. On the evening of the 25th the Moon passes 2°S. of the planet.

ASTRONOMICAL NOTES

MERCURY is unsuitably placed for observation throughout November.

VENUS is too close to the Sun for observation, superior conjunction occurring on the 1st.

MARS, magnitude -2.0, reaches opposition on the 27th and thus is visible throughout the hours of darkness. On the night of the 4–5th the gibbous Moon passes 3°N. of the planet. Mars is retrograding in Taurus and passes 6°N. of Aldebaran on the 13th. Mars has an orbit which is more eccentric than any of the other major planets except Pluto and Mercury. As a result the times of closest approach to the Earth and of opposition need not coincide. In 1990, for

example, the difference in time between these two events is 7d 16h, as closest approach occurs at 20d 04h.

JUPITER, magnitude -2.2, is a brilliant morning object, rising before midnight and crossing the meridian well before dawn. On the morning of the 9th the Moon, at Last Quarter, passes 2°S. of the planet, around the time of sunrise.

SATURN, magnitude +0.6, continues to be visible as an evening object low in the south-western sky. Saturn is in Sagittarius. On the evening of the 21st the crescent Moon will be seen approaching the planet.

ASTRONOMICAL NOTES

MERCURY, despite being at greatest eastern elongation on the 6th, is unsuitably placed for observation.

VENUS is to close to the Sun for observation at first but gradually becomes visible in the evenings for the last week of the month. It will only be seen for a very short while after sunset, low above the south-western horizon. Its magnitude is -3.9.

MARS, just past opposition, is still visible for the greater part of the night though its magnitude fades from -1.9 to -1.0 during the month. The Moon passes north of Mars on the night of December 1-2 and again on December 28-29. Mars is in Taurus moving slowly westwards between the Pleiades and the Hyades.

JUPITER continues to be visible ■ a brilliant object

in the night sky, magnitude -2.4, and by the end of the month is visible above the eastern horizon shortly after 19h. Jupiter is in the constellation of Cancer. The gibbous Moon is near the planet on the evening of the 6th.

SATURN is approaching the end of its evening apparition and is only visible low in the south-western sky for a short while. Before the end of the year it is lost in the evening twilight. The waxing crescent Moon, only 2½ days old, may be seen near the planet on the evening of the 19th, if conditions ■ good.

METEORS. The maximum of the well-known Geminid meteor shower occurs during the night of the 13th-14th. Conditions are quite favourable since the old crescent Moon does not rise until shortly before 06h.

NOTES ON ASTRONOMICAL SECTION

GENERAL

The astronomical data are given in a form suitable for those who practise naked-eye astronomy or use small telescopes. No attempt has been made to replace the *Astronomical Almanac* for professional astronomers. Positions of the heavenly bodies are given only to the degree of accuracy required by amateur astronomers for setting telescopes, or for plotting on celestial globes or star atlases. Where intermediate positions are required, linear interpolation may be employed.

All data are, unless otherwise stated, for 0^h Greenwich Mean Time (G.M.T.), i.e. at the midnight at the beginning of the day named.

(See also notes on British Summer Time, p. 72).

Definitions of the terms used cannot be given in an ephemeris of this nature. They must be sought in astronomical literature and text-books. Probably the best source for the amateur is Norton's *Star Atlas and Reference Book* (Longman, 17th edition, 1987; £12.95), which contains an excellent introduction to observational astronomy, and the finest series of star maps yet produced for showing stars visible to the naked eye. Certain more extended ephemerides are available in the British Astronomical Association Handbook, an annual popular among amateur astronomers. (Secretary: Burlington House, Piccadilly, London, W1V 0NL)

A special feature has been made of the times when the various heavenly bodies are visible in the British Isles. Since two columns, calculated for latitudes 52° and 56°, are devoted to risings and settings, the range 50° to 58° can be covered by interpolation and extrapolation. The times given in these columns are G.M.T.'s for the meridian of Greenwich. An observer west of this meridian must add his longitude (in time) and vice versa.

In accordance with the usual convention in astronomy, + and - indicate respectively north and south latitudes or declinations.

PAGE ONE OF EACH MONTH

The Zodiacal signs through which the Sun is passing during each month are illustrated. The date of transition from one sign to the next, to the nearest hour, is also given.

The festivals and holy days in black-letter type are those observed by the Church of England.

Under the heading PHENOMENA will be found particulars of the more important conjunctions of the Sun, Moon and planets with each other, and also the dates of eclipses and other astronomical phenomena of special interest.

The CONSTELLATIONS listed each month are those that are near the meridian at the beginning of the month at 22^h local mean time. Allowance must be made for Summer Time if necessary. The fact that any star crosses the meridian 4^m earlier each night or 2^h earlier each month may be used, in conjunction with the lists given each month, to find what constellations are favourably placed at any moment. The table preceding the list of constellations may be extended indefinitely at the rate just quoted.

Times of MINIMA OF ALGOL are approximate times of the middle of the period of diminished light.

The Principal PHASES OF THE MOON are the G.M.T.'s when the difference between the longitude of the Moon and that of the Sun is 0°, 90°, 180° or 270°. The times of perigee and apogee are those when the Moon is nearest to, and farthest from, the Earth, respectively. The nodes or points of intersection of the Moon's orbit and the ecliptic make a complete retrograde circuit of the ecliptic in about 19 years. From a knowledge of the longitude of the ascending node and the inclination, whose value does not vary much from 5°, the path of the Moon among the stars may be plotted on a celestial globe or star atlas.

The MONTHLY NOTES are self-explanatory.

PAGE TWO OF EACH MONTH

The Sun's semi-diameter, in arc, is given once a month.

The right ascension given is that of the true Sun. The right ascension of the mean Sun is obtained by applying the equation of time, with the sign given, to the right ascension of the true Sun, or, more easily, by applying 12^h to the column Sidereal Time. The direction in which the equation of time has to be applied in different problems is a frequent source of confusion and error. Apparent Solar Time is equal to the Mean Solar Time plus the Equation of Time. For example at noon on Aug. 8 the Equation of Time is -5^m 39^s and thus at 12^h Mean Time on that day the Apparent Time is 12^h - 5^m 39^s = 11^h 54^m 21^s.

The Greenwich Sidereal Time at 0^h and the Transit of the First Point of Aries (which is really the mean time when the sidereal time is 0^h) are used for converting mean time to sidereal time and vice versa.

The G.M.T. of transit of the Sun at Greenwich may also be taken as the local mean time (L.M.T.) of transit in any longitude. It is independent of latitude. The G.M.T. of transit in any longitude is obtained by adding the longitude to the time given if west, and vice versa.

The legal importance of SUNRISE and SUNSET is that the Road Vehicles Lighting Regulations 1984 (S.I. 1984 No. 812) requires lights on vehicles to be used during the hours of darkness. This is defined as the period between half an hour after sunset and half an hour before sunrise, throughout the year. However, revised Lighting Regulations are expected to come into operation by the end of 1989. These will retain the requirement defined by the 1984 Regulations for the use of headlamps on vehicles, but it is proposed to make the use of front and rear position lamps on vehicles compulsory during the period between sunset and sunrise.

In all laws and regulations "sunset" refers to the local sunset, i.e. the time at which the Sun sets at the place in question. This common-sense interpretation has been upheld by legal tribunals. Thus the necessity for providing for different latitudes and longitudes, as already described, is evident.

The times of SUNRISE and SUNSET are those when the Sun's upper limb, as affected by refraction, is on the true horizon of an observer at sea-level. Assuming the mean refraction to be 34', and the Sun's semi-

diameter to be $16'$, the time given is that when the true zenith distance of the Sun's centre is $90^\circ + 34' + 16'$ or $90^\circ 50'$, or, in other words, when the depression of the Sun's centre below the true horizon is $50'$. The upper limb is then $34'$ below the true horizon, but is brought there by refraction. It is true, of course, that an observer on a ship might see the Sun for a minute or so longer, because of the dip of the horizon, while another viewing the sunset over hills or mountains would record an earlier time. Nevertheless, the moment when the true zenith distance of the Sun's centre is $90^\circ 50'$ is a precise time dependent only on the latitude and longitude of the place, and independent of its altitude above sea-level, the contour of its horizon, the vagaries of refraction or the small seasonal change in the Sun's semi-diameter; this moment is suitable in every way as a definition of sunset (or sunrise) for all statutory purposes. (For further information see footnote.)

It is well known that light reaches us before sunrise and also continues to reach us for some time after sunset. The interval between darkness and sunrise or sunset and darkness is called twilight. Astronomically speaking, twilight is considered to begin or end when the Sun's centre is $18'$ below the horizon, ■■ no light from the Sun can then reach the observer. As thus defined twilight may last several hours; in high latitudes at the summer solstice the depression of $18'$ is not reached, and twilight lasts from sunset to sunrise.

The need for some sub-division of twilight was met some years ago by dividing the gathering darkness into four steps.

- (1) *Sunrise or Sunset*, defined as above.
- (2) *Civil twilight*, which begins or ends when the Sun's centre is $6'$ below the horizon. This marks the time when operations requiring daylight may commence or must cease. In England it varies from about 30 to 60 minutes after sunset and the same interval before sunrise.
- "Lighting-up time" is a crude attempt to approximate to civil twilight over the British Isles.
- (3) *Nautical twilight*, which begins or ends when the Sun's centre is $12'$ below the horizon. This marks the time when it is, to all intent and purposes, completely dark.
- (4) *Astronomical twilight*, which begins or ends when the Sun's centre is $18'$ below the horizon. This marks theoretical perfect darkness. It is of little practical importance, especially if nautical twilight is tabulated.

To assist observers the durations of civil, nautical and astronomical twighlights are given at intervals of ten days. The beginning of ■ particular twilight is found by subtracting the duration from the time of sunrise, while the end is found by adding the duration

to the time of sunset. Thus the beginning of astronomical twilight in latitude 52° , on the Greenwich meridian, on March 11 is found ■ 06h 24m - 113m = 04h 31m and similarly the end of civil twilight as 17h 57m + 34m = 18h 31m.

The letters T.A.N. (twilight all night) are printed when twilight lasts all night.

Under the heading ASTRONOMICAL NOTES will be found notes describing the position and visibility of all the planets and also of other phenomena; these are intended to guide naked-eye observers, or those using small telescopes.

PAGE THREE OF EACH MONTH

The Moon moves so rapidly among the stars that its position is given only to the degree of accuracy that permits linear interpolation. The right ascension and declination are geocentric, i.e. for an imaginary observer at the centre of the Earth. To an observer on the surface of the Earth the position is always different, ■ the altitude is always less on account of parallax which may reach 1° .

The lunar terminator is the line separating the bright from the dark part of the Moon's disk. Apart from irregularities of the lunar surface, the terminator is elliptical, because it is a circle seen in projection. It becomes the full circle forming the limb, or edge, of the Moon at New and Full Moon. The selenographic longitude of the terminator is measured from the mean centre of the visible disk, which may differ from the visible centre by as much as 8° , because of libration.

Instead of the longitude of the terminator the Sun's selenographic colongitude is tabulated. It is numerically equal to the selenographic longitude of the morning terminator, measured eastward from the mean centre of the disk. Thus its value is approximately 270° at New Moon, 360° at First Quarter, 90° at Full Moon and 180° at Last Quarter.

The Position Angle of the Bright Limb is the position angle of the midpoint of the illuminated limb, measured eastward from the north point on the disk. The column PHASE shows the percentage of the area of the Moon's disk illuminated; this is also the illuminated percentage of the diameter at right angles to the line of cusps. The terminator is ■ semi-ellipse whose major axis is the line of cusps, and whose semi-minor axis is determined by the tabulated percentage; from New Moon to Full Moon the east limb is dark, and vice versa.

The times given ■ moonrise and moonset are those when the upper limb of the Moon is on the horizon of an observer at sea-level. The Sun's horizontal parallax is about $9''$, and is negligible when considering sunrise and sunset, but that of the Moon averages

SUNRISE, SUNSET and MOONRISE, MOONSET

The tables have been constructed for the meridian of Greenwich, and for latitudes 52° and 56° . They give Greenwich Mean Time (G.M.T.) throughout the year. To obtain the G.M.T. of the phenomenon as seen from any other latitude and longitude in the British Isles, first interpolate or extrapolate for latitude by the usual rules of proportion. To the time thus found the longitude (expressed in time) is to be *added* if west (as it usually is in Great Britain) or *subtracted* if east. If the longitude is expressed in degrees and minutes of arc, it must be converted to time at the rate of $1^\circ = 4^m$ and $15' = 1^m$.

A method of calculating rise and set times for other places in the world is given on pp. 70 and 71.

about 57'. Hence the computed time represents the moment when the true zenith distance of the Moon is 90° 50' (as for the Sun) minus the horizontal parallax. The time required for the Sun or Moon to rise or set is about four minutes (except in high latitudes). (For further information, see footnote on p. 65.)

The G.M.T. of transit of the Moon over the meridian of Greenwich is given: these times are independent of latitude, but must be corrected for longitude. For places in the British Isles it suffices to add the longitude if west, and vice versa. For more remote places a further correction is necessary because of the rapid movement of the Moon relative to the stars. The entire correction is conveniently determined by first finding the west longitude λ of the place. If the place is in west longitude, λ is the ordinary west longitude; if the place is in east longitude λ is the complement to 24^h (or 360°) of the longitude and will be greater than 12^h (or 180°). The correction then consists of two positive portions, namely λ and the fraction $\lambda/24$ (or $\lambda/360$) multiplied by the difference between consecutive transits. Thus for Sydney, N.S.W., the longitude is 10^h 05^m east, so $\lambda = 13^{\circ} 55'$ and the fraction $\lambda/24$ is 0.58. The transit on the local date 1990 September 27 is found as follows:

	d	h	m
G.M.T. of transit at Greenwich	Sept.	26	17 37
λ		13	55
$0.58 \times (18^{\text{h}} 27^{\text{m}} - 17^{\text{h}} 37^{\text{m}})$			29
<hr/>			
G.M.T. of transit at Sydney		27	08 01
Corr. to N.S.W. Standard Time			10 00
<hr/>			
Local standard time of transit		27	18 01

It is evident of course, that for any given place the quantities λ and the correction to local standard time may be combined permanently, being here 23^h 55^m.

Positions of Mercury are given for every third day, and those of Venus and Mars for every fifth day; they may be interpolated linearly. The column PHASE shows the illuminated percentage of the disk. In the case of the inner planets this approaches 100 at superior conjunction and 0 at inferior conjunction. When the phase is less than 50 the planet is crescent-shaped or horned; for greater phases it is gibbous. In

the case of the exterior planet Mars, the phase approaches 100 at conjunction and opposition, and is a minimum at the quadratures.

Since the planets cannot be seen when on the horizon, the actual times of rising and setting are not given; instead, the time when the planet has an apparent altitude of 5° has been tabulated. If the time of transit is between 00^h and 12^h the time refers to an altitude of 5° above the eastern horizon: if between 12^h and 24^h, to the western horizon. The phenomenon tabulated is the one that occurs between sunset and sunrise; unimportant exceptions to these rules may occur because changes are not made during a month, except in the case of Mercury. The times given may be interpolated for latitude and corrected for longitude as in the case of the Sun and Moon.

The G.M.T. at which the planet transits the Greenwich meridian is also given. The times of transit are to be corrected to local meridians in the usual way, as already described.

PAGE FOUR OF EACH MONTH

The G.M.T.'s of Sunrise and Sunset may be used not only for these phenomena, but also for lighting-up times, which, under the Road Vehicles Lighting Regulations, 1984, are from half an hour after sunset to half an hour before sunrise throughout the year. (See p. 64 for a fuller explanation and proposed changes.)

The particulars for the four outer planets resemble those for the planets on Page Three of each month, except that, under Uranus and Neptune, times when the planet is 10° high instead of 5° high are given; this is because of the inferior brightness of these planets. The polar diameter of Jupiter is about 3° less than the equatorial diameter, while that of Saturn is about 2° less. The diameters given for the rings of Saturn are those of the major axis (in the plane of the planet's equator) and the minor axis respectively. The former has a small seasonal change due to the slightly varying distance of the Earth from Saturn, but the latter varies from zero when the Earth passes through the ring plane every 15 years to its maximum opening half-way between these periods. The rings were open at their widest extent in 1988.

TIME

From the earliest ages, the natural division of time into recurring periods of day and night has provided the practical time scale for the everyday activities of mankind. Indeed, if any alternative means of time measurement is adopted, it must be capable of adjustment so as to remain in general agreement with the natural time scale defined by the diurnal rotation of the Earth on its axis. Ideally the rotation should be measured against a fixed frame of reference; in practice it must be measured against the background provided by the celestial bodies. If the Sun is chosen as the reference point, we obtain Apparent Solar Time, which is the time indicated by a sundial. It is not a uniform time, but is subject to variations which amount to as much as a quarter of an hour in each direction. Such wide variations cannot be tolerated in a practical time scale, and this has led to

the concept of Mean Solar Time in which all the days are exactly the same length and equal to the average length of the Apparent Solar Day.

The positions of the stars in the sky are specified in relation to a fictitious reference point in the sky known as the First Point of Aries (or the Vernal Equinox). It is therefore convenient to adopt this same reference point when considering the rotation of the Earth against the background of the stars. The time scale so obtained is known as Apparent Sidereal Time.

Greenwich Mean Time

The daily rotation of the Earth on its axis causes the Sun and the other heavenly bodies to appear to cross the sky from East to West. It is convenient to represent this relative motion as if the Sun really performed a daily circuit around a fixed Earth. Noon

In Apparent Solar Time may then be defined as the time at which the Sun transits across the observer's meridian. In Mean Solar Time, noon is similarly defined by the meridian transit of a fictitious Mean Sun moving uniformly in the sky with the same average speed as the true Sun. Mean Solar Time observed on the meridian of the transit circle telescope of the Old Royal Observatory at Greenwich is called Greenwich Mean Time (G.M.T.). The mean solar day is divided into 24 hours and, for astronomical and other scientific purposes, these are numbered 0 to 23, commencing at midnight. Civil time is usually reckoned in two periods of 12 hours, designated a.m. (*ante meridiem*, i.e. before noon) and p.m. (*post meridiem*, i.e. after noon).

Universal Time

Before 1925 January 1 G.M.T. was reckoned in 24 hours commencing at noon: since that date it has been reckoned from midnight. In view of the risk of confusion in the use of the designation G.M.T. before and after 1925, the International Astronomical Union recommended in 1928 that astronomers should employ the term Universal Time, U.T. (or Weltzeit, W.Z.) to denote G.M.T. measured from Greenwich Mean Midnight.

In precision work it is necessary to take account of small variations in Universal Time. These arise from small irregularities in the rotation of the Earth. Observed astronomical time is designated U.T.O. Observed time corrected for the effects of the motion of the poles (giving rise to a "wandering" in longitude) is designated U.T.1. There is also a seasonal fluctuation in the rate of rotation of the Earth arising from meteorological causes, often called the annual fluctuation. U.T.1 corrected for this effect is designated U.T.2 and provides a time scale free from short-period fluctuations. It is still subject to small secular and irregular changes.

Apparent Solar Time

As has been mentioned on page 66, the time shown by a sundial is called Apparent Solar Time. It differs from Mean Solar Time by an amount known as the Equation of Time, which is the total effect of two causes which make the length of the apparent solar day non-uniform. One cause of variation is that the orbit of the Earth is not a circle, but an ellipse, having the Sun at one focus. As a consequence, the angular speed of the Earth in its orbit is not constant; it is greatest at the beginning of January when the Earth is nearest the Sun. The other cause is due to the obliquity of the ecliptic; the plane of the equator (which is at right-angles to the axis of rotation of the Earth) does not coincide with the ecliptic (the plane defined by the apparent annual motion of the Sun around the celestial sphere) but is inclined to it at an angle of $23^\circ 26'$. As a result, the apparent solar day is shorter than average at the equinoxes and longer at the solstices. From the combined effects of the components due to obliquity and eccentricity, the equation of time reaches its maximum values in February (-14 mins.) and early November (+16 mins.). It has a zero value on four dates during the year, and it is only on these dates (approx. April 15, June 14, Sept. 1, and Dec. 25) that a sundial shows Mean Solar Time.

Sidereal Time

A sidereal day is the duration of a complete rotation of the Earth with reference to the First Point of Aries. The term sidereal (or "star") time is perhaps a little misleading since the time scale so defined is not exactly the same as that which would be defined by successive transits of a selected star, as there is a small progressive motion between the stars and the First Point of Aries due to the precession of the Earth's axis. This makes the length of the sidereal day shorter than the true period of rotation by 0.008 seconds. Superimposed on this steady precessional motion are small oscillations called nutation, giving rise to fluctuations in apparent sidereal time amounting to as much as 1.2 seconds. It is therefore customary to employ Mean Sidereal Time, from which these fluctuations have been removed. The conversion of G.M.T. to Greenwich sidereal time (G.S.T.) may be performed by adding the value of the G.S.T. at 0^{h} on the day in question (Page Two of each month) to the G.M.T. converted to sidereal time using the table on p. 72.

Example. To find the G.S.T. at August 8^d 02^h 41^m 11^s G.M.T.

	h m
G.S.T. at 0^{h}	21 04 59
G.M.T.	2 41 11
Acceleration for 2^{h}	20
" " 41 ^m 11 ^s	7

Sum = G.S.T. =

If the observer is not on the Greenwich meridian then his longitude, measured positively westwards from Greenwich, must be subtracted from the G.S.T. to obtain Local Sidereal Time (L.S.T.). Thus, in the above example, an observer 5^h east of Greenwich, or 19^h west, would find his L.S.T. = 4^h 46^m 37^s.

Ephemeris Time

In the study of the motions of the Sun, Moon and planets, observations taken over an extended period are used in the preparation of tables giving the apparent position of the body each day. A table of this sort is known as an ephemeris, and may be used in the comparison of current observations with tabulated positions. A detailed examination of the observations made over the past 300 years shows that the Sun, Moon and planets appear to depart from their predicted positions by amounts proportional to their mean motions. The only satisfactory explanation is that the time scale to which the observations were referred was not uniform as had been supposed. Since the time scale was based on the rotation of the Earth, it follows that this rotation is subject to irregularities. The fact that the discrepancies between the observed and ephemeris positions were proportional to the mean motions of the bodies made it possible to secure agreement by substituting a revised time scale and recomputing the ephemeris positions. The time scale which brings the ephemeris into agreement with the observations is known as Ephemeris Time (E.T.).

The new unit of time has been defined in terms of the apparent annual motion of the Sun. Thus the second is now defined in terms of the annual motion of the Earth in its orbit around the Sun

(1/31556925.9747 of the Tropical Year for 1900 January 0d 12^h E.T.) instead of in terms of the diurnal rotation of the Earth on its axis (1/86 400 of the Mean Solar Day). In many branches of scientific work other than astronomy there has been a demand for a unit of time that is invariable, and the second of Ephemeris time was adopted by the Comité International des Poids et Mesures in 1956. The length of the unit has been chosen to provide general agreement with U.T. throughout the 19th and 20th centuries. During 1990 the estimated difference E.T. – U.T. is 58 seconds. The precise determination of E.T. from astronomical observations is a lengthy process, as the accuracy with which a single observation of the Sun can be made is far less than that obtainable in, for instance, a comparison between clocks. It is therefore necessary to average the observations over an extended period. Largely on account of its faster motion, the position of the Moon may be observed with greater accuracy, and a close approximation to Ephemeris Time may be obtained by comparing observations of the moon with its ephemeris position. Even in this case, however, the requisite standard of accuracy can only be achieved by averaging over a number of years.

Atomic Time

The fundamental standards of time and frequency must be defined in terms of a periodic motion adequately uniform, enduring and susceptible of measurement. This has led in the past to the adoption of standards based on the observed motions in the Solar System. Recent progress has made it possible to consider the use of other natural standards, such as atomic or molecular oscillations. The oscillations so far employed are not in fact continuous periodic motions such as the revolution of the electrons in their orbits around the nuclei. The continuous oscillations are generated in an electrical circuit, the frequency of which is then compared or brought into coincidence with the frequency characteristic of the absorption or emission by the atoms or molecules when they change between two selected energy levels. At the National Physical Laboratory regular comparisons have been made since the middle of 1955 between quartz clocks of high stability and a frequency defined by atoms of caesium. The standard has proved of great value in the precise calibration of frequencies and time intervals: it has also been possible to build up a scale of "atomic time" by using continuously-running quartz clocks calibrated in terms of the caesium frequency standard.

Terrestrial Dynamical Time

A new time scale, known as Terrestrial Dynamical Time (T.D.T.) has recently been defined in terms of international atomic time in such a way that, for most purposes, it can be regarded as a continuation of atomic time.

Radio Time Signals

The establishment of a uniform time system by the assessment of the performance of standard clocks in terms of astronomical observations is the work of a national observatory, and standard time is then made generally available by means of radio time signals. In the United Kingdom, the Royal Greenwich Observatory controls the "6-pips" radio signals emitted by the British Broadcasting Corporation. The British

Telecom Speaking Clock is corrected to the National Physical Laboratory caesium beam atomic frequency standard at the British Telecom International Radio Station at Rugby.

For survey and scientific purposes, in which the highest accuracy is required, special signals are transmitted on behalf of the National Physical Laboratory from Rugby Radio Station. The signals consist of a standard frequency carrier of 60 kHz (MSF) which switches off for half a second to denote the passing of one minute and for a tenth of a second to denote the passing of one second. Also transmitted are two binary coded decimal (BCD) time codes giving time of day and calendar information. The service is continuous except for a maintenance period from 1000–1400 UTC on the first Tuesday of each month.

The Coordinated Universal Time (UTC) system standard frequency emissions and radio time signals are broadcast on MSF, and by other national transmitters, eg. by WWV and WWVH in the U.S.A. in conformity with the International Atomic Time Scale. The time intervals between pips correspond exactly to the seconds defined as follows: "The second is the duration of 9 192 631 770 periods of the radiation corresponding to the transition between the 2 hyperfine levels of the ground state of the caesium 133 atom."

As the rate of rotation of the Earth is variable the time signals are adjusted by the introduction of a leap second when necessary in order that UTC shall not depart from UT by more than 0·9. For convenience leap seconds are introduced when necessary, on the last second of a month, preferably on Dec. 31 and/or June 30. In the case of a positive leap second 23^h 59^m 60^s is followed one second later by 0^h 00^m 00^s of the first day of the month. In the case of a negative leap second (required if the Earth were to have a sudden change of rate and begin to gain relative to UTC) 23^h 59^m 58^s is followed one second later by 0^h 00^m 00^s of the first day of the month.

From 1972 Jan. 1 the six pips on the BBC have consisted of 5 short pips from second 55 to second 59 followed by one lengthened pip, the start of which indicates the exact minute.

STANDARD TIME

In the year 1880 it was enacted by statute that the word "time", when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian. Summer Time is the "legal" time during the period in which its use is ordained. Since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now almost throughout the world a Standard Time which differs from that of Greenwich by an integral number of hours, either fast or slow, is used.

The large territories of the United States and Canada are divided into zones approximately 7½° on either side of central meridians. The important ones are given below; there are in addition zones from 3 to 12 hours fast in the U.S.S.R.

Variations from the standard time of countries occurs during part of the year: they are decided annually and are usually referred to as Summer Time or Daylight Saving Time. Countries in which variations may occur are indicated with an asterisk.

Fast on Greenwich Time

In the Tonga Islands the time 13 h fast and in Chatham Is. 12 h 45 m fast on Greenwich is used, as the Date line is to the East of them.

12 hours fast

Fiji; Kiribati; Kusaie I.; Marshall Is.; Nauru; *New Zealand; Tuvalu; *USSR (Zone 10).

11½ hours fast

Kiribati (Banaba); Norfolk I.

11 hours fast

Kiribati (Phoenix Is.); Kuril Is.; New Caledonia; Ponape I.; Sakhalin; Solomon Is.; *USSR (Zone 9); *Vanuatu.

10 hours fast

Admiralty Is.; *Australian Capital Territory; Guam; Kiribati (Kiritimati I.); Mariana Is.; *New South Wales (except Broken Hill Area); Papua New Guinea; Queensland; *Tasmania; Truk Is.; *USSR (Zone 8); *Victoria; Yap Is.

9½ hours fast

*New South Wales (Broken Hill Area); Northern Territory (Aus); *South Australia.

9 hours fast

Irian Jaya; Japan; Korea (North and South); Mouluccas; Palau Is.; *USSR (Zone 7).

8 hours fast

Bali; Brunei; *China; Hong Kong; †Kalimantan (South and East); Macao; Malaysia; *Mongolia; Philippines; Singapore; Sulawesi; *Taiwan; Timor; *USSR (Zone 6); Western Australia.

7 hours fast

Christmas I. (Indian Ocean); Java; Kalimantan (West and Middle); Kampuchea; Laos; Sumatra; Thailand; *USSR (Zone 5); Vietnam.

6½ hours fast

Burma; Cocos Keeling Is.

6 hours fast

Bangladesh; Bhutan; *USSR (Zone 4).

5½ hours fast

Nepal.

5½ hours fast

India; Sri Lanka.

5 hours fast

Maldives; Pakistan; *USSR (Zone 3).

4½ hours fast

Afghanistan.

4 hours fast

Mauritius; Oman; Réunion; Seychelles; United Arab Emirates; *USSR (Zone 2).

3½ hours fast

Iran.

3 hours fast

Bahrain; Comoro Is.; Djibouti; Ethiopia; *Iraq; Kenya; Kuwait; Madagascar; Qatar; Saudi Arabia; Somalia; Tanzania; Uganda; *USSR (Zone 1); Yemen (North and South).

2 hours fast

Botswana; *Bulgaria; Burundi; *Crete; *Cyprus; *Egypt; *Finland; *Greece; *Israel; *Jordah; *Lebanon; Lesotho; Malawi; Mozambique; Namibia; *Romania; Rwanda; South Africa; Sudan; Swaziland; *Syria; *Turkey; Zaire (Haut-Zaire, Kasai, Kivu, Shaba); *Zambia; Zimbabwe.

1 hour fast

*Albania; Algeria; *Andorra; Angola; *Austria; *Belgium; Benin; Cameroon; Central African Repub-

lic; Chad; Congo; *Czechoslovakia; *Denmark; Equatorial Guinea; *France; Gabon; *Germany (East and West); *Gibraltar; *Greenland (Scoresby Sound); *Hungary; *Italy; *Libya; *Liechtenstein; *Luxembourg; *Malta; *Monaco; *Netherlands; Niger; Nigeria; *Norway; *Poland; *San Marino; *Spain; Svalbard; *Sweden; *Switzerland; *Tunisia; *Vatican City State; *Yugoslavia; Zaire (Kinshasa, Mbandaka).

Greenwich Time

SUNRISE AND SUNSET

The local mean time of sunrise or sunset (as defined on page 64) may be found by determining the appropriate hour angle from the table above and applying it to the time of transit given in the ephemeris for each month. The hour angle is negative for sunrise and positive for sunset. A small correction to the hour angle, which always has the effect of increasing it numerically, is necessary to allow for the Sun's semi-diameter (16') and for refraction (34'). This correction may be obtained from Table 2. The resulting local mean time may be converted into the standard time of the country by taking the difference between the longitude of the standard meridian of the country and that of the place, and adding it to the local mean time if the place is west of the standard meridian, and subtracting it if the place is east of the standard meridian.

Example.—Required the N.Z. Mean Time (12^h fast on G.M.T.) of sunset on May 24 at Auckland. The latitude is 36° 50' south (or minus) and the longitude 11° 39' east. Taking the declination — +20° 7, we find

	h m

MOONRISE AND MOONSET

It is possible to calculate the times of moonrise and moonset using Table 1 though the method is more complicated because the apparent motion of the Moon is much more rapid and also more variable than that of the Sun.

23	38	43	48	53	58	62	67
24	40	45	50	55	60	65	70

Notation

- ϕ = latitude of observer
 λ = longitude of observer (measured positively towards the west)
 T_{-1} = time of transit of Moon on previous day
 T_0 = time of transit of Moon on day in question
 T_1 = time of transit of Moon on following day
 δ_0 = approximate declination of Moon
 δ_R = declination of Moon at moonrise
 δ_S = declination of Moon at moonset
 h_0 = approximate hour angle of Moon
 h_R = hour angle of Moon at moonrise
 h_S = hour angle of Moon at moonset
 t_R = time of moonrise
 t_S = time of moonset

The parallax of the Moon, about 57', is near to the sum of the semi-diameter and refraction but has the opposite effect on these times. It is thus convenient to neglect all three quantities in the method outlined below.

Method

- With arguments ϕ, δ_0 enter Table 1 on p. 70 to determine h_0 where h_0 is negative for moonrise and positive for moonset.
- Form approximate times from
 $t_R = T_0 + \lambda + h_0$
 $t_S = T_0 + \lambda + h_0$
- Determine δ_R, δ_S for times t_R, t_S respectively.
- Re-enter Table 1 on p. 70 with—
 (a) arguments ϕ, δ_R to determine h_R
 (b) arguments ϕ, δ_S to determine h_S
- Form $t_R = T_0 + \lambda + h_R + AX$
 $t_S = T_0 + \lambda + h_S + AX$
 where $A = (\lambda + h)$
 $X = (T_0 - T_{-1})$ if $(\lambda + h)$ is negative
 and $X = (T_1 - T_0)$ if $(\lambda + h)$ is positive
 AX is the respondent in Table 3.

Example.—To find the times of moonrise and moonset at Vancouver ($\phi = +49^\circ, \lambda = +8^{\text{h}} 12^{\text{m}}$) on 1990 Jan. 22. The starting data (from p. 18) are

$$\begin{array}{ll} h & m \\ T_{-1} = & 7 \quad 34 \\ T_0 = & 8 \quad 24 \\ T_1 = & 9 \quad 17 \\ \delta = & -26^\circ \end{array}$$

- $h_0 = 3^{\text{h}} 43^{\text{m}}$
- Approximate values
 $t_R = 22^{\text{d}} 08^{\text{h}} 24^{\text{m}} + 8^{\text{h}} 12^{\text{m}} + (-3^{\text{h}} 43^{\text{m}})$
 $t_S = 22^{\text{d}} 12^{\text{h}} 53^{\text{m}}$
 $t_S = 22^{\text{d}} 08^{\text{h}} 24^{\text{m}} + 8^{\text{h}} 12^{\text{m}} + (+3^{\text{h}} 43^{\text{m}})$
 $t_S = 22^{\text{d}} 20^{\text{h}} 19^{\text{m}}$
- $\delta_R = -26^\circ 9$
- $\delta_S = -27^\circ 3$
- $h_R = -3^{\text{h}} 36^{\text{m}}$
 $h_S = +3^{\text{h}} 33^{\text{m}}$
- $t_R = 22^{\text{d}} 08^{\text{h}} 24^{\text{m}} + 8^{\text{h}} 12^{\text{m}} + (-3^{\text{h}} 36^{\text{m}}) + 10^{\text{m}}$
 $t_R = 22^{\text{d}} 13^{\text{h}} 10^{\text{m}}$
 $t_S = 22^{\text{d}} 08^{\text{h}} 24^{\text{m}} + 8^{\text{h}} 12^{\text{m}} + (+3^{\text{h}} 33^{\text{m}}) + 27^{\text{m}}$
 $t_S = 22^{\text{d}} 20^{\text{h}} 36^{\text{m}}$

To get the L.M.T. of the phenomenon the longitude is subtracted from the G.M.T. thus

$$\text{Moonrise} = 22^{\text{d}} 13^{\text{h}} 10^{\text{m}} - 8^{\text{h}} 12^{\text{m}} = 22^{\text{d}} 04^{\text{h}} 58^{\text{m}}$$

$$\text{Moonset} = 22^{\text{d}} 20^{\text{h}} 36^{\text{m}} - 8^{\text{h}} 12^{\text{m}} = 22^{\text{d}} 12^{\text{h}} 24^{\text{m}}$$

10	1	39	22	3	37	57	49	9	10	1	38	22	3	36	57	59	10
11	1	48	23	3	47	60	00	10	11	1	48	23	3	46	60	00	10
12	1	58	24	3	57				12	1	58	24	3	56			

The length of a sidereal day in mean time is 23^h 56^m 04^s.09. Hence 1^h M.T. = 1^h + 9^m.86 S.T. and 1^h S.T. = 1^h - 9^m.83 M.T.

To convert an interval of mean time to the corresponding interval of sidereal time, enter the acceleration table with the given mean time (taking the hours and the minutes and seconds separately) and add the acceleration obtained to the given mean time. To convert an interval of sidereal time to the corresponding interval of mean time, take out the retardation for the given sidereal time and subtract.

The columns for the minutes and seconds of the argument are in the form known as Critical Tables. To use these tables, find in the appropriate left-hand column the two entries between which the given number of minutes and seconds lies; the quantity in the right-hand column between these two entries is

the required acceleration or retardation. Thus the acceleration for 11^m26^s (which lies between the entries 9^m07^s and 15^m13^s) is 2^s. If the given number of minutes and seconds is a tabular entry, the required acceleration or retardation is the entry in the right-hand column above the given tabular entry; e.g. the retardation for 45^m46^s is 7^s.

Example.—Convert 14^h27^m35^s from S.T. to M.T.

	h	m	s
Given S.T.	14	27	35
Retardation for 14 ^h		2	18
Retardation for 27 ^m 35 ^s			5

Corresponding M.T. 14 25 12

For further explanation, see p. 67.

The refraction table is also in the form of a critical table.

THE SUMMER TIME ACTS

In 1916 an Act ordained that during a defined period of that year the legal time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time. The *Summer Time Acts*, 1922 to 1925, defined the period during which Summer Time was to be in force, stabilizing practice until the war.

During the Second World War the duration of Summer Time was extended and in the years 1941–45 and in 1947, Double Summer Time (2 hrs. in advance of Greenwich Mean Time) was in force. After the war, Summer Time was extended in each year from 1948–1952 and 1961–1964 by Order in Council.

Central European Time, during which clocks were kept one hour ahead of Greenwich Mean Time throughout the year, was in force between Oct. 27, 1968 and Oct. 31, 1971.

The most recent legislation is the Summer Time Act, 1972, which enacted that "the period of summer time for the purposes of this Act is the period beginning at two o'clock, Greenwich mean time, in the morning of the day after the third Saturday in

March or, if that day is Easter Day, the day after the second Saturday in March, and ending at two o'clock, Greenwich mean time, in the morning of the day after the fourth Saturday in October."

The duration of Summer Time can be varied by Order in Council and in recent years alterations have been made to bring the operation of Summer Time in Britain closer to similar provisions in other countries of the European Community. Subject to parliamentary approval of the Summer Time Order 1989, the duration of Summer Time in 1990 will be from March 25 to October 28. As in recent years, the hour of changeover will be 01^h Greenwich Mean Time.

The duration of Summer Time during the last few years is given in the following table.

1978 Mar. 19—Oct. 29	1984 Mar. 25—Oct. 28
1979 Mar. 18—Oct. 28	1985 Mar. 31—Oct. 27
1980 Mar. 16—Oct. 26	1986 Mar. 30—Oct. 26
1981 Mar. 29—Oct. 25	1987 Mar. 29—Oct. 25
1982 Mar. 28—Oct. 24	1988 Mar. 27—Oct. 23
1983 Mar. 27—Oct. 23	1989 Mar. 26—Oct. 29

Jupiter's satellites transit across the disk from east to west, and pass behind the disk from west to east. The shadows that they cast also transit across the disk. With the exception at times of Satellite IV, the satellites also pass through the shadow of the planet, i.e. they are eclipsed. Just before opposition the satellite disappears in the shadow to the west of the planet, and reappears from occultation on the east limb. Immediately after opposition the satellite is occulted at the west limb, and reappears from eclipse

to the east of the planet. At times approximately two to four months before and after opposition, both phases of eclipses of Satellite III may be seen. When Satellite IV is eclipsed, both phases may be seen.

The list of phenomena gives most of the eclipses and shadow transits visible in the British Isles under favourable conditions.

Ec. = Eclipse

R. = Reappearance

Sh. = Shadow transit

I. = Ingress

D. = Disappearance

E. = Egress

CELESTIAL PHENOMENA FOR OBSERVATION IN 1990

ECLIPSES

There will be four eclipses during 1990, two of the Sun and two of the Moon. (Penumbral eclipses are not mentioned in this section as they are difficult to observe).

1. An annular eclipse of the Sun on January 26 is visible ■■■ partial eclipse from South Island, New Zealand, the eastern part of the South Pacific Ocean, the Southern Ocean, Antarctica except the extreme east, South America except the north west, and the western part of the South Atlantic Ocean. The eclipse begins at 17^h 13^m and ends at 21^h 48^m. The annular phase begins in Antarctica at 18^h 55^m and ends at 20^h 06^m in the South Atlantic Ocean. The maximum duration of the annular phase is 2^m 03^s.

From South Island, New Zealand, only ■ small partial eclipse is visible, beginning around the time of sunrise.

2. A total eclipse of the Moon on February 9 is visible from north-west Alaska, the arctic regions, North Pacific Ocean, Australasia, Asia, the Indian Ocean, part of Antarctica, Africa, Europe including the British Isles, the north-east Atlantic Ocean, Iceland and Greenland. The eclipse begins at 17^h 30^m and ends at 20^h 54^m. Totality lasts from 18^h 51^m to 19^h 33^m.

3. A total eclipse of the Sun on July 22. The path of totality begins on the southern coast of Finland, passes along the north coast of Asia and across the extreme north-eastern part of Asia and ends in the Pacific Ocean between the Hawaiian Islands and North America. The partial phase is visible from Scandinavia except the south west, north of Greenland, north of Asia, the Arctic Regions, north-western part of North America, the Hawaiian Islands and the North Pacific Ocean. The eclipse begins at 00^h 40^m and ends at 05^h 24^m, the total phase begins at 01^h 53^m and ends at 04^h 11^m. The maximum duration of totality is 2^m 33^s.

4. A partial eclipse of the Moon on August 6 is visible from south-west Alaska, the Pacific Ocean except the extreme east, Antarctica. Australasia, the south and eastern parts of Asia and the eastern part of the Indian Ocean. The eclipse begins at 12^h 43^m and ends at 15^h 39^m. The time of maximum eclipse is 14^h 11^m when 0.68 of the Moon's diameter is obscured.

LUNAR OCCULTATIONS

No planets or bright stars are occulted by the Moon in 1990.

Observations of the times of these occultations are made by both amateur and professional astronomers. Such observations are later analysed to yield accurate positions of the Moon: this is one method of determining the difference between ephemeris time and universal time.

Many of the observations made by amateurs are obtained with the use of a stop-watch which is compared with a time signal immediately after the observation. Thus an accuracy of about one-fifth of ■

second is obtainable, though the observer's personal equation may amount to one-third or one-half of ■ second.

The list on the opposite page includes most of the occultations visible under favourable conditions in the British Isles. No occultation is included unless the star is at least 10° above the horizon and the Sun sufficiently far below the horizon to permit the star to be seen with the naked eye or in ■ small telescope. The altitude limit is reduced from 10° to 2° for stars and planets brighter than magnitude 2.0 and such occultations are also predicted in daylight.

The column Phase shows whether a disappearance (D) or reappearance (R) is to be observed. The column headed "El. of Moon" gives the elongation of the Moon from the Sun, in degrees. The elongation increases from 0° at New Moon to 180° at Full Moon and on to 360° (or 0°) at New Moon again. Times and position angles (*P*), reckoned from the north point in the direction north, east, south, west, are given for Greenwich (Lat. 51° 30', Long. 0°) and Edinburgh (Lat. 56° 00', Long. 3° 12' west).

The coefficients *a* and *b* are the variations in the G.M.T. for each degree of longitude (positive to the west) and latitude (positive to the north) respectively: they enable approximate times (to within about 1^m generally) to be found for any point in the British Isles. If the point of observation is $\Delta\lambda$ degrees west and $\Delta\phi$ degrees north, the approximate time is found by adding $a.\Delta\lambda + b.\Delta\phi$ to the given G.M.T.

As an illustration the reappearance of z.c. 543 on February 3 at Liverpool will be found from both Greenwich and Edinburgh.

	Greenwich	Edinburgh
Longitude	0.0	+3.2
Long. of Liverpool	+3.0	+3.0
$\Delta\lambda$	+3.0	-0.2
Latitude	+51.5	+56.0
Lat. of Liverpool	+53.4	+53.4
$\Delta\phi$	+1.9	-2.6
	h ■■■	h m
G.M.T.	22 14.7	22 02.6
$a.\Delta\lambda$	-1.8	+0.2
$b.\Delta\phi$	-4.8	+4.7
	22 08.1	22 07.5

If the occultation is given for one station but not the other, the reason for the suppression is given by the following code.

N = star not occulted.

A = star's altitude less than 10° (2° for bright stars and planets).

S = Sun not sufficiently below the horizon.

G = occultation is of very short duration.

It will be noticed that in some cases the coefficients *a* and *b* are not given: this is because the occultation is so short that prediction for other places by means of these coefficients would not be reliable.

MEAN PLACES OF STARS, 1990-5

NAME	MAG.	R.A.	DEC.	SPECTRUM	
■ Andromedæ Alpheratz	2-1	h m 0 07-9	° +29 02	A0p	The positions of heavenly bodies on the celestial sphere are defined by two co-ordinates, right ascension and declination, which are analogous to longitude and latitude on the surface of the Earth. If we
β Cassiopeiae Caph	2-3	0 08-7	+59 06	F5	imagine the plane of the terrestrial equator extended indefinitely, it will cut the celestial sphere in a great circle known as the celestial equator. Similarly the plane of the Earth's orbit, when extended, cuts in the great circle called the ecliptic. The two intersections of these circles are
γ Pegasi Algenib	2-8	0 12-7	+15 08	B2	known as the First Point of Aries and the First Point of Libra. If from any star a perpendicular be drawn to the celestial equator, the length
α Phœnícis	2-4	0 25-8	-42 21	K0	of this perpendicular is the star's declination. The arc, measured eastwards along the equator from the First Point of Aries to the foot of this perpendicular, is the right ascension. An alternative definition
α Cassiopeiae Schedar	2-2	0 40-0	+56 29	K0	of right ascension is that it is the angle at the celestial pole (where the Earth's axis, if prolonged, would meet the sphere) between the great circles to the First Point of Aries and to the star.
β Ceti Diphda	2-0	0 43-1	-18 02	K0	The plane of the Earth's equator has ■ slow movement, so that our reference system for right ascension and declination is not fixed. The consequent alteration in these quantities from year to year is called precession. In right ascension it is an increase of about 3° ■ year for equatorial stars, and larger or smaller changes in either direction for stars near the poles, depending on the right ascension of the star. In declination it varies between +20° and -20° according to the right ascension of the star.
γ Cassiopeiae*	Var.	0 56-1	+60 40	B0p	A star or other body crosses the meridian when the sidereal time is equal to its right ascension. The altitude is then a maximum, and may be deduced by remembering that the altitude of the elevated pole is numerically equal to the latitude, while that of the equator at its intersection with the meridian is equal to the complement of the latitude.

THE EARTH

The shape of the Earth is that of an oblate spheroid or solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles are circles. The length of the equatorial axis is about 12,756 kilometres, and that of the polar axis is 12,714 kilometres. The mean density of the Earth is 5.5 times that of water, although that of the surface layer is less. The Earth and Moon revolve about their common centre of gravity in a lunar month; this centre in turn revolves round the Sun in a plane known as the ecliptic, that passes through the Sun's centre. The Earth's equator is

inclined to this plane at an angle of $23\frac{1}{2}^\circ$. This tilt is the cause of the seasons. In mid-latitudes, and when the Sun is high above the Equator, not only does the high noon altitude make the days longer, but the Sun's rays fall more directly on the Earth's surface; these effects combine to produce summer. In equatorial regions the noon altitude is large throughout the year, and there is little variation in the length of the day. In higher latitudes the noon altitude is lower, and the days in summer are appreciably longer than those in winter.

The average velocity of the Earth in its orbit is 30 kilometres a second. It makes a complete rotation on its axis in about $23^\text{h } 56^\text{m}$ of mean time, which is the

sideral day. Because of its annual revolution round the Sun, the rotation with respect to the Sun, or the solar day, is more than this by about four minutes

(see p. 66). The extremity of the axis of rotation, or the North Pole of the Earth, is not rigidly fixed, but wanders over an area roughly 20 metres in diameter.

TERRESTRIAL MAGNETISM

A magnetic compass points along the horizontal component of a magnetic line of force. These directions converge on the "magnetic dip-poles", the places where a freely suspended magnetized needle would become vertical. Not only do the positions of these poles change with time, but their exact location is ill-defined, particularly so in the case of the north dip-pole where the lines of force, on the north side of it, instead of converging radially, tend to bunch into a channel. Although it is therefore unrealistic to attempt to specify the locations of the dip-poles exactly, the present adopted positions are 77° 0 N., 102° 4 W. and 65° 3 S., 139° 2 E. The two magnetic dipoles are thus not antipodal, the line joining them passing the centre of the Earth at a distance of about 1,200 kilometres. The distances of the magnetic dipoles from the north and south geographical poles are about 1,400 and 2,700 kilometres respectively.

There is also a "magnetic equator", at all points of which the vertical component of the Earth's magnetic field is zero and a magnetized needle remains horizontal. This line runs between 2° and 10° north of the geographical equator in the eastern hemisphere, turns sharply south off the West African coast, and crosses South America through Brazil, Bolivia and Peru; it recrosses the geographical equator in mid-Pacific.

Reference has already been made to secular changes in the Earth's field. The following table indicates the changes in magnetic declination (or variation of the compass). Similar, though much smaller, changes have occurred in "dip" or magnetic inclination. Secular changes differ throughout the world. Although the London observations strongly suggest a cycle with a period of several hundred years, an exact repetition is unlikely.

London		Greenwich	
1580	11° 15' E.	1850	22° 24' W.
1622	5 56 E.	1900	16 29 W.
1665	1 22 W.	1925	13 10 W.
1730	13 00 W.	1950	9 07 W.
1773	21 09 W.	1975	6 39 W.

In order that up-to-date information on the variation of the compass may be available, many governments publish magnetic charts on which there are lines (isogonic lines) passing through all places at which specified values of declination will be found at the date of the chart.

In the British Isles, isogonic lines now run approximately north-east to south-west. Though there are considerable local deviations due to geological causes, a rough value of magnetic declination may be obtained by assuming that at 50° N. on the meridian of Greenwich, the value in 1990 is 4° 16' west and allowing an increase of 10' for each degree of latitude northwards and one of 24' for each degree of longitude westwards. For example, at 53° N., 5° W., declination will be about 4° 16' + 30' + 120', i.e. 6° 46'

west. The average annual change at the present time is about 9' decrease.

The number of magnetic observatories is about 200—widely scattered over the globe. There are three in Great Britain run by the British Geological Survey: at Hartland, North Devon, at Eskdalemuir in Dumfriesshire, Scotland, and at Lerwick, Shetland Islands. Some recent annual mean values of the magnetic elements for Hartland are given below.

The normal worldwide terrestrial magnetic field corresponds approximately to that of a very strong small bar magnet near the centre of the Earth but with appreciable smooth spatial departures. The origin and slow secular change of the normal field are not yet fully understood but are generally ascribed to electric currents associated with fluid motions in the Earth's core. Superimposed on the normal field are local and regional anomalies whose magnitudes may in places exceed that of the normal field; these are due to the influence of mineral deposits in the Earth's crust. A small proportion of the field is of external origin, mostly associated with electric currents in the ionosphere. The configuration of the external field and the ionization of the atmosphere depend on the incident particle and radiation flux. There are, therefore, short-term and non-periodic as well as diurnal, 27-day, seasonal and 11-year periodic changes in the magnetic field, dependent upon the position of the Sun and the degree of solar activity.

Year	Declination West	Dip or Inclination	Horizontal Force	Vertical Force

Magnetic Storms

Occasionally, sometimes with great suddenness, the Earth's magnetic field is subject for several hours to marked disturbance. In extreme cases, departures in field intensity of as much as one tenth the normal value are experienced. In many instances, such disturbances are accompanied by widespread displays of aurorae, marked changes in the incidence of cosmic rays, an increase in the reception of "noise" from the Sun at radio frequencies together with rapid changes in the ionosphere and induced electric currents within the Earth which adversely affect radio and telegraphic communications. The disturbances are generally ascribed to changes in the stream of neutral and ionized particles which emanates from the Sun and through which the Earth is continuously passing. Some of these changes are associated with visible

eruptions on the Sun, usually in the region of sun-spots. There is a marked tendency for disturbances to recur after intervals of about 27 days, the apparent

period of rotation of the Sun on its axis, which is consistent with the sources being located on particular areas of the Sun.

ARTIFICIAL SATELLITES

Orbits

To consider the orbit of an artificial satellite it is best to imagine that one is looking at the Earth from a distant point in space. The Earth would then be seen to be rotating about its axis inside the orbit described by the rapidly revolving satellite. The inclination of a satellite orbit to the Earth's equator (which generally remains almost constant throughout the satellite's lifetime) gives at once the maximum range of latitudes over which the satellite passes. Thus a satellite whose orbit has an inclination of 53° will pass overhead all latitudes between S. 53° and N. 53°, but would never be seen in the zenith of any place nearer the poles than these latitudes. If we consider a particular place on the earth, whose latitude is less than the inclination of the satellite's orbit then the Earth's rotation carries this place first under the northbound part of the orbit and then under the southbound position of the orbit, these two occurrences being always less than 12 hours apart for satellites moving in direct orbits (i.e. to the east). (For satellites in retrograde orbits the words "northbound" and "southbound" should be interchanged in the preceding statement.) As the value of the latitude of the observer increases and approaches the value of the inclination of the orbit, so this interval gets shorter until (when the latitude is equal to the inclination) only one overhead passage occurs each day.

Observation of satellites

The regression of the orbit around the Earth causes alternate periods of visibility and invisibility, though this is of little concern to the radio or radar observer. To the visual observer the following cycle of events normally occurs (though the cycle may start in any position): invisibility, morning observations before dawn, invisibility, evening observations after dusk, invisibility, morning observations before dawn, and so on. With reasonably high satellites and for observers in high latitudes around the summer solstice the evening observations follow the morning observations without interruption as sunlight passing over the polar regions can still illuminate

satellites which are passing over temperate latitudes at local midnight. At the moment all satellites rely on sunlight to make them visible though a satellite with a flashing light has been suggested for a future launching. The observer must be in darkness or twilight in order to make any useful observations and the durations of twilight and the sunrise, sunset times given on Page Two of each month will be a useful guide.

Some of the satellites are visible to the naked eye and much interest has been aroused by the spectacle of a bright satellite disappearing into the Earth's shadow. The event is even more fascinating telescopically as the disappearance occurs gradually as the satellite traverses the Earth's penumbral shadow, and during the last few seconds before the eclipse is complete the satellite may change colour (under suitable atmospheric conditions) from yellow to red. This is because the last rays of sunlight are refracted through the denser layers of our atmosphere before striking the satellite.

Some satellites rotate about one or more axes so that a periodic variation in brightness is observed. This was particularly noticeable in several of the U.S.S.R. satellites.

Satellite research has provided some interesting results. Among them may be mentioned a revised value of the Earth's oblateness, 1/298.2, and the discovery of the Van Allen radiation belts.

Launchings

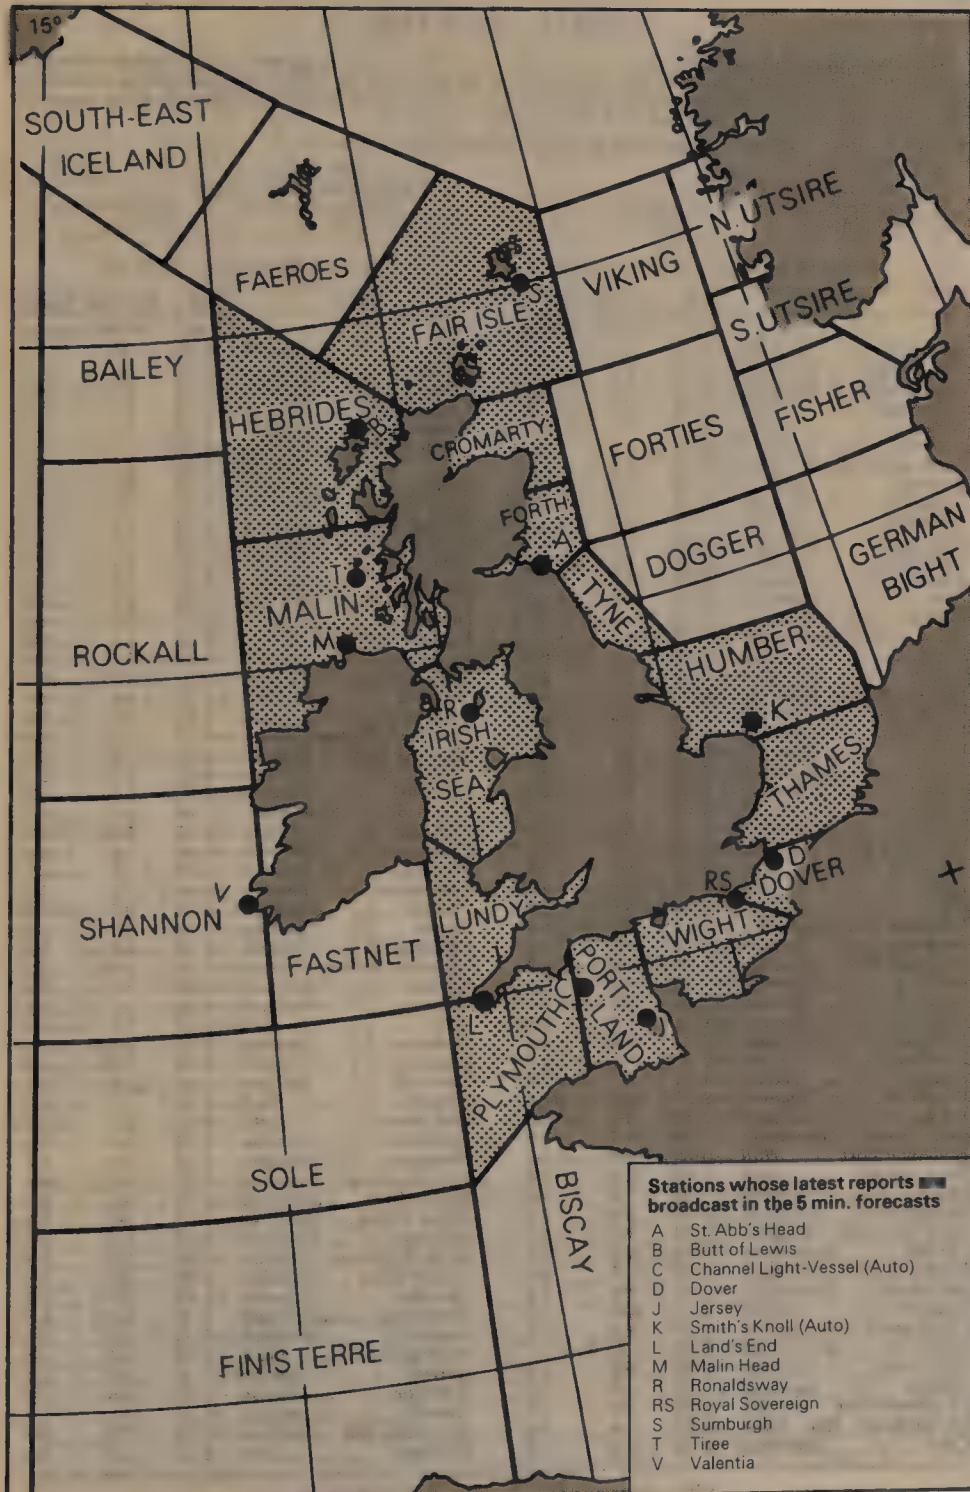

Apart from their names, e.g. Cosmos 6 Rocket, the satellites are also classified according to their date of launch. Thus 1961 α refers to the first satellite launching of 1961. A number following the Greek letter indicated the relative brightness of the satellites put in orbit. From the beginning of 1963 the Greek letters were replaced by numbers and the numbers by roman letters e.g. 1963-01A. For all satellites successfully injected into orbit the table gives the designation and names of the main objects (in the order A, B, C ... etc.), the launch date and some initial orbital data. These are the inclination to the equator (i), the nodal period of revolution (P), the eccentricity, e , and the perigee height.

Artificial Satellites Launched in 1987-88

TIDAL CONSTANTS

The time of high water at the undermentioned Ports and Places may be approximately found by taking the appropriate Time of High Water at the Standard Port (as shown on pp. 86, 87, etc.) and adding thereto the quantities annexed. The columns headed "Springs" and "Neaps" show the height of the tide above datum for Mean High Water Springs and Mean High Water Neaps respectively.

EXAMPLE.—Required times of high water at Stranraer on January 1, 1990:—

(a) *Morning Tide.*

Appropriate time of high
water at Greenock 0257 hrs. (Jan. 1)
Tidal difference -0020 hrs.

H.W at Stranraer ... 0237 hrs.

(b) *Afternoon Tide.*

Appropriate time of high
water at Greenock 1509 hrs. (Jan 1).
Tidal difference -0020 hrs.

H.W at Stranraer ... 1449 hrs.

WEATHER IN THE UNITED KINGDOM, 1988-89

(1988) July.—Rainfall totals were well above normal in most areas and more than three times the normal amount was received at Carlisle (Cumbria). In the extreme south-east of England amounts were near or slightly below normal in places. It was the wettest July over England since 1936, the wettest over Wales since 1939, and the wettest over Scotland since 1869. Aspatria (Cumbria) with 30 days of rain equalled Stornoway's record of the greatest number of days with rain in month. Rain, heavy at times, or showers, sometimes accompanied by thunder, occurred somewhere in the United Kingdom on almost every day. Most of the month's major events were disrupted, including Wimbledon which was virtually washed out on the 3rd, the Royal Agricultural Show at Stoneleigh (Warks.) where the ring was waterlogged on the 4th, and the Open Golf Championship. Thunderstorms occurred widely between the 1st and 8th mainly over England, and were again widespread over southern England on the 26th. On the 25th 62 mm (2·44 in) of rain fell at Onich (Highland). Northern areas had a stormy day on the 25th when Scotland had its strongest July winds for 50 years, bringing down trees which blocked many roads in central and southern Scotland. Gusts of 68 knots (78 mph) were recorded at Invergordon (Highland) and Leuchars (Fife) and 67 knots (77 mph) at Lossiemouth (Grampian). Many roads were blocked by falling trees in Northern Ireland, Ballymena (Co. Antrim), Lisnaskea (Co. Fermanagh) and Belfast being affected. In northern England the cross-Pennine road was closed to high-sided vehicles. There was widespread fog over hills and coasts in many western and northern areas on the 22nd and 23rd. Monthly mean temperatures were below normal nearly everywhere but were above normal in northern and eastern Scotland. Sheffield (S. Yorkshire) with 21·5°C (70·7°F) had its lowest July maximum temperature since 1965. At Hampstead (Greater London) 21·4°C (70·5°F) was the lowest maximum since 1909. The highest temperature recorded during the month was 24·7°C (76·5°F) at Margate (Kent) on the 21st and 23rd, while the lowest was -0·3°C (31·5°F) at Alwen (Clwyd) on the 6th. Sunshine totals were generally below normal except in some places in eastern Scotland and the Western Isles where they were near or just above normal. Sheffield had its lowest July sunshine total since 1980 and it was the third dullest July at North Wyke (Devon) since 1959. The highest daily total was 15·3 hours at Guernsey on the 11th: the highest monthly totals were 235·5 hours at Herne Bay (Kent) and 247·9 hours at Guernsey.

August.—Rainfall totals were above average in most of Scotland, Wales, Northern Ireland and parts of northwest and southwest England, but below average elsewhere. Rain fell on the 1st around the Firth of Forth and on north-eastern coasts of England with thunder and hail at times. Rain and thunder occurred on the 2nd in central and eastern parts of England. On the 9th and 10th there was rain in western Scotland followed by rain generally on the 11th when 76 mm (3·0 in) fell at Dingwall (Highland). On the 14th and 18th most western and northern areas were wet and 54 mm (2·1 in) of rain fell at Cassley (Highland) on the 14th and 58 mm (2·3 in) fell at Holme Moss (W. Yorkshire) on the 18th. There was further heavy rain over Cumbria on the 29th and in many places on the 30th and 31st. At Trassey Slievenaman (Co. Down) 111 mm (3·7 in) of rain fell on the 31st while 59 mm (2·3 in) fell at Princetown (Devon). Winds were strong over Scotland on the 15th and 27th but the highest gust was 65 knots (74·9 mph) recorded at Gwennap Head (Cornwall) on the

31st. Monthly mean temperatures were below normal nearly everywhere in the United Kingdom. Many areas were hot between the 5th and 10th, especially in the east. Cheltenham (Glos.) recorded a temperature of 30·2°C (86·4°F) on the 7th. Norfolk had a hot day on the 14th when temperature reached 26·0°C (78·8°F) at Cromer. It was very warm in central and eastern England on the 17th when the temperature reached 26·9°C (80·4°F) at Heathrow. On the 18th south-east England and East Anglia became hot early, when Margate (Kent) recorded a temperature of 27·7°C (81·9°F) but cooled down during the afternoon. The lowest temperature recorded during the month was 0·0°C (32·0°F) at Crannich (Highland) on the 22nd. Sunshine totals were generally above normal in England and Wales east of a line from Rhyl (Clwyd) to Southampton (Hampshire). Totals were below normal in other areas. The 6th was the sunniest day over England and Wales when many places had 14 hours of sunshine. The highest daily total was 14·9 hours at Morecambe (Lancashire) on the 7th and the highest monthly total was 243·6 hours at Folkestone (Kent).

September.—Rainfall totals were below normal nearly everywhere with less than half the normal amount in many parts of England and Wales. By contrast the Cape Wrath (Highland) area had one and a half times the normal amount. On the 1st rain spread across north-east Scotland and there were thunderstorms in eastern England from Northumberland to Sussex. It was a wet day in Northern Ireland. On the 2nd there were further thunderstorms in south and south-east England and more rain in Scotland. Gales occurred on the 1st and 2nd especially in south-west England where many places recorded gusts of more than 50 knots (57·6 mph) on the 1st. The 4th was a wet day in Northern Ireland and further rain fell in Scotland between the 5th and 7th. Overnight fog was persistent in the south west on the 6th and there was early morning fog in parts of England and Wales on the 7th and 10th. There were further widespread thunderstorms in the north and west on the 7th and 8th. On the morning of the 8th dust was deposited at several places in Wales, at Low Etherly (Co. Durham) and at Coventry (Warks.). Rain affected all areas on the 11th and showers continued on the 13th and 14th. Thunderstorms occurred in southern England on the 13th. Most places had wet periods after the 22nd with heavy rain at times and 73 mm (2·87 in) fell at Moel Cynnedd (Powys) on the 25th. The first snow of the season fell on the Grampians on the 28th and hail was widespread over some western areas on the 28th and over Scotland on the 29th. A mini tornado was reported in Cumbria on the 28th. Monthly mean temperatures were generally near normal over the United Kingdom as a whole but rather warmer in the east of the Highland Region of Scotland. The highest temperature recorded during the month was 26·9°C (80·4°F) at Northolt (Greater London) on the 7th and the lowest was -3·8°C (25·2°F) at Carnwath (Strathclyde) on the 30th. Sunshine totals were near normal everywhere but rather sunnier in the northeast. The highest daily total was 12·1 hours at Baltasound (Shetland) on the 3rd and the highest monthly total was 180 hours at Porthcawl (Mid Glamorgan).

October.—Rainfall totals were above average in most areas with parts of Tayside and the Grampian Region receiving about twice the normal amount. On the 1st a gust of 61 knots (70·2 mph) was recorded at Butt of Lewis (Western Isles). On the 5th 53 mm (2·1 in) of rain fell at Princetown (Devon) and Bastreet (Cornwall). On the 6th there were gusts of

67 knots (77.2 mph) at Gwennap Head (Cornwall), and 65 knots (74.9 mph) at Aberporth (Dyfed) and at Rhoose (South Glamorgan). Thunder occurred in many parts of England on the 6th and there was widespread hail on the 6th and 7th. A gust of 80 knots (92.1 mph) was recorded at Lowther Hill (Dumfries and Galloway) on the 7th. Thunder was again widespread on the 12th. On the 14th fog was widespread in the Midlands and eastern England, and on the 15th and 16th fog was dense in northern areas. On the 17th dust was deposited at Keyworth (Notts.) and further dust was deposited in south-east England on the 18th. Thunderstorms occurred over a wide area of England and Wales on the 18th and 19th, and lightning cut power supplies at Stoke-on-Trent on the 19th. Heavy rain on the 19th flooded parts of Liverpool and the Wirral to 2 metres (6.6 ft) deep in places causing much damage in the area. At Crosby 82 mm (3.2 in) of rain fell in the day. On the 20th and 21st there were areas of dense fog particularly in the Midlands and south-east England. Fog was widespread in eastern England on the 25th and very heavy rain fell on the Mourne Mountain area of Northern Ireland. At Trassey 97 mm (3.8 in) fell and 81 mm (3.2 in) fell at Brynsford (Co. Down). Many places across Northern Ireland had more than 20 mm (0.8 in) and there were floods, blocked roads and structural damage. On the 28th snow fell over Orkney, Shetland and the Scottish mountains to give 10 cm (3.9 in) at Cairngorm (Grampian) on the 29th. Monthly mean temperatures were generally below normal over Scotland, Northern Ireland and parts of northern England but near or slightly above elsewhere. On the 7th the temperature fell to -7°C (19.4°F) at Carnwath (Strathclyde) and the night of the 30th was the coldest in October at Sheffield for 33 years. The highest temperature of the month was 21.5°C (70.7°F) at East Malling and at Wye (Kent) on the 18th and at Faversham (Kent) on the 19th. The lowest temperature was -8.5°C (16.7°F) at St. Harmon (Powys) on the 31st. Sunshine totals were below normal north-east of a line from the Isle of Lewis to the Thames Estuary but normal or slightly above elsewhere. The highest daily total was 10.6 hours at Eastbourne and Hastings (E. Sussex) and the highest monthly total was 137.9 hours at Hayling Island (Hampshire).

November.—Rainfall totals were below normal in most areas but they were above normal in parts of north-east England. Some parts of south-west and central-southern England had less than a quarter of the normal amount. It was the driest November since 1956 over Wales and the driest in England since 1978. It was the second driest since 1957 in Northern Ireland. Only widespread heavy rain on the 29th prevented the month being exceptionally dry over England and Wales. Winds reached gale force over south-west England on the 3rd, 6th and 7th. The 11th was a stormy day in the north when a gust of 61 knots (70.2 mph) was recorded at Lerwick and at Fair Isle (Shetland). In south-west England winds approached gale force on the 11th leaving many roads blocked by fallen trees and telegraph poles. Also on the 11th there were thunderstorms in the far north of Scotland with hail in places. On the 14th fog was widespread, persisting all day in places. On the 20th snow over central Scotland moved south to affect most of northern and eastern England as far south as east Kent. Snow lay over much of England north of the Thames with from 9 to 12 cms (3.5 to 4.7 in) in some hilly places. Much of Wales and south-west England had rain. There were wintry showers on the 21st and 22nd and parts of east Kent had 15 cm (5.9 in) of level snow: 10 cm (3.9 in) was measured in parts of Yorkshire. On the 22nd fog formed overnight and persisted all day on the 23rd in the Manchester area.

On the 29th many places in Wales and south-west England had more than 30 mm (1.2 in) of rain. Nantmor (Gwynedd) had 75 mm (2.9 in) and Princetown (Devon) had 57 mm (2.2 in). Monthly mean temperatures were generally above normal in Scotland but below normal elsewhere. The 10th was a very mild day with temperatures 5°C (9°F) above normal from southern England to north-east Scotland but by contrast the 21st with ice, sleet and rain made driving conditions hazardous as temperatures fell to -3°C (26.6°F) in England and to -5°C (23.0°F) in Scotland. The highest temperature of the month was 18.0°C (64.4°F) at Guernsey on the 9th and the lowest was -11.6°C (11.1°F) at Carnwath (Strathclyde) on the 22nd. Sunshine totals were above normal nearly everywhere except for some coastal parts of north-west Scotland. Glasgow had its sunniest November since 1947 and Edinburgh had its sunniest since 1939. The highest daily total was 9.3 hours at Westonbirt Arboretum (Glos.) on the 4th and the highest monthly total was 130.8 hours at Jersey. The highest mainland total ■■■ 116.6 hours at St. Mawgan (Cornwall).

December.—Rainfall totals were well below normal everywhere except western Scotland and a few places in north Wales and north-west England. The east coast of Scotland was very dry. In general most of the rainfall fell in the first five days of the month and hail was frequent in western areas during the first week. Much of the Thames Valley and the area south of it received less than 4 mm (0.2 in) of rain after the 4th. In particular Benson (Oxfordshire) had only 2.2 mm (0.09 in) and Heathrow (Greater London) only 2.8 mm (0.1 in). Exeter (Devon) had only 3.3 mm (0.13 in) after the 5th. Hampstead (Greater London) had its driest December since 1933, Lyonshall (Hereford and Worcester) its driest since 1947, and Northwood (Greater London) its driest since 1959. Snow was lying on the Scottish peaks for most of the month. On the 4th gusts of more than 50 knots (57.6 mph) with torrential rain swept through south-west England, uprooting trees and telegraph poles and blocking many roads. By dawn on the 14th fog was dense and slow to clear in parts of East Anglia. On the 21st the wind gusted to 74 knots (85.2 mph) at Butt of Lewis (Western Isles) and on the 22nd ■ gust of 84 knots (96.7 mph) was recorded at Lerwick (Shetland). Hail was frequent in northern Scotland on the 22nd and 23rd and there was heavy rain over northern Wales on the 24th. At Sumburgh (Shetland) ■ gust of 75 knots (86.4 mph) was recorded on the 24th. Monthly mean temperatures were well above normal everywhere and were 3.7°C (6.7°F) above normal in the area of Lyncham (Wiltshire). Hampstead and Northwood (Greater London) and Lyonshall (Hereford and Worcester) had their mildest December since 1974. At Sheffield (S. Yorkshire) the mean temperature equalled that of December 1934, both being mildest since 1882. Many places had a frost-free December. The highest temperature recorded during the month was 16.5°C (61.7°F) at Castledawson Hillhead (Co. Londonderry) on the 28th and the lowest was -5.7°C (21.7°F) at Grantown-on-Spey (Highland) on the 3rd. Sunshine totals were below normal nearly everywhere except eastern areas of England and Scotland and parts of the west Highlands where they were above normal. Bradford (W. Yorkshire) had its sunniest December on record with 47 hours—the previous record of 46 hours was in 1926. The highest daily total was 7.3 hours at Folkestone (Kent) on the 12th and the highest monthly total was 71 hours at Boulmer (Northumberland).

Year (1988).—The main features of the weather of 1988 were the gales over England and Wales in

January and February and over Scotland and Northern Ireland in July, and the very wet weather of July with its disruption of most of the month's events including Wimbledon, the Royal Agricultural Show and the Open Golf Championship. January was mild, windy and generally very wet. It was the wettest in England and Wales since 1948. Heavy rain on the 2nd caused a landslip between Bideford and Torrington (Devon) and gales uprooted trees and caused power failures in north Devon. On the 4th a tanker was blown from its moorings at Milford Haven (Dyfed) and glass panels were blown out of the roof of Cardiff Central Market injuring three women. On the 5th lightning demolished the steeple of a Swansea chapel and on the 6th the Severn Bridge was closed for only the third time in its history. On the 21st and 22nd 18 cm (7.1 in) of snow fell in central England and on the 29th torrential rain caused severe flooding from Gloucestershire to Kent. February started with widespread gales on the 1st and 2nd. On the 9th trees were uprooted and traffic disrupted in Devon and Cornwall and there was much structural damage in north-west England including to the Town Hall roof at Bury (Greater Manchester). A bus was blown over at Chesterfield (Derbyshire) and rail services were delayed between London and Glasgow. On the 9th and 10th heavy snow drifts blocked roads across the Pennines and there was heavy snow in north Devon. On the 28th there was 30 cm (11.8 in) of snow in the Grampians, blocking some roads. February was very sunny in places and Bablake (Warks.) had its highest total since 1895. March was an unsettled month with sleet and snow in many places. It was the wettest March in Northern Ireland since 1903. On the 24th there were widespread thunderstorms from southern Scotland to East Anglia and lightning damaged buildings at Donnington (Lincs.). April was a changeable month, mild and rather dull with generally average rainfall. It was the fifth month in succession with temperatures above normal nearly everywhere. Arbroath (Grampian) had nearly three times its normal rainfall. May was warm and sunny everywhere except on the east coast. It was the sixth successive month with above normal temperatures. On the 1st a climber was killed by lightning near Grasmere (Cumbria) and hail at Moel-y-Crio (Clwyd) caused much damage to fruit trees and hedges. There was widespread flooding in the Thames Valley and north-west London during thunderstorms on the 8th. June was a generally dry month in most places with above average sunshine in northern areas. Over England and Wales it was the driest June since 1976 and over Scotland it was the driest this century. At Abbotscinch (Strathclyde) it was the driest June since 1888, together with 1921 and 1926 which had the same total. July was a particularly wet month in many areas and rain or showers, sometimes with thunder, occurred somewhere in the United Kingdom on almost every day. It was the wettest July in England since 1936, in Wales since 1939 and in Scotland since 1869. Northern areas had storms on the 25th when Scotland had its strongest winds for 50 years bringing down trees and blocking many roads. Roads were also blocked in Northern Ireland and roads across the Pennines were closed. August was generally unsettled month and rain fell on almost every day in some western areas of England. There were large falls in Snowdonia and Cumbria on the 29th and in many places on the 30th. Norfolk, Suffolk and parts of the Thames Estuary stayed mostly dry. September was another mainly unsettled month but rainfall was below normal nearly everywhere. The first snow of the season fell in Scotland on the 29th. Dust was deposited in Durham, Wales and Warwickshire during the month. October was generally wet and rather dull. There was widespread hail on the 6th and 7th. On the 18th and 19th thunderstorms were

widespread over England and Wales. Lightning cut power supplies at Stoke-on-Trent, and parts of Liverpool and the Wirral were flooded to a depth of 2 metres (6.6 ft) in places. Crosby had 82 mm (3.2 in) of rain on the 19th. On the 20th and 21st there were areas of dense fog in the Midlands and south-east England and on the 25th heavy rain in Northern Ireland caused flooding, blocked roads and structural damage. November was generally very dry and sunny in most parts of England and Wales. It was one of the driest on record in many places. Scotland and Northern Ireland were also sunny but had outbreaks of heavy rain in places. The 11th was a stormy day in the far north, and in south-west England gales left many roads blocked by fallen trees and telegraph poles. On the 20th snow covered much of England north of the Thames. Glasgow had its sunniest November since 1947 and Edinburgh had its sunniest since 1939. Fog formed frequently overnight during the month. December was very mild with below average rainfall in most areas but windy with gales at times. Gusts of over 50 knots (57.6 mph) with torrential rain swept through south-west England on the 4th leaving roads blocked by fallen trees. After the 4th much of the Thames Valley and the area just south of it received less than 4 mm (0.16 in) of rain for the rest of the month. The highest temperature recorded during the year was 30.2°C (86.4°F) at Cheltenham (Glos.) on August 7th and the lowest was -11.6°C (11.1°F) at Carnwath (Strathclyde) on November 22nd. The highest sunshine totals for the year were 1,869.2 hours at St. Helier (Jersey) and 1,850.7 hours at Bognor Regis (W. Sussex).

(1989) January.—Rainfall totals were below normal over England and Wales and eastern Scotland. By contrast western Scotland had one of the wettest January's on record, with up to three times the normal amount of rainfall over the western Highlands. In Glen Shiel one gauge recorded a total of 855 mm (33.7 in) while at Inchnear Aberdeen only 6 mm (0.24 in) were recorded. At Cape Wrath (Highland) it was the wettest January since 1941, while at Craibstone (Grampian) it was the driest since 1925. Bradford (W. Yorkshire) had its driest January since 1953 and Ashover (Derbyshire) its driest since 1966. The three months November to January inclusive were the driest since 1879 over England and Wales with a general total of 136 mm (5.4 in) being only 50 per cent of normal. The incidence of snow or sleet falling was well below normal everywhere. There were gales in the north on the 3rd. The 11th was a wet day over much of Scotland with falls of 57 mm (2.2 in) at Balquhidder (Central) and 52 mm (2.1 in) at Livingstone (Lothian). The 13th was a wet day practically everywhere and 57 mm (2.2 in) of rain fell at Dalwhinnie (Highland). A gust of 76 knots (87.5 mph) was recorded at Stornoway (Western Isles) on the 13th and 75 knots (86.4 mph) was recorded at Butt of Lewis on the 14th. During the 14th and 15th a total of 110 mm (4.7 in) of rain fell in the Spey catchment, causing the river to flood, and on the 14th six places between Loch Quoich and Invergarry recorded more than 100 mm (3.9 in), the greatest amount being 156.5 mm (6.2 in) at Achangart (Highland). On the 14th and 15th 122 mm (4.8 in) fell at Killin (Central). A gust of 74 knots (85.2 mph) was recorded at Lerwick (Shetland) on the 15th. There were further gales in the north on the 17th. On the 18th and 20th overnight fog, widespread at times, developed in southern areas. Gusts of 73 knots (84.1 mph) were recorded at Fair Isle (Shetland) and Kirkwall (Orkney) on the 29th and there were further fog patches in southern areas. Monthly mean temperatures were well above normal everywhere ranging from 2°C (3.6°F) above in southern England to 5°C (9.0°F) above in northern Scotland. Glasgow

had its mildest January since 1868 and Braemar (Grampian) its mildest since 1856. Paisley (Strathclyde) had its warmest January since 1889 and Northern Ireland had its warmest since 1932. The highest temperature of the month was 15.5°C (59.9°F) at Torrisdale (Highland) on the 27th, and the lowest was -6.5°C (20.3°F) at Butser (Hampshire) on the 11th and Grendon Underwood (Buckinghamshire) on the 19th. Sunshine totals were above normal everywhere except in Northern Ireland and northern and western Scotland. Wick (Highland) had its sunniest January since 1946 and Bradford (W. Yorkshire) had its sunniest on record. The highest daily total was 8.9 hours at Dunkeswell (Devon) on the 29th and the highest monthly total was 93 hours at Eastbourne (E. Sussex).

February.—Rainfall totals were above normal nearly everywhere west of a line from Banff (Grampian) to Beachy Head (East Sussex) but below elsewhere. Rainfall was four and a half times the average near Fort Augustus (Highland) but less than half the average in parts of Lincolnshire. Over England and Wales the period from November to February was the second driest this century. On the 4th and 5th rainfall was prolonged and very heavy in the western Highlands causing flooding and landslides. Bridges, roads, houses and farmland were affected over a wide area and the railway bridge over the Ness at Inverness was swept away on the 7th. At Fort William 83.7 mm (3.3 in) fell on the 5th and 131.7 mm (5.2 in) fell on the 6th. At Kinlochewe 170 mm (6.7 in) of rain fell on the 5th. There were severe gales in northern areas on the 13th with gusts of 92 knots (105.9 mph) at Butt of Lewis (Western Isles), 93 knots (107.1 mph) at Benbecula (Western Isles) and 100 knots (115.2) at Fair Isle (Shetland). At Fraserburgh (Grampian) the wind increased from 15 knots (17.3 mph) to 60 knots (69.1 mph) in 1½ hours and a gust of 123 knots (141.7 mph) was a new record for a low-level station. Traffic was disrupted and trees brought down as far south as Leicestershire and north Wales, with buses and lorries being blown over. In Dunfermline (Fife) nine people were injured when the roof of a hospital ward was blown off. On the 15th and 16th many northern areas had snow and sleet and 9 cm (3.5 in) of snow lay in the Grampians. Southern areas had snow and sleet on the 17th. On the 19th Scotland and northern England had snow, continuing in Scotland on the 20th. There was snow on the 24th, considerable across parts of Wales, the Peak District and the southern Pennines. Winds were strong in south-west England on the 25th when a gust of 81 knots (93.3 mph) was recorded at Gwennap Head (Cornwall). Snow fell in many places on the 26th and there were drifts 2 metres (6.6 ft) deep in parts of the Cotswolds. Stow-on-the-Wold and Chipping Norton were cut off for a time. On the 25th the pressure fell to below 950 millibars over southern England, the lowest pressure there since 1870. Monthly mean temperatures were above normal everywhere. Ashover (Derbyshire) had its warmest February on record. The highest temperature of the month was 15.9°C (60.6°F) at East Bergholt (Suffolk) on the 6th and the lowest was -10.6°C (12.9°F) at Carnwath (Strathclyde) on the 27th. Sunshine totals were above average nearly everywhere except the western side of Scotland. Bradford (W. Yorkshire) had its sunniest February on record. The highest daily total was 9.9 hours at Long Sutton (Hampshire) on the 23rd and the highest monthly total was 128 hours at Culterty (Grampian).

March.—Rainfall totals were above normal in most parts of the United Kingdom but some eastern coastal areas of Scotland and England were rather dry. Newcastle-upon-Tyne had less than 30 per cent

of the normal amount. In spite of the rainfall over England being above average for March, the period November to March was the fifth driest since 1910. It was the driest November to March over England and Wales since 1975-76. On the 5th a gust of 60 knots (69.1 mph) was recorded at Aberporth (Dyfed) and on the 8th 65 mm (2.56 in) of rain fell at Nantmor (Gwynedd) with a further 51 mm (2.01 in) on the 9th. On the 14th there were severe gales in the coastal areas and a gust of 76 knots (87.5 mph) was recorded at Berry Head (Devon). On the 16th there were snow and sleet showers over England and Wales and on the 17th there were snow showers over Shetland. On the 18th rain spread to all areas with snow in the north. On the 21st dust was deposited at Keyworth (Notts.) and on the 23rd 59 mm (2.32 in) of rain fell at Holme Moss (W. Yorkshire). A gust of 68 knots (78.3 mph) was recorded at Benbecula (Western Isles). On the 26th there were overnight fog patches in south-east England and on the 31st dust was deposited at Chagford (Devon). Monthly mean temperatures were generally above normal. Much of East Anglia and south east England had a very warm day on the 6th which was one of the warmest early March days of this century. The 26th was a very warm day over England and Wales and the temperature reached 19.3°C (66.7°F) at Eashampstead (Berkshire) on the 28th. The highest temperature of the month was 19.9°C (67.8°F) at East Hoathly (E. Sussex) on the 28th and at the London Weather Centre on the 31st. The lowest temperature was -8.2°C (17.2°F) at Leadhills (Strathclyde) on the 17th. Sunshine totals were generally above average in Scotland and northern England but below in southern areas. The highest daily total was 11.1 hours at Glasgow (Strathclyde) on the 17th and at Wyton (Cambridgeshire) on the 30th. The highest monthly total was 144 hours at Aberdeen (Grampian).

April.—Rainfall totals were above normal in most places in England, Wales and Northern Ireland but below normal in Scotland. On the 1st 57 mm (2.2 in) of rain fell at Trassey Slievenaman (Co. Down). Wintry showers affected eastern England and eastern Scotland on the 3rd and 4th, becoming widespread with rain, sleet and snow over much of England, north Wales and southern Scotland. Blizzard conditions existed over higher ground on the 5th. Sleet and snow fell for much of the day on the 5th with 3 to 6 cm (1.2 to 2.4 in) in southern England. Holme Moss (W. Yorkshire) had a depth of 40 cm (15.7 in). On the 7th a golfer was struck by lightning and badly burned at Southampton. The 11th was a particularly stormy day over south-west England and south Wales. A mean wind of 49 knots (56.4 mph) at Milford Haven (Dyfed) equalled the previous highest speed for April and a new record gust of 84 knots (96.7 mph) was recorded. Aberporth recorded a gust of 78 knots (89.8 mph), the highest for 50 years in that area. The strong winds brought chaos to roads and ships in the Irish Sea, blew down trees and telegraph poles and caused much structural damage throughout Wales. At Milford Haven slates were blown from the roofs of many buildings causing roads to be closed to traffic and pedestrians. Thousands of homes in Devon, Cornwall and south-west and central Wales were without power when falling trees brought down power lines. On the 13th Halstead (Essex) had a violent thunderstorm with heavy rain and hail causing local flooding. Hail lay to a depth of 5 cm (2.0 in) for a while. Snow fell in some places on the 22nd and 13 cm (5.1 in) lay at Knockan Nature Reserve near Ullapool (Highland) on the 24th. There was sleet and snow overnight on the 24th-25th with 10 cm (3.9 in) lying at Nottingham on the 25th. Monthly mean temperatures were below normal nearly everywhere except at Lerwick (Shetland)

which had ■ mean slightly above normal. The 1st was warm in most southern and western areas when 17.6°C (63.7°F) was recorded at Little Butser (Hampshire), 17.4°C (63.3°F) at Valley (Gwynedd) and 17.0°C (62.6°F) at Poolewe (Highland). The highest temperature of the month was 18.0°C (64.4°F) at Kew (Greater London) and the lowest was -7.6°C (18.3°F) at Eskdalemuir (Dumfries and Galloway) on the 24th. Sunshine totals were below normal nearly everywhere except for parts of central southern England, south-west England, and southern and western Wales where they were slightly above. The highest daily total was 16.3 hours at Inverness (Highland) on the 1st and the highest monthly total was 211 hours at The Lizard (Cornwall).

May.—Rainfall totals were well below normal except in parts of Scotland. Some areas of eastern and southern England were particularly dry. Central London had its driest May for about 300 years and over England and Wales it was the driest since 1896 and fifth driest since 1727. Areas close to the Thames Estuary had less than 1 mm (0.04 in) of rain in the whole month. Central London had 0.9 mm (0.035 in) and Manston and Ulcombe (Kent) both had only 0.4 mm (0.16 in). Worthing (W. Sussex) had its driest May since 1902 and Colchester (Essex) had its driest since 1896. On the 4th extensive dust was reported at Winterbourne (West Midlands) and on the 9th ■ dust devil was seen at Hurst Green (Surrey). The night of the 9th-10th was cold with ground frost as far south as the Midlands. Northern and western areas had rain on the 11th with snow on the Scottish mountains. There were thunderstorms down the east coast from Yorkshire to Norfolk. The 19th brought thunderstorms to northern England and north Wales, and a flash flood caused extensive damage in the Halifax area of West Yorkshire. Red sand was deposited at Winterbourne (West Midlands) on the 23rd. Many places had thunderstorms on the 23rd and 24th, with very heavy rain and flooding in several areas. On the 24th lightning set fire to homes, villages were flooded and thousands of houses plunged into darkness ■ storms hit the Thames Valley. A further storm area was from Derby to Grantham and intense electrical activity was reported at Keyworth (Notts.) with heavy rain and local flooding. At South Farnborough (Hampshire) 50 mm (1.2 in) of rain fell in three hours. About 95 per cent of the month's rainfall fell during the storms of the 24th. Sleet was reported over Orkney and Shetland on the 29th, when the north and west were cool. Other areas enjoyed ■ warm, sunny Bank Holiday. Monthly mean temperatures were above normal in all areas. A mean temperature of 14.4°C (57.9°F) at Hampstead (Greater London) was the highest for May since 1909. On the 21st the temperature rose to 27.4°C (81.3°F) at Kinlochewe (Highland) and at Cape Wrath (Highland) 24.4°C (75.9°F) was the highest May temperature since 1940. On the 24th Wyton (Cambridgeshire) recorded 28.4°C (83.1°F), the highest May temperature there since records began in 1954. The highest temperature of the month was 29.4°C (84.9°F) at

Heathrow (Greater London) on the 23rd and the lowest ■ -2.6°C (27.3°F) at Tummel Bridge (Tayside) on the 10th. Sunshine totals were mostly well above normal with some places having record totals. Most places south of ■ line from south Devon to north Norfolk had in excess of 300 hours in the month; the last time such ■ large area had so much sunshine in May ■ in 1909. Oxford with 301 hours had its highest total since 1879 and at Newtown Linford (Leics.) 263 hours was the highest total ever recorded there for any month. The highest daily total was 15.9 hours at Lerwick (Shetland) on the 21st and 22nd, and the highest monthly total was 335 hours at Folkestone (Kent).

June.—Rainfall totals were below normal in the south-western third of England and Wales but above normal elsewhere, with the Liverpool area being particularly wet. Most areas had scattered showers on the 1st when central and southern England had prolonged and heavy rain locally. Showers occurred in many areas on the 2nd and 3rd. On the 5th and 6th thundery showers became widespread and prolonged in some areas, notably in a belt from Merseyside to south-east England. Gillingham (Kent) had ■ layer of hail several centimetres deep on the 6th. Thunderstorms were again widespread in areas away from the extreme north and extreme south on the 8th. On the 13th there were heavy thunderstorms over northern England and north-west Wales, with scattered rain in other western areas. There were isolated heavy showers on the 14th. On the 21st there were showers on the east coast and overnight on the 21st-22nd there were thunderstorms in parts of East Anglia and Kent. On the 26th rain spread into north-western areas and crossed all areas on the 27th, bringing to an end a dry spell which had lasted 18 days in some places. Rainfall was particularly heavy and prolonged over north Wales and northern England. The Liverpool area had in excess of 40 mm (1.6 in). Many places had further rain on the 27th with thunderstorms in eastern England. Rain crossed Scotland on the 28th, to clear southern England on the 29th. Again rainfall was heavy in several areas. On the 30th yet more rain fell in ■ belt from north Wales and Lancashire to Humberside, Lincolnshire and Norfolk. The heaviest rain was again in the Liverpool area and 53 mm (2.09 in) fell at Crosby (Merseyside). Monthly mean temperatures were mostly above average except in Scotland, Northumberland and Cumbria where they were near, or a little below average. On the 19th the temperature reached 30°C (86°F) at Fort Augustus (Highland) and on the 20th it was a hot day almost everywhere with temperatures of more than 30°C (86°F) at several places. A temperature of 30.5°C (86.9°F) was recorded at both Finningley (S. Yorkshire) and Kew (Greater London). The lowest temperature of the month was -4.0°C (24.8°F) at Kinbrace (Highland). Sunshine totals were above normal everywhere in the United Kingdom. The highest monthly totals were 323.7 hours at St. Helier (Jersey) and 308.4 hours at Eastbourne (East Sussex).

AVERAGE AND GENERAL VALUES, 1987–1989 (June)

TEMPERATURE, RAINFALL AND WIND SPEED RECORDS

WORLD: The maximum air temperature recorded is 57·8°C. (136°F.) at San Louis, Mexico on August 11, 1933; the minimum air temperature recorded is -89·2°C. (-128·56°F.) at Vostok, Antarctica on July 21, 1983. The greatest rainfall recorded in one day is 1,870 mm. (73·62 in.) at Cilaos, Isle de Réunion on March 16, 1952; the greatest rainfall in one calendar month is 9,300 mm. (366·14 in.) at Cherrapunji, Assam in July 1861, the greatest annual total being 22,990 mm. (905·12 in.) also at Cherrapunji in 1861. The highest gust recorded was 201 knots (231 mph) at Mount Washington Observatory, New Hampshire, U.S.A. on April 12, 1934.

UNITED KINGDOM: The maximum air temperature recorded is 38·1°C. (100·5°F.) at Tonbridge, Kent on July 22, 1868; the minimum air temperature recorded is -27·2°C. (-17°F.) at Braemar (Grampian) on February 11, 1895 and 10th January 1982. The greatest rainfall recorded in one day is 280 mm. (11 in.) at Martinstown, Dorset on July 18, 1955. The greatest annual total is 6,528 mm. (257 in.) at Sprinkling Tarn, Cumbria in 1954. The highest gust recorded was 150 knots (173 mph) at Cairngorm (Highland) on March 20, 1986. The highest low-level (below 200 m. (656 ft.)) gust was 123 knots (141·7 mph) at Fraserburgh (Grampian) on February 13, 1989. The highest mean hourly speed was 92 knots (106 mph) at Great Dun Fell (Cumbria) in December 1974. The highest low-level mean hourly speed was 72 knots (83 mph) at Shoreham-by-Sea (Sussex) on October 16, 1987.

WIND FORCE MEASURES

The Beaufort Scale of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of the numbers 0–17, each representing a certain strength or velocity of wind at 10 m. (33 ft.) above ground in the open.

Scale No.	Wind Force	M.p.h.	Knots	Scale No.	Wind Force	M.p.h.	Knots
0	Calm	1	1	■	Strong gale	47–54	41–47
1	Light air	1–3	1–3	10	Whole gale	55–63	48–55
2	Slight breeze	4–7	4–6	11	Storm	64–72	56–63
3	Gentle breeze	8–12	7–10	12	Hurricane	73–82	64–71
4	Moderate breeze	13–18	11–16	13	—	83–92	72–80
5	Fresh breeze	19–24	17–21	14	—	93–103	81–89
6	Strong breeze	25–31	22–27	15	—	104–114	90–99
7	High wind	32–38	28–33	16	—	115–125	100–108
8	Gale	39–46	34–40	17	—	126–136	109–118

**TEMPERATURE, RAINFALL AND SUNSHINE
IN THE UNITED KINGDOM**

The following table gives mean air temperature (°C), total monthly rainfall (mm) and mean daily bright sunshine (hrs) at a representative selection of climatological reporting stations in the United Kingdom during the year July 1988 to June 1989 and the calendar year 1988. The heights (in metres) of the reporting stations above mean sea level are also given.

Station	Ht. in mtrs.	1988											
		July			August			September			October		
		Temp. °C	Rain mm	Sun hrs									
Aberdeen (Dyce)	65	13.9	84	5.4	13.8	74	4.7	12.1	60	5.3	8.9	151	2.4

CHRONOLOGICAL NOTES

GEOLOGICAL TIME

The earth is thought to have come into existence approximately 4,600 million years ago, but for nearly half this time, the ARCHEAN era, it was uninhabited; life is generally believed to have emerged in the succeeding PROTEROZOIC era. The Archean and the Proterozoic eras are often together referred to as the PRECAMBRIAN. Although primitive forms of life e.g. algae and bacteria, existed during the Proterozoic era, it is not until the strata of Palaeozoic rocks is reached that abundant fossilized remains appear, initially of small shellfish, followed by plants, primitive fishes and, in the Devonian period (c.400 million B.C.), land-living plants and amphibia.

Since the Precambrian, there have been three great geological eras:

PALAEZOIC ("ancient life") c.570-c.250 million B.C.

- (i) **Cambrian.** Mainly sandstones, slate and shales; limestones in Scotland. Shelled fossils and invertebrates e.g. trilobites and brachiopods appear.
- (ii) **Ordovician.** Mainly shales and mudstones e.g. in N. Wales; limestones in Scotland.
- (iii) **Silurian.** Shales, mudstones and some limestones, found mostly in Wales and southern Scotland.
- (iv) **Devonian.** Old red sandstone, shale, limestone and slate, e.g. in S. Wales and the West Country. "The age of fishes"—proliferation of fish fossils. First traces of land-living life.
- (v) **Carboniferous.** Coal-bearing rocks, millstone grit, limestone and shale.
- (vi) **Permian.** Marls, sandstones and clays, named after the area of Russia where these strata are widespread. First large-scale appearance of reptile fossils.

There were two great phases of mountain building in the Palaeozoic area: the *Caledonian*, characterized in Britain by N.E.-S.W. lines of hills and valleys; and the later *Hercynian*, widespread in W. Germany and adjacent areas, and in Britain exemplified in E.-W. lines of hills and valleys.

The end of the Palaeozoic was marked by the extensive glaciations of the Permian period in the southern continents and the decline of amphibians; it was succeeded by an era of warm conditions.

MESOZOIC ("middle forms of life") c.250-c.65 million B.C.

- (i) **Triassic.** Mostly sandstone, e.g. in the W. Midlands.
- (ii) **Jurassic.** Mainly limestones and clays, typically displayed in the Jura Mts. and in England in a N.E.-S.W. belt from Lincolnshire and the Wash to the Severn and the Dorset coast.
- (iii) **Cretaceous.** Mainly chalk, clay and sands, e.g. in Kent and Sussex.

Giant reptiles were dominant during the Mesozoic, but it was at this time that marsupial mammals first appeared, well *Archaeopteryx lithographica*, the earliest known species of bird. Coniferous trees and flowering plants also developed during the era and, with the birds and the mammals, were the main species to survive into the Caenozoic (or Cenozoic) era. The giant reptiles became extinct.

CAENOZOIC ("recent life") from c.65 million B.C.

- (i) **Eocene.** The emergence of new forms of life, i.e. existing species.
- (ii) **Oligocene.** Fossils of few still existing species.
- (iii) **Miocene.** Fossil remains show a balance of existing and extinct species.

(iv) **Pliocene.** Fossil remains show a majority of still existing species.

(v) **Pleistocene.** The majority of remains are those of still existing species.

(vi) **Holocene.** The present, post-glacial period. Existing species only, except for a few exterminated by man.

In the last 25 million years, from the Miocene through the Pliocene, the Alpine-Himalayan and the circum-Pacific phases of mountain building reached their climax. During the Pleistocene period ice sheets repeatedly locked up masses of water as land ice; its weight depressed the land, but the locking-up of the water lowered the sea-level by 100-200 metres. The glaciations and interglacials of the Ice Age are extremely difficult to date and classify, but recent scientific opinion considers the Pleistocene to have begun approximately 1.7 million years ago. The last glacial retreat, merging into the Holocene period, was 10,000 years ago.

EARLY MAN

Any consideration of the history of man must start with the fact that all members of the human race belong to one species of animal, i.e. *Homo sapiens*, the definition of a species being in biological terms that all its members can interbreed. As a species of mammal it is possible to group man with other similar types, known as the primates. Amongst these is found a sub-group, the apes, which includes, in addition to man, the chimpanzees, gorillas, orang-utans and gibbons. All lack a tail, have shoulder blades at the back, and a Y-shaped chewing pattern on the surface of their molars, as well as showing the more general primate characteristics of four incisors, a thumb which is able to touch the fingers of the same hand, and finger and toe nails instead of claws. All the factors available to scientific study suggest that human beings have chimpanzees and gorillas as their nearest relatives in the animal world. However, there remains the possibility that there once lived creatures, now extinct, which were closer to modern man than the chimpanzees and gorillas. To decide whether or not this is the case it is necessary to consider the fossil evidence to see if any extinct ape-like forms shared with modern man the characteristics of having flat faces (i.e. the absence of a pronounced muzzle), being bipedal, and possessing large brains.

There are two broad groups of extinct apes recognised by specialists. First the ramapithecines, the remains of which, mainly jaw fragments, have been found in East Africa, Asia, and Turkey. They lived about 14 to 8 million years ago, and from the evidence of their teeth it seems they chewed more in the manner of modern man than the other presently living apes. The second group, the australopithecines, have left much more numerous remains amongst which sub-groups may be detected, although the geographic spread is limited to South and East Africa. Living between 5 and 1.5 million years ago, they were closer relatives of modern man to the extent that they walked upright, did not have an extensive muzzle, and had similar types of pre-molars. The first australopithecine remains were recognised at Taung in South Africa in 1924, and subsequent discoveries include those at the famous site of Olduvai Gorge in Tanzania. Perhaps the most impressive discovery was made at Hadar in Ethiopia in 1974 when about half a skeleton, known as "Lucy", was found.

Also in East Africa, between 2 million and 1.5 million years ago, lived a hominid group which

not only walked upright, had a flat face, and a large brain case, but also made simple pebble and flake stone tools. On present evidence these habilines seem to have been the first people to make tools, however crude. This facility is related to the larger brain size and human beings are the only animals to make implements to be used in other processes. These early pebble tool users, because of their distinctive characteristics, have been grouped into separate sub-species, now extinct, of the genus *Homo*, and are known as *Homo habilis*.

The use of fire, again a human characteristic, is associated with another group of extinct hominids whose remains, about a million years old, are found in South and East Africa, China, Indonesia, North Africa and Europe. No doubt the mastery of the techniques of making fire helped the colonisation of the colder northern areas and in this respect the site of Vertesszollos in Hungary is of particular importance. *Homo erectus* is the name given to this group of fossils and it now includes a number of famous individual discoveries from earlier decades, for example, Solo Man, Heidelberg Man, and especially Peking Man who lived at the cave site at Choukoutien, which has yielded evidence of fire and burnt bone.

The well known group, Neanderthal Man, or *Homo sapiens neanderthalensis*, is an extinct form of modern man who lived between about 100,000 and 40,000 years ago, thus spanning the last Ice Age. Indeed, its ability to adapt to the cold climate on the edge of the ice sheets is one of its characteristic features, the remains being only found in Europe, Asia and the Middle East. Complete neanderthal skeletons were found during excavations at Tabun in Israel together with evidence of tool-making and the use of fire. Distinguished by very large brains, it seems that neanderthal man was the first to develop recognisable social customs, especially deliberate burial rites. Why the neanderthalers became extinct is not clear, but it may be connected with the climatic changes at the end of the Ice Ages which would have seriously affected their food supplies; possibly they became too specialised for their own good.

The Swanscombe skull is the only known human fossil remains found in England. Some specialists see Swanscombe Man (or, more probably, woman) as a neanderthal. Others group these remains together with the Steinheim skull from Germany, seeing both as a separate sub-species, *Homo sapiens steinheimensis*. Unfortunately there is just too little evidence as yet on which to form a final judgment.

Modern Man, *Homo sapiens sapiens*, the surviving sub-species of *Homo sapiens*, had evolved to our present physical condition and had colonised much of the world by about 30,000 years ago. There are many previously distinguished individual specimens, for example Cromagnon Man, which may now be grouped together as *Homo sapiens sapiens*. It was modern man who spread to the New World by crossing the landbridge between Siberia and Alaska and thence moved south through North and into South America. Equally it is modern man who over the last 30,000 years has been responsible for the major developments in technology, art and civilisation generally.

One of the problems for those studying fossil man is the lack in many cases of sufficient quantities of fossil bone for analysis. It is important that theories should be tested against evidence, and not the evidence made to fit the theory. The celebrated Piltdown hoax is perhaps the best known example of

"fossils" being forged to fit what was seen in quarters the correct theory of man's evolution.

HUMAN CULTURAL DEVELOPMENT

The Eurocentric bias of early archaeologists meant that the search for a starting point for the development and transmission of cultural ideas, especially by migration, trade and warfare, concentrated unduly on Europe and the Near East. The Three Age System, whereby pre-history was divided into a Stone Age, Bronze Age, and Iron Age, was devised by Christian Thomsen, curator of the National Museum of Denmark in the early nineteenth century, to facilitate the classification of the Museum's collections. The descriptive adjectives referred to the materials from which the implements and weapons were made, and came to be regarded as the dominant features of the societies to which they related. The refinement of the Three Age System once dominated archaeological thought and still remains a generally accepted concept in the popular mind. However, it is now seen by archaeologists as an inadequate model for human development.

Common sense alone suggests that there were no complete breaks between one so-called "Age" and another, any more than contemporaries would have regarded 1485 as a complete break between medieval and modern English history. Nor can the Three Age System be applied universally. In some areas it is necessary to insert a Copper Age, while in Africa south of the Sahara there would seem to be no Bronze Age at all; in Australia, Old Stone Age societies survived, while in South America, New Stone Age communities existed into modern times. The civilisations in other parts of the world clearly invalidate a Eurocentric theory of human development.

The concept of the "Neolithic Revolution", associated with the domestication of plants and animals, was a development of particular importance in the human cultural pattern. It reflected change from the primitive hunter/gatherer economies to a more settled agricultural way of life and therefore, so the argument goes, made possible the development of urban civilisation. However, it can no longer be argued that this "Revolution" took place only in one area from which all development stemmed. Though it appears that the cultivation of wheat and barley was first undertaken, together with the domestication of cattle and goats/sheep in the Fertile Crescent, there is evidence that rice was first deliberately planted and pigs domesticated in South East Asia; maize first cultivated in Central America and llamas first domesticated in South America. It has been recognized increasingly in recent years that cultural changes can take place independently of each other in different parts of the world at different rates and different times. There is no need for a general diffusionist theory.

Although scholars will continue to study the particular societies which interest them, it may be possible to obtain a reliable chronological framework, in absolute terms of years, against which the cultural development of any particular area may be set. The development and refinement of radiocarbon dating and other scientific methods of producing absolute chronologies is enabling the cross-referencing of societies to be undertaken. As the techniques of dating become more rigorous in application and the number of scientifically obtained dates increases, the attainment of an absolute chronology for prehistoric societies throughout the world comes closer to being achieved.

TIME MEASUREMENT AND CALENDARS

MEASUREMENTS OF TIME

Measurements of time are based on the time taken by the earth to rotate on its axis (*day*); by the moon to revolve round the earth (*month*); and by the earth to revolve round the sun (*Year*). From these, which are not commensurable, certain average or mean intervals have been adopted for ordinary use.

The Day begins at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 noon (when the sun crosses the meridian), and these hours are designated A.M. (*ante meridiem*); and again from noon up to 12 midnight, which hours are designated P.M. (*post meridiem*), except when the *twenty-four hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are numbered to 23 from midnight to midnight.

Colloquially the 24 hours are divided into *day* and *night*, *day* being the time while the sun is above the horizon (including the four stages of twilight defined on p. 65). *Day* is subdivided further into *morning*, the early part of daytime, ending at noon; *afternoon* from noon to 6 p.m. and *evening*, which may be said to extend from 6 p.m. until midnight. *Night*, the dark period between day and day, begins at the close of Astronomical Twilight (see p. 65) and extends beyond midnight to sunrise the next day.

The names of the Days—Sunday, Monday, Tuesday (*Tyr* or *Tiw* = god of war), Wednesday (*Woden* or *Odin*), Thursday (*Thor*), Friday (*Frigga* = wife of *Odin*, or *Freyja* = goddess of love), and Saturday—are derived from Old English translations or adaptations of the Roman titles (*Sol*, *Luna*, *Mars*, *Mercurius*, *Jupiter*, *Venus* and *Saturnius*).

The Week is a period of 7 days.

The Month in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary from 28 (or 29) days to 31.

The Year.—The *Equinoctial* or *Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, or 365.2422 mean solar days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *bissextile* (see *Roman Calendar*) or *Leap Year* and consists of 366 days, one day being added to the month February, so that a date "leaps over" a day of the week. The last year of a century is not a leap year unless its number is divisible by 400 (e.g. the years 1800 and 1900 had only 365 days).

The Solstice.—A Solstice is the point in the Tropical Year at which the Sun attains its greatest distance, north or south, from the Equator. In the northern hemisphere the greatest distance north of the Equator is the Summer Solstice and the greatest distance south is the Winter Solstice.

The Summer Solstice is also the *Longest Day*, measured from sunrise to sunset. At the Solstice the Sun, reaching its greatest northern declination, appears to stand still, the times of sunrise and sunset and the consequent length of the day showing no variation for several days together, before and after the longest day (June 21 or 22). For the remainder of this century the longest day will fall each year on June 21.

The date of the Solstice varies according to locality. If the Solstice falls on June 21 late in the day by Greenwich time, that day will be the longest of the year at Greenwich even though it may be by only a second of time or a fraction thereof, but it will be on June 22, local date, in Japan, and so June 22 will be

the longest day there and at places in eastern longitudes.

Leaving aside the question of locality, the date of the Solstice is also affected by the length of the Tropical Year, which is 365 $\frac{1}{4}$ days less about 11 minutes. If a Solstice happens late on June 21 in one year, it will be nearly six hours later in the next, i.e. early on June 22, and that will be the longest day. This delay of the Solstice is not permitted to continue because the extra day in Leap Year brings it back a day in the Calendar.

However, because of the 11 minutes above mentioned, the additional day in Leap Year brings the Solstice back too far by 44 minutes, and the time of the Solstice in the Calendar is earlier as the century progresses. (In the year 2000 the Summer Solstice reaches its earliest date for 100 years, i.e., June 21^d 02^m.) To remedy this the last year of a century is in most cases not a Leap Year, and the omission of the extra day puts the date of the Solstice later by about six hours too much, compensation for which is made by making the fourth centennial year a Leap Year.

Similar considerations apply to the day of the Winter Solstice, or the *Shortest Day* of the year. For the remainder of this century the shortest day will fall on Dec. 21 in two years of four and on Dec. 22 in the remaining two years. In the year 2000 the Winter Solstice reaches its earliest date, i.e., Dec. 21^d 13^m. The difference due to locality also prevails in the same sense for the longest day.

At Greenwich the Sun sets at its earliest by the clock about ten days before the shortest day, which is a circumstance that may require explanation. The daily change in the time of sunset is due in the first place to the Sun's movement southwards at this time of the year, which diminishes the interval between the Sun's transit, and its setting, and, secondly, because of the daily decrease of the Equation of Time which causes the time of Apparent noon to be continuously later, day by day, and so in measure counteracts the first effect. The rates of the change of these two quantities are not equal, nor are they uniform, but are such that their combination causes the date of earliest sunset to be Dec. 12 or 13 at Greenwich. In more southerly latitudes the effect of the movement of the Sun is less, and the change in the time of sunset depends on that of the Equation of Time to a greater degree, and the date of earliest sunset is earlier than it is at Greenwich.

The Equinox is the point at which the Sun crosses the Equator and day and night are of equal length all over the world. This occurs in March (Vernal Equinox—about March 21) and September (Autumnal Equinox—about September 21).

The Historical Year.—Before the year 1752, two Calendar systems were in use in England. The Civil or Legal Year began on March 25, while the Historical Year began on January 1. Thus the Civil or Legal date March 24 1658, was the same day as the Historical date March 24, 1659; and a date in that portion of the year is written as: March 24 165 $\frac{1}{2}$, the lower figure showing the Historical year.

The New Year.—In England in the seventh century, and as late as the thirteenth, the year was reckoned from Christmas Day, but in the twelfth century the Anglican Church began the year with the Feast of The Annunciation of the Blessed Virgin (Lady Day) on March 25 and this practice was adopted generally in the fourteenth century. The Civil or Legal year in the British Dominions (exclusive of Scotland) began with "Lady Day" until 1751. But in

and since 1752 the civil year has begun with Jan. 1. Certain dividends are still paid by the Bank of England on dates based on Old Style. New Year's Day in Scotland was changed from March 25 to Jan. 1 in 1600.

On the Continent of Europe Jan. 1 was adopted — the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal, and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1725, and Tuscany 1751.

The Masonic Year.—Two dates are quoted in warrants, dispensations etc., issued by the United Grand Lodge of England, those for the current year being expressed as *Anno Domini* 1990—*Anno Lucis* 5990. This *Year of Light* is based on the Book of Genesis I: 3, the 4000 year difference being derived, in modified form, from *Usher's Notation*, published in 1654, which places the Creation of the World in 4,004 B.C.

Regnal Years.—These are the years of a sovereign's reign, and each begins on the anniversary of his or her accession: e.g. Regnal year 39 of the present Queen begins on Feb. 6, 1990. The *Summer Time Act* of 1925, for example, is quoted as 15 and 16 Geo. V. c. 64, because it became law in the session which extended over part of both of these regnal years. The regnal years of Edward VII began on January 22, which was the day of Queen Victoria's death in 1901, so that Acts passed in that reign are, in general, quoted with only one year number, but year 10 of the series ended on May 6, 1910, being the day on which King Edward died, and Acts of the Parliamentary Session 1910 are headed 10 Edw. VII. and 1 Geo. V.; Acts passed in 1936 were dated 1 Edw. VIII. and 1 Geo. VI.; Acts passed in 1952 were dated 16 Geo. VI. and 1 Elizabeth II.

The system was used for dating Acts of Parliament until 1962. Since 1962 Acts of Parliament have been dated by the calendar year.

Dog Days.—The days about the heliacal rising of the Dog Star, noted from ancient times ■ the hottest and most unwholesome period of the year in the northern hemisphere. Their incidence has been variously calculated as depending on the Greater or Lesser Dog Star (*Sirius* or *Procyon*) and their duration has been reckoned as from 30 to 54 days. A generally accepted period is from July 3 to Aug. 15.

Metonic (Lunar, or Minor) Cycle.—In the year 432 B.C. Meton, an Athenian astronomer, found that 235 Lunations are very nearly, though not exactly equal in duration to 19 Solar Years, and, hence, after 19 years the Phases of the Moon recur on the same days of the month (nearly). The dates of Full Moon in ■ cycle of nineteen years were inscribed in figures of gold on public monuments in Athens, and the number showing the position of ■ year in the Cycle is called the *Golden Number* of that year.

Roman Indiction.—A period of fifteen years, instituted for fiscal purposes about A.D. 300.

Solar (or Major) Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the ■ day of the month.

Julian Period.—Proposed by Joseph Scaliger in 1582. The period is 7980 Julian years, and its first year coincides with the year 4713 B.C. 7980 is the product of the number of years in the Solar Cycle, the Metonic Cycle and the cycle of the Roman Indication (28 × 19 × 15).

Epact.—The age of the calendar Moon, diminished by one day, on January 1, in the ecclesiastical lunar calendar.

THE FOUR SEASONS

Spring, the first season of the year, is defined astronomically to begin in the northern hemisphere at the Vernal Equinox when the Sun enters the sign Aries and to terminate at the Summer Solstice. In Great Britain, Spring in popular parlance comprises the months of March, April and May. In the southern hemisphere Spring corresponds with Autumn in the northern hemisphere.

Summer, the second and warmest season, begins astronomically in the northern hemisphere at the Summer Solstice when the Sun enters the sign of Cancer, and terminates at the Autumnal Equinox. In popular parlance Summer in Great Britain includes the months of June, July and August. In the southern hemisphere Summer corresponds with Winter in the northern hemisphere.

Autumn, the third season, begins astronomically in the northern hemisphere at the Autumnal Equinox when the Sun enters the sign Libra and ends at the Winter Solstice. In Great Britain it is popularly held to include the months of September, October and November. A warm period sometimes occurs round about St. Luke's Day (Oct. 18) and is known ■ "St. Luke's Summer". A warm period occurring round about Martinmas (Nov. 11) is known ■ "St. Martin's Summer". In the southern hemisphere Autumn corresponds with Spring of the northern.

Winter, the fourth and coldest season, begins astronomically in the northern hemisphere at the Winter Solstice when the Sun enters the sign of Capricornus, and ends at the Vernal Equinox. In Great Britain the season is popularly held to comprise the months of December, January and February. In the southern hemisphere it corresponds with Summer of the northern.

THE CHRISTIAN CALENDAR

In the Christian chronological system the years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*), and A.D. (*Anno Domini*—In the Year of Our Lord). The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, A.M. 3761 (Jewish Chronology), and the 4714th year of the Julian Period.

The system was introduced into Italy in the sixth century, and though first used in France in the seventh it was not universally established there until about the eighth century. It has been said that the

system was introduced into England by St. Augustine (A.D. 596), but was probably not generally used until some centuries later. It was ordered to be used by the Bishops at the Council of Chelsea, A.D. 816. The actual date of the birth of Christ is somewhat uncertain.

The Julian Calendar.—In the Julian Calendar all the centennial years were Leap Years, and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years; the equinox fell on March 11 of the Calendar, whereas at the time of the Council of

Nicaea, A.D. 325, it had fallen on March 21. In 1582 Pope Gregory ordained that Oct. 5 should be called Oct. 15 and that of the end-century years only the fourth should be ■ Leap Year (see p. 112).

The Gregorian Calendar was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700; Great Britain and her Dominions (including the North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned ■ Sept. 14). Sweden omitted the leap day in 1700 but observed leap days in 1704 and 1708, and reverted to the Julian calendar by having two leap days in 1712; the Gregorian Calendar was adopted in 1753 by the omission of eleven days (Feb. 18 being reckoned as March 1). Japan adopted the calendar in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1918, Yugoslavia and Romania in 1919, and Greece in February, 1923.

In the same year that the change was made in England from the Julian to the Gregorian Calendar, the beginning of the new year was also changed from March 25 to January 1 (see p. 112-113).

The Orthodox Churches.—Some Orthodox Churches still use the Julian reckoning, but the majority of Greek Churches and the Romanian Orthodox Church have adopted a modified "New Calendar", observing the Gregorian Calendar for fixed feasts and the Julian for movable feasts.

The Orthodox Church year begins on September 1. There are four fast periods, and in addition to Pascha (Easter), twelve great feasts, as well as numerous commemorations of the Saints of the Old and New Testaments throughout the year.

The Dominical Letter is one of the letters A-G which are used to denote the Sundays in successive years. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1—Feb. 29, the second for March 1—Dec. 31.

Epiphany.—The Feast of the Epiphany, commemorating the manifestation of Christ, later became associated with the offering of gifts by the Magi. The day was of exceptional importance from the time of the Council of Nicaea (A.D. 325) ■ the primate of Alexandria was charged at every Epiphany Feast with the announcement in ■ letter to the Churches of the date of the forthcoming Easter. The day was of considerable importance in Britain as it influenced dates, ecclesiastical and lay, e.g. Plow Monday, when work was resumed in the fields, falls upon the Monday in the first full week after the Epiphany.

Lent.—The Teutonic word *Lent*, which denotes the Fast preceding Easter, originally meant no more than the Spring season; but from Anglo-Saxon times, at least, it has been used as the equivalent of the more significant Latin term *Quadragesima*, meaning the "Forty Days" or, more literally, the fortieth day. As early ■ the fifth century some of the Fathers of the Church put forward the view that the forty days Fast is of Apostolic origin, but this is not supported or believed by modern scholars; and it appears to some that it dates from the early years of the fourth century. There is some suggestion that the Fast was kept originally for only forty hours. Ash Wednesday is the first day of Lent, which ends at midnight before Easter Day.

Sexagesima and Septuagesima.—It has been suggested that the unmeaning application of the names *Sexagesima* and *Septuagesima* to the second and third Sundays before Lent was made by analogy with the names *Quadragesima* and *Quinquagesima*.

Another less likely conjecture is that *Septuagesima* means the seventh day before the Octave of Easter. It is not certain whether the name *Quinquagesima* is due to the fact that the Sunday in question is the fiftieth day before Easter (reckoned inclusive) or was simply formed on the analogy of *Quadragesima* (*New English Dictionary*).

Mothering Sunday is the fourth Sunday in Lent.

Palm Sunday, the Sunday before Easter and the beginning of Holy Week, commemorates the triumphal entry of Christ into Jerusalem and is celebrated in Britain (when palm is not available) by branches of willow gathered for use in the decoration of churches on that day.

Maundy Thursday is the day before Good Friday, the name itself being ■ corruption of *dies mandati* (day of the mandate) when Christ washed the feet of the disciples and gave them the mandate to love one another.

Easter Day is the first Sunday after the full moon which happens upon, or next after, the 21st day of March; and if the full moon happens upon ■ Sunday, Easter Day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo. II., cap. 23), and explanation is given in the preamble to the Act that the day of Full Moon depends on certain tables that have been prepared. These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real Moon of the heavens, but a hypothetical Moon on whose "Full" the date of Easter depends, and the lunations of this "Calendar" Moon consist of twenty-nine and thirty days alternately with certain necessary modifications to make the date of its Full agree as nearly ■ possible with that of the real Moon, which is known as the *Paschal Full Moon*. As at present ordained, Easter falls on one of 35 days—(March 22-April 25).

A Fixed Easter.—On June 15, 1928, the House of Commons agreed to a motion for the third reading of the Bill that Easter Day shall, in the Calendar year next but one after the commencement of the Act and in all subsequent years, be the *first Sunday after the second Saturday in April*. Easter would thus fall between April 9 and 15, both inclusive—that is, on the second or third Sunday in April. A clause in the Bill provided that before it shall come into operation regard shall be had to any opinion expressed officially by the various Christian Churches. Efforts by the World Council of Churches to secure a unanimous choice of date for Easter by its member Churches have so far been unsuccessful.

Holy Days and Saints Days were the normal factors in early times for settling the dates of future and recurrent appointments, e.g. the *Quarter Days* in England and Wales are the Feast of the Nativity, the Feast of the Annunciation, the Feast of St. John the Baptist and the Feast of St. Michael and All Angels, while *Term Days* in Scotland are Candlemas (Feast of the Purification), Whitsunday (a fixed date), Lammas (Loaf Mass) and Martinmas (St. Martin's Day). *Law Sittings* in England and Wales commence on the Feast of St. Hilary and the term which begins on Old Michaelmas Day ends on the former feast of St. Thomas the Apostle.

Red Letter Days (see also p. 155) were Holy Days and Saints Days indicated in early ecclesiastical calendars by letters printed in red ink. The days to be distinguished in this way were finally approved at the Council of Nicaea, A.D. 325.

Rogation Days.—These are the Monday, Tuesday and Wednesday preceding Ascension Day (Holy Thursday) and in the fifth century were ordered by

the Church to be observed — public fasts with solemn processions and supplications. The processions were discontinued as religious observances at the Reformation, but survive in the ceremony known — "Beating the Parish Bounds". **Rogation Sunday** is the Sunday before Ascension Day.

Ascension Day is forty days after Easter Day.

Ember Days.—The Ember Days at the Four Seasons are the Wednesday, Friday and Saturday (a) before the third Sunday in Advent, (b) before the second Sunday in Lent, and (c) before the Sundays nearest to the Festivals of St. Peter, and St. Michael and All Angels.

Whit Sunday or Pentecost is seven weeks after Easter Day. It is generally said that this name is — variant of White Sunday, and was so called from the

abs or white robes of the newly baptized, but other derivations have been suggested.

Trinity Sunday is eight weeks after Easter Day, on the Sunday following Whit Sunday, and subsequent Sundays are sometimes reckoned in the Church of England — "after Trinity".

Thomas Becket (1118–1170) was consecrated Archbishop of Canterbury on the Sunday after Whit Sunday and his first act was to ordain that the day of his consecration should be held as a new festival in honour of the Holy Trinity. The observance thus originated spread from Canterbury throughout the whole of Christendom.

Advent Sunday is the Sunday nearest to St. Andrew's Day, Nov. 30, which allows three Sundays between Advent and Christmas Day in all cases.

A TABLE OF THE MOVABLE FEASTS TO THE YEAR 2025

Year	Ash Wednesday	Easter	Ascension	Whit Sunday (Pentecost)	Sundays after Pentecost	Advent Sunday
1990.....	Feb. 28	April 15	May 24	June 3	20	Dec. 2
1991.....	Feb. 13	March 31	May 9	May 19	22	Dec. 1

2024.....	Feb. 14	March 31	May 9	May 19	22	Dec. 1
2025.....	March 5	April 20	May 29	June 8	19	Nov. 30

NOTES CONCERNING TABLE OF MOVABLE FEASTS

Ash Wednesday (first day in Lent) can fall at earliest on February 4 and at latest on March 10.

Easter Day can fall at earliest on March 22 and at latest on April 25.

Ascension Day can fall at earliest on April 30 and at latest on June 3.

Whit Sunday (Pentecost) can fall at earliest on May 10 and at latest on June 13.

Trinity Sunday is the Sunday after **Whit Sunday**.

Corpus Christi falls on the Thursday after **Trinity Sunday**.

There are not less than 18 and not more than 23 **Sundays after Pentecost**.

Advent Sunday is the Sunday nearest to November 30.

A TABLE OF EASTER DAYS AND SUNDAY LETTERS, 1500 TO 2025

THE JEWISH CALENDAR

Origin.—The story in the Book of Genesis that the Flood began on the seventeenth day of the second month; that after the end of 150 days the waters were abated; and that on the seventeenth day of the seventh month the Ark rested on Mount Ararat, indicates a calendar of some kind and that the writers recognized 30 days as the length of a lunation. There is other mention of months by their original numbers in the Book of Genesis and in establishing the rite of the Passover Moses spoke of *Abib* — the month when the Israelites came out from Egypt and *Abib* was to be the first month of the year. In the first Book of Kings three months are mentioned by name, *Ziv* the second month, *Ethanim* the seventh and *Bul* the eighth, but these are not names now in use. After the Dispersion, Jewish communities were left in considerable doubt as to the times of Fasts and Festivals, and this led to the formation of the Jewish Calendar — used today, which, it is said, was done in A.D. 358 by Rabbi Hillel II, a descendant of Gamaliel — though some assert that it did not happen until much later. This calendar is luni-solar, and is based on the lengths of the lunation and of the tropical year

as found by Hipparchus (c. 120 B.C.) which differ little from those adopted at the present day. The year A.M. 5750 (1989-90) is the 12th year of the 303rd *Metonic* (Minor or Lunar) Cycle of 19 years and the 10th year of the 206th *Solar* (or Major) Cycle of 28 years since the Era of the Creation, which the Jews hold to have occurred at the time of the Autumnal Equinox in the year known in the Christian Calendar as 3760 B.C. (954 of the Julian Period). The epoch or starting point of Jewish Chronology corresponds to Oct. 7, 3761 B.C. At the beginning of each Solar Cycle the *Tekufah* of *Nisan* (the vernal equinox) returns to the same day and to the same hour.

The hour is divided into 1080 *minims* and the month between one new moon and the next is reckoned as 29 days, 12 hours, 793 *minims*. The normal calendar year, called a Common Regular year, consists of 12 months of 30 days and 29 days alternately. Since 12 months such as these comprise only 354 days, in order that each of them shall not diverge greatly from an average place in the solar year, a thirteenth month is occasionally added after the fifth month of the Civil year (which commences

on the first day of the month Tishri), or as the penultimate month of the Ecclesiastical (which commences on the first day of month Nisan), the years when this happens being called Embolistic or Leap years. Of the 19 years that form a Metonic cycle, 7 are leap years; they occur at places in the cycle indicated by the numbers 3, 6, 8, 11, 14, 17, 19, these places being chosen so that the accumulated excesses of the solar years should be as small as possible. The first of each month is called the day of New Moon, though it is not necessarily the day of astronomical New Moon, that being the day on which conjunction of Sun and Moon occurs, but there is generally a difference of a day or two. In practice, in a month which follows one of 30 days, the day preceding its first day is also observed as a day of New Moon. The dates on which the first days of the months fall depend on that of the first of Tishri, which therefore controls the dates of fasts and festivals in the Jewish year. For certain ceremonial reasons connected with these, the first of Tishri must not fall on a Sunday, Wednesday or Friday, and if this should happen as the result of the computation it is postponed to the following day. Also, if the New Moon of Tishri falls on any day of the week at noon or later than noon, then the following day is to be taken for the celebration of that New Moon and is Tishri 1, provided that it is not one of the forbidden days, in which case there is a further postponement of a day. These rules and others have been considered in detail, and finally a calendar scheme has been

drawn up in which a Jewish year is of one of the following six types: Minimal Common (353 days), Regular Common (354 days), Full Common (355 days), Minimal Leap (383 days), Regular Leap (384 days), or Full Leap (385 days).

The Regular year has an alternation of 30 and 29 days. In a full year, whether Common or Leap, Marcheshvan, the second month of the Civil year, has 30 days instead of 29; in Minimal years Kislev, the third month, has 29 instead of 30. The additional month in Leap years which is called Adar I, and precedes the month called Adar in Common years and Adar II, or Ve-Adar, in Leap, always has 30 days, but neither this, nor the other variations mentioned, is allowed to change the number of days in the other months which still follow the alternation of the normal twelve. In Leap years the month intercalated precedes Adar and usurps its name, but the usual Adar festivals are kept in Ve-Adar.

These are the main features of the Jewish Calendar which must be considered permanent, because as a Jewish law it cannot be altered except by a great Sanhedrin.

The Jewish day begins between sunset and nightfall. The time used is that of the meridian of Jerusalem, which is 2h. 21m. in advance of Greenwich Mean Time. Rules for the beginning of Sabbaths and Festivals were laid down for the latitude of London in the eighteenth century and hours for nightfall are now fixed annually by the Chief Rabbi.

A.M. 5750 (750) is a Full Common Year of 12 months, 51 Sabbaths and 355 days. A.M. 5751 (751) is a Regular Common Year of 12 months, 51 Sabbaths and 354 days.

*Known as Adar Rishon in Leap Years.

Jewish Fasts and Festivals

<i>Tishri</i>	1-2	Rosh Hashanah (New Year).	<i>Tebet</i>	10	Fast of Tebet.
"	3	*Fast of Gedaliah.	+Adar	13	\$Fast of Esther.
"	10	Yom Kippur (Day of Atonement).	" "	14	Purim.
"	15-21	Succoth (Feast of Tabernacles).	" "	15	Shushan Purim.
"	21	Hoshana Rabba.	<i>Nisan</i>	15-22	Pesach (Passover).
"	22	Shemini Atseret (Solemn Assembly).	<i>Sivan</i>	6-7	Shavuot (Feast of Weeks).
"	23	Simchat Torah (Rejoicing of the Law).	<i>Tammuz</i>	17	*Fast of Tammuz.
<i>Kislev</i>	25	Chanukkah (Dedication of the Temple)	<i>Ab</i>	9	*Fast of Ab.
		begins.			

NOTES.

* If these dates fall on the Sabbath the Fast is kept on the following day.

† Ve-Adar in Leap Years.

§ This fast is observed on Adar 11 (or Ve-Adar 11 in Leap Years) if Adar 13 falls on a Sabbath.

THE ROMAN CALENDAR

Roman historians adopted ■ an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C., and the ordinal number of the years in Roman reckoning is followed by the letters A.U.C. (*Ab Urbe Condita*), so that the year 1990 is 2743 A.U.C. (MMDCCLXIII). The Calendar that we know has developed from one established by Romulus, who is said to have used a year of 304 days divided into ten months, beginning with March, to which Numa added January and February, making the year consist of 12 months of 30 and 29 days alternately, with an additional day so that the total was 355. It is also said that Numa ordered an intercalary month of 22 or 23 days in alternate years, making 90 days in eight years, to be inserted after Feb. 23, but there is some doubt as to the origination and the details of the intercalation in the Roman Calendar, though it is certain that some scheme of this kind was inaugurated and not fully carried out, for in the year 46 B.C. Julius Caesar, who was then Pontifex Maximus,

found that the Calendar had been allowed to fall into some confusion. He therefore sought the help of the Egyptian astronomer Sosigenes, which led to the construction and adoption (45 B.C.) of the Julian Calendar, and, by a slight alteration, to the Gregorian now in use. The year 46 B.C. was made to consist of 445 days, and is called the *Year of Confusion*. In the Roman (Julian) Calendar the days of the month were counted backwards from three fixed points, or days, and an intervening day was said to be so many days before the next coming point, the first and last being counted. These three points were (a) the Kalends; (b) the Nones; and (c) the Ides. Their positions in the months and the method of counting from them will be seen in the table below. The year containing 366 days was called *bissextus annus*, as it had a doubled sixth day (*bissexturn dies*) before the March Kalends on Feb. 24—*ante diem sextum Kalendas Martias*, or a.d. VI Kal. Mart.

Present Days of the Month	March, May, July, October have thirty-one days	January, August, December have thirty-one days	April, June, September, November have thirty days	February has twenty-eight days, and in Leap Year twenty-nine

ROMAN NUMERALS

1	I	9	IX	17	XVII	70	LXX	600	DC
2	II	10	X	18	XVIII	80	LXXX	700	DCC
3	III	11	XI	19	XIX	90	XC	800	DCCC
4	IV	12	XII	20	XX	100	C	900	CM
5	V	13	XIII	30	XXX	200	CC	1000	M
6	VI	14	XIV	40	XL	300	CCC	1500	MD
7	VII	15	XV	50	L	400	CD	1900	MCM
8	VIII	16	XVI	60	LX	500	D	2000	MM

Other Examples: 43 = XLIII; 66 = LXVI; 98 = XCVIII.

339 = CCCXXXIX; 619 = DCXIX; 988 = CMLXXXVIII; 996 = CMXCVI.

1674 = MDCLXXIV; 1962 = MCMLXII; 1990 = MCMXC.

A bar placed over ■ numeral has the effect of multiplying the number by 1,000, e.g.:

6,000 = VI; 16,000 = XVI; 160,000 = CLX; 666,000 = DCLXVI.

* (repeated in Leap Year).

THE MUSLIM CALENDAR

The basic date of the Muslim Calendar is the *Hejira*, or Flight of Muhammad from Mecca to Medina, the corresponding date of which is A.D. 622, July 16, in the Julian Calendar. *Hejira* years are used principally in Iran, Turkey, Egypt, in various Arabian states, in certain parts of India and in Malaysia. The system was adopted about A.D. 632, commencing from the first day of the month preceding the *Hejira*. The years are purely lunar and consist of 12 months containing in alternate sequence 30 or 29 days, with the intercalation of one day at the end of the 12th month at stated intervals in each cycle of 30 years, the object of the intercalation being to reconcile the date of the first of the month with the date of the actual New Moon. Some adherents still take the date of the evening of the first visibility of the crescent as that of the first of the month. In each cycle of 30 years 19 are common and contain 354 days and 11 are intercalary (355 days), the latter being called *kabishah*.

The mean length of the *Hejira* year is 354 days, 8 hours, 48 minutes and the period of mean lunation is 29 days, 12 hours, 44 minutes.

To ascertain if a *Hejira* year is common or *kabishah* divide it by 30; the quotient gives the number of

completed cycles and the remainder shows the place of the year in the current cycle. If the remainder is 2, 5, 7, 10, 13, 16, 18, 21, 24, 26 or 29 the year is *kabishah* and consists of 355 days.

Hejira year A.H. 1410 (no remainder) and A.H. 1411 (remainder one) are both common years.

Hejira Years 1410 and 1411

Name and Length of Month	A.H. 1410	A.H. 1411
Muharram (30)	1989 Aug. 4	1990 July 24

Dhû'l-Hijja (29 or 30)	June 25	June 14

OTHER EPOCHS AND CALENDARS

China.—Until the year A.D. 1911 ■ lunar calendar was in force in China, but with the establishment of the Republic the Government adopted the Gregorian Calendar, and the new and old systems were used simultaneously by the people for several years. Since 1930 the publication and use of the old Calendar have been banned by the Government, and an official Chinese Calendar, corresponding with the European or Western system, is compiled, but the old lunar calendar is still in use to some extent in China. The old Chinese Calendar, with a cycle of 60 years, is still in use in Tibet, Hong Kong, Singapore, Malaysia and elsewhere in South-East Asia.

Ethiopia.—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap year and in these years there are ■ complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap year of the Julian Calendar. The Era ■ that of Diocletian or the Martyrs, the origin of which ■ fixed at A.D. 284, Aug. 29 (Julian date).

Greece.—Ancient Greek chronology was reckoned in *Olympiads*, cycles of 4 years corresponding with the periodic Olympic Games held on the plain of Olympia in Elis once in 4 years, the intervening years being the first, second, etc., of the Olympiad which received the ■ of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

India.—In addition to the Muslim reckoning there are six eras used in India. The principal astronomical system was the *Kaliyuga Era*, which appears to have been adopted in the fourth century A.D. It began on Feb. 18, 3102 B.C. The chronological system of Northern India, known ■ the *Vikrama Samvat Era*, prevalent in Western India, began on Feb. 23, 57 B.C. The year A.D. 1990 is, therefore, the year 2047 of the *Vikrama Era*.

The *Saka Era* of Southern India dating from A.D. 78, March 3, was declared the uniform national calendar of the Republic of India with effect from March 22, 1957, to be used concurrently with the Gregorian Calendar. As revised, the year of the new

Saka Era begins at the spring equinox, with five successive months of 31 days and seven of 30 days in ordinary years; six months of each length in leap years. The year A.D. 1990 is 1912 of the revised *Saka Era*.

In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Iran.—The chronology of Iran is the Era of *Hejira*, which began on A.D. 622, July 16. The *Zoroastrian Calendar* was used in pre-Muslim days and is still employed by Zoroastrians in Iran and India (Parsees) with an era beginning A.D. 632, June 16.

Japan.—The Japanese Calendar is the Gregorian, and is essentially the same as that in ■ by Western nations, the years, months and weeks being of the same length and beginning on the same days as those of the Western Calendar. The numeration of the years is different, for Japanese chronology is based on ■ system of epochs or periods, each of which begins at the accession of an Emperor or other important occurrence, the method being not unlike the former British system of Regnal years, but differing from it in the particular that each year of a period closes on Dec. 31. The Japanese scheme begins about A.D. 650 and the three latest epochs are defined by the reigns of Emperors, whose actual names are not necessarily used:

Epoch Taishô from 1912 Aug. 1 to 1926 Dec. 25

„ *Shôwa* „ 1926 Dec. 26 to 1989 Jan. 7

„ *Heisei* „ 1989 Jan. ■

Hence the year *Heisei* 2 begins Jan. 1, 1990. The months are not named. They are known as First Month, Second Month, etc., first month being the equivalent to January. The days of the week are *Nichiyôbi* (Sun-day), *Getsuyôbi* (Moon-day), *Kayôbi* (Fire-day), *Suiyôbi* (Water-day), *Mokuyôbi* (Wood-day), *Kinyôbi* (Metal-day), *Doyôbi* (Earth-day).

CALENDAR FOR ANY YEAR

[1990]

To select the correct calendar for any year between 1770 and 2025, together with the dates of Easter in each of those years, consult the Index below.

The World

The superficial area of the Earth is estimated to be 196,836,000 square miles, of which 55,786,000 square miles are land and 141,050,000 square miles water. The diameter of the Earth at the Equator is 7,926·5 English miles, and at the Poles 7,900 English miles. The equatorial circumference is 24,901·8 English miles, divided into 360 degrees of longitude, each of 69·17 English (or 60 geographical) miles; these degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th degree. Distance North and South of the Equator is marked by parallels of latitude, which proceed from zero (at the Equator) to 90° at the Poles.

The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901·8 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (584,000,000 miles in 365½ days). The Earth is distant from the Sun 93,000,000 miles, on the average.

AREA AND POPULATION

The total population of the world in mid-1985, was estimated at 4,837,500,000, compared with 3,003,000,000 in 1960 and 2,070,000,000 in 1930.

Continent, etc.	Area		Estimated Population, mid-1985
	Sq. miles '000	Sq. km. '000	
Africa	11,704	30,313	555,000,000
North America ¹	8,311	21,525	264,000,000
Latin America ²	7,933	20,547	405,000,000
Asia ³	10,637	27,549	2,813,000,000
Europe ⁴	1,915	4,961	497,000,000
U.S.S.R.	8,649	22,402	279,000,000
Oceania ⁵	3,286	8,510	24,500,000
TOTAL	52,435	135,807	4,837,500,000

¹ Includes Greenland and Hawaii.

² Mexico and the remainder of the Americas south of the U.S.A.

³ Includes Asiatic Turkey, excludes U.S.S.R.

⁴ Includes European Turkey, excludes U.S.S.R.

⁵ Includes Australia, New Zealand and the islands inhabited by Micronesian, Melanesian and Polynesian peoples.

Source: *U.N. Demographic Yearbook 1985* (pub. 1987).

A United Nations report (*The Future Growth of World Population*) in 1958, pointed out that the population of the world had increased since the beginning of the 20th Century at an unprecedented rate: in 1850 it was estimated at 1,094,000,000 and in 1900 at 1,550,000,000, an increase of 42 per cent in 50 years. By 1925 it had risen to 1,907,000,000—23 per cent in 25 years—and by 1950 it had reached 2,500,000,000, an increase of 31 per cent in 25 years. Levels of population and the trend in distribution of the population by continents as forecast for the year 2000 were:—

[millions]

Continent, etc.	2000	
	Estimated Population	Per cent
Africa	517	8·2
North America	312	5·0
Latin America [†]	592	9·4
Asia (excluding U.S.S.R.)	3,870	61·8
Europe (including U.S.S.R.)	947	15·1
Oceania	29	0·5
World	6,267	100

[†] Mexico and the remainder of the Americas south of U.S.A.

THE CONTINENTS

Africa is the second largest continent. It is surrounded by sea except for the narrow isthmus of Suez in the north-east, through which is cut the Suez Canal. The Equator passes through the middle of the continent. Its extreme longitudes are 17° 20' W. at Cape Verde, Senegal, and 51° 24' E. at Ras Hafun, Somalia. The extreme latitudes are 37° 20' N. at Cape Blanco, Tunisia, and 34° 50' S. at Cape Agulhas, South Africa, about 5,000 miles apart.

North America, including Mexico, is surrounded by ocean except in the south, where the isthmian states of Central America link North America with South America. Its extreme longitudes are 168° 5' W. at Cape Prince of Wales, Alaska, and 55° 40' W. at Cape Charles, Newfoundland. The extreme latitudes are about 82° N. in the Arctic Ocean and 15° N. in the south of Mexico. The West Indies, about 65,000 square miles in area, extend from about 27° N. to 10° N. latitude.

South America lies mostly in the southern hemisphere: the Equator passes through the north of the continent. It is surrounded by ocean except where it is joined to Central America in the north by the narrow isthmus through which is cut the Panama Canal. Its extreme longitudes are 34° 47' W. at Cape Branco in Brazil and 81° 20' W. at Punta Pariña, Peru. The extreme latitudes are 12° 25' N. at Punta Gallinas, Colombia, and 55° 59' S. at Cape Horn, Chile.

Antarctica lies almost entirely within the Antarctic Circle (66° 33' S.) and is too hostile an environment for unsupported human habitation. (See also p. 134.)

Asia is the largest continent and occupies about a third of the world's land surface. The extreme longitudes are about 26° E. on the west coast of Asia Minor and 169° 45' W. at Mys Dežneva (East Cape), U.S.S.R., a distance of about 6,000 miles. Its extreme northern latitude is 77° 45' N. at Cape Celjuskin, U.S.S.R., and it extends over 5,000 miles south to about 1° 15' N. of the Equator. The islands of Japan, the Philippines and Indonesia ring the continent to the east and south-east.

Australia is the smallest of the continents and lies in the southern hemisphere. It is entirely surrounded by ocean. Its extreme longitudes are 113° 9' E. at Steep Point and 153° 38' E. at Cape Byron. The extreme latitudes are 10° 40' S. at Cape York and 39° S. at South East Point.

Europe, including European Russia, is the smallest continent in the northern hemisphere. Its extreme latitudes are 71° 11' N. at North Cape in Norway, and 36° 23' N. at Cape Matapan in southern Greece, a distance of about 2,400 miles. Its breadth from Cape da Roca in Portugal (9° 30' W.) in the west to the Urals is about 3,300 miles. The division between Europe and Asia is generally regarded as being the Ural Mountains and, in the south, the valley of the Manych, which stretches from the Caspian Sea to the mouth of the Don.

Countries and Their Capitals

No complete survey of many countries has yet been achieved and consequently accurate area figures are not always available. Similarly, many countries have not recently, or have never, taken a census. The areas and populations of countries given below are derived from estimated figures published by the United Nations. The conversion factors used are: (i) to convert square miles to square km.—multiply by 2.589988; (ii) to convert square km. to square miles—multiply by 0.3861022.

Accurate and up-to-date data for the populations of capital cities are scarce, and definitions of cities' extent differ. The figures given below are the latest estimates available, and where it is known that the figure applies to an urban agglomeration this is indicated.

Where later information becomes available during printing, the new figures are given in the overseas sections of the ALMANACK.

THE SEVEN WONDERS OF THE WORLD

- I. THE PYRAMIDS OF EGYPT.—From Gizeh (near Cairo) to a southern limit 60 miles distant. The oldest is that of Zoser, at Saqqara, built about 2,700 B.C. The Great Pyramid of Cheops covers more than 12 acres and was originally 481 ft. in height and 756 × 756 ft. at the base.
- II. THE HANGING GARDENS OF BABYLON.—Adjoining Nebuchadnezzar's palace, 60 miles south of Baghdad. Terraced gardens, ranging from 75 to 300 ft. above ground level, watered from storage tanks on the highest terrace.
- III. THE TOMB OF MAUSOLUS.—At Halicarnassus, in Asia Minor. Built by the widowed Queen Artemisia about 350 B.C. The memorial originated the term mausoleum.
- IV. THE TEMPLE OF ARTEMIS AT EPHESUS.—Ionic temple erected about 350 B.C. in honour of the goddess and burned by the Goths in A.D. 262.
- V. THE COLOSSUS OF RHODES.—A bronze statue of Apollo, set up about 280 B.C. According to legend it stood at the harbour entrance of the seaport of Rhodes.
- VI. THE STATUE OF ZEUS.—At Olympia in the plain of Elis, constructed of marble inlaid with ivory and gold by the sculptor Phidias, about 430 B.C.
- VII. THE PHAROS OF ALEXANDRIA.—A marble watch tower and lighthouse on the island of Pharos in the harbour of Alexandria.

SOME FAMOUS BRIDGES

Among the outstanding suspension bridges of the World are the Verrazano Narrows Bridge, New York (main span, 4,260 ft.); the Golden Gate Bridge, San Francisco (4,200 ft.); Mackinac Bridge, Michigan (3,800 ft.); Bosphorus, Turkey (3,523 ft.); George Washington Bridge, New York (3,500 ft.); the Ponte 25 April (Tagus Bridge), Portugal (3,323 ft.); Forth Road Bridge, Scotland (3,300 ft.); Severn Bridge, England (3,240 ft.); Tacoma Bridge, Washington, U.S.A. (2,800 ft.); Orinoco Bridge, Venezuela (2,336 ft.) and the Kanmon Bridge, Japan (2,386 ft.). Lengths shown above are all those of the main or longest span. The Humber Bridge was opened in 1981 and has the longest single central span, 4,626 ft., of any suspension bridge in the world.

The Transbay Bridge (*suspension and cantilever*), crossing San Francisco Bay from Oakland to San Francisco is 7½ miles long, with spans of 2,310 ft. each.

Among important steel arch bridges are the New River Gorge Bridge, Virginia, U.S.A. (1,700 ft.); the Bayonne Bridge, from New Jersey to Staten Island, U.S.A. (1,652 ft.); Sydney Harbour Bridge, Australia (1,650 ft.); the Runcorn-Widnes Bridge, England (1,082 ft.); and the Glen Canyon Bridge over the Colorado River, U.S.A. (1,028 ft.). Major concrete trestle bridges include the Lake Pontchartrain Causeway, U.S.A. of 2,170 spans extending 23·87 miles and the Oosterscheldebrug, Netherlands, 3·12 miles long. The Chesapeake Bay Bridge-Tunnel (17·6 miles long) has 12·5 miles of concrete trestle bridge. Gladesville Bridge, Sydney, Australia, is a concrete arch bridge of 1,000 ft. span. The Tay Bridge in Scotland is a steel box girder bridge supported on twin piers (42 spans), 7,365 ft long.

INLAND WATERWAYS.—The British Waterways Board are the navigational authority for nearly 2,000 miles of canals and river navigations in England, Scotland and Wales. Some 340 miles are maintained and are being developed as Commercial Waterways for use by freight-carrying vessels, and another 1,200 miles, the Cruising Waterways, are being developed for boating, fishing and other leisure activities. The remaining 500 miles, the Remainder Waterways, are maintained with due regard to safety, public health and the preservation of amenities. Over a third of this remaining mileage is being, or has been, restored to navigation. The Manchester Ship Canal, Bridgewater Canal, Rochdale Canal, River Thames and Fenland Waterways are among those which are the responsibility of other authorities.

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Bering Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago. Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms. The total area of the Arctic Sea is about 5·5 million square miles, of which 2·3 million square miles are probably covered with floating ice.

DISTANCE OF THE HORIZON

The limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of five feet from the same level is nearly three miles. At a height of 20 feet the range is increased to nearly six miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below, which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of	the range is	At a height of	the range is	At a height of	the range is
5 ft.	2·9 miles	500 ft.	29·5 miles	4,000 ft.	83·3 miles
20 "	5·9 "	1,000 "	41·6 "	5,000 "	93·1 "
50 "	9·3 "	2,000 "	58·9 "	20,000 "	186·2 "
100 "	13·2 "	3,000 "	72·1 "		

THE ANTARCTIC

THE ANTARCTIC is generally defined as the area lying within the Antarctic Convergence—the zone where cold northward-flowing Antarctic sea water sinks below warmer southward-flowing water. This zone is at about lat. 50° S. in the Atlantic Ocean and lat. 55°–62° S. in the Pacific Ocean. The continent itself lies almost entirely within the Antarctic Circle, an area of about 5·5 million square miles, 99 per cent of which is permanently ice-covered. The average thickness of the ice is 7,100 ft. but in places exceeds 14,500 ft., submerging entire mountain ranges; some mountains protrude—the highest being Vinson Massif, 16,066 ft. The ice amounts to some 7·2 million cubic miles and represents more than 90 per cent of the world's fresh water.

Along one-third of the Antarctic coastline, land-ice flowing outwards forms extensive ice shelves, fragments of which break off to form tabular icebergs, leaving ice cliffs up to 150 ft. high. Much of the ~~■~~ freezes in winter, forming fast ice which breaks up in summer and drifts north as pack ice. The presence of ice and continuous darkness in winter restrict access to the coastline by sea to the summer months.

The most conspicuous physical features of the continent are its high inland plateau (much of it over 10,000 ft.), the Transantarctic Mountains (which together with the large embayments of the Weddell Sea and Ross Sea mark the approximate boundary between Greater and Lesser Antarctica), and the mountainous Antarctic Peninsula and off-lying islands (which extend northwards towards South America). The continental shelf averages about 20 miles in width (half the global mean, and in places it is non-existent) and reaches exceptional depths (1,300–2,600 ft., which is 3–6 times the global mean).

Climate.—On land, summer temperatures range from just below freezing around the coast to –34° C. (about –30° F.) on the plateau, and in winter –20° C. (about –4° F.) on the coast to –65° C. (about –85° F.) inland. Over ~~■~~ large area the maxima do not exceed –15° C. (+5° F.).

Precipitation is scanty over the plateau but amounts to 25–76 cms. (10–30 ins. water equivalent) along the coast and some scientific stations are permanently buried by snow. Some rain falls over the more northerly areas in summer. Gravity winds on the plateau slopes and cyclonic storms further north can both exceed 100 m.p.h. and gusts have been known to reach 150 m.p.h. Visibility can be reduced to zero in blizzards.

Flora and Fauna.—Although a small number of flowering plants, ferns and clubmosses occur on the sub-Antarctic islands, only two (a grass and a pearlwort) extend south of 60° S. Antarctic vegetation is dominated by lichens and mosses, with ~~■~~ few liverworts, algae, and fungi. Most of these occur around the coast or on islands, but lichens and some mosses also occur inland.

The only land animals are tiny insects and mites with nematodes, rotifers, and tardigrades in the mosses, but large numbers of seals, penguins, and other sea-birds go ashore to breed in the summer. The emperor penguin is the only species which breeds ashore throughout the winter. In contrast, the Antarctic seas abound with life—a wide variety of invertebrates (including krill) and fish providing food for the seals, penguins, and other birds and a residual population of whales.

Exploration and Antarctic Treaty.—In the 180 years from Captain James Cook's circumnavigation of the Antarctic in 1772–75 to the mid-1950's, about half of all expeditions to the Antarctic were British and ~~■~~ number of these made major contributions to geographical and scientific knowledge of the area. Notable were the expeditions of Sir James Clark Ross, Captain Robert Scott, and Sir Ernest Shackleton.

Apart from four years during World War II, British Antarctic research has been continuous since 1925, and most of it is now organized and carried out by the British Antarctic Survey (a component of the Natural Environment Research Council).

The world-wide International Geophysical Year, 1957–58, gave great impetus to Antarctic research. Prior to the mid-1950's, only 17 stations were operated in the Antarctic by four nations and vast areas of the continent were still unknown. By 1957, 44 stations had been established by 12 nations. The co-operative scientific effort proved so fruitful that the 12 nations involved pledged themselves to continue to promote scientific and technical co-operation unhampered by politics (territorial claims being left in abeyance) and agreed that the continent should be used for peaceful purposes only. These aims were embodied in the Antarctic Treaty (covering the area south of lat. 60° S., excluding the high seas but including the ice shelves), which came into force in 1961. It has since been signed by a further 25 acceding nations, 7 of which are active in the Antarctic and have therefore been accorded consultative status.

Potential resources.—Increasing pressure on the world's food and mineral supplies has stimulated the search for new sources even in the extremely hostile polar environment. Minerals have been found in great variety but not in commercially exploitable concentrations in accessible localities. (For example, coal seams occur in the Theron Mountains and Horlick Mountains.)

There are indications that off-shore hydrocarbons could be present but mostly below great depths of stormy, ice-infested seas. However, the Antarctic Treaty nations and their scientific advisors are already considering the environmental implications of possible mineral exploration and exploitation.

Currently, the chief interest is in marine protein, including the shrimp-like krill already fished commercially by Japan, Poland and U.S.S.R. Basic research to ensure rational management of stocks of this key organism is being continued by international groups, but it is estimated that they could sustain a yield equal to the present total annual world fish catch.

Scientific research.—At present, five British stations are maintained in the British Antarctic Territory and at South Georgia. Two are biological stations, two geophysical observatories, and one is the centre for airborne earth sciences.

There are a number of permanently occupied stations operated by other nations including one maintained at the South Pole by the U.S.A.

The staff of these stations and summer field-workers are the only people present on the continent and off-lying islands. There are no indigenous inhabitants. (British Antarctic Survey, see entry on p. 349).

THE UNITED KINGDOM

The United Kingdom comprises Great Britain (England, Wales and Scotland) and Northern Ireland.

AREA

Sq. miles	England	Wales	Scotland	N. Ireland	U.K.*
Land	50,070	7,968	29,761	5,206	93,005
Inland water	293	50	653	246	1,242
Total	50,363	8,018	30,414	5,452	94,247

* Excludes the Isle of Man (221 sq. miles) and the Channel Islands (75 sq. miles)

POPULATION

CENSUS RESULTS, 1801-1981

Before 1801 there existed no official return of the population of either England or Scotland. Estimates of the population of England at various periods, calculated from the number of baptisms, burials and marriages, are: in 1570, 4,160,221; 1600, 4,811,718; 1630, 5,600,517; 1670, 5,773,646; 1700, 6,045,008; 1750, 6,517,035.

NOTES.

- Because of the War there was no Census in 1941.
- The last official Census of Population in respect of England and Wales, Scotland, Northern Ireland, the Isle of Man and Guernsey, was taken on the night of April 5, 1981.
- † All figures refer to the area which is now Northern Ireland. Figures for N. Ireland in 1921 and 1931 are estimates based on the Censuses held in 1926 and 1937.

ISLANDS

The figures given above do not include islands of the British Seas. Populations of these islands at census years since 1900 were:-

	ISLE OF MAN			JERSEY			GUERNSEY

WELSH SOVEREIGNS AND PRINCES

WALES was ruled by Sovereign Princes from the 'earliest times' until the death of Llywelyn in 1282. The first English Prince of Wales was the son of Edward I, and was born in Caernarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who 'could not speak a word of English' and should be native born. This son, who afterwards became Edward II, was created 'Prince of Wales and Earl of Chester' at the famous Lincoln Parliament on February 7, 1301. The title Prince of Wales is borne after individual conferment and is not inherited at birth, though some Princes have been declared and styled Prince of Wales but never formally so created (s.). The title was conferred on Prince Charles by Her Majesty the Queen on July 26, 1958. He was invested at Caernarvon on July 1, 1969.

Independent Princes, A.D. 844 to 1282

Rhodri the Great	844-878
Anarawd, son of Rhodri	878-916

Extra Lady in Waiting, Mrs. Peter Wilmot-Sitwell.

HOUSEHOLD OF PRINCESS ALEXANDRA

Private Secretary and Extra Lady in Waiting, Miss Mona Mitchell, C.V.O.

Lady in Waiting, Lady Mary Mumford, C.V.O.

Extra Equerry, Maj. P. C. Clarke, C.V.O.

Extra Lady in Waiting, Mrs. Peter Afia.

HOUSEHOLD OF PRINCE AND PRINCESS MICHAEL OF KENT

Equerry, Lt.-Col. Sir Christopher Thompson, Bt.

Ladies in Waiting, The Hon. Mrs. Leatham; Miss Anne Frost.

THE QUEEN'S BIRTHDAY, 1990

The date for the observance of the Queen's Birthday in 1990 both at home and abroad will be Saturday, June 16.

ROYAL SALUTES

On the Anniversaries of the Birth, Accession and Coronation of the Sovereign and on the Anniversaries of the birth of H.M. the Queen Mother and H.R.H. the Duke of Edinburgh a salute of 62 guns is fired on the wharf at the Tower of London.

On extraordinary and triumphal occasions, such as on the occasion of the Sovereign opening, proroguing or dissolving Parliament in Person, or when passing through London in procession, except when otherwise ordered, 41 guns only are fired.

On the occasion of the birth of a Royal infant a salute of 41 guns is fired from the two Saluting Stations in London, i.e. Hyde Park and the Tower of London.

Constable of the Royal Palace and Fortress of London, Field Marshal Sir Roland Gibbs, G.C.B., C.B.E., D.S.O., M.C.

Lieutenant of the Tower of London, Lt.-Gen. Sir Derek Boorman, K.C.B.

Resident Governor and Keeper of the Jewel House, Maj.-Gen. C. Tyler, C.B.

Master Gunner of St. James's Park, Gen. Sir Martin Farndale, K.C.B.

Master Gunner within the Tower, Col. M. Ring.

THE ROYAL ARMS

QUARTERLY.—1st and 4th *gules*, three lions passant guardant in pale *or* (*England*); 2nd *or*, a lion rampant within a double tressure flory counter-flory *gules* (*Scotland*); 3rd *azure*, a harp *or*, stringed *argent* (*Ireland*); the whole encircled with the Garter.

SUPPORTERS.—*Dexter*: a lion rampant guardant *or*, imperially crowned. *Sinister*: a unicorn *argent*, armed crined and unguled *or*, gorged with a coronet composed of crosses pâtiées and fleurs de lis, a chain affixed passing between the forelegs and reflexed over the back.

BADGES.—The red and white rose united (*England*), a thistle (*Scotland*); a harp *or*, the strings *argent*, with a shamrock leaf *vert* (*Ireland*); upon a mount *vert*, a dragon passant wings elevated *gules* (*Wales*).

THE UNION FLAG

The national flag of the United Kingdom is the Union Flag, generally known as the Union Jack, the name deriving from the use of the Union Flag on the jack-staff of naval vessels. It is a combination of the cross of the patron saint of England, St. George (*cross gules in a field argent*), the cross of the patron saint of Scotland, St. Andrew (*saltire argent in a field azure*) and a cross similar to that of St. Patrick, patron saint of Ireland (*saltire gules in a field argent*). The Union Flag was first introduced in 1606 after the union of England and Scotland, the cross of St. Patrick being added in 1801.

ANNUITIES TO THE ROYAL FAMILY

The annuity payable to Her Majesty is known as the Civil List, and is payable out of the Consolidated Fund under the authority of a Civil List Act following the recommendation of a Parliamentary Select Committee.

The allocation for the calendar year 1989 was as follows:—

The Queen	£4,658,000
Queen Elizabeth The Queen Mother	404,000
The Duke of Edinburgh	225,300
Duke of York	155,400
Prince Edward	20,000
The Princess Royal	140,400
The Princess Margaret	136,700
Princess Alice, Duchess of Gloucester	55,400
*Duke of Gloucester	110,000
*Duke of Kent	148,500
*Princess Alexandra	141,600
	6,195,300
*Refunded by The Queen	400,100
Total	5,795,200

The land revenues of the Crown in England and Wales have been collected on the public account since 1760, when George III surrendered them and received a fixed annual payment or Civil List. For details of income from the Crown Estate, see page 307.

THE FLYING OF FLAGS

Days for hoisting the Union Flag on Government Buildings (from 8 a.m. to sunset).

February 6 (1952).—Her Majesty's Accession.

February 19 (1960).—Birthday of The Duke of York.

March 1.—St. David's Day (in Wales only).

March 10 (1964).—Birthday of The Prince Edward.

March 12.—Commonwealth Day 1990.

April 21 (1926).—Birthday of Her Majesty The Queen.

April 23.—St. George's Day (in England only). Where a building has two or more flagstaffs the Cross of St. George may be flown in addition to the Union Jack but not in a superior position.

June 2 (1953).—Coronation Day.

June 10 (1921).—Birthday of The Duke of Edinburgh.

June 16.—Queen's Official Birthday, 1990.

July 1 (1961).—Birthday of The Princess of Wales.

Aug. 4 (1900).—Birthday of Her Majesty Queen Elizabeth the Queen Mother.

Aug. 15 (1950).—Birthday of The Princess Royal.

Aug. 21 (1930).—Birthday of The Princess Margaret.

Nov. 11.—Remembrance Sunday, 1990.

Nov. 14 (1948).—Birthday of The Prince of Wales.

Nov. 20 (1947).—Her Majesty's Wedding Day.

Nov. 30.—St. Andrew's Day (in Scotland only). And on the occasion of the opening and closing of Parliament by the Queen, flags should be flown on Government buildings in the Greater London area, whether or not Her Majesty performs the ceremony in person.

The only additions to the above list will be those notified to the Department of the Environment by Her Majesty's command and communicated by the Ministry to the other Departments. The list applies

to all Government Buildings in London and elsewhere in the United Kingdom. In cases where it has been the practice to fly the Union Flag daily, e.g. on some Custom Houses, that practice may continue.

Flags will be flown at half-mast on the following occasions:

(a) From the announcement of the death up to the funeral of the Sovereign, except on Proclamation Day, when they are hoisted right up from 11 A.M. to sunset.

(b) The funerals of members of the Royal Family, subject to special commands from Her Majesty in each case.

(c) The funerals of Foreign Rulers, subject to special commands from Her Majesty in each case.

(d) The funerals of Prime Ministers and ex-Prime Ministers of the United Kingdom.

(e) Other occasions by special command of Her Majesty.

On occasions when days for flying flags coincide with days for flying flags at half mast the following rules will be observed. Flags will be flown:

(a) although a member of the Royal Family, or a near relative of the Royal Family, may be lying dead, unless special commands be received from Her Majesty to the contrary, and (b) although it may be the day of the funeral of a Foreign Ruler. If the body of a very distinguished subject is lying at a Government Office the flag may fly at half mast on that office until the body has left (provided it is a day on which the flag would fly) and then the flag is to be hoisted right up. On all other Government Buildings the flag will fly as usual.

The *Royal Standard* is only to be hoisted when the Queen is actually present in the building, and never when Her Majesty is passing in procession.

RED-LETTER DAYS

Scarlet Robes are worn by the Judges of the Queen's Bench Division on *Red-Letter Days*.

RED-LETTER DAYS AND STATE OCCASIONS, 1990.

Jan. 25. Conversion of St. Paul.

Feb. 2. Purification.

6. Queen's Accession.

28. Ash Wednesday.

Mar. 1. St. David.

25. Annunciation.

Apr. 21. Queen's Birthday.

25. St. Mark.

May 1. St. Philip and St. James.

14. St. Matthias.

May 24. Ascension Day.

June 2. Coronation Day.

10. Birthday of The Duke of Edinburgh.

11. St. Barnabas.

16. Queen's Official Birthday

(1990).

24. St. John the Baptist.

29. St. Peter.

3. St. Thomas.

July 25. St. James.

Aug. 4. Birthday of Queen Elizabeth the Queen Mother.

Oct. 18. St. Luke.

28. St. Simon and St. Jude.

Nov. 1. All Saints.

10. Lord Mayor's Day.

14. Birthday of The Prince of Wales.

30. St. Andrew.

THE MILITARY KNIGHTS OF WINDSOR

Founded in 1348 after the Wars in France to assist English Knights, who, having been prisoners in the hands of the French, had become impoverished by the payments of heavy ransoms. They received a pension and quarters in Windsor Castle. Edward III founded the Order of the Garter later in the same year, incorporating the Knights of Windsor and the College of St. George into its foundation and raising the number of Knights to 26 to correspond with the number of the Knights of the Garter. Known later as the Alms Knights or Poor Knights of Windsor, their establishment was reduced under the will of King Henry VIII to 13 and Statutes were drawn up by Queen Elizabeth I.

In 1833 King William IV changed their designation to The Military Knights and granted them their present uniform which consists of a scarlet tail-coat with white cross sword-belt, crimson sash and cocked hat with plume. The badges are the Shield of St. George and the Star of the Order of the Garter. The Knights receive a small stipend in addition to their Army pensions and quarters in Windsor Castle. They take part in all ceremonies of the Noble Order of the Garter and attend Sunday morning service in St. George's Chapel as representatives of the Knights of the Garter.

Applications for appointment should be made to The Military Secretary, Ministry of Defence, Army Dept.

Governor, Maj.-Gen. Peter Downward, C.B., D.S.O., D.F.C.

Military Knights, Maj. H. Smith, M.B.E., R.V.M.; Maj. A. E. Wollaston, M.V.O.; Brig. A. L. Atkinson, O.B.E.; Brig.

J. F. Lindner, O.B.E., M.C.; Brig. A. C. Tyler, C.B.E., M.C.; Maj. W. L. Thompson, M.V.O., M.B.E., D.C.M.; Maj. L. W.

Dickerson; Maj. J. C. Cowley, D.C.M.; Lt.-Col. N. L. West; Maj. G. R. Mitchell; M.B.E., B.E.M.; Lt.-Col. R. L. C.

Tamplin.

Supernumerary, Lt.-Col. A. R. Clark, M.C.

THE PEERAGE

The rules which govern the creation and succession of Peerages are extremely complicated. There are, technically, five separate Peerages, the Peerage of England, of Scotland, of Ireland, of Great Britain, and of the United Kingdom. The Peerage of Great Britain dates from 1707 when an Act of Union combined the two Kingdoms of England and Scotland and separate Peerages were discontinued; and the Peerage of the United Kingdom from 1801 when Great Britain and Ireland were combined under an Act of Union. Some Scottish Peers have received additional Peerages of Great Britain or of the United Kingdom since 1707, and some Irish Peers additional Peerages of the United Kingdom since 1801. The Peerage of Ireland was not entirely discontinued from 1801 but holders of Irish Peerages, whether pre-dating or created subsequent to the Union of 1801, are not entitled to sit in the House of Lords if they have no additional English, Scottish, Great Britain or United Kingdom Peerage. (However, they are eligible for election to the House of Commons and to vote in Parliamentary elections, which other Peers are not.) An Irish Peer holding ■ Peerage of ■ lower grade which enables him to sit in the House of Lords is introduced there by the title which enables him to sit, though for all other purposes he is known by his higher title. In the Peerage of Scotland there is no rank of Baron; the equivalent rank is Lord of Parliament, abbreviated to 'Lord' (the female equivalent is 'Lady'). All Peers of England, Scotland, Great Britain or the United Kingdom who are of full age (21 years) and of British nationality are entitled to sit in the House of Lords. Most hereditary peerages pass on death to the nearest male heir; but certain ancient Peerages pass on death to the nearest heir, male or female, and several are held by women (see also pp. 176-7). Since the Peerage Act, 1963, women Peers in their own Right have been entitled to sit in the House of Lords, subject to the same qualifications as men.

Non-hereditary or Life Peerages, in the degree of Baron or Baroness, have been conferred by the Crown since 1876 on eminent judges, the Lords of Appeal or Law Lords, to enable them to carry out the judicial

functions of the House of Lords, and since 1958 on men and women of distinction in public life, giving them seats in the House of Lords. Life Peers are addressed identically as an hereditary Peer, and their children have the same courtesy style as the children of an hereditary Peer.

No fees for Dignities have been payable since 1937. The House of Lords surrendered the ancient right of Peers to be tried for treason or felony by their peers in 1948.

Peerages Extinct Since the Last Issue

DUKEDOMS.—Newcastle (*cr. 1756*).

BARONIES.—Ailwyn (*cr. 1921*).

LIFE PEERAGES.—See p. 182.

Disclaimer of Peerages

The Peerage Act, 1963, enables Peers to disclaim their Peerages for life. Peers alive in 1963 could disclaim within 12 months after the passing of the Act (July 31, 1963); a person subsequently succeeding to a Peerage may disclaim within 12 months (one month if an M.P.) after the date of succession, or of attaining his or her majority, if later. The disclaimer is irrevocable but does not affect the descent of the Peerage after the claimant's death, and children of a disclaimed Peer may, if they wish, retain their precedence and any courtesy titles and styles borne as children of ■ Peer.

EARLS: Durham (1970); Home (1963); Sandwich (1964).

VISCOUNTS: Hailsham (1963); Stansgate (1963).

BARONS: Altringham (1963); Archibald (1975); Merthyr (1977); Reith (1972); Sanderson of Ayot (1971); Silkin (1972); Southampton (1964).

Peers Who Are Minors

VISCOUNTS: Dillon (*b. 1973*).

BARONS: Gretton (*b. 1975*).

COMPOSITION OF THE HOUSE OF LORDS (At Aug. 31, 1989)

Archbishops and Bishops.....	26
Peers by Succession	763 (20 women)
Hereditary Peers of first creation (including the Prince of Wales)	21
Life Peers under the Appellate Jurisdiction Act 1876	21
Life Peers under the Life Peerages Act 1958	353 (45 women)
TOTAL.....	1184
Of whom:	
Peers without Writs of Summons	95
Peers on Leave of Absence from the House	152

Contractions and Symbols.—S. or I. appended to the date of creation denotes ■ *Scottish* or *Irish* title, the further addition of ■ * implies that the Peer in question holds also an *Imperial* title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the imperial creation. The mark ° signifies that there is no 'of' in the Marquessate or Earldom so designated; b. signifies born; s., succeeded; m., married; w., widower or widow; M., minor; † Information on *Eldest Son* or *Heir* not ascertained at time of going to press.

WOMEN PEERS IN THEIR OWN RIGHT

Peerages falling under this heading are the result of regular inheritance in lines which are open to females in default of males. A Peeress in her Own Right retains her title after marriage, and if her husband's rank is the superior she is designated by the two titles jointly, the inferior one last: her hereditary claim still holds good in spite of any marriage whether higher or lower. No rank held by a woman can confer any title or even precedence upon her husband but the rank of a woman Peer in her Own Right is inherited by her eldest son (or perhaps daughter), to whomsoever she may have been married.
Where marked 'the 'o' is not used.

COUNTESSES IN THEIR OWN RIGHT

Style, The Countess of — Addressed as, My Lady.

<i>Created.</i>	<i>Title, Name, etc.</i>	<i>Eldest Son or Heir.</i>
1643 s.	<i>Dysart</i> (11th in line), Rosamund Agnes Greaves, b. 1914, s. 1975.	Lady Katherine Grant of Rothiemurchus, b. 1918.

LIFE PEERAGES EXTINCT SINCE LAST ISSUE.—Cooper of Stockton Heath (cr. 1966); Roberthall (cr. 1969); Wade (cr. 1964); Lee of Ashridge (cr. 1970); Basnett (cr. 1987); Fraser of Tullybelton (cr. 1975); Chelwood (cr. 1974); Kahn (cr. 1965); Gaitskill (cr. 1963); Olivier (cr. 1970); Bowden (cr. 1963); Cross of Chelsea (cr. 1971); Hill of Luton (cr. 1963).

COURTESY TITLES

Holders of Courtesy Titles are addressed in the same manner as holders of substantive titles.

From this list it will be seen that, for example, the Marquess of Blandford is heir to the Dukedom of Marlborough, and Viscount Althorp to the Earldom of Spencer. Titles of second heirs are also given, and the Courtesy Title of the father of a second heir is indicated by *; e.g., Earl of Burlington, eldest son of *Marquess of Hartington.

Marquesses	Amberley— <i>Russell, E.</i>	Kingsborough— <i>Kingston, E.</i>	Balgonia— <i>Leven & Melville, E.</i>
Blandford— <i>Marlborough, D.</i>	Andover— <i>Suffolk and Berkshire, E.</i>	Knebworth— <i>Lytton, E.</i>	Balnial— <i>Crawford and Balcarres, E.</i>

THE PREFIX RIGHT HONOURABLE

By established custom, members of the Privy Council are entitled to the style 'The Right Honourable', usually abbreviated to The Right (or Rt.) Hon. All Cabinet Ministers must be members of the Privy Council. The Archbishops of Canterbury and York, the Bishop of London, the Lord Chancellor and the Lords Justices of Appeal are admitted to the Privy Council upon their appointment to office.

In the case of Privy Counsellors who are peers the prefix The Right Honourable may be absorbed in the prefix of a higher dignity (e.g. His Royal Highness, His Grace, or Most Honourable). The style of peers below the rank of Marquess is 'Right Honourable' whether or not they are Privy Counsellors. Because it is not apparent from the use of ■ prefix whether ■ peer is a Privy Counsellor, it is common practice to add the initials P.C. after their name. In any other circumstances it is incorrect to use the initials P.C. after a person's name. (If used, the letters P.C. follow all honours and decorations awarded by the Crown.)

ORDERS OF CHIVALRY

The Most Noble Order of the Garter (1348)—K.G.

Ribbon, Garter Blue. Motto, Honi soit qui mal y pense (Shame on him who thinks evil of it). The number of Knights Companions is limited to 24.

Rice, C.V.O., C.B.E.; Chancery, Central Chancery of the Orders of Knighthood, St. James's Palace, SW1A 1BH.—G.C.B., Knight (or Dame) Grand Cross; K.C.B., Knight Commander; D.C.B., Dame Commander; C.B., Companion. Women became eligible for the Order from Jan. 1, 1971.

O.M. Mil.

This Order is designed as a special distinction for eminent men and women without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is denoted by the suffix O.M., which follows the first class of the Order of the Bath and precedes the letters designating membership of the inferior classes of the Bath and all classes of the lesser Orders of Knighthood.

O.M. Civ.

**BARONETS, KNIGHTS GRAND CROSS, KNIGHTS GRAND COMMANDERS,
KNIGHTS COMMANDERS AND
KNIGHTS BACHELOR**

Badge of Baronets
of England, Great Britain, U.K.,
(and Ireland marked i.).

Badge of Baronets
of Scotland or Nova Scotia
(marked s. or n.s.).

NOTES CONCERNING BARONETS

Clause II of the Royal Warrant of February 8, 1910, ordains as follows:—"That no person whose name is not entered upon the Official Roll shall be received as a Baronet, or shall be addressed or mentioned by that title in any Civil or Military Commission, Letters Patent or other official document."

Baronets are addressed ■ Sir (with Christian name) and in writing ■ Sir Robert A—, Bt. Baronet's wives are addressed (formally) as Your Ladyship or Lady A—, without any Christian name unless ■ daughter of a Duke, Marquess or Earl, in which case The Lady Mary A—; if daughter of ■ Viscount or Baron The Hon. Lady A—.

NOTES CONCERNING KNIGHTS GRAND CROSS, ETC.

Knights Grand Cross, Knights Grand Commanders and Knights Commanders are addressed in the same manner as Baronets (*q.v.*), but in writing the appropriate initials (G.C.B., K.C.B., etc.) are appended to surname after Bt. if they are also baronets or in place of 'Bt.' if they are not. Knights Bachelor are addressed as Sir — (first or Christian name) and in writing as Sir — B —. The wife of ■ Knight Grand Cross, Knight Grand Commander, Knight Commander or Knight Bachelor is addressed as stated for the wife of ■ Baronet.

NOTES CONCERNING KNIGHTS BACHELOR

The Knights Bachelor do not constitute ■ Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I in the 17th century, lapsed, and in 1908 ■ voluntary Association under the title of The Society of Knights (now The Imperial Society of Knights Bachelor by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight Bachelor. In 1926 ■ design for a badge to be worn by Knights Bachelor was approved and adopted, ■ miniature reproduction being shown above; in 1974 a neck badge and miniature were added. The Officers of the Society are:—*Knight Principal*, Sir Colin Cole, K.C.V.O., T.D.; *Chairman of Council*, Sir David Napley; *Prelate*, Rt. Rev. and Rt. Hon. The Bishop of London; *Hon. Registrar*, Sir Roger Falk, O.B.E.; *Hon. Treasurer*, Sir Peter Lane; *Clerk to the Council*, R. M. Esden; *Deputy Clerk*, Lt. Col. G. H. H. Coles; *Office*, 21 Old Buildings, Lincoln's Inn, WC2A 3UJ.

BARONETAGE AND KNIGHTAGE

(Revised to Aug. 31, 1989)

Peers are not included in this list

When an obelisk (†) precedes ■ name it indicates that, at the time of going to press, the Baronet concerned has not been registered on the Official Roll of the Baronetage. The date of creation of the Baronetcy ■ given in parenthesis ().

A full entry in italic type indicates that the recipient of a Knighthood died during the year in which the honour was conferred. The name is included for purposes of record.

Dames Grand Cross and Dames Commanders of the Order of the Bath, the Order of St. Michael and St. George, the Royal Victorian Order and the Order of the British Empire

NOTE.—Dames Grand Cross (G.C.B., G.C.M.G., G.C.V.O. or G.B.E.) and Dames Commanders (D.C.B., D.C.M.G., D.C.V.O. or D.B.E.) are addressed in a manner similar to that of Knights Grand Cross or Knights Commanders, e.g. Miss Florence Smith after receiving the honour would be addressed as Dame Florence, and in writing as Dame Florence Smith, G. (or D.) C.B., G. (or D.) C.M.G., G. (or D.) C.V.O., OR G. (or D.) B.E. Where such award is made to a lady already in enjoyment of a higher title the appropriate letters are appended to her name, e.g. The Countess of — G.C.V.O. Women Peers in their own right, and Life Peers, are not included in this list. Dames Grand Cross rank after wives of Baronets and before wives of Knights Grand Cross. Dames Commanders rank after the wives of Knights Grand Cross and before the wives of Knights Commanders.

DAMES GRAND CROSS AND DAMES COMMANDERS

THE VICTORIA CROSS, V.C.

FOR CONSPICUOUS BRAVERY

The ribbon is Crimson for all Services (until 1918 it was Blue for Royal Navy).

Instituted on January 29, 1856, the Victoria Cross was awarded retrospectively to 1854, the first being held by Lt. C. D. Lucas, R.N. for bravery in the Baltic Sea on June 21, 1854 (gazetted Feb. 24, 1857). The first 62 Crosses were presented by Queen Victoria in Hyde Park, London, on June 26, 1857.

The v.c. is worn before all other decorations, on the left breast, and consists of a cross-pattée of bronze, 1½ inches in diameter, with the Royal Crown surmounted by a lion in the centre, and beneath there is the inscription 'For Valour'. Holders of the v.c. receive a tax-free annuity of £100, irrespective of need or other conditions. In 1911, the right to receive the Cross was extended to Indian soldiers, and in 1920 a Royal Warrant extended the right to Matrons, Sisters and Nurses, and the staff of the Nursing Services and other services pertaining to hospitals and nursing, and to civilians of either sex regularly or temporarily under the orders, direction or supervision of the Naval, Military, or Air Forces of the Crown.

Surviving Recipients of the Victoria Cross (as at Aug. 31, 1989)

THE GEORGE CROSS, G.C. (1940)

FOR GALLANTRY

The ribbon is *Dark Blue* threaded through a bar adorned with laurel leaves.
INSTITUTED September, 24th, 1940 (with amendments, November 3rd, 1942).

The George Cross is worn before all other decorations (except the v.c.) on the left breast § and consists of a plain silver cross with four equal limbs, the cross having in the centre a circular medallion bearing a design showing St. George and the Dragon. The inscription 'For Gallantry' appears round the medallion and in the angle of each limb of the cross is the Royal cypher 'G VI' forming a circle concentric with the medallion. The reverse is plain and bears the name of the recipient and the date of the award. The cross is suspended by a ring from a bar adorned with laurel leaves on dark blue ribbon 1½ inches wide.

The cross is intended primarily for civilians and awards to the fighting services are confined to actions for which purely military honours are not normally granted. It is awarded only for acts of the greatest heroism or of the most conspicuous courage in circumstances of extreme danger. From April 1, 1965, holders of the Cross have received a tax-free annuity of £100.

§ When worn by a woman it may be worn on the left shoulder from a ribbon of the same width and colour fashioned into a bow.

Empire Gallantry Medal.—The Royal Warrant which ordained that the grant of the Empire Gallantry Medal should cease authorized holders of that medal to return it to the Central Chancery of the Orders of Knighthood and to receive in exchange the George Cross. A similar provision applied to posthumous awards of the Empire Gallantry Medal made after the outbreak of war in 1939.

In October 1971 all surviving holders of the Albert Medal and the Edward Medal exchanged those decorations for the George Cross.

THE ORDER OF ST. JOHN

The Most Venerable Order of the Hospital of St. John of Jerusalem

St. John's Gate, Clerkenwell, EC1M 4DA

Grand Prior, H.R.H. The Duke of Gloucester, G.C.V.O.

THE PRIVY COUNCIL

Apart from Cabinet Ministers, who must be Privy Counsellors and are sworn in on first assuming office, membership of the Council (retained for life) is accorded by the Sovereign on the recommendation of the Prime Minister to eminent people in independent monarchical countries of the Commonwealth.

THE UNITED KINGDOM CONSTITUTION

The United Kingdom constitution is not contained in any single document but has evolved in the course of time, formed partly by statute, partly by common law and partly by convention. A constitutional monarchy, the United Kingdom is governed by Ministers of the Crown in the name of the Sovereign, who is head both of the state and the government.

The organs of government are the *legislature* (Parliament), the *executive* and the *judiciary*. The executive consists of Her Majesty's Government (Cabinet and other Ministers), government departments (see pp. 293-375), local authorities (see Index), and public corporations operating nationalized industries or social or cultural services (see pp. 293-375). The judiciary, i.e. judges, pronounce on the law, both written and unwritten, interpret statutes and are responsible for the enforcement of the law; the judiciary is independent of both the legislature and the executive (see Law Courts and Offices).

THE MONARCHY

The Sovereign personifies the state and is, in law, an integral part of the legislature, head of the executive, head of the judiciary, the Commander-in-Chief of all armed forces of the Crown and the 'Supreme Governor' of the Church of England. The seat of the monarchy is in the United Kingdom. In the Channel Islands and the Isle of Man, which are Crown dependencies, the Sovereign is represented by a Lieutenant-Governor; in the member states of the Commonwealth of which the Sovereign is head of state, her representative is a Governor-General (see also p. 625); in United Kingdom dependencies the Sovereign is usually represented by a Governor, who is responsible to the British Government.

Although the powers of the monarchy are now very limited, restricted mainly to the advisory and ceremonial, there are important acts of government which require the participation of the Sovereign. These include summoning, proroguing and dissolving Parliament, giving Royal Assent to Bills passed by Parliament, appointing important office-holders, e.g. government ministers, judges, bishops, and governors, conferring peerages, knighthoods and other honours, and granting pardon to a person wrongly convicted of a crime. An important function is appointing a Prime Minister, by convention the leader of the political party which enjoys, or can secure, a majority of votes in the House of Commons. In international affairs the Sovereign as head of State has the power to declare war and make peace, to recognize foreign states and governments, to conclude treaties and to annex or cede territory. However, the Sovereign entrusts executive power to Ministers of the Crown and acts on the advice of her Ministers, which she cannot ignore, in practice royal prerogative powers are exercised by Ministers, who are responsible to Parliament.

Ministerial responsibility does not diminish the Sovereign's importance to the smooth working of government. She holds meetings of the Privy Council, gives audiences to her Ministers and other officials at home and overseas, receives accounts of Cabinet decisions, reads dispatches and signs state papers; she must be informed and consulted on every aspect of national life; and she must show complete impartiality.

In the event of the Sovereign's absence abroad, it is necessary to appoint *Councillors of State* under Letters Patent to carry out the chief functions of the Monarch, including the holding of Privy Councils and giving Royal Assent to Acts passed by Parliament. The normal procedure is to appoint as Councillors three or four members of the Royal Family

among those remaining in the United Kingdom. In the event of the Sovereign on accession being under the age of eighteen years, or at any time unavailable or incapacitated by infirmity of mind or body for the performance of the royal functions, provision is made for a Regency.

THE PRIVY COUNCIL

The Sovereign in Council, or Privy Council, was the chief source of executive power until the system of Cabinet government developed. Now its main function is to advise the Sovereign to approve Orders in Council and to advise on the issue of royal proclamations. The Council's own statutory responsibilities (independent of the powers of the Sovereign in Council) include powers of supervision over the registering bodies for the medical and allied professions. A full Council is summoned only on the death of the Sovereign or when the Sovereign announces his or her intention to marry (for full list of Councillors, see pp. 229-30).

There are a number of advisory Privy Council committees, whose meetings the Sovereign does not attend. Some are prerogative committees, such as those dealing with legislative matters submitted by the legislatures of the Channel Islands and the Isle of Man or with applications for charters of incorporation; and some are provided for by statute, e.g. those for the universities of Oxford and Cambridge and the Scottish universities.

The Judicial Committee of the Privy Council is the final court of appeal from courts of the United Kingdom dependencies, courts of independent Commonwealth countries which have retained the right of appeal, courts of the Channel Islands and the Isle of Man, some professional and disciplinary committees, and church sources. The Committee is composed of all Privy Councillors who hold, or have held, high judicial office, although usually only three or five hear each case.

Administrative work is carried out by the Privy Council Office under the direction of the Lord President of the Council, a Cabinet Minister.

PARLIAMENT

Parliament is the supreme law-making authority and can legislate for the United Kingdom as a whole or for any parts of it separately (the Channel Islands and the Isle of Man are Crown dependencies and not part of the United Kingdom). The main functions of Parliament are to pass laws, to provide (by voting taxation) the means of carrying on the work of government and to scrutinize government policy and administration, particularly proposals for expenditure. International treaties and agreements are by custom presented to Parliament before ratification.

Parliament emerged during the late thirteenth and early fourteenth centuries. The nucleus of early Parliaments were the officers of the King's household and the King's judges, joined by such ecclesiastical and lay magnates as the King might summon to form a prototype "House of Lords", and occasionally by the knights of the shires, burgesses and proctors of the lower clergy. By the end of Edward III's reign a "House of Commons" was beginning to appear: the first known Speaker was elected in 1377.

Parliamentary procedure is based on custom and precedent, partly formulated in the Standing Orders of both Houses (see p. 237), and each House has the right to control its own internal proceedings and to commit for contempt. The system of debate in the

two Houses is similar; when a motion has been moved, the Speaker proposes the question as the subject of debate. Members speak from wherever they have been sitting. Questions are decided by a vote on a simple majority. Draft legislation is introduced, in either House, as a Bill. Bills can be introduced by a Government Minister or a private Member, but in practice the majority of Bills which become law are introduced by the Government. To become law, a Bill must be passed by each House (for parliamentary stages, see Bill, p. 235) and then sent to the Sovereign for the Royal Assent, after which it becomes an Act of Parliament.

Proceedings of both Houses are public, except on extremely rare occasions. The minutes (called Votes and Proceedings in the Commons, and Minutes of Proceedings in the Lords) and the speeches (The Official Report of Parliamentary Debates, *Hansard*) are published daily. Proceedings are also recorded for sound transmission on radio and television and preserved by the Parliamentary Sound Archive. Since January 1985, the House of Lords has allowed television cameras into its debates and Select Committees: the House of Commons is considering an experiment in televising its proceedings.

By the Parliament Act of 1911, the maximum duration of a Parliament is five years, if not previously dissolved, the term being reckoned from the date given on the writs for the new Parliament. The maximum life has been prolonged by legislation in such rare circumstances as the two world wars (Jan. 31, 1911–Nov. 25, 1918; Nov. 26, 1935–June 15, 1945). Dissolution and writs for a general election are ordered by the Queen on the advice of the Prime Minister. The life of a Parliament is divided into sessions, usually of one year in length, beginning and ending most often in October or November.

THE HOUSE OF LORDS

The House of Lords consists of the Lords Spiritual and Temporal. The Lords Spiritual are the Archbishops of Canterbury and York, the Bishops of London, Durham and Winchester, and the 21 senior diocesan Bishops of the Church of England. The Lords Temporal consist of all hereditary Peers and Peeresses of England, Scotland, Great Britain and the United Kingdom who have not disclaimed their Peerages, Life Peers and Peeresses created under the Life Peerages Act 1958, and those Lords of Appeal in

Ordinary created Life Peers under the Appellate Jurisdiction Act 1876, as amended (Law Lords). Disclaimants of an hereditary Peerage lose their right to sit in the House of Lords but gain the right to vote at Parliamentary elections and to offer themselves for election to the House of Commons. (See also p. 156.) Peers who do not wish to attend sittings of the House of Lords may apply for leave of absence for the duration of a Parliament.

Until the beginning of this century the House of Lords had considerable power, being able to veto any Bill submitted to it by the House of Commons, but those powers were greatly reduced by the Parliament Act of 1911 and subsequently by the Parliament Act of 1949 (see Parliament Acts 1911 and 1949, p. 236).

Combined with its legislative role, the House of Lords has judicial powers as the ultimate Court of Appeal for Courts in Great Britain and Northern Ireland, except for criminal cases in Scotland. These powers are exercised by the Lord Chancellor and the Law Lords.

Members of the House of Lords are unpaid. However, they are entitled to reimbursement of travelling expenses on parliamentary business within the U.K. and certain other expenses incurred for the purpose of attendance at sittings of the House, within a maximum for each day of £60.00 for overnight subsistence, £23.00 for day subsistence and incidental travel, and £23.00 for secretarial costs, postage and certain additional expenses.

The House is presided over by the Lord Chancellor, who is *ex officio* Speaker of the House. A panel of deputy Speakers is appointed by Royal Commission. The first deputy Speaker is the Chairman of Committees, appointed at the beginning of each session, a salaried officer of the House who takes the chair in Committee of the whole House and in some Select Committees. He is assisted by a panel of Deputy Chairmen, headed by the salaried Principal Deputy Chairman of Committees, who is also Chairman of the European Communities Committee of the House. The permanent officers include the Clerk of the Parliaments, who is in charge of the administrative staff collectively known as the Parliament Office; the Gentleman Usher of the Black Rod, who is also Serjeant-at-Arms in attendance upon the Lord Chancellor and is responsible for security and for accommodation and services in the House of Lords; and the Yeoman Usher who is Deputy Serjeant-at-Arms and assists Black Rod in his duties.

OFFICERS OF THE HOUSE OF LORDS

<i>Speaker</i> , The Rt. Hon. the Lord Mackay of Clashfern	£12,810
<i>Private Secretary</i> , J. P. Stockton	
<i>Chairman of Committees</i> , The Rt. Hon. the Lord Aberdare, K.B.E.	£37,047

<i>Counsel to Chairman of Committees</i> , D. Rippengal, C.B., Q.C.	£48,100–£59,800
<i>Second Counsel</i> , Mrs. E. Denza, C.M.G.	£39,600–£49,600
<i>Assistant Counsel</i> , N. J. Adamson, C.B., Q.C.	£32,175–£35,845
<i>Principal Clerks</i> , J. A. Vallance White (<i>Judicial Office and Fourth Clerk at the Table</i>); M. G. Powall (<i>Private Bill and Overseas Offices</i>); P. D. G. Hayter (<i>Committees</i>)	£35,845–£49,600
<i>Chief Clerks</i> , C. A. J. Mitchell; B. P. Keith; R. H. Walters, D.Phil.; D. R. Beamish; Mrs. F. M. Martin	£29,920–£38,536
<i>Senior Clerks</i> , D. F. Slater (<i>Seconded as Secretary to the Leader of the House and Chief Whip</i>); Dr. F. P. Tudor; E. C. Ollard; Miss M. E. De Groot; A. Makower	£19,110–£28,708
<i>Clerk of the Records</i> , H. S. Cobb, F.S.A.	£29,920–£38,536
<i>Deputy Clerk of the Records</i> , D. J. Johnson, F.S.A.	£23,383–£34,576
<i>Assistant Clerks of the Records</i> , J. C. Morgan (<i>Sound Archives</i>); S. K. Ellison	£19,110–£28,708
<i>Accountant</i> , C. Preece	£19,110–£34,576

Assistant Accountant, Miss J. M.

Lansdown	£16,299-£20,323
Judicial Taxing Clerk, C. G. Osborne	£16,299-£20,323
Librarian, R. H. V. C. Morgan	£29,920-£38,536
Deputy Librarian, D. L. Jones	£23,383-£34,576
Library Clerks, P. G. Davis, ph.d.; Miss I. L. Victory, ph.d.	£19,110-£28,708
Examiners of Petitions for Private Bills, M. G. Pownall; R. J. Willoughby.	
Gentleman Usher of the Black Rod and Serjeant-at-Arms, Air Chief Marshal Sir John Gingell, G.B.E., K.C.B.	£39,600-£49,600
Yeoman Usher of the Black Rod and Deputy Serjeant-at-Arms, Air Cdre. A. C. Curry, O.B.E.	£19,110-£28,708
Staff Superintendent, Maj. F. P. Horsfall, M.B.E.	
Shorthand Writer, Mrs. E. M. C. Holland	fees
Editor, Official Report (<i>Hansard</i>), Mrs. M. E. Villiers	£28,230-£36,329
Deputy do., G. R. Goodbarne	£21,220-£31,293

THE HOUSE OF COMMONS

The Members of the House of Commons are elected by universal adult suffrage. For electoral purposes, the United Kingdom is divided into constituencies, each of which returns one Member to the House of Commons, the Member being the candidate who obtains the largest number of votes cast in the constituency. To ensure equitable representation the four Boundary Commissions keep constituency boundaries under review and recommend any redistribution of seats which may seem necessary due to population movements, etc. The number of seats was raised to 640 in 1945, then reduced to 625 in 1948, and subsequently rose to 630 in 1955, 635 in 1970 and 650 in 1983. Of the present 650 seats there are 523 for England, 38 for Wales, 72 for Scotland and 17 for Northern Ireland. Elections are by secret ballot, each elector casting one vote: voting is not compulsory. When a seat becomes vacant between General Elections, a by-election is held.

British subjects and citizens of the Irish Republic can stand for election as Members of Parliament (M.P.s) provided they are 21 or over and not subject to disqualification. Those disqualified from sitting in the House include undischarged bankrupts, people sentenced to more than one year's imprisonment, clergy of the Church of England, Church of Scotland, Church of Ireland and Roman Catholic Church, peers, and holders of certain offices listed in the House of Commons Disqualification Act 1975 (e.g. members of the judiciary, Civil Service, regular armed forces, police forces, some local government officers and some members of public corporations and government commissions). A candidate does not require any party backing but his or her nomination for election must be supported by the signatures of ten people registered in the constituency. A candidate must also deposit with the returning officer £500, which is forfeit if the candidate does not receive more than 5 per cent of the votes cast. All election expenses, except the candidate's personal expenses, are subject to a statutory limit of £3,648, plus 3½ pence for each elector in a borough constituency or 4½ pence for each elector in a county constituency. (See pp. 241-248 for an alphabetical list of M.P.s, pp. 249-276 for the results of the last General Election and subsequent by-elections).

The week's business of the House is outlined each Thursday by the Leader of the House, after consultation between the Chief Government Whip and the Chief Opposition Whip. A quarter to a third of the time will be taken up by the Government's legislative programme, and the rest by other business, e.g. question time. As a rule Bills likely to raise political

controversy are introduced in the Commons before going on to the Lords, and the Commons claims exclusive control in respect of national taxation and expenditure. Bills such as the Finance Bill, which imposes taxation, and the Consolidated Fund Bills, which authorize expenditure, must begin in the Commons. A Bill of which the financial provisions are subsidiary may begin in the Lords; and the Commons may waive their rights in regard to Lords' amendments affecting finance.

The Commons has a public register of M.P.s' financial, and certain other, interests. Members must also disclose any relevant financial interest or benefit in a matter before the House when taking part in a debate, in certain other proceedings of the House or in consultations with other Members, with Ministers or civil servants.

Since 1911 Members of the House of Commons have received salary payments; facilities for free travel were introduced in 1924. Members are entitled to claim income tax relief on expenses incurred in the course of their Parliamentary duties. Salary rates since 1911 as follows:

	p.a.		p.a.
1911.....	£400	1978 June	£6,897
1931.....	360	1979 June	9,450
1934.....	380	1980 June	11,750
1935.....	400	1981 June	13,950
1937.....	600	1982 June	14,510
1946.....	1,000	1983 June	15,308
1954.....	1,250	1984 Jan	16,106
1957.....	1,750	1985 Jan	16,904
1964.....	3,250	1986 Jan	17,702
1972 Jan.....	4,500	1987 Jan	18,500
1975 June	5,750	1988 Jan	22,548
1976 June	6,062	1989 Jan	24,107
1977 July	6,270		

In October 1969 Members were granted an allowance for secretarial and research expenses. In 1987 this became known as the Office Costs Allowance, and in April 1988 rose to £22,588 a year.

Also, since January 1972, Members can claim reimbursement for the additional cost of staying overnight away from their main residence while on Parliamentary business. In August 1988 this was set at £9,298 a year. Since 1984 this has been non-taxable.

From March 1980 provision was made enabling each Member in receipt of Secretarial and Research Allowance to contribute sums to an approved pension scheme for the provision of a pension, or other benefits, for or in respect of persons whose salary is met by him, from the Office Costs Allowance. For the year from April 1, 1989, this sum is £24,903 a year.

The cost of travel allowances for 1988-89 was stated in June 1989 to be £5,707,783 (car mileage claims £3,954,898, rail travel £632,051 and air travel £448,976, spouse/children travel £395,451, extended travel within U.K. £72,949, and secretarial travel £203,458).

The Ministerial Salaries and Members' Pensions Act 1965 established a contributory pension fund providing pensions for former Members of Parliament and for dependents of deceased former Members. The Fund was reconstituted and the scheme restructured to bring it into line with pension schemes in the public sector by the Parliamentary and Other Pensions Acts 1972: further Acts modifying the arrangements for Members, Ministers and certain office-holders were passed in 1976, 1978, 1981, 1984 and 1987. The Parliamentary and Other Pensions Act 1987 is an enabling measure which provides that the detailed provisions may be contained in subordinate legislation. The arrangements now provide a pension of one-fiftieth of salary for each year of pensionable service with a maximum of two-thirds of salary at

age 65. Pension is normally payable at age 65, for men and women, or on later retirement. Pensions may be paid earlier e.g. on ill-health retirement. The widow/widower of a former Member receives a pension of one-half of the late Member's pension. Pensions are index-linked. Members contribute 9 per cent of salary to the pension fund: there is an Exchequer contribution, currently slightly less than half the amount contributed by Members.

The House of Commons Members' Fund provides for annual or lump sum grants to ex-Members, their widows or widowers, and children whose incomes are below certain limits. Alternatively, payments of £1,578 per annum to ex-Members with at least ten years service and who left the House of Commons before October 1964 and £789 per annum to their widows or widowers are made at right. Members contribute £24 per annum and the Exchequer £115,000 per annum to the Fund. The income of the Fund in 1987-88 was £220,922 and estimated expend-

iture on grants and payments was £141,056. The net assets of the Fund as at September 30, 1987 amounted to £1,490,633.

The House of Commons is presided over by the Speaker, who has considerable powers to maintain order in the House. His deputy, the Chairman of Ways and Means, and two Deputy Chairmen may preside over sittings of the House of Commons; they are elected by the House, and, like the Speaker, neither speak nor vote other than in their official capacity. The staff of the House are employed by a Commission chaired by the Speaker. The Heads of House of Commons Departments (see below) are permanent officers of the House, not M.P.s. The Clerk of the House is the principal adviser to the Speaker on the privileges and procedures of the House, the conduct of the business of the House, and Committees. The Serjeant-at-Arms is responsible for security, ceremonial, and for accommodation in the Commons part of the Palace of Westminster.

OFFICERS AND OFFICIALS OF THE HOUSE OF COMMONS

<i>Speaker</i> , The Rt. Hon. Bernard Weatherill, M.P. for Croydon North East	£54,357
<i>Chairman of Ways and Means</i> , The Rt. Hon. Harold Walker, M.P. for Doncaster Central	£42,357
<i>First Deputy Chairman of Ways and Means</i> , Sir Paul Dean, M.P. for Woodspring	£39,347
<i>Second Deputy Chairman of Ways and Means</i> , Miss Betty Boothroyd, M.P. for West Bromwich West	£39,347

Offices of the Speaker and Chairman of Ways and Means

<i>Speaker's Secretary</i> , P. J. Kitcatt, C.B.	£29,920-£33,352
<i>Speaker's Counsel</i> , H. Knorpel, C.B., Q.C.; G. E. Gammie, C.B., Q.C.	£37,600-£40,900
<i>Chaplain to the Speaker</i> , The Rev. Canon D. Gray, T.D.	
<i>Secretary to the Chairman of Ways and Means</i> , R. I. S Phillips	

Department of the Clerk of the House

<i>Clerk of the House of Commons</i> , C. J. Boulton, C.B.	£72,000
<i>Clerk Ass't</i> , J. F. Sweetman, T.D.	£48,100-£50,400
<i>Clerk of Committees</i> , D. W. Limon	£48,100-£50,400

<i>Principal Clerks</i> — <i>Public Bills</i> , H. M. Barclay <i>Journal Office</i> , W. R. McKay <i>Table Office</i> , C. B. Winnifrith <i>Overseas Office</i> , R. B. Sands <i>Select Committees</i> , G. Cubie <i>Second Clerk of Select Committees</i> , A. J. Hastings	
---	--

<i>Standing Committees</i> , J. R. Rose <i>Financial Committees</i> , D. G. Millar;	£35,845-£40,900
<i>Deputy Principal Clerks</i> , S. A. L. Panton; M. R. Jack, Ph.D.; Mrs. J. Sharpe; Ms. A. Milner-Barry; R. W. G. Wilson; W. A. Proctor; F. A. Cranmer; R. J. Rogers; C. R. M. Ward, Ph.D.; Ms. H. E. Irwin; D. W. N. Doig; A. Sandall; D. L. Natzler; E. P. Silk; D. F. Harrison	£29,920-£33,352
<i>Senior Clerks</i> , Mrs. S. A. de Ste Croix; A. R. Kennon; D. W. Robson; L. C. Laurence-Smyth; S. J. Patrick; D. J. Gerhold; C. J. Poyer; S. J. Priestley; A. H. Doherty; P. A. Evans; R. I. S. Phillips; R. G. James; Miss E. J. Baker; Miss P. A. Helme; D. R. Lloyd; R. A. Lambert; J. B. Ingram (acting); I. C. Gilbert (acting); J. Darling (acting); J. M. Hope (acting)	£19,110-£24,356

Clerk of Services Sub-Committees, K. J.

Brown	£18,242-£23,226
-----------------	-----------------

Examiners of Petitions for Private Bills, R. J.

Willoughby; M. G. Pownall.

Registrar of Members' Interests, A. J. Hastings

Taxing Officer, R. J. Willoughby.

Department of the Serjeant-at-Arms

<i>Serjeant-at-Arms</i> , Sir Alan Urwick, K.C.V.O., C.M.G.	£37,600-£40,900
<i>Deputy Serjeant-at-Arms</i> , P. N. W. Jennings	£29,920-£33,352
<i>Assistant Serjeant-at-Arms</i> , M. J. A. Cummins	£22,301-£28,512
<i>Deputy Assistant Serjeants-at-Arms</i> , P. A. J. Wright; J. F. Collins	£19,110-£24,356

Department of the Library

<i>Librarian</i> , D. Menhennet, D.Phil	£37,600-£40,900
<i>Deputy Librarian</i> , D. J. T. Englefield	£35,845-£37,165

Library and Information Service

<i>Assistant Librarians</i> , G. F. Lock; Miss J. B. Tanfield	£29,920-£33,352
<i>Deputy Assistant Librarians</i> , S. Z. Young; Mrs. H. R. Coates; Miss P. J. Barnes; K. G. Cuninghame; Mrs. J. M. Wainwright; C. C. Pond, Ph.D.; Mrs. C. B. Andrews; R. C. Clements; Mrs. J. M. Lourie	£23,383-£29,920
<i>Senior Library Clerks</i> , Ms. F. Poole; Mrs. J. M. Fiddick; C. R. Barclay; Mrs. C. M. Gillie; R. J. Ware, D.Phil; Ms. D. Gore, Ph.D.; R. J. Twigger; B. K. Winetrobe; T. N. Edmonds; R. J. Cracknell; Miss O. M. Gay; Miss E. M. McInnes; Mrs. G. L. Allen; Miss M. Baber	£19,110-£24,356

Vote Office

<i>Deliverer of the Vote</i> , G. R. Russell	£23,383-£29,920
<i>Deputy Deliverer of the Vote</i> , H. C. Foster	£19,110-£24,356

Administration Department

<i>Head of Administration Department, G. A.</i>	
Roberts	£37,600-£40,900
<i>Accountant, J. L. G. Dobson</i>	£35,845-£37,165
<i>Deputy Accountant, A. J. Lewis</i>	£29,920-£33,352
<i>Senior Assistant Accountant, A. R. Marskell</i>	
	£23,383-£29,920
<i>Assistant Accountants, M. J. Barram; Miss M. M. McColl; M. Fletcher</i>	£19,110-£24,356
<i>Head of Establishments Office, B. A. Wilson</i>	
	£29,920-£33,352
<i>Deputy Head of Establishments Office, J. A. Robb</i>	£23,383-£29,920
<i>Computer Officer, R. S. Morgan</i>	£29,920-£33,352
<i>Internal Auditor, A. A. Cameron</i>	£19,110-£24,356
<i>Staff Inspector, R. C. Collins</i>	£19,110-£24,356

Department of the Official Report

<i>Editor, I. D. Church</i>	£35,845-£37,165
<i>Deputy Editor, P. Walker</i>	£23,383-£29,920
<i>Principal Assistant Editors, R. V. Hadlow; J. Gourley; J. Withers; W. G. Garland</i>	
	£21,869-£27,948
<i>Assistant Editors, Miss V. Grainger; J. Ledgerwood; Miss V. A. A. Clarke; Miss H. Hales; Miss G. L. Sutherland</i>	£19,705-£25,131
<i>Catering Accountant, D. R. W. Wood</i>	
	£19,110-£24,356

Refreshment Department

<i>General Manager, W. J. J. Smillie</i>	£23,383-£29,920
<i>Deputy General Manager, E. J. Nash</i>	
	£19,110-£24,356

PARLIAMENTARY INFORMATION

The following is a short glossary of aspects of work of Parliament:

(Unless otherwise stated, references are to House of Commons procedures.)

Adjournment Debate.—Usually a half-hour debate introduced by a backbencher at the end of business for the day. The subjects raised are often local or personal issues.

Bill.—Proposed legislation is termed a *Bill*. The stages of a Public Bill (for Private Bills, see below) in the House of Commons are as follows:

First Reading: There is no debate at this stage, which nowadays merely constitutes an order to have the Bill printed.

Second Reading: The debate on the principles of the Bill.

Committee Stage: The detailed examination of a Bill, clause by clause. In most cases this takes place in a *Standing Committee*, or the whole House may act as a *Committee*. A *Special Standing Committee* may take evidence before embarking on detailed scrutiny of the Bill. Very rarely, a Bill may be examined by a *Select Committee* (see below).

Report Stage: Detailed review of a Bill as amended in Committee.

Third Reading: Final debate on a Bill.

Public Bills go through the same stages in the House of Lords, except that in almost all cases the Committee Stage is taken in the Committee of the Whole House.

A Bill may start in either House, and has to pass through both Houses to become law.

Both Houses have to agree the same text of a Bill, so that the *Amendments* made by the second House are then considered in the originating House and if not agreed, sent back or themselves amended, until agreement is reached.

Chiltern Hundreds.—A legal fiction, a nominal office of profit under the Crown, the acceptance of which requires a Member to vacate his seat. The Manor of Northstead is similar. These are the only means by which an M.P. may resign.

Closure & Guillotine.—To prevent deliberate waste of time of either House, a motion may be made that the question be now put. In the House of Commons, if the Speaker decides that the rights of a minority are not being prejudiced and 100 members support the closure motion in a division, if carried, the original motion is put to the House, without further debate. The *Guillotine* represents a more rigorous and systematic application of the Closure. Under this system, a Bill proceeds in accordance with a rigid timetable and discussion is limited to the time

allotted to each group of clauses. The Closure is hardly ever used in the Lords, and there is no procedure for a guillotine. The completion of business in the Lords is traditionally ensured by agreement from all sides of the House.

Consolidated Fund Bill.—A Bill to authorize issue of money to maintain Government services. The Bill is dealt with without debate, but afterwards members may raise topics of public or local importance.

Delegated Legislation.—Many Statutes empower Ministers to make delegated legislation, with little or no reference back to Parliament, usually by means of Statutory Instruments. These fall into four broad categories:—(i) Affirmative Instruments, which are subject to approval by resolutions of both Houses before they can come into or remain in force; (ii) Negative Instruments, which are subject to annulment by resolution of either House; (iii) General Instruments, which include those not required to be laid before Parliament and those which are required to be so laid but are not subject to approval or annulment; (iv) Special Procedure Orders, against which parties outside Parliament may lodge petitions.

Dissolution.—Parliament comes to an end either by Dissolution by the Sovereign, on the advice of the Prime Minister, or the expiration of the term of five years for which the House of Commons was elected. Dissolution is normally effected by a Royal Proclamation.

Early Day Motion.—A motion put on the Notice Paper by an M.P. without in general the real prospect of its being debated. Such motions are expressions of backbench opinion.

Emergency Debate.—In the Commons a method of obtaining prompt discussion of a matter of urgency is by moving the adjournment under Standing Order No. 20 for the purpose of discussing a specific and important matter that should have urgent consideration. A member may ask leave to make this motion by giving written notice to the Speaker, usually before 12 noon, and if the Speaker considers the matter of sufficient importance and it obtains the support of 40 members, it is discussed usually at 7 p.m. on the following day.

Father of the House.—The Member whose continuous service in the House of Commons, is the longest. The present Father of the House is the Rt. Hon. Sir Bernard Braine, elected first in 1950.

General Synod Measure.—A measure passed by the national assembly of the Church of England under the Church of England Assembly (Powers) Act 1919. These measures are considered by the Joint Ecclesiastical Committee, who make a report. They are then considered by both Houses, and if approved, sent for the Royal Assent.

Hansard.—The official report of debates in both Houses (and in Standing Committees) published by H.M.S.O., normally on the day after the sitting concerned.

Hours of Meeting.—The House of Commons meets on Monday, Tuesday, Wednesday and Thursday at 2.30 p.m., and on Friday at 9.30 a.m. The House of Lords normally meets at 2.30 p.m. on Monday, Tuesday and Wednesday and at 3 p.m. on Thursday. In the latter part of the Session, the House of Lords sometimes sits on Fridays at 11 a.m.

Hybridity.—A Public Bill which is considered to affect specific private or local interests, as distinct from all such interests of a single category, is called a Hybrid Bill and is subject to a special form of scrutiny.

Leader of the Opposition.—In 1937 the office of Leader of the Opposition was recognized and a salary of £2,000 per annum was assigned to the post, thus following a practice which had prevailed in the Dominion of Canada since 1906. In June 1989 the salary was £49,707. The present Leader of the Opposition is the Rt. Hon. Neil Kinnock.

The Lord Chancellor.—The Lord High Chancellor of Great Britain is (*ex officio*) the Speaker of the House of Lords. Unlike the Speaker of the House of Commons, he is a member of the Government, takes part in debates and votes in divisions. He has none of the powers to maintain order that the Speaker in the Commons has, these powers being exercised in the Lords by the House as a whole. The Lord Chancellor sits in the Lords on one of the *Woolsacks*, couches covered with red cloth and stuffed with wool. If he wishes to address the House in any way except formally as Speaker, he leaves the Woolsack and steps towards his place—a peer.

Naming.—When a member has been named by the Speaker for a breach of order, i.e. contrary to the practice of the House called by surname and not addressed as the "Hon. Member for ... (her/his constituency)", the Leader of the House moves that the offender "be suspended from the service of the House" for (in the case of a first offence) a period of five sitting days. Should the member offend again, the period of suspension is increased.

Opposition Day.—A day on which the topic for debate is chosen by the Opposition. There are 20 such days in a normal session. On 17 days, subjects are chosen by the Leader of the Opposition; on the remaining three days by the leader of the next largest opposition party.

Parliament Acts 1911 and 1949.—Under these Acts Bills may become law without the consent of the Lords.

Since at least the 18th century the Commons have had the privilege of having bills concerned with supply (i.e. taxation and money matters) passed without amendment by the Lords; though until 1911 the Lords retained the right to reject such bills outright.

By the Parliament Act 1911 a Bill which has been endorsed by the Speaker of the House of Commons as a Money Bill, and has been passed by the Commons and sent up to the Lords at least one month before the end of a session, can become law without the consent of the Lords if it is not passed by them without amendment within a month.

Under the Parliament Acts 1911 and 1949, if the Lords reject any other Public Bill (except one to prolong the life of a Parliament) which has been passed by the Commons in two successive sessions then that Bill shall (unless the Commons direct to the contrary) become law without the consent of the Lords. The Lords have power, therefore, to delay a Public Bill for thirteen months from its first Second Reading in the House of Commons.

Prime Minister's Questions.—The Prime Minister answers questions from 3.15 to 3.30 pm on Tuesdays and Thursdays. Nowadays the "open question" predominates. Members tend to ask the Prime Minister what are her or his official engagements for the day: a supplementary question on virtually any topic can then be put.

Private Bill.—A Bill promoted by a body or an individual to give powers additional to, or in conflict with, the general law, and to which a separate procedure applies.

Private Members' Bill.—A Public Bill promoted by a Member who is not a member of H.M. Government.

Private Notice Question.—A question adjudged of urgent importance on submission to the Speaker (in the Lords, the Leader of the House), answered at the end of oral questions—usually at 3.30 p.m.

Privilege.—The following are covered by the privilege of Parliament: (i) freedom from interference in going to, attending at, and going from, Parliament; (ii) freedom of speech in Parliamentary proceedings; (iii) the printing and publishing of anything relating to the proceedings of the two Houses is subject to privilege; (iv) each House is the guardian of its dignity and may punish any insult to the House as a whole.

Prorogation.—The bringing to an end, by the Sovereign on the advice of the Government, of a Session of Parliament. Public Bills which have not completed all their stages lapse on Prorogation.

Queen's Speech.—The Speech delivered by H.M. The Queen at the State Opening of Parliament, in which the Government's programme for the session is set forth. The Speech is, in fact, drafted for and approved by the Cabinet.

Question Time.—Oral questions are answered by Ministers in the Commons from 2.30 to 3.30 pm every day except Friday. They are also taken at the start of the Lords sittings, with a daily limit of four oral questions.

Royal Assent.—The Royal Assent is signified by Letters Patent to such Bills and Measures as have passed both Houses of Parliament (or Bills which have been passed under the Parliament Acts 1911 and 1949). The Sovereign has not given Royal Assent in person since 1854. On occasion, for instance in the Prorogation of Parliament, Royal Assent may be pronounced to the two Houses by Lords Commissioners; but more usually Royal Assent is notified to each House sitting separately in accordance with the Royal Assent Act 1967. The Norman formulae for Royal Assent are then endorsed on the Acts by the Clerk of the Parliaments.

The power to withhold assent resides with the Sovereign, but has not been exercised in the United Kingdom since 1707, in the reign of Queen Anne.

Select Committees consisting usually of 10–15 members of all parties are a means used by both Houses in order to investigate certain matters.

Most Select Committees in the House of Commons are now tied to Departments—each Committee investigates subjects within a Government Department's remit. These are: Agriculture, Defence,

Education, Science and Arts, Employment, Energy, Environment, Foreign Affairs, Home Affairs, Social Services, Trade and Industry, Transport, Treasury and Civil Service, Welsh Affairs. The Scottish Affairs Committee is in temporary abeyance.

There are other House of Commons Select Committees dealing with Public Accounts (i.e. the spending by H.M. Government of money voted by Parliament) and European Legislation, and also domestic committees dealing, for example, with Privilege and Services. Major Select Committees usually take evidence in public: their evidence and reports are published by H.M.S.O.

The principal Select Committee in the House of Lords is that on the European Communities, which has, at present, six sub-committees dealing with all areas of Community policy. The House of Lords also has a Select Committee on Science and Technology, which appoints sub-committees to deal with specific subjects. In addition, *ad hoc* Select Committees have been set up from time to time to investigate specific subjects, e.g. overseas trade, murder and life imprisonment. There are also some Joint Committees of the two Houses, e.g. the Joint Committee on Statutory Instruments.

The Speaker.—The Speaker of the House of Commons is the spokesman and president of the Chamber. He is elected by the House at the beginning of each Parliament or when the previous Speaker retires or dies. He neither speaks in debates nor votes in divisions except when the voting is equal.

Standing Orders.—Rules which have from time to time been agreed by each House of Parliament to regulate the conduct of its business. These orders are not irrevocable, may be revised, amended or repealed, and are from time to time suspended or dispensed with.

State Opening.—This marks the start of each new session of Parliament. Parliament is normally opened, in the presence of both Houses, by the Queen in person, who makes the Speech from the Throne which outlines the Government's policies for the coming session (*see Queen's Speech*). In the absence of the Queen, Parliament is opened by Royal Commission, and the Queen's Speech is read by one of the Lords Commissioners specially appointed by Letters Patent for the occasion.

Strangers.—Anyone who is not a Member or Officer of the House is a *stranger*. Visitors are generally admitted to debates of both Houses but may be excluded if the House so decides. In practice this happens only in time of war.

Ten Minute Rule.—A colloquial term for Standing Order No. 19, under which backbenchers have an opportunity on Tuesdays and Wednesdays to state for about ten minutes why a Bill on a certain subject should be introduced. Time is also available for a short opposing speech.

Vacant Seats.—When a vacancy occurs in the House of Commons during a session of Parliament, the Writ for the by-election is moved by a Whip of the party to which the member whose seat has been vacated belonged. If the House is in recess, the Speaker can issue a warrant for a writ, should two members certify to him that a seat is vacant.

Whips.—In order to secure the attendance of Members of a particular party in Parliament on all occasions, and particularly on the occasion of an important vote, Whips (originally known as "Whippers-in") are appointed. The written appeal or circular letter issued by them is also known as a "whip", its urgency being denoted by the number of times it is underlined. Failure to respond to a three-line whip, headed "Most important", is tantamount in the Commons to secession (at any rate temporarily) from the party. Whips are officially recognized by Parliament and are provided with office accommodation in both Houses. In both Houses, Government and some Opposition Whips receive salaries from public funds.

PUBLIC INFORMATION SERVICE.—Enquiries from the general public and organizations of all kinds about the work, practices, composition and history of the House of Commons are answered by the Public Information Office, House of Commons, SW1A 0AA (01-219 4272). This office also edits the House of Commons Weekly Information Bulletin (published by H.M.S.O.). A series of factsheets on the work and processes of the House is available. The Journal and Information Office, House of Lords, SW1A OPW (01-219 3107) answers queries relating to the procedure and practice of the Lords.

HER MAJESTY'S GOVERNMENT

Her Majesty's Government is the body of Ministers responsible for the administration of national affairs, determining policy and introducing into Parliament any legislation necessary to give effect to government policy. The majority of Ministers are members of the House of Commons but members of the House of Lords may also hold Ministerial responsibility. The Lord Chancellor is always a member of the House of Lords. The Prime Minister is, by recent convention, always a member of the House of Commons.

THE PRIME MINISTER

The office of Prime Minister, which had been in existence for nearly 200 years, was officially recognised in 1905 and its holder was granted a place in the Table of Precedence. The Prime Minister, by tradition also First Lord of the Treasury and Minister for the Civil Service, is appointed by the Sovereign and is usually the leader of the party which enjoys, or can secure, a majority in the House of Commons. Other Ministers are appointed by the Sovereign on

the recommendation of the Prime Minister, who also allocates functions amongst Ministers and has the power to obtain their resignation or dismissal individually.

The Prime Minister informs the Sovereign of state and political matters, advises on the dissolution of Parliament, and makes recommendations for important Crown appointments, the award of honours, etc.

As the chairman of Cabinet meetings and leader of a political party, the Prime Minister is responsible for translating party policy into government activity: and as leader of the Government the Prime Minister is responsible to Parliament and to the electorate for the policies and their implementation.

The Prime Minister also represents the nation in international affairs, e.g. summit conferences.

THE CABINET

The Cabinet developed during the 18th century as an inner committee of the Privy Council, which was

the chief source of executive power until that time. It is composed of about 20 Ministers chosen by the Prime Minister, usually the heads of government departments (generally known as Secretaries of State unless they have a special title, e.g. Chancellor of the Exchequer) and the holders of various traditional offices.

The Cabinet's functions are the final determination of policy, control of government and co-ordination of government departments. The exercise of its functions is dependent upon enjoying majority support in the House of Commons. Cabinet meetings are held in private, taking place once or twice a week during parliamentary sittings and less often during a recess. Proceedings are confidential, the members being bound by their oath as Privy Counsellors not to disclose information about the proceedings.

The convention of collective responsibility means that the Cabinet acts unanimously even when Cabinet Ministers do not all agree on a subject. The policies of departmental Ministers must be consistent with the policies of the Government as a whole, and once the Government's policy has been decided, each Minister is expected to support it or resign.

The convention of Ministerial responsibility holds ■ Minister, as the political head of his or her department, accountable to Parliament for the department's work. Departmental Ministers usually decide all matters within their responsibility, although on matters of political importance they normally consult their colleagues collectively. A decision by a departmental Minister is binding on the Government ■ a whole.

HER MAJESTY'S GOVERNMENT

THE CABINET

Prime Minister, First Lord of the Treasury and Minister for the Civil Service, THE RT. HON. MARGARET HILDA THATCHER, M.P., born Oct. 13, 1925.

Lord President of the Council and Leader of the House of Commons, The Rt. Hon. Sir (Richard Edward) Geoffrey Howe, Q.C., M.P., born Dec. 20, 1926.

Chancellor of the Exchequer, The Rt. Hon. Nigel Lawson, M.P., born March 11, 1932.

Lord High Chancellor, The Rt. Hon. the Lord Mackay of Clashfern, born July 2, 1927.

Secretary of State for the Home Department, The Rt. Hon. Douglas Richard Hurd, C.B.E., M.P., born March 8, 1930.

Secretary of State for Foreign and Commonwealth Affairs, The Rt. Hon. John Major, M.P., born March 29, 1943.

Assistant Whips, Michael Fallon, M.P.; The Hon. Thomas Sackville, M.P.; Sydney Chapman, M.P.; Gregory Knight, M.P.; Irvine Patrick, O.B.E., M.P.

GOVERNMENT BY PARTY

Before the reign of William and Mary the principal Officers of State were chosen by and were responsible to the Sovereign alone and not to Parliament or the nation at large. Such officers acted sometimes in concert with one another, but more often independently, and the fall of one did not, of necessity, involve that of others, although all were liable to be dismissed at any moment.

In 1693 the Earl of Sunderland recommended to William III the advisability of selecting a Ministry from the political party which enjoyed a majority in the House of Commons and the first united Ministry was drawn in 1696 from the Whigs, to which party the King owed his throne, the principal members being Russell (the Admiral), Somers (the Advocate), Lord Wharton and Charles Montague (afterwards Chancellor of the Exchequer). This group became known as the *Junto* and was regarded with suspicion — a novelty in the political life of the nation, being a small section meeting in secret apart from the main body of Ministers. It may be regarded as the forerunner of the *Cabinet* and in course of time it led to the establishment of the principle of joint responsibility of Ministers, so that internal disagreement caused — change of personnel or resignation of the whole body of Ministers.

The accession of George I, who was unfamiliar with the English language, led to a disinclination on the part of the Sovereign to preside at meetings of his Ministers and caused the appearance of a *Prime Minister*, a position first acquired by Robert Walpole in 1721 and retained without interruption for 20 years and 326 days.

In 1828 the old party of the Whigs became known

as *Liberals*, a name originally given to it by its opponents to imply laxity of principles but gradually accepted by the party to indicate its claim to be pioneers and champions of political reform and progressive legislation. In 1861 a Liberal Registration Association was founded and Liberal Associations became widespread. In 1877 a National Liberal Federation was formed, with headquarters in London. The Liberal Party was in power for long periods during the second half of the nineteenth century and for several years during the first quarter of the twentieth century, but after a split in the party the numbers elected were small from 1931. In March 1988, the Liberals and the Social Democratic Party merged under the title *Social and Liberal Democrats* (see below).

Soon after the change from Whig to Liberal the Tory Party became known as *Conservative*, a name traditionally believed to have been invented by John Wilson Croker in 1830 and to have been generally adopted about the time of the passing of the Reform Act of 1832 to indicate that the preservation of national institutions was the leading principle of the party. After the Home Rule crisis of 1886 the dissentient Liberals entered into a compact with the Conservatives, under which the latter undertook not to contest their seats, but a separate *Liberal Unionist* organization was maintained until 1912, when it was united with the Conservatives.

The Labour Party.—Labour candidates for Parliament made their first appearance at the General Election of 1892, when there were 27 standing as "Labour" or "Liberal-Labour."

In 1900 the *Labour Representation Committee* was

set up in order to establish a distinct Labour Group in Parliament, with its own whips, its own policy, and a readiness to co-operate with any party which might be engaged in promoting legislation in the direct interest of labour. In 1906 the L.R.C. became known as *The Labour Party*.

Social Democratic Party.—The Council for Social Democracy was announced by four former Labour Cabinet Ministers on Jan. 25, 1981. Subsequently a number of sitting Labour Members of Parliament, together with one Conservative, joined the new group, and on March 26, 1981 the Social Democratic Party was launched. Later in the year the S.D.P. and the Liberal Party formed an electoral Alliance. In 1988 a majority of the S.D.P. agreed on a merger with the Liberal Party but a minority continue as a separate party under the S.D.P. title.

The government of the day is formed by the party which wins the largest number of seats in the House of Commons at a General Election, or which has the support of a majority of members in the House of Commons. By tradition, the leader of the majority party is asked by the Sovereign to form a government, while the largest minority party becomes the official Opposition with its own leader and own "Shadow Cabinet". Leaders of the Government and Opposition sit on the front benches of the Commons with their supporters (the back-benchers) sitting behind them.

When a party is in Opposition and its leadership becomes vacant, it makes its free choice among the various personalities available; but if the party is in office, the Sovereign's choice may anticipate, and in a certain sense forestall, the decision of the party.

POLITICAL PARTIES

CONSERVATIVE AND UNIONIST PARTY, Central Office, 32 Smith Square, SW1P 3HH. (Tel: 01-222 9000).—*Party Chairman*, The Rt. Hon. K. Baker, M.P.; *Deputy Chairman*, The Rt. PARLIAMENTARY SUMMARY 1989-90

The House of Lords re-assembled after the summer recess on October 10 and the House of Commons on October 20.

On October 20 the Home Secretary (Douglas Hurd) made a statement confirming that the Government was to ban the broadcasting of interviews with members and supporters of terrorist organizations in Northern Ireland. On November 2 Mr. Hurd moved a motion to impose the ban which, after heated debate, was carried by 243 votes to 179.

In the House of Lords on October 24 an Opposition amendment to the Housing Bill to give tenants greater protection from harrassment was defeated by 100 votes to 89.

On October 25, during Prime Minister's questions, the Leader of the Opposition, Neil Kinnock, called Mrs Thatcher a 'cheat' during exchanges on the freezing of child benefit. Mr. Kinnock was forced by the Speaker to withdraw the remark.

On October 31 the Rate Support Grants Bill passed its second reading by 252 votes to 198. The Firearms (Amendment) Bill was given a third, unopposed, reading in the House of Lords and was passed back to the Commons for consideration of the Lords' amendments.

FINANCIAL STATEMENT

On November 8 the Chancellor of the Exchequer (Nigel Lawson) presented his autumn financial statement, and announced increased spending on a number of Government programmes. Mr. Lawson told the Commons that public expenditure was likely to remain at the forecast £167,000 million and that only £250 million of the £3,500 million reserve was likely to be used. He said, 'The main reasons for this shortfall were the extra £1 billion in privatization proceeds and the reduction of social security spending of almost £1 billion as a direct result of the sharper-than-expected fall in unemployment and a saving of some £750 million, largely due to extra housing receipts under the right-to-buy programme.'

'Taken together with the strong growth in the economy this year and the containment of debt interest now that the Budget is in surplus, this means that total public spending this year, even excluding privatization proceeds, will be less than 40 per cent of national income, the first time this has happened for over twenty years.'

'Looking ahead, the Cabinet agreed in July that public spending over the next three years should keep as close as possible to the existing planning totals and should continue to fall as a share of national income. The plans I am about to announce meet both those objectives.'

PUBLIC EXPENDITURE

'For 1989-90, the planning total published in the last public expenditure White Paper was £167 billion. It will remain at £167 billion.'

'For 1990-91, however, the planning total has been set at £179.5 billion, some £3.25 billion more than the previously published figure. For 1991-92, the planning total has been set at £191.5 billion.'

'These totals include the level of reserves as in last year's plans, that is to say, £3.5 billion in the first year, £7 billion in the second year and £10.5 billion in the third.'

'They also incorporate an unchanged estimate of privatization proceeds of £5 billion a year.'

'Over the three survey years as a whole, the real growth in spending on programmes will be over 3 per cent a year.'

'Overall public spending, excluding privatization

proceeds, will rise by less than 2 per cent a year, well within the prospective growth of the economy as a whole. In other words, total public spending, excluding privatization proceeds, will continue to decline as a proportion of national income.'

'But, at the same time, substantial additional funds have been made available for the Government's most important public expenditure priorities.'

SPENDING PROGRAMMES

The Chancellor then gave details of increased expenditure on the National Health Service and on roads. He continued: 'Gross provision for public sector housing investment is being increased by around £440 million in 1989-90 and £340 million the following year. But thanks to the success of the Government's right-to-buy policy, this is more than financed by extra receipts.'

'Defence spending is to be increased by £150 million in 1989-90 and £600 million in 1990-91. These significant increases are designed to provide a firm framework for the next three years within which our defence programme can be planned with confidence.'

'The new plans imply an overall increase of £2.25 billion in public sector capital spending in 1989-90. This includes extra investment in hospitals, housing, prisons and roads. There is provision for higher investment by the nationalized industries, including further anti-pollution investment by the water authorities.'

Turning to National Insurance, the Chancellor said: 'The lower earnings limit will be increased next April to £43 a week, in line with the single person's pension, and the upper earnings limit will be raised to £325 a week. The upper limits for the 5 per cent and 7 per cent reduced rate bands will also be increased, to £75 a week and £115 a week respectively. The upper limit for the 9 per cent rate for employers will be raised to £165 a week.'

'Over recent years, we have steadily reduced the Treasury supplement, the taxpayers' contribution to the National Insurance Fund. From 18 per cent in 1979, it now stands at 5 per cent. We now propose to carry this policy to its logical conclusion and to abolish the supplement altogether. The necessary legislation will be introduced early in the new session.'

Mr Lawson concluded, 'In short, after two years of unexpectedly rapid expansion, growth next year is forecast to return to a sustainable level, and one which compares well with the economic performance of the 1970s; while inflation will resume its downward path.'

'The public finances are in substantial surplus and will remain so, with public spending on priority programmes continuing to increase, while overall public spending continues to fall as a share of G.D.P., to a level in 1991-92 not seen for a quarter of a century.'

End of Session

On November 7 the Government published a Broadcasting White Paper and Mr. Hurd made a statement outlining his proposals. The chief Labour spokesman on home affairs (Roy Hattersley) said that the proposals were a retreat from the concept of public sector broadcasting and would result in less diversity and lower standards.

The Education Secretary (Kenneth Baker) outlined the proposals contained in the Education White Paper on November 9. The proposals included a student loans scheme. The Opposition Education spokesman, Jack Straw, accused Mr. Baker of betray-

ing the nation's future and Simon Hughes of the S.L.D. said that the proposals were 'the biggest disincentive to students from very poor and working families to go on to higher education that has been announced since the last war'.

On November 10, following the publication of the report on the King's Cross Underground fire, the Transport Secretary (Paul Channon) detailed a series of measures to improve safety. Following several hours of debate on Lord's amendments to the Housing Bill, a Government motion to adjourn further consideration of the Bill was accepted by 149 votes to 46. On November 11 the Bill was passed to the House of Lords.

On November 11 the Parliamentary session ended, the fourth longest in history, having begun in June 1987.

THE QUEEN'S SPEECH

The Queen opened the new session of Parliament on November 22 and in her speech, which outlined the Government's legislative programme, said:

'I look forward with much pleasure to a visit by her Majesty Queen Beatrix of The Netherlands as part of the celebrations of the William and Mary Tercentenary.'

'I also look forward to visiting Barbados next March to mark the 350th anniversary of the House of Assembly there and to being present next autumn on the occasion of the Commonwealth heads of government meeting in Malaysia.'

'My Government will strive for balanced and verifiable measures of arms control and for a worldwide ban on chemical weapons. They strongly support the United States' proposals for 50 per cent reductions in American and Soviet strategic nuclear weapons. They will work for the elimination of disparities in conventional forces in Europe with the aim of achieving a stable balance at lower levels.'

'My Government will continue to strive to break down the barriers between East and West and to ensure that the Vienna Review Conference on Security and Co-operation in Europe leads to further progress on human rights. They look forward to building further on the improved relationship with the Soviet Union and to a visit to this country by the Soviet leader, President Gorbachev.'

'My Government look forward to the completion of the Soviet troop withdrawal from Afghanistan and will continue to work for the restoration of that country's independence and non-aligned status. They will continue to play a full part in the work of the United Nations and to work for peaceful solutions to regional conflicts.'

'My Government will continue to work with our European Community partners to complete the single market, to reinforce budgetary discipline and further to reform the common agricultural policy. They will play a full part in multilateral negotiations designed to liberalize international trade and agriculture.'

'My Government will honour their commitments to the people of the Falkland Islands while continuing to seek more normal relations with Argentina. They will continue to discharge their responsibilities towards Hong Kong and its people and will work closely with the Chinese Government to implement the Sino-British joint declaration.'

'My Lords and members of the House of Commons, my Government will continue to pursue firm financial policies designed to bear down on inflation. They will continue to promote enterprise and to foster the conditions necessary for the sustained growth of output and employment.'

'A Bill will be brought forward to reform the law on local government capital and housing finance, on home improvement grants, and on the conduct of local authority business.'

'My Government will continue to attach very great importance to protecting our environment, both nationally and internationally.'

'A Bill will be introduced for England and Wales to establish a National Rivers Authority and to provide for the sale of the utility functions of the water authorities.'

'Legislation will be introduced to restructure and to provide for the sale of the electricity supply industry in Great Britain.'

'A Bill will be introduced to remove unnecessary obstacles to employment, particularly in relation to women and young people, and to alter training arrangements.'

'My Government will vigorously pursue their policies for reducing crime. A Bill will be introduced to replace the Prevention of Terrorism (Temporary Provisions) Act. Legislation will be brought forward to provide for a national membership scheme to control admission to football matches.'

'A Bill will be introduced to replace Section 2 of the Official Secrets Act, 1911, with provisions prohibiting only disclosures of information which would be harmful to the public interest.'

'A Bill will be introduced to put the Security Service on a statutory basis under the authority of the Secretary of State.'

'A Bill will be introduced to improve and rationalize the law governing the care and protection of children.'

'My Government will continue to take action to raise standards throughout education.'

'My Government are committed to strengthening the National Health Service and to ensuring that it is developed and improved in an efficient way that offers choice to patients.'

'For Scotland, legislation will be brought forward to enable parents to choose that their children's schools should be managed outside the control of local authorities. A Bill will be introduced to transfer the Scottish Bus Group to the private sector.'

'In Northern Ireland, my Government will continue their efforts to eradicate terrorism, to give elected representatives greater involvement in the affairs of the province, and to maintain close co-operation with the Republic of Ireland. A Bill will be laid before you to strengthen the law of Northern Ireland on fair employment. Legislation will be introduced to extend the franchise for local elections and to require from candidates a declaration against terrorism.'

'A Bill will be brought forward to amend the law on social security.'

'Legislation will be introduced to reform company law and the law on mergers.'

'A Bill will be brought forward to modify the driver licensing system and to provide for new systems of route guidance for drivers.'

'Other measures will be laid before you.'

Debate on the Queen's Speech

Mr. Kinnock attacked the Government's record on the environment and said that the Queen's Speech contained only the vacuous statement that 'the Government will continue to attach very great importance to protecting our environment both nationally and internationally'. The S.L.D. leader, Paddy Ashdown, deplored the leaking of large parts of the Speech to the press and accused the Government of treating Parliament with contempt.

On November 23 the S.D.P. leader (David Owen) criticized the Government's record on basic freedoms. The Home Secretary (Douglas Hurd) outlined his proposals for putting the Security Services on a statutory basis and was attacked by his Labour counterpart, Roy Hattersley, who felt that the

proposed new Official Secrets Act would be more authoritarian than the existing one. On November 24 the Social Security Secretary, John Moore, announced benefit increases for about 2.6 million of the less well off and the disabled, to be implemented in October 1989.

Sir Geoffrey Howe, the Foreign Secretary, opened the fourth day of debate on the Queen's Speech by calling on the Soviet Union to improve its human rights record. He emphasized the Government's reluctance to attend an international conference on human rights intended to take place in Moscow in 1991 unless there was an improvement in the Soviet Union's record. On November 28 the Environment Secretary (Nicholas Ridley) pledged to introduce two Bills, the first introducing an integrated system of pollution control and the second reforming waste disposal law.

On December 5 the Elected Authorities (Northern Ireland) Bill, which provides that any person standing for election in Northern Ireland must declare that they do not support terrorist organizations, received a second reading in the House of Commons.

Salmonella Crisis

The Health Secretary (Kenneth Clarke) made a statement concerning salmonella contamination of eggs. During the debate that followed there was criticism of the Under Secretary for Health, Mrs. Edwina Currie, following her remark the previous weekend about there being a high level of salmonella in eggs. On December 19 the Minister of Agriculture, Fisheries and Food (John MacGregor) outlined a £19 million package to help stabilize the egg market, which had experienced a marked drop in sales following Mrs. Currie's remarks. Protests from egg producers had caused Mrs. Currie to resign her post on December 16. Dr. David Clark (Labour) accused Mr. MacGregor of complacency and of not tackling the main issue of the extent of salmonella in eggs and poultry.

During two days of debate on the privatization of the water industry beginning on December 7, Dr. John Cunningham, the Labour spokesman on the environment, said that his party would not allow private monopolies in water to exist. A Labour government, he said, would take them back into public ownership. On December 8 the Water Bill passed its second reading by 301 votes to 241.

On December 12, following the Clapham Junction train disaster, Mr. Channon announced a public inquiry into the tragedy. Members from all parties praised the emergency services and expressed sympathy for the bereaved and injured.

The Defence Secretary (George Younger) told the House of Commons on December 20 that the Ministry of Defence had decided to fund a demonstration phase of the Challenger Mark II tank by Vickers Defence Systems. The all-night sitting of the House of Commons was suspended for seven minutes after Labour member Tam Dalyell refused to break off an attack on the fitness of Leon Brittan to become European Commissioner. When the sitting resumed Mr. Dalyell left the chamber.

Secrets and Security

On December 21, during debate on the Official Secrets Bill, the Labour spokesman on home affairs, Roy Hattersley, said that the Bill had been described as designed to increase the amount of official information available to the public, but in fact was intended to provide a new method by which availability of information was reduced and obstructed. The Home Secretary, Mr. Hurd, moving the Bill, said that the Bill came from a Government that had freed

more information than any of its recent predecessors. The Bill was given a second reading by 298 votes to 221.

On January 10 Labour M.P.s strongly criticized the Transport Secretary, Paul Channon, for his failure to tell airlines and airport authorities about a bomb warning received shortly before the Lockerbie air disaster. John Prescott (Labour) said that the Lockerbie tragedy revealed 'muddles of procedure and excessive secrecy'.

During the committee stage debate on the Security Services Bill on January 16, Tory back-benchers said that independent scrutiny for MI5 would eventually be accepted, despite Government resistance to the idea. On the second day of the debate, Mr. Hurd, defining the purposes of the Bill, said that 'the narrow party-political interests of the government of the day have no part under this Bill'. On January 25 John Patten, Minister of State at the Home Office, confirmed that innocent people could face prosecution under the Bill if they sought certain information from M.P.s.

In a debate on January 24 on the failure of the Ministry of Agriculture to give proper protection to consumers, Dr. David Clark (Labour) said 'many of our citizens have died as a result of the Government's failure to protect our food adequately'. Richard Ryder, Under Secretary for Agriculture, rejected the allegations and said that the Government was preparing the biggest food Bill since 1938. A Government amendment commanding the work of the Ministry of Agriculture was carried by 313 votes to 206 and the amended motion was carried by 280 votes to 211.

Health

The Health Secretary (Kenneth Clarke) introduced a Health Service White Paper on January 31. The Labour spokesman on health, Robin Cook, called the White Paper 'a prescription for a National Health Service run by accountants for civil servants, written by people who will always put a healthy balance before healthy patients.'

On February 2 the Football Spectators Bill was given a second reading in the House of Lords. The Right of Reply Bill, intended to give people a form of quick redress against factual inaccuracies printed about them in newspapers and periodicals, was given an unopposed second reading in the House of Commons on February 3.

In a debate on February 6 on the Government's proposal to guillotine the Water Bill, the Opposition spokesman on the environment, Dr. John Cunningham, criticized the Government and said that privatization would cause huge increases in costs to consumers. The Government motion to guillotine was carried by 272 votes to 199.

The Minister for the Arts (Richard Luce) announced on February 8 that the Government had decided not to proceed with a proposal to allow local authorities to launch premium library-lending services, and to charge for them. The Government's plans for the future of broadcasting, set out in the Broadcasting White Paper, were endorsed by 275 votes to 203.

During Commons questions on food contamination on February 16, Opposition members called for the resignation of the Minister of Agriculture, and the Government was accused of a cover-up.

In the House of Lords on February 20, an amendment to allow for the football membership identity scheme to be phased in division by division was carried by 124 votes to 121. The Government had wished all 92 league clubs to introduce the scheme by 1992.

Iran

On February 21 the Foreign Secretary (Sir Geoffrey Howe) announced that all Britain's diplomats had been withdrawn from Iran following the death threats to the author Salman Rushdie. The Opposition gave full support to the withdrawal. On March 8 Sir Geoffrey Howe announced that, for security reasons, some Iranians living in Britain were being asked to leave. Again he received full support from the Opposition.

During debate on the Official Secrets Bill, Dr. David Owen (S.D.P.) said that the Bill would prevent former ministers from publishing their memoirs. Julian Amery (Conservative) said that the Bill as it stood would at some time cause discomfort to the Government and for that reason he would abstain. The Bill was given a third reading by 320 votes to 195 and passed to the House of Lords.

On March 6 the Transport Secretary (Paul Channon) announced an independent public inquiry into the Purley rail crash. The Government's record of investment in British Rail was criticized by the Labour Transport spokesman, John Prescott.

On March 10 a Labour M.P., Harry Barnes, said that he would rather go to prison than pay the community charge. He was accused by the Home Office Minister, John Patten, of 'inciting people to break the law'.

THE BUDGET

On March 14, prior to the Budget speech, the Scottish Nationalist Party member, Jim Sillars, was ordered to leave the Chamber by the Speaker and then suspended from the Chamber for five days. Mr. Sillars had persisted in raising a point of order at the time that the Leader of the Opposition, Mr. Kinnock, was standing at the Dispatch Box to ask the Chancellor for his Budget speech. Finally, the Chancellor, Mr. Lawson, presented his sixth budget 15 minutes later than scheduled. In his statement the Chancellor said that the background to the 1989 Budget was the unprecedented strength of the British economy, coupled with the continuing and overriding need to combat inflation.

The Chancellor began with an account of the performance of the economy in 1988 and the prospects for 1989, set in the context of the past 10 years. He said that the Government came to office with two central objectives—to defeat inflation, and to breathe new life into a moribund economy—and a clear idea of how to achieve those objectives.

'The first and most urgent task we faced was to damp down the inflationary fires that had raged in the 1970s and wrought so much economic and social havoc. And we succeeded. Between 1974 and 1979 inflation had averaged more than 15 per cent. Over the past six years it has averaged 5 per cent—still not good enough, but a massive improvement.'

'For the economy as a whole our productivity growth has been second only to that of Japan among all the major nations during the 1980s. And our productivity growth in manufacturing has exceeded even that of Japan.'

'But it is not just our economic performance that has been transformed: so have our prospects for the future. Over the past seven years, investment has grown more than twice as fast as consumption, creating the increased capacity necessary to meet future demand. Total business investment is now a higher proportion of national income than ever before. And its quality had improved immeasurably, too; has the quality of British management. We have seen a dramatic and long-overdue improvement in company profits. And a remarkable growth in the

total number of businesses, last year at the rate of more than a thousand a week.'

'We had in 1988 a second successive year of growth at 4.8 per cent, with unemployment falling by over half a million, to well below the European average.'

'Manufacturing output grew particularly rapidly, by more than 7 per cent, to a level well above the previous peak.'

INFLATION

'But total spending also grew by getting on for 7 per cent, mainly because of the boom in industrial investment, in itself a welcome event, but also because of continued strong growth in consumer spending. This last was financed to an unprecedented degree by borrowing, overwhelmingly mortgage borrowing.'

'Inevitably the rapid growth of total spending led to renewed inflationary pressure. To some extent this was diverted into a sharp rise in imports, and hence into the deficit on the current account of the balance of payments.'

'The real threat is posed by the increase in inflation itself. Excluding the distorting effect of mortgage interest payments, the RPI rose by 4.5 per cent last year, much the same as the average over the previous five years. But this underlying rate increased significantly through the year and now stands at 5.5 per cent.'

'The outlook for 1989 is for inflation to rise a little further over the next few months, from 7.5 per cent including mortgage interest payments to about 8 per cent, before falling back in the second half of the year to 5.5 per cent in the fourth quarter and perhaps 4.5 per cent in the second quarter of 1990.'

'Some slowdown in real growth is inevitable as we get inflation back on to a downward path—indeed, it has almost certainly already begun to happen. Overall growth is forecast to fall from the 4.5 per cent recorded last year to 2.5 per cent this year, with growth through the year at 2 per cent.'

'But the question of just how 'soft' or 'hard' the so-called landing will be is not in the hands of Government alone. The Government's task is to reduce inflation by acting, through monetary policy, to bring down the growth of national income in money terms. The task of business and industry is to control their pay and other costs. The more successfully they do so, the less costly in terms of output and employment the necessary adjustment will be.'

MONETARY POLICY

The Chancellor went on to deal with monetary policy.

'For 1989-90, the target range for M0 will be 1-5 per cent, at envisaged in last year's MTFS. Although it will start the year above the top of that range, its very low growth over the past six months—below 3 per cent at an annualized rate—suggests that it will fairly soon come back within the range.'

'As in the past two years, there is no target for the growth of broad money, or liquidity, but I will continue to take it into account in assessing monetary conditions.'

'Short-term interest rates remain the essential instrument of monetary policy. I repeat what I have stated clearly on a number of previous occasions: interest rates will stay as high as is needed for as long as is needed. For there will be no letting up in our determination to get on top of inflation.'

PUBLIC SECTOR FINANCE

The Chancellor turned to fiscal policy, saying that when the Government first took office the public

sector borrowing requirement was over 5 per cent of G.D.P.

"This we steadily reduced over the years as a deliberate act of policy until, by 1987-88, the PSBR (Public Sector Borrowing Rate) had been eliminated altogether and we started to repay the public debt.

"Accordingly, last year I budgeted for a further Public Sector Debt Repayment, or PSDR, of some £3 billion. In the event, it looks like turning out between four and five times as large, at £14 billion, or 3 per cent of G.D.P. Even if there had been no privatization proceeds at all, the public finances would still be in surplus, to the tune of some £7 billion.

"Government debt as a proportion of G.D.P. is now lower than at any time since the First World War.

"Meanwhile, I — today adding one more entry to the long list of financial controls which we have swept away during our term of office. The last surviving relic of the post-war apparatus for the direction of capital by the State is the Control of Borrowing Order, which since 1946 has involved first the Treasury and then the Bank of England in giving consents for equity and bond issues in the capital markets. As from today it will no longer be necessary for companies wishing to make capital market issues to obtain the Bank of England's consent to the timing of such issues.

"I reaffirm the principle of the balanced budget. However, given the substantial surplus we now have, the path of prudence and caution must be to return to balance not overnight, but gradually, over a period of years. Thus we can expect further years of debt repayment ahead of us.

"Moreover, given the particular uncertainties there are at the present time, I believe it would be right to budget for 1989-90 for a surplus similar to that secured in the year now ending; in other words, a further public sector debt repayment, or PSDR, of some £14 billion. This means that, in the space of three years, we shall have repaid roughly a sixth of the public debt that has accumulated over two centuries. But it also — that it will not be possible in this year's Budget to reduce the burden of taxation; that is to say, to reduce taxation as a share of national income.

"I am sure the whole House will agree that it is essential for taxpayer confidentiality to be properly protected. I therefore propose to introduce provisions in this year's Finance Bill to ensure that it will continue to be a criminal offence for officials or former officials of either of the Revenue Departments to reveal information about the private affairs of a specific taxpayer."

TAXATION ON BUSINESS

Turning to taxation on business the Chancellor said, "I propose to keep the small companies' rate in line with the basic rate of income tax for 1989-90 and to leave the main corporation tax rate unchanged. But I propose to increase the small companies' rate band substantially, by 50 per cent.

"Thus the small companies' rate will apply to companies with profits of under £150,000 and the 35 per cent rate will only be reached at profits of £750,000. These changes will reduce the corporation tax burden for more than half of all those companies that do not already enjoy the benefit of the small companies' rate.

"I propose to increase the value-added tax (VAT) threshold to £23,600, the maximum permitted under European Community law.

"I also have to set the scales for the private use of company cars. This remains far and away the most widespread benefit in kind. When I doubled the car scales in last year's Budget, I made it clear that this still left this benefit significantly undertaxed.

"Accordingly, I propose to increase the car scales by one third for 1989-90. The yield from this will be £160 million in 1989-90 and £200 million in 1990-91. There will be no change in the fuel scales.

"One of the many undesirable features of an income tax system with several higher rates was that since taxpayer's marginal rate could well be very different in different years, the question of which year income related to made a great deal of difference. This was true of Schedule E, where the strict rule is that income is taxed in the year to which it relates, on an accruals basis.

"I therefore propose that income tax under Schedule E should in future be assessed on a receipts basis, with a simple principle that you pay the tax when you receive the income. This will have a transitional cost of £80 million in 1989-90 and £60 million in 1990-91, but in the long term it will yield both extra revenue and a significant saving in both taxpayer's time and Inland Revenue staff."

TAXATION OF SAVINGS

Turning to the taxation of savings, Mr. Lawson said that the role of tax reform is to encourage enterprise and improve economic performance in the medium term. He continued, "It is wholly inappropriate as a response to short-term or cyclical phenomena. So for the taxation of savings, the Government's policy is clear. It is to strengthen and deepen popular capitalism in Britain by encouraging in particular wider share ownership.

"Personal equity plans, or P.E.P.s, were first announced in my 1986 Budget, and started up in January 1987. As the House knows, those who invest in these plans pay no further tax at all, either on the dividends they receive or on any capital gains they may make—indeed, there is no need for them to get involved with the Inland Revenue at all.

"Firstly, I propose to raise the annual limit on the overall amount that can be invested in a P.E.P. from £3,000 to £4,800.

"Second, within that, I propose to raise substantially the amount that can be invested in unit trusts or investment trusts.

"At present, P.E.P. investors are limited to £540 a year, or a quarter of their P.E.P., whichever is the greater, in unit or investment trusts. I propose to increase this limit very substantially, to £2,400 a year; and the whole of a P.E.P. will be able to be invested in unit or investment trusts, up to this limit. To qualify for tax relief, the unit or investment trusts will be required to invest wholly or mainly in UK equities.

"Third, at present, only cash may be paid into a P.E.P. I propose that investors should also be permitted to place directly into a P.E.P. shares obtained by subscribing to new equity issues, including privatization issues.

"Finally, I propose to make a number of important simplifications to the P.E.P. rules so as to make the scheme more flexible, better directed to the needs of small and new investors, and cheaper to administer."

EMPLOYEES' SHARES

"I also have a number of improvements to announce specifically designed to encourage employee share ownership.

"At present the annual limits on the value of shares which can be given under all-employee profit-sharing schemes are £1,250 or 10 per cent of salary up to a ceiling of £5,000. I propose to raise these cash limits to £2,000 and £6,000 respectively.

"Second, I propose to increase the monthly limit on contributions to all-employee save-as-you-earn share option schemes from £100 to £150, and at the same

time to double the maximum discount from market value at which options may be granted from 10 per cent to 20 per cent.

Third, a number of Conservative M.P.s have been concerned that current tax law may be inhibiting the development of employee share ownership plans, otherwise known as Esops. These are distinguished from ordinary approved employee share schemes by the fact that they use a wider variety of finance, acquire more shares and tend to operate on a longer timescale.

'I propose to make it clear that companies' contributions to Esops qualify for corporation tax relief, provided they meet certain requirements designed to ensure that the employees acquire direct ownership of the shares within a reasonable time. I hope that this will encourage more British companies, particularly in the unquoted sector, to consider setting up Esops.'

The Chancellor also proposed changes to profit-related pay schemes.

'First, I have previously announced, I propose to abolish the restriction that, to qualify for the tax relief, prospective profit-related pay must equal at least 5 per cent of total pay. Second, I propose to raise the limit on the annual amount of profit-related pay which can attract relief from £3,000 to £4,000.'

'Third, I propose to enable employers to set up schemes for headquarters and other central units using the profits of the whole company or group for their profit calculations. And fourth, to help share schemes and Esops as well as profit-related pay, I propose to change the so-called material interest rules which may at present unnecessarily exclude employees from schemes where they can already benefit from trust set up for employees.'

TAXATION OF LIFE ASSURANCE

Mr. Lawson had a number of important changes to the taxation of life assurance to propose.

'First, many life offices write pension business as well as life assurance, and they are not required to keep the two businesses entirely separate for tax purposes. This enables them to set the unrelied expenses of the pensions business against the income and gains of their life business, thus giving their life profits unduly favourable tax treatment. The life offices themselves have accepted that this treatment is anomalous and I propose to end it.'

'This change will come into force on January 1, 1990. Together with some related measures to put the taxation of life offices' pension business onto a proper footing, it will yield some £150 million in 1990-91.'

'I propose that the expenses incurred by life offices in attracting new business should continue to be fully deductible for tax purposes from the income and gains of life funds, but should in future be spread over a period of seven years. To give the industry time to adjust, this change will be phased in gradually over the next four years, starting on January 1, 1990.'

'I can say here and now that I propose, as from January 1, 1990, to abolish Life Assurance Policy Duty. And I also propose, from the same date, that the rate of tax payable on the policyholders' share of income and gains of life offices, which at present stands at 35 per cent on unfranked investment income and 30 per cent on realized capital gains, should be reduced to the basic rate of income tax.'

'The net effect of all these changes to the taxation of life assurance will be a cost of £20 million in 1989-90 and a yield of £45 million in 1990-91, rising somewhat in subsequent years.'

'Later this year, U.K. unit trusts will be able to compete freely in Europe and will face competition from analogous Community investment schemes

here. At present, trusts investing in gilt-edged securities or other bonds face a tax disadvantage. They pay corporation tax at 35 per cent on their income but can pass on a credit of only the basic rate to their investor. So I propose that from January 1, 1990, as for life assurance companies, the corporation tax rate on unit trusts that come within the new European Community rules will be equal to the basic rate of income tax. Their investors will then get full credit for all the U.K. tax the trusts pay.'

PENSION SCHEMES

'The tax treatment accorded to pension schemes is particularly favourable; and the extent of this privilege has to be circumscribed by Inland Revenue rules. So pension schemes only qualify for tax relief if they meet certain conditions, notably that the pension paid may not exceed two thirds of final salary; and if they fall foul of any of these rules, they lose all relief.'

'I propose to make it possible for employers to provide whatever pensions package they believe necessary to recruit and reward their employees.'

'However, while it is clearly right that employers should be free to provide whatever pension they see fit, it would not be right to make the present generous tax treatment open ended. I therefore propose to set a limit on the pensions which may be paid from tax-approved occupational schemes, based on a final salary of £60,000 a year.'

'I have deliberately set the ceiling at a level which will leave the vast majority of employees unaffected, and it will be subject to annual uprating in line with inflation.'

'The introduction of this ceiling on tax relief also enables me to simplify and improve the rules for the majority of pension scheme members, in particular to ease the conditions under which people can take early retirement.'

'I also propose to simplify very substantially the rules concerning additional voluntary contributions to pension schemes, or A.V.C.s. In particular, the present requirements for freestanding A.V.C.s place a heavy administrative burden on employers. These requirements will be greatly reduced.'

'Furthermore, if A.V.C. investments perform very well, occupational pensions may at present have to be reduced to keep total benefits within the permitted limits. I propose that in future any surplus A.V.C. funds should be returned to employees, subject to a special tax charge.'

'I have two proposals today to make personal pensions still more attractive.'

'First, I propose to make it easier for people in personal pension schemes to manage their own investments.'

'Second, I propose to increase substantially the annual limits, as a percentage of earnings, on contributions to personal pensions for those over the age of 35.'

TAXES ON SPENDING

Mr. Lawson went on to inform the House about changes to V.A.T. 'Her Majesty's Government are obliged to implement the European Court's judgement that certain of our zero rates of V.A.T. on supplies to business, notably on non-residential construction, but also on fuel and power and on water, are not lawful.'

'This derives from the court's interpretation of the Community's sixth V.A.T. directive to which the U.K. agreed in 1977. The necessary changes will be introduced in this year's Finance Bill, and draft clauses have already been published.'

'From April 1, V.A.T. will be payable in respect of all non-residential construction unless carried out

under agreements entered into before the court ruling. And from August 1 landlords will have the option to tax rents, which means that in most cases no extra V.A.T. will be paid at all.

'So far ■ water for industry and fuel and power for business use are concerned, V.A.T. will not be payable until July 1990. V.A.T. on fuel and power will apply to business users above ■ specified threshold. Private households will remain zero rated.'

'I have been particularly concerned about the impact of the European Court's ruling on charities.'

'Unfortunately, charities' business activities cannot lawfully be shielded from the effects of the ruling, but I have been able to retain zero-rates for construction, water, fuel and power for all charities' non-business activities, for churches, and for most residential accommodation such as hospices, students' hostels and old people's homes.'

'I have considered whether there is anything further I can sensibly do to assist charities with their V.A.T. bills in these special circumstances. I propose to relieve charities from V.A.T. on fund-raising events, on sterilizing equipment for medical use, and on classified advertising.'

'I also propose to relieve from car tax cars leased to the disabled.'

'But in general, I continue to believe that the best way of helping charitable causes through the tax system is through directly encouraging the act of charitable giving.'

'The Payroll Giving Scheme, which I introduced in my 1986 Budget, has been growing steadily. Some 3,400 schemes have now been set up, and over 100,000 employees are already participating, quite ■ few of them giving the full £240 annual limit for tax relief. I now propose to double that limit to £480, or £40 a month.'

EXCISE DUTIES

Turning to excise duties Mr. Lawson said that he proposed to assist the Government's commitment to phasing out leaded petrol by increasing further the tax differential in favour of unleaded petrol. This will now be 4 pence a gallon cheaper. He also proposed to raise the tax on two and three-star petrol. This is intended to encourage garages to phase out two-star petrol and to encourage remaining two-star users to switch to unleaded fuel.

The Chancellor said that these changes would lead to ■ loss of revenue of some £40 million in 1989-90. He proposed to recoup this from Vehicle Excise Duty.

'At the present time, a bus or a coach has to have 66 seats before it pays as much in Vehicle Excise Duty ■ a family car. I propose to rectify this anomaly by increasing the tax rates of this group of vehicles so that they cover their track costs. I also propose to increase the rates of duty for the heaviest non-articulated lorries, to put them on a more equal footing with articulated lorries. At the same time I propose to simplify the system, greatly reducing the number of separate rates of Vehicle Excise Duty.'

TAXES ON CAPITAL

Mr. Lawson said that he had no further changes to propose this year in the rates of excise duty, nor to either the basic or higher rate of income tax. He continued, 'Since I aligned the rates of income and capital gains tax in last year's Budget, it follows that I also propose no change this year in the capital gains tax rates. However, I do have ■ few announcements to make concerning capital gains tax.'

'With the advent of independent taxation from April 1990, married women will acquire their own capital gains tax threshold, so that ■ married couple will enjoy two such exemptions. In the light of this,

I propose to maintain the capital gains tax threshold at £5,000 for 1989-90.'

'Second, I propose to abolish the general holdover relief for gifts.'

'But while the general holdover relief will go, I propose to retain it for gifts of business, farm and heritage assets. And of course gifts between husband and wife will continue to be exempt.'

'Moreover I propose to extend the existing relief for all gifts to charities to gifts of land and buildings to housing associations. Where instead of being given away the land is sold at less than market value, any capital gains tax will be based on the actual proceeds rather than, ■ now, on the market value. I also propose that such gifts and concessionary sales be normally exempt from inheritance tax.'

'In the case of gifts of personal belongings, these benefit from chattels relief, under which any items worth less than £3,000 on disposal are entirely exempt from capital gains tax. I propose to double the chattels exemption limit to £6,000.'

'Third, I propose to change the tax treatment of certain bonds so as to simplify the tax rules and prevent a loss of yield by the use of indexation to create losses and the conversion of income into capital gains.'

TAXES ON INCOME

'To return to income tax, I propose to raise all the main income tax thresholds and allowances by the statutory indexation factor of 6.8 per cent, rounded up. Thus the single person's allowance will rise by £180 to £2,785, and the married man's allowance will rise by £280 to £4,375. The basic rate limit will rise by £1,400 to £20,700.'

'The single age allowance will rise by £220 to £3,400, and the married age allowance by £350 to £5,385. The higher level of age allowance will rise by £230 to £3,540 for a single person, and by £360 to £5,565 for a married couple.'

'I have a number of measures to help the elderly. In 1987 I introduced ■ new and more generous age allowance for those aged 80 and over. I now propose to extend it to include all those aged 75 and over.'

'The income limit for the age allowance will rise by £800 to £11,400, again in line with indexation. However, I propose to reduce the rate at which the age allowance is withdrawn above this income limit. I propose that in future it should be withdrawn at the rate of £1 of allowance for each £2 of income above the limit, instead of the present rate of £2 in every £3. This means that the marginal tax rate for those in the withdrawal band will be reduced to well below 40 per cent.'

'The Finance Bill will also include the provisions to establish the new tax relief for the over-60s health insurance premiums, which I announced to the House in January, and which will take effect from April next year, at ■ cost of £40 million in 1990-91.'

'I have one further change to make to help pensioners. Under the earnings rule, any pensioner who decides to continue to work after reaching the statutory retirement age sees his or her pension docked at ■ rate of 50 per cent on every £1 earned between £75 and £79 ■ week, rising to 100 per cent for every £1 earned over £79 a week. This rule applies until he or she has reached five years beyond the state pension age.'

'The Secretary of State for Social Security and I have agreed that the pensioners' earnings rule should be abolished from the beginning of October, the earliest practicable date. The necessary legislation will be included in the Social Security Bill currently before the House.'

'The cost to public expenditure will be £190 million in 1989-90, which will be entirely met from the

reserve. But the net cost of this measure will be significantly reduced by the income tax payable on the increased pensions.

'Those who wished to defer taking their pension will remain entirely free to do so, and will continue to earn a higher pension in return.'

NATIONAL INSURANCE

Mr. Lawson had one further measure to propose.

'It has long been a feature of the National Insurance system that, once people earn more than the lower earnings limit, which in 1989-90 will be £43, they have to pay National Insurance contributions at the same rate on the whole of their earnings up to the upper earnings limit. There are currently three different rates—5 per cent and 7 per cent for those on lower pay, and the standard rate of 9 per cent.

The two reduced rates, which I introduced for both employers and employees in my 1985 Budget, cut... the burden of National Insurance contributions on the low paid. But the highly desirable reduction in the steep step at the lower earnings limit was achieved at the expense of creating two small steps further up the earnings scale.

This is not a real problem so far as employers' contributions are concerned. But it is for employees. For it inevitably means that, at certain points on the income scale, people can still be worse off if they earn more. Their extra earnings take them from a lower rate band to a higher one, and they therefore lose more in National Insurance contributions than they gain in extra pay.

In agreement with the Secretary of State for Social Security, I now propose to build on my 1985 reform. For pretty well everyone who pays employee National Insurance contributions, I propose to reduce to only 2 per cent the rate of contributions on their earnings up to and including the lower earnings limit. On their earnings above that limit, there will be a single rate of 9 per cent, up to the upper earnings limit, which has already been set for 1989-90 at £325 a week.

This will abolish altogether the steps which at present exist at earnings, for 1989-90, of £75 and £115 a week.

'There will be no change in the contributions payable by employers.

The new system will take effect from the beginning of October, the earliest practicable date. The cost will be £1 billion in 1989-90 and £2.8 billion in 1990-91. The necessary legislation will be included in the Social Security Bill currently before the House.

'The total additional cost of all the measures in this Budget, on an indexed basis, is under £2 billion in 1989-90 and £3.5 billion in 1990-91.'

The Chancellor concluded, 'In this Budget I have reaffirmed the Government's commitment to the defeat of inflation through the maintenance of prudent monetary and fiscal policies. I have budgeted for a debt repayment of £14 billion—the largest ever. I have announced a major reform of, and reduction in, employees' National Insurance contributions; and I have honoured our pledge to abolish the earnings rule for pensioners.'

Debate on the Budget

Mr. Kinnock, the Leader of the Opposition, in his response to the Budget, said 'this is not a budget for low-paid workers. It is another con job from a low-down Chancellor'. Dr. David Owen said that the Chancellor had certainly chosen caution in this Budget. Following four days of debate the Budget motion was carried by 341 votes to 222 and the procedure resolution on future taxation was carried by 337 votes to 221.

On March 21 the Transport Secretary, Mr. Channon, disavowed reports that he had told journalists that the police knew the identities and whereabouts of the terrorists who had blown up PanAm flight 103 over Lockerbie in December 1988. During a heated debate Peter Snape (Labour) was ordered by the Speaker to withdraw an accusation that Mr. Channon was a liar.

On March 22 the Northern Ireland Secretary (Tom King) announced to the House of Commons that he had given provisional agreement for the sale of the Harland and Wolff shipyard in Belfast to a management-employee buyout team.

Energy

Peter Bottomley, Under Secretary of State for Transport, told the House of Commons on March 23 that regulations requiring lorries carrying explosives to display hazard warning labels would be brought before Parliament within a month. This followed the explosion in Peterborough the previous day of an unmarked van carrying explosives: a fireman died in the explosion.

On April 5, the first day of the report stage of the Electricity Bill, the Energy Secretary (Cecil Parkinson) said that the privatization of electricity would not lead to increased use of nuclear power. This followed a claim by Malcolm Bruce (S.D.P.) that the Bill gave nuclear power a privileged and distorted position. On April 10 the Bill was given a third reading by 251 votes to 193.

During an Opposition-led debate on pensions and other benefits on April 11, the Social Security Secretary (John Moore) accused the Labour spokesman, Robin Cook, of abusing Parliamentary procedures by repeatedly intervening to question the Government's record. Mr. Cook said that pensioners had been 'cheated by the Government'. The Opposition motion deplored the Government's pension record was defeated by 308 votes to 220.

Following the Hillsborough Stadium tragedy on April 15, the Home Secretary (Douglas Hurd) announced that Lord Justice Taylor would carry out a full and independent inquiry. The Government rejected requests to postpone further consideration of the Bill introducing a national membership scheme for Football League clubs.

On April 25 the Finance Bill implementing the Budget proposals passed its second reading by 271 votes to 186. In the House of Lords the Electricity Bill was given a second reading.

On April 27 the Security Service Bill completed its passage through Parliament. It was given Royal Assent within thirty minutes of completing its passage.

On May 2 a Labour motion calling for changes to the National Health Service to be delayed until the electorate could vote on them was defeated by 279 votes to 181. During a debate on teacher shortages and low morale in the profession the Education Secretary (Kenneth Baker) announced that the Government would toughen the criteria governing teacher-training courses.

Water

In the House of Lords on May 4 a Conservative back-bench amendment to the Water Bill was defeated by 208 votes to 112. The amendment aimed to turn the ten regional water authorities into statutory water companies rather than public limited companies. On May 8 a cross-party amendment aimed at imposing a special duty on the privatized industry to protect the environment and promote recreation was defeated by 108 votes to 92.

The Government was castigated on May 10 by Labour M.P.s over the leaflet about the community

charge which it had prepared for distribution nationwide. Distribution was prevented by a High Court injunction on May 9 because of inaccuracies in the leaflet. Labour's environment spokesman, Dr. John Cunningham, said 'Mr. Ridley [the Environment Secretary] prevaricated, obfuscated and delayed for six hours before ensuring that the Court's decision was put into practice'. Peter Pike (Labour) called on Mr. Ridley to resign. In the absence of Mr. Ridley from the House the Labour charges were answered by John Gummer, Minister of State for Local Government. On May 11 Labour members continued the attack and during Prime Minister's questions waved copies of the leaflet, which they said were still being delivered. The Leader of the Opposition, Neil Kinnock, had received one.

Following the violent end of the pro-democracy demonstrations in China, the Foreign Secretary, Sir Geoffrey Howe, said on June 7 that there could be no question of Britain continuing normal business with the Chinese authorities and that the visit to Britain of the Chinese Minister of Justice had been cancelled. He said that the Government understood the concern felt by the people of Hong Kong. During Prime Minister's questions Mrs. Thatcher made it clear that the Government did not believe that it could resolve Hong Kong's crisis of confidence in the Chinese government by giving Hong Kong residents right of abode in the United Kingdom.

On June 13 Mr Kenneth Clarke announced to the House of Commons that the Government ■■■■■ advising the public not to eat any brand of hazelnut yoghurt following an outbreak of botulism in north-west England and in Wales.

Football Bill

In the House of Lords on June 16, the Government survived attempts to shelve its legislation introducing a compulsory football membership scheme until

PUBLIC ACTS OF PARLIAMENT 1988-89

This list of Public Acts commences with one Public Act which received the Royal Assent before September 1988 and which was mentioned briefly in the last summary. Those Public Acts which follow received the Royal Assent after August 1988. The date stated after each Act is the date on which it came into operation.

Local Government (Finance) Act 1988, c. 41 (various dates) creates community charges (popularly known as the poll tax) in favour of certain authorities, creates a new rating system, and makes other necessary provisions in connection with the imposition of the new tax and its collection and the financing of local authorities. It also amends the Scottish law on the community charge.

Housing (Scotland) Act 1988, c. 43 (various dates) establishes a body known as Scottish Homes with functions relating to housing; makes provision for houses let on tenancies in Scotland; gives the right to acquire certain houses occupied by secure tenants from public sector landlords to Scottish Homes and approved persons; provides for the limit on discount on the price of houses purchased by secure tenants and for local authority grants to help local authority tenants obtain alternative accommodation to local authority housing; and makes provision for various other matters connected with housing in Scotland.

Foreign Marriage (Amendment) Act 1988, c. II
(day to be appointed) amends the Act of 1892 and
repeals certain obsolete enactments relating to the
validation of marriages of British subjects solemnized
outside the U.K.

after the judicial inquiry into the Hillsborough disaster had published its findings. An Opposition amendment was defeated by 96 votes to 83 and the Football Spectators Bill received its third reading. During the second reading of the Football Spectators Bill in the House of Commons, several Conservative back-bench M.P.s joined with Labour in expressing reservations about the Bill. However, the Bill was given a second reading on June 27 by 330 votes to 252.

In the House of Lords on July 3 the Archbishop of Canterbury (Dr. Robert Runcie) urged the House to permit the ending of the absolute bar on divorcees becoming priests. The Earl of Lauderdale opposed any change and protested that the priesthood was being tampered with. On July 18 the House of Commons rejected the proposal by 51 votes to 45.

On July 4 the Antarctic Minerals Bill was given a second reading in the House of Commons and on July 17 the Bill passed its third reading by 171 votes to 65. The Water Bill completed its passage through Parliament on July 4 when the House of Lords passed it. Royal Assent was granted, paving the way for privatization in November 1989.

Labour members accused the Government of a climbdown when Lord Young in the Lords and Mr. Tony Newton in the Commons announced the Government's response to the Monopolies and Mergers Commission inquiry into the supply of beer. The proposed changes would enable a major freeing of the market without obliging brewers to dispose of large numbers of pubs and clubs. Brian Gould, Labour spokesman on Trade and Industry, said that the Government had succumbed to the lobbying power of the big brewers.

On July 24 the Energy Secretary, Cecil Parkinson, announced that Britain's nine Magnox nuclear power stations would not be privatized — had been planned.

The House of Lords rose for the summer recess on July 27, and the House of Commons rose on July 28.

PUBLIC ACTS OF PARLIAMENT 1988-89

Firearms (Amendment) Act 1988, c. 45 (various dates, some to be appointed) amends the 1968 Act and makes further provision for the regulation of the possession of, and transactions relating to, firearms and ammunition.

European Communities (Finance) Act, 1988, c. 1 (Nov. 15, 1988) amends the definition of 'the Treaties' and 'the Community Treaties' in the European Communities Act 1972, s. 1(2) in order to include the decision of the Council of the Communities made on June 24, 1988 on the Communities' system of resources and the undertaking by the representatives of the E.C. governments to make payments to finance the E.C. general budget for the financial year 1988 (as confirmed at their meeting within the Council on June 24, 1988 in Luxembourg).

School Boards (Scotland) Act 1988, c. 47 (various dates, some to be appointed) makes new provision for the government of public schools in Scotland.

Copyright, Designs and Patents Act 1988, c. [■] (various dates, some to be appointed) restates and amends the law relating to copyright; makes new provisions concerning the rights of performers; confers a design right in original designs and amends

the Registered Designs Act 1949; makes provisions relating to patent agents and trade mark agents and confers patents and designs jurisdiction on certain county courts; amends the law of patents by, for example, making provision for devices designed to circumvent copy-protection of works in electronic form, and new provision penalizing the fraudulent reception of transmissions. The Act also continues the copyright of J. M. Barrie's *Peter Pan* in favour of The Hospital for Sick Children, Great Ormond Street, London, and makes other provision with respect to financial provision and to trade mark protection.

Health and Medicines Act 1988, c. 49 (various dates, some to be appointed) provides for sight testing and instruction in health and welfare in relation to the N.H.S.; amends the Medicines Acts 1968 and 1971; and empowers the Secretary of State to make regulations about H.I.V. testing kits and services.

Housing Act 1988, c. 51 (various dates, some to be appointed) makes further provision for houses let on tenancies or occupied under licences; amends the Rent Act 1977 and the Rent (Agriculture) Act 1976; and establishes a body, Housing for Wales, with functions relating to housing associations. The Act makes various other provisions connected with housing including conferring on approved persons the right to acquire from public sector landlords certain houses occupied by secure tenants.

Rate Support Grants Act 1988, c. 51 (Nov. 15, 1988) makes further provision to rate support grants.

Road Traffic Act 1988, c. 52 (May 15, 1989) consolidates certain enactments relating to road traffic, and makes amendments to give effect to recommendations of the Law Commission and the Scottish Law Commission.

Road Traffic Offenders Act 1988, c. 53 (most provisions on May 15, 1989) consolidates certain enactments relating to the prosecution and punishment (including the punishment without conviction) of road traffic offenders with amendments to give effect to recommendations of the Law Commission and the Scottish Law Commission.

Road Traffic (Consequential Provisions) Act 1988, c. 54 (all provisions except parts of Schedule 2 on May 15, 1989) makes provision for repeals, consequential amendments, transitional and transitory matters, and savings in connection with the consolidation in the Road Traffic Act 1988 and the Road Traffic Offenders Act 1988.

Consolidated Fund (No. 2) Act 1988, c. 55 (Dec. 20, 1988) applies certain sums out of the Consolidated Fund to the service of the years ending on March 31, 1989 and 1990.

Petroleum Royalties (Relief) and Continental Shelf Act 1988, c. 1 (Feb. 7, 1989) confers on holders of certain petroleum licences an exemption from royalties (including royalties in kind) in respect of petroleum from certain onshore and offshore fields, and confers power to amend the Continental Shelf (Designation of Additional Areas) Order 1974 to give effect to an Agreement made between the U.K. and the Republic of Ireland relating to their respective rights in relation to the continental shelf.

Consolidated Fund Act 1989, c. 2 (March 15, 1989) applies certain sums out of the Consolidated Fund to the service of the years ending on March 31, 1988 and 1989.

Elected Authorities (Northern Ireland) Act 1989, c. 3 (various dates, some to be appointed) amends the law relating to the franchise at elections to district councils in Northern Ireland; provides for a declaration against terrorism to be made by candidates at district councils and the Northern Ireland Assembly and by persons co-opted to members of district councils; amends Local Government Act (Northern Ireland) 1972, ss. 3, 4.

Prevention of Terrorism (Temporary Provisions) Act 1989, c. 4 (various dates, some to be appointed) makes provision in place of the 1984 Act; makes further provision in relation to powers of search under, and persons convicted of scheduled offences within, the meaning of the Northern Ireland (Emergency Provisions) Act 1978; and enables the Secretary of State to prevent the establishment of new explosives factories, magazines and stores in Northern Ireland.

Security Service Act 1989, c. 5 (days to be appointed) places the Security Service on a statutory basis; enables certain actions to be taken on the authority of warrants issued by the Home Secretary, with provision for the issue of such warrants to be kept under review by a commissioner; provides for the investigation of complaints about the service by a tribunal or by the commissioner.

Official Secrets Act 1989, c. 6 (day to be appointed) replaces section 2 of the 1911 Act with provisions protecting more limited classes of official information.

Atomic Energy Act 1989, c. 7 (day or days to be appointed) increases the financial limit imposed by section 2(1) of the Nuclear Industry (Finance) Act 1977 in relation to British Nuclear Fuels P.L.C. to £2,000 million; makes provision for the recovery of certain expenses by the Health and Safety Executive; amends sections 18 and 19 of the Nuclear Installations Act 1965 and makes provision in connection with the Convention on Assistance in the Case of Nuclear Accident or Radiological Emergency.

National Maritime Museum Act 1989, c. 8 (day or days to be appointed) transfers land to the trustees of the National Maritime Museum and provides for the functions of the trustees and for connected purposes.

Civil Aviation (Air Navigation Charges) Act 1989, c. 9 (May 25, 1989) enables charges imposed under section 73(1)(a) of the Civil Aviation Act 1982 to be prescribed in units of account defined by reference to more than one currency.

Disabled Persons (Northern Ireland) Act 1989, c. 10 (day or days to be appointed) makes provision equivalent to the Disabled Persons (Services, Consultation and Representation) Act 1986 for Northern Ireland.

Police Officers (Central Service) Act 1989, c. 11 (July 3, 1989) amends section 43 of the Police Act 1964 and section 38 of the Police (Scotland) Act 1967 and makes a number of repeals relating to central service.

Hearing Aid Council (Amendment) Act 1989, c. 12 (part on Sept. 3, 1989 and the rest on Jan. 1, 1990) amends the 1968 Act relating to dispensing hearing aids, the composition of the Council and connected matters.

Dock Work Act 1989, c. 13 (all except s. 7(2) and Schedule 1, Part II, on July 3, 1989, the rest on the dissolution date of the Board) abolishes the Dock

Workers Employment Scheme 1967; repeals the Dock Workers (Regulation of Employment) Act 1946 and dissolves the National Dock Labour Board.

Control of Pollution (Amendment) Act 1989, c. 14 (day or days to be appointed) provides for the registration of carriers of controlled waste and makes further provision with respect to powers exercisable in relation to vehicles used for illegal waste disposal.

Water Act 1989, c. 15 (various dates) makes arrangements for the privatization of the water industry in England and Wales; introduces major changes to the existing structure of water pollution in Great Britain; *inter alia* amends the law relating to water supply; creates the National Rivers Authority to take over the regulatory functions of existing water authorities; and for various other matters connected with water, sewerage, flood defence and fisheries.

Parking Act 1989, c. 16 (day to be appointed) amends the Road Traffic Regulations Act 1984 in relation to parking.

Control of Smoke Pollution Act 1989, c. 17 (Sept. 21, 1989) amends the Clean Air Acts 1956 and 1968 and the Public Health Act 1936.

Common Land (Rectification of Registers) Act 1989, c. 18 (July 21, 1989) provides for the removal of land on which there is and has been since August 5, 1945 a dwellinghouse, or land ancillary thereto, from registers maintained under the Commons Registration Act 1965.

International Parliamentary Organizations (Registration) Act 1989, c. 19 (July 21, 1989) sets up a register of publicly-financed international parliamentary organizations which receive an annual grant-in-aid to fund both British and International Secretariats and whose members are from both Houses of Parliament.

Licensing (Amendment) Act 1989, c. 20 (Sept. 21, 1989) amends section 62 of the 1964 Act by increasing the permitted licensing hours in clubs from five to six.

Antarctic Minerals Act 1989, c. 21 (day to be appointed) provides for exploitation and exploration of mineral resources in Antarctica; it also enables proceedings under the law of the British Antarctic Territory to be brought in England and Wales.

Road Traffic (Driver Licensing and Information System) Act 1989, c. 22 (day or days to be appointed) amends the law relating to driving licences, including abolishing special licences for H.G.V.s and P.S.V.s; regulates the operation of systems providing drivers of motor vehicles with guidance and information from automatically processed data.

Transport (Scotland) Act 1989, c. ■ (Sept. 21, 1989) provides for the transfer to the private sector of the operations of the Scottish Transport Group, other than its shipping operations.

Social Security Act 1989, c. 24 (various dates, some to be appointed) amends the law relating to social security and occupational and personal pension schemes. It also provides for certain employment-related benefit schemes.

Appropriation Act 1989, c. 25 (July 27, 1989) applies a sum out of the Consolidated Fund to the service of the year ending on March 31, 1990; appropriates the supplies granted in the parliamentary session and repeals certain Consolidated Fund and Appropriation Acts.

Finance Act 1989, c. 26 (July 27, 1989) grants certain duties, alters others and amends the law relating to the National Debt and the Public Revenue. For example, it enacts provisions dealing with the E.C. requirements for V.A.T. on commercial property, abolishes the capital gains tax hold over relief on gifts, imposes a slightly different basis for some employees for P.A.Y.E., repeals the close company provisions and brings in a number of anti-avoidance provisions regarding foreign and non-resident companies and trusts.

Pesticides (Fees and Enforcement) Act 1989, c. 27 (Sept. 27, 1989) amends sections 18 (concerned with approval of pesticides) and 19 (enforcement powers) of the Food and Environment Protection Act 1985.

Representation of the People Act 1989, c. 28 (day or days to be appointed) amends the law relating to overseas British citizens wishing to vote at Parliamentary and European Parliamentary elections, and the expenses of candidates at parliamentary by-elections.

Electricity Act 1989, c. 29 (various dates, some to be appointed) provides for the privatization of the electricity industry; provides for the appointment and functions of a Director General of Electricity Supply and of consumers' committees for the electricity supply industry; and for various other connected matters.

Dangerous Dogs Act 1989, c. ■ (Aug. 27, 1989) extends the powers available to a court on complaint under section 2 of the Dogs Act 1871, together with additional rights of appeal and enhanced penalties.

Human Organ Transplants Act 1989, c. 31 (part on July 27 and 28, 1989, the rest on a day or days to be appointed) prohibits commercial dealings in human organs intended for transplanting and restricts the transplanting of human organs between people who are not genetically related.

Fair Employment (Northern Ireland) Act, c. 32 (day or days to be appointed) establishes a Fair Employment Tribunal for Northern Ireland, offices of President and Vice President of the Industrial Tribunals and the Fair Employment Tribunal; amends the Act of 1976; provides for promotion of equality of opportunity in employments and occupations in Northern Ireland between persons of different religious beliefs.

Extradition Act 1989, c. ■ (part on July 27 and the rest on Sept. 27, 1989) consolidates, with amendments, enactments relating to extradition under the Criminal Justice Act 1988, the Fugitive Offenders Act 1967 and the Extradition Acts 1870 to 1935.

Law of Property (Miscellaneous Provisions) Act 1989, c. 34 (Ss. 1 and 4 on a day to be appointed, the rest on Sept. 27, 1989) abolishes the rule in *Bain v. Fothergill* and makes new provision with respect to deeds and their execution and contracts for the sale or other disposition of interests in land.

Continental Shelf Act 1989, c. 35 (July 27, 1989) amends section 3 of the Petroleum Royalties (Relief) and Continental Shelf Act 1989.

GOVERNMENT AND PUBLIC OFFICES

SALARIES 1989-90

Ministerial Salaries (as at Jan. 1, 1989)

Prime Minister	£34,479*
Secretary of State	£34,479
Minister of State (Lords)	£37,047
Minister of State (Commons)	£24,209
Parliamentary Under Secretary	£18,219

* The Prime Minister's salary is £46,109 but since July 1980 she has drawn the same salary ■ Cabinet Minister.

(Ministers who are Members of the House of Commons receive a (reduced) Parliamentary salary (£18,148 in 1989) in addition to this ministerial salary.)

Civil Service (Basic) Salaries (from April 1, 1989)

+ Secretary to the Cabinet and Head of the Home Civil Service	£89,500
+ Permanent Secretary to the Treasury	£83,750

3	Under Secretary.
4	Chief Scientific Officer B, Professional and Technology Directing A.
5	Assistant Secretary, Deputy Chief Scientific Officer, Professional and Technology Directing B.
6	Senior Principal, Senior Principal Scientific Officer, Professional and Technology Superintending Grade.
7	Principal.

ADVISORY, CONCILIATION AND ARBITRATION SERVICE 27 Wilton Street, SW1X 7AX [01-210 3000]

The Advisory, Conciliation and Arbitration Service (ACAS) is an independent organization set up under the Employment Protection Act, 1975, under the management of ■ Council appointed by the Secretary of State for Employment. The functions of the Service are to provide facilities for conciliation, mediation and arbitration as a means of avoiding and resolving industrial disputes; and to provide advisory

services to industry on industrial relations and matters affecting the quality of working life.

ACAS also has offices in Aldershot, Birmingham, Bristol, Cardiff, Glasgow, Leeds, Liverpool, Manchester, Newcastle upon Tyne and Nottingham.

Chairman, D. B. Smith, c.b.

Chief Conciliation Officer (G4), D. G. Boyd, C.B.E.

Director of Resources and General Policy Branch (G5), E. Norcross.

MINISTRY OF AGRICULTURE, FISHERIES AND FOOD Whitehall Place, SW1A 2HH+ [01-270 3000]

The Ministry of Agriculture, Fisheries and Food is responsible for administering government policy for agriculture, horticulture, fisheries and food in England and for many food matters in the United Kingdom as ■ whole. Some of the Ministry's responsibilities for animal health extend to Great Britain. The Agricultural Development and Advisory Service (ADAS) is part of the Ministry. In association with the other Agricultural Departments in the U.K. and the Intervention Board for Agricultural Produce, the Ministry is responsible for the administration of the E.C. common agricultural and fisheries policies and for various national support schemes. It administers arrangements for the control and eradication of animal and plant diseases and for assistance to capital investment in farm and horticultural businesses and flood defence; it exercises responsibilities relating to environmental and rural issues and applied research and development.

The Ministry encourages the development of efficient and competitive food and drink manufacturing industries and, the food and drink importing, distributive and catering trades. It is concerned with the supply and quality of food, food compositional standards, and the labelling and advertising of food and has certain responsibilities for ensuring public health standards in the manufacture, preparation and distribution of basic foods, and planning to safeguard essential food supplies in times of emergency.

*Minister, THE RT. HON. JOHN GUMMER, M.P.
Principal Private Secretary (G7), A. J. Lebrecht.*

Asst. Private Secretary, S. D. Lambert.

Parliamentary Private Secretary, J. M. Jack, M.P.

Special Adviser, R. Gueterbock.

Parliamentary Secretary (Lords), THE BARONESS TRUMPINGTON (Horticulture, Pesticides, Research).

Private Secretary, L. D. Harris.

Parliamentary Secretary (Commons), DAVID CURRY, M.P. (Farming).

Private Secretary, Mrs. L. Reay.

Parliamentary Secretary (Commons), DAVID MCLEAN, M.P. (Food, Countryside).

Private Secretary, M. H. P. Hill.

Parliamentary Clerk, R. L. Alderton.

Permanent Secretary (G1), D. H. Andrews, C.B., C.B.E.

Private Secretary, Miss P. R. Phillips.

AGRICULTURAL AND FOOD RESEARCH COUNCIL

Central Office, Wiltshire Court,
Farnsby Street, Swindon SN1 5AT
[0793-514242]

The Agricultural and Food Research Council (A.F.R.C.) is an independent body established by Royal Charter. It is funded from the Science Budget of the Department of Education and Science, receives commissions from the Ministry of Agriculture, Fisheries and Food, and does research for industry and other bodies.

The Council is responsible for research done in its institutes and in U.K. university departments funded through its research grants scheme. It advises the Department of Agriculture and Fisheries for Scotland (D.A.F.S.) on research in the Scottish Agricultural Research Institutes.

The institutes funded through A.F.R.C. and D.A.F.S., and the university groups supported, form the Agricultural and Food Research Service.

Chairman, The Earl of Selborne, K.B.E.

Deputy Chairman and Secretary, Prof. W. D. P. Stewart, F.R.S.E., F.R.S.

Members, Prof. R. L. Bell, c.b.; Prof. T. L. Blundell, F.R.S.; T. E. Boswell; Prof. D. Boulter; J. E. Cross; R. N. Crossett; Prof. J. M. M. Cunningham, C.B.E., F.R.S.E.; Prof. A. W. Cuthbert, F.R.S.; D. F. Goodwin; A. C. Green; L. P. Hamilton, c.b.; Prof. J. L. Harper, F.R.S.; Prof. W. F. H. Jarrett; Prof. J. R. Krebs; M. Mackie; Prof. A. Nienow; J. A. Parry, C.B.E.; G. T. Pryce; B. C. Read, c.b.e.; Dr. D. W. F. Shannon; Prof. R. Whittenbury.

Deputy Secretary (G2), Prof. J. Hearn.

Director of Central Office (G3), B. G. Jamieson, Ph.D. *Heads of Divisions* (G5), R. Priceaux (*Finance*); J. Dickens (*Personnel*); Dr. J. V. Lake (*Research*); vacant (*Policy*).

Commercial Policy Section (G7), S. M. Lawrie.

Principal Information Officer (G7), M. A. Winstanley.

For institutes and units of the Agricultural and Food Research Service, see Index.

COLLEGE OF ARMS OR HERALDS COLLEGE

Queen Victoria Street, EC4V 4BT
[01-248 2762]

The College is the official repository of the Arms and pedigrees of English, Northern Irish, and Commonwealth families and their descendants, and its records include official copies of the records of Ulster King of Arms, the originals of which remain in Dublin. The 13 officers of the College specialize in genealogical and heraldic work for their respective clients.

Arms have been and still are granted by Letters Patent from the Kings of Arms under Authority delegated to them by the Sovereign, such authority having been expressly conferred on them since at least the fifteenth century. A right to Arms can only be established by the registration in the official records of the College of Arms of a pedigree showing direct male line descent from an ancestor already appearing therein as being entitled to Arms, or by making application through the College of Arms for a Grant of Arms.

The College of Arms is open Mon.-Fri. 10-4, when an Officer of Arms is in attendance to deal with enquiries by the public, though such enquiries may also be directed to any of the Officers of Arms, either personally or by letter.

Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O., C.B., C.B.E., M.C.

Kings of Arms

Garter, Sir Colin Cole, K.C.V.O., T.D., F.S.A.

Clarenceux, Sir Anthony Wagner, K.C.B., K.C.V.O., F.S.A.

Norroy and Ulster, J. P. B. Brooke-Little, C.V.O., F.S.A.

Heralds

Portcullis, P. B. Spurrier.

Bluemanstle, T. D. McCarthy.

Rouge Croix, H. E. Paston-Bedingfeld.

Rouge Dragon, T. H. S. Duke.

COURT OF THE LORD LYON

H.M. New Register House, Edinburgh EH1 3YT

[031-556 7255]

The Court of the Lord Lyon is the Scottish Court of Chivalry, (including the genealogical jurisdiction of the *Ri-Sennachie* of Scotland's Celtic Kings) and adjudicates rights to arms and administration of The Scottish Public Register of All Arms and Bearings and Public Register of All Genealogies. The Lord Lyon presides and judicially establishes rights to existing arms or succession to Chiefship, or for cadets with scientific "differences" showing position in clan or family. Pedigrees are also established by decrees of Lyon Court, and by Letters Patent. As Royal Commissioner in Armory, he grants Patents of Arms (which constitute the grantee and heirs noble in the Noblesse of Scotland) to "virtuous and well-deserving" Scotsmen, and petitioners (personal or corporate) in Her Majesty's overseas realms of Scottish connection, and issues birthbribes.

Lord Lyon King of Arms, Malcolm Rognvald Innes of Edingight, C.V.O., W.S., F.S.A. scot.

Heralds

Albany, J. A. Spens, R.D., W.S.

Rothesay, Sir Crispin Agnew of Lochnaw, Bt.

Ross, C. J. Burnett, F.S.A. scot.

Pursuivants

Kintyre, J. C. G. George, F.S.A. scot.

Unicorn, Alastair Campbell of Airds, younger, F.S.A. scot.

Lyon Clerk and Keeper of Records, Mrs. C. G. W. Roads, F.S.A. scot.

Procurator-Fiscal, I. R. Guild, C.B.E., W.S.

Herald Painter, Mrs. J. Phillips.

Macer, T. C. Gray.

ART GALLERIES, ETC.

OFFICE OF ARTS AND LIBRARIES
Horse Guards Road, SW1P 3AL
[01-270 3000]

The Office of Arts and Libraries, formerly part of the Department of Education and Science, became a separate department in 1983. It has general responsibilities for arts policy and its broad objectives are to assist the provision and development of the performing and visual arts, to maintain and enhance the collections of national museums and art galleries, to help preserve the national heritage and to sustain and develop national collections of literary and archive material. It directly funds some 20 bodies including the Arts Council, the eleven national museums and galleries, the British Library and its St. Pancras project. The Office of Arts and Libraries also has policy responsibilities towards the public library and local museum services. The Government Art Collection, which is responsible for the acquisition, maintenance and display of works of art in major government buildings in this country and abroad, forms part of the Office of Arts and Libraries.

Minister for the Arts, THE RT. HON. RICHARD LUCE, M.P.

Private Secretary, M. Le Jeune.

Parliamentary Private Secretary, J. Hanley, M.P.

Head of the Office of Arts and Libraries (Deputy Secretary), C. E. Henderson.

Arts and Heritage

Assistant Secretary, R. H. Stone.

Principals, P. J. Fallon; Miss M. J. Lamont; S. J. Alcock; Miss C. R. Morrison.

Museums, Galleries, Finance and Establishments

Assistant Secretary, Mrs. S. D. Brown.

Principals, I. D. Baxter; D. M. Mainwood; E. A. Yeo.

Libraries and Information Services

Assistant Secretary, C. C. Leamy.

Principal, A. Poultier.

Library Advisers, P. J. Beauchamp; Miss C. R. Lutgens.

British Library Project St. Pancras

Project Director, J. R. W. Pardey.

Principal, E. T. James.

Government Art Collection

Curator, Dr. W. Baron.

ARTS COUNCIL OF GREAT BRITAIN
105 Piccadilly, W1V 0AU
[01-629 9495]

The Arts Council, an independent body established by Royal Charter in 1946, is Great Britain's principal channel for public financial support of the arts. It funds the major arts organizations in England, the Regional Arts Associations and the Scottish and Welsh Arts Councils. It also provides a service of advice, information and help to artists, arts organizations and the general public.

Its aims are to develop and improve the understanding and practice of the arts and to increase their accessibility to the public.

The Council receives a grant-in-aid from the Government, and for the year 1989-90 the amount is £155 million.

Chairman, P. Palumbo.

Secretary-General, L. Rittner.

ROYAL FINE ART COMMISSION
7 St. James's Square, SW1Y 4JU
[01-839 6537]

Appointed in May, 1924, the Commission is required to advise Departments of State on, and call their attention to, any project or development which might affect national or public amenities.

Chairman, The Lord St. John of Fawsley, P.C.

Commissioners, R. D. Carter, C.B.E.; Dame Elizabeth Chesterton, D.B.E.; Sir Philip Dowson, C.B.E.; M. Girouard, ph.D.; Sir Alexander Gordon, C.B.E.; The Duke of Grafton, K.G., F.S.A.; M. J. Hopkins; R. MacCormac; P. Nuttgens, C.B.E., ph.D.; Mrs. J. Nutting; D. Hamilton Fraser, R.A.; Sir Philip Powell, C.H., O.B.E., R.A.; J. Sutherland; Miss W. Taylor, C.B.E.; W. Whitfield, C.B.E.; J. Winter, M.B.E.; H. T. Moggridge, O.B.E.; S. A. Lipton.

Secretary (G6), S. Cantacuzino, C.B.E.

ROYAL FINE ART COMMISSION FOR SCOTLAND

9 Atholl Crescent,
Edinburgh EH3 8HA
[031-229 1109]

Chairman, Prof. A. J. Youngson, C.B.E.

Commissioners, Miss K. Borland; J. Boys, F.R.I.B.A.; W. D. Campbell; B. Gasson, O.B.E.; Dr. Deborah Howard, ph.D., F.S.A.; W. K. Mackay; A. S. Matheson, F.R.I.B.A.; Prof. I. Metzstein; G. Ogilvie-Laing; R. R. Steedman, R.S.A.; Mrs. F. M. E. Walker.

Secretary, C. Prosser.

NATIONAL GALLERY
Trafalgar Square, WC2N 5DN

[01-839 3321]

Hours of opening.—Weekdays 10-6, Sun. 2-6. Closed on Good Friday, Christmas Eve, Christmas Day, Boxing Day, New Year's Day and May Day Bank Holiday.

The National Gallery was founded in 1824, following a Parliamentary grant of £60,000 for the purchase and exhibition of the Angerstein collection of pictures. The present site was first occupied in 1838 and enlarged and improved at various times throughout the years. A substantial extension to the north of the building with a public entrance in Orange Street was opened in 1975, and a new wing, the Sainsbury wing, is under construction. Expenses for 1989-90 are estimated at £12,425,000.

Board of Trustees

Chairman, Hon. J. Rothschild.

Trustees, H.R.H. The Prince of Wales, K.G., K.T., G.C.B., P.C.; Mrs. C. Hubbard; M. Cowdy; Lord Alexander of Weedon, q.c.; F. St. J. Gore, C.B.E.; B. Gascoigne; M. Andrews; P. Troughton; Sir Rex Richards, F.R.S.; The Countess of Airlie, c.v.o.; Sir Derek Oulton, K.C.B., q.c.

TATE GALLERY

Millbank, SW1P 4RG

[01-821 1313]

Hours of opening.—Weekdays 10-5.50. Sun. 2-5.50. Closed on New Year's Day, Good Friday, May Day Holiday, Christmas Eve, Christmas Day and Boxing Day.

The Tate Gallery comprises the National Collections of British painting and 20th century painting and sculpture. Works are displayed at the Gallery in two collections: The British Collection and the Modern Collection. The Gallery was opened in 1897, the cost of erection (£80,000) being defrayed by Sir Henry Tate, who also contributed the nucleus of the present collection. The Turner Wing, built at the expense of Sir Joseph Duveen, was opened in 1920. Lord Duveen defrayed the cost of galleries to contain the collection of modern foreign painting, completed in 1926, and a new sculpture hall, completed in 1937. The latest extension to the Tate Gallery, the Clore Gallery for the Turner Collection, was opened by H.M. The Queen on April 1, 1987. The Tate Gallery Liverpool, sited in the Albert Dock opened in May 1988. Total government funding for 1989-90 is £12,447,000.

UNITED KINGDOM ATOMIC ENERGY AUTHORITY
 11 Charles II Street, SW1Y 4QP
 [01-930 5454]

Established by the Atomic Energy Authority Act, 1954, the Authority is responsible for providing research and development support for the U.K. nuclear power programme. It also undertakes work on other civil applications of nuclear energy and on various projects outside the nuclear field on repayment. Since April 1986 the UKAEA has been required by the Government to operate on a quasi-commercial footing. The UKAEA has eight laboratories and London headquarters employing some 12,000 people.
Chairman, J. G. Collier £75,000
Members (full-time), Dr. G. G. E. Low, C.B.E.; C. C. S. Chapman; Dr. B. L. Eyre.

Members (part-time) Prof. Sir Peter Hirsch, F.R.S.; J. Bullock; R. Sanderson, O.B.E.; J. N. Maltby, C.B.E.; Prof. Sir Roger Elliott, F.R.S.; J. A. Gardiner (each £6,400).

Secretary, M. A. W. Baker.

THE AUDIT COMMISSION FOR LOCAL AUTHORITIES IN ENGLAND AND WALES
 1 Vincent Square, SW1P 2PN
 [01-828 1212]

The Audit Commission was set up in 1983. Its main responsibility is for appointing external auditors for local authorities and certain other public bodies in England and Wales. The auditors may be from the District Audit Service or from a private firm of accountants. The Commission also tries to ensure that local authorities are getting, and giving, value for money through special studies of their services. More recently, the Government has extended the Audit Commission's powers to carry out the external audit of the National Health Service.

The Commission has 15–17 members appointed by the Secretary of State for the Environment in consultation with the Secretary of State for Wales. Though appointed by the Secretary of State the Commissioners are responsible to Parliament.

Chairman, D. J. S. Cooksey.
Deputy Chairman, H. S. Axton.
Controller of Audit, H. J. Davies.
Deputy Controller, J. C. Nicholson, C.B.E.

THE COMMISSION FOR LOCAL AUTHORITY ACCOUNTS IN SCOTLAND
 18 George Street, Edinburgh EH2 2QU
 [031-226 7346]

The Commission was set up in 1975. It is responsible for securing the audit of the accounts of Scottish local authorities and certain joint boards and joint committees. Amongst its duties the Commission is required to deal with reports made by the Controller of Audit on items of account contrary to law; incorrect accounting; and losses due to misconduct, negligence and failure to carry out statutory duties.

Members are appointed by the Secretary of State for Scotland.
Chairman, Prof. J. R. Small.
Controller of Audit, J. Broadfoot.
Secretary, K. Ferguson.

THE BANK OF ENGLAND
 Threadneedle Street, EC2R 8AH

The Bank of England was incorporated in 1694 under Royal Charter. It is the banker of the Government on whose behalf it manages the Note Issue and the National Debt. As central reserve bank of the country, the Bank keeps the accounts of British banks, who maintain with it a proportion of their cash resources, and of most overseas central banks.
Governor, Rt. Hon. Robin Leigh-Pemberton.
Deputy Governor, Sir George Blunden.

Directors, Dr. D. V. Atterton, C.B.E.; Hon. Sir John Baring, C.V.O.; Sir Adrian Cadbury; F. B. Corby; Sir Colin Corness; A. D. Crockett; J. S. Fleming; R. D. Galpin; E. A. J. George; Sir Robert Haslam; Sir Martin Jacomb; Sir Hector Laing; G. H. Laird; B. Quinn; Sir David Scholey, C.B.E.; D. A. Walker; Sir Leslie Young, C.B.E.

Associate Directors, P. H. Kent; H. C. E. Harris.
Advisers to the Governor, J. P. Charkham; A. L. Coleby; Sir Peter Petrie.

Assistant Directors, I. Plenderleith; R. A. Barnes.
Chief of Banking Department (Chief Cashier), G. M. Gill.

Chief Registrar, J. G. Drake.
General Manager, Printing Works, A. W. Jarvis.
Secretary, G. A. Croughton.
Head of Information Division, J. R. E. Footman.
The Auditor, J. Bartlett.

BOUNDARY COMMISSIONS

The Commissions are constituted under the Parliamentary Constituencies Act, 1986. The Speaker of the House of Commons is ex-officio chairman of all four Commissions in the United Kingdom. Each of the four Commissions is required by law to keep the parliamentary constituencies in their part of the United Kingdom under review. Each of the three Commissions in Great Britain is required by law to keep the European Parliamentary constituencies in their part of Great Britain under review.

BRITISH BROADCASTING CORPORATION
Broadcasting House, W1A 1AA
[01-580 4468]

The B.B.C. was incorporated under Royal Charter as successor to the British Broadcasting Company, Ltd., whose licence expired Dec. 31, 1926. Its present Charter came into force Aug. 1, 1981, for 15 years. The Chairman, Vice-Chairman and other Governors are appointed by the Queen in Council. The B.B.C. is financed by revenue from receiving licences for the Home services and by grant-in-aid from Parliament for the External services. The total number of receiving licences in the U.K. at March 31, 1989 was 19,395,963, of which 1,926,805 were for monochrome receivers and 17,469,158 for colour receivers. Annual television fees are: monochrome £22; colour £66. Television licence fees became index-linked from April 1, 1988.

Deputy Chairman, D. W. Kendall.

Executive Members, M. J. Edwards, C.B.E. (*Commercial Director*); M. H. Butler (*Finance Director*); K. Moses, C.B.E. (*Technical Director*).

Non-Executive Members, C. Barker; Dr. D. V. Atterton, C.B.E.; Dr. T. J. Parker; Sir Ronald Dearing, C.B.E.; D. B. Walker; J. P. Erbé.

Secretary, M. S. Shelton.

Industrial Relations Director, K. Hunt.

Director, Group Operations, A. Wheeler.

THE BRITISH COUNCIL

10 Spring Gardens, SW1A 2BN

[01-930 8466]

The British Council was established in 1934 and incorporated by Royal Charter in 1940.

It is an independent, non-political organization which promotes Britain abroad. It provides access to British ideas, talents and experience in education and training, books and periodicals, the English language, the arts, the sciences and technology.

The Council is represented in more than eighty countries and runs 138 offices, 116 libraries and 52 English language schools around the world.

The Council's annual turnover in 1989-90 is estimated at £312 million, including grants from the Foreign and Commonwealth Office and the Overseas Development Administration. The Council's own earnings now exceed £72 million.

Chairman, Sir David Orr, M.C.

Director-General, Sir Richard Francis, K.C.M.G.
£62,750

BRITISH RAILWAYS BOARD

Euston House, 24 Eversholt Street,
P.O. Box 100, NW1 1DZ
[01-928 5151]

The British Railways Board came into being on Jan. 1, 1963 under the terms of the Transport Act, 1962. The Board became responsible for the provision of railway services in Great Britain and for catering and other services formerly carried on by the British Transport Commission.

Chairman, Sir Robert Reid, C.B.E. £92,691

Vice-Chairmen, D. Fowler, C.B.E.; D. D. Kirby, C.B.E.

Members, H. G. De Ville, C.B.E.*; S. D. Jenkins*; D. P. Hornby*; A. J. G. Sheppard*; R. W. Tooley, C.B.E.*;

Ms. A. Biss*; Miss K. T. Kantor*; D. L. Davies; J. B. Cameron; J. K. Welsby, D. E. Rayner; J. J. O'Brien.

* Part-time members, paid pro rata.

B.S.I. (BRITISH STANDARDS INSTITUTION)

2 Park Street, W1A 2BS

[Enquiry Section: B.S.I., Linford Wood, Milton Keynes, MK14 6LE. Tel. 0908-221166]

B.S.I. (the British Standards Institution) is the recognized authority in the U.K. for the preparation and publication of national standards for industrial and consumer products. In consultation with the interests concerned, B.S.I. prepares standards relating to nearly every sector of the nation's industry and trade.

British Standards are issued for voluntary adoption, though in a number of cases compliance with a British Standard is required by legislation. B.S.I. operates certification schemes under which industrial and consumer products are certified in complying with the relevant British Standard and manufacturers satisfying the requirements of such schemes may use the Institution's certification trade

marks, known as the 'Kitemark' and the 'Safety Mark'.

B.S.I. is financed by voluntary subscriptions, an annual Government grant, the sale of its publications, and fees for testing and certification. There are more than 20,000 subscribing members of B.S.I.

Director General, Dr. I. Dunstan.

BRITISH TECHNOLOGY GROUP

101 Newington Causeway, SE1 6BU

[01-403 6666]

British Technology Group (B.T.G.) is a self-financing technology transfer organization. It is appointed by the Government to license new scientific and engineering products to industry and provides finance for the development of new technology. B.T.G. promotes the development of commercial use of new technology arising from research at U.K. universities, polytechnics, research councils and Government research establishments. B.T.G. provides finance where further development is needed before inventions can be licensed to industry. B.T.G. can also offer finance to companies that want to develop new products and processes based on their own technology.

Chairman, C. Barker.

Chief Executive, I. A. Harvey.

BRITISH TOURIST AUTHORITY

Thames Tower, Black's Road, W6 9EL

[01-846 9000]

The British Tourist Authority has specific responsibility for promoting tourism to Great Britain from overseas. It also has a general responsibility for the promotion and development of tourism and tourist facilities within Great Britain as a whole. With the agreement of the corresponding bodies in Northern Ireland, the Channel Islands and the Isle of Man, the Authority may also carry out promotion overseas on behalf of those territories.

Chairman, D. R. Y. Bluck, O.B.E. (part-time).

Chief Executive, M. G. Medlicott.

English Tourist Board

Thames Tower, Black's Road, W6 9EL

[01-846 9000]

Scottish Tourist Board

23 Ravelston Terrace, Edinburgh EH4 3EU

[031-332 2433]

Wales Tourist Board

Brunel House, 2 Fitzalan Road, Cardiff CF2 1UY

[0222-499909]

The English Tourist Board, the Scottish Tourist Board and the Wales Tourist Board are responsible for developing and marketing the tourist industry in their respective countries. The Boards' main objectives are to promote holidays and to encourage the provision and improvement of tourist amenities.

BRITISH WATERWAYS BOARD

Melbury House, Melbury Terrace, NW1 6JX

[01-262 6711]

Chairman, D. C. Ingman (part-time).

Vice-Chairman, Sir Peter Hutchison, Bt. (part-time).

Members (all part-time), J. Gordon; Dr. B. Goodman; M. Golder; D. H. R. Yorke.

Chief Executive, B. C. Dice.

Secretary and Parliamentary Adviser, T. T. Luckcuck.

BROADCASTING STANDARDS COUNCIL

5-8 The Sanctuary, SW1P 3JS

[01-233 0544]

The Council was set up in 1988 to develop a code on the portrayal of sex and of violence and standards of taste and decency in all forms of broadcasting and video work in consultation with producers and the public; and to commission relevant research. Members of the Council are appointed by the Home Secretary. (The appointments are part-time.)

Chairman, The Lord Rees-Mogg £30,000

Deputy Chairman, Miss J. Barrow, O.B.E.

£15,000-£22,000

Members, R. Barker, O.B.E., R.D.; The Bishop of Peterborough; A. Dubs; Dr. R. Brinley Jones; Dr. Jean Curtis-Raleigh; Rev. C. Robertson . . . £9,000

Director, C. Shaw.

Deputy Director, D. Houghton.

THE BROADS AUTHORITY

Thomas Harvey House, 18 Colegate,

Norwich NR3 1BQ

[0603-610734]

The Broads Authority is a special statutory authority set up under the Norfolk and Suffolk Broads Act 1988, with powers and responsibilities similar to those of National Park Authorities. The functions of the Authority, as set out in the Act, are: to conserve and enhance the natural beauty of the Broads; to promote the enjoyment of the Broads by the public; and to protect the interests of navigation.

The Authority comprises 35 members, appointed by Norfolk County Council (4); Suffolk County Council (2); Broadland District Council (2); Great Yarmouth Borough Council (2); North Norfolk District Council (2); Norwich City Council (2); South Norfolk District Council (2); Waveney District Council (2); the Countryside Commission (2); the Nature Conservancy Council (1); the Great Yarmouth Port and Haven Commissioners (2); Anglian Water (1); the Secretary of State for the Environment (9); and two from amongst members of the Authority's statutory Navigation Committee who are not already members of the Authority.

Chairman, J. S. Peel, m.c.

Chief Executive, M. A. Clark.

CABINET OFFICE

The Cabinet Office comprises the Secretariat, who support Ministers collectively in the conduct of Cabinet business; and the Office of the Minister for the Civil Service (O.M.C.S.) which is responsible for the management and organization of the Civil Service and recruitment into it, efficiency, and senior appointments. Other functions are from time to time laid on the Office, some ephemerally and some permanently. Non-departmental Ministers may be attached to the Office.

The functions of the Cabinet Office (O.M.C.S.) are in support of the Prime Minister in her capacity as Minister for the Civil Service, with responsibility for day-to-day supervision delegated to the Minister of State, Privy Council Office.

(For Salaries, see page 293)

**CERTIFICATION OFFICE FOR
TRADE UNIONS AND
EMPLOYERS' ASSOCIATIONS**
27 Wilton Street, SW1X 7AZ
[01-210 3733/4]

The Certification Officer is an independent statutory authority appointed by the Secretary of State for Employment. He is responsible for receiving and scrutinizing annual returns from trade union and employers' associations; for reimbursing certain costs of trade unions' postal ballots; for dealing with complaints concerning trade union elections; for ensuring observance of statutory requirements governing political funds and trade union mergers; and for certifying the independence of trade unions.

Certification Officer, M. Wake.

Assistant Certification Officer, G. S. Osborne.

Scotland
58 Frederick Street, Edinburgh EH2 1LN
[031-226 3224]

Assistant Certification Officer for Scotland, J. L. J. Craig.

CHARITY COMMISSION
St. Alban's House, 57-60 Haymarket, SW1Y 4QX
[01-210 3000]

Northern Office:
Graeme House, Derby Square, Liverpool L2 7SB
[051-227 3191]

The Charity Commissioners are appointed under the Charities Act, 1960, principally to further the work of charities in England and Wales by giving advice and information, and by investigating and checking abuses. The Commissioners maintain a register of charities; give consent to land transactions; help to modernize the purposes and administrative machinery of charities; and, in the name of one of their staff, the Official Custodian for Charities, hold investments for charities.

Salaries

<i>Commissioners</i>	£34,095-£47,600
<i>Grade 5</i>	£28,170-£41,225

OFFICE OF THE CHIEF ADJUDICATION OFFICER

Cumberland House,

15-17 Cumberland Place, Southampton SO9 2DD
[0703-330066]

The Chief Adjudication Officer is an independent authority under the Social Security Act, 1975 (as amended) appointed by the Secretary of State for Social Services to give advice to adjudication officers (who make decisions of first instance on all claims for Social Security cash benefits), to keep under review the operation of the system of adjudication and to report annually to the Secretary of State on adjudication standards. The Office also enters written observations on all appeals made to the Social Security Commissioners.

Chief Adjudication Officer, M. E. H. Platt.

CHURCH COMMISSIONERS

1 Millbank, SW1P 3JZ
[01-222 7010]

The Church Commissioners were established on April 1, 1948, by the amalgamation of *Queen Anne's Bounty* (established 1704) and the *Ecclesiastical Commissioners* (established 1836).

The Commissioners' main task is to improve the stipends and housing of the Church of England clergy and to provide them and their widows with adequate pensions and assistance with housing in retirement. They also carry out administrative duties in connection with pastoral reorganization and redundant churches, and have been designated by the General Synod as the Central Stipends Authority of the Church of England.

The Commissioners' income for the year ended Dec. 31, 1988, was derived from the following sources:—

	£ million
Stock exchange investments	54·8
Land and property	53·5
Mortgages, loans, etc.	15·3
Trust income, and diocesan/parish contribu-	
tions for stipends	59·6
	£183·5

This income was applied as follows:—

Clergy stipends	100·1
Clergy and widows' pensions	44·7
Clergy houses	22·7
Episcopal administration and payments to	
Chapters	6·8
Church buildings	4·5

Constitution

The 2 Archbishops, the 41 diocesan Bishops, 5 deans or provosts, 10 other clergy and 10 laymen appointed by the General Synod; 4 laymen nominated by the Queen; 4 persons nominated by the Archbishop of Canterbury; The Lord Chancellor; The Lord President of the Council; The First Lord of the Treasury; The Chancellor of the Exchequer; The Secretary of State for the Home Department; The Speaker of the House of Commons; The Lord Chief Justice; The Master of the Rolls; The Attorney-General; The Solicitor-General; The Lord Mayor and two Aldermen of the City of London; The Lord Mayor of York and one representative from each of the Universities of Oxford and Cambridge.

Church Estates Commissioners

First, Sir Douglas Lovelock, K.C.B.

Second, Rt. Hon. Michael Alison, M.P.

Third, Mrs. M. H. Laird.

Officers

Secretary, J. E. Shelley.

Deputy Secretary, P. Locke.

The Corporation is authorized to borrow up to £750,000,000.

Chairman (*part-time*), P. Leslie.

Deputy Chairman (*part-time*), Sir Michael Caine.

Members (*part-time*), Mrs. A. Wright; V. Robertson, O.B.E.; M. D. Nightingale, O.B.E.; Prof. M. Faber; M. Robinson.

General Manager, J. D. Eccles, C.B.E.

COMMONWEALTH SECRETARIAT
(see p. 626)

**COMMONWEALTH WAR GRAVES
COMMISSION**

2 Marlow Road, Maidenhead, Berkshire SL6 7DX
[0628-34221]

The Commonwealth War Graves Commission (formerly Imperial War Graves Commission) was founded by Royal Charter in 1917. It is responsible for the commemoration of 1,695,000 members of the forces of the Commonwealth who fell in the two world wars. More than one million graves are maintained in 23,104 burial grounds throughout the world. Over three-quarters of a million men and women who have no known grave or who were cremated are commemorated by name on memorials built by the Commission.

The funds of the Commission are derived from the six Governments participating in its work—the U.K., Australia, Canada, India, New Zealand and South Africa.

Dawson, Q.C.; C. Fawcett, Q.C.; W. Gage, Q.C.; B. Green, Q.C.; G. M. Hamilton, Q.C.; Sir Arthur Hoole; J. Law, Q.C.; M. E. Lewer, Q.C.; J. Leighton Williams, Q.C.; C. Lindsay, Q.C.; Lord Macaulay of Bragar, Q.C.; D. Mackay, Q.C.; Sir Denis Marshall; Mrs. B. Mills, Q.C.; Sir Michael Morland, Q.C.; Sir John Palmer; I. M. S. Park, C.B.E.; Miss S. Ritchie, Q.C.; D. B. Robertson, Q.C.; C. Seagroatt, Q.C.; Mrs. J. Smith, Q.C.; R. Smith, Q.C.; L. Stuart Shields, Q.C.; D. M. Thomas, O.B.E., Q.C.; D. O. Thomas, Q.C.; P. Weitzman, Q.C.; C. H. Whitby, Q.C.

Secretary and Solicitor, D. M. North.

Deputy Secretary, D. J. White.

CROFTERS COMMISSION

4-6 Castle Wynd, Inverness IV2 3EQ
[0463-237231]

Chairman (part-time), H. Maclean.

Members (part-time), A. I. Macarthur; B. T. Hunter; D. A. Morrison; P. Morrison; I. G. Munro; D. Macdonald.

Secretary (G6), A. Johnston.

CROWN AGENTS FOR OVERSEAS GOVERNMENTS AND ADMINISTRATIONS

St. Nicholas House, St. Nicholas Road, Sutton,
Surrey, SM1 1EL
[01-643 3311]

The Crown Agents act on behalf of governments and public authorities in the developing world. Incorporated by Act of Parliament, they provide commercial, financial and professional services to public sector authorities and the major international development agencies. They do not act for individuals or for commercial concerns in the private sector.

Chairman, Sir Peter Graham, O.B.E.

Managing Director, P. F. Berry.

CROWN ESTATE COMMISSIONERS

13-16 Carlton House Terrace, SW1Y 5AH
[01-210 3000]

The Land Revenues of the Crown in England and Wales have been collected on the public account since

1760, when George III surrendered them and received a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000 and the net return to about £11,000.

In the year ended March 31, 1989, the gross income from the Crown Estate totalled £81,500,000. The total expenditure was £22,000,000. The sum of £41,000,000 was paid to the Exchequer in 1988-89 as Surplus Revenue.

The Land Revenues in Ireland have been carried to the Consolidated Fund since 1820; from April 1, 1923, — regards Southern Ireland, they have been collected and administered by the Irish Government.

The Land Revenues in Scotland were transferred to the Commissioners in 1833.

First Commissioner and Chairman (part-time), The Earl of Mansfield and Mansfield.

Second Commissioner (and Secretary) (G2), C. Howes. *Commissioners (part-time)*, R. B. Caws, C.B.E.; P. Sober; O. H. Colburn; G. D. Lillington, C.B.E.; Capt. Sir Iain Tennant, K.T.; J. N. C. James.

Deputy Chief Executive, H. B. Clarke £53,550
Business Manager, Agricultural Estates (G5), R. J. Mulholland.

Corporate Services Manager (G6), M. Beckwith.
Principals (G6), F. G. Parrish; (G7), J. Stumbke; J. S. Ellingford; J. E. Ford.

Organization and Establishments Officer (G7), R. Blake.

Accountant and Receiver-General (G5), D. E. G. Griffiths.

Legal Adviser, M. L. Davies £32,219-£33,819

Senior Principals (G6), H. Turnsek; J. B. Postgate.
Principals (G7), R. T. Hayward; P. Horner.
Senior Legal Assistant, M. A. J. Cordingley.

Scotland
10 Charlotte Square, Edinburgh

Crown Estate Receiver for Scotland (G6), M. J. Graves- stock.

Solicitor, Scotland, D. F. Stewart.

Windsor Estate

Surveyor and Deputy Ranger, A. R. Wiseman, M.V.O.
£36,786

Crown Estate Forestry Officer and Chief Forester, Windsor (G7), J. J. Taylor.

BOARD OF CUSTOMS AND EXCISE

New King's Beam House, 22 Upper Ground, SE1 9PJ
[01-620 1313]

Commissioners of Customs were first appointed in 1671 and housed by the King in London. The present 'Long Room' in the Custom House, Lower Thames Street, EC3, replaced that built by Charles II and was rebuilt after destruction by fire in 1718 and 1814. The Excise Department was formerly under the Inland Revenue Department and was amalgamated with the Customs Department on April 1, 1909.

H.M. Customs and Excise is responsible for collecting and administering customs and excise duties and value added tax and advises the Chancellor of the Exchequer on any matters connected with them. The Department is also responsible for preventing and detecting the evasion of revenue laws and for enforcing a range of prohibitions and restrictions on the importation of certain classes of goods. In addition, the Department undertakes certain agency work on behalf of other departments, including the

compilation of U.K. overseas trade statistics from customs import and export documents.
(For Salaries, see page 293).

The Board

Chairman (G1), J. B. Unwin, C.B.
Private Secretaries, Miss J. E. Andrews; Miss J. H. Daniels.

Deputy Chairmen (G2), Mrs. V. P. M. Strachan; P. Jefferson Smith.

Commissioners (G3), R. Craggs; D. J. Howard; P. Nash; A. W. Russell; Ms. D. J. Seammen; P. G. Wilmott.

Headquarters Office

Assistant Secretaries (G5), I. D. Savins; P. R. H. Allen; J. Vaughan; P. Kent; D. A. Walton; D. F. O. Battle; B. J. Cockerell; J. W. Tracey; D. E. Barratt; J. C. Stevenson; Mrs. F. R. Boardman; D. Gaw; M. R. Brown; N. Hodson; R. Shepherd; I. Walton; A. Killikelly; M. J. Eland; A. C. Sawyer; M. Peach; C. Arnott; R. L. H. Lawrence; K. M. Romansk; Ms. D. Barrett.

Head of Press and Information Division (G7), G. G. Hammond.

V.A.T. Central Unit

Controller (G5), M. J. Wardle.

OFFICE OF THE DATA PROTECTION REGISTRAR

Springfield House, Water Lane, Wilmslow, Cheshire SK9 5AX

[Admin.: 0625-535711; Enquiries: 0625-535777]

The Office of the Data Protection Registrar was created by the Data Protection Act, 1984. It is the Registrar's duty to compile and maintain the Register of Data Users and Computer Bureaux and provide facilities for members of the public to examine the Register; promote observance of the data protection principles; consider complaints made by data subjects; disseminate information about the Act; encourage the production of codes of practice by trade associations and other bodies, to guide data users in complying with the data protection principles; co-operate with other parties to the Council of Europe Convention and act as U.K. authority for the purposes of Article 13 of the Convention; report annually to Parliament on the performance of his functions under the Act.

Registrar, E. J. Howe.

MINISTRY OF DEFENCE

See Armed Forces Section

DESIGN COUNCIL

28 Haymarket, SW1Y 4SU

[01-839 8000]

The Design Council's aim is to improve the design of British products by: advising companies on up-to-date practice in engineering and industrial design; the annual British Design Awards; publishing information to help manufacturers, designers, and others professionally involved in design; and promoting improvements in design education at all levels. There is a Design Centre in London and offices in Glasgow, Cardiff, Belfast, Wolverhampton and Manchester. The Design Council is funded partly by a Government grant-in-aid and partly by earned revenues.

Chairman, Sir Simon Hornby.

Director, I. Owen.

THE DUCHY OF CORNWALL

10 Buckingham Gate, SW1E 6LA

[01-834 7346]

The Duchy of Cornwall was instituted by Edward III in 1337 for the support of his eldest son, Edward, the Black Prince, and since 1503 the eldest surviving son of the Sovereign has, as heir apparent, succeeded to the Dukedom by inheritance. As the oldest of the English Duchies, it has enjoyed a long association with the Crown. Before elevation to dukedom, it was an earldom from 1227, when Richard, King of the Romans and younger brother of Henry III, was created Earl of Cornwall.

The Prince's Council

H.R.H. The Prince of Wales, K.G., K.T., G.C.B.; Sir Nicholas Henderson, G.C.M.G. (*Lord Warden of the Stannaries*); Hon. Sir John Baring, c.v.o. (*Receiver General*); R. J. A. Carnwath, Q.C. (*Attorney-General to the Prince of Wales*); D. W. N. Landale (*Secretary and Keeper of the Records*); Sir John Riddell, Bt.; J. E. Pugsley; J. N. C. James; A. M. J. Galsworthy.

Other Officers of the Duchy of Cornwall

Auditors, J. H. Bowman; P. L. Ainger; H. Hughes.
Solicitor, M. H. Boyd-Carpenter.

Assistant Secretary, K. J. S. Knott.
Sheriff (1989-90), G. E. M. Trinick, O.B.E.

THE DUCHY OF LANCASTER
 Lancaster Place, Strand, WC2E 7ED
 [01-836 8277]

The estates and jurisdiction known as the Duchy and County Palatine of Lancaster have been attached to the Crown since 1399, when John of Gaunt's son came to the throne — Henry IV. As the Lancaster inheritance it goes back to 1265. Edward III erected Lancashire into ■ County Palatine in 1351.

Chancellor of the Duchy of Lancaster, THE RT. HON.

KENNETH BAKER, M.P.

Private Secretary, J. Alty.

Attorney-General and Attorney and Serjeant within the County Palatine of Lancaster, J. F. Parker, Q.C.

Receiver-General, Maj. Sir Shane Blewitt, K.C.V.O.

Vice-Chancellor, The Hon. Mr. Justice Scott.

Clerk of the Council and Keeper of Records, M. K. Ridley.

Solicitor, W. O. Farrer.

Asst. Solicitor, I. J. Dicker.

Chief Clerk, P. C. Clarke, c.v.o.

ECONOMIC AND SOCIAL RESEARCH COUNCIL

Cherry Orchard East, Kembrey Park,
 Swindon SN2 6UQ
 [0793-513838]

The E.S.R.C. was set up by Royal Charter in 1965 for the promotion of social science research. The Council carries out its role by awarding research grants, by initiating research and research contracts, by funding designated research centres, and by awarding postgraduate studentships and bursaries. In addition, the Council provides advice and disseminates knowledge on the social sciences.

Chairman, Prof. H. Newby.

Secretary, D. Stafford.

DEPARTMENT OF EDUCATION AND SCIENCE

Elizabeth House, York Road, SE1 7PH
 [01-934 9000]

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1890 established the Board of Education, with a President and Parliamentary Secretary, and created ■ Consultative Committee. The Education Act of 1944 established the Ministry of Education. In April 1964 the office of the Minister of Science was combined with the Ministry to form the Department of Education and Science. The cost of administration for the financial year 1989-90 was estimated at £73,477,000. (For Salaries, ■ page 293).

CENTRAL ELECTRICITY GENERATING BOARD Sudbury House, 15 Newgate Street, EC1A 7AU [01-634 5111]

Under the Electricity Act 1989, which received Royal Assent in August 1989, the Central Electricity Generating Board has been split into three successor companies. The companies will be vested on January 1, 1990, and will be wholly owned by the Secretary of State for Energy. Flotation on the stock market will follow in 1990.

The three successor companies are:
NATIONAL POWER, Sudbury House, EC1A 7AU.
POWERGEN, 53 New Broad Street, EC2M 1JJ.
NATIONAL GRID, Bankside House, Sumner Street, SE1 9JU.

ELECTRICITY SUPPLY COMPANIES

Under the Electricity Act 1989, the Electricity Boards are to be replaced by private companies wholly owned by the Government in Jan. 1990. Flotation on the stock market will follow in 1990.

DEPARTMENT OF EMPLOYMENT
 Caxton House, Tothill Street, SW1H 9NF
 [01-273 3000]

The Department of Employment is responsible for the Government policy of promoting a competitive and efficient labour market conducive to the growth of employment and the reduction of unemployment. Its main tasks are to help people acquire and improve their skills and competence for work, to help unemployed people, to promote the creation and growth of small firms and self-employment, to encourage industries to train their workforce, and to develop tourism.

Many of the executive functions carried out in the Department's area of policy interest are exercised by separate public agencies reporting to the Secretary of State for Employment. These include the Health and Safety Commission and A. C. A. S. and, within the Department, the Employment Service and the Training Agency.

(For Salaries, see page 293).

Secretary of State for Employment, THE RT. HON. NORMAN FOWLER, M.P.

Principal Private Secretary (G5), C. M. Norris.

Suckling, c.b.e., f.r.s.; Prof. M. P. Vessey; Prof. H. Charnock, f.r.s.; L. C. G. Gillings, o.b.e.; Prof. E. M. Rothschild; Prof. Z. A. Silberston, o.b.e.; Prof. W. D. P. Stewart, f.r.s.

Secretary, B. Glicksman.

EQUAL OPPORTUNITIES COMMISSION

Overseas House, Quay Street, Manchester M3 3HN
[061-833 9244]

PRESS OFFICE: 1 Bedford Street, WC2 (01-379 6323)

REGIONAL OFFICES: St. Andrew House, 141 West Nile Street, Glasgow G1 2RN (041-332 8018)

Caerwys House, Windsor Place, Cardiff (0222-43552)

The Commission was set up by Parliament in 1975 as a result of the passing of the Sex Discrimination Act. It works towards the elimination of discrimination by virtue of sex or marital status and to promote equality of opportunity between men and women generally.

Chair, Mrs. J. Foster £41,790

Deputy Chair, Mrs. J. O'Dell £17,540

Members, K. Boardman; D. Guereca; Prof. G. Powell; A. Simpkin; Mrs. P. Turner; Mrs. E. Walker; Miss M. Monk; Mrs. M. Prosser; Lady Brittan; Mrs. A. Hasan; N. Cowan; Ms. B. Hillon.

Chief Executive, Miss V. Amos.

EXCHEQUER AND AUDIT DEPARTMENT
See National Audit Office**EXPORT CREDITS GUARANTEE
DEPARTMENT**

P.O. Box 272, Export House,
50 Ludgate Hill, EC4M 7AJ
[01-382 7000]
Crown Building, Cathays Park,
Cardiff CF1 3NH
[0222-824000]

The Export Credits Guarantee Department (ECGD), the official export credit insurer, is a separate government department responsible to the Secretary of State for Trade and Industry and functions under the Export Guarantees and Overseas Investment Act 1978. This enables ECGD to encourage U.K. exports by making available export credit insurance to British firms engaged in selling overseas and to guarantee repayment to banks in Britain providing finance for export credit for goods sold on credit terms of two years or more. Guarantees under Section 1 of the Act are given after consultation with an Advisory Council of bankers and businessmen.

The Act also empowers ECGD to insure British private investment overseas against political risks, such as war, expropriation and restrictions on remittances.

Chief Executive, M. G. Stephens.

Directors (G3), G. E. J. Breach; R. G. Codd; C. Foxall; M. T. Hawtin; D. H. Twyford.

**FOREIGN AND COMMONWEALTH
OFFICE**

Downing Street, SW1A 2AL
[01-270 3000]

The Foreign and Commonwealth Office provides, mainly through diplomatic missions, the means of communication between the British Government and other governments and international governmental organizations for the discussion and negotiation of all matters falling within the field of international relations. It is responsible for alerting the British Government to the implications of

developments overseas; for protecting British interests overseas; for protecting British citizens abroad; for explaining British policies to, and cultivating friendly relations with, Governments overseas and for the discharge of British responsibilities to the dependent territories.

FOREIGN COMPENSATION COMMISSION

Alexandra House, Kingsway, WC2B 6TT
 [01-438 7045]

The Commission was set up by the Foreign Compensation Act 1950 primarily to distribute under Orders in Council funds received from other governments in accordance with agreements to pay compensation for expropriated British property and other losses sustained by British nationals.

The Commission has the further duty of registering claims for British-owned property in contemplation of agreements with other countries, and it has done so in seven instances since 1950.

Chairman, A. W. E. Wheeler, C.B.E. £48,100
 Commissioners, J. A. S. Hall, D.F.C., Q.C.; Sir Alan Leslie; I. M. P. Evans.

Secretary and Chief Examiner, D. H. Wright.

FORESTRY COMMISSION

231 Corstorphine Road, Edinburgh EH12 7AT
 [031-334 0303]

The Forestry Commission has the legal status of, and functions in, a Government department. It reports directly to Forestry Ministers (i.e. the Minister of Agriculture, Fisheries and Food, the Secretary of State for Scotland, and the Secretary of State for Wales), to whom it is responsible for advice on forestry policy and for the implementation of that policy in Great Britain. There is a statutorily-appointed Chairman and Board of Commissioners (four full-time and six part-time) with prescribed duties and powers. The full-time Commissioners form the Executive Board.

As the Forestry Authority for Great Britain, the Commission is also responsible for carrying out certain regulatory functions in connection with plant health and felling licensing, for conducting forestry research, and administering grant-aid schemes for private woodlands. As the Forestry Enterprise, the Commission has a primary responsibility to provide timber for industry. In discharging their functions, the Forestry Commissioners are charged with endeavouring to achieve a reasonable balance between the needs of forestry and conservation.

Chairman, J. R. Johnstone, C.B.E. (part-time) £27,116
 Director-General and Deputy Chairman, G. J. Francis £50,400
 Commissioner for Private Forestry and Development, R. T. Bradley £40,900

Foreign and Commonwealth Office, SW1A 2AH
 Superintendent of the Corps of Queen's Messengers, Maj. I. G. M. Bamber.

Commissioner for Administration and Finance,
D. T. J. Rutherford £40,900
Commissioner for Operations, D. L. Foot £40,900
Secretary to the Commissioners, P. J. Clarke £34,095

REGISTRY OF FRIENDLY SOCIETIES

15 Great Marlborough Street, W1V 2AX
[01-437 9992]

The Registry of Friendly Societies is a Government department serving two statutory bodies, the Building Societies Commission, and the Central Office of the Registry of Friendly Societies, together with the Assistant Registrar of Friendly Societies for Scotland.

The Building Societies Commission was established by the Building Societies Act, 1986. The Commission is responsible for the supervision of building societies, and administers the system of regulation. It also advises the Treasury and other Government departments on matters relating to building societies.

The Central Office of the Registry of Friendly Societies provides a public registry for mutual organizations registered under the Building Societies Act, 1986, Friendly Societies Act, 1974, and the Industrial and Provident Societies Act, 1965. It is responsible for the supervision of friendly societies and credit unions, and advises the Government on issues affecting those societies. The Chief Registrar has certain powers to arbitrate in disputes between members and registered societies. He also acts as the Industrial Assurance Commissioner.
(For Salaries, see page 293)

GAMING BOARD FOR GREAT BRITAIN
Berkshire House, 168-173 High Holborn,
WC1V 7AA
[01-240 0821]

Established on October 25, 1968, to maintain a broad oversight of developments in gaming in Great Britain, to check prospective gaming licensees management and staff, and to advise the Home Secretary on making regulations which may be needed for the further control of gaming.

Chairman, N. A. Ward Jones, v.R.D. (*part-time*)

£25,075

Members, P. B. Kavanagh, C.B.E., Q.P.M.; Lady Ibbs; W. N. Hunter Smart; M. H. Hogan (*part-time*)

£10,055

Secretary, P. R. Burleigh.

OFFICE OF GAS SUPPLY

Southside, 105 Victoria Street, SW1E 6QT
[01-828 0898]

The Office of Gas Supply (Ofgas) is a regulatory body set up under the Gas Act 1986. It is headed by the Director General of Gas Supply who is independent of Ministerial control.

The principal function of Ofgas is to monitor British Gas' activities as a public gas supplier and, where necessary, enforce the conditions of that company's authorization to act as a public gas supplier. Other functions are to grant authorizations to other suppliers of gas through pipes; to investigate complaints on matters where enforcement powers may be exercisable; to fix and publish maximum charges for reselling gas; to publish information and advice for the benefit of tariff customers; to keep under review developments concerning the gas supply industry; to settle the terms on which other suppliers have access to British Gas' pipelines in the event of disagreement.

Director General, J. McKinnon.

Deputy Director General, M. R. Keay.

Legal Adviser, D. R. M. Long.

Business Adviser, R. E. T. Long.

Public Affairs Adviser, I. Cooke.

Consumer Affairs Adviser, W. Macleod.

THE GOVERNMENT ACTUARY

22 Kingsway, WC2B 6LE
[01-242 6828]

The Government Actuary provides a consulting service to Government departments, nationalized industries and Commonwealth Governments. His actuaries advise on social security schemes and superannuation arrangements within the public sector at home and abroad, on population and other statistical studies, and on Government supervision of insurance companies and friendly societies.

Government Actuary, C. D. Daykin.

Directing Actuaries, D. H. Loades; G. G. Newton; M. A. Pickford.

Chief Actuaries, D. G. Ballantine; J. L. Field; R. T. Foster; T. W. Hewitson; P. H. Hinton; A. G. Young.

GOVERNMENT HOSPITALITY FUND
8 Cleveland Row, SW1A 1DH
[01-210 3000]

Instituted in 1908 for the purpose of organizing official hospitality on a regular basis, with a view to the promotion of international goodwill.

Minister in Charge, The Lord Brabazon of Tara.
Secretary, Brig. A. Cowan, M.B.E.

DEPARTMENT OF HEALTH
Richmond House, 79 Whitehall, SW1A 2NS
[01-210 3000]

The Department of Health was formed in July 1988 by the division of the Department of Health and Social Security into two separate departments.

The Department is responsible for the administration of the National Health Service in England and for the personal social services run by local authorities in England for children, the elderly, infirm, handicapped and other persons in need. It has functions relating to food hygiene and welfare foods. The Department is also concerned with the medical treatment of war pensioners, and is responsible for the ambulance and first aid services in emergency, under the Civil Defence Act, 1948. The Department represents the U.K. on the World Health Organization. Responsibility for the administration of the Health Services in Wales was transferred to the Welsh Office on April 1, 1969. (For Salaries, see page 293).

Secretary of State for Health, THE RT. HON. KENNETH CLARKE, Q.C., M.P.

HEALTH AND SAFETY COMMISSION

Baynards House, 1 Chepstow Place,
Westbourne Grove, W2 4TF
[01-243 6000]

The Health and Safety Commission is made up of eight representatives of trade unions, employers and local authorities and a full-time chairman appointed by the Secretary of State for Employment. Its primary functions are: to secure the health, safety and welfare of people at work; to protect the public from risks arising from work activities; to control the storage and use of explosives, highly flammable or other dangerous substances.

Chairman, Dr. E. J. Cullen.

Members, D. Mason; Dr. M. C. Shannon; Dr. C. M. Thomas; R. Eberlie; P. Jacques; Dr. A. H. Raper, C.B.E.; Miss A. Maddocks; A. Tuffin.

Secretary, M. F. Downing.

HEALTH AND SAFETY EXECUTIVE

Broad Lane, Sheffield S3 7HQ

[051-951 4381]

Baynards House, 1 Chepstow Place,
Westbourne Grove, W2 4TF
[01-221 0870]

The Health and Safety Executive is a statutory body consisting of director general and two other people appointed by the Commission. It advises the Commission, and its staff are the primary instrument for carrying out the Commission's policies.

Through a network of 20 area offices, H.S.E. inspectors visit and review work activities, giving expert advice and guidance and, where necessary, issuing enforcement notices and initiating prosecutions. The Employment Medical Advisory Services, the operational arm of the Medical Division, is also based on the area offices. Other inspectorates within H.S.E. monitor or enforce standards and give advice and guidance in specific sectors of industry or employment.

**HIGHLANDS AND ISLANDS DEVELOPMENT
 BOARD**
 Bridge House, 20 Bridge Street,
 Inverness IV1 1QR
 [0463-234171]

The Board, a grant-aided body, responsible to the Secretary of State for Scotland, has two broad objectives. These are (1) to assist the people of the Highlands and Islands to improve their economic and social conditions; (2) to enable the Highlands and Islands to play a more effective part in the economic and social development of the nation. To this end the Board will concert, promote, assist or undertake measures for economic and social development.

*Chairman, Sir Robert Cowan.
 Secretary, J. A. MacAskill.*

**HISTORIC BUILDINGS AND MONUMENTS
 COMMISSION FOR ENGLAND
 (ENGLISH HERITAGE)**

Fortress House,
 23 Savile Row, W1X 2HE
 [01-734 6010]

Under the National Heritage Act, 1983, the duties of the Commission are: (i) to secure the preservation of ancient monuments and historic buildings; (ii) to promote the preservation and enhancement of conservation areas; (iii) to promote the public's enjoyment of, and advance their knowledge of, ancient monuments and historic buildings and their preservation. The Commission has advisory committees on historic buildings, ancient monuments, historic areas, and London.

HOME OFFICE

50 Queen Anne's Gate, SW1H 9AT
[01-273 3000]

The Home Office deals with those internal affairs in England and Wales which have not been assigned to other Government Departments. The Home Secretary is particularly concerned with the administration of justice; criminal law; the treatment of offenders including probation and the prison service; the police; immigration and nationality; passport policy matters; community relations; certain public safety matters; fire and civil defence services and also with broad questions of national broadcasting policy. He personally is the link between The Queen

and the public and exercises certain powers on her behalf including that of the Royal Pardon.

Other subjects dealt with include electoral arrangements; addresses and petitions to The Queen; ceremonial and formal business connected with honours; requests for extradition of criminals; scrutiny of local authority byelaws; grant of licences for scientific experiments on animals; cremations, burials and exhumations; firearms; dangerous drugs and poisons, general policy on laws relating to shops, liquor licensing, gaming and lotteries, charitable collections and marriage; theatre and cinema licensing; co-ordination of government action in relation to the voluntary social services; and discrimination and race relations policy.

The Home Secretary is also the link between the U.K. Government and the governments of the Channel Islands and the Isle of Man.

(For Salaries, see page 293)

Secretary of State for the Home Department, THE RT. HON. DOUGLAS HURD, C.B.E., M.P.

 [01-874 6411]

Established by the Betting, Gaming and Lotteries Act, 1963, as successor in title to the Racecourse Betting Control Board established by the Racecourse Betting Act, 1922.

Its function is to operate totalisators on approved racecourses in Great Britain, and it also provides on- and off-course cash and credit offices. Under the Horserace Totalisator and Betting Levy Board Act, 1972, it is further empowered to offer bets at starting price (or other bets at fixed odds) on any sporting event.

Chairman, Lord Wyatt of Weeford £64,000
Members, The Lord Chapple; Mrs. P. Hastings; Hon. D. Montagu; P. S. Winfield; J. F. Sanderson; H.R.H. Prince Michael of Kent.

HOUSING CORPORATION
 149 Tottenham Court Road, W1P 0BN
 [01-387 9466]

Established by Parliament in 1964, the Housing Corporation registers, promotes, funds and supervises housing associations. There are over 2,400 registered associations in England providing more than half a million homes. Housing associations are non-profit making bodies run by voluntary committees.

The Corporation's duties have been extended under the provisions of the Housing Act 1988 to cover responsibilities for the payments of capital and revenue grants to housing associations, for helping tenants interested in Tenants' Choice, and the approval and revocation of potential new landlords under this policy.

Chairman, Sir Hugh Cubitt, C.B.E.

INDEPENDENT BROADCASTING AUTHORITY
 70 Brompton Road, SW3
 [01-584 7011]

The Independent Television Authority was created by Act of Parliament in 1954 to provide an additional

television broadcasting service to that provided by the British Broadcasting Corporation. In 1972 it was renamed the Independent Broadcasting Authority and its functions were extended to cover the provision of independent local radio.

The main functions of the Authority are to appoint the ILR and ITV programme companies; to own and operate transmitters; to supervise the programmes provided by contractors and the Channel Four Television Company and their scheduling; and to control advertising. The programme companies pay the Authority a rental to enable it to carry out its duties.

Five ITV programme companies provide programmes in 14 regions (two companies operate in London, one at the weekends, the other during the week). By June, 1989, 62 Independent Local Radio areas were broadcasting in the U.K. (in London, there are two companies, one providing a news and information service, and the second general entertainment and information). Both ITV and ILR are financed mainly by the sale of advertising time.

The Authority consists of a Chairman and eleven members appointed by the Home Secretary and a permanent staff under the Director General.

Chairman, G. Russell, C.B.E.

Deputy Chairman, The Lord Chalfont, O.B.E., M.C., P.C.

Members, Prof. J. F. Fulton (*Northern Ireland*); J. R. Purvis (*Scotland*); G. R. Peregrine (*Wales*); Sir Michael Caine; R. A. Grantham; Prof. A. Cullen, O.B.E., F.R.S., Lady Popplewell; R. Sondhi; Mrs. P. Mathias.

Acting Director General, Lady Littler.

Director of Television, D. Glencross.

Director of Radio, P. A. C. Baldwin.

Director of Engineering, Dr. J. Forrest.

Director of Finance, P. Rogers.

Controller of Advertising, F. Willis.

Controller of Public Affairs, Miss S. Thane.

Secretary, K. Blyth.

Regional Officers, M. J. Fay (*Yorkshire*); E. Lewis (*Wales and West of England*); A. D. Fleck (*Northern Ireland*); S. Perkins (*East of England*); D. Lee (*North-West England*); B. Marjoribanks (*Scotland*); J. Dougray (*North-East England and the Borders*); N. J. Reedy (*East and West Midlands*); J. B. Scott (*South of England and Channel Islands*).

INDUSTRIAL INJURIES ADVISORY COUNCIL

Friars House, 157-168 Blackfriars Road,
SE1 8EU
[01-972 3316/7]

The Industrial Injuries Advisory Council is a statutory body under the Social Security Act, 1975, which considers and advises the Secretary of State for Social Services on Regulations and other questions relating to industrial injuries benefits or their administration.

Chairman, Prof. J. M. Harrington.

Members, G. Applebey; Miss J. C. Brown; Prof. M. J. Cinnamond; Dr. D. Coggon; Dr. R. J. Donaldson, O.B.E.; Dr. G. A. Hard; P. R. A. Jacques; Dr. C. P. Juniper; G. Lloyd, C.B.E.; T. W. Mawer; Dr. A. J. Newman Taylor; Mrs. M. Prosser; Dr. E. Roman; Dr. A. Sinclair; Miss B. Swiakowska; G. M. Thompson.

Secretary, A. L. Perl.

CENTRAL OFFICE OF INFORMATION

Hercules Road, SE1 7DU
[01-928 2345]

The Central Office of Information is a common service department which produces information and

publicity material, and supplies publicity services, for other Government departments on a repayment basis. In the U.K. it conducts Government display press, television, radio and poster advertising, produces and distributes booklets, leaflets, films, television and radio material, exhibitions, photographs and other visual material; and distributes departmental press notices. For the overseas departments it supplies British Information posts overseas with press, radio and television material, booklets, magazines, reference services, films, exhibitions, photographs, display and reading room material; arranges tours in the U.K. for official visitors from overseas. Administrative responsibility for the Central Office of Information rests with H.M. Treasury Ministers, while the ministers whose departments it serves are responsible for the policy expressed in its work. (For Salaries, see page 293)

Chairman, G. D. Inkin, O.B.E. (part-time) . . . £23,688
Chief Executive, B. Ryan.

LAND REGISTRIES

H.M. LAND REGISTRY

Lincoln's Inn Fields, WC2A 3PH

[01-405 3488]

The registration of title to land was first introduced in England and Wales by the Land Registry Act, 1862: H.M. Land Registry operates today under the Land Registration Acts, 1925 to 1986. The object of registering title to land is to create and maintain a register of land owners whose title is guaranteed by the State and so to simplify the transfer, mortgage and other dealings with real property. In certain areas of the country registration of title is compulsory on sale: voluntary registration in the non-compulsory areas has been common and it is still possible to register building estates, upon certain conditions, in any part of England or Wales. However, under the Land Registration Act, 1966, the voluntary first registration of land in non-compulsory areas was curtailed to accelerate the extension of the compulsory system to all built-up areas of the country. The intention is that registration of title shall ultimately be universal throughout England and Wales.

H.M. Land Registry is administered under the Lord Chancellor by the Chief Land Registrar and the work is decentralized to a number of regional offices. The Chief Land Registrar is also responsible for the Land Charges Department and the Agricultural Credits Department.

(For Salaries, see page 293)

Headquarters Office

Chief Land Registrar (G2), E. J. Pryer.

**LAW COMMISSION
England and Wales**
Conquest House, 37-38 John Street,
Theobalds Road, WC1N 2BQ
[01-242 0861]

Set up on June 16, 1965, under the Law Commissions Act, 1965, to make proposals to the Government for the examination of the law and for its revision where it is unsuited for modern requirements, obscure, or otherwise unsatisfactory. It recommends to the Lord Chancellor programmes for the examination of different branches of the law and suggests whether the examination should be carried out by the Commission itself or by some other body. The Commission is also responsible for the preparation of Consolidation and Statute Law (Repeals) Bills.

Chairman, The Hon. Mr. Justice Beldam.

Members, T. M. Aldridge; J. Beatson; R. Buxton, Q.C.; Prof. B. M. Hoggett, Q.C.

Secretary, M. H. Collon.

Scottish Law Commission
140 Causewayside, Edinburgh EH9 1PR
[031-668 2131]

Chairman, The Hon. Lord Davidson.

Commissioners, Dr. E. M. Clive; C. G. B. Nicholson, Q.C. (full-time); Prof. P. N. Love, C.B.E.; W. Nimmo Smith, Q.C. (part-time).

Secretary, K. S. Barclay.

LAW OFFICERS' DEPARTMENTS
Attorney-General's Chambers,
Royal Courts of Justice, WC2A 2LL
[01-936 6602]

Attorney General's Chambers,
Royal Courts of Justice, Belfast BT1 3JY
[0232-235111]

The Law Officers of the Crown for England and Wales are the Attorney General and the Solicitor General. The Attorney General is the Minister responsible for the work of the Law Officers' Departments: the Treasury Solicitor's Department, the Crown Prosecution Service, the Serious Fraud Office, and the Legal Secretariat to the Law Officers. The Director of Public Prosecutions (who is head of the Crown Prosecution Service), the Director of Public Prosecutions for Northern Ireland, and the Director of the Serious Fraud Office are responsible to the Attorney General for the performance of their duties.

The Attorney General is the Government's principal legal adviser, dealing with questions of law arising on Bills, issues of legal policy, and major international and domestic litigation involving the Government. The Solicitor General is responsible for such matters as the Attorney General delegates to him.

Attorney General, THE RT. HON. SIR PATRICK MAYHEW, Q.C., M.P. £36,679†
Parliamentary Private Secretary, D. A. Sumberg, M.P.

Solicitor General, SIR NICHOLAS LYELL, Q.C., M.P. £29,959†

Chief Executive, A. M. Douglas.

LIBRARIES

OFFICE OF ARTS AND LIBRARIES
(see entry on page 298)

THE BRITISH LIBRARY
2 Sheraton Street, W1V 4BH
[01-636 1544]

The British Library is the U.K.'s national library and occupies the central position in the library and information network. The Library aims to serve scholarship, research, industry, commerce and all other major users of information. Its services are based on collections which include over 18 million volumes (books, manuscripts, maps, newspapers and other serials, stamps and music), 1 million discs, 55,000 hours of tape recordings, in more than 20 buildings in London and one complex in West

Yorkshire, amounting to over 328 miles of shelving growing at the rate of 8 miles every year.

The British Library was established on July 1, 1973 under the British Library Act, 1972. It brought together the library departments of the British Museum, the National Central Library, the National Lending Library for Science and Technology, the British National Bibliography Ltd and, in 1974, the functions of the Office for Scientific and Technical Information. Subsequently the Library took responsibility for other organizations: the India Office Library and Records and the H.M.S.O. Binderies in 1982; and the National Sound Archive in 1983. Since 1985 they have all been regrouped into three service areas, a Research and Development Department plus a corporate administrative centre.

Access to the Humanities and Social Sciences reading rooms in Great Russell Street is limited to holders of a British Library Reader's Pass, and information about eligibility (basically, academic researchers and investigative professionals) is available from the Reader Admissions Office. The Aldwych and Holborn reading rooms of the Science Reference and Information Service are open to the general public without charge or formality.

The Library's exhibition galleries are housed in the British Museum building in Great Russell Street. On permanent display are famous items from the national written archive including the Magna Carta, the Lindisfarne Gospels and Shakespeare's First Folio.

The British Library will be moving to purpose-built accommodation at St. Pancras, London NW1 in 1991 (open to the public in 1993).

Board Members

Chairman, The Lord Quinton.

NATIONAL LIBRARY OF SCOTLAND

George IV Bridge, Edinburgh EH1 1EW
[031-226 4531]

Open free. Reading Room, weekdays, 9.30-8.30; Sat. 9.30-1. Map Room, weekdays, 9.30-5; Sat. 9.30-1. Exhibition, weekdays, 9.30-5; Sat. 9.30-1; Sun. 2-5 (closed on Sun. Oct.-April).

The Library, which was founded as the Advocates' Library in 1682, became the National Library of Scotland by Act of Parliament in 1925. It continues

to share the rights conferred by successive Copyright Acts since 1710. Its collections of printed books and MSS., augmented by purchase and gift, are very large and it has an unrivalled Scottish collection. The present building was opened by H.M. the Queen in 1956.

The Reading Room is for reference and research which cannot conveniently be pursued elsewhere. Admission is by ticket issued to an approved applicant.

Salaries

THE NATIONAL LIBRARY OF WALES

Llyfrgell Genedlaethol Cymru
Aberystwyth, Dyfed SY23 3BU
[0970-623816]

Readers' room open on weekdays, 9.30 a.m. to 6 p.m. (Saturdays, 5 p.m.); closed on Sundays and Bank Holidays. Admission by Reader's Ticket.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. One of the six libraries entitled to privileges under Copyright Act. Contains about 15,000,000 printed books, 40,000 manuscripts, 4,000,000 deeds and documents, and numerous maps, prints and drawings, and audio-visual collection. Specializes in manuscripts and books relating to Wales and the Celtic peoples. Repository for pre-1858 Welsh probate records. Approved by the Master of the Rolls as a repository for manorial records and tithe documents, and by the Lord Chancellor for certain legal records. Bureau of the Regional Libraries Scheme for Wales.

Librarian, B. F. Roberts, Ph.D., F.S.A.

Secretary, D. B. Lloyd.

Heads of Departments, D. Huws (*Manuscripts and Records*); J. L. Madden (*Printed Books*); D. H. Owen (*Pictures and Maps*).

LIGHTHOUSE AUTHORITIES

CORPORATION OF TRINITY HOUSE
Trinity House, Tower Hill, EC3N 4DH
[01-480 6601]

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of

importance when Henry VIII granted the institution its first charter in 1514. The Corporation is the General Lighthouse Authority for England, Wales and the Channel Islands, with certain statutory jurisdiction over aids to navigation maintained by local harbour authorities. It is also responsible for dealing with wrecks dangerous to navigation, except those occurring within port limits or wrecks of H.M. ships. The Trinity House Lighthouse Service is maintained out of the General Lighthouse Fund which is provided from light dues levied on ships at ports of the U.K. and Republic of Ireland. The Corporation's former responsibilities for pilotage were transferred to harbour authorities with effect from Oct. 1, 1988.

The affairs of the Corporation are controlled by a board of Elder Brethren, who are master mariners with long experience of command in the Royal and Merchant Navy together with figures from the world of commerce, and the Secretary. A separate Board, which comprises Elder Brethren, senior staff and outside representatives currently controls the Lighthouse Service. The Board is assisted by administrative and technical staff. The Elder Brethren also act as nautical assessors in marine cases in the Admiralty Division of the High Court of Justice.

Elder Brethren

Master, H.R.H. the Duke of Edinburgh, K.G.

Deputy Master, Capt. P. M. Edge.

Elder Brethren, Capt. I. R. C. Saunders; Capt. P. F. Mason, C.B.E.; H.R.H. the Prince of Wales, K.G.; Capt. Sir George Barnard; Capt. R. N. Mayo, C.B.E.; Capt. Sir David Tibbits, D.S.C., R.N.; Capt. D. A. G. Dickens; Capt. J. E. Bury; Capt. J. A. N. Bezant, D.S.C., R.D., R.N.R. (ret.); Capt. Sir Miles Wingate, K.C.V.O.; Capt. D. J. Cloke; The Lord Wilson of Rievaulx, K.G., O.B.E., F.R.S.; Rt Hon. Edward Heath, M.B.E., M.P.; The Viscount Runciman of Doxford, O.B.E., A.F.C.; Capt. T. Woodfield, O.B.E.; Sir Arthur Drake, C.B.E.; The Lord Simon of Glaisdale, P.C.; Admiral of the Fleet the Lord Lewin, K.G., G.C.B., M.V.O., D.S.C.; Capt. D. T. Smith, R.N.; Commander Sir Robin Gillett, G.B.E., R.D., R.N.R.; The Lord Shackleton, K.G., O.B.E., P.C.; Sir John Cuckney; Capt. D. J. Orr; The Lord Carrington, K.G., C.H., K.C.M.G., M.C., P.C.

Officers

Secretary, J. B. Fuller.

Deputy Secretary, M. J. Faulkner.

Director of Engineering, D. A. S. Vennings.

Director of Finance, K. W. Clark.

Personnel Manager, Mrs. B. C. Heesom.

Navigation Manager, N. J. Cutmore.

Legal and Information Manager, D. I. Brewer.

Chief Superintendent, Capt. J. H. Barnes.

Depot Manager, Harwich, S. J. W. Dunning.

CLYDE PORT AUTHORITY
16 Robertson Street, Glasgow G2 8DS
[041-221 8733]

The Authority is a self-governing statutory body established by individual Act of Parliament and provides sea port facilities within a 450 sq. mile area of jurisdiction which encompasses the River Clyde, its estuary and sea lochs.

Chairman, R. W. S. Easton, C.B.E.

Managing Director, J. Mather.

Director and Secretary, G. P. Johnston.

Director and Marine Operations, Capt. D. B. Murray.

COMMISSIONERS OF NORTHERN LIGHTHOUSES
84 George Street, Edinburgh EH2 3DA.
[031-226 7051]

The Commissioners of Northern Lighthouses are the General Lighthouse Authority for Scotland and the Isle of Man. The present Board owes its origin to an Act of Parliament passed in 1786. At present the Commissioners operate under the Merchant Shipping Act, 1894 and are 19 in number.

The Commissioners control 29 major manned lighthouses, 55 major automatic lighthouses, 112 minor lights and many lighted and unlighted buoys. They have a fleet of 2 motor vessels.

Commissioners

The Lord Advocate, the Solicitor General for Scotland, the Lord Provosts of Edinburgh, Glasgow and Aberdeen; the Provost of Inverness; the Chairman of Argyll & Bute District Council; the Sheriff Principal of North Strathclyde, Tayside, Central & Fife, Grampian, Highlands & Islands, South Strathclyde, Dumfries & Galloway, Lothians & Borders, and Glasgow & Strathkelvin; W. D. H. Gregson, C.B.E.; T. Macgill; Capt. J. A. MacLeod; Capt. A. F. Dickson, O.B.E.; Capt. W. B. Kinley; A. J. Struthers.

Officers

General Manager, Cdr. J. M. Mackay, M.B.E.
Secretary, I. A. Dickson.
Engineer-in-Chief, W. Paterson.

LOCAL COMMISSIONERS

COMMISSION FOR LOCAL ADMINISTRATION IN ENGLAND
21 Queen Anne's Gate, SW1H 9BU
[01-222 5622]

Local Commissioners (Local Ombudsmen) are responsible for investigating complaints from members of the public against local authorities (but not town and parish councils); water authorities; police authorities; the Commission for New Towns and new town development corporations (housing functions); and urban development corporations (town and country planning functions). The Commissioners are appointed by the Crown on the recommendation of the Secretary of State for the Environment.

Certain types of action are excluded from investigation, particularly personnel matters and commercial transactions unless they relate to the purchase or sale of land. Complaints can be sent direct to the Local Ombudsman or through a councillor, although the Local Ombudsman will not consider a complaint unless the Council has had an opportunity to investigate and reply to a complainant.

A free booklet *Complaint about the Council? How to Complain to your Local Ombudsman* is available from the Commission's office.

Chairman of the Commission and Local Commissioner, D. C. M. Yardley, D.Phil. £72,000

Vice Chairman and Local Commissioner, F. G. Laws £51,400

Local Commissioner, Mrs. P. A. Thomas £50,400

Member, The Parliamentary Commissioner for Administration £33,075

COMMISSION FOR LOCAL ADMINISTRATION IN WALES
Derwen House, Court Road, Bridgend CF31 1BN
[0656-61325/6]

The Local Commissioner for Wales has similar powers to the Local Commissioners in England. The Commissioner is appointed by the Crown on the recommendation of the Secretary of State for Wales. A free booklet *Your Local Ombudsman in Wales* is available from the Commission's office.

Local Commissioner, H. F. Jones.
Secretary, D. Bowen.

COMMISSIONER FOR LOCAL ADMINISTRATION IN SCOTLAND
5 Shandwick Place, Edinburgh EH2 4RG
[031-229 4472]

The Local Commissioner for Scotland has similar powers to the Local Commissioners in England, and is appointed by the Crown on the recommendation of the Secretary of State for Scotland.

Local Commissioner, R. G. E. Peggie, C.B.E.
Secretary, K. Bratton

LONDON REGIONAL TRANSPORT
55 Broadway, SW1H 0BD
[01-222 5600]

Subject to the financial objectives and principles approved by the Secretary of State for Transport, London Regional Transport has a general duty to provide or secure the provision of public transport services for Greater London.

Chairman, C. W. Newton £80,000
Members, J. Telford Beasley; M. Marsh £60,000

LORD ADVOCATE'S DEPARTMENT

[01-276 3000]

The Law Officers for Scotland are the Lord Advocate and the Solicitor-General for Scotland. The Lord Advocate's Department is responsible for drafting Scottish legislation, for providing legal advice to other departments on Scottish questions and for assistance to the Law Officers for Scotland in certain of their legal duties.

Lord Advocate, THE LORD FRASER OF CARMYLLIE, P.C., Q.C. £42,067

Solicitor-General for Scotland, ALAN F. RODGER, Q.C. £36,515

Legal Secretary and First Parliamentary Draftsman, N. J. Adamson, C.B., Q.C. £50,600

Senior Asst. Legal Secs. and Parliamentary Draftsmen, G. M. Clark; D. J. S. Duncan; G. Kowalski; P. J. Layden, T.D.; J. C. McCluskie .. £37,600-£40,900

Asst. Legal Secs. and Deputy Parliamentary Draftsmen, J. D. Harkness; D. C. Macrae; C. A. M. Wilson £30,425-£34,095

LORD CHANCELLOR'S DEPARTMENT
House of Lords, SW1A 0PW
[01-219 3000]

The Lord Chancellor is responsible for promoting general reforms in the civil law, for the procedure of the civil courts and for the administration of the Supreme Court (Court of Appeal, High Court and Crown Court) and county courts in England and Wales, and for legal aid schemes. He is responsible for advising the Crown on the appointment of judges and certain other officers and is himself responsible for the appointment of Masters and Registrars of the

High Court and District and County Court Registrars and magistrates. He is responsible for ensuring that letters patent and other formal documents are passed in the proper form under the Great Seal of the Realm, of which he is the custodian. The work in connection with this is carried out under his direction in the Office of the Clerk of the Crown in Chancery. (For Salaries, see page 293)

MONOPOLIES AND MERGERS COMMISSION

New Court, 48 Carey Street, WC2A 2JT

[01-324 1467]

The Commission was established in 1948 as the Monopolies and Restrictive Practices Commission and was reconstituted on subsequent occasions. It became the Monopolies and Mergers Commission in 1973. The Commission has the duty of investigating and reporting on questions referred to it with respect to (a) the existence or possible existence of monopolies not registrable under the Restrictive Trade Practices Act, 1976, and relating to the supply of goods or services in the U.K. or part of the U.K. or to the supply of goods for export; (b) the transfer of a newspaper or newspaper's assets; (c) the creation or possible creation of a merger qualifying for investigation within the meaning of the Fair Trading Act, 1973.

References may be made to the Commission on the general effect on the public interest of specified monopoly or other uncompetitive practices and of restrictive labour practices.

The Competition Act, 1980, provides for the reference to the Commission of particular anti-competitive practices and of questions of efficiency, costs, service provided and possible abuse of monopolies in the public sector. In respect of recently-privatized industries, references to the Commission may be made in certain circumstances, with regard to their respective industries, by the Director General of Telecommunications, the Civil Aviation Authority, the Director General of Gas Supply, the Director General

of Water Services and the Director General of Electricity Supply.

Chairman, M. S. Lipworth £72,000
Deputy Chairmen, H. H. Hunt, C.B.E. (£25,210); H. H. Liesner, C.B. (£25,210); D. G. Richards, C.B.E. (£28,995).

Members, Sir James Ackers; A. G. Armstrong; C. C. Baillieu; Prof. M. E. Beesley, C.B.E.; F. E. Bonner, C.B.E.; L. Britz; K. S. Carmichael, C.B.E.; R. Davies; P. H. Dean; J. Evans; A. Ferry, M.B.E.; P. S. G. Flint; D. G. Goyer; M. R. Hoffman; J. D. Keir, Q.C.; Miss P. K. R. Mann; G. C. S. Mather; L. A. Mills; J. D. Montgomery; B. C. Owens; D. P. Thomson; C. A. Unwin, M.B.E.; S. Wainwright, C.B.E.; Prof. G. Whittington; R. Young.

each £10,149

Secretary, S. N. Burbridge.

MUSEUMS

MUSEUMS AND GALLERIES COMMISSION

7 St. James's Square, SW1Y 4JU

[01-839 9841]

Established in February 1931 — the Standing Commission on Museums and Galleries, the Commission was re-named and took up new functions in September 1981. Its sponsor department is the Office of Arts and Libraries. The Commission advises the Government, including the Department of Education for Northern Ireland, the Scottish Education Department and Welsh Office, on museum affairs. There are 15 Commissioners, appointed by the Prime Minister.

The Commission's executive functions include the services of the National Museums Security Adviser; allocation of grants to the seven Area Museum Councils in England; funding and monitoring of the work of the Museum Documentation Association; directly administering — capital grant scheme for non-national museums, and various other grant schemes. The Commission administers the arrangements for government indemnities and the acceptance of works of art in lieu of Inheritance Tax, and it has responsibility for the two Purchase Grant Funds for local museums managed on its behalf by the Victoria and Albert and Science Museums. The Commission's Conservation Unit advises on conservation and operates grants schemes for conservators. The Travelling Exhibitions Unit promotes and encourages travelling exhibitions. A registration scheme for museums in the U.K. is being implemented with the assistance of the Commission.

Chairman, Prof. B. Morris, D.Phil.

Members, The Marchioness of Anglesey, D.B.E.; F. Atkinson, O.B.E.; R. Begg, C.B.E.; L. Brandes, C.B.; The Lord Dainton, F.R.S.; F. Dunning, O.B.E.; Prof. Sir John Hale, F.B.A.; T. W. I. Hodgkinson, C.B.E.; J. Last, C.B.E.; Sir Hugh Leggatt; The Lord O'Neill, T.D.; The Lord Rees, P.C., Q.C.; R. H. Smith; Dame Margaret Weston, D.B.E.; Adm. Sir David Williams, G.C.B.

Secretary, P. Longman.

THE BRITISH MUSEUM

Great Russell Street, WC1B 3DG

[01-636 1555]

Antiquities collections, coins and medals, prints and drawings. Open weekdays (including Bank Holidays) 10-5 and Sun. 2.30-6. Closed on Good Friday, Christmas Eve, Christmas Day, Boxing Day, New Year's Day and the first Monday in May. The ethnographical collections are displayed in The Museum of Mankind at 6 Burlington Gardens, W1. Opening times as above.

The British Museum may be said to date from 1753, when Parliament granted funds to purchase the collections of Sir Hans Sloane and the Harleian manuscripts, and for their proper housing and maintenance. The building (Montagu House) was opened in 1759. The present buildings were erected between 1823 and the present day, and the original collection has increased to its present dimensions by gifts and purchases. The administrative expenses, including work and building in progress, were estimated at £24,643,000 in 1989-90.

Board of Trustees

Appointed by the Sovereign: H.R.H. The Duke of Gloucester, G.C.V.O. *Appointed by the Prime Minister:* The Lord Windlesham, C.V.O., P.C. (*Chairman*); Sir Matthew Farrer, K.C.V.O.; G. C. THE BRITISH MUSEUM (NATURAL HISTORY)

Cromwell Road, SW7 5BD

[01-938 9123]

Open Mon.-Sat. (except New Year's Day, Good Friday, May Day, Christmas Eve, Christmas Day and Boxing Day) 10-6, Sun. 1-6. Admission, £2.50.

The Natural History Museum originates from the natural history departments of the British Museum. During the 19th century the natural history collections grew extensively and in 1881 they were moved to South Kensington. In 1963, the Natural History Museum became completely independent with its own body of Trustees. The Zoological Museum, Tring, bequeathed by the second Lord Rothschild, has formed part of the Museum since 1938. The Geological Museum merged with the Natural History Museum in 1985 (opening times are as given above). Research workers are admitted to the libraries and study collections by Student's Ticket, applications for which should be made in writing to the Director.

The administrative expenses were estimated at £21,732,000 in 1988-89.

(For Salaries, see page 293).

Board of Trustees

Chairman, Sir Walter Bodmer, F.R.S.

Appointed by the Prime Minister: Sir Owen Green; Prof. J. M. Thomas, F.R.S.; G. M. Ronson; E. N. K. Clarkson, F.R.S.E.; Mrs. J. M. D'Abo; D. H. Henderson; Prof. R. May, F.R.S.

Nominated by the Royal Society: Prof. Sir Andrew Huxley, O.M., F.R.S.

Exhibition Road, South Kensington, SW7 2DE
 [01-938 8932]

The Museum's three public galleries have major displays of gems and basic earth science.

MUSEUM OF LONDON

London Wall, EC2Y 5HN.

[01-600 3699]

The Museum of London opened in 1976. It is based on the amalgamation of the former Guildhall Museum and London Museum. The Museum is controlled by ■ Board of Governors, appointed (nine each) by the Government and the Corporation of London. The exhibition illustrates the history of London from prehistoric times to the present day.

Chairman of Board of Governors, R. M. Robbins, C.B.E., F.S.A.

Director, M. G. Hebditch, F.S.A.

THE SCIENCE MUSEUM

South Kensington, SW7 2DD

[01-938 8000]

Open on Mon.-Sat. 10-6; Sun. 11-6. Closed on New Year's Day, Good Friday, May Day Bank Holiday, Christmas Eve, Christmas Day and Boxing Day. Admission charge.

The Science Museum, part of the National Museum of Science & Industry, houses the national collections of science, technology, industry and medicine. The Museum began ■ the Science Collection of the South Kensington Museum and first opened in 1857. In 1883, it acquired the collections of the Patent Museum and in 1909 the Science Collections were transferred to the new Science Museum, leaving the Art Collections with the Victoria and Albert Museum.

Some of the Museum's commercial aircraft, agricultural machinery, and road and rail transport collections are at Wroughton, near Swindon, Wilts., and are open for public viewing on selected weekends during the summer.

The Museum is responsible for the Concorde Exhibition at the Fleet Air Arm Museum, Yeovilton.

The running expenses, including building costs, of the Museum, the Science Museum Library, the National Railway Museum and the National Museum of Photography, Film and Television are estimated at £17,709,000 for 1989-90.

(For Salaries, see page 293.)

Reading Room open Mon.-Fri., 10-5; readers'
tickets available on written application to Reader
Services Section.

Established by Act of Parliament in 1934, the
National Maritime Museum illustrates the maritime
history of Great Britain in the widest sense, underlin-
ing the importance of the — and its influence on the
nation's power, wealth, culture, technology and
institutions. The Museum is in two groups of
buildings in Greenwich Park—the main buildings
centred around the Queen's House (built by Inigo
Jones, 1616-35) and the Old Royal Observatory
(including Wren's Flamsteed House) to the south.
The collections include paintings, actual craft and
ship models, ships' lines, prints and drawings, atlases
and charts, navigational and astronomical instru-
ments, uniforms and relics, books and MSS.
Director, R. L. Ormond.

NATIONAL ARMY MUSEUM
Royal Hospital Road, SW3 4HT
[01-730 0717]

Established by Royal Charter (1960). History of
five centuries of the British Army: includes the story
of the Indian Army up to Independence in 1947.

NATIONAL HERITAGE MEMORIAL FUND

10 St James's Street, SW1A 1EF
[01-930 0963]

The National Heritage Memorial Fund was established in 1980 as an independent body, and is intended as a memorial to those who have died for the U.K. The Fund is empowered, by the National Heritage Act 1980, to give financial assistance towards the cost of acquiring, maintaining or preserving land, buildings, works of art and other objects of outstanding interest which are also of importance to the national heritage. The Fund is administered by up to eleven Trustees, appointed by the Prime Minister.

The Fund's major sources of money are the Department of the Environment and the Office of Arts and Libraries, each of which gives annual grants. In its first nine years, the Fund spent £100 million in carrying out its responsibilities.

Trustees

The Lord Charteris of Amisfield (*Chairman*); The Marquess of Anglesey; Sir Nicholas Goodison; Prof. F. G. T. Holliday; Sir Martin Jacomb; C. Kinahan; Sir Oliver Millar; Prof. B. R. Morris; Sir Norman Macfarlane; M. McCrum; Cdr. L. M. M. Saunders Watson.

Director, Ms. G. Naylor.

NATIONAL INSURANCE JOINT AUTHORITY

151 Great Titchfield Street, W1P 8AD
[01-636 1696]

The Authority's function is to co-ordinate the operation of social security legislation in Great Britain and Northern Ireland, including the necessary financial adjustments between the two National Insurance Funds.

Members, The Secretary of State for Social Security;

NATIONAL AUDIT OFFICE

157-197 Buckingham Palace Road, SW1W 9SP

[01-798 7000]

The National Audit Office came into existence under the National Audit Act 1983, to replace and continue the work of the former Exchequer and Audit Department. The Act reinforced the Office's total financial and operational independence from the Government and brought its head, the Comptroller and Auditor General, into a closer relationship with Parliament as an Officer of the House of Commons.

The National Audit Office provides independent information, advice and assurance to Parliament and the public about all aspects of the financial operations of government departments and many other bodies receiving public funds. This it does by examining and certifying the accounts of these organizations; and by regularly publishing reports to Parliament on the results of its value for money investigations of the economy, efficiency and effectiveness with which public resources have been used. The National Audit Office is also the auditor by agreement of the accounts of certain international and other organizations. In addition, the office authorizes the issue of public funds to Government departments.

Comptroller and Auditor General, J. B. Bourn, C.B.

Private Secretary, T. J. Bristow.

Deputy Comptroller and Auditor General, H. D. Myland, C.B.

Assistant Auditor Generals, D. A. Dewar; M. J. Goodson; J. A. Higgins; R. N. Le Marechal.

Directors, P. J. C. Keemer; M. R. J. Paul; P. J. Beck; J. A. Davies; I. R. W. Hargest; R. W. Locke; T. Dobson; P. O'Keefe; A. G. Brown; T. J. Lovett; G. J. S. Frith; C. L. Press; B. D. Baker; C. K. Beauchamp; L. H. Hughes; M. C. Pfleger; R. M. Bennett; B. Hogg; R. J. McCourt; J. Marshall; A. R. Murray; J. Parsons; J. M. Pearce; R. A. Skeen; R. E. Spurgeon.

Deputy Directors, A. W. Bird; E. J. Weeks; C. J. Day; D. C. Page; J. E. Smith; W. L. Ewing; G. J. McKeown; M. V. Pettet; A. G. Roberts; A. Cunningham; G. G. Jones; K. Maclean; M. L. Daynes; D. R. Corsby; R. W. Tycer; J. J. Jones; D. J. Woodward; J. B. Cavanagh; J. Darling; P. R. Duncombe; R. J. Eales; D. A. Ferguson; Mrs. H. Jackson; Miss J. Lawler; J. S. McEwen; Miss C. Mawhood; A. Parker; R. A. Pocock; J. O. A. Thompson; P. G. Woodward.

NATIONAL CONSUMER COUNCIL

20 Grosvenor Gardens, SW1W 0DH

[01-730 3469]

The National Consumer Council was set up by the Government in 1975 and is funded by a grant-in-aid from the Department of Trade and Industry. The Council safeguards and furthers the interests of consumers and speaks up for them to public utilities, business, industry, the professions, and Government, both central and local.

Chairman, The Baroness Oppenheim-Barnes, P.C.

Director, M. Healy.

the Head of the Department of Health and Social Services for Northern Ireland.

Secretary, Mrs. D. W. Joannou.

NATIONAL INVESTMENT AND LOANS OFFICE

Royex House, Aldermanbury Square, EC2V 7LR
[01-606 7321]

The National Investment and Loans Office was set up on April 1, 1980 by merging the staffs of the National Debt Office and the Public Works Loan Board. The Department provides staff and services for the National Debt Commissioners and the Public Works Loan Commissioners.

Director, I. H. Peattie.

Establishment Officer, A. G. Ladd.

National Debt Office

Comptroller General, I. H. Peattie.

Public Works Loan Board

Chairman, J. E. A. R. Guinness, C.B.E.

Deputy Chairman, R. J. Dent.

Other Commissioners, Miss F. M. Cook; Miss V. J. Di Palma, O.B.E.; G. Ross Russell; P. Brackfield; D. H. Adams; R. A. Chapman; R. Emmott; B. Fieldhouse; A. Morton; I. C. Wilson.

Secretary, I. H. Peattie.

Assistant Secretary, D. L. Hammond.

NATIONAL RADILOGICAL PROTECTION BOARD

Chilton, Didcot, Oxon. OX11 0RQ
[0235-831600]

The National Radiological Protection Board is an independent statutory body created by the Radiological Protection Act 1970. The Government's purpose was to establish a national point of authoritative reference in radiological protection.

Chairman, Sir Richard Southwood, F.R.S.

Director, Dr. R. H. Clarke.

NATIONAL RIVERS AUTHORITY

Rivers House, 30-34 Albert Embankment, SE1 7TL
[01-820 0101]

The National Rivers Authority (N.R.A.) is an independent body set up under the Water Act 1989 to take over the regulatory and other river functions of the former water authorities in England and Wales. Its responsibilities include monitoring the quality of water and controlling pollution, and the management of water resources, flood defence and fisheries.

The N.R.A. has a board of 15 members, two of whom are appointed by the Minister of Agriculture, Fisheries and Food, one by the Secretary of State for Wales, and the rest by the Secretary of State for the Environment.

Chairman, The Lord Crickhowell, P.C.

Chief Executive, Dr. J. Bowman, C.B.E.

Chief Scientist, Dr. J. Pentreath.

Technical Director, Dr. C. Swinnerton.

Finance Director, P. Partridge.

Personnel Director, P. Humphreys.

External Affairs Director, Ms. M. Evans.

DEPARTMENT FOR NATIONAL SAVINGS

Charles House, 375 Kensington High Street,
W14 8SD
[01-605 9300]

The Department for National Savings was established as a Government Department in 1969. The Department is responsible for the administration of

a wide range of schemes for personal savers. (For details of schemes, see National Savings section). (For Salaries, see page 293)

Director of Savings (G2), J. A. Patterson, C.B.

Deputy Director (G3), C. D. Butler.

Establishment Officer (G5), D. S. Speedie.

Finance Officer (G5), C. Ward.

Controllers (G5), Mrs. S. Cullum (*Marketing & Information*); R. S. Watts; J. Stamp; E. B. Senior; P. N. S. Hickman Robertson.

Senior Principals (G6), D. W. Kellaway; I. T. Standen; R. H. Lee; I. Forsyth; A. S. McGill; D. H. Monaghan; M. A. Nicholls.

Principals (G7), A. G. Muir; W. J. Herd; D. K. Patterson; A. J. V. Cummings; Dr. A. Fort; W. J. Ferrier; H. Johnson; J. W. Davison; D. Newton; A. B. Wood; P. Finnie; C. E. Funk; I. Jordinson; A. Brown; K. R. Tyerman; T. Threlfall; B. Paley; A. T. Stevenson; H. Webster; J. Wheatley; T. J. F. McMahon; C. McVey; R. A. Nichol; N. Thistleton-waite; J. B. Dunphy; J. C. Foreman; D. Wilson; P. B. Robinson; G. V. Wise; A. S. Lamond; D. Jeffrey; R. H. Mitchell; J. Bolam; R. W. Day.

NATIONAL THEATRE BOARD

South Bank, SE1 9PX
[01-928 2033]

Chairman, The Lady Soames, D.B.E.

Members, R. Baird; The Lord Chorley; R. Clutton; M. Codron; Dame Judi Dench, D.B.E.; J. Hannan, M.P.; Sara Hogg; S. Lipton; Sonia Melchett; R. M. Mills; The Lord Mishcon; Sir Derek Mitchell, K.C.B., C.V.O.; Sir Michael Palliser, G.C.M.G.; Lois Sieff; J. Whitney; Sir Peter Parker, L.V.O.

ORDNANCE SURVEY
Romsey Road, Maybush, Southampton SO9 4DH
[0703-792000]

The Ordnance Survey is the national mapping agency for Britain and it produces over 220,000 large scale maps of the country at three basic scales. These are 1:1,250 (50 inches to 1 mile) for urban areas; 1:2,500 (25 inches to 1 mile) for rural areas; and 1:10,000 (6 inches to 1 mile) for mountain and moorland. Additionally, Ordnance Survey produces a range of small scale maps and other products for general use.

PAROLE BOARD

Abell House, John Islip Street, SW1P 4LH
[01-217 3000]

The Board was constituted under section 59 of the Criminal Justice Act, 1967.

The function of the Board is to advise the Secretary of State for the Home Department with respect to: (1) Release on licence under section 60 (i) or 61 and recall under section 62 of the Criminal Justice Act, 1967 of persons whose cases have been referred to the Board by the Secretary of State; (2) The conditions of such licences, and the variation and cancellation of such conditions; and (3) any other matter so referred which is connected with release on licence or recall of persons to whom section 60 or 61 of the Act applies.

Chairman, The Viscount Colville of Culross, q.c.

Vice-Chairman, The Hon. Mr. Justice Garland.

Secretary, T. J. Wilkie.

OFFICE OF THE PARLIAMENTARY COMMISSIONER AND HEALTH SERVICE COMMISSIONER

Church House, Great Smith Street, SW1P 3BW
[01-276 3000]

The Parliamentary Commissioner for Administration is responsible for investigating complaints referred to him by Members of the House of Commons from members of the public who claim to have sustained injustice in consequence of maladministration in connection with administrative action taken by or on behalf of Government Departments and certain non-departmental public bodies. Certain types of action by Government Departments or bodies are excluded from investigation. Actions taken by other public bodies (such ■ local authorities, the police, the Post Office and nationalized industries) are outside the Commissioner's scope.

The Health Service Commissioners for England, for Scotland and for Wales are responsible for investigating complaints against National Health Service authorities that are not dealt with by those authorities to the satisfaction of the complainant. Complaints can be referred direct by the member of the public who claims to have sustained injustice or

Department also provides an information service about patent specifications. In 1986 the Office granted 16,206 patents and registered 7,167 designs and 17,089 trade marks.

PAYMASTER GENERAL'S OFFICE
H.M. Treasury, Parliament Street, SW1P 3AG
[01-270 4350]

Sutherland House, Russell Way, Crawley, West
Sussex RH10 1UH
[0293-560999]

The Paymaster General's Office — formed by the consolidation in 1835 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Its function is that of paying agent for Government Departments, other than the Revenue Departments. Most of its payments are made through banks, to whose accounts the necessary transfers are made at the Bank of England. The payment of over one million public service pensions is an important feature of its work.

Paymaster General, The EARL OF CAITHNESS.

Assistant Paymaster General (G5), L. A. Andrews.

Senior Principals (G6), D. R. L. Breed; K. Sullens.

POLICE COMPLAINTS AUTHORITY
10 Great George Street, SW1P 3AB
[01-273 6403]

The Police Complaints Authority was established under the Police and Criminal Evidence Act 1984 to introduce a further independent element into the procedure for dealing with complaints by members of the public against police officers in England and Wales. The Authority has powers to supervise the investigation of certain categories of serious complaints and certain statutory functions in relation to the disciplinary aspects of complaints.

Chairman, His Hon. Judge Petre.

Deputy Chairman (Discipline), Brig. J. Pownall.

Deputy Chairman (Investigations), Rt. Hon. R. Moyle.

Members, Air Vice-Marshal D. Clark; V. Clements; J. Crawford; B. A. Gillman; G. V. Marsh; B. V. Moore; P. W. Moorhouse; K. Singh; Capt. N. Taylor; Mrs. R. Vickers; Mrs. R. Wolff.

POLITICAL HONOURS SCRUTINY

COMMITTEE

Cabinet Office, 53 Parliament Street, SW1A 2NG
[01-210 3000]

The function of the Political Honours Scrutiny Committee is set out in an Order in Council dated May 31, 1979. The Prime Minister submits certain particulars to the Committee about persons proposed to be recommended for honour for their political services. The Committee, after such enquiry as they think fit, report to the Prime Minister whether, so far as they believe, the persons whose names are submitted to them are fit and proper persons to be recommended.

*Chairman, The Lord Shackleton, K.G., P.C., O.B.E.
Members, The Lord Grimond, T.D., P.C.; The Lord Pym, M.C., P.C.
Secretary, J. H. Thompson, c.b.*

THE POLYTECHNICS AND COLLEGES FUNDING COUNCIL

Metropolis House, 22 Percy Street, W1P 9FF
[01-637 1132]

The Polytechnics and Colleges Funding Council (P.C.F.C.) was established as a result of the Education Act 1988 to oversee the sector of higher education formerly controlled by local authorities. The Council consists of 15 members appointed by the Secretary of State for Education and Science and meets five times a year.

The P.C.F.C. distributes over £1,000 million of public funds in England each year to all the polytechnics, the largest colleges of higher education, and a number of specialist colleges. It also funds certain higher education courses in further education colleges. In April 1989 the P.C.F.C. sector comprised 84 institutions serving nearly 350,000 students. The P.C.F.C. also advises the Secretary of State on the funding of higher education. For this it has established Programme Advisory Groups to review provision in nine subject areas. It also establishes *ad hoc* committees of enquiry on particular issues.

Chairman, Sir Ronald Dearing.

Chief Executive, W. H. Stubbs.

Director of Finance, R. McClure.

Secretary, A. R. Phillips.

OFFICE OF POPULATION CENSUSES AND SURVEYS

St. Catherine's House, 10 Kingsway,
WC2B 6JP
[01-242 0262]

The Office of Population Censuses and Surveys was created by a merger in May 1970 of the General Register Office and the Government Social Survey Department. The Registrar General controls the local registration service in England and Wales in the exercise of its registration and marriage duties. Copies of the original registrations of births, still-births, marriages and deaths are kept in London. A register of adopted children is held at Titchfield. Central indexes are compiled annually and certified copies of entries may be obtained on payment of certain fees. Since 1841 the Registrar General has been responsible for taking the census of population. She also prepares and publishes a wide range of statistics and appropriate commentary relating to population, fertility, births, still-births, marriages, deaths and cause of death, infectious diseases, sickness and injuries. The Registrar General also maintains, at Southport, a central register of persons on doctors' lists, for the purposes of the National Health Service.

Hours of public access, Mon.-Fri., 8.30 a.m.-4.30 p.m.

PORT OF LONDON AUTHORITY

International House, World Trade Centre,
E1 9UN
[01-481 1954]

The Port of London Authority is a public trust constituted under the Port of London Act 1968 and a Harbour Revision Order of 1975. The Board comprises a Chairman and up to ten non-executive members appointed by the Secretary of State for Transport, and up to six executive members appointed by the Board.

Chairman, Sir Brian Kellett.

Vice-Chairman, R. Crawford.

Chief Executive, River, D. Jeffery.

Chief Executive, Property, J. C. Jenkinson, M.V.O.

Chief Executive Tilbury, J. S. McNab.

Secretary, G. E. Ennals.

THE POST OFFICE

33 Grosvenor Place, SW1X 1PX
[01-235 8000]

Crown services for the carriage of Government despatches were set up about 1516. The conveyance of public correspondence began in 1635 and the mail service was made a Parliamentary responsibility with the setting up of a Post Office in 1657. Telegraphs came under the Post Office control in 1870 and the Post Office Telephone Service began in 1880. The National Girobank service of the Post Office began in 1968. The Post Office ceased to be a Government Department on October 1, 1969 and responsibility for the running of the postal, telecommunications, and giro and remittance services was transferred to a public authority called the Post Office. The 1981 British Telecommunications Act separated the functions of the Post Office, making it solely responsible for postal services and Girobank. (The Government announced in 1988 that Girobank is to be privatized.)

The Chairman and members of the Post Office Board are appointed by the Secretary of State but responsibility for the running of the Post Office as a whole rests with the Board in its corporate capacity.

PRIVY COUNCIL OFFICE

Whitehall, SW1A 2AT
[01-270 3000]

The Office is responsible for the arrangements leading to the making of all Royal Proclamations and Orders in Council; for certain formalities connected with Ministerial changes; for considering applications for the grant (or amendment) of Royal Charters; the scrutiny and approval of bye-laws and statutes of Chartered Bodies; for the appointment of High Sheriffs and many Crown and Privy Council appointments to governing bodies.

Lord President of the Council (and Leader of the House of Commons), THE RT. HON. SIR GEOFFREY HOWE, Q.C., M.P.

Private Secretary, S. Catling.

Minister of State, THE RT. HON. RICHARD LUCE, M.P.

Clerk of the Council, G. I. de Deney, C.V.O. . . . £42,900

Deputy Clerk of the Council, R. P. Bulling . . . £27,547

Senior Clerk, Miss J. Fairbairn £16,903

PUBLIC HEALTH LABORATORY SERVICE

61 Colindale Avenue, NW9 5DF
[01-200 1296]

The Public Health Laboratory Service comprises 52 regional or area laboratories distributed through England and Wales, the Central Public Health Laboratory and the Communicable Disease Surveillance Centre at Colindale, and the Centre for Applied Microbiology and Research, Porton Down. The P.H.L.S. gives a diagnostic microbiological service to hospitals, and provides reference facilities that are available nationally. It collates information on the incidence of infection, and when necessary it institutes special enquiries into outbreaks and the epidemiology of infectious disease. It also undertakes bacteriological surveillance of the quality of food and water for local authorities and others. The P.H.L.S.

is often called upon to advise central and local government and the hospital service on many aspects of infectious disease. It maintains close contact with veterinary organizations in areas of mutual interest, and collaborates with the World Health Organization and with national laboratory and epidemiological services overseas.

The Board

REGISTRAR OF PUBLIC LENDING RIGHT

Bayhealth House, Prince Regent Street,

Stockton-on-Tees, TS18 1DF

[0642-604699]

Under the Public Lending Right system, in operation since January 1983, payment is made from public funds to authors whose books are lent out from public libraries. Payment is made once a year (in February) and the amount each author receives is proportionate to the number of times (established from a sample) that each registered book was lent out during the previous year.

The Registrar of PLR, who is appointed by the Minister for the Arts, compiles the register of authors and books. Only living authors resident in the U.K. or West Germany are eligible to apply. (The term 'author' covers writers, illustrators, translators, and some editors/compiler.)

A payment of 1.45 pence was made in 1988-89 for each estimated loan of a registered book, up to a top limit of £6,000 for the books of any one registered author: the money for loans above this level is used to augment the remaining PLR payments.

In February 1989, the sum of £3,107,000 was made available for distribution to 13,211 registered authors and assignees as the sixth annual payment of PLR.

The PLR Advisory Committee advises the Minister for the Arts and the Registrar of Public Lending Right. Its members are appointed by the Minister. Chairman of Advisory Committee, D. H. Whitaker. Registrar, J. W. Sumision.

PUBLIC RECORD OFFICE See Record Offices

PUBLIC TRUST OFFICE Stewart House, 24 Kingsway, WC2B 6JX [01-269 7000]

The Public Trustee is a trust Corporation created to undertake the business of executorship and trusteeship; he can act as executor or administrator

of the estate of a deceased person, or as trustee of a will or settlement. The Public Trustee is also responsible for the performance of all the administrative, but not the judicial, tasks required of the Court of Protection under Part VII of the Mental Health Act, 1983, relating to the management and administration of the property and affairs of persons suffering from mental disorder. The Public Trustee also acts as Receiver when so directed by the Court, usually where there is no other person willing or able so to act.

The Accountant General of the Supreme Court, through the Court Funds Office, is responsible for the investment and accounting of funds in court for persons under a disability, monies in Court subject to litigation and statutory deposits.

The Court Funds Office is at 22 Kingsway, WC2B 6LE (01-936 6000).

Public Trustee and Accountant General, J. A. Boland.

Chief Executive, Dr. P. Sanders.

RECORD OFFICES, ETC.

THE PUBLIC RECORD OFFICE

Chancery Lane, WC2A 1LR

[01-876 3444]

Ruskin Avenue, Kew,
Richmond, Surrey TW9 4DU
[01-876 3444]

The Office, originally established in 1838 under the Master of the Rolls, was placed by the Public Records Act 1958 under the direction of the Lord Chancellor. He appoints the Keeper of Public Records, whose duties are to co-ordinate and supervise the selection of records of government departments and the English Law Courts for permanent preservation, to safeguard

the records under his charge, and to make them available to the public.

The Office holds records of central government dating from *Domesday Book* (1086) to the present. Under the Public Records Act 1967 they are normally open to inspection when 30 years old, and are then available, without charge, in the reading rooms, Mon.-Fri., 9.30-5. The museum at Chancery Lane is open Mon.-Fri., 10-5.

Keeper of Public Records (G3), M. Roper.

Deputy Keeper (G5), C. D. Chalmers.

Records Administration Officer (G5), Dr. N. G. Cox.

Establishment Officer (G7), J. A. Keene.

Principal Assistant Keepers (G6), Mrs. J. M. Cox; N.

E. Evans; Dr. A. A. H. Knightbridge; Mrs. A. E.

Morton; Mrs. A. N. Nicol; Dr. J. B. Post; J. L.

Walford.

Assistant Keepers (G7), Mrs. M. K. Banton; Miss G.

L. Beech; Dr. A. S. Bevan; Dr. T. M. Chalmers;

Miss M. M. Condon; C. R. H. Cooper; Miss A.

Crawford; Dr. D. Crook; Dr. H. Forde; Dr. M. R.

Foster; Dr. E. M. Hallam Smith; Ms. S. M. F. Healy;

Dr. E. J. Higgs; Mrs. H. E. Jones; A. H. Lawes; A.

J. McDonald; T. R. Padfield; Dr. N. A. M. Rodger;

Head, Repository and Reprographic Services (G7), K. J. Smith.

Principal Inspecting Officer (G7), A. W. H. Medlicott.

Inspecting Officers, D. Barlow; R. A. Blake; Miss C. J. Dimmer; J. S. Harley; F. McCall; Mrs. E. J. Baldwin; Mrs. M. A. Bull; C. J. Edwards; Mrs. H. R. Saw..... £14,549-£18,573

Head of Information Technology Unit (G7), Miss J. K. Lawlor.

ADVISORY COUNCIL ON PUBLIC RECORDS

Public Record Office, Chancery Lane, WC2A 1LR

[01-878 3666]

Council members are appointed by the Lord Chancellor, under the Public Records Act 1958, to advise him on matters concerning public records in general and, in particular, on those aspects of the work of the Public Record Office which affect members of the public who make use of the facilities provided by the Public Record Office'. The Council meets quarterly and produces an annual report which is published alongside the Report of the Keeper of Public Records

■ House of Commons sessional paper.

Chairman, The Master of the Rolls.

Members, Prof. B. W. E. Alford; Miss S. Beesley; A. C. Carlile, q.c., m.p.; Rt. Hon. Sir Frank Cooper, G.C.B., C.M.G.; Miss V. Cromwell; T. A. G. Davis, m.p.; A. Gomersall; J. S. W. Gibson; Prof. P. D. A. Harvey; M. A. Latham, m.p.; Prof. Shula Marks; Sir George Moseley, K.C.B.; Prof. H. Roseveare; Prof. W. Saunders; Prof. R. Skidelsky; D. G. Vaisey.

Assessors, M. D. Huebner; M. Roper.

Secretary, Dr. M. R. Foster.

HOUSE OF LORDS RECORD OFFICE

House of Lords, SW1A 0PW

[01-219 3074]

Since 1497, the records of Parliament have been kept within the Palace of Westminster. They are in the custody of the Clerk of the Parliaments, who in 1946 established a record department to supervise their preservation and their production to students. The Search Room of this office is open to the public Mon.-Fri., 9.30-5.

The records preserved number some 3,000,000 documents, and include Acts of Parliament from 1497, Journals of the House of Lords from 1510, Minutes and Committee proceedings from 1610, and Papers laid before Parliament from 1531. Amongst the records are the Petition of Right, the Death

Warrant of Charles I, the Declaration of Breda, and the Bill of Rights. The House of Lords Record Office also has charge of the Journals of the House of Commons (from 1547), and other surviving records of the Commons (from 1572), which include plans and annexed documents relating to Private Bill legislation from 1818. Among other documents are the records of the Lord Great Chamberlain, the political papers of certain members of the two Houses (including the papers of Lloyd George, Bonar Law and other statesmen previously preserved in the Beaverbrook Library), and documents relating to Parliament acquired on behalf of the nation. All the manuscripts and other records are preserved in the Victoria Tower of the Houses of Parliament. A permanent exhibition was established in the Royal Gallery in 1979.

Clerk of the Records, H. S. Cobb, F.S.A. £29,920-£38,536

Deputy Clerk of the Records, D. J. Johnson, F.S.A. £23,383-£34,576

Assistant Clerks of the Records, J. C. Morgan (*Sound Archives*); S. K. Ellison £19,110-£28,708

ROYAL COMMISSION ON HISTORICAL MANUSCRIPTS

Quality House, Quality Court, Chancery Lane,
WC2A 1HP
[01-242 1198]

The Commission was set up by Royal Warrant in 1869 to enquire and report on collections of papers of value for the study of history in private hands. In 1959 a new warrant enlarged these terms of reference to include all historical records, wherever situated, outside the Public Records and gave it added responsibilities, as a central co-ordinating body, to promote, assist and advise on their proper preservation and storage. The Commission has published over 200 volumes of reports. It holds a further 32,000 unpublished reports in the National Register of Archives, available for consultation in its search room. It also administers the Manorial and Tithe Documents Rules on behalf of the Master of the Rolls.

Chairman, The Lord Blake, F.B.A.
Commissioners, The Lord Kenyon, C.B.E., F.S.A.; The Lord Fletcher, P.C., F.S.A.; J. P. W. Ehrman, F.B.A., F.S.A.; Prof. S. F. C. Milsom, F.B.A.; Sir John Habakuk, F.B.A.; G. E. Aylmer, F.B.A.; P. T. Cormack, F.S.A., M.P.; H. M. Colvin, C.B.E., F.B.A., F.S.A.; Prof. G. W. S. Barrow, F.B.A.; Ms. V. L. Pearl, F.S.A.; The Marquess of Anglesey; Prof. Owen Chadwick, O.M., K.B.E., F.B.A.; D. G. Vaisey, F.S.A.; The Viscount of Arbuthnott, C.B.E., D.S.C.; The Lord Camoys; The Lord Egremont and Leconfield; Ms. J. Thirsk, F.B.A.
Secretary, B. S. Smith, F.S.A.

SCOTTISH RECORD OFFICE

H.M. General Register House, Edinburgh EH1 3YY
[031-556 6585]

The history of the national archives of Scotland can be traced back to the 13th century. The present headquarters of the Scottish Record Office, the General Register House, was founded in 1774. Here are preserved the administrative records of pre-Union Scotland, the registers of central and local courts of law, the public registers of property rights and legal documents, and many collections of local and church records and private archives. Certain groups of records, mainly the modern records of government departments in Scotland, the Scottish railway records, the plans collection, and private archives of an industrial or commercial nature are preserved in the branch repository at the West Register House in Charlotte Square. The Search

Rooms in both buildings open Mon.-Fri., 9-4.45. A permanent exhibition at the West Register House and changing exhibitions at the General Register House are open to the public on weekdays, 10-4. The National Register of Archives (Scotland), which is a branch of the Scottish Record Office, is based in the West Register House.

Keeper of the Records of Scotland, Dr. A. L. Murray.

CORPORATION OF LONDON RECORDS OFFICE

Guildhall, EC2P 2EJ
[01-260 1251]

Contains the municipal archives of the City of London which are regarded as the most complete collection of ancient municipal records in existence. Includes charters of William the Conqueror, Henry II, and later Kings and Queens to 1957; ancient custumals: Liber Horn, Dunthorne, Custumarum, Ordinacionum, Memorandorum and Albus, Liber de Antiquis Legibus, and collections of Statutes; continuous series of judicial rolls and books from 1252 and Council minutes from 1275; records of the Old Bailey and Guildhall Sessions from 1603, and financial records from the 16th century, together with the records of London Bridge from the 12th century and numerous subsidiary series and miscellanea of historical interest. A Guide was published in 1951. Readers' Room open Mon.-Fri., 9.30-4.45.

Keeper of the City Records, The Town Clerk.

City Archivist, J. R. Sewell.

Deputy City Archivist, Mrs. J. M. Bankes.

RED DEER COMMISSION

Knowsley, 82 Fairfield Road, Inverness IV3 5LH
[0463-231751]

Chairman, I. K. Mackenzie, O.B.E. £24,645
Secretary, N. H. McCulloch £13,318-£17,149

REVIEW BODIES

The secretariat for these bodies is provided by the Office of Manpower Economics (see page 339).

ARMED FORCES PAY

The Review Body on Armed Forces Pay was appointed in September 1971 to advise the Prime Minister on the pay and allowances of members of Naval, Military and Air Forces of the Crown and of any women's service administered by the Defence Council.

The members of the Review Body are: Sir Peter Cazalet (*Chairman*); P. Ball; D. P. M. Hudson; Mrs. J. Hughes; R. Sanderson, O.B.E.; Gen. Sir Richard Trant, K.C.B.; Prof. J. White, C.B.E.

DOCTORS' AND DENTISTS' REMUNERATION

The Review Body on Doctors' and Dentists' Remuneration was appointed in July 1971 to advise the Prime Minister on the remuneration of doctors and dentists taking any part in the National Health Service.

The members of the Review Body are: Sir Graham Wilkins (*Chairman*); Dr. Anne Hogg; D. G. Richards, C.B.E.; Prof. G. F. Thomason, C.B.E.; J. K. Warburton, C.B.E.

NURSING STAFF, MIDWIVES, HEALTH VISITORS AND PROFESSIONS ALLIED TO MEDICINE

The Review Body for nursing staff, midwives, health visitors and professions allied to medicine was set up in July 1983 to advise the Prime Minister on the remuneration of nursing staff, midwives and health visitors employed in the National Health Service; and physiotherapists, radiographers, remedial gymnasts, occupational therapists, orthopædists, chiropodists, dietitians and related grades employed in the National Health Service.

The members of the Review Body are: Sir James Cleminson, M.C. (*Chairman*); Sir John Herbeccq, K.C.B. (*Deputy Chairman*); Mrs. M. Cameron; Miss B. Cooper, Q.C.; J. Hildreth; Miss A. Mackie, O.B.E.; I. H. Phillips; Prof. G. F. Thomason, C.B.E.; Miss D. Whittingham.

TOP SALARIES

The Review Body on Top Salaries was appointed in May, 1971 to advise the Prime Minister on the remuneration of the higher judiciary and other judicial appointments; senior civil servants; and senior officers of the armed forces. Until August 1980 the remit also included the Chairmen and members of the Boards of nationalized industries. The Review Body has also been asked on a number of occasions to advise on the remuneration of Members of Parliament and of Ministers and on the level of parliamentary allowances.

The members of the Review Body are: Sir David Nickson, K.B.E. (*Chairman*); Sir Terence Beckett, K.B.E.; J. D. Birkin, T.D.; Ms. L. Botting; Sir Peter Cazalet; The Lord Chorley; H. S. Pigott; J. J. R. Pope, O.B.E.; Sir Thomas Skyrme, K.C.V.O., C.B., C.B.E., T.D.; Sir Anthony Wilson.

ROYAL BOTANIC GARDEN, EDINBURGH

Inverleith Row, Edinburgh EH3 5LR

[031-552 7171]

The Royal Botanic Garden Edinburgh, which originated as the Physic Garden established in 1670 beside the Palace of Holyroodhouse, became the direct responsibility of the Commissioners of Her Majesty's Works and Public Buildings (later the Department of Public Works) in 1889, transferring to the Department of Agriculture and Fisheries for Scotland in 1969. Since 1986, RBG Edinburgh has been administered by a Board of Trustees established under the National Heritage (Scotland) Act 1985.

RBG Edinburgh is an international centre for scientific research on plant diversity, maintaining collections of living plants and reference resources, including a herbarium of some 1.8 million specimens of preserved plants. Other statutory functions of RBG Edinburgh include provision of education and information on botany and horticulture, and the provision of public access to the living plant collections.

The Garden moved to its present site at Inverleith, Edinburgh in 1821. There are also three outstations of RBG Edinburgh: Younger Botanic Garden, Benmore, near Dunoon, Argyllshire; Logan Botanic Garden, near Stranraer, Wigtownshire; Dawyck Botanic Garden, near Stobo, Peeblesshire. Public opening hours: RBG Edinburgh - daily (except Dec. 25, Jan 1) 9 to sunset (1 hour earlier in summer) (Sun. 11 to sunset); outstations - April-Oct. 10-6.

Chairman of the Board of Trustees, Sir Peter Hutchinson, Bt.

Regius Keeper, Prof. J. McNeill.

Assistant Keeper, vacant.

ROYAL BOTANIC GARDENS, KEW

Richmond, Surrey TW9 3AB

[01-940 1171]

Also at: Wakehurst Place, Ardingly, near Haywards Heath, West Sussex RH17 6TN
[0444-892701]

The Royal Botanic Gardens (RBG), Kew were founded in 1759 by H.R.H. Princess Augusta. In 1841, they became a public institution; in 1847, the Museums of Economic Botany were opened, and in 1852, the Herbarium and Library were established. The Jodrell Laboratory opened in 1876. In 1965, the garden at Wakehurst Place was acquired; it is owned by the National Trust and managed by RBG Kew. From 1903 to 1984, RBG Kew was part of the Ministry of Agriculture, Fisheries and Food. Under the National Heritage Act 1983, a Board of Trustees was set up to administer the Gardens which in 1984 became an independent body supported by a grant-in-aid.

The functions of RBG Kew are to carry out research into plant sciences, to disseminate knowledge about plants and to provide the public with the opportunity to gain knowledge and enjoyment from the Gardens' collections. There are extensive national reference collections of living and preserved plants and a comprehensive library and archive. The main emphasis is on tropical and subtropical plants.

Open daily, except Christmas Day and New Year's Day, from 9.30 a.m. The closing hour varies from 4 p.m. in mid-winter to 6.30 p.m. on week-days, and 8 p.m. on Sundays and Bank Holidays, in mid-summer. Admission, £1. Museums open 9.30 a.m.; Glasshouses, 9.30-4.30 (weekdays); to 5.30 p.m. (Sundays). No dogs except guide-dogs for the blind.

BOARD OF TRUSTEES

Chairman, Hon. J. D. Eccles, C.B.E.

Members, Sir Leslie Fowden, F.R.S.; Sir David Attenborough, C.B.E., F.R.S.; Prof. W. G. Chaloner, F.R.S.; Prof. E. C. D. Cocking, F.R.S.; Sir Philip M. Dowson, C.B.E.; Prof. G. E. Fogg, C.B.E.; R. A. E. Herbert; Mrs. A. Lennox-Boyd; P. J. D. Marshall; Prof. Elizabeth B. Robson, ph.d.; Cdr. L. M. Saunders Watson, R.N. (ret).

Director, Dr. G. T. Prance.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851

Sherfield Building,
Imperial College of Science and Technology,

SW7 2AZ

[01-589 6483]

Incorporated by Supplemental Charter a permanent Commission after winding up the affairs of the Great Exhibition of 1851. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.

President, H.R.H. The Duke of Edinburgh, K.G., K.T., O.M., G.B.E., P.C.

Chairman, Board of Management, Sir Denis Rooke, C.B.E., F.R.S.

Secretary to Commissioners, M. C. Neale, C.B.

THE ROYAL MINT

Llantrisant, nr. Pontyclun,

Mid-Glamorgan CF7 8YT

[0443-222111]

Master Worker and Warden, The Chancellor of the Exchequer (ex officio).

RURAL DEVELOPMENT COMMISSION

11 Cowley Street, SW1P 3NA

[01-276 6969]

The Rural Development Commission was formed in 1988 by the merger of the Development Commission for Rural England and the Council for Small Industries in Rural Areas. It is a statutory body funded by Government grant-in-aid which undertakes to alleviate economic and social problems in rural areas and advises the Government on related rural matters in England. It concentrates its resources in Rural Development Areas but some assistance is available both within and outside the RDAs.

Chairman, The Lord Vinson, L.V.O.

Other Commissioners, Mrs. P. Batty Shaw, C.B.E.; R. Best, O.B.E.; Prof. M. D. I. Chisholm; D. J. C. Davenport, C.B.E.; M. Schreiber; R. Thompson; A. Leavett; J. L. Thompson; G. P. Gray; M. B. Ferris; J. M. Galsworthy.

Chief Executive, R. Butt.

SCIENCE AND ENGINEERING RESEARCH COUNCILPolaris House, North Star Avenue,
Swindon, Wilts. SN2 1ET

[0793-411000]

The Science and Engineering Research Council (S.E.R.C.) is one of five research councils funded through the Department of Education and Science "to develop the natural and social sciences, including engineering, to maintain a fundamental capacity of research and scholarship and to support relevant postgraduate education". S.E.R.C.'s role is to encourage and support research and advanced training in U.K. universities and polytechnics in all the basic areas of science and engineering.

Chairman, Prof. E. W. J. Mitchell.

Members, Prof. Sir Michael Atiyah; Dr. R. F. Coleman; Prof. D. E. N. Davies; Prof. B. E. F. Fender; C. A. P. Foxell; Prof. C. J. Humphreys; Prof. M. A. Jeeves; Dr. C. Jordan; Dr. H. D. Law; D. Nash; Prof. E. R. Oxburgh; Prof. D. H. Perkins; Sir Charles Reece; D. T. Shore; Prof. J. M. Thomas; Prof. Sir Robert Wilson; Prof. A. Wolfendale.

SCOTTISH OFFICE

The Secretary of State for Scotland is responsible in Scotland for a wide range of statutory functions which in England and Wales are the responsibility of a number of departmental ministers. He also works closely with ministers in charge of Great Britain departments on topics of special significance to Scotland within their fields of responsibility. His statutory functions are administered by five main departments: Department of Agriculture and Fisheries for Scotland, Scottish Development Department, Scottish Education Department, Scottish Home and Health Department, and Industry Department for Scotland. These Departments (plus Central Services embracing the Solicitor's Office, the Scottish Information Office, Establishment, Liaison and Finance Divisions) are collectively known as the Scottish Office. In addition there are a number of other Scottish Departments for which the Secretary of State has some degree of responsibility: these include the Scottish Courts Administration, the Department of the Registrar General for Scotland (the General Register Office), the Scottish Record Office and the Department of the Registers of Scotland. The Secretary of State also bears Ministerial responsibility for the activities in Scotland of several statutory bodies whose functions extend

throughout Great Britain such as the Training Agency and the Forestry Commission. (For Salaries, see page 293)

SECURITIES AND INVESTMENTS BOARD
3 Royal Exchange Buildings, EC3V 3NL
[01-283 2474]

[Central register of authorized firms: 01-929 3652]

The Securities and Investments Board was formed in 1985 and is the designated agency, under the Financial Services Act 1986, to regulate the activities of investment businesses in the U.K. Although not a statutory body, the Board has transferred powers under the 1986 Act to recognize self-regulating organizations, professional bodies, investment exchanges and clearing houses, and directly to authorize firms to do investment business in the U.K. The Board also has the power to act as a prosecution

authority in respect of persons carrying out authorizable business whilst unauthorized.

Members of the Board are appointed by agreement between the Secretary of State for Trade and Industry and the Governor of the Bank of England. The Chairman and Executive Directors are full-time Board members; the others are part-time and non-executive.

The Board

Chairman, D. A. Walker.

Deputy Chairmen, Sir Mark Weinberg; R. N. Quaranta, C.B.E.

Members (part-time), A. V. Alexander, C.B.E.; D. M. Child, C.B.E.; J. Clement; R. G. Hodgson; P. J. Manser; W. Proudfoot; E. E. Ray, C.B.E.; G. Ross Russell; The Hon. W. G. Runciman, C.B.E.; Mrs R. Waterhouse, C.B.E.; R. B. Williamson, C.B.E.

 [01-388 1277]

The Sports Council exists to promote the development of sport and foster the provision of facilities for sport and recreation in Great Britain.

Chairman, P. G. Yarranton.

HER MAJESTY'S STATIONERY OFFICE
 St. Crispins, Duke Street, Norwich NR3 1PD
 [0603-622211]

Her Majesty's Stationery Office (HMSO) was established in 1786 and is the U.K. Government executive agency that provides printing, binding, office supplies and office machinery to the public service. HMSO is also the Government's publisher and has bookshops for the sale of Government publications in London, Edinburgh, Manchester, Bristol, Birmingham and Belfast, as well as appointed agents in other cities. HMSO obtains most of its supplies and printing from commercial sources by competitive tender, apart from about 20 per cent of its printing requirement, such as Hansard and Bills and Acts of Parliament, which are produced in its own printing works. HMSO is a self-financing Government trading fund and competes for its business with other commercial suppliers.

(For Salaries, see page 293)

Controller and Chief Executive (G2), P. I. Freeman.

STATUTE LAW COMMITTEE
 House of Lords, SW1A 0PW

The Committee exercises a general supervision over the form of the statute law and of Statutory Instruments. It is also responsible for the publication of amended editions of the Statutes, including the current official revised edition of the Statutes in Force.

Chairman, The Lord Chancellor.
Vice-Chairman, The Hon. Mr. Justice Beldam.
Members, The Attorney General; The Lord Advocate; The Rt. Hon. J. Morris, Q.C., M.P.; The Rt. Hon. P. Archer, Q.C., M.P.; Sir Anthony Buck, Q.C., M.P.; Sir Derek Oulton, K.C.B.; D. Rippengal, C.B., Q.C.; H. Knorpel, C.B.; Sir Henry de Waal, K.C.B., Q.C.; N. J. Adamson, C.B., Q.C.; Sir John Sainty, K.C.B.; Sir Terence Heiser, K.C.B.; H. W. Gamon, C.B.E., M.C.; Sir Nicholas Lyell, Q.C., M.P.; Sir Robin Butler, K.C.B., C.V.O.; C. Boulton, C.B.; K. F. Barclay; M. H. Collon; R. Brodie; Sir Clive Whitmore, G.C.B., C.V.O.; J. Nursaw, C.B.; The Hon. Lord Davidson; H. M. Barclay; Rt. Hon. Sir Brian Hutton; The Lord Jauncey of Tullichettle, P.C.; Dr. P. Freeman.
Secretary, B. P. Keith.

OFFICE OF TELECOMMUNICATIONS
 Atlantic House, Holborn Viaduct, EC1N 2HQ
 [01-363 4020]

Oftel is a non-Ministerial Government Department headed by a Director General, which is responsible for supervising telecommunications activities in the U.K.

Its principal functions are to ensure that holders of telecommunications licences comply with their licence conditions; to maintain and promote effective competition in telecommunications; to promote, in respect of prices, quality and variety the interests of consumers, purchasers and other users of telecommunications services and apparatus.

The Director General has powers to deal with anti-competitive practices and monopoly situations. He also has a duty to consider all reasonable complaints and representations about telecommunications apparatus and services.

Director General, Prof. Sir Brian Carsberg.
Deputy Director General, W. R. B. Wiggleworth.

Director of P.T.O. Licensing, G. P. Knight.
Director of Apparatus Approval, Dr. H. Stewart.
Head of Information, D. C. Redding.

DEPARTMENT OF TRADE AND INDUSTRY
 1-19 Victoria Street, SW1H 0ET
 [01-215 5000]

[*Single European Market*: 01-200 1992]

The Department is responsible for:

- (a) international trade policy, including the promotion of U.K. trade interests in the European Community, GATT, OECD, UNCTAD and other international organizations.
 - (b) under the direction of the British Overseas Trade Board, the promotion of U.K. exports and assistance to exporters.
 - (c) policy in relation to industry, including the general promotion of the interests of industry and assistance to industry; specific interest in all manufacturing and service industries apart from those covered by other Departments; regional policy, Inner Cities Initiative, enterprise and deregulation, and regional industrial assistance (some of this applying only to England); and policy in relation to the public bodies British Shipbuilders, the Post Office and the British Technology Group.
 - (d) competition policy and consumer protection, including relations with the Office of Fair Trading and the Monopolies and Mergers Commission, and the National Weights and Measures Laboratory.
 - (e) policy on science and technology and research and development matters, standards and designs, support for innovation, and the administration of the National Physical Laboratory, National Engineering Laboratory, Warren Spring Laboratory and the Laboratory of the Government Chemist.
 - (f) the administration of company legislation and the Companies House Executive Agency; the Insolvency Service; the regulation of the insurance industry; the regulation of radio frequencies; and the Patent Office.
 - (g) the Business Statistics Office.
- (For Salaries, see page 293.)

THE TREASURY
Parliament Street, SW1P 3AG
[01-238 3000]

The Office of the Lord High Treasurer has been continuously in commission for well over 200 years: the Lord High Commissioners of H.M. Treasury consist of the First Lord of the Treasury (who is also the Prime Minister), the Chancellor of the Exchequer and five Junior Lords. This Board of Commissioners is assisted at present by the Chief Secretary, a Parliamentary Secretary who is the Chief Whip, a Financial Secretary, an Economic Secretary, a Minister of State, and by the Permanent Secretary.

The Prime Minister and First Lord is not primarily concerned in the day to day aspects of Treasury business. The Parliamentary Secretary and the Junior Lords are Government whips in the House of Commons. The management of the Treasury devolves upon the Chancellor of the Exchequer and, under him, the Chief Secretary, the Financial Secretary, the Economic Secretary and the Paymaster General.

The Chief Secretary is responsible for the control of public expenditure; public services and industry groups; overseas aid and export credit; efficiency in the public sector; and procurement policy.

The Financial Secretary discharges the traditional responsibility of the Treasury for the largely formal procedure for the voting of funds by Parliament. He also has responsibility for other Parliamentary financial business, Inland Revenue duties and taxes, privatization policy, and industrial casework.

The Economic Secretary has responsibility for monetary policy; the financial system (including banks, building societies and other financial institutions); HMSO, the Central Office of Information, the Government Actuary's Department, and the Civil Service catering organization; international financial business; North Sea fiscal regime; Department for National Savings, Registry of Friendly Societies

and the National Loans Office; Customs & Excise matters, and the Treasury research budget. The Paymaster General deals with European Community business; civil service pay; the Royal Mint, Central Computer and Telecommunications Agency, charities (non-tax aspects), profit-related pay, and the Paymaster General's Office. All Treasury Ministers are concerned in tax matters.

Prime Minister and First Lord of the Treasury, THE RT. HON. MARGARET THATCHER, M.P.
Chancellor of the Exchequer, THE RT. HON. NIGEL LAWSON, M.P. £34,479

Principal Private Secretary, vacant.
Private Secretary, J. M. G. Taylor.

Parliamentary Private Secretary, N. Forman, M.P.
Parliamentary Clerk, B. O. Dyer.

Chief Secretary to the Treasury, THE RT. HON. NORMAN LAMONT, M.P. £34,479

Private Secretary, Miss G. C. Evans.
Assistant Private Secretary, P. T. Wanless.

Paymaster General, THE RT. HON. THE EARL OF CAITHNESS. £24,209

Private Secretary, M. R. Buckler.

COUNCIL ON TRIBUNALS
 7th Floor, 22 Kingsway, WC2B 6LE
 [01-936 7045]

The Council on Tribunals are an independent statutory body. They keep under review the constitution and working of the various tribunals which have been placed under their general supervision, and consider and report on administrative procedures relating to statutory inquiries. They must be consulted by Government departments on proposals for legislation affecting tribunals and inquiries and on proposals where the need for an appeals procedure may arise. They also offer advice on draft primary legislation.

Some 60 tribunals are currently under the Council's supervision. The matters with which they deal range from agriculture to immigration, pensions, road traffic, taxation, and the allocation of school places.

The Scottish Committee of the Council generally considers Scottish tribunals and matters relating only to Scotland.

Members of the Council are appointed by the Lord Chancellor and the Lord Advocate. The Scottish Committee is composed partly of members of the Council designated by the Lord Advocate and partly others appointed by him. The Parliamentary Commissioner for Administration is *ex officio* a member of both the Council and the Scottish Committee.

Chairman, Sir Cyril Philips.

Members, The Parliamentary Commissioner for Administration; D. Bruce; Miss S. M. Cameron, Q.C.; Mrs. M. P. Case; Prof. D. L. Foulkes; A. C. Heywood; Miss J. Horsham, C.B.E.; G. V. Hyde; W. N. Hyde; Mrs. J. U. Kellock; R. N. M. MacLean, Q.C.; M. E. J. Rush; Mrs. S. H. Spence; Prof. A. Webb.

OFFICE OF WATER SERVICES
c/o Rivers House, 30-34 Albert Embankment,
SE1 7TL
[01-820 0101]

The Office of Water Services was set up under the Water Act 1989 and came into being on Sept. 1, 1989. (The Office is to move to Birmingham in late 1989.) Its role is to support the Director General of Water Services who is the regulatory official for the industry. His main duties are to ensure that water companies comply with the terms of their appointments (or licences) and to protect the interests of water users. The Director General is independent of Ministerial control and directly accountable to Parliament.

Director General of Water Services, I. Byatt.

WOMEN'S NATIONAL COMMISSION

Government Offices, Horse Guards Road, SW1P 3AL
[01-270 5903]

The Women's National Commission is an advisory committee to Government whose terms of reference are to ensure by all possible means that the informed opinions of women are given their due weight in the deliberations of Government. The Commission's fifty members are all women who are elected or appointed by national organizations with a large and active membership of women. The organizations include the women's sections of the major political parties, trades unions, religious groups, professional women's organizations and other bodies broadly representative of women.

Government Co-Chairman, Mrs. Angela Rumbold, C.B.E., M.P. (nominated by the Prime Minister 1986).

Elected Co-Chairman, Mrs. Margaret Morrison (elected 1989).

Secretary, Ms. M. Jones.

LAW COURTS AND OFFICES

THE JUDICIAL COMMITTEE OF THE PRIVY COUNCIL

The Judicial Committee of the Privy Council is the final court of appeal from courts of the United Kingdom dependencies, courts of independent Commonwealth countries which have retained the right of appeal, courts of the Channel Islands and the Isle of Man, some professional and disciplinary committees, and church sources.

The Judicial Committee includes the Lord Chancellor, the Lords of Appeal in Ordinary (see below) and other members of the Privy Council who hold or have held high judicial office, and certain judges from the Commonwealth. Usually, only three or five hear each case.

*Office, Downing Street, SW1.
Registrar of the Privy Council, D. H. O. Owen.
Chief Clerk, D. Rushton.*

THE JUDICATURE OF ENGLAND AND WALES

The legal system of England and Wales is separate from those of Scotland and Northern Ireland and differs from them in law, judicial procedure and court structure, although there is a common distinction between civil law (disputes between individuals) and criminal law (acts harmful to the community).

The supreme judicial authority for England and Wales is the House of Lords, which is the ultimate Court of Appeal from all courts in Great Britain and Northern Ireland (except criminal courts in Scotland). As a Court of Appeal it consists of the Lord Chancellor and the Lords of Appeal in Ordinary (Law Lords). The Supreme Court of Judicature comprises the Court of Appeal, the Crown Court and the High Court of Justice. The High Court of Justice is the superior civil court and is divided into three Divisions. The Chancery Division is concerned mainly with equity, bankruptcy and contentious probate business; the Queen's Bench Division deals with commercial and maritime law, with civil cases not assigned to other courts, and hears appeals from lower courts; and the Family Division, which deals with matters relating to family law. Sittings are held at the Royal Courts of Justice in London or at 24 Crown Court centres outside the capital. High Court judges sit alone to hear cases at first instance. Appeals from lower courts are heard by two or three judges, or by single judges of the appropriate Division.

The decision to prosecute in cases tried on indictment and in summary cases of a serious nature rests with the Crown Prosecution Service, an independent prosecuting body established in 1986 to serve all of England and Wales (see p. 383-4). At the head of the Service is the Director of Public Prosecutions, who discharges his duties under the superintendence of the Attorney General. Certain categories of offence continue to require the consent for prosecution of the Attorney General.

Minor criminal offences (summary offences) are dealt with in magistrates' courts, which usually consist of three unpaid lay magistrates (justices of the peace) sitting without a jury, who are advised on points of law and procedure by a legally-qualified clerk to the justices: in busier courts a full-time, salaried and legally-qualified stipendiary magistrate presides alone. Cases involving people under 17 are heard in juvenile courts, specially constituted magistrates' courts which sit apart from other courts. Preliminary proceedings in a serious case to decide whether there is evidence to justify committal for

trial in the Crown Court are also held in the magistrates' courts. Appeals from magistrates' courts against sentence or conviction are made to the Crown Court. Appeals upon a point of law are made to the High Court, and may go on to the House of Lords.

The Crown Court sits in about 90 centres, divided into six circuits, and is presided over by High Court judges, full-time circuit judges, and part-time recorders, sitting with a jury in all trials which are contested. It deals with trials of the more serious criminal offences, the sentencing of offenders committed for sentence by magistrates' courts (when the magistrates' consider their own power of sentence inadequate), and appeals from lower courts. Magistrates usually sit with a circuit judge or recorder to deal with appeals and committals for sentence. Appeals from the Crown Court, either against sentence or conviction, are made to the Court of Appeal (Criminal Division), presided over by the Lord Chief Justice. A further appeal from the Court of Appeal to the House of Lords can be brought if a point of law of general public importance is considered to be involved.

Most minor civil cases are dealt with by the county courts, of which there are about 300. For cases involving small claims there are special arbitration facilities and simplified procedures: cases involving claims which exceed set limits may be tried in the county courts with the consent of the parties, or in certain circumstances on transfer from the High Court. Undefended divorce cases and, outside London, bankruptcy proceedings can be heard in designated county courts. Magistrates' courts can deal with certain classes of civil case, mostly those relating to the family, and committees of magistrates licence public houses, clubs and betting shops. Appeals in matrimonial, adoption and guardianship proceedings heard in the magistrates' courts go to the Family Division of the High Court: affiliation appeals and appeals from decisions of the licensing committees of magistrates to the Crown Court. Appeals from the High Court and county courts are heard in the Court of Appeal (Civil Division), presided over by the Master of the Rolls, and may go on to the House of Lords, the final court of appeal in civil cases.

Coroners' courts investigate violent and unnatural deaths or sudden deaths where the cause is unknown. Cases may be brought before a local coroner (a senior lawyer or doctor) by doctors, the police, various public authorities or members of the public. Where a death is sudden and the cause is unknown the coroner may order a post-mortem examination to determine the cause of death rather than holding an inquest in court.

THE HOUSE OF LORDS (as final Court of Appeal)

*The Lord High Chancellor (£91,500)
The Rt. Hon. the Lord Mackay of Clashfern
(born 1927, apptd. 1987).*

CROWN PROSECUTION SERVICE

Headquarters: 4/12 Queen Anne's Gate, SW1H 9AZ
[01-273 8152: Casework sections, 01-222 7944]

Fraud Divisions
10 Furnival Street, EC4A 1PE
[01-831 3038]

The Crown Prosecution Service (C.P.S.) handles the prosecution of criminal proceedings instituted by police forces (excluding certain minor road traffic offences). The head of the C.P.S. is the Director of Public Prosecutions: day-to-day administration of the C.P.S. is handled by the Deputy Director. There are four Regional Directors responsible for the 31 areas: each area is headed by a Chief Crown Prosecutor.

Salaries

Grade 1	£72,000
Grade 2	£48,100-£59,800
Grade 3	£37,600-£47,600
Grade 4	£36,786-£41,255
Grade 5	£28,170-£41,225
London Weighting = £1,750 p.a.	

Director of Public Prosecutions (G1), A. D. Green, Q.C.

Deputy Director and Chief Executive (G2), D. S. Gandy, C.B.E., O.B.E.

Principal Establishment and Finance Officer (G3), D. J. Wiblin.

Director, Headquarters Casework (G3), C. Newell.

Head, General Casework (G5), Mrs. V. Collins.

Head, Special Casework (G5), K. Horn.

Head, Policy Division (G5), K. Ashken.

Heads, Fraud Divisions (G5), T. Waring; G. Adams.

Head, Police Complaints Division (G5), C. Cleugh.

Head, Planning and Finance (G5), B. Spratt.

Head, Personnel and Training (G5), W. R. Mann.

Head, Office Services and Legal Costs (G6), B. Spear.

LONDON (SOUTH)/SURREY, Tolworth Tower, Surbiton KT6 7DS.—*Chief Crown Prosecutor (G4)*, D. E. Dracup.

THE SCOTTISH JUDICATURE

Scotland has a legal system separate and differing greatly from the English legal system in enacted law, judicial procedure and the structure of courts.

There is in Scotland a system of public prosecution headed by the Lord Advocate which is independent of the police, who have no say in the decision to prosecute. The Lord Advocate, discharging his functions through the Crown Office in Edinburgh, is responsible for prosecutions in the High Court, sheriff courts and district courts. Prosecutions in the High Court are prepared by the Crown Office and conducted in court by one of the Law Officers or an advocate-depute. In the inferior courts the decision to prosecute is made and prosecution is preferred by procurators fiscal, who are lawyers and full-time civil servants, subject to the directions of the Crown Office. A permanent legally-qualified civil servant known as the Crown Agent is responsible for the running of the Crown Office and the organization of the Procurator Fiscal Service, of which he is the head.

Scotland is divided into six Sheriffdoms, each with a full-time Sheriff Principal. The Sheriffdoms are further divided into sheriff court districts, each of which has a legally-qualified, resident sheriff or sheriffs, who are the judges of the court.

In criminal cases sheriffs principal and sheriffs have the same powers: sitting with a jury of 15 members, they may try more serious cases on indictment, or, sitting alone, may try lesser cases under summary procedure. Minor summary offences are dealt with in district courts which are administered by the district and the islands local government authorities and presided over by lay justices of the peace, and, in Glasgow only, by stipendiary magistrates. Juvenile offenders (children under 16) may be brought before an informal children's hearing comprising three local lay people. The superior criminal court is the High Court of Justiciary which is both a trial and an appeal court. Cases on indictment are tried by a High Court Judge, sitting with a jury of 15, in Edinburgh and on circuit in other towns. Appeals from the lower courts against conviction or sentence are heard also by the High Court, which sits as an appeal court only in Edinburgh. There is no further appeal to the House of Lords in criminal cases.

In civil cases the jurisdiction of the sheriff court extends to most kinds of action. Appeal against decisions of the sheriff may be made to the Sheriff Principal and thence to the Court of Session, or direct to the Court of Session, which sits only in Edinburgh. The Court of Session is divided into the Inner and the Outer House. The Outer House is a court of first instance in which cases are heard by judges sitting singly, sometimes with a jury of 12. The Inner House, itself subdivided into two Divisions of equal status, is mainly an appeal court. Appeals may be made to the Inner House from the Outer House as well as from the sheriff court; an appeal may be made from the Inner House to the House of Lords.

The Judges of the Court of Session are the same as those of the High Court of Justiciary, the Lord

President of the Court of Session also holding the office of Lord Justice General in the High Court.

The office of coroner does not exist in Scotland: the local procurator fiscal inquires privately into sudden and suspicious deaths and may report findings to the Crown Agent. In some cases a fatal accident inquiry may be held before the sheriff.

COURT OF SESSION (Established 1532) and HIGH COURT OF JUSTICIARY

The Lord President and Lord Justice General, (£82,750)

*The Rt. Hon. The Lord Emslie, M.B.E.
(born 1919, apptd. 1972)*

Regional Procurator Fiscal, S. W. Lockhart, C.B.E. (Aberdeen).

NORTHERN IRELAND JUDICATURE

In Northern Ireland the legal system and the structure of courts closely resemble those of England and Wales; there are, however, often differences in enacted law.

The Supreme Court of Judicature of Northern Ireland comprises the Court of Appeal, the High Court of Justice and the Crown Court. The practice and procedure of these Courts is similar to those in England. The superior civil court is the High Court of Justice, from which an appeal lies to the Court of Appeal; the House of Lords is the final civil appeal court.

The decision to prosecute in cases tried on indictment and in summary cases of serious nature rests in Northern Ireland with the Director of Public Prosecutions, who is responsible to the Attorney General. Minor summary offences are prosecuted by the police.

Minor criminal offences are dealt with in magistrates' courts by a full-time, legally qualified resident magistrate and, where an offender is under 17, by juvenile courts consisting of the resident magistrate and two lay members specially qualified to deal with juveniles (at least one of whom must be a woman). Appeals from magistrates' courts are heard by the county court. The Crown Court, served by High Court and county court judges, deals with criminal trials on indictment. Cases are heard before a judge and, except those involving offences specified under emergency legislation, a jury. Appeals from the

Prescribed Officer, I. S. Warren.

Chief Clerk, C. I. P. Denyer.

THE POLICE SERVICE

There are 52 police forces in the United Kingdom, each responsible for law enforcement in its area. Most forces' area is conterminous with an English or Welsh county or Scottish region, though there are several combined forces. Law enforcement in London is carried out by the Metropolitan Police and the City of London Police; in Northern Ireland by the Royal Ulster Police; and by the Isle of Man, States of Jersey, and Guernsey forces in their respective islands and bailiwicks.

Each police force is maintained by a police authority. The authorities of English and Welsh forces comprise committees of local councillors and magistrates; in Scotland, the regional and islands councils are the authorities. The authority for the Metropolitan Police is the Home Secretary. In Northern Ireland the Secretary of State appoints the police authority.

Police authorities are financed by central and local government. Subject to the approval of the Home Secretary and to regulations, they appoint the chief constable, decide the maximum size of the force and provide buildings and equipment.

The Home Secretary and the Secretaries of State for Scotland and Northern Ireland are responsible for the organization, administration and operation of the police service. They make regulations covering matters such as police ranks, discipline, hours of duty, and pay and allowances.

All police forces (including the Metropolitan Police at the request of the Commissioner) are subject to inspection by H.M. Inspectors of Constabulary, who report to the respective Secretary of State.

The investigation of a serious complaint against a police officer is supervised by the Police Complaints Authority in England and Wales. In Scotland, complaints are investigated by independent public prosecutors.

Basic rates of police pay (since Sept. 1, 1989)

Chief Constable	£43,749-£55,608
Deputy Chief Constable	£38,535-£44,487

BRITISH TRANSPORT POLICE

15 Tavistock Place, WC1H 9SJ

[01-388 7541]

Strength of Force (May 1989), 1,812

The Force provides a policing service to the British Railways Board and London Underground Ltd. Police posts are located throughout England, Wales and Scotland.

The Chief Constable reports to the British Transport Police Committee, a statutory body set up under the Transport Act 1962. The members of the Committee are appointed by the British Railways Board and London Regional Transport.

Chief Constable, D. O'Brien, O.B.E.

Deputy Chief Constable, G. E. Coles.

Assistant Chief Constables, T. H. S. Buckle (Management Services); W. I. McGregor (Operations); W. F. Palmer (London Underground Division); A. M. Mackenzie (Scottish Division).

MINISTRY OF DEFENCE POLICE

Ministry of Defence, Empress State Building,

Lillie Road, SW6 1TR

[01-385 1244]

Strength of Force (May 1989), 4,600

The Ministry of Defence Police are responsible chiefly for the policing of naval, military, R.A.F. establishments, etc. in Great Britain. The Chief Constable is responsible to the Secretary of State for Defence.

Chief Constable, J. Aspinall, Q.P.M.

Deputy Chief Constable, N. L. Chapple, Q.P.M.

Head of M.D.P. Secretariat, B. Aves.

Assistant Chief Constables, A. A. J. Scale (Personnel and Training); R. E. Murray (Operations); C. Bucke (Support); S. E. Edwards (Inspectorate); A. F. Grant (Scotland).

ROYAL PARKS CONSTABULARY

2 Marsham Street, SW1P 3EB

[01-276 3761/8]

Strength of Force (June 1989), 155

The Royal Parks Constabulary is maintained by the Department of the Environment and is responsible, through the Bailiff of the Royal Parks, for the policing of twenty Royal Parks and Gardens in and around London. These comprise an area in excess of 6,000 acres. Officers of the Force are appointed under the Parks Regulations Act 1872, as amended by the Parks Regulations (Amendment) Act 1974.

Chief Officer, P. H. Gilbert.

Deputy Chief Officer, M. J. Loader.

UNITED KINGDOM ATOMIC ENERGY AUTHORITY CONSTABULARY

11 Charles II Street, SW1Y 4QP

[01-930-5454]

Strength of Force (June 1989), 655

The Constabulary is responsible for policing United Kingdom Atomic Energy Authority and British Nuclear Fuels plc establishments and for escorting nuclear material between establishments.

The Chief Constable is responsible, through the Atomic Energy Authority Police Committee, to the Secretary of State for Energy.

Chief Constable, J. Reddington, Q.P.M.

Deputy Chief Constable, H. J. McMorris.

Controller of National Air Traffic Services, Air Marshal Sir Thomas Stonor, K.C.B.

Air Member for Personnel, Air Marshal Sir Laurence Jones, K.C.B., A.F.C.

Air Secretary, Air Vice-Marshal R. J. Honey, C.B.E.

Dir. Gen., R.A.F. Personal Services, Air Vice-Marshal D. O. Crwys-Williams.

Dir. Gen., Training, Air Vice-Marshal E. H. Macey, O.B.E., C.B.E.

Air Member for Supply and Organization, Air Chief Marshal Sir Brendan Jackson, K.C.B.

Dir. Gen., Communications, Information Systems and Organization, Air Vice-Marshal J. P. R. Browne, C.B.E.

Chief Engineer, Air Marshal Sir Frank Holroyd, K.B.E., C.B.

Dir. Gen., Supply, Air Vice-Marshal R. C. Allerton, C.B.

Chaplain-in-Chief, Rev. B. N. Halfpenny, Q.H.C.

Defence Scientific Staff

Chief Scientific Adviser (G1A), Prof. E. R. Oxburgh.

Deputy Chief Scientific Adviser (G2), Dr. G. G. Pope, C.B.

Asst. Chief Scientific Advisers (G3), D. E. Humphries (Projects and Research); Mrs. M. J. Bourne, O.B.E. (Capabilities); (G4) Dr. R. G. Ridley (Nuclear).

Dir., Defence Operational Analysis Establishment (G3), R. J. Poole.

Dir. Gen., Strategic Defence Initiative Participation Office (G3), Dr. S. Orman.

Office of Management and Budget

Second Permanent Under Secretary of State (G1A), K. C. Macdonald, C.B.

Deputy Under Secs. of State (G2), M. J. V. Bell (Finance); R. M. Hastie-Smith, C.B. (Civilian Management); R. L. L. Facer (Personnel and Logistics); C. T. McDonnell (Resources and Programmes).

Asst. Under Secs. of State (G3), T. J. Brack (Naval Personnel); T. F. W. B. Knapp (Supply and Organization (Air)); B. H. Cousins, C.B.E. (General Finance); M. J. Culham (Civilian Management (Administrators)); I. D. Dawson (Resources); N. Paren, (Fleet Support); M. Gainsborough (Adj. Gen.); K. W. B. Gooderham (Security and Common Services); Dr. M. J. Harte (Personnel (Air)); D. C. R. Heyhoe (Dir. Gen. of Management Audit); J. F. Howe (Personnel and Logistics); C. E. Johnson (Dir. Gen. of Defence Accounts); R. Jackling, C.B.E. (Programmes); D. B. Omand; D. J. L. Smith (Civilian Management (Specialists)); N. H. Nicholls (Systems); J. Roberts; B. F. Rule (Dir. Gen. Information Technology Systems); N. Beaumont (Quartermaster).

Public Relations

Chief of Public Relations (G4), H. B. Colver.

Dir. of Public Relations (Navy), Capt. A. Provest (R.N.).

Dir. of Public Relations (Army), Brig. C. B. Q. Wallace, O.B.E.

Dir. of Public Relations (R.A.F.), Air Cdre. M. Barnes.

PROCUREMENT EXECUTIVE

Chief of Defence Procurement, Sir Peter Levene, K.B.E. £110,000
Private Sec., S. French.

Procurement Executive Policy and Administration

Deputy Under Sec. of State (Defence Procurement) (G2), J. M. Stewart, C.B.

Asst. Under Sec. of State (International and Domestic Procurement) (G3), J. A. Galvin.

Dir. Gen. Defence Quality Assurance (G3), B. Miller.

Dir. Gen. Defence Contracts (G3), B. J. Slade.

Principal Dir. Accountancy Services (P.E.) (G4), J. V. A. Crawford.

Principal Dir. Technical Costs (G4), R. E. Rowe.

Principal Dir. of Patents (G4), E. J. Mansfield.

Research and Development Controllerate

Controller Establishments, Research and Nuclear Programmes (G3), W. F. Mumford, C.B.

Deputy Controller (Nuclear) (G3), J. C. Mabberley.

Deputy Controller (Research) (G3), Dr. T. Buckley.

Dir. Admiralty Research Establishment (G3), P. D. Ewins.

Dir. Royal Signals and Radar Establishment (G2), N. H. Hughes.

Dir. Atomic Weapons Establishment (G2), Dr. T. P. McLean.

Dir. Chemical Defence Establishment (G3), Dr. G. S. Pearson.

Dir. Royal Armament Research and Development Establishment (G2/3), Dr. A. C. Bayham.

Commandant, Aeroplane and Armament Experimental Establishment, Air Cdre. P. D. L. Gover.

Dir. Royal Aerospace Establishment (G2), M. T. Peters.

Chief Engineer, (G4), R. H. Lovell.

Sea Systems Controllerate

Controller of the Navy, Vice-Adm. K. J. Eaton.

Asst. Under Sec. of State (Material-Naval) (G3), J. K. Ledlie.

Principal Dir., Navy and Nuclear Contracts (G4), A. J. Figes.

Chief Strategic Systems Executive, Rear-Adm. I. H. Pirnie.

Deputy Chief Strategic Systems Executive, Cdre. J. S. Kelly, O.B.E.

Dir. Gen. Strategic Weapon Systems, Cdre. T. W. Craven.

Deputy Controller Warships, Vice-Adm. Sir Hugh Thompson, K.B.E.

Dir. Gen. Surface Ships (G3), R. V. Babington.

Dir. Gen. Submarines (G3), W. G. Sanders.

Chief Naval Architect (G3), B. O. Wall.

Chief Naval Weapons System Engineer (G4), D. McArthur.

Deputy Controller Warship Equipment (G3), A. J. Creighton.

Dir. Gen. Surface Weapons (G4), H. Perkins.

Dir. Gen. Underwater Weapons (G4), R. McCaughan.

Dir. Gen. Marine Engineering, Chief Marine Systems Engineer, Rear-Adm. R. A. Issac, C.B.

Land Systems Controllerate

Master General of the Ordnance, Lt.-Gen. Sir John Stibson, K.C.B., O.B.E.

Vice Master General of the Ordnance, Maj.-Gen. G. M. Hutchinson, C.B.

*Asst. Under Sec. of State (Ordnance) (G3), Dr. A. Fox.
Principal Dir., Contracts (Ordnance) (G4), R. G. Woodman, C.B.E.
Dir. Gen., Guided Weapons and Electronics (G3), J. D. Maines.
Dir. Gen., Fighting Vehicles and Engineer Equipment, Maj.-Gen. R. J. Hayman-Joyce, O.B.E.
Dir. Gen., Weapons (Army), Maj.-Gen. E. G. Willmott, O.B.E.*

Air Systems Controllerate

*Controller Aircraft, D. M. Spiers, C.B., T.D.
Dep. Controller Aircraft, Air Marshal Sir Michael Simmons, K.C.B., A.F.C.
Asst. Under Sec. of State/Air (Procurement Executive) (G3), B. A. Taylor.
Principal Dir., Contracts/Air (G4), D. Grassby.
Dir. Gen. Aircraft 1, Air Vice-Marshal, R. M. Austin, A.F.C.
Dir. Gen. Aircraft 2, Air Vice-Marshal D. Cousins, A.F.C.
Dir. Gen. Aircraft 3, (G3), J. W. Britton.
Dir. Gen., Air Weapons Electronic Systems (G3), K. G. Hambleton.
Dir. Gen., Strategic Electronic Systems, Air Vice-Marshal M. J. D. Brown.*

Defence Export Services Organization

*Head of Defence Export Services, A. Thomas
£100,000*

*Military Deputy to Head of D.E.S., Maj.-Gen. C. N. Last, O.B.E.
Dir. Gen. Saudi Airforce Projects, Air Vice-Marshal R. I. Stuart-Paul, M.B.E.
Dir. Gen., Marketing (G3), R. J. Harding.
Asst. Under Sec. of State (D.E.S. Admin.) (G3), M. D. Tidy.*

METEOROLOGICAL OFFICE

*London Road, Bracknell, Berks.
[0344-420242]*

The Meteorological Office is the State Meteorological Service. It forms part of the Ministry of Defence, the Director General being ultimately responsible to the Secretary of State for Defence.

Except for the common services provided by other government departments as part of their normal functions, the cost of the Meteorological Office is borne by Defence Votes.

Of the expenditure chargeable to Defence Votes about £35,000,000 represents expenditure associated with staff and £34,000,000 on stores, communications and miscellaneous services. About £25,500,000 is recovered from outside bodies for special services rendered, sales of meteorological equipment, etc.

Dir. Gen. (G2), Dr. J. T. Houghton, C.B.E., D.Phil., F.R.S.

Dir. of Services (G3), Dr. D. N. Axford.

Dir. of Research (G4), A. Gilchrist.

THE ROYAL NAVY

THE QUEEN

Admirals of the Fleet

H.R.H. The Prince Philip, Duke of Edinburgh, K.G., K.T., O.M., G.B.E., P.C., born June 10, 1921	Jan. 15, 1953
Sir Varyl Begg, G.C.B., D.S.O., D.S.C., born Oct. 1, 1908	Aug. 12, 1968
The Lord Hill-Norton, G.C.B., born Feb. 8, 1915	March 12, 1971
Sir Michael Pollock, G.C.B., L.V.O., D.S.C., born Oct. 19, 1916	March 1, 1974
Sir Edward Ashmore, G.C.B., D.S.C., born Dec. 11, 1919	Feb. 9, 1977
The Lord Lewin, K.G., G.C.B., L.V.O., D.S.C., born Nov. 19, 1920	July 6, 1979
Sir Henry Leach, G.C.B., born Nov. 18, 1923	Dec. 1, 1982
Sir John Fieldhouse, G.C.B., G.B.E., born Feb. 12, 1928	Aug. 2, 1985
Sir William Staveley, G.C.B., born Nov. 10, 1928	May 25, 1989

Admirals

Oswald, Sir Julian, G.C.B., (*First Sea Lord and Chief of Naval Staff*).
Reffell, Sir Derek, K.C.B., (*Controller of the Navy*).
Bathurst, Sir Benjamin, K.C.B., (*C-in-C. Fleet, Allied C.-in-C. Channel and C-in-C. Eastern Atlantic Area*).
Black, Sir Jeremy, K.C.B., D.S.O., M.B.E., (*C-in-C. Naval Home Command*).
Thomas, Sir Richard, K.C.B., O.B.E., (*U.K. Military Rep. H.Q. N.A.T.O.*).
Brown, Sir Brian, K.C.B., C.B.E. (*Second Sea Lord, Chief of Naval Personnel, and Admiral President Royal Naval College Greenwich*).

Vice-Admirals

Symons, Sir Patrick, K.B.E., (*Representative to SACLANT in Europe*).
Webster, Sir John, K.C.B. (*Flag Officer, Plymouth, Naval Base Commander Devonport, Commander Central Sub. Area, Eastern Atlantic and Plymouth Sub. Area Channel*).
Thompson, Sir Hugh, K.B.E., (*Deputy Controller Warships, Senior Naval Representative Bath and Chief Naval Engineer Officer*).

Slater, Sir Jock, K.C.B., L.V.O., (*Chief of Fleet Support*).
Kerr, Sir John, K.C.B., (*Chief of Defence Intelligence*).
King, Sir Norman, K.B.E., (*Chief of Staff to Commander, Allied Naval Forces Southern Europe*).
Livesay, Sir Michael, K.C.B., (*Flag Officer Scotland and N. Ireland, Commander Northern Sub. Area Eastern Atlantic, and Commander NORE Sub. Area Channel, and Naval Base Commander Rosyth*).
Grose, Sir Alan, K.B.E., (*Flag Officer Third Flotilla and Commander Anti-Sub. Warfare Striking Force*).
Coward, J. F., D.S.O., (*Flag Officer First Flotilla*).
Weatherall, Sir James, K.B.E., (*Deputy Supreme Allied Commander Atlantic*).
Wilson, B. N., (*Deputy C.D.S. (Programmes and Personnel)*).
Eaton, K. J., (*Controller of the Navy*).

Rear-Admirals

Marsh, G. G. W., C.B., O.B.E., (*Project Manager N.F.R.90*)
Morris, R. O., (*Hydrographer of the Navy*).
Dingemans, P. G. V., D.S.O., (*Chief of Staff to C.-in-C. Fleet*).

- Garnier, J., C.B.E., L.V.O., (*Flag Officer Royal Yachts*).

Hunt Class	12	Brecon, Ledbury, Cottesmore, Dulverton, Middleton, Chiddington, Hurworth, Bicester, Atherstone, Berkeley, Quorn, Cattistock	1	Brocklesbury
Patrol Craft				
Bird Class	5	Cygnet, Kingfisher†, Peterel, Sandpiper, Redpole		
Coastal Training Craft‡	15	Attacker, Fencer, Hunter, Chaser, Striker, Archer, Biter, Smiler, Pursuer, Blazer, Dasher, Puncher, Charger, Ranger, Trumpeter		
Peacock Class	3	Peacock, Plover, Starling		
Gibraltar Search and Rescue Craft	2	Cormorant, Hart		
Support Ships				
Submarine Tender	1	Sentinel		
Seabed Operations Vessel	1	Challenger		
Royal Yacht/Hospital Ship ..	1	Britannia		
Training Ships				
Fleet Tenders	3	Manly†, Messina, Milbrook	1	Mentor
Ice Patrol Ship	1	Endurance	1	Bulldog
Survey Ships	7	Fawn, Hecate, Herald, Gleaner, Hecla, Roebeck, Beagle		

Notes:

- (i) This table includes ships due for completion or disposal during the course of 1989–90; the numbers of each type are not therefore an accurate indication of the ships available at any one time. Ships solely engaged in harbour training duties are not included.
- (ii) Ships marked * were under construction on April 1, 1989 and are planned to enter service during 1989–90.
- (iii) Ships marked † are engaged in trials or training.
- (iv) Vessels marked **, apart from H.M.S. *Blackwater*, are operated by the Royal Naval Reserve.
- (v) The Coastal Training Craft marked ‡ are operated by the Royal Naval Reserve and the University Royal Naval Units.
- (vi) All submarines, ASW Carriers, Assault Ships, Guided Missile Destroyers, Frigates, Offshore Patrol Ships and MCMVs are assigned to NATO. Other ships could be made available in support of NATO operations if national requirements permitted.
- (vii) Ships approved during 1988–89 for disposal: *Abdiel*, *Apollo*, *Arethusa*, *Bronington*, *Diomede*, *Euryalus*, *Fox*, *Maxton*, *Plymouth*, *Swallow*, *Swift*, *Walkerton*.

Royal Naval Auxiliary Service.—The Royal Naval Auxiliary Service (R.N.A.S.) is a uniformed civilian volunteer service, administered by the Ministry of Defence and trained by the Royal Navy to operate at ports and anchorages, for duty in emergencies and war. R.N.A.S. units are situated on the coasts of the United Kingdom and organized and run by the Area Flag Officers. The role of the R.N.A.S. is to assist with the defence of ports and anchorages by manning local headquarters and supporting the Naval Control of Shipping Organization. The strength is 3,000.

Patron, H.R.H. Prince Michael of Kent.

ROYAL MARINES

The Corps of Royal Marines, about 7,000 strong, first formed in 1664, is part of the Naval Service. The Royal Marines provide Britain's sea soldiers and in particular 3 Commando Brigade Royal Marines, two thirds of which is trained and equipped for arctic warfare. Royal Marines also serve in H.M. Ships, provide landing craft crews, special boat sections and other detachments for naval and amphibious operations. They also provide the Naval Band Service.

The Royal Marines Reserve of about 1,350 volunteers

consists of five main centres in London, Bristol, Liverpool, Newcastle and Glasgow. *Commandant General, Royal Marines*, Lt.-Gen. Sir Martin Garrod, K.C.B., O.B.E. *Major-Generals*, H. Y. La R. Beverley, O.B.E. (*Chief of Staff*); R. J. Ross, O.B.E. (*Training Reserve and Special Forces*); N. F. Vaux, C.B., D.S.O. (*Commando Forces*); P. T. Stevenson (*British Forces Falkland Is.*).

QUEEN ALEXANDRA'S ROYAL NAVAL NURSING SERVICE

The first nursing sisters were appointed to naval hospitals in 1884 and the Queen Alexandra's Royal Naval Nursing Service (Q.A.R.N.N.S.) gained its current title under the patronage of Queen Alexandra in 1902. Nursing ratings were introduced in 1960 and from 1982 a number of men have taken the opportunity to join Q.A.R.N.N.S. — both officers and ratings. Still largely based at the Royal Naval Hospitals, Q.A.R.N.N.S. continue their responsibility for the health and fitness of naval personnel. The strength is about 430.

Patron, H.R.H. Princess Alexandra.

Matron-in-Chief, Miss E. M. Northway, R.R.C., Q.H.N.S., Q.A.R.N.N.S.

WOMEN'S ROYAL NAVAL SERVICE

Originally founded in 1917, the Women's Royal Naval Service (W.R.N.S.) was temporarily disbanded between World Wars I and II. The contribution of the Service is now firmly established as a professional and integral part of the Royal Navy with personnel serving in the United Kingdom and abroad in a wide range of specialist roles. Although W.R.N.S. do not serve at sea, they provide an essential nucleus of about 3,000 trained personnel ashore in order to release men to H.M. Ships.

Chief Commandant, H.R.H. Princess Anne.

Director W.R.N.S., Commandant A. Larken, A.D.C., W.R.N.S.

THE ARMY

THE QUEEN

Field Marshals

H.R.H. The Prince Philip, Duke of Edinburgh, K.G., K.T., O.M., G.B.E., P.C., born June 10, 1921	Jan. 15, 1953

CONSTITUTION OF THE BRITISH ARMY

The Regular Forces include the following Arms, Branches and Corps. Soldiers' Record Offices are shown at the end of each group; records of officers are maintained at the Ministry of Defence.

The Arms

Household Cavalry.—The Life Guards; The Blues and Royals (Royal Horse Guards and 1st Dragoons). *Records*, Horse Guards, London, SW1.

Royal Armoured Corps.—Cavalry Regiments: 1st The Queen's Dragoon Guards; The Royal Scots Dragoon Guards (Carabiniers and Greys); 4th/7th Royal Dragoon Guards; 5th Royal Inniskilling Dragoon Guards; The Queen's Own Hussars; The Queen's Royal Irish Hussars; 9th/12th Royal Lancers (Prince of Wales's); The Royal Hussars (Prince of Wales's Own), 13th/18th Royal Hussars (Queen Mary's Own); 14th/20th King's Hussars; 15th/19th The King's Royal Hussars; 16th/5th The Queen's Royal Lancers; 17th/21st Lancers; Royal Tank Regiment comprising four regular regiments. *Records*, Queen's Park, Chester.

Artillery.—Royal Regiment of Artillery. *Records*, Imphal Barracks, Fulford Road, York.

Engineers.—Corps of Royal Engineers. *Records*, Kentigern House, Brown Street, Glasgow.

Signals.—Royal Corps of Signals. *Records*, Kentigern House, Brown Street, Glasgow.

Infantry.—The Foot Guards and Regiments of Infantry of the Line are grouped in Divisions as follows:

Guards Division.—Grenadier, Coldstream, Scots, Irish and Welsh Guards. *Divisional HQ*: HQ Household Division, Horse Guards, SW1. *Depot*: Pirbright Camp, Brookwood, Surrey. *Records*: Imphal Barracks, Fulford Road, York.

Scottish Division.—The Royal Scots (The Royal Regiment); The Royal Highland Fusiliers (Princess Margaret's Own Glasgow and Ayrshire Regiment); The King's Own Scottish Borderers; The Black Watch (Royal Highland Regiment); Queen's Own Highlanders (Seaforth and Camerons); The Gordon Highlanders; The Argyll and Sutherland Highlanders (Princess Louise's). *Divisional HQ*, The Castle, Edinburgh. *Depots*, Scottish Divisional Depots, Glenkorrie, Milton Bridge, Midlothian and Albemarle Barracks, Ouston, Newcastle. *Records*, Imphal Barracks, Fulford, York.

Queen's Division.—The Queen's Regiment, The Royal Regiment of Fusiliers, The Royal Anglian Regiment. *Divisional HQ*, Bassingbourn Barracks, Royston, Herts. *Depot*, Bassingbourn Barracks,

Royston, Herts. *Records*, Higher Barracks, Exeter, Devon.

King's Division.—The King's Own Royal Border Regiment, The King's Regiment; The Prince of Wales's Own Regiment of Yorkshire; The Green Howards (Alexandra, Princess of Wales's Own Yorkshire Regiment); The Royal Irish Rangers (27th (Inniskilling) 83rd and 87th); The Queen's Lancashire Regiment; The Duke of Wellington's Regiment (West Riding). *Divisional HQ*, Imphal Barracks, York. *Depots*, The King's Division Depot (Yorkshire), Queen Elizabeth Barracks, Streatham, Yorks., and Albemarle Barracks, Ouston, Newcastle. The King's Division Depot (Royal Irish Rangers), St. Patrick's Barracks, Ballymena, Northern Ireland. *Records*, Imphal Barracks, Fulford, York.

Prince of Wales's Division.—The Devonshire and Dorset Regiment; The 22nd (Cheshire) Regiment; The Royal Welch Fusiliers, The Royal Regiment of Wales (24th/41st Foot); The Gloucestershire Regiment; The Worcestershire and Sherwood Foresters Regiment (29th/45th Foot); The Royal Hampshire Regiment; The Staffordshire Regiment (The Prince of Wales's); The Duke of Edinburgh's Royal Regiment (Berkshire and Wiltshire). *Divisional HQ*, Whittington Barracks, Lichfield, Staffs. *Depots*, The Prince of Wales's Division Depot, Whittington Barracks, Lichfield, Staffs. *Records*, Imphal Barracks, Fulford, York.

Light Division.—The Light Infantry; The Royal Green Jackets. *Divisional HQ*, Sir John Moore Barracks, Winchester, Hants. *Depot*, Sir John Moore Barracks, Winchester, Hants. *Records*, Higher Barracks, Exeter.

Brigade of Gurkhas.—2nd King Edward VII's Own Gurkha Rifles (The Sirmoor Rifles); 6th Queen Elizabeth's Own Gurkha Rifles; 7th Duke of Edinburgh's Own Gurkha Rifles; 10th Princess Mary's Own Gurkha Rifles, The Queen's Gurkha Engineers, Queen's Gurkha Signals, Gurkha Transport Regt. *Brigade HQ*, H.M.S. Tamar, Hong Kong, B.F.P.O. 1. *Depot*, Training Depot, Brigade of Gurkhas, Malaya Lines, Sek Kong, B.F.P.O. 1. *Records*, Record Office, Brigade of Gurkhas, Hong Kong, B.F.P.O. 1.

The Parachute Regiment (Three regular battalions)—*Depot*, Browning Barracks, Aldershot, Hants. *Records*, Higher Barracks, Exeter.

Special Air Service Regiment.—*Regimental HQ*, Duke of York's Headquarters, Sloane Square, SW3. *Depot*, Stirling Lines, Hereford. *Records*, Higher Barracks, Exeter, Devon.

Army Air Corps.—*Regimental H.Q.* and *Depot*, Middle Wallop, Hants. *Records*, Higher Barracks, Exeter.

The Services

Royal Army Chaplain's Department—Regimental H.Q. and Depot, Bagshot Park, Surrey.

Royal Corps of Transport, Records, Kentigern House, Brown Street, Glasgow.

Royal Army Medical Corps, Royal Army Dental Corps, Queen Alexandra's Royal Army Nursing Corps, and Women's Royal Army Corps. *Records*, Queen's Park, Chester.

Royal Army Ordnance Corps, Corps of Royal Electrical and Mechanical Engineers. *Records*, Glen Parva Barracks, Saffron Road, Wigston, Leicester.

Small Arms School Corps. *Records*, Higher Barracks, Exeter.

General Service Corps. *Records*, Imphal Barracks, Fulford Road, York.

The Territorial Army.—The Territorial Army (T.A.) is designed to provide a highly trained and well equipped force which will complete the Regular Army order of battle in a time of national emergency. Its establishment is approximately 84,000 and it is planned that this will rise to 86,000 by 1990. A new element of the T.A., the Home Service Force, designed to produce a low cost guard force, is being expanded to some 5,000 posts by 1990.

QUEEN ALEXANDRA'S ROYAL ARMY NURSING CORPS

The Queen Alexandra's Royal Army Nursing Corps (Q.A.R.A.N.C.) was founded in 1902 as Queen Alexandra's Imperial Military Nursing Service (Q.A.I.M.N.S.) and gained its present title in 1949. The Q.A.R.A.N.C. has trained nurses for the register and roll since 1950 and has eight other employment categories. There was an introduction of a non-nursing officer element in 1959 for personnel work. The Q.A.R.A.N.C. provides service in military hospitals world-wide—United Kingdom (including N. Ireland), B.A.O.R., Hong Kong, Dhahran, Cyprus, Falkland Islands and Belize.

Colonel-in-Chief, H.R.H. Princess Margaret.

Matron-in-Chief (Army) and Director of Defence Nursing Services, Brig. J. Field, R.R.C., Q.H.N.S.

WOMEN'S ROYAL ARMY CORPS

The Women's Royal Army Corps (W.R.A.C.) was formed on February 1, 1949 as a Corps of the Regular Army. The Corps predecessors were Queen Mary's Army Auxiliary Corps (Q.M.A.A.C.) in World War I, and the Auxiliary Territorial Service (A.T.S.) in World War II. The present role of the W.R.A.C. is to be organized and trained, as an integral part of the Army, to carry out those tasks for which its members are best suited and qualified, so that it will contribute to the maximum efficiency of the Army as a whole. The Corps is approximately 8,500 (Regular and T.A.) and is employed by 36 sponsors in 30 employments in 500 units worldwide in the British Army.

Commandant-in-Chief, H.M. Queen Elizabeth The Queen Mother.

Controller Commandant, H.R.H. The Duchess of Kent, G.C.V.O.

Deputy Controller Commandant, Brig. A. Field, C.B.

Director, Women's Royal Army Corps, Brig. G. K. Ramsey, M.B.E.

THE ROYAL AIR FORCE

THE QUEEN

Marshals of the Royal Air Force

H.R.H. the Prince Philip, Duke of Edinburgh, K.G., K.T., O.M., G.B.E., P.C., born June 10, 1921	Jan. 15, 1953
Sir Dermot A. Boyle, G.C.B., K.C.V.O., K.B.E., A.F.C., born Oct. 2, 1904	Jan 1, 1958
The Lord Elwes, K.G., G.C.B., C.B.E., D.S.O., M.V.O., D.F.C., A.F.C., born March 23, 1911	April 1, 1967
Sir John Grandy, G.C.B., G.C.V.O., K.B.E., D.S.O., born Feb. 8, 1913	April 1, 1971
Sir Denis Spotswood, G.C.B., C.B.E., D.S.O., D.F.C., born Sept. 26, 1916	March 31, 1974
Sir Michael Beetham, G.C.B., C.B.E., D.F.C., A.F.C., born May 17, 1923	Oct. 15, 1982
Sir Keith Williamson, G.C.B., A.F.C., born Feb. 25, 1928	Oct. 15, 1985
Sir David Craig, G.C.B., O.B.E. (<i>Chief of Defence Staff</i>), born Sept. 17, 1929	Nov. 14, 1988

Air Chief Marshals

Harding, Sir Peter, G.C.B., (<i>Chief of the Air Staff</i>).
Hine, Sir Patrick, G.C.B., (<i>A.O.C.-in-C. Strike Command</i>).
Knight, Sir Michael, K.C.B., A.F.C., A.D.C., (<i>U.K. Military Representative, H.Q. N.A.T.O.</i>).
Armitage, Sir Michael, K.C.B., A.F.C., (<i>Cmdt. Royal College of Defence Studies</i>).
Skinsley, Sir Anthony, K.C.B., (<i>Deputy C.-in-C. Allied Forces Central Europe</i>).
Parry-Evans, Sir David, K.C.B., C.B.E.

Air Marshals

Duxbury, Sir Barry, K.C.B., C.B.E., (A.O.C. No. 18 Group).
Jackson, Sir Brendan, K.C.B., (<i>Air Member for Supply and Organization</i>).
Jones, Sir Laurence, K.C.B., A.F.C., (<i>Air Member for Personnel</i>).
Hayr, Sir Kenneth, K.C.B., C.B.E., A.F.C., (<i>Chief of Staff and Deputy C.-in-C. Strike Command</i>).
Holroyd, Sir Frank, K.B.E., C.B., (<i>Chief Engineer (R.A.F.)</i>).

Stonor, Sir Thomas, K.C.B., (*Controller National Air Traffic Services*).

Simmons, Sir Michael, K.C.B., A.F.C., (*Deputy Controller Aircraft*).

Graydon, Sir Michael, K.C.B., C.B.E., (*A.O.C.-in-C. R.A.F. Support Command*).

Palin, Sir Roger, K.C.B., O.B.E., (*C.-in-C. R.A.F. Germany and Cmdr 2 ATAF*).

Air Vice-Marshals

Davies, D. B. A. L., Q.H.P., (*Principal Medical Officer R.A.F. Support Command*).

Halfpenny, B. N., Q.H.C., (*Chaplain-in-Chief*).

Forman, G. N., C.B., (*Dir. of Legal Services (R.A.F.)*).

CONSTITUTION OF THE ROYAL AIR FORCE

The Royal Air Force consists of three Commands: Strike Command and Support Command in the United Kingdom, and R.A.F. Germany. Strike Command is responsible for providing the air defence of the United Kingdom and reinforcement forces for N.A.T.O.; its roles include strike/attack, air defence, control and reporting, maritime surveillance, air reconnaissance, air-to-air refuelling, offensive support, air transport, aero-medical facilities, and search and rescue. Support Command is responsible for air and ground training, communications, engineering support, logistics, hospitals and for providing a range of administrative support. R.A.F. Germany provides tactical air support in N.A.T.O.'s Central Region; its roles include strike/attack, interdiction, counter air operations, air defence, close air support of land forces, tactical reconnaissance and helicopter support.

To carry out its tasks, the Royal Air Force is equipped with Victor, Tornado, Buccaneer, Phantom, Harrier, Jaguar, Canberra, Nimrod, Shackleton, VC10, Tristar, Hercules, Hawk, Jet Provost, Tucano, Chipmunk and Bulldog aircraft; Puma, Wessex, Sea King and Chinook helicopters; miscellaneous communications aircraft, etc.; Bloodhound and Rapier missiles, and the Skyguard system.

Royal Auxiliary Air Force.—The Auxiliary Air Force was formed in 1924 as a corps of civilians who would serve their country in flying machines in their spare time. In recognition of their distinguished war record King George VI granted the prefix 'Royal' in 1947. Despite a major disbandment in the late fifties, there has been a renaissance since the late seventies and today the force is some 2,000 strong, serving in three Maritime Headquarters Units, six Regiment Field Squadrons, a Movements Squadron, an Aeromedical Evacuation Squadron, a short-range Air Defence Squadron and four Defence Flights.

Air Commodore-in-Chief, H.M. The Queen.

Royal Air Force Volunteer Reserve.—The Royal Air Force Volunteer Reserve (R.A.F.V.R.) was created in 1936 with the object of providing training for the increased number of aircrew who were required for reserve service. The R.A.F.V.R. was reconstituted in 1947 following war service and today consists of some 200 part-time officers, and a few airmen. They serve in specialist Reserve Flights whose roles are intelligence, photographic interpretation and public relations. Additionally, some R.A.F.V.R. personnel undertake operational flying duties with the R.A.F.

PRINCESS MARY'S ROYAL AIR FORCE NURSING SERVICE

The Princess Mary's Royal Air Force Nursing Service (P.M.R.A.F.N.S.) is open to suitable male and female candidates. Commissions are offered to those who are Registered General Nurses (R.G.N.) and possess a second qualification suitable to the needs of the service. R.G.N.s with no additional experience or qualification are also recruited as non-commissioned officers in the grade of Staff Nurse.

Air Chief Commandant, H.R.H. Princess Alexandra, G.C.V.O.

Matron-in-Chief, Princess Mary's R.A.F. Nursing Service, Group Captain E. A. I. Sandison, R.R.C., Q.H.N.S.

WOMEN'S ROYAL AIR FORCE

Formed on April 1, 1918, the Women's Royal Air Force (W.R.A.F.) was disbanded on April 1, 1920 and reformed on February 1, 1949 from the Women's Auxiliary Air Force, the World War II Service, which had been formed on June 28, 1939, and from the R.A.F. Companies of the Auxiliary Territorial Service.

W.R.A.F. officers and airwomen, respectively, serve in most of the R.A.F. ground branches and trades and also as Air Loadmaster aircrew. W.R.A.F. personnel are employed at R.A.F. stations and higher formations at home and abroad, and they compete, on equal terms, with their R.A.F. counterparts for appointments, promotion and places on training courses.

Commandant-in-Chief, H.M. Queen Elizabeth the Queen Mother.

Air Chief Commandant, H.R.H. Princess Alice, Duchess of Gloucester.

Director, Air Commodore, R. Montague.

ROYAL OBSERVER CORPS

Bentley Priory, Stanmore, Middlesex

Established 1925, the Royal Observer Corps is a uniformed voluntary civilian organization originally set up to identify and track the movement of aircraft in war. In 1955 the Corps assumed the modern role of detecting nuclear bursts and monitoring radioactive fall-out in support of the United Kingdom

Warning and Monitoring Organization. The Corps is affiliated to the Royal Air Force and is administered by the Ministry of Defence.

Air Commodore-in-Chief, H.M. THE QUEEN.

Commandant, Air Commodore I. Horrocks

9. Flight Lieutenant (Flt.-Lt.).
10. Flying Officer (F.O.).
11. Pilot Officer (P.O.).

SERVICE SALARIES AND PENSIONS

The following rates of pay have been introduced as part of the 1989 pay award for Service personnel. The Government accepted the recommendations of the Top Salaries Review Body (which advises on ranks above Brigadier) and the Armed Forces Pay Review Body (which advises on pay levels for all ranks) from April 1, 1989.

Salaries for the Women's Services reflect equal pay

for equal work and conditions, but because the X-Factor addition for women is lower than for men (9 per cent compared to 10 per cent) women's rates approximate to 99·08 per cent of the rates for men.

Since 1970 the determining factor of the Review Bodies' recommendations has been the relation of forces' salaries to civilian earnings by a carefully detailed process of job evaluation.

SERVICE RETIREMENT BENEFITS, ETC.

NOTE—Those who leave the Forces having served at least five years, but not long enough to qualify for the appropriate immediate pension, now qualify for a preserved pension and terminal grant both of which are payable at age 60. The tax-free resettlement grants shown below are payable on release to those

who qualify for ■ preserved pension and who have completed 9 years service from age 21 (officers) or 12 years from age 18 (other ranks). The annual rates for the Army are given: these apply to the equivalent ranks in all Services, including the Nursing Services.

■ Including male nurses serving in the Q.A.R.N.N.S. holding equivalent rank.

RETIREMENT BENEFITS (WOMEN)

The annual rates for W.R.A.C. are given: these apply to equivalent ranks in all Services, including the Nursing Services.

OFFICERS (16–34 years' service).—Captain, £5,321–£9,709; Major, £6,341–£11,761; Lt.-Col., £8,142–£14,922; Colonel, £10,284–£17,251; Brigadier, £13,592–£18,746.

SERVICEWOMEN (22–37 years' service).—Below Corporal, £3,058–£4,660; Corporal, £3,950–£6,018; Sergeant, £4,346–£6,622; Staff Sergeant, £4,927–£7,506; Warrant Officer II, £5,067–£7,755; Warrant Officer I, £5,550–£8,544.

NOTES

Terminal grants are in each case three times the rate of retired pay or pension. There are special rates of retired pay for Chaplains, Flight Lieutenants (Specialist Aircrew), and certain other ranks not shown above. Deductions may be made in cases of voluntary retirement.

The normal rates of gratuity for officers with short service commissions are £1,825 (men) and £1,811 (women) for each year completed. Resettlement grants are: officers £6,271 (men) and £6,224 (women); non-commissioned ranks £4,149 (men), £4,118 (women).

THE CHURCHES THE CHURCH OF ENGLAND

THE GENERAL SYNOD OF THE CHURCH OF ENGLAND OFFICES.—Church House, Dean's Yard, SW1P 3NZ

The General Synod was constituted in 1970, under the Synodical Government Measure 1969, in succession to the former Church Assembly. There are in total some 574 members of the General Synod, divided into three distinct houses—the House of Bishops, the House of Clergy and the House of Laity. It is presided over jointly by the Archbishops of Canterbury and York and normally meets three times each year—in February, July and November.

The function of the General Synod is to consider and make provision for all matters concerning the Church of England, and to consider and express opinion on any other matters of religious or public interest. The Synod appoints a number of Committees, Boards and Councils which deal with, or advise the Synod on, a wide range of matters affecting the Church and its Ministry.

Under the Church of England Assembly (Powers) Act 1919 the General Synod has the power—delegated by Parliament—to frame Statute Law on any matter concerning the Church of England, which are known as Measures. A Measure, once approved by General Synod, must be laid before both Houses of Parliament who may accept or reject it but may not amend it. If the Measure is accepted it is then submitted for Royal Assent and when this has been given the Measure has the full force of Law just as an Act of Parliament.

The Synod also has the power to make Canons and other ecclesiastical regulations provided that they do not conflict with statutory law. Canons have to be submitted to the Crown before they can come into effect.

Presidents. The Archbishop of Canterbury; The Archbishop of York.
Sec. Gen., W. D. Pattinson.

THE HOUSE OF BISHOPS.—*Chairman*, The Archbishop of Canterbury; *Vice Chairman*, The Archbishop of York.

THE HOUSE OF CLERGY.—*Chairman*, The Archdeacon of Leicester; *Vice Chairman*, Canon P. H. Boulton.
